This Quarterly Report on Form 10-Q contains a number of forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). These statements may be identified by use of words such as "anticipate," "believe," "could," "estimate," "expect," "intend," "seek," "may," "outlook," "plan," "potential," "predict," "project," "should," "will," "would" and similar terms and phrases, including references to assumptions.

Forward-looking statements are based upon various assumptions and analyses made by Dime Community Bancshares, Inc. (the "Holding Company," and together with its direct and indirect subsidiaries, the "Company") in light of management's experience and its perception of historical trends, current conditions and expected future developments, as well as other factors it believes appropriate under the circumstances. These statements are not guarantees of future performance and are subject to risks, uncertainties and other factors (many of which are beyond the Company's control) that could cause actual conditions or results to differ materially from those expressed or implied by such forward-looking statements. These factors include, without limitation, the following:

- the timing and occurrence or non-occurrence of events may be subject to circumstances beyond the Company's control;
- there may be increases in competitive pressure among financial institutions or from non-financial institutions;
- changes in the interest rate environment may reduce interest margins;
- changes in deposit flows, loan demand or real estate values may adversely affect the business of The Dime Savings Bank of Williamsburgh (the "Bank");
- changes in accounting principles, policies or guidelines may cause the Company's financial condition to be perceived differently;

changes in corporate and/or individual income tax laws may adversely affect the Company's business or financial condition;

general economic conditions, either nationally or locally in some or all areas in which the Company conducts business, or conditions in the securities markets or the banking industry may be less favorable than the Company currently anticipates;

legislation or regulatory changes may adversely affect the Company's business;

technological changes may be more difficult or expensive than the Company anticipates;

success or consummation of new business initiatives may be more difficult or expensive than the Company anticipates;

litigation or other matters before regulatory agencies, whether currently existing or commencing in the future, may delay the occurrence or non-occurrence of events longer than the Company anticipates; and

The risks referred to in the section entitled "Risk Factors."

The Company has no obligation to update any forward-looking statements to reflect events or circumstances after the date of this document.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

(Dollars in Thousands Except Per Share Amounts)

1. NATURE OF OPERATIONS

The Holding Company is a Delaware corporation and parent company of the Bank, a New York State chartered stock savings bank. The Holding Company's direct subsidiaries are the Bank, Dime Community Capital Trust 1 and 842 Manhattan Avenue Corp. The Bank's direct subsidiaries are Boulevard Funding Corp., Dime Insurance Agency Inc. (f/k/a Havemeyer Investments, Inc.), DSBW Preferred Funding Corporation, DSBW Residential Preferred Funding Corp., Dime Reinvestment Corp. and 195 Havemeyer Corp.

The Bank maintains its headquarters in the Williamsburg section of Brooklyn, New York and operates twenty-six full service retail banking offices located in the New York City ("NYC") boroughs of Brooklyn, Queens, and the Bronx, and in Nassau County, New York. The Bank's principal business is gathering deposits from customers within its market area and via the internet, and investing them primarily in multifamily residential, commercial real estate and mixed used loans, as well as mortgage-backed securities ("MBS"), obligations of the U.S. Government and Government Sponsored Enterprises ("GSEs"), and corporate debt and equity securities. All of the Bank's lending occurs in the greater NYC metropolitan area.

2. SUMMARY OF ACCOUNTING POLICIES

In the opinion of management, the accompanying unaudited condensed consolidated financial statements contain all adjustments necessary for a fair presentation of the Company's financial condition as of March 31, 2013 and December 31, 2012, the results of operations and statements of comprehensive income for the three-month periods ended March 31, 2013 and 2012, and the changes in stockholders' equity and cash flows for the three months ended March 31, 2013 and 2012. The results of operations for the three-month period ended March 31, 2013 are not necessarily indicative of the results of operations for the remainder of the year ending December 31, 2013. Certain information and note disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") have been omitted pursuant to the rules and regulations of the U. S. Securities and Exchange Commission ("SEC").

The preparation of the condensed consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Please see "Part I - Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Critical Accounting Policies" for a discussion of areas in the accompanying condensed consolidated financial statements utilizing significant estimates.

These unaudited condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements as of and for the year ended December 31, 2012 and notes thereto.

3. RECENT ACCOUNTING PRONOUNCEMENTS

In February 2013, The Financial Accounting Standards Board ("FASB") issued Accounting Standards Update No. 2013-02, "Comprehensive Income (Topic 220): Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income" ("ASU 2013-02"), which seeks to improve the transparency of reporting reclassifications out of accumulated other comprehensive income. The provisions of ASU 2013-02 are applicable to all companies that report items of other comprehensive income, such as the Company. ASU 2013-02 requires a presentation (either on the face of the statement where net income is presented or in the notes to the financial statements) of the effects on the

line items of net income of significant amounts that have been reclassified in their entirety and in accordance with GAAP from accumulated other comprehensive income to net income in the same reporting period. ASU 2013-02 additionally requires a cross-reference to any other disclosures currently required under GAAP related to other reclassification items that, under GAAP, are not required to be reclassified in their entirety from accumulated other comprehensive income to net income in the same reporting period. ASU 2013-02 does not change the current requirements for reporting net income or other comprehensive income in the Company's financial statements. All information required to be presented or cross-referenced under ASU 2013-02 is currently required to be disclosed, in some capacity, in the financial statements under GAAP. The Company adopted ASU 2013-02 effective January 1, 2013. Adoption of ASU 2013-02 had no impact on the Company's consolidated financial condition or results of operations.

#### 4. TREASURY STOCK

The Holding Company did not repurchase any of its common stock into treasury during the three months ended March 31, 2013 or 2012.

## 5. OTHER COMPREHENSIVE INCOME (LOSS)

The before and after tax amounts allocated to each component of other comprehensive income (loss) are presented in the table below. Reclassification adjustments related to securities available for sale are included in the line entitled net gain securities in the accompanying consolidated statements of operations.

	Pre-tax Amount	Tax Expense (Benefit)	After tax Amount
Three Months Ended March 31, 2013			
Securities held-to maturity and transferred securities			
Change in non-credit component of OTTI	\$ 8	\$ 4	\$ 4
Change in unrealized loss on securities transferred to held to maturity	61	27	34
Total securities held-to-maturity and transferred securities	69	31	38
Securities available-for-sale			
Reclassification adjustment for net gains included in net income	(110 )	(50 )	(60 )
Change in net unrealized gain during the period	437	196	241
Total securities available-for-sale	327	146	181
Total other comprehensive income	\$ 396	\$ 177	\$ 219
Three Months Ended March 31, 2012			
Securities held-to maturity and transferred securities:			
Change in non-credit component of OTTI	\$ 4	\$ 2	\$ 2
Change in unrealized loss on securities transferred to held to maturity	46	21	25
Total securities held-to-maturity and transferred securities	50	23	27
Securities available-for-sale:			
Change in net unrealized gain during the period	62	27	35
Total securities available-for-sale	62	27	35
Defined benefit plans:			
Change in the net actuarial gain or loss	568	256	312
Total defined benefit plans	568	256	312
Total other comprehensive income	\$ 680	\$ 306	\$ 374

Activity in accumulated other comprehensive gain (loss), net of tax, was as follows:

	Securities Held-to-Maturity and Transferred Securities	Securities Available-for-Sale	Defined Benefit Plans	Total Accumulated Other Comprehensive Gain (Loss)
Balance as of January 1, 2013	\$ (1,043 )	\$ 1,178	\$(9,775 )	\$ (9,640 )
Other comprehensive income before reclassifications	38	241	-	279
Amounts reclassified from accumulated other comprehensive loss	-	(60 )	-	(60 )
Net other comprehensive income during the period	38	181	-	219
Balance as of March 31, 2013	\$ (1,005 )	\$ 1,359	\$(9,775 )	\$ (9,421 )
Balance as of January 1, 2012	\$ (1,316 )	\$ 3,078	\$(11,471 )	\$ (9,709 )
Other comprehensive income before reclassifications	27	35	312	374
Amounts reclassified from accumulated other comprehensive loss	-	-	-	-

Net other comprehensive income during the period	27	35	312	374
Balance as of March 31, 2012	\$ (1,289	) \$ 3,113	\$(11,159)	\$ (9,335 )

#### 6. EARNINGS PER SHARE ("EPS")

Basic EPS is computed by dividing income attributable to common stock by the weighted-average common shares outstanding during the reporting period. Diluted EPS is computed using the same method as basic EPS, but reflects the potential dilution that would occur if "in the money" stock options were exercised and converted into common stock. In determining the weighted average shares outstanding for basic and diluted EPS, treasury stock and unallocated ESOP shares are excluded. Vested restricted stock award shares are included in the calculation of the weighted average shares outstanding for basic and diluted EPS. Unvested restricted stock award shares are recognized as a special class of securities under ASC 260.

Edgar Filing: DIME COMMUNITY BANCSHARES INC - Form 10-Q

The following is a reconciliation of the numerators and denominators of basic EPS and diluted EPS for the periods presented:

	Three Months Ended March 31,	
	2013	2012
Net income per the Consolidated Statements of Operations	\$10,570	\$10,247
Less: Dividends paid and earnings allocated to participating securities	(46 )	(45 )
Income attributable to common stock	\$10,524	\$10,202
Weighted average common shares outstanding, including participating securities	34,823,296	34,045,677
Less: weighted average participating securities	(325 )	(324 )
Weighted average common shares outstanding	34,822,971	34,045,353
Basic EPS	\$0.30	\$0.30
Income attributable to common stock	\$10,524	\$10,202
Weighted average common shares outstanding	34,822,971	34,045,353
Weighted average common equivalent shares outstanding	56,268	96,222
Weighted average common and equivalent shares outstanding	34,879,239	34,141,575
Diluted EPS	\$0.30	\$0.30

Common equivalent shares resulting from the dilutive effect of "in-the-money" outstanding stock options are calculated based upon the excess of the average market value of the Holding Company's common stock over the exercise price of outstanding in-the-money stock options during the period.

There were 1,300,035 and 1,282,607 weighted-average stock options outstanding for the three-month periods ended March 31, 2013 and 2012, respectively, that were not considered in the calculation of diluted EPS since their exercise prices exceeded the average market price during the period.

## 7. ACCOUNTING FOR STOCK BASED COMPENSATION

During the three months ended March 31, 2013 and 2012, the Holding Company and Bank maintained the Dime Community Bancshares, Inc. 2001 Stock Option Plan for Outside Directors, Officers and Employees and the 2004 Stock Incentive Plan (collectively the "Stock Plans"), which are discussed more fully in Note 15 to the Company's audited consolidated financial statements for the year ended December 31, 2012, and which are subject to the accounting requirements of ASC 505-50 and ASC 718. There were no grants of stock options during the three months ended March 31, 2013 or 2012.

### Stock Option Awards

Combined activity related to stock options granted under the Stock Plans during the periods presented was as follows:

	At or for the Three Months Ended March 31,	
	2013	2012
Options outstanding – beginning of period	2,456,137	2,893,760
Options granted	-	-
Options exercised	(157,670 )	(61,247 )
Options forfeited	(3,095 )	-
Options outstanding – end of period	2,295,372	2,832,513
Intrinsic value of options exercised	\$150	\$279
Compensation expense recognized	73	85

Edgar Filing: DIME COMMUNITY BANCSHARES INC - Form 10-Q

Remaining unrecognized compensation expense	261	459
Intrinsic value of outstanding options at period end	1,070	2,291
Intrinsic value of vested options at period end	841	1,856
Weighted average exercise price of vested options – end of period	15.98	15.43

9

---

## Restricted Stock Awards

The Company, from time to time, issues restricted stock awards to outside directors and officers under the 2004 Stock Incentive Plan. Typically, awards to outside directors fully vest on the first anniversary of the grant date, while awards to officers vest in equal annual installments over a four-year period.

The following is a summary of activity related to the restricted stock awards granted under the 2004 Stock Incentive Plan during the periods indicated:

	At or for the Three Months Ended March 31,	
	2013	2012
Unvested allocated shares – beginning of period	328,003	324,454
Shares granted	-	-
Shares vested	(6,855 )	-
Shares forfeited	-	-
Unvested allocated shares – end of period	321,148	324,454
Compensation recorded to expense	\$526	\$438

## 8. LOANS RECEIVABLE AND CREDIT QUALITY

Loans are reported at the principal amount outstanding, net of unearned fees or costs and the allowance for loan losses. Interest income on loans is recorded using the level yield method. Under this method, discount accretion and premium amortization are included in interest income. Loan origination fees and certain direct loan origination costs are deferred and amortized as yield adjustments over the contractual loan terms.

### Credit Quality Indicators:

The Company categorizes loans into risk categories based on relevant information about the ability of borrowers to service their debt, such as: current financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors. The Company analyzes loans individually by classifying them as to credit risk. This analysis includes all non-homogeneous loans, such as multifamily residential, mixed use residential (i.e., loans in which the aggregate rental income of the underlying collateral property is generated from both residential and commercial units, but the majority of such income is generated from the residential units), mixed use commercial real estate (i.e., loans in which the aggregate rental income of the underlying collateral property is generated from both residential and commercial units, but the majority of such income is generated from the commercial units), commercial real estate and construction and land acquisition loans, as well as one-to four family residential and cooperative apartment loans with balances in excess of the Fannie Mae ("FNMA") conforming loan limits for high-cost areas such as the Bank's primary lending area ("FNMA Limits"). This analysis is performed on a quarterly basis. The Company uses the following definitions for risk ratings:

**Special Mention.** Loans classified as special mention have a potential weakness that deserves management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or of the Bank's credit position at some future date.

**Substandard.** Loans classified as substandard are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected.

Doubtful. Loans classified as doubtful have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of then existing facts, conditions, and values, highly questionable and improbable.

The Bank had no loans classified as Doubtful at both March 31, 2013 and December 31, 2012. All loans not classified as Special Mention or Substandard were deemed pass loans at both March 31, 2013 and December 31, 2012.

10

---

Edgar Filing: DIME COMMUNITY BANCSHARES INC - Form 10-Q

The following is a summary of the credit risk profile of real estate loans (including deferred costs) by internally assigned grade as of the dates indicated:

Grade	Balance at March 31, 2013					
	One- to Four-Family Residential and Cooperative Unit	Multifamily Residential and Mixed Use Residential	Mixed Use Commercial Real Estate	Commercial Real Estate	Construction	Total
Pass	\$63,163	\$2,700,314	\$ 328,870	\$ 377,646	\$ -	\$3,469,993
Special Mention	6,759	7,086	3,597	6,196	-	23,638
Substandard	2,429	3,524	8,590	22,136	416	37,095
Total real estate loans individually assigned a credit grade	\$72,351	\$2,710,924	\$ 341,057	\$ 405,978	\$ 416	\$3,530,726
Real estate loans not individually assigned a credit grade <sup>(1)</sup>	\$13,661					\$13,661

<sup>(1)</sup> Amount comprised of fully performing one- to four-family residential and cooperative unit loans with balances equal to or less than the FNMA Limits. The credit quality of these loans was instead evaluated based upon payment activity.

