AMERICAN TECHNICAL CERAMICS CORP. AND SUBSIDIARIES
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS
(In thousands, except per share data)

(1) BASIS OF PRESENTATION:

The accompanying unaudited interim consolidated financial statements of American Technical Ceramics Corp. and subsidiaries (the "Registrant") reflect all adjustments (consisting of normal recurring accruals) which are, in the opinion of management, necessary for a fair presentation of its consolidated financial position as of March 31, 2002 and the results of its operations for the three and nine month periods ended March 31, 2002 and 2001. These consolidated financial statements should be read in conjunction with the summary of significant accounting policies and notes to consolidated financial statements included in the Registrant's Annual Report to Stockholders for the fiscal year ended June 30, 2001. Results for the three and nine month periods ended March 31, 2002 are not necessarily indicative of results which could be expected for the entire year.

(2) IMPACT OF NEW ACCOUNTING STANDARDS:

The Financial Accounting Standards Board recently issued Statement No. 141, "Business Combinations" ("SFAS No. 141") and Statement No. 142, "Goodwill and Other Intangible Assets" ("SFAS No. 142"). SFAS No. 141 provides that all business combinations initiated after June 30, 2001 must be accounted for using the purchase method. Statement No. 142 provides that intangible assets with estimable useful lives are amortized to their estimated residual values over those estimated useful lives. Statement No. 142 also provides that intangible assets with indefinite useful lives are not to be amortized, but rather, tested for impairment at least annually in accordance with the provisions of the Statement. Although SFAS No. 142 will become effective for the Registrant on July 1, 2002, the Registrant does not presently have any goodwill or intangible assets that would be affected by this Statement.

Edgar Filing: AMERICAN TECHNICAL CERAMICS CORP - Form 10-Q

In July 2001, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 143, "Accounting for Asset Retirement Obligations" ("SFAS No. 143"). SFAS No. 143 addresses financial accounting requirements for retirement obligations associated with retirement of tangible long-lived assets and for the associated asset retirement costs. SFAS No. 143 requires a company to record the fair value of an asset retirement obligation in the period in which it incurred a legal obligation associated with the retirement of tangible long-lived assets that results from the acquisition, construction development and/or normal use of the asset. The company is also to record a corresponding increase to the carrying amount of the related asset and to depreciate that cost over the life of the asset. The amount of the liability is changed at the end of each period to reflect the passage of time and changes in estimated future cash flows. SFAS No. 143 is effective for fiscal years beginning after June 15, 2002. The Registrant has not yet determined the impact of its planned adoption of SFAS No. 143 (anticipated for July 1, 2002).

-5-

AMERICAN TECHNICAL CERAMICS CORP. AND SUBSIDIARIES
 NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS
 (In thousands, except per share data)

In August 2001, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets" ("SFAS No. 144"), which addresses financial accounting and reporting for the impairment or disposal of long-lived assets. SFAS No. 144 establishes accounting guidelines for the impairment of long-lived assets to be held and used; to be disposed of other than by sale; and to be disposed of by sale. SFAS No. 144 is effective for fiscal years beginning after December 15, 2001 and interim periods within those fiscal years. The Registrant has not yet determined the impact of its planned adoption of SFAS No. 144 (anticipated for July 1, 2002).

(3) SUPPLEMENTAL CASH FLOW INFORMATION:

During the nine months ended March 31, 2002, the Registrant (i) granted \$119 in deferred compensation stock awards, (ii) recognized a \$51 reduction of income taxes payable related to stock options exercised, and (iii) issued treasury stock in connection with stock awards with a cost basis of \$29.

(4) INVENTORIES:

Inventories included in the accompanying consolidated financial statements consist of the following:

	March 31, 2002	June 30, 2001
	-----	-----
	(unaudited)	
Raw materials	\$ 13,785	\$ 13,388
Work-in-process	3,898	4,717
Finished goods	4,921	6,463
	-----	-----

Other comprehensive income		
Foreign currency translation adjustments	54	(241)
Unrealized (loss)/ gains on investments, net of tax:	(64)	159
Other comprehensive loss	(10)	(82)
Comprehensive (loss)/ income	\$ (1,807)	\$ 7,917

Edgar Filing: AMERICAN TECHNICAL CERAMICS CORP - Form 10-Q

(7) INDEBTEDNESS:

The Registrant's credit agreements contain certain financial covenants, including a requirement to maintain a certain level of annualized earnings before interest, taxes, depreciation and amortization (EBITDA) to current debt plus annual interest payments. While the Registrant is currently in compliance with this covenant, it is likely that the Registrant will be in default under this covenant on June 30, 2002. In such case, the bank could require payment in full of the outstanding balance under the credit agreement (\$4,768 at March 31, 2002). The Registrant believes that, in the event of default, it will be able to secure alternative financing, which together with available cash, will be sufficient to enable it to refinance these amounts. There can be no assurance, however, that the Registrant will be able to refinance or that the bank will waive any default.

