SECURITIES AND EXCHANGE COMMISSION

FORM 20-F

(Mark One)

- () REGISTRATION STATEMENT PURSUANT TO SECTION 12(b)
OR (g) OF THE SECURITIES EXCHANGE ACT OF 1934
- or
- (XX) ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended March 31, 2001

COMMISSION FILE NUMBER: 1-7239

KABUSHIKI KAISHA KOMATSU SEISAKUSHO
(Exact name of registrant as specified in its charter)

KOMATSU LTD.
(Translation of registrant's name into English)

JAPAN
(Jurisdiction of incorporation or organization)

2-3-6 Akasaka, Minato-ku, Tokyo 107-8414, Japan
(Address of principal executive offices)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class -----	Name of each exchange on which registered -----
None	N/A

Securities registered or to be registered pursuant to Section 12(g) of the Act:

None

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act:

Common Stock

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report.

958,921,701

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the

Edgar Filing: KOMATSU LTD - Form 20-F

registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes , No

Indicate by check mark which financial statement item the registrant has elected to follow. Item 17 Item 18 .

In this document, KOMATSU LTD. is hereinafter referred to as the "Company," and together with its consolidated subsidiaries, as "Komatsu."

Cautionary Statement with respect to forward-looking statements:

This Annual Report contains forward-looking statements that reflect management's views and assumptions in the light of information currently available with respect to certain future events, including expected financial position, operating results and business strategies. These statements can be identified by the use of terms such as "will," "believes," "should," "projects," "plans," "expects" and similar terms and expressions that identify future events or expectations. Actual results may differ materially from those projected, and the events and results of such forward-looking assumptions cannot be assured. Any forward-looking statements speak only as of the date of this Annual Report, and the Company assumes no duty to update such statements.

Factors that may cause actual results to differ materially from those predicted by such forward-looking statements include, but are not limited to, unanticipated changes in demand

2

for Komatsu's principal products, owing to changes in the economic conditions in Komatsu's principal markets; changes in exchange rates or the impact of increased competition; unanticipated costs or delays encountered in achieving Komatsu's objectives with respect to globalized product sourcing and new Information Technology tools; uncertainties as to the results of Komatsu's research and development efforts and its ability to access and protect certain intellectual property rights; and the impact of regulatory changes and accounting principles and practices.

D. Risk factors

Komatsu believes that, as an independent business entity, it has a management strategy and the resources to win against the competition within a foreseeable period based on available information. The market conditions for Komatsu's individual businesses differ by region and change widely depending upon economic and competitive conditions. The profitability of Komatsu's global construction and mining equipment business, as its core operation, is affected primarily by the following factors:

- . Further intensification of competition in the Japanese market, where demand has declined considerably since 1997.
- . Further reduction in demand in the North American market brought about by greater-than-expected economic deceleration.
- . A considerable decline in demand in the European market, owing to economic slowdown.
- . A delay in the recovery of demand for mining equipment.
- . Significant increases in R&D expenses for construction and mining equipment in order to meet more stringent environmental protection regulations.
- . Greater-than-expected fluctuation in foreign exchange rates (especially vis-a-vis the U.S. dollar and the Euro).

With regard to the electronics business, Komatsu expects no financial burden resulting from sizable investments for the time being. However, Komatsu considers that the following factors could affect profitability: sharp changes in the semiconductor market and declining sales prices due to unbalanced supply and demand, along with intensified competition.

Although the profitability of other businesses is also affected by changes in their respective markets, this is not expected to have a significant impact on Komatsu's overall performance.

Item 4. Information on the Company

A. History and development of the Company

The Company is a corporation (kabushiki kaisha) under the laws of Japan. Its registered office is located at 2-3-6 Akasaka, Minato-ku, Tokyo 107-8414, Japan, and its telephone number is +81-3-5561-2687 (Corporate Communications

Edgar Filing: KOMATSU LTD - Form 20-F

Department).

The Company was incorporated in 1921 under the laws of Japan. Shortly after its formation, the Company commenced the production and marketing of sheet-forming presses and, in the 1940's, the Company began producing and marketing bulldozers.