Grade	Balance at December 31, 2012					
	One- to Four-Family Residential and Cooperative Unit	Multifamily Residential and Mixed Use Residential	Mixed Use Commercial Real Estate	Commercial Real Estate	Construction	Total
Pass	\$66,415	\$2,665,410	\$ 326,053	\$ 363,299	\$ -	\$3,421,177
Special Mention	6,333	7,711	5,547	2,639	-	22,230
Substandard	2,987	3,248	8,533	28,593	476	43,837
Total real estate loans individually assigned a credit grade	\$75,735	\$2,676,369	\$ 340,133	\$ 394,531	\$ 476	\$3,487,244
Real estate loans not individually assigned a credit grade <sup>(1)</sup>	\$16,141					\$16,141

<sup>(1)</sup> Amount comprised of fully performing one- to four-family residential and cooperative unit loans with balances equal to or less than the FNMA Limits. The credit quality of these loans was instead evaluated based upon payment activity.

For consumer loans, the Company evaluates credit quality based on payment activity. Consumer loans that are 90 days or more past due are placed on non-accrual status, while all remaining consumer loans are classified and evaluated as performing.

The following is a summary of the credit risk profile of consumer loans by internally assigned grade:

	Balance at March 31, 2013	Balance at December 31, 2012
Grade Performing	\$ 1,960	\$ 2,415
Non-accrual	7	8
Total	\$ 1,967	\$ 2,423

11

---

Edgar Filing: DIME COMMUNITY BANCSHARES INC - Form 10-Q

The following is a breakdown of the past due status of the Company's investment in loans (excluding accrued interest and loans held for sale) as of the dates indicated:

At March 31, 2013

	30 to 59 Days Past Due	60 to 89 Days Past Due	Loans 90 Days or More Past Due and Still Accruing Interest	Non-accrual (1)	Total Past Due	Total Current	Total Loans
Real Estate:							
One- to four-family residential and cooperative unit	\$304	\$192	\$ -	\$ 697	\$1,193	\$84,819	\$86,012
Multifamily residential and residential mixed use	916	-	186	809	1,911	2,709,013	2,710,924
Mixed use commercial real estate	-	-	-	1,159	1,159	339,898	341,057
Commercial real estate	563	-	-	5,500	6,063	399,915	405,978
Construction	-	-	-	-	-	416	416
Total real estate	\$1,783	\$192	\$ 186	\$ 8,165	\$10,326	\$3,534,062	\$3,544,387
Consumer	\$5	\$5	\$ -	\$ 7	\$17	\$1,950	\$1,967

(1) Includes all loans on non-accrual status regardless of the number of days such loans were delinquent as of March 31, 2013.

At December 31, 2012

	30 to 59 Days Past Due	60 to 89 Days Past Due	Loans 90 Days or More Past Due and Still Accruing Interest	Non-accrual (1)	Total Past Due	Total Current	Total Loans
Real Estate:							
One- to four-family residential and cooperative unit	\$336	\$155	\$ -	\$ 938	\$1,429	\$90,447	\$91,876
Multifamily residential and residential mixed use	6,451	-	190	507	7,148	2,669,221	2,676,369
Mixed use commercial real estate	-	-	-	1,170	1,170	338,963	340,133
Commercial real estate	207	-	-	6,265	6,472	388,059	394,531
Construction	-	-	-	-	-	476	476
Total real estate	\$6,994	\$155	\$ 190	\$ 8,880	\$16,219	\$3,487,166	\$3,503,385
Consumer	\$2	\$5	\$ -	\$ 8	\$15	\$2,408	\$2,423

(1) Includes all loans on non-accrual status regardless of the number of days such loans were delinquent as of December 31, 2012.

Accruing Loans 90 Days or More Past Due:

The Bank owned one real estate loan with an outstanding balance of \$186 at March 31, 2013 and \$190 at December 31, 2012, that was 90 days or more past due on its contractual balloon principal payment and continued to make monthly payments consistent with its initial contractual amortization schedule exclusive of the balloon payment. This loan, which is both well secured and expected to be refinanced during the year ending December 31, 2013, remained on accrual status at both March 31, 2013 and December 31, 2012, and was deemed a performing asset.

12

---

Troubled Debt Restructured Loans ("TDRs").

The following table summarizes outstanding TDRs by underlying collateral type as of the dates indicated:

	As of March 31, 2013		As of December 31, 2012	
	No. of Loans	Balance	No. of Loans	Balance
One- to four-family residential and cooperative unit	3	\$944	3	\$948
Multifamily residential and residential mixed use	5	1,933	5	1,953
Mixed use commercial real estate	1	724	1	729
Commercial real estate	11	43,738	13	47,493
Total real estate	20	\$47,339	22	\$51,123

The following table summarizes outstanding TDRs by accrual status as of the dates indicated:

	As of March 31, 2013		As of December 31, 2012	
	No. of Loans	Balance	No. of Loans	Balance
Outstanding principal balance at period end	20	\$47,339	22	\$51,123
TDRs on accrual status at period end	18	41,444	20	44,858
TDRs on non-accrual status at period end	2	5,895	2	6,265

Accrual status for TDRs is determined separately for each TDR in accordance with the Bank's policies for determining accrual or non-accrual status. At the time an agreement is entered into between the Bank and the borrower that results in the Bank's determination that a TDR has been created, the loan can be either on accrual or non-accrual status. If a loan is on non-accrual status at the time it is restructured, it continues to be classified as non-accrual until the borrower has demonstrated compliance with the modified loan terms for a period of at least six months. Conversely, if at the time of restructuring the loan is performing (and accruing), it will remain accruing throughout its restructured period, unless the loan subsequently meets any of the criteria for non-accrual status under either the Bank's policy and/or the criteria related to accrual of interest established by agency regulations.

The Company has not restructured troubled consumer loans, as its consumer loan portfolio has not experienced any problem issues warranting restructuring. Therefore, all TDRs were collateralized by real estate at both March 31, 2013 and December 31, 2012.

The following table summarizes activity related to TDRs for the periods indicated:

	For the Three Months Ended March 31, 2013		For the Three Months Ended March 31, 2012	
	Pre-Modification Outstanding of Recorded Loans	Post-Modification Outstanding Recorded Investment	Pre-Modification Outstanding of Recorded Loans	Post-Modification Outstanding Recorded Investment
Loan modifications during the period				

that met the definition of a TDR:

Multifamily residential and residential	-	-	-	1	\$ 459	\$ 459
mixed use	-	-	-	2	4,430	4,430
Commercial real estate	-	-	-	3	\$ 4,889	\$ 4,889
TOTAL	-	-	-			

During the three months ended March 31, 2012, the Company made modifications to other existing loans that were deemed both insignificant and sufficiently temporary in nature, thus not warranting classification as TDRs. Such activity was immaterial.

The Bank's allowance for loan losses at March 31, 2013 reflected \$490 of allocated reserve associated with TDRs. The Bank's allowance for loan losses at December 31, 2012 reflected \$520 of allocated reserve associated with TDRs. Activity related to reserves associated with TDRs was immaterial during the three months ended March 31, 2013. During the three months ended March 31, 2012, allocated reserves totaling \$1,013 associated with nine TDRs were removed, as improvement in the underlying conditions of these loans resulted in the determination that the allocated reserve was no longer warranted. In addition, during the three months ended March 31, 2012 \$154, of reserves were charged-off upon the disposal of two TDRs.

As of March 31, 2013 and December 31, 2012, the Bank had no loan commitments to borrowers with outstanding TDRs.

A TDR is considered to be in payment default once it is 90 days contractually past due under the modified terms. All TDRs are considered impaired loans and are evaluated individually for measurable impairment, if any.

There were no TDRs which defaulted within twelve months following the modification during the three months ended March 31, 2013 and 2012 (thus no significant impact to the allowance for loan losses during those periods).

### Impaired Loans

A loan is considered impaired when, based on current information and events, it is probable that all contractual amounts due will not be collected in accordance with the terms of the loan. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays or shortfalls generally are not classified as impaired. Management determines the significance of payment delays and shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed.

Generally, the Bank considers TDRs and non-accrual multifamily residential and commercial real estate loans, along with non-accrual one- to four-family loans in excess of the FNMA Limits, to be impaired. Non-accrual one-to four-family loans equal to or less than the FNMA Limits, as well as all consumer loans, are considered homogeneous loan pools and are not required to be evaluated individually for impairment unless considered a TDR.

Impairment is typically measured using the difference between the outstanding loan principal balance and either: 1) the likely realizable value of a note sale; 2) the fair value of the underlying collateral, net of likely disposal costs, if repayment is expected solely from liquidation of the collateral; or 3) the present value of estimated future cash flows using the loan's existing rate. If a TDR is substantially performing in accordance with its restructured terms, management will look to either the present value of the expected cash flows from the debt service or the potential net liquidation proceeds of the underlying collateral property in measuring impairment (whichever is deemed most appropriate under the circumstances). If a TDR has re-defaulted, generally the likely realizable net proceeds from either a note sale or the liquidation of the collateral is considered when measuring impairment. Measured impairment is either charged off immediately or, in limited instances, recognized as an allocated reserve within the allowance for loan losses.

Please refer to Note 9 for tabular information related to impaired loans.

### Delinquent Serviced Loans Subject to a Recourse Obligation

As of March 31, 2013 and December 31, 2012, the Bank serviced a pool of multifamily loans sold to FNMA, and retained an obligation (off-balance sheet contingent liability) to absorb a portion of any losses (as defined in the seller/servicer agreement) incurred by FNMA in connection with the loans sold (the "First Loss Position").

Under the terms of its seller/servicer agreement with FNMA, the Bank is obligated to fund FNMA all monthly principal and interest payments under the original terms of the sold loans until the earlier of the following events: (i) the Bank re-acquires the loan from FNMA or it enters OREO status; (ii) the entire pool of loans sold to FNMA have either been fully satisfied or enter OREO status; or (iii) the First Loss Position is fully exhausted.

At March 31, 2013, within the pool of multifamily loans sold to FNMA, there was one \$474 loan 90 days or more delinquent and one \$228 loan delinquent between 30 and 89 days. At December 31, 2012, within the pool of multifamily loans sold to FNMA, there was one \$474 loan 90 days or more delinquent and one \$229 loan delinquent between 30 and 89 days.

9. ALLOWANCE FOR LOAN LOSSES AND LIABILITY FOR FIRST LOSS POSITION

The allowance for loan losses may consist of specific and general components. The Bank's periodic evaluation of its allowance for loan losses (specific or general) is comprised of four primary components: (1) impaired loans; (2) non-impaired substandard loans; (3) non-impaired special mention loans; and (4) pass graded loans. Within these components, the Company has identified the following portfolio segments for purposes of assessing its allowance for loan losses (specific or general): 1) real estate loans; and 2) consumer loans. Within the segments, the Bank analyzes the allowance based upon the underlying collateral type (classes). Consumer loans represent a nominal portion of the Company's loan portfolio, and were thus evaluated in aggregate as of both March 31, 2013 and December 31, 2012.

14

---

### Impaired Loan Component

All multifamily residential, mixed use, commercial real estate and construction loans that are deemed to meet the definition of impaired are individually evaluated for impairment. In addition, all cooperative unit and one- to four-family residential real estate loans in excess of the FNMA Limits are individually evaluated for impairment.

Impairment is typically measured using the difference between the outstanding loan principal balance and either: 1) the likely realizable value of a note sale; 2) the fair value of the underlying collateral, net of likely disposal costs, if repayment is expected solely from liquidation of the collateral; or 3) the present value of estimated future cash flows using the loan's existing rate. For impaired loans on non-accrual status, either of the initial two measurements is utilized.

All TDRs are considered impaired loans and are evaluated individually for measurable impairment, if any. If a TDR is substantially performing in accordance with its restructured terms, management will look to either the present value of the expected cash flows from the debt service or the potential net liquidation proceeds of the underlying collateral property in measuring impairment (whichever is deemed most appropriate under the circumstances). If a TDR has re-defaulted, the likely realizable net proceeds from either a note sale or the liquidation of the collateral is generally considered when measuring impairment. While measured impairment is charged off immediately, impairment measured from a reduction in the present value of expected cash flows of a performing TDR was reflected as an allocated reserve within the allowance for loan losses at both March 31, 2013 and December 31, 2012.

Large groups of smaller balance homogeneous real estate loans, such as cooperative unit and one-to four-family residential real estate loans with balances equal to or less than the FNMA Limits, are collectively evaluated for impairment, and accordingly, are not separately identified for impairment disclosures.

### Non-Impaired Substandard Loan Component

At both March 31, 2013 and December 31, 2012, the reserve allocated within the allowance for loan losses associated with loans internally classified as Substandard (excluding impaired loans internally designated as Substandard) reflected expected loss percentages on the Bank's pool of such loans that were derived based upon an analysis of historical losses over a measurement timeframe. This reserve allocation was determined in a manner substantially similar to non-impaired Special Mention loans at both March 31, 2013 and December 31, 2012.

The portion of the allowance for loan losses attributable to non-impaired Substandard loans was \$697 at March 31, 2013 and \$795 at December 31, 2012. The decline resulted primarily from a reduction of \$2,099 in the balance of such loans from December 31, 2012 to March 31, 2013.

All non-impaired Substandard loans were deemed sufficiently well secured and performing to have remained on accrual status both prior and subsequent to their downgrade to the Substandard internal loan grade.

### Non-Impaired Special Mention Loan Component

At both March 31, 2013 and December 31, 2012, the reserve allocated within the allowance for loan losses associated with loans internally classified as Special Mention (excluding impaired loans internally designated as Special Mention) reflected an expected loss percentage on the Bank's pool of such loans that was derived based upon an analysis of historical losses over a measurement timeframe. The loss percentage resulting from this analysis was then applied to the aggregate pool of non-impaired Special Mention loans at March 31, 2013 and December 31, 2012.

Based upon this methodology, increases or decreases in the amount of either non-impaired Special Mention loans or charge-offs associated with such loans, or a change in the measurement timeframe utilized to derive the expected loss percentage, would impact the level of reserves determined on non-impaired Special Mention loans. As a result, the allowance for loan losses associated with non-impaired Special Mention loans is subject to volatility.

The portion of the allowance for loan losses attributable to non-impaired Special Mention loans increased from \$145 at December 31, 2012 to \$242 at March 31, 2013, due primarily to an increase in the estimated loss percentage determined to be applied to such loans from December 31, 2012 to March 31, 2013.