-8-

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL
CONDITION AND RESULTS OF OPERATIONS
(In thousands, except per share data)

The following discussion and analysis should be read in conjunction with the consolidated financial statements, related notes and other information included in this Quarterly Report on Form 10-Q.

Statements in this Quarterly Report on Form 10-Q that are not historical fact may constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. All such forward-looking statements are subject to risks and uncertainties, including, but not limited to, market and economic conditions, the impact of competitive products, product demand and market acceptance risks, changes in product mix, costs and availability of raw materials, fluctuations in operating results, delays in development of highly-complex products, risks associated with international sales and sales to the U.S. military, risk of customer contract or sales order cancellations and other risks detailed from time to time in the Registrant's filings with the Securities and Exchange Commission, including, without limitation, those contained under the caption "Item 1. BUSINESS - CAUTIONARY STATEMENTS REGARDING FORWARD - LOOKING STATEMENTS" in the Registrant's Annual Report on Form 10-K. These risks could cause the Registrant's actual results for future periods to differ materially from those expressed in any forward-looking statements made by, or on behalf of, the Registrant. Any forward-looking statement represents the Registrant's expectations or forecasts only as of the date it was made and should not be relied upon as representing its expectations or forecasts as of any subsequent date. The Registrant undertakes no obligation to correct or update any forward-looking statement, whether as a result of new information, future events or otherwise, even if its expectations or forecasts change.

RESULTS OF OPERATIONS

Three Months Ended March 31, 2002 Compared with Three Months Ended March 31,

2001

Net sales for the three months ended March 31, 2002 decreased 49% to \$11,956, compared to \$23,359 in the comparable period in the prior fiscal year. The decrease in net sales was primarily the result of decreased sales volume across all major product lines. The decline in sales is due to the economic downturn affecting the entire electronic component industry. Sales were down in

Edgar Filing: AMERICAN TECHNICAL CERAMICS CORP - Form 10-Q

all market sectors, except the medical equipment sector.

Gross margin for the three months ended March 31, 2002 was 21.3% of net sales, compared to 42.7% for the comparable period in the prior fiscal year. The decrease in gross margin was principally due to lower sales volume. Cost reduction measures put in place during the fourth quarter of fiscal year 2001 and the first quarter of fiscal year 2002 have partially offset the impact of lower sales on gross margins. These measures included a reduction in headcount, reduced capital spending and general cost controls on discretionary spending. In comparison to the three months ended December 31, 2001 gross margins for the three months ended March 31, 2002 were negatively impacted by several factors including a reduction in benefits from reclaiming activities, resulting primarily from reduced manufacturing levels, offset by a reduction in charges to write down inventory to net realizable value.

-9-

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (CONTINUED) (In thousands, except per share data)

Selling, general and administrative expenses for the three months ended March 31, 2002 decreased 25% to \$3,158, compared to \$4,207 in the comparable period in the prior fiscal year. The decrease was due to decreased commission expense as a result of the decrease in net sales, lower bonus accruals due to decreased profitability and decreased payroll related expenses due to cost reduction measures instituted in the fourth quarter of fiscal year 2001 and the first quarter of fiscal year 2002.

Research and development expenses for the three months ended March 31, 2002 decreased 21% to \$923, compared to \$1,167 in the comparable period in the prior fiscal year. A reduction in research and development spending was among the cost reduction measures referred to above.