The following are important events in the development of Komatsu's business during recent years.

5

In December 1998, the Company completed a take-over bid for Komatsu Zenoah Co. ("Komatsu Zenoah") on the Japanese stock market by successfully increasing its equity share from 30.4% to 51.7%, giving it the status of a subsidiary.

In April 1999, Komatsu MEC Corp., a wholly-owned subsidiary of the Company and an unlisted manufacturer of wheel loaders and other construction machines, and Komatsu EST Corp., a majority-owned manufacturer of motor graders, were merged with the Company.

In April 2000, Komatsu transferred 65% of the outstanding shares of Komatsu Soft Ltd. to Toyo Information Systems.

In June 2000, Komatsu Ltd. acquired the shares of Komatsu Forklift Co., Ltd. ("Komatsu Forklift"), and converted Komatsu Forklift into its subsidiary.

In October 2000, Komatsu sold its equity holdings in Komatsu Construction Co., Ltd. ("Komatsu Construction"), with 69.15% of the shares of common stock outstanding, to TAKAMATSU CORPORATION.

Principal capital expenditures

Komatsu's capital expenditures in the fiscal years ended March 31, 1999, 2000, and 2001, were (Yen)114,874 million, (Yen)57,728 million, and (Yen)79,310 million, respectively.

Capital expenditures in fiscal year ended March 31, 2001 ("fiscal 2001") increased 37.4% over the previous year, primarily because of the conversion of Komatsu Forklift to a consolidated subsidiary, and the capital expenditures made for rental equipment to meet growing demand.

B. Business Overview

Komatsu is a worldwide, integrated manufacturing and sales organization engaged in the manufacture, development, marketing and sale of industrial equipment and products. For fiscal 2001, Komatsu recorded worldwide net sales of (Yen)1,096,369 million (US\$8,701 million) and a net income of (Yen)6,913 million (US\$55 million).

For the purposes of this report, Komatsu's business activities are divided into three categories: construction and mining equipment, electronics, and other operations.

6

Construction and Mining Equipment Segment

The construction and mining equipment segment is Komatsu's largest

Edgar Filing: KOMATSU LTD - Form 20-F

operating segment. Net sales of construction and mining equipment totaled (Yen)718,147 million (US\$5,700 million) for fiscal 2001, a 3.9% decrease from the previous year, and represented 65.5% of Komatsu's total net sales.

While sales to customers in Japan increased 4.7% to (Yen)305,593 million (US\$2,425 million), sales to customers outside Japan decreased by 9.5% to (Yen)412,554 million (US\$3,274 million) in fiscal 2001. Sales to customers in Japan represented 42.6% of total sales of construction and mining equipment, up 3.6% from the previous year, while the proportion of sales to customers outside Japan decreased by 3.6% to 57.4% of total sales of construction and mining equipment.

Komatsu has been working to achieve new growth in the mainstay business of construction and mining equipment under the "G" to the 21st strategy launched in April 2000. There are concerns about the decline in demand within the important U.S. market, the continued decrease of Japanese demand, and the delayed recovery of the Southeast Asian market. However, Komatsu has the advantages of global networks of sales, service and production, brand strength based on quality and reliability, and in-house production of engines, transmissions and other key components. By adding IT applications to these advantages, Komatsu has been doubling efforts to improve earnings by expanding its business domain to include businesses spanning the lifecycle of construction and mining equipment.

Komatsu's line of construction and mining equipment includes hydraulic excavators, backhoe loaders, wheel loaders, skid steer loaders, bulldozers, motor graders, vibratory rollers, dump trucks, crawler carriers, shield machines, tunnel-boring machines, small-diameter pipe jacking machines, mobile debris crushers, mobile soil stabilizers, mobile tub grinders, rough-terrain cranes, reach tower cranes, railroad maintenance equipment, diesel engines, diesel generator sets, hydraulic equipment, steel castings and iron castings. The construction and mining equipment product line also includes a variety of "utility" equipment - mini to small machines (e.g., mini hydraulic excavators, mini wheel loaders, backhoe loaders, skid steer loaders, and other similar products) for landscaping and general construction.