#### Pass Graded Loan Component

The Bank initially looks to the underlying collateral type when determining the allowance for loan losses associated with pass graded real estate loans. The following underlying collateral types are analyzed separately: 1) one- to four family residential and cooperative unit; 2) multifamily residential and residential mixed use; 3) mixed use commercial real estate, 4) commercial real estate; and 5) construction and land acquisition. Within the analysis of each underlying collateral type, the following elements are additionally considered and provided weighting in determining the allowance for loan losses for pass graded real estate loans:

- (i) Charge-off experience
- (ii) Economic conditions
- (iii) Underwriting standards or experience
- (iv) Loan concentrations

(v) Loan seasoning

The following is a brief synopsis of the manner in which each element is considered:

(i) Charge-off experience – Loans within the pass graded loan portfolio are segmented by significant common characteristics, against which historical loss rates are applied.

(ii) Economic conditions - At both March 31, 2013 and December 31, 2012, the Bank assigned a loss allocation to its entire pass graded real estate loan portfolio based, in part, upon a review of economic conditions affecting the local real estate market. Specifically, the Bank considered both the level of, and recent trends in: 1) the local and national unemployment rate, 2) residential and commercial vacancy rates, 3) real estate sales and pricing, and 4) delinquencies in the Bank's loan portfolio.

(iii) Underwriting standards or experience – Underwriting standards are reviewed to ensure that changes in the Bank's lending policies and practices are adequately evaluated for risk and reflected in its analysis of potential credit losses. Different loss expectations are then incorporated into the methodology.

(iv) Concentrations of credit – The Bank regularly reviews its loan concentrations (borrower, collateral type and location) in order to ensure that heightened risk has not evolved that has not been captured through other factors. The risk component of loan concentrations is regularly evaluated for reserve adequacy.

(v) Loan Seasoning – The Bank analyzes its charge-off history in order to determine whether loans that are over three years past their origination date (referred to as seasoned loans) have experienced lower loss levels, and would thus warrant a lower expected loss percentage. This element was given minimal consideration in the March 31, 2013 and December 31, 2012 evaluations. The minimal consideration resulted from an analysis of the loss experience recognized during the recent recessionary period, which concluded that the age or seasoning of a loan did not inversely correlate to the Bank's loss experience.

Consumer Loans

Due to their small individual balances, the Bank does not evaluate individual consumer loans for impairment. Loss percentages are applied to aggregate consumer loans based upon both their delinquency status and loan type. These loss percentages are derived from a combination of the Company's historical loss experience and/or nationally published loss data on such loans. Consumer loans in excess of 120 days delinquent are typically fully charged off against the allowance for loan losses.

The following table presents data regarding the allowance for loan losses and loans evaluated for impairment by class of loan within the real estate loan segment as well as for the aggregate consumer loan segment:

At or for the Three Months Ended March 31, 2013

	Real Estate Loans					Consumer Loans	
	One- to Four Family Residential and Cooperative Unit	Multifamily Residential and Mixed Use Residential	Mixed Use Commercial Real Estate	Commercial Real Estate	Construction	Total Real Estate	
Beginning balance	\$344	\$14,299	\$2,474	\$3,382	\$24	\$20,523	\$27
Provision (credit) for loan losses	92	(298)	87	273	(2)	152	5

Edgar Filing: DIME COMMUNITY BANCSHARES INC - Form 10-Q

Charge-offs	(88 )	(111 )	-	(4 )	-	(203 )	(6 )
Recoveries	2	-	29	1	-	32	-

Reserve Liability for First Loss Position

At both March 31, 2013 and December 31, 2012, the Bank serviced a pool of loans that were sold to FNMA and were subject to the First Loss Position. The Bank maintains a reserve liability in relation to the First Loss Position that reflects estimated losses on this loan pool at each period end. For performing loans within the FNMA serviced pool, the reserve recognized is based upon the historical loss experience on this loan pool. For problem loans within the pool, the estimated losses are determined in a manner consistent with impaired loans within the Bank's loan portfolio.

The following is a summary of the aggregate balance of multifamily loans serviced for FNMA, the period-end First Loss Position associated with these loans, and activity in the related liability:

	At or for the Three Months Ended March 31,	
	2013	2012
Outstanding balance of multifamily loans serviced for FNMA at period end	\$244,159	\$300,347
Total First Loss Position at end of period	15,428	16,356
Reserve Liability on the First Loss Position		
Balance at beginning of period	\$1,383	\$2,993
Transfer of specific reserve for serviced loans re-acquired by the Bank	-	
Credit for losses on problem loans <sup>(1)</sup>	(92 )	
Charge-offs and other net reductions in balance	-	(35 )
Balance at period end	\$1,291	\$2,958

<sup>(1)</sup> Amount recognized as a component of mortgage banking income during the period.

10. INVESTMENT AND MORTGAGE-BACKED SECURITIES

The following is a summary of major categories of securities owned by the Company at March 31, 2013:

	Purchase		Unrealized Gains or Losses Recognized in Accumulated Other Comprehensive Loss			Book	Other	Fair
	Amortized	Recorded	Non-Credit	Unrealized	Unrealized	Value	Unrecognized	Value
	/	Amortized/	OTTI	Gains	Losses		Losses	
	Historical	Historical						
	Cost	Cost <sup>(1)</sup>						
Investment securities held-to-maturity:

Private issuer CMOs	813	813	-	8	-	821	-	821

(1) Amount represents the purchase amortized / historical cost less any credit-related OTTI charges recognized through earnings.

(2) Amount represents the unamortized portion of the unrealized loss that was recognized in accumulated other comprehensive loss on September 1, 2008 (the day on which these securities were transferred from available-for-sale to held-to-maturity).

Edgar Filing: DIME COMMUNITY BANCSHARES INC - Form 10-Q

The following is a summary of major categories of securities owned by the Company at December 31, 2012:

	Purchase		Unrealized Gains or Losses Recognized in Accumulated Other Comprehensive Loss			Book	Other	Fair
	Amortized / Historical Cost	Recorded Amortized/ Historical Cost <sup>(1)</sup>	Non-Credit OTTI	Unrealized Gains	Unrealized Losses	Value	Unrecognized Gains	Value
Investment securities held-to-maturity:								
TRUPS	\$ 16,773	\$ 7,828	\$(633)		\$ (1,268 ) <sup>(2)</sup>	\$ 5,927	\$ 340	\$ 6,267
Investment securities available for sale:								
Registered Mutual Funds	2,904	2,556	-	449	-	3,005	-	3,005
Agency notes	29,820	29,820	-	125	-	29,945	-	29,945
Pass-through MBS issued by GSEs	43,142	43,142	-	1,561	(25 )	44,678	-	44,678
CMOs issued by GSEs	2,436	2,436	-	26	-	2,462	-	2,462
Private issuer pass through MBS	962	962	-	-	(7 )	955	-	955
Private issuer CMOs	908	908	-	18	-	926	-	926

(1) Amount represents the purchase amortized / historical cost less any credit-related OTTI charges recognized through earnings.

(2) Amount represents the unamortized portion of the unrealized loss that was recognized in accumulated other comprehensive loss on September 1, 2008 (the day on which these securities were transferred from available-for-sale to held-to-maturity).

At March 31, 2013, the agency note investments in the table on the preceding page had contractual maturities as follows:

	Amortized Cost	Estimated Fair Value
Due after one year through three years	\$ 15,000	\$ 15,083
Due after three years through five years	70	70
TOTAL	\$ 15,070	\$ 15,153

The held-to-maturity TRUPS had a weighted average term to maturity of 21.8 years at March 31, 2013. At March 31, 2013, MBS available-for-sale (which included pass-through MBS issued by GSEs, CMOs issued by GSEs, one private issuer pass through MBS and one private issuer CMO) possessed a weighted average contractual maturity of 17.1 years and a weighted average estimated duration of 1.2 years. There were no sales of investment securities either held-to-maturity or available-for-sale or sales of MBS available-for-sale during the three-months ended March 31, 2013 or 2012.

As of each reporting period through March 31, 2013, the Company has applied the protocol established by ASC 320-10-65 ("ASC 320-10-65") in order to determine whether OTTI existed for the TRUPS and/or to measure, for TRUPS that have been determined to be other than temporarily impaired, the credit related and non-credit related components of OTTI. As of March 31, 2013, six TRUPS were determined to meet the criteria for OTTI based upon this analysis. At March 31, 2013, these six securities had credit ratings ranging from "C" to "Caa3."

The following table provides a reconciliation of the pre-tax OTTI charges recognized on the Company's TRUPS:

	At or for the Three Months Ended March 31, 2013			At or for the Three Months Ended March 31, 2012		
	Credit Related OTTI Recognized in Earnings	Non-Credit OTTI Recognized in Accumulated Other Comprehensive Loss	Total OTTI	Credit Related OTTI Recognized in Earnings	Non-Credit OTTI Recognized in Accumulated Other Comprehensive Loss	Total OTTI
Cumulative balance at the beginning of the period	\$8,945	\$634	\$9,579	\$8,974	\$930	\$9,904
OTTI recognized on securities with previous OTTI Reductions and transfers to credit-related OTTI	-	-	-	181	6	187
Amortization of previously recognized OTTI	1	(9)	(8)		(10)	(10)
Cumulative balance at end of the period	\$8,946	\$625	\$9,571	\$9,155	\$926	\$10,081

The following table summarizes the gross unrealized losses and fair value of investment securities as of March 31, 2013, aggregated by investment category and the length of time the securities were in a continuous unrealized loss position:

	Less than 12 Months Consecutive Unrealized Losses		12 Months or More Consecutive Unrealized Losses		Total	
	Fair Value	Gross Unrecognized/ Unrealized Losses	Fair Value	Gross Unrecognized/ Unrealized Losses	Fair Value	Gross Unrecognized/ Unrealized Losses
	Held-to-Maturity Securities:					
TRUPS <sup>(1)</sup>	\$-	\$-	\$3,776	\$1,411	\$3,776	\$1,411

(1) At March 31, 2013, the recorded balance of these securities was \$3,980. This balance reflected the remaining unrealized loss of \$1,207 that was recognized in accumulated other comprehensive loss on September 1, 2008 (the day on which these securities were transferred from available-for-sale to held-to-maturity). In accordance with both ASC 320-10-35-17 and 320-10-65, these unrealized losses are currently being amortized over the remaining estimated life of these securities.

**TRUPS That Have Maintained an Unrealized Holding Loss for 12 or More Consecutive Months**

At March 31, 2013, impairment of two of the TRUPS, with an amortized cost of \$5,187, was deemed temporary. These securities remained in an unrealized loss for 12 or more consecutive months, and their cumulative unrealized loss was \$1,411 at March 31, 2013, reflecting both illiquidity in the marketplace and concerns over future bank failures. At March 31, 2013, both of these securities had ratings ranging from "BB-" to "Ba1." Despite both the significant decline in market value and the duration of their impairment, management believed that the unrealized losses on these securities at March 31, 2013 were temporary, and that the full value of the investments would be realized once the market dislocations have been removed, or as the securities continued to make their contractual payments of principal and interest. In making this determination, management considered the following:

- Based upon an internal review of the collateral backing the TRUPS portfolio, which accounted for current and prospective deferrals, the securities could reasonably be expected to continue making all contractual payments
- The Company had the intent and ability to hold these securities until they fully recover their impairment, evidenced by the election to reclassify them as held-to-maturity in 2008
- There were no cash or working capital requirements nor contractual or regulatory obligations that would compel the Company to sell these securities prior to their forecasted recovery or maturity
- Each security has a pool of underlying issuers comprised primarily of banks
- Neither of the securities have exposure to real estate investment trust issued debt (which has experienced high default rates)
- Each security featured either a mandatory auction or a de-leveraging mechanism that could result in principal repayments to the Bank prior to the stated maturity of the security
- Each security is characterized by some level of over-collateralization

The following summarizes the gross unrealized losses and fair value of investment securities and MBS as of December 31, 2012, aggregated by investment category and the length of time that the securities were in a continuous unrealized loss position:

	Less than 12 Months Consecutive Unrealized Losses	12 Months or More Consecutive Unrealized Losses	Total
--	---	---	-------

Edgar Filing: DIME COMMUNITY BANCSHARES INC - Form 10-Q

	Fair Value	Gross Unrecognized/ Unrealized Losses	Fair Value	Gross Unrecognized/ Unrealized Losses	Fair Value	Gross Unrecognized/ Unrealized Losses
Held-to-Maturity Securities:						
TRUPS <sup>(1)</sup>	\$-	\$-	\$3,705	\$1,732	\$3,705	\$1,732
Available-for-Sale Securities:						
Federal Home Loan Mortgage Corporation pass-through certificates	\$5,867	\$25	\$-	\$-	\$5,867	\$25
Private label MBS	-	-	954	7	954	7

(1) At December 31, 2012, the recorded balance of these securities was \$4,170. This balance reflected the remaining unrealized loss of \$1,268 that was recognized in accumulated other comprehensive loss on September 1, 2008 (the day on which these securities were transferred from

available-for-sale to held-to-maturity). In accordance with both ASC 320-10-35-17 and 320-10-65, these unrealized losses are currently being amortized over the remaining estimated life of these securities.

## 11. FAIR VALUE OF FINANCIAL INSTRUMENTS

The fair value hierarchy established under ASC 820-10 is summarized as follows:

**Level 1 Inputs** – Quoted prices (unadjusted) for identical assets or liabilities in active markets that the reporting entity has the ability to access at the measurement date.

**Level 2 Inputs** – Significant other observable inputs such as any of the following: (1) quoted prices for similar assets or liabilities in active markets, (2) quoted prices for identical or similar assets or liabilities in markets that are not active, (3) inputs other than quoted prices that are observable for the asset or liability (e.g., interest rates and yield curves observable at commonly quoted intervals, volatilities, prepayment speeds, loss severities, credit risks, and default rates), or (4) inputs that are derived principally from or corroborated by observable market data by correlation or other means (market-corroborated inputs).

**Level 3 Inputs** – Significant unobservable inputs for the asset or liability. Significant unobservable inputs reflect the reporting entity's own assumptions about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk). Significant unobservable inputs shall be used to measure fair value to the extent that observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date.