Bookings for the three months ended March 31, 2002 were \$11,803, compared to \$22,079 for the three months ended March 31, 2001. Cancellations have returned to historical levels, but bookings remain low, particularly in the fiber optic and semiconductor manufacturing equipment sectors. Bookings have recovered during the second quarter of fiscal year 2002, particularly for the Registrant's core capacitors serving the wireless infrastructure, medical equipment and military sectors. However, they remain well below the record levels experienced during the fiscal year ended June 30, 2001. The Registrant anticipates continued modest improvement in bookings over the next few quarters. Delivery times and price are key factors in obtaining orders. The Registrant believes its current levels of inventories should enable it to deliver orders in the short time frames currently required by many of its customers.

The backlog of unfilled orders was \$9,745 at March 31, 2002 compared to \$29,241 at March 31, 2001 and \$16,153 at June 30, 2001. The decrease in backlog compared to March 31, 2001 is primarily the result of bookings cancellations incurred during the latter half of fiscal year 2001 as a result of the economic weakness in the electronic component industry. The decrease in backlog compared to June 30, 2001 was primarily due to shipments in excess of order bookings as the Registrant continued to ship orders out of backlog scheduled for delivery during the first half of fiscal year 2002. The Registrant anticipates that customers will place orders with short delivery requirements for the foreseeable future resulting in a slow growth in sales and bookings over the next few quarters. As a result, the level of backlog is a less meaningful indicator of the strength of the Registrant's business than it has been in the past.

As a result of the foregoing, net loss for the three months ended March 31,

Edgar Filing: AMERICAN TECHNICAL CERAMICS CORP - Form 10-Q

2002 was \$1,057, or (\$.13) per common share ((\$.13) per common share assuming dilution), compared to net income of \$2,959, or \$.37 per common share (\$.35 per common share assuming dilution), for the comparable period in the prior fiscal year.

-10-

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (CONTINUED) (In thousands, except per share data)

Nine Months Ended March 31, 2002 Compared with Nine Months Ended March 31, 2001

Net sales for the nine months ended March 31, 2002 decreased 43% to \$37,443, compared to \$65,582 in the comparable period in the prior fiscal year. The decrease in net sales was primarily the result of decreased sales volume across all major product lines. The decline in sales is due to the economic downturn affecting the entire electronic component industry. Sales were down in all market sectors except the medical equipment sector. Sales to a major medical equipment OEM accounted for 10% of the Registrant's net sales in the nine months ended March 31, 2002.

Gross margin for the nine months ended March 31, 2002 was 24.7% of net sales, compared to 42.7% for the comparable period in the prior fiscal year. The decrease in gross margin was principally due to lower sales volume. Cost of sales for the nine months ended March 31, 2002 was also negatively impacted by the decline in precious metal recovery discussed above and charges of \$1,357 to write down certain inventory to estimated net realizable value as a result of excess quantities, customer requirements and other causes. Similar charges against inventory may be necessary in future periods depending upon various factors, including demand for the Registrant's products and the efficiency of its production process. Cost reduction measures put in place during the fourth quarter of fiscal year 2001 and in the first quarter of fiscal year 2002 have partially offset the impact of the lower sales. These measures included a reduction in headcount, reduced capital spending and general cost controls on discretionary spending.

Selling, general and administrative expenses for the nine months ended March 31, 2002 decreased 24% to \$9,313 compared to \$12,279 in the comparable period in the prior fiscal year. The decrease was due to decreased commission expense as a result of the decrease in net sales, lower bonus accruals due to decreased profitability and decreased payroll related expenses due to cost reduction measures instituted in the fourth quarter of fiscal year 2001 and the first quarter of fiscal year 2002, partially offset by severance costs of \$203 incurred in connection with the headcount reduction in the United States and England, and professional fees incurred in connection with closing the Registrant's sales office in England.

Research and development expenses for the nine months ended March 31, 2002 decreased 21% to \$2,608, compared to \$3,297 in the comparable period in the prior fiscal year. A reduction in research and development spending was among the cost reduction measures referred to above.

The Registrant experienced a net loss for the nine months ended March 31, 2002 primarily due to the low sales level in relation to fixed costs, particularly in the second and third quarters, and the low precious metal recovery and inventory charges discussed above. The cost reduction measures employed by the Registrant did not fully compensate for the decline in revenue.

As a result of the continued softness in sales, the Registrant has taken

Edgar Filing: AMERICAN TECHNICAL CERAMICS CORP - Form 10-Q

further measures to reduce costs in the fourth quarter, including a further reduction in headcount. The Registrant expects that it will receive some benefit from these measures during the fourth quarter and the full benefit during the next fiscal year. However, the Registrant also expects that it will incur additional expenditures in connection with these measures which will impact its results for the fourth quarter and fiscal year 2002.

-11-

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (CONTINUED)

(In thousands, except per share data)

LIQUIDITY AND CAPITAL RESOURCES

The Registrant's financial position at March 31, 2002 remains strong as evidenced by working capital of \$32,662 and stockholders' equity of \$54,514. The Registrant's current ratio at March 31, 2002 was 7.3:1, compared to a current ratio of 4.2:1 at June 30, 2001. The Registrant's quick ratio (current assets minus inventory divided by current liabilities) at March 31, 2002 was 2.9:1 as compared to 1.9:1 at June 30, 2001. The improvements in the Registrant's current ratio and quick ratio were primarily due to a reduction in current liabilities as a result of lower raw material purchases, lower bonus and commission accruals due to the lower sales and profitability and reduced capital spending, partially offset by a reduction in accounts receivable.

Cash, cash equivalents and investments increased by \$478 to \$5,657 at March 31, 2002 from \$5,179 at June 30, 2001, primarily as a result of collection of accounts receivable, reduced purchasing of raw material and reduced discretionary spending, partially offset by payment of year end bonus and commission accruals and investment in property, plant and equipment. Accounts receivable decreased by \$4,907 to \$6,623 at March 31, 2002 from \$11,530 at June 30, 2001, primarily due to lower sales volumes and collection of balances due at June 30, 2001. Inventories decreased by \$1,964 to \$22,604 at March 31, 2002 from \$24,568 at June 30, 2001. Accounts payable and accrued expenses decreased by \$3,763 to \$4,227 at March 31, 2002 from \$7,990 at June 30, 2001, primarily due to payment of fiscal year end bonus accruals, lower capital spending due to cost reduction measures and lower purchasing levels of raw materials due to the lower production volumes commensurate with lower sales volumes. Income taxes payable have decreased \$2,080 to a receivable of \$372 at March 31, 2002 from a payable of \$1,759 at June 30, 2001, primarily due to payment of estimated taxes on income earned during the first quarter of the fiscal year which was offset by the losses incurred in the second and third quarters.

The Registrant has available two credit facilities with Bank of America, N.A.: a revolving line of credit of \$4,000 and an equipment line of credit of \$8,500. The outstanding principal balance under both lines bears interest at 1.5% above the one month rate for U.S. Dollar deposits on the London Interbank Market ("LIBOR"). The outstanding principal balance of the equipment line rolls over periodically into a self-amortizing term note of not less than four nor more than seven years. Borrowings under the equipment line are secured by the related equipment purchases.

The Registrant did not incur any borrowings under the revolving line of credit or the equipment line during the three and nine months ended March 31, 2002. Through March 31, 2002, the Registrant's had no borrowings outstanding under the line of credit and an aggregate of \$4,768 under the equipment line.

-12-

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL
CONDITION AND RESULTS OF OPERATIONS (CONTINUED)
(In thousands, except per share data)

The Registrant has available two credit facilities with Citibank N.A. (as successor to European American Bank, N.A.); a \$5,000 line for equipment purchases and a \$2,000 unsecured term loan line. The lines bear interest at either the Citibank prime rate or 1.5% above the Reserve Adjusted LIBOR rate (as defined). Borrowings under the equipment line will be secured by the related equipment purchases. The outstanding balance six months after the term loan line is made available and at expiration, the line (January 2002) will roll into fully amortizing term loans with a maturity of five years. The Registrant has not incurred any borrowings under either of these facilities. These facilities were scheduled to expire in January 2002. The Registrant is negotiating a new credit facility with Citibank N.A. While there can be no assurance that an agreement will be reached, Citibank N.A. has agreed to extend these lines on a month-to-month basis while discussions are in progress.

Each of the credit facilities described above is subject to certain financial covenants, including maintenance of asset and liability percentage ratios. One such covenant requires the Registrant to maintain a certain level of annualized earnings before interest, taxes, depreciation and amortization (EBITDA) to current debt plus annual interest payments. While the Registrant is currently in compliance with this covenant, given the nature of the covenant and the losses incurred during the first nine months of this fiscal year, it is likely that the Registrant will not be in compliance under this covenant at the end of the current quarter with respect to the Bank of America facilities. In such case, the Bank could require payment in full of the outstanding balance under these facilities (\$4,218 at March 31, 2002).