The following tables present the assets that are reported on the consolidated statements of financial condition at fair value as of the date indicated by level within the fair value hierarchy. Financial assets are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

### Assets Measured at Fair Value on a Recurring Basis at March 31, 2013

Description	Total	Fair Value Measurements Using		
		Level 1 Inputs	Level 2 Inputs	Level 3 Inputs

## Assets Measured at Fair Value on a Recurring Basis at December 31, 2012

Description	Total	Fair Value Measurements Using		
		Level 1	Level 2	Level 3
		Inputs	Inputs	Inputs
Trading securities (Registered Mutual Funds):				
Domestic Equity Mutual Funds	\$930	\$930	\$-	\$-
International Equity Mutual Funds	129	129	-	-
Fixed Income Mutual Funds	3,815	3,815	-	-
Investment securities available-for-sale:				
Agency notes	29,945	-	29,945	-
Registered Mutual Funds:				
Domestic Equity Mutual Funds	1,502	1,502	-	-
International Equity Mutual Funds	358	358	-	-
Fixed Income Mutual Funds	1,145	1,145	-	-
Pass-through MBS issued by GSEs	44,678	-	44,678	-
CMOs issued by GSEs	2,462	-	2,462	-
Private issuer pass through MBS	955	-	955	-
Private issuer CMOs	926	-	926	-

The Company's available-for-sale investment securities and MBS are reported at fair value, which were determined utilizing prices obtained from independent parties. The valuations obtained are based upon market data, and often utilize evaluated pricing models that vary by asset and incorporate available trade, bid and other market information. For securities that do not trade on a daily basis, pricing applications apply available information such as benchmarking and matrix pricing. The market inputs normally sought in the evaluation of securities include benchmark yields, reported trades, broker/dealer quotes (obtained only from market makers or broker/dealers recognized as market participants), issuer spreads, two-sided markets, benchmark securities, bids, offers and reference data. For certain securities, additional inputs may be used or some market inputs may not be applicable. Prioritization of inputs may vary on any given day based on market conditions.

The agency notes owned by the Company possessed the highest possible credit rating published by at least one established credit rating agency as of both March 31, 2013 and December 31, 2012. Obtaining market values as of March 31, 2013 and December 31, 2012 for these securities utilizing significant observable inputs was not difficult due to their continued marketplace demand. The pass-through MBS and CMOs issued by GSEs all possessed the highest possible credit rating published by at least one established credit rating agency as of both March 31, 2013 and December 31, 2012. Obtaining market values as of March 31, 2013 and December 31, 2012 for these securities utilizing significant observable inputs was not difficult due to their considerable demand.

## Assets Measured at Fair Value on a Non-Recurring Basis at March 31, 2013

Description	Total	Fair Value Measurements Using		
		Level 1	Level 2	Level 3
		Inputs	Inputs	Inputs
Impaired loans:				
One- to Four Family Residential and Cooperative Unit	\$477	-	-	\$477
Commercial Real Estate	5,707	-	-	5,707

OREO	585	-	-	585
------	-----	---	---	-----

## Assets Measured at Fair Value on a Non-Recurring Basis at December 31, 2012

Description	Total	Fair Value Measurements Using		
		Level 1	Level 2	Level 3
		Inputs	Inputs	Inputs
Impaired loans:				
Multifamily Residential and Residential Mixed Use Real Estate	\$450	-	-	\$450
Commercial Real Estate	6,472	-	-	6,472

Impaired Loans - Loans with certain characteristics are evaluated individually for impairment. A loan is considered impaired under ASC 310-10-35 when, based upon existing information and events, it is probable that the Bank will be unable to collect all amounts due, including principal and interest, according to the contractual terms of the loan agreement. The Bank's impaired loans at March 31, 2013 and December 31, 2012 were collateralized by real estate and were thus carried at the lower of the outstanding principal balance or the estimated fair value of the collateral.

Fair value is estimated through either a negotiated note sale value (Level 2 input), or, more commonly, a recent real estate appraisal (Level 3 input). These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal

Edgar Filing: DIME COMMUNITY BANCSHARES INC - Form 10-Q

process by the independent appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value.

An appraisal is generally ordered for all impaired multifamily residential, mixed use or commercial real estate loans for which the most recent appraisal is more than one year old. The Bank never adjusts independent appraisal data upward. Occasionally, management will adjust independent appraisal data downward based upon its own lending expertise and/or experience with the subject property, utilizing such factors as potential note sale values, or a more refined estimate of costs to repair and time to lease the property. Adjustments for potential disposal costs are also considered when determining the final appraised value.

As of March 31, 2013, impaired loans measured for impairment using the estimated fair value of the collateral had an aggregate principal balance of \$6,184, and no valuation allowance within the allowance for loan losses. As of December 31, 2012, impaired loans measured for impairment using the estimated fair value of the collateral had an aggregate principal balance of \$6,922, and no valuation allowance within the allowance for loan losses. Such loans had no impact upon the provision for loan losses during either the three months ended March 31, 2013 or the year ended December 31, 2012.

The following table presents quantitative information about Level 3 fair value measurements for impaired loans measured at fair value on a non-recurring basis at March 31, 2013:

Fair Value Derived	Valuation Technique Utilized	Significant Unobservable Input(s)	Range of Values		Weighted Average Value	
\$ 207	Income approach only	Capitalization rate	N/A	*	7.5	%
		Reduction for planned expedited disposal	N/A	*	10	%
477	Blended income and sales comparison approaches	Reduction to the sales comparison value to reconcile differences between comparable sales	0.0%-6.0	%	3.8	%
		Capitalization rate (income approach component)	7.3%-7.5	%	7.4	%
		Reduction for planned expedited disposal	10.0%-25.0	%	15.6	%
5,500	Previously negotiated note sales	Discount to unpaid principal balance from likely realized value of a note sale negotiated on terms deemed acceptable	N/A	*	17	%

\*Only one loan in this population.

The following table presents quantitative information about Level 3 fair value measurements for impaired loans measured at fair value on a non-recurring basis at December 31, 2012:

Fair Value Derived	Valuation Technique Utilized	Significant Unobservable Input(s)	Range of Values		Weighted Average Value	
\$ 207	Income approach only	Capitalization rate	N/A	*	7.5	%
		Reduction for planned expedited disposal	N/A	*	10	%
1,215	Blended income and sales comparison approaches	Reduction to the sales comparison value to reconcile differences between comparable sales	0.0%-6.0	%	3.8	%
		Capitalization rate (income approach component)	7.3%-7.5	%	7.4	%
		Reduction for planned expedited disposal	10.0%-25.0	%	15.6	%
5,500	Previously negotiated note sales	Discount to unpaid principal balance from likely realizable value of a note sale negotiated on terms	N/A	*	17	%

deemed acceptable

\*Only one loan in this population.

---

OREO. OREO represents real estate acquired as a result of foreclosure or by deed in lieu of foreclosure. OREO is carried, net of allowances for losses, at the lower of its recorded historical cost or the fair value of the property as adjusted for any estimated disposal costs. The fair value of OREO is estimated through current appraisals, by a licensed appraiser. Since OREO properties are actively marketed, estimated fair values could periodically be adjusted to reflect current market conditions and, as such, are classified as Level 3. There were no OREO properties held at December 31, 2012, and one OREO property held at March 31, 2013. Due to the immaterial nature of OREO, quantitative information about Level 3 fair value measurements for the OREO measured at fair value has not been disclosed.

The carrying amounts and estimated fair values of financial instruments at March 31, 2013 and December 31, 2012 were as follows:

At March 31, 2013	Carrying Amount	Fair Value at March 31, 2013 Using						Total	
		Level 1 Inputs		Level 2 Inputs		Level 3 Inputs			
Assets:

Methods and assumptions used to estimate fair values for financial assets and liabilities other than those previously discussed are summarized as follows:

Cash and Due From Banks - The fair value is assumed to be equal to their carrying value as these amounts are due upon demand (deemed a Level 1 valuation).

Federal Funds Sold and Other Short Term Investments – As a result of their short duration to maturity, the fair value of these assets, principally overnight deposits, is assumed to be equal to their carrying value due (deemed a Level 1 valuation).

TRUPS Held to Maturity – At both March 31, 2013 and December 31, 2012, the Company owned seven TRUPS classified as held-to-maturity. Late in 2008, the market for these securities became illiquid, and continued to be deemed illiquid as of March 31, 2013. As a result, at both March 31, 2013 and December 31, 2012, their estimated fair value was obtained utilizing a blended valuation

25

---

approach (Level 3 pricing). Under the blended valuation approach, the Bank utilized the following valuation sources: 1) broker quotations, which were deemed to meet the criteria of "distressed sale" pricing under the guidance of ASC 820-10-65-4, were given a minor 10% weighting (deemed to be a Level 2 valuation); 2) an internally created cash flow valuation model that considered the creditworthiness of each individual issuer underlying the collateral pools, and utilized default, cash flow and discount rate assumptions determined by the Company's management (the "Internal Cash Flow Valuation"), was given a 45% weighting (deemed to be a Level 3 valuation); and 3) a minimum of two of three available independent cash flow valuation models were averaged and given a 45% weighting (deemed to be a Level 3 valuation for which the Company is not provided detailed information regarding the significant unobservable inputs utilized by the third party).

The major assumptions utilized in the Internal Cash Flow Valuation (each of which represents a significant unobservable input as defined by ASC 820-10) were as follows:

(i) Discount Rate - Pursuant to ASC 320-10-65, the Company utilized two different discount rates for discounting the cash flows for each of the seven TRUPS, as follows:

Purchase discount rate – the rate used to determine the "credit" based valuation of the security. The purchase (1) discount rates utilized to compute fair value as of March 31, 2013 ranged from 1.7% to 2.5%, with a weighted average value of 2.2%.

(2) Current discount rate - the current discount rate utilized was derived from the Bloomberg fair market value curve for debt offerings of similar credit rating. In the event that a security had a split credit rating, separate cash flow valuations were made utilizing the appropriate discount rate and were averaged in order to determine the Internal Cash Flow Valuation. In addition, the discount rate was interpolated from the Bloomberg fair market value curve for securities possessing a credit rating below "B." The existing discount rates utilized to compute fair value as of March 31, 2013 ranged from 5.4% to 6.2%, with a weighted average value of 5.8%.

(ii) Defaults – The Company utilized the most recently published measures of capital adequacy and/or problematic assets to estimate potential defaults in the collateral pool of performing issuers underlying the seven securities. In instances where problematic assets equaled or exceeded the issuer's regulatory capital, or the issuer's capital level fell below the limits established by the regulatory agencies, defaults were deemed probable to occur. Based upon the application of this methodology, the computed default rates utilized in the determination of the fair value of the TRUPS as of March 31, 2013 ranged from 0% to 6.2% of the performing security pool balance, with a weighted average rate of 1.9%. The Company additionally utilized a standard default rate of 1.2% every three years, which was applied uniformly.

(iii) Cash Flows - The expected payments for the tranche of each security owned by the Company, as adjusted to assume that all estimated defaults occur immediately. The cash flows further assumed an estimated recovery rate of 10% per annum to occur one year after initial default, which was applied uniformly.

As discussed above, in addition to the Internal Cash Flow Valuation and broker quotations, at March 31, 2013 and December 31, 2012, the Company utilized a minimum of two additional cash flow valuation models in order to estimate the fair value of TRUPS. Two of the three independent cash flow valuation models utilized a methodology similar to the Internal Cash Flow Valuation, differing only in the underlying assumptions deriving estimated cash flows, individual bank defaults and discount rate. At December 31, 2012, a third independent cash flow valuation model was utilized which was derived from a different methodology in which the actual cash flow estimate based upon the underlying collateral of the securities (including default estimates) was not considered. Instead, this cash flow valuation model utilized a discount rate determined from the Bloomberg fair market value curve for similar assets that continued to trade actively, with adjustments made for the illiquidity of the TRUPS market. This valuation model was not utilized as of March 31, 2013 as it was deemed too anomalous. Because of the significant judgment underlying each of the pricing assumptions, management elected to recognize each of the independent valuations and apply a weighting system to all of the valuations, including the Internal Cash Flow Valuation, as all of these

valuations were determined utilizing a valid and objective pricing methodology.

Loans, Net - The fair value of impaired loans that are measured at fair value is determined in the manner described commencing on page 25. The fair value of all remaining loans receivable is determined by discounting anticipated future cash flows of the loans, net of anticipated prepayments, using a discount rate reflecting current market rates for loans with similar terms to borrowers of similar credit quality. For adjustable rate loans that reprice frequently and with no significant change in credit risk, fair values are based on carrying values. The valuation method used for loans does not necessarily represent an exit price valuation methodology as defined under ASC 820. However, since the valuation methodology is deemed to be akin to a Level 3 valuation methodology, the fair value of loans receivable other than impaired loans measured at fair value, is shown under the Level 3 valuation column.

Loans Held For Sale - The fair value of held-for-sale loans is primarily determined utilizing quoted market prices for securities backed by similar types of loans. Changes in the fair value of loans held for sale result primarily from changes in interest rates subsequent to funding but prior to sale, and changes in the fair value of the associated servicing of the loan. Loans held for sale are deemed a Level 2 valuation.

Accrued Interest Receivable - The estimated fair value of accrued interest receivable approximates its carrying amount, and is deemed to be valued at an input level comparable to its underlying financial asset.

MSR - On a quarterly basis, the aggregate balance of the MSR is evaluated for impairment based upon the fair value of the rights as compared to their carrying amount. If the aggregate carrying amount of the MSR exceeds fair value, impairment is recorded on the MSR so that they are carried at fair value. Fair value is determined based on a valuation model that calculates the present value of estimated future net servicing income. The valuation model utilizes assumptions that market participants would use in estimating future net servicing income and that can be validated against available market data (Level 2 input).

FHLBNY Capital Stock – It is not practicable to determine the fair value of FHLBNY capital stock due to restrictions placed on transferability.

Deposits - The fair value of savings, money market, and checking accounts is, by definition, equal to the amount payable on demand at the reporting date (i.e., their carrying amount), which has been deemed a Level 1 valuation. The fair value of CDs is based upon the present value of contractual cash flows using current interest rates for instruments of the same remaining maturity (deemed a Level 2 valuation).

Escrow and Other Deposits – The fair value of escrow and other deposits is, by definition, equal to the amount payable on demand at the reporting date (i.e., their carrying amount), which has been deemed a Level 1 valuation.

FHLBNY Advances – The fair value of FHLBNY advances is measured by the discounted anticipated cash flows through contractual maturity or next interest repricing date, or an earlier call date if, as of the valuation date, the borrowing is expected to be called (deemed a Level 2 valuation). The carrying amount of accrued interest payable on FHLBNY advances is its fair value.

Trust Preferred Securities Payable - The fair value of trust preferred securities payable is estimated using discounted cash flow analyses based on the current borrowing rates for similar types of borrowing arrangements (deemed a Level 2 valuation), and is provided to the Company quarterly independently by a market maker in the underlying security.

Accrued Interest Payable - The estimated fair value of accrued interest payable approximates its carrying amount, and is deemed to be valued at an input level comparable to its underlying financial liability.

Commitments to Extend Credit - Fair values for off-balance sheet, credit-related financial instruments are based on fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the counterparties' credit standing. The fair value of commitments is not material.