The Registrant believes that, in the event of a default, it will be able to secure alternative financing which, together with available cash, will be sufficient to enable it to refinance these facilities, or to obtain a waiver of the default. There can be no assurance, however, that the Registrant will be able to obtain such alternative financing or that the bank will waive any default.

-13-

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL
CONDITION AND RESULTS OF OPERATIONS (CONTINUED)
(In thousands, except per share data)

Capital expenditures for the nine months ended March 31, 2002 totaled \$2,926, including expenditures for machinery and equipment and planned leasehold improvements. The Registrant intends to use cash on hand to finance budgeted capital expenditures, primarily for equipment acquisition, of approximately \$500 for the remainder of fiscal year 2002.

Aggregate contractual obligations as of March 31, 2002 mature as follows:

		Payments Due by Period			
		Less			
		than 1	1- 3	4- 5	After 5
		year	years	years	years
Contractual Obligations	Total				

Edgar Filing: AMERICAN TECHNICAL CERAMICS CORP - Form 10-Q

Long-Term Debt	\$4,893	\$ 761	\$2,282	\$1,384	\$ 467
Capital Lease Obligations	2,651	223	777	639	1,011
Operating Leases	225	147	78	---	---
	-----	-----	-----	-----	-----
Total Contractual Obligations	\$7,769	\$ 1,131	\$3,137	\$2,023	\$ 1,478
	=====	=====	=====	=====	=====

Aggregate other commitments as of March 31, 2002 mature as follows:

Other Commercial Commitments	Total Amounts Committed	Amount of Commitment Expiration Per Period Less than 1 year
-----	-----	-----
Lines of Credit	\$ 18,950	\$ 18,950

The Registrant routinely enters into binding and non-binding purchase obligations in the ordinary course of business, primarily covering anticipated purchases of inventory and equipment. The terms of these commitments generally do not extend beyond six months. None of these obligations are individually significant. The Registrant does not expect that these commitments will materially adversely affect its liquidity in the foreseeable future.

CRITICAL ACCOUNTING POLICIES

The Securities and Exchange Commission ("SEC") recently issued disclosure guidance for "critical accounting policies." The SEC defines "critical accounting policies" as those that require the application of management's most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain and may change in subsequent periods. The Registrant's significant accounting policies are described in Note 1 to its consolidated financial statements contained in its Annual Report on Form 10-K for the fiscal year ended June 30, 2001. The Registrant believes that the following accounting policies require the application of management's most difficult, subjective or complex judgments:

-14-

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL
CONDITION AND RESULTS OF OPERATIONS (CONTINUED)
(In thousands, except per share data)

Allowances for Doubtful Accounts Receivable

The Registrant performs ongoing credit evaluations of its customers and adjusts credit limits based upon payment history and a customer's current creditworthiness, as determined by its review of the customer's current credit information. The Registrant continuously monitors collections and payments from its customers and maintains an allowance for estimated credit losses based upon its historical experience and any specific customer collection issues that the Registrant has identified. While such credit losses have historically been within the Registrant's expectations and the allowances established, the

Edgar Filing: AMERICAN TECHNICAL CERAMICS CORP - Form 10-Q

Registrant cannot guarantee that it will continue to experience the same credit loss rates that it has in the past. Should the financial position of its customers deteriorate resulting in an impairment of their ability to pay amounts due, the Registrant's revised estimate of such losses may negatively impact its operating results in the future.

Sales Returns and Allowances

In the ordinary course of business, the Registrant accepts returns of products sold for various reasons and grants sales allowances to customers. While the Registrant engages in extensive product quality control programs and processes, its level of sales returns is affected by, among other things, the quality of its manufacturing process. The Registrant maintains an allowance for sales returns and allowances based upon historical returns and allowances granted. While such returns and allowances have historically been within the Registrant's expectations, actual return and allowance rates in the future may differ from current estimates, which could negatively impact its operating results in the future.

Inventory Valuation

The Registrant values inventory at the lower of aggregate cost (First-in, First-out) or market. When the cost of inventory is determined by management to be in excess of its market value, inventory is written down to its estimated net realizable value. This requires the Registrant to make estimates and assumptions about several factors (e.g., future sales quantities and selling prices, and percentage complete and failure rates for work in process) based upon historical experience and its projections for future periods. Changes in factors such as the level of order bookings, the product mix of order bookings and the Registrant's manufacturing processes could have a material impact on the Registrant's assessment of the net realizable value of inventory in the future.