## 12. RETIREMENT AND POSTRETIREMENT PLANS

The Holding Company or the Bank maintains the Retirement Plan of The Dime Savings Bank of Williamsburgh (the "Employee Retirement Plan"), the Retirement Plan for Board Members of Dime Community Bancshares, Inc. (the "Outside Director Retirement Plan"), the BMP, and the Postretirement Welfare Plan of The Dime Savings Bank of Williamsburgh ("Postretirement Plan"). Net expenses associated with these plans were comprised of the following components:

Three Months Ended March 31, 2013	Three Months Ended March 31, 2012
BMP, Postretirement Employer Plan and Outside	BMP, Postretirement Employer Plan and Outside

Edgar Filing: DIME COMMUNITY BANCSHARES INC - Form 10-Q

	Director Retirement Plans		Director Retirement Plans	
Service cost	\$-	\$ 15	\$	\$ 39
Interest cost	290	57	306	90
Actuarial adjustment to prior period interest cost and amortization	-	-		
Expected return on assets	(380)	-	(363)	
Unrecognized past service liability	-	-		
Amortization of unrealized loss	587	12	541	75
Net periodic cost	\$497	\$ 84	\$484	\$ 204

The Company disclosed in its consolidated financial statements for the year ended December 31, 2012 that it expected to make contributions to, or benefit payments on behalf of, benefit plans during 2013 as follows: Employee Retirement Plan - \$53, BMP - \$483, Outside Director Retirement Plan - \$186, and Postretirement Plan - \$187. The Company made contributions of \$13 to the

27

---

Employee Retirement Plan during the three months ended March 31, 2013, and expects to make the remainder of the estimated \$53 of net contributions during 2013. The Company made benefit payments of \$45 on behalf of the Outside Director Retirement Plan during the three months ended March 31, 2013, and expects to make the remainder of the estimated \$186 of net contributions or benefit payments during 2013. The Company made net benefit payments totaling \$29 on behalf of the Postretirement Plan during the three months ended March 31, 2013, and expects to make the remainder of the estimated \$187 of net contributions or benefit payments during 2013. The Company did not make any defined benefit contributions to, or benefit payments on behalf of, the BMP during the three months ended March 31, 2013, and does not currently expect to make the \$483 of benefit payments on behalf of the BMP during 2013, since anticipated retirements that formed the basis for these expected benefit payments in 2013 are presently not expected to occur.

### 13. INCOME TAXES

During the three months ended March 31, 2013 and 2012, the Company's consolidated effective tax rates were 40.4% and 40.8%, respectively. There were no significant unusual income tax items during the three months ended March 31, 2013 and 2012.

### 14. NET MORTGAGE BANKING INCOME

Net mortgage banking income presented in the condensed consolidated statements of operations was comprised of the following items:

	Three Months Ended March 31,	
	2013	2012
Gain on the sale of loans originated for sale	\$ 12	\$ 1
Credit to the liability for First Loss Position	92	
Mortgage banking fees	57	120
Net mortgage banking income	\$ 161	\$ 121

## Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

### General

The Holding Company is a Delaware corporation and parent company of the Bank, a New York State chartered stock savings bank. The Bank maintains its headquarters in the Williamsburg section of Brooklyn, New York and operates twenty-six full service retail banking offices located in the NYC boroughs of Brooklyn, Queens, and the Bronx, and in Nassau County, New York. The Bank's principal business is gathering deposits from customers within its market area and via the internet, and investing them primarily in multifamily residential, commercial real estate and mixed use loans, MBS, obligations of the U.S. government and GSEs, and corporate debt and equity securities. All of the Bank's lending occurs in the greater NYC metropolitan area.

### Executive Summary

The Holding Company's primary business is the ownership of the Bank. The Company's consolidated results of operations are dependent primarily on net interest income, which is the difference between the interest income earned on interest-earning assets, such as loans and securities, and the interest expense paid on interest-bearing liabilities,

such as deposits and borrowings. The Bank additionally generates non-interest income such as service charges and other fees, mortgage banking related income, and income associated with Bank Owned Life Insurance. Non-interest expense primarily consists of employee compensation and benefits, federal deposit insurance premiums, data processing costs, and occupancy and equipment, marketing and other operating expenses. The Company's consolidated results of operations are also significantly affected by general economic and competitive conditions (particularly fluctuations in market interest rates), government policies, changes in accounting standards and actions of regulatory agencies.

The Bank's primary strategy is generally to seek to increase its product and service utilization for each individual depositor, and increase its household and deposit market shares in the communities that it serves. In addition, the Bank's primary strategy includes the origination of, and investment in, mortgage loans, with an emphasis on NYC multifamily residential and mixed-use real estate loans. The Company believes that multifamily residential and mixed-use loans in and around NYC provide advantages as investment assets. Initially, they offer a higher yield than investment securities of comparable maturities or terms to repricing. In addition, origination and processing costs for the Bank's multifamily residential and mixed use loans are lower per thousand dollars of originations than comparable one-to four-family loan costs. Further, the Bank's market area has generally provided a stable flow of new and refinanced multifamily residential and mixed-use loan originations. In order to address the credit risk associated with multifamily residential and mixed use lending, the Bank has developed underwriting standards that it believes are reliable in order to maintain consistent credit quality for its loans.

The Bank also strives to provide a stable source of liquidity and earnings through the purchase of investment grade securities, seeks to maintain the asset quality of its loans and other investments, and uses appropriate portfolio and asset/liability management techniques in an effort to manage the effects of interest rate volatility on its profitability and capital.

The most recent recession in the United States officially began in December 2007, but became evident in 2008. The recession in the housing market was clearly underway by late 2008, and the economic crisis was in full stride, marked by the September 15, 2008 bankruptcy filing of Lehman Brothers Holdings, Inc. Although statistically, the recession ended in 2009, subsequent years have been marked by anemic gross domestic product growth in the United States, and prolonged high rates of unemployment. The Federal Reserve Bank, in order to address one of its two primary mandates (i.e., stable employment), has pursued a monetary policy known as "quantitative easing", which has had the outcome of keeping the long end of the yield curve at historically low rates. Initially, financial intermediaries, like the Bank, benefited from low short term rates, through lower funding costs. Now, as quantitative easing enters its fifth year, borrowers are taking advantage of historically low intermediate- and long-term interest rates. This is beginning to put downward pressure on the Bank's asset yields, and net interest margin. At the same time, real estate conditions in the Bank's primary geographic market, and loan type (multifamily loans), have rebounded strongly. Credit costs, which characterized the 2009 through 2011 period, have abated.

During the years ended December 31, 2011 and 2012 and the three months ended March 31, 2013, the Company experienced a steadily increasing level of both prepayment and refinance activity. In the early portion of this cycle, the Company did not pursue loan portfolio growth. However, a combination of strong and growing bank capital levels, strong demand for multifamily housing and financing, improved economic conditions in NYC, and a Federal Reserve policy which has explicitly stated that rates will remain low until employment declines markedly, led to a change in investment posture on the part of management. As a result, for the past five quarters, the Company has been a more active lender, growing both the loan portfolio and total assets.

During the year ended December 31, 2012, the Company elected to prepay its entire \$195.0 million of REPO borrowings with a weighted average cost of 4.3% and a weighted average term to maturity exceeding 4.0 years, incurring a prepayment cost of \$28.8 million as a component of interest expense during the year ended December 31, 2012. The short-term securities that were pledged against these borrowings had yields that had steadily declined over the past several years, and approximated 0.5% throughout 2012. This prepayment transaction has a breakeven of 3.5 years, and contributed positively to net interest margin during the three months ended March 31, 2013.

Selected Financial Highlights and Other Data

#### Critical Accounting Policies

Various elements of the Company's accounting policies are inherently subject to estimation techniques, valuation assumptions and other subjective assessments. The Company's policies with respect to the methodologies it uses to determine the allowance for loan losses (including reserves for loan commitments), the liability for the First Loss Position, the valuation of MSR, asset impairments (including the assessment of impairment of goodwill and other than temporary declines in the valuation of securities), the recognition of deferred tax assets and unrecognized tax positions, the recognition of loan income, the valuation of financial instruments, and accounting for defined benefit plans are its most critical accounting policies because they are important to the presentation of the Company's consolidated financial condition and results of operations, involve a significant degree of complexity and require management to make difficult and subjective judgments which often necessitate assumptions or estimates about highly uncertain matters. The use of different judgments, assumptions or estimates could result in material variations

in the Company's consolidated results of operations or financial condition.

The following are descriptions of the Company's critical accounting policies and explanations of the methods and assumptions underlying their application.

Allowance for Loan Losses and Reserve for Loan Commitments. The Bank's methods and assumptions utilized to periodically determine its allowance for loan losses are summarized in Note 9 to the Company's condensed consolidated financial statements. The reserve for loan commitments is determined based upon the historical loss experience of similar loans owned by the Bank at each period end. Any increases in this reserve are achieved via a transfer of reserves from the Bank's allowance for loan losses, with any subsequent resulting shortfall in the allowance for loan losses satisfied through the quarterly provision for loan losses. Any decreases in

30

---

the loan commitment reserve are recognized as a transfer of reserve balances back to the allowance for loans losses at each period end.

Liability for the First Loss Position. The Bank's methods and assumptions utilized to periodically determine its liability for the First Loss Position are summarized in Note 9 to the condensed consolidated financial statements.

Valuation of MSR. The proceeds received on mortgage loans sold with servicing rights retained by the Bank are allocated between the loans and the servicing rights based on their estimated fair values at the time of the loan sale. In accordance with GAAP, MSR are carried at the lower of cost or fair value and are amortized in proportion to, and over the period of, anticipated net servicing income. In accordance with ASC 860-50-35, all separately recognized MSR are required to be initially measured at fair value, if practicable. The estimated fair value of MSR is determined by calculating the present value of estimated future net servicing cash flows, using estimated prepayment, default, servicing cost and discount rate assumptions. All estimates and assumptions utilized in the valuation of MSR are derived based upon actual historical results for the Bank, or, in the absence of such data, from historical results for the Bank's peers.

The fair value of MSR is sensitive to changes in assumptions. Fluctuations in prepayment speed assumptions have the most significant impact on the estimated fair value of MSR. In the event that actual loan prepayments exceed the assumed amount, the fair value of MSR would likely decline. In the event that actual loan prepayments fall below the assumed amount, the fair value of MSR would likely increase. Any measurement of the value of MSR is limited by the existing conditions and assumptions utilized at a particular point in time, and would not necessarily be appropriate if applied at a different point in time.

Assumptions utilized in measuring the fair value of MSR additionally include the stratification based on predominant risk characteristics of the underlying loans. Increases in the risk characteristics of the underlying loans from the assumptions would result in a decline in the fair value of the MSR. A valuation allowance is established in the event the recorded value of an individual stratum exceeds its fair value for the full amount of the difference.

To the extent that the valuation of the MSR (as determined in the manner indicated above) falls below its recorded balance, an impairment charge is recognized through a valuation allowance, with any adjustments to such allowance reflected in periodic earnings.

Asset Impairment Adjustments. Certain assets are carried in the Company's consolidated statements of financial condition at fair value or at the lower of cost or fair value:

(i) Goodwill Impairment Analysis. Goodwill is accounted for in accordance with ASC 805-10. ASC 805-10 requires performance of an annual impairment test at the reporting unit level. Management quarterly performs analyses to test for impairment of goodwill. In the event an impairment of goodwill is determined to exist, it is recognized as a charge to earnings.

The Company identified a single reporting unit for purposes of its goodwill impairment testing, and thus performs its impairment test on a consolidated basis. The impairment test has two potential stages. In the initial stage, the Holding Company's market capitalization (reporting unit fair value) is compared to its outstanding equity (reporting unit carrying value). The Company utilizes closing price data for the Holding Company's common stock as reported on the Nasdaq National Market in order to compute market capitalization. The second stage is only utilized in the event that the initial stage indicates potential impairment. To date, the Company has not had to utilize the second stage. The Company performed an impairment test as of March 31, 2013 and concluded that no potential impairment of goodwill existed since the fair value of the Company's reporting unit exceeded its carrying value. No events or circumstances have occurred subsequent to March 31, 2013 that would reduce the fair value of the Company's reporting unit below its carrying value. Such events or circumstances would require the immediate performance of an impairment test in accordance with ASC 805-10.

(ii) Valuation of Financial Instruments and Analysis of OTTI Related to Investment Securities and MBS. Debt securities are classified as held-to-maturity, and carried at amortized cost, only if the Company has a positive intent and ability to hold them to maturity.

At March 31, 2013, the Company owned seven TRUPS classified as held-to-maturity. Late in 2008, the market for these securities became highly illiquid, and continued to be deemed as such as of March 31, 2013. As a result, at both March 31, 2013 and December 31, 2012, their estimated fair value was obtained utilizing a blended valuation approach (Level 3 pricing as described in Note 11 to the Company's condensed consolidated financial statements).

At March 31, 2013 and December 31, 2012, the Company had investments in nine mutual funds totaling \$5.0 million and \$4.9 million, respectively, which were classified as trading. All changes in valuation of these securities are recognized in the Company's results of operations.

Debt securities that are not classified as either held-to-maturity or trading are classified as available-for-sale.

Available-for-sale debt and equity securities that have readily determinable fair values are carried at fair value. All of the Company's available-for-sale securities at March 31, 2013 and December 31, 2012 had readily determinable fair values, which were based on published or securities dealers' market values.

The Company conducts a periodic review and evaluation of its securities portfolio, taking into account the severity and duration of each unrealized loss, as well as management's intent and ability to hold the security until the unrealized loss is substantially eliminated, in order to determine if a decline in fair value of any security below its carrying value is either temporary or other than temporary. Unrealized losses on held-to-maturity securities that are deemed temporary are disclosed but not recognized. Unrealized losses on debt or equity securities available-for-sale that are deemed temporary are excluded from net income and reported net of deferred taxes as other comprehensive income or loss. All unrealized losses that are deemed other than temporary on either available-for-sale or held-to-maturity securities are recognized immediately as a reduction of the carrying amount of the security, with a corresponding decline in either net income or accumulated other comprehensive income or loss in accordance with ASC 320-10-65. See Note 10 to the Company's condensed consolidated financial statements for a reconciliation of OTTI on securities during the three-month periods ended March 31, 2013 and 2012.

**Recognition of Deferred Tax Assets.** Management reviews all deferred tax assets periodically. Upon such review, in the event that there is a greater than 50% likelihood that the deferred tax asset will not be fully realized, a valuation allowance is recognized against the deferred tax asset in the amount for which realization is determined to be more unlikely than likely to occur.

**Unrecognized Tax Positions.** Under current accounting rules, all tax positions adopted are subjected to two levels of evaluation. Initially, a determination is made, based on the technical merits of the position, as to whether it is more likely than not that a tax position will be sustained upon examination, including resolution of any related appeals or litigation processes. In conducting this evaluation, management is required to presume that the position will be examined by the appropriate taxing authority possessing full knowledge of all relevant information. The second level of evaluation is the measurement of a tax position that satisfies the more-likely-than-not recognition threshold. This measurement is performed in order to determine the amount of benefit to recognize in the financial statements. The tax position is measured at the largest amount of benefit that is greater than 50 percent likely to be realized upon ultimate settlement. The Company had no material uncertain tax positions as of March 31, 2013 or December 31, 2012.

**Loan Income Recognition.** Interest income on loans is recorded using the level yield method. Loan origination fees and certain direct loan origination costs are deferred and amortized as yield adjustments over the contractual loan terms.

Please refer to "Part I – Item 2 – Management's Discussion and Analysis of Financial Condition and Results of Operations - Asset Quality - Monitoring and Collection of Delinquent Loans" for a discussion of management's policies for determining whether a loan is maintained on accrual or non-accrual status.

**Accounting for Defined Benefit Plans.** Defined benefit plans are accounted for in accordance with ASC 715, which requires an employer sponsoring a single employer defined benefit plan to recognize the funded status of such benefit plan in its statements of financial condition, measured as the difference between plan assets at fair value (with limited exceptions) and the benefit obligation. The Company utilizes the services of trained actuaries employed at an independent benefits plan administration entity in order to assist in measuring the funded status of its defined benefit plans.

## Liquidity and Capital Resources

The Board of Directors of the Bank has approved a liquidity policy that it reviews and updates at least annually. Senior management is responsible for implementing the policy. The Bank's Asset Liability Committee ("ALCO") is responsible for general oversight and strategic implementation of the policy, and management of the appropriate departments are designated responsibility for implementing any strategies established by ALCO. On a daily basis, senior management receives a current cash position report and one-week forecast to ensure that all short-term obligations are timely satisfied and that adequate liquidity exists to fund future activities. On a monthly basis, reports

detailing the Bank's liquidity reserves and forecasted cash flows are presented to both senior management and the Board of Directors. In addition, on a monthly basis, a twelve-month liquidity forecast is presented to ALCO in order to assess potential future liquidity concerns. A forecast of cash flow data for the upcoming 12 months is presented to the Board of Directors on an annual basis.

The Bank's primary sources of funding for its lending and investment activities include deposits, loan and MBS payments, investment security principal and interest payments, advances from the FHLBNY, and REPOS entered into with various financial institutions, including the FHLBNY. The Bank may also sell selected multifamily residential, mixed use and one- to four-family residential real estate loans to private sector secondary market purchasers and has in the past sold such loans to FNMA. The Company may additionally issue debt under appropriate circumstances.

Although maturities and scheduled amortization of loans and investments are predictable sources of funds, deposit flows and prepayments on mortgage loans and MBS are influenced by interest rates, economic conditions and competition.

The Bank gathers deposits in direct competition with commercial banks, savings banks and brokerage firms, many among the largest in the nation. It must additionally compete for deposit monies against the stock and bond markets, especially during periods of strong performance in those arenas. The Bank's deposit flows are affected primarily by the pricing and marketing of its deposit products compared to its competitors, as well as the market performance of depositor investment alternatives such as the U.S. bond or equity

markets. To the extent that the Bank is responsive to general market increases or declines in interest rates, its deposit flows should not be materially impacted. However, favorable performance of the equity or bond markets could adversely impact the Bank's deposit flows.

Retail branch and Internet banking deposits increased \$121.9 million during the three months ended March 31, 2013, compared to an increase of \$43.4 million during the three months ended March 31, 2012. Within deposits, core deposits (i.e., non-CDs) increased \$134.5 million during the three months ended March 31, 2013 and \$39.2 million during the three months ended March 31, 2012. These increases were due to both successful gathering efforts tied to promotional money market offerings as well as increased commercial checking balances. CDs decreased \$12.6 million during the three months ended March 31, 2013 and increased \$4.3 million during the three months ended March 31, 2012. The reduction during the three months ended March 31, 2013 resulted primarily from the attrition of maturing CDs from prior period promotional activities and the customer preference for deposit types other than CDs.

The Bank did not prepay any borrowings during the three months ended March 31, 2013. During the three months ended March 31, 2012, the Bank prepaid \$40.0 million of borrowings secured by REPOS and \$55.0 million of FHLB NY advances, removing a negative carrying cost on these \$95.0 million of funding liabilities. During the three months ended March 31, 2012, the Bank elected to restrict asset growth, and thus utilized cash flows from real estate loans and MBS to fund loan originations and operations. Since cash flows exceeded its immediate needs, the Bank utilized excess liquidity to reduce its REPOS and FHLB NY advances.

During the three months ended March 31, 2013, principal repayments totaled \$200.3 million on real estate loans (including refinanced loans) and \$5.9 million on MBS. During the three months ended March 31, 2012, principal repayments totaled \$210.4 million on real estate loans (including refinanced loans) and \$10.3 million on MBS. The reduction in principal repayments on real estate loans resulted from lower refinancing activity (which was historically high during the year ended December 31, 2012). The decline in principal repayments on MBS resulted from a reduction of \$38.2 million in their average balance from the three months ended March 31, 2012 to the three months ended March 31, 2013.

In the event that the Bank should require funds beyond its ability or desire to generate them internally, an additional source of funds is available through its borrowing line at the FHLB NY. At March 31, 2013, the Bank had an additional potential borrowing capacity of \$443.5 million through the FHLB NY, subject to customary minimum FHLB NY common stock ownership requirements (i.e., 4.5% of the Bank's outstanding FHLB NY borrowings).

The Bank is subject to minimum regulatory capital requirements imposed by its primary federal regulator. As a general matter, these capital requirements are based on the amount and composition of an institution's assets. At March 31, 2013, the Bank was in compliance with all applicable regulatory capital requirements and was considered "well-capitalized" for all regulatory purposes.

The Company generally utilizes its liquidity and capital resources primarily to fund the origination of real estate loans, the purchase of mortgage-backed and other securities, the repurchase of Holding Company common stock into treasury, the payment of quarterly cash dividends to holders of the Holding Company's common stock and the payment of quarterly interest to holders of its outstanding trust preferred debt. During the three months ended March 31, 2013 and 2012, real estate loan originations totaled \$244.4 million and \$181.4 million, respectively. The increase from the three months ended March 31, 2012 to the three months ended March 31, 2013 reflected the Company's transition, in late 2012 and during the three months ended March 31, 2013, from a non-growth to a measured loan and balance sheet growth strategy, which necessitated higher real estate loan origination levels. Purchases of investment securities (excluding trading securities, short-term investments and federal funds sold) were negligible during the three months ended March 31, 2013, and \$63.0 million during the three months ended March 31, 2012. Security purchases were de-emphasized during the three months ended March 31, 2013 due to the removal of required securities for collateral on REPO borrowings. The purchases made during the three months ended March 31, 2012 were comprised of \$39.8 million of medium-term agency notes aimed at providing additional yield on liquid funds,

and \$23.2 million of adjustable rate Government National Mortgage Association ("GNMA") MBS, which sought to provide additional yield on liquid assets, ongoing cash flows from principal repayments and protection against potential increases in interest rates.

The Holding Company did not repurchase any shares of its common stock during the three months ended March 31, 2013 and 2012. As of March 31, 2013, up to 1,124,549 shares remained available for purchase under authorized share purchase programs. Based upon the \$14.36 per share closing price of its common stock as of March 29, 2013, the Holding Company would utilize \$16.1 million in order to purchase all of the remaining authorized shares. For the Holding Company to complete these share purchases, it would likely require dividend distributions from the Bank.

The Holding Company paid \$4.9 million in cash dividends on its common stock during the three months ended March 31, 2013, and \$4.8 million during the three months ended March 31, 2012. The increase in payment resulted from a net increase of 701,836 shares outstanding from March 31, 2012 to March 31, 2013.

## Contractual Obligations

The Bank is obligated for rental payments under leases on certain of its branches and equipment. In addition, the Bank generally has outstanding at any time significant borrowings in the form of FHLB NY advances, as well as customer CDs with fixed contractual interest rates. The Holding Company also has \$70.7 million of callable trust preferred borrowings from third parties due to mature in April 2034, which became callable at any time commencing in April 2009. The Holding Company does not currently intend to call this debt. The facts and circumstances surrounding these obligations have not changed materially since December 31, 2012.

## Off-Balance Sheet Arrangements

From December 2002 through February 2009, the Bank originated and sold multifamily residential mortgage loans in the secondary market to FNMA while retaining servicing. The Bank is required to retain the First Loss Position related to all loans sold under this program, which will remain in effect until the earlier of the following events: (1) the loans have been fully satisfied or enter OREO status; or (2) the First Loss Position is fully exhausted.

In addition, as part of its loan origination business, the Bank generally has outstanding commitments to extend credit to third parties, which are granted pursuant to its regular underwriting standards. Since these loan commitments may expire prior to funding, in whole or in part, the contract amounts are not estimates of future cash flows.

The following table presents off-balance sheet arrangements as of March 31, 2013:

	Less than One Year	One Year to Three Years	Over Three to Five Years	Over Five Years	Total
(Dollars in thousands)					
Credit Commitments:					
Available lines of credit	\$43,574	\$ -	\$ -	\$ -	\$43,574
Other loan commitments (1)	120,702	-	-	-	120,702
Other Commitments:					
First Loss Position on loans sold to FNMA (1)	15,428	-	-	-	15,428
Total Commitments	\$179,704	\$ -	\$ -	\$ -	\$179,704

(1) In accordance with the requirements of both ASC 450-20-25 and 460-10-25, as of March 31, 2013, reserves on loan commitments and the liability for the First Loss Position on loans sold to FNMA were \$192 and \$1,291 respectively, and were recorded in other liabilities in the Company's condensed consolidated statements of financial condition.

## Asset Quality

### General

At both March 31, 2013 and December 31, 2012, the Company had neither whole loans nor loans underlying MBS that would have been considered subprime loans at origination, i.e., mortgage loans advanced to borrowers who did not qualify for market interest rates because of problems with their income or credit history. See Note 10 to the condensed consolidated financial statements for a discussion of impaired investment securities and MBS.

### Monitoring and Collection of Delinquent Loans

Management of the Bank reviews delinquent loans on a monthly basis and reports to its Board of Directors regarding the status of all non-performing and otherwise delinquent loans in the Bank's portfolio.

The Bank's loan servicing policies and procedures require that an automated late notice be sent to a delinquent borrower as soon as possible after a payment is ten days late in the case of multifamily residential or commercial real estate loans, or fifteen days late in connection with one- to four-family or consumer loans. A second letter is sent to the borrower if payment has not been received within 30 days of the due date. Thereafter, periodic letters are mailed and phone calls placed to the borrower until payment is received. When contact is made with the borrower at any time prior to foreclosure, the Bank will attempt to obtain the full payment due or negotiate a repayment schedule with the borrower to avoid foreclosure.

Accrual of interest is generally discontinued on a loan that meets any of the following three criteria: (i) full payment of principal or interest is not expected; (ii) principal or interest has been in default for a period of 90 days or more (unless the loan is both deemed to be well secured and in the process of collection); or (iii) an election has otherwise been made to maintain the loan on a cash basis due to deterioration in the financial condition of the borrower. Such non-accrual determination practices are applied consistently to all loans

34

---

regardless of their internal classification or designation. Upon entering non-accrual status, the Bank reverses all outstanding accrued interest receivable.

The Bank generally initiates foreclosure proceedings when a loan enters non-accrual status based upon non-payment, and typically does not accept partial payments once foreclosure proceedings have commenced. At some point during foreclosure proceedings, the Bank procures current appraisal information in order to prepare an estimate of the fair value of the underlying collateral. If a foreclosure action is instituted and the loan is not brought current, paid in full, or refinanced before the foreclosure action is completed, the property securing the loan is transferred to OREO status. The Bank generally utilizes all available remedies, such as note sales in lieu of foreclosure, in an effort to resolve non-accrual loans and OREO properties as quickly and prudently as possible in consideration of market conditions, the physical condition of the property and any other mitigating circumstances. In the event that a non-accrual loan is subsequently brought current, it is returned to accrual status once the doubt concerning collectability has been removed and the borrower has demonstrated performance in accordance with the loan terms and conditions for a period of at least six months.

#### Non-accrual Loans

Within the Bank's permanent portfolio, non-accrual loans totaled \$8.2 million and \$8.9 million at March 31, 2013 and December 31, 2012, respectively, representing 0.23% and 0.25% of total loans at March 31, 2013 and December 31, 2012, respectively. During the three months ended March 31, 2013, two non-accrual loans totaling \$507,000 were either satisfied or disposed of at a value at or below their recorded balance, a \$765,000 non-accrual loan was transferred to OREO, a \$153,000 non-accrual loan was returned to accrual status, \$78,000 of principal charge-offs were recognized on one non-accrual loan and principal amortization totaling \$28,000 was recognized on six non-accrual loans. Partially offsetting these declines were two loans totaling \$816,000 that were added to non-accrual status during the three months ended March 31, 2013.

#### Impaired Loans

The recorded investment in loans deemed impaired (as defined in Note 8 to the condensed consolidated financial statements) was approximately \$49.2 million, consisting of twenty-three loans, at March 31, 2013, compared to \$53.1 million, consisting of twenty-six loans, at December 31, 2012. The Bank disposed of a \$450,000 impaired loan during the three months ended March 31, 2013, received full repayment on two additional impaired loans totaling \$2.9 million, and transferred a \$765,000 impaired loan to OREO. Additionally during the three months ended March 31, 2013, principal charge-offs of \$78,000 were recognized on one impaired loan, and principal amortization totaling \$170,000 was recognized on seventeen impaired loans. Partially offsetting these declines was a \$414,000 loan that was added to impaired status during the three months ended March 31, 2013.

The following is a reconciliation of non-accrual and impaired loans at March 31, 2013:

	(Dollars in Thousands)
Non-accrual loans	\$ 8,172
Non-accrual one- to four-family and consumer loans deemed homogeneous loans	(439 )
TDRs retained on accrual status	41,444
Impaired loans	\$ 49,177

#### TDRs

Under ASC 310-40-15, the Bank is required to recognize loans for which certain modifications or concessions have been made as TDRs. A TDR has been created in the event that any of the following criteria is met:

· For economic or legal reasons related to the debtor's financial difficulties, a concession has been granted that would not have otherwise been considered

· A reduction of interest rate has been made for the remaining term of the loan

· The maturity date of the loan has been extended with a stated interest rate lower than the current market rate for new debt with similar risk

· The outstanding principal amount and/or accrued interest have been reduced

In instances in which the interest rate has been reduced, management would not deem the modification a TDR in the event that the reduction in interest rate reflected either a general decline in market interest rates or an effort to maintain a relationship with a borrower who could readily obtain funds from other sources at the current market interest rate, and the terms of the restructured loan are comparable to the terms offered by the Bank to non-troubled debtors. The Bank has not modified any loans in a manner that met the criteria for a TDR since the quarterly period ended March 31, 2012.