-15-

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (CONTINUED) (In thousands, except per share data)

Valuation of Deferred Tax Assets

The Registrant regularly evaluates its ability to recover the reported amount of its deferred income taxes considering several factors, including its estimate of the likelihood of the Registrant generating sufficient taxable income in future years during the period over which temporary differences reverse. Presently, the Registrant believes that it is more likely than not that it will realize the benefits of its deferred tax assets based primarily on its history of and projections for taxable income in the future, and its intention to carry back net operating losses to generate refunds of income taxes previously paid. In the event that actual results differ from its estimates or the Registrant adjusts these estimates in future periods, the Registrant may need to establish a valuation allowance against a portion or all of its deferred tax assets, which could materially impact its financial position or results of operations in future periods.

Valuation of Long-lived and Intangible Assets

Edgar Filing: AMERICAN TECHNICAL CERAMICS CORP - Form 10-Q

The Registrant assesses the recoverability of long-lived assets whenever the Registrant determines that events or changes in circumstances indicate that the carrying amount may not be recoverable. Its assessment is primarily based upon its estimate of future cash flows associated with these assets. The Registrant has not determined that there has been an indication of impairment of any of its assets. However, should its operating results deteriorate, or anticipated new product launches not occur or not attain the commercial acceptance that the Registrant anticipates, the Registrant may determine that some portion of its long-lived assets are impaired. Such determination could result in non-cash charges to income that could materially affect its financial position or results of operations for that period.

IMPACT OF NEW ACCOUNTING STANDARDS:

The Financial Accounting Standards Board recently issued Statement No. 141, "Business Combinations" ("SFAS No. 141") and Statement No. 142, "Goodwill and Other Intangible Assets" ("SFAS No. 142"). SFAS No. 141 provides that all business combinations initiated after June 30, 2001 must be accounted for using the purchase method. Statement No. 142 provides that intangible assets with estimable useful lives are amortized to their estimated residual values over those estimated useful lives. Statement No. 142 also provides that intangible assets with indefinite useful lives are not to be amortized, but rather, tested for impairment at least annually in accordance with the provisions of the Statement. Although SFAS No. 142 will become effective for the Registrant on July 1, 2002, the Registrant does not presently have any goodwill or intangible assets that would be affected by this Statement.

-16-

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (CONTINUED) (In thousands, except per share data)

In July 2001, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 143, "Accounting for Asset Retirement Obligations" ("SFAS No. 143"). SFAS No. 143 addresses financial accounting requirements for retirement obligations associated with retirement of tangible long-lived assets and for the associated asset retirement costs. SFAS No. 143 requires a company to record the fair value of an asset retirement obligation in the period in which it incurred a legal obligation associated with the retirement of tangible long-lived assets that results from the acquisition, construction development and/or normal use of the asset. The company is also to record a corresponding increase to the carrying amount of the related asset and to depreciate that cost over the life of the asset. The amount of the liability is changed at the end of each period to reflect the passage of time and changes in estimated future cash flows. SFAS No. 143 is effective for fiscal years beginning after June 15, 2002. The Registrant has not yet determined the impact of its planned adoption of SFAS No. 143 (anticipated for July 1, 2002).

In August 2001, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets" ("SFAS No. 144"), which addresses financial accounting and reporting for the impairment or disposal of long-lived assets. SFAS No. 144 establishes accounting guidelines for the impairment of long-lived assets to be held and used; to be disposed of other than by sale; and to be disposed of by sale. SFAS No. 144 is effective for fiscal years beginning after December 15, 2001 and interim periods within those fiscal years. The Registrant has not yet determined the impact of its planned adoption of SFAS No. 144 (anticipated for July 1, 2002).

Edgar Filing: AMERICAN TECHNICAL CERAMICS CORP - Form 10-Q

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Registrant has identified four market risks relative to its business: interest rate risk, foreign currency exchange rate risk, commodity price risk and security price risk. There has been no material changes in the way the Registrant conducts its worldwide business, foreign exchange risk management, investments in marketable securities or raw material commodity purchasing from the descriptions thereof in the Registrant's Form 10-K for the fiscal year ended June 30, 2001.