Accrual status for TDRs is determined separately for each TDR in accordance with the policies for determining accrual or non-accrual status that are outlined on page 34. At the time an agreement is entered into between the Bank and the borrower that results in the Bank's determination that a TDR has been created, the loan can be either on accrual or non-accrual status. If a loan is on non-

accrual status at the time it is restructured, it continues to be classified as non-accrual until the borrower has demonstrated compliance with the modified loan terms for a period of at least six months. Conversely, if at the time of restructuring the loan is performing (and accruing), it will remain accruing throughout its restructured period, unless the loan subsequently meets any of the criteria for non-accrual status under either the Bank's policy, as disclosed on page 34 and/or the criteria related to accrual of interest established by agency regulations.

The Bank never accepts receivables or equity interests in satisfaction of TDRs.

At both March 31, 2013 and 2012, the great majority of TDRs were collateralized by real estate that generated rental income. For TDRs that demonstrated conditions sufficient to warrant accrual status, the present value of the expected net cash flows of the underlying property was utilized as the primary means of determining impairment. Any shortfall in the present value of the expected cash flows calculated at each measurement period (typically quarter-end) compared to the present value of the expected cash flows at the time of the original loan agreement was recognized as either an allocated reserve (in the event that it related to lower expected interest payments) or a charge-off (if related to lower expected principal payments). For TDRs on non-accrual status, an appraisal of the underlying real estate collateral is deemed the most appropriate measure to utilize when evaluating impairment, and any shortfall in valuation from the recorded balance is accounted for through a charge-off. In the event that either an allocated reserve or a charge-off is recognized on TDRs, the periodic loan loss provision is impacted.

Please refer to Note 8 to the condensed consolidated financial statements for a further discussion of TDRs.

## OREO

Property acquired by the Bank, or a subsidiary, as a result of foreclosure on a mortgage loan or a deed in lieu of foreclosure is classified as OREO. Upon entering OREO status, the Bank obtains a current appraisal on the property and reassesses the likely realizable value of the property quarterly thereafter. OREO is carried at the lower of the likely realizable or book balance, with any writedowns recognized through a provision recorded in non-interest expense. Only the appraised value, or either contractual or formal marketed values that fall below the appraised value are used when determining the likely realizable value of OREO at each reporting period. The Bank typically seeks to dispose of OREO properties in a timely manner. As a result, OREO properties have generally not warranted subsequent independent appraisals.

During the three months ended March 31, 2013, foreclosure was completed on a \$765,000 impaired loan. Upon becoming OREO, an appraisal of the underlying collateral was ordered and completed, which required a write down of principal of \$180,000 to its recorded balance of \$585,000 as of March 31, 2013. The Bank owned no OREO properties with a recorded balance at December 31, 2012.

The following table sets forth information regarding non-accrual loans, and certain other non-performing assets (including OREO) at the dates indicated:

	At March 31, 2013	At December 31, 2012
	(Dollars in Thousands)	
One- to four-family residential and cooperative apartment	\$697	\$ 938
Multifamily residential and residential mixed use	809	507
Commercial real estate and mixed use commercial real estate	6,659	7,435
Consumer	7	8
Sub-total	8,172	8,888

Edgar Filing: DIME COMMUNITY BANCSHARES INC - Form 10-Q

Non-accrual loans held for sale	270	560		
Total non-accrual loans	8,442	9,448		
Non-performing TRUPS	894	892		
OREO	585			
Total non-performing assets	9,921	10,340		
Ratios:				
Total non-accrual loans to total loans	0.25	%	0.27	%
Total non-performing assets to total assets	0.25		0.26	

TDRs and Impaired Loans

TDRs	\$47,339	\$ 51,123
Impaired loans (1)	49,177	53,144

(1) Amount includes all TDRs at both March 31, 2013 and December 31, 2012. See the discussion entitled "Impaired Loans" commencing on page 35 for a reconciliation of non-accrual and impaired loans.

Other Potential Problem Loans

(i) Loans Delinquent 30 to 89 Days

The Bank had 10 real estate loans, totaling \$2.0 million, that were delinquent between 30 and 89 days at March 31, 2013, a net reduction of \$5.1 million compared to 13 such loans totaling \$7.1 million at December 31, 2012. The 30 to 89 day delinquent levels fluctuate monthly, and are generally considered a less accurate indicator of near-term credit quality trends than non-accrual loans.

(ii) Temporary Loan Modifications

At March 31, 2013, the Bank had 4 loans totaling \$2.3 million that were either current or less than 30 days delinquent, and were mutually modified with the borrowers in a manner that: (i) did not involve a full re-underwriting of the loan; and (ii) did not meet the criteria for TDR. At December 31, 2012, there were 4 such loans totaling \$2.4 million.

These modifications, which have a typical term of 12 months, were granted by the Bank to borrowers who requested cash flow relief in order to assist them through periods of sub-optimal occupancy. The key features of these modified loans were: 1) they permitted only minor reductions in the cash flow requirements of debt service; and 2) there was no forgiveness of contractual principal and interest amounts due to the Bank. The terms of modification were generally in the form of either: (1) temporary suspension of monthly principal amortization, which, given the balloon repayment feature of these loans, typically constitutes a minor concession; or (2) a temporary reduction in interest rate, or a permanent reduction to an interest rate higher than that offered a prime borrower and generally reflective of the credit condition of the loan at the time of modification. In consideration of paragraph 12c of ASC 310-40-15, the interest rate on these temporary modifications was consistent with a "market rate" that: 1) the Bank would have offered a different borrower with comparable loan-to-value and debt service coverage ratios; and 2) the borrower could have received from another financial institution at the time of modification. To date, none of these temporarily modified loans have had their maturities extended, nor would this be a typical negotiable item for the Bank. Although all of the temporarily modified loans at March 31, 2013 and December 31, 2012 were secured by real estate, none of them were reliant upon liquidation of the underlying collateral for repayment of the outstanding loan. In the rare instance in which the Bank also held a second lien on a first mortgage that was temporarily modified, it would consider the combined debt obligations of both liens in determining potential impairment. Any impairment determined based upon this combined debt would result in a charge-off of the second lien initially, and the first loan only after the full second lien has been eliminated.

Any temporary modification that either: 1) reduced the contractual rate below market as defined in the previous paragraph; 2) forgave principal owed; or 3) satisfied any of the other criteria designated in ASC 310-40-15 was deemed a TDR at both March 31, 2013 and December 31, 2012. Any adjustments to interest rates for loans experiencing sub-optimal underwriting conditions would be authorized under the loan approval and underwriting policies that are summarized beginning on page F-8 in the Company's Annual Report on Form 10-K for the year ended December 31, 2012. Based upon the criteria established by the Bank to review its potential problem loans for impairment, designation of the 4 temporarily modified loans as TDRs would not have had a material impact upon the determination of the adequacy of the Bank's allowance for loan losses at either March 31, 2013 or December 31, 2012.

The Bank's lending function performs a formal review process that serves as an effective re-underwriting of all temporarily modified loans.

There were no temporary modifications entered into during the three-months ended March 31, 2013 and 2012.

Problem Loans Serviced for FNMA Subject to the First Loss Position

The Bank services a pool of multifamily loans sold to FNMA that had an outstanding principal balance of \$244.2 million at March 31, 2013. Pursuant to the sale agreement with FNMA, the Bank retained the First Loss Position.

The First Loss Position totaled \$15.4 million at both March 31, 2013 and December 31, 2012. Against this contingent liability, the Bank has charged through earnings a recorded liability (reserve liability for First Loss Position) of \$1.3 million as of March 31, 2013 and \$1.4 million December 31, 2012, leaving approximately \$15.1 million of potential charges to earnings for future losses (if any) as of March 31, 2013. At March 31, 2013, within the

pool of multifamily loans sold to FNMA, a \$228,000 loan was delinquent between 30 and 89 days, and one \$474,000 loan was 90 days or more delinquent. At December 31, 2012, within the pool of multifamily loans sold to FNMA, a \$229,000 loan was delinquent between 30 and 89 days, and one \$474,000 loan was 90 days or more delinquent. The Bank manages the collection of these loans in the same manner as it does for portfolio loans. Under the terms of the servicing agreement with FNMA, the Bank is obligated to fund FNMA all monthly principal and interest payments under the original terms of the loans, and to indemnify FNMA for any further losses (as defined in the sale agreement) until the earlier of the following events: (i) the Bank re-acquires the loan from FNMA; or (ii) the entire pool of loans sold to FNMA has either been fully satisfied or enters OREO status. However, the aggregate losses incurred by the Bank on this pool of serviced loans cannot exceed the total First Loss Position. The Bank has previously repurchased, and may opt to continue to repurchase, loans sold to FNMA with recourse exposure that become 90 or more days delinquent. Such repurchased loans are reported as non-performing portfolio loans and are typically purchased from FNMA in order to control losses and expedite resolution of the loan via restructure, note sale or enforcement of legal remedies.

#### Reserve Liability on Loan Origination Commitments

The Bank also maintains a reserve liability related to loan origination commitments (recorded in other liabilities) that totaled \$192,000 at March 31, 2013 and \$103,000 at December 31, 2012. The expected loss rates applied to these commitments are

consistent with those applied to comparable loans held within the Bank's portfolio. This amount fluctuates based upon the amount and composition of the Bank's loan commitment pipeline.

#### Allowance for Loan Losses

The methodology utilized to determine the Company's allowance for loan losses on real estate and consumer loans, along with periodic associated activity, remained constant during the three-months ended March 31, 2013 and December 31, 2012. The following is a summary of the components of the allowance for loan losses as of the following dates:

	At March 31, 2013	At December 31, 2012
	(Dollars in Thousands)	
Real Estate Loans:		
Impaired loans	\$490	\$520
Substandard loans not deemed impaired	697	795
Special Mention loans	242	145
Pass graded loans	19,075	19,063
Sub-total real estate loans	20,504	20,523
Consumer loans	26	27
TOTAL	\$20,530	\$20,550

Activity related to the allowance for loan losses during the three-months ended March 31, 2013 and 2012 is summarized as follows:

	Three Months Ended March 31, 2013 2012	
	(Dollars in Thousands)	
Net charge-offs	\$(177)	\$(2,263)
Provision	157	1,457
Transfer from reserve for loan commitments	-	20

The allowance for loan losses decreased \$20,000 from December 31, 2012 to March 31, 2013, due primarily to the reduction of \$30,000 of the allowance component related to impaired loans. During the period, an increase in the allowance component related to Special Mention loans was substantially offset by a reduction in the allowance component related to loans classified as Substandard but not individually evaluated for impairment. The provision for loan losses recorded during the three-months ended March 31, 2013 reflected lower expected losses on pass graded loans that was substantially offset by growth in the balance of these loans during the period.

For a further discussion of the allowance for loan losses and related activity during the three-month periods ended March 31, 2013 and 2012, please see Note 9 to the condensed consolidated financial statements. Period-end balances of special mention and pass graded real estate loans are summarized in Note 8 to the condensed consolidated financial statements, and period-end balances of impaired loans are summarized in Note 9 to the condensed consolidated financial statements.

#### Comparison of Financial Condition at March 31, 2013 and December 31, 2012

Assets. Assets totaled \$3.98 billion at March 31, 2013, \$76.9 million above their level at December 31, 2012.

Real estate loans and cash and due from banks increased by \$41.0 million and \$62.6 million, respectively, during the three months ended March 31, 2013. During the three months ended March 31, 2013, the Bank originated \$244.4 million of real estate loans (including refinancing of existing loans) which exceeded the \$200.3 million aggregate amortization on such loans (also including refinancing of existing loans). Growth in liquid funds from both retail deposits (due to depositors) and mortgagor escrow and other deposits generated an increase of \$62.6 million in cash and due from bank balances from December 31, 2012 to March 31, 2013. The additional cash balances generated during the three months ended March 31, 2013 are expected to be deployed either as payment of mortgagor escrow disbursements or to fund new loan originations during the three months ending June 30, 2013. Investment securities available for sale declined \$14.6 million during the three months ended March 31, 2013, as \$14.8 million of agency securities that were called during the period were not replaced. MBS also declined \$5.6 million during the three months ended March 31, 2013, primarily due to principal amortization during the period. The Company also reduced its investment in FHLB NY common stock by \$4.3 million during the three months ended March 31, 2013 as a result of a \$95.0 million decline in its outstanding FHLB NY borrowings during the period.

Liabilities. Total liabilities increased \$68.0 million during the three months ended March 31, 2013. Retail deposits (due to depositors) increased \$121.9 million, and mortgagor escrow and other deposits, which typically grow during the first and third quarters of each calendar year, grew \$36.7 million during the three months ended March 31, 2013. Please refer to "Part I – Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources" for a discussion of the

Edgar Filing: DIME COMMUNITY BANCSHARES INC - Form 10-Q

increase in retail deposits during the three months ended March 31, 2013. The Company elected not to replace \$95.0 million of FHLB NY advances that matured during the three months ended March 31, 2013 as a result of the additional liquidity gathered from retail deposits and mortgagor escrow and other deposits during the period.

Stockholders' Equity. Stockholders' equity increased \$8.9 million during the three months ended March 31, 2013, due primarily to net income of \$10.6 million, \$2.1 million of common stock issued for the exercise of stock options, a \$946,000 aggregate increase related to either expense amortization or income tax benefits associated with stock benefit plans that added to the cumulative balance of stockholders' equity, and a net after-tax reduction of \$219,000 in the balance of accumulated other comprehensive loss (due to an adjustment in the funded status of a defined benefit plan). Partially offsetting these items were \$4.9 million in cash dividends paid during the period.

Comparison of Operating Results for the Three Months Ended March 31, 2013 and 2012

General. Net income was \$10.6 million during the three months ended March 31, 2013, an increase of \$323,000 from net income of \$10.2 million during the three months ended March 31, 2012. During the comparative period, the provision for loan losses declined \$1.3 million, non-interest income increased \$108,000 and non-interest expense declined by \$99,000. Partially offsetting these additions to pre-tax income was a reduction of \$1.1 million in net interest income. Income tax expense increased \$104,000 during the comparative period due to the growth of \$427,000 in pre-tax earnings.

Net Interest Income. The discussion of net interest income for the three months ended March 31, 2013 and 2012 presented below should be read in conjunction with the following tables, which set forth certain information related to the condensed consolidated statements of operations for those periods, and which also present the average yield on assets and average cost of liabilities for the periods indicated. The average yields and costs were derived by dividing income or expense by the average balance of their related assets or liabilities during the periods represented. Average balances were derived from average daily balances. The yields include fees that are considered adjustments to yields.

Analysis of Net Interest Income

	Three Months Ended March 31,			2012		
	2013		Average	2012		Average
	Average	Interest	Yield/ Cost	Average	Interest	Yield/ Cost
	(Dollars In Thousands)					
Assets:						
Interest-earning assets:						
Real estate loans	\$3,505,646	\$43,148	4.92 %	\$3,440,621	\$50,513	5.87 %

## Rate/Volume Analysis

	Three Months Ended March 31, 2013 Compared to Three Months Ended March 31, 2012 Increase/ (Decrease) Due to:		
	Volume	Rate	Total
	(Dollars In thousands)		
Interest-earning assets:			
Real Estate Loans	\$881	\$(8,246)	\$(7,365)
Other loans	17	(12 )	5
MBS	(409 )	(79 )	(488 )
Investment securities	(295 )	109	(186 )
Federal funds sold and other short-term investments	20	(150 )	(130 )
Total	\$214	\$(8,378)	\$(8,164)
Interest-bearing liabilities:			
Interest bearing checking accounts	\$3	\$18	\$21
Money market accounts	389	(25 )	364
Savings accounts	4	(66 )	(62 )
CDs	(433 )	(415 )	(848 )
Borrowed funds	(3,473)	(3,086)	(6,559)
Total	\$(3,510)	\$(3,574)	\$(7,084)
Net change in net interest income	\$3,724	\$(4,804)	\$(1,080)

During the period January 1, 2009 through March 31, 2013, FOMC monetary policies resulted in the maintenance of the overnight federal funds rate in a range of 0.0% to 0.25%. As a result, beginning in early 2009, the Company was able to commence an orderly reduction of both its deposit and borrowing costs that continued through March 2013. In addition, both marketplace competition and refinancing activity related to loans secured by multifamily and commercial real estate increased considerably during both the year ended December 31, 2012 and the three months ended March 31, 2013, resulting in a reduction in the average yield on real estate loans. Both of these factors impacted the Company's net interest margin during the three months ended March 31, 2013 compared to the three months ended March 31, 2012.

**Interest Income.** Interest income was \$44.3 million during the three months ended March 31, 2013, a reduction of \$8.2 million from the three months ended March 31, 2012, primarily reflecting reductions of \$7.4 million, \$488,000 and \$186,000 in interest income on real estate loans, MBS and investment securities, respectively. High volumes of prepayment and refinancing on real estate loans reduced the Company's average yield on real estate loans and MBS by 95 basis points and 49 basis points, respectively, during the three months ended March 31, 2013 compared to the three months ended March 31, 2012. The decline in interest income on MBS also reflected a reduction of \$38.2 million in their average balance from the three months ended March 31, 2012 to the three months ended March 31, 2013.

During the period April 1, 2012 through March 31, 2013, purchases of MBS were limited and were exceeded by principal repayments of existing MBS. Partially offsetting the decline in interest income on real estate loans during the three months ended March 31, 2013 compared to the three months ended March 31, 2012 that was attributable to the 95 basis point reduction in their average yield, was an increase of \$65.0 million in their average balance during the comparative period, as the Company increased its loan origination volumes late in 2012, and during the three months ended March 31, 2013, as part of a measured balance sheet growth strategy. The decline in interest income on investment securities during the three months ended March 31, 2013 compared to the three months ended March 31,

2012, resulted from a reduction of \$118.0 million in their average balance, which was partially offset by an increase of 43 basis points in their average yield. Similar to MBS, purchases of investment securities were limited during the period April 1, 2012 through March 31, 2013 and were exceeded by their calls and/or maturity activity. Since the great majority of the investment securities that were either called or matured during the period April 1, 2012 through March 31, 2013 possessed yields between 0.50% to 1.0%, their removal served to improve the average yield on the aggregate portfolio of investment securities during the three months ended March 31, 2013 compared to the three months ended March 31, 2012.

**Interest Expense.** Interest expense decreased \$7.1 million, to \$12.0 million, during the three months ended March 31, 2013, from \$19.1 million during the three months ended March 31, 2012. This decline resulted primarily from reductions of \$6.6 million and \$848,000 in interest expense on borrowed funds and CDs, respectively, during the comparative period. The reduction in interest expense on borrowed funds resulted from declines of both \$355.6 million in their average balance and 1.21% in their average cost from the three months ended March 31, 2012 to the three months ended March 31, 2013, as the Company, during the 12-month period ended March 31, 2013, elected to utilize liquidity generated from either deposit growth or increased loan amortization activity to restructure and/or reduce its aggregate level of borrowed funds. The reduction in interest expense on CDs also reflected declines of both \$96.2 million in their average balance and 17 basis points in their average cost during the three months ended March 31, 2013 compared to the three months ended March 31, 2012. Since the Company did not elect to compete aggressively for CDs during the period April 1, 2012 through March 31, 2013, it experienced attrition in the higher cost CDs that matured during the period. The reduction in the average cost of CDs also resulted from ongoing reductions in offering rates on new CDs that occurred from April 1, 2012 through March 31, 2013.

Provision for Loan Losses. The provision for loan losses was \$157,000 during the three months ended March 31, 2013, compared to \$1.5 million during the three months ended March 31, 2012. The reduction reflected the improvement in the overall credit quality of the loan portfolio from April 1, 2012 through March 31, 2013. During the period April 1, 2012 through March 31, 2013, the Company experienced declines in both non-accrual and delinquent loans, as well as minimal net charge-off activity.

Non-Interest Income. Total non-interest income increased \$108,000 from the three months ended March 31, 2012 to the three months ended March 31, 2013, due primarily to a reduction of \$181,000 in OTTI losses on securities (a negative component of non-interest income) and an increase of \$104,000 in the net gains or losses on securities (primarily trading securities). Other non-interest income declined \$126,000 from the three months ended March 31, 2012 to the three months ended March 31, 2013 primarily due to the elimination of rental income on a real estate property that was disposed of late in 2012.

Non-Interest Expense. Non-interest expense was \$16.3 million during the three months ended March 31, 2013, a reduction of \$99,000 from \$16.4 million during the three months ended March 31, 2012. Reductions of \$167,000 in marketing expenses and \$143,000 in regulatory examination costs during the three months ended March 31, 2013 compared to the three months ended March 31, 2012, were partially offset by an increase of \$180,000 in writedowns on OREO during the comparative period.

Non-interest expense was 1.65% of average assets during the three months ended March 31, 2013, compared to 1.62% during the three months ended March 31, 2012, reflecting a reduction of \$107.8 million in average assets from the three months ended March 31, 2012 to the three months ended March 31, 2013.

Income Tax Expense. Income tax expense increased \$104,000 during the three months ended March 31, 2013 compared to the three months ended March 31, 2012, due primarily to the growth of \$427,000 in pre-tax earnings. The Company's consolidated tax rate was 40.4% during the three months ended March 31, 2013, down slightly from 40.8% during the three months ended March 31, 2012.

### Item 3. Quantitative and Qualitative Disclosures About Market Risk

Quantitative and qualitative disclosures about market risk were presented at December 31, 2012 in Item 7A of the Company's Annual Report on Form 10-K, filed with the SEC on March 15, 2013. The following is an update of the discussion provided therein.

General. Virtually all of the Company's market risk continues to reside at the Bank level. The Bank's largest component of market risk remains interest rate risk. The Company is not subject to foreign currency exchange or commodity price risk. At March 31, 2013, the Company owned nine mutual fund investments totaling \$5.0 million that were designated as trading. At March 31, 2013, the Company did not conduct transactions involving derivative instruments requiring bifurcation in order to hedge interest rate or market risk.

Assets, Deposit Liabilities and Wholesale Funds. There was no material change in the composition of assets, deposit liabilities or wholesale funds from December 31, 2012 to March 31, 2013. See "Part I - Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources" for a discussion of deposit and borrowing activity during the period.

#### Interest Rate Risk Exposure Analysis

Economic Value of Equity ("EVE") Analysis. At March 31, 2013, the Bank continued to monitor the impact of interest rate volatility upon EVE in the same manner as at December 31, 2012.

The analysis that follows presents the estimated EVE resulting from market interest rates prevailing at a given quarter-end ("Pre-Shock Scenario"), and under other interest rate scenarios (each a "Rate Shock Scenario")

represented by immediate, permanent, parallel shifts in interest rates from those observed at March 31, 2013 and December 31, 2012. The analysis additionally presents a measurement of the interest rate sensitivity at March 31, 2013 and December 31, 2012. Interest rate sensitivity is measured by the basis point changes in the various EVE ratios ("EVE Ratios") from the Pre-Shock Scenario to the Rate Shock Scenarios. EVE Ratios represent the EVE as a percentage of the total value of assets determined under each respective Pre- and Rate Shock Scenario. An increase in the EVE Ratio is considered favorable, while a decline is considered unfavorable.

The EVEs presented below incorporate some asset and liability values derived from the Bank's valuation model, such as those for mortgage loans and time deposits, and some asset and liability values provided by reputable independent sources, such as values for the Bank's MBS and CMO portfolios, as well as its putable borrowings. The Bank's valuation model makes various estimates regarding cash flows from principal repayments on loans and deposit decay rates at each level of interest rate change. The Bank's estimates for loan repayment levels are influenced by the recent history of prepayment activity in its loan portfolio, as well as the interest rate composition of the existing portfolio, especially in relation to the existing interest rate environment. In addition, the Bank considers the amount of fee protection inherent in the loan portfolio when estimating future repayment cash flows. Regarding deposit decay rates, the Bank tracks and analyzes the decay rate of its deposits over time and over various interest rate scenarios and then makes estimates of its deposit decay rate for use in the valuation model. The Bank also generates a series of spot discount rates that are integral to the valuation of the projected monthly cash flows of its assets and liabilities. The Bank's valuation model employs discount rates that it

41

---

Edgar Filing: DIME COMMUNITY BANCSHARES INC - Form 10-Q

considers representative of prevailing market rates of interest, with appropriate adjustments it believes are suited to the heterogeneous characteristics of the Bank's various asset and liability portfolios. No matter the care and precision with which the estimates are derived, however, actual cash flows could differ significantly from the Bank's estimates, resulting in significantly different EVE calculations.

	At March 31, 2013				At December 31, 2012								
	Economic Value of Equity				Basis Point Change in EVE Ratio				Basis Point Change in EVE Ratio				
	Dollar Amount	Dollar Change	Percentage Change	EVE Ratio	EVE Ratio	Board Approved	EVE Ratio	EVE Ratio	Dollar Amount	EVE Ratio	EVE Ratio	Board Approved	EVE Ratio
	(Dollars in Thousands)												
Rate Shock Scenario													
+ 200 Basis Points	\$430,786	\$(34,837)	-7.48 %	11.21%	(32 )	6.0 %			\$431,313	11.43%	22	6.0 %	
Pre-Shock Scenario	465,623	-	-	11.53		8.0			444,209	11.21		8.0	

The Pre-Shock Scenario EVE was \$465.6 million at March 31, 2013, compared to \$444.2 million at December 31, 2012, and the EVE Ratio at March 31, 2013 was 11.53% in the Pre-Shock Scenario, compared to 11.21% at December 31, 2012. The Pre-Shock Scenario EVE and the EVE Ratio for December 31, 2012 have been adjusted to conform to methodology changes implemented in the March 31, 2013 valuation. The increase in both the Pre-Shock Scenario EVE and the Pre-Shock Scenario EVE Ratio at March 31, 2013 compared to December 31, 2012 resulted primarily from a more favorable valuation of both borrowings and CDs that reflected reductions in the average costs of these liabilities from December 31, 2012 to March 31, 2013.

The Bank's +200 basis point Rate Shock Scenario EVE decreased from its \$431.3 million balance at December 31, 2012 to \$430.8 million at March 31, 2013, reflecting a greater adverse impact on the valuation of real estate loans in the +200 basis point Rate Shock Scenario EVE as of March 31, 2013 (due to the extension of their average duration from December 31, 2012 to March 31, 2013), as well as a reduced benefit in the valuation of both CDs and borrowings in the +200 basis point Rate Shock Scenario EVE as of March 31, 2013 compared to December 31, 2012. The reduced benefit in valuation of CDs and borrowings reflected a reduction in the average duration of these liabilities during the three months ended March 31, 2013.

The EVE Ratio was 11.21% in the +200 basis point Rate Shock Scenario at March 31, 2013, a reduction from the EVE Ratio of 11.43% in the +200 basis point Rate Shock Scenario at December 31, 2012, reflecting both the reduction in the +200 basis point Rate Shock Scenario EVE from December 31, 2012 to March 31, 2013 and growth in total assets (a component of the denominator of the EVE Ratio) from December 31, 2012 to March 31, 2013.

At March 31, 2013, the interest rate sensitivity in the +200 basis point Rate Shock Scenario was negative 32 basis points, compared to interest rate sensitivity of positive 22 basis points in the +200 basis point Rate Shock Scenario at December 31, 2012, also reflecting both the reduction in the +200 basis point Rate Shock Scenario EVE and the growth in total assets during the period.

**Income Simulation Analysis.** As of the end of each quarterly period, the Company also monitors the impact of interest rate changes through a net interest income simulation model. This model estimates the impact of interest rate changes on the Bank's net interest income over forward-looking periods typically not exceeding 24 months (a considerably shorter period than measured through the EVE analysis). The following table discloses the estimated changes to the Company's net interest income over the 12-month period ending March 31, 2014 assuming

instantaneous changes in interest rates for the given Rate Shock Scenarios:

Instantaneous Change in Interest rate of:	Percentage Change in Aggregate Net Interest Income
+ 200 Basis Points	(6.0)%
+ 100 Basis Points	(3.0)
-100 Basis Points	N/A <sup>(1)</sup>

<sup>(1)</sup> Due to the existing low level of interest rates, this calculation was deemed not applicable for the 12-month period ending March 31, 2014 (and was therefore not presented).

Item 4. Controls and Procedures

Management of the Company, with the participation of its Chief Executive Officer and Chief Financial Officer, conducted an evaluation of the effectiveness as of March 31, 2013, of the Company's disclosure controls and procedures, as defined in Rules 13a-15(e) and 15(d)-15(e) under the Exchange Act. Based upon this evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective as of March 31, 2013 in ensuring that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to management of the Company as appropriate to allow timely decisions regarding required disclosures.

Changes in Internal Control Over Financial Reporting

There was no change in the Company's internal control over financial reporting that occurred during the Company's last fiscal quarter that has materially affected, or is reasonably likely to materially affect, such controls.

PART II – OTHER INFORMATION

Item 1. Legal Proceedings

In the ordinary course of business, the Company is routinely named as a defendant in or party to various pending or threatened legal actions or proceedings. Certain of these matters may seek substantial monetary damages. In the opinion of management, the Company is involved in no actions or proceedings that will have a material adverse impact on its financial condition and results of operations.

Item 1A. Risk Factors

There were no material changes from the risks disclosed in the Risk Factors section of the Company's Annual Report on Form 10-K for the year ended December 31, 2012.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(c) The Holding Company did not repurchase any shares of its common stock into treasury during the three months ended March 31, 2013. No existing repurchase programs expired during the three months ended March 31, 2013, nor did the Company terminate any repurchase programs prior to expiration during the period. As of March 31, 2013, the Holding Company had an additional 1,124,549 shares remaining eligible for repurchase under its twelfth stock repurchase program, which was publicly announced in June 2007.

Item 3. Defaults Upon Senior Securities

None.

Item 4. (Removed and Reserved)

Item 5. Other Information

None.