In 1993, Komatsu formed a joint venture company in each of Japan and the United States with Cummins Engine Co., Inc. ("Cummins") to produce engines for use in construction equipment. Cummins also sells the engines produced by these joint venture companies to third parties as loose engines. In 1998 Komatsu and Cummins formed a third alliance, the 50/50 joint venture Industrial Power Alliance, Ltd., in order to perform research and development of industrial engines.

7

JAPAN. Japanese construction investments for the year under review declined from the previous year, reflecting reduced construction investment by the Japanese government and slowing private-sector housing investments. As a result, in this environment, total demand for construction equipment during the year decreased slightly. Demand for hydraulic excavators, the major product category in the Japanese market, was on a recovery track supported by strong demand from the rental equipment industry in the first half of the year. However, this trend turned down again in the second half of the year.

Komatsu teamed up with its distributors and affiliated rental companies across the country and worked to expand earnings by effectively using information networks for sales, rental and service. The Company concentrated its efforts on stepping up sales of major products, such as minimal rear-swing radius hydraulic excavators, large machines and equipment for environmental conservation, such as the mobile crusher/recycler series. The Company also focused on delivering value to customers by holding the Komatsu Management Strategy Seminar. Furthermore,

Edgar Filing: KOMATSU LTD - Form 20-F

through offices in key regions that replaced the previous nationwide branch network, the Company implemented locally-tailored sales strategies while working to expand support to distributors and affiliated rental companies.

With respect to production, Komatsu Zenoah Co. closed down its Tachikawa and Saitama plants and consolidated production at the Kawagoe Plant (formerly the Kawagoe Plant of Komatsu). While Japanese demand for construction equipment remained at about half the peak, Komatsu completed the restructuring program for Japanese production initiated in 1998, rebuilding the foundation to support the earnings of its construction equipment business in Japan.

Komatsu has consistently advocated recycling using the on-site recycling construction method for waste generated from construction since 1992, when it introduced its original mobile debris crusher/recycler BR60. In an effort to proliferate this method, the Company has expanded the series with mobile soil recycler/stabilizers and tub grinders to promote recycling of excavated soil after treatment and the reuse of chips ground from the stumps and roots of felled trees. Furthermore, to ensure the best possible operations for specific job sites, Komatsu has also introduced mobile screens, conveyers and other peripheral equipment for systems use. As a result, sales of this construction equipment series for environmental conservation continued to expand for the year under review.

The on-site recycling construction method not only reduces the amount of waste but also contributes to energy savings for transportation and to environmental conservation. For customers, it enables reductions of expenditures for waste disposal, new materials and transportation. As a result, they can reduce the total costs for construction projects.

8

The mobile crusher/recycler series features outstanding levels of crushing power, mobility and transportability, also helping the quarry industry to improve productivity onsite.

During the year, Komatsu launched e-KOMATSU Net, a B-to-B service for members of the Japanese construction industry. It offers a full range of services, including sales, rental of construction equipment, construction method support for different types of job site and tender information. In Japan, along with the recent reviews of public works, the Japanese Ministry of Land, Infrastructure and Transport is promoting the introduction of a new tender system and CALS/EC digitized construction. As a result, it is becoming urgent for construction equipment customers to efficiently respond to IT requirements and to reinforce their financial strength.

Against this backdrop, Komatsu formed a comprehensive joint service with Ricoh Co., Ltd., a leading Japanese manufacturer of office automation equipment. By sharing application services providing for vertical software and the contents of NetRICOH, a membership site, this service is designed to take advantage of both firms' respective strengths.

Also during the year under review, Komatsu launched a web site (www.anahori.com) dedicated to the sale of mini excavators, and a membership site (www.e-garapagos.com) for the real-time display of maps with transaction information to promote the recycling of crushed stones, wood chips and excavated soil after treatment. Komatsu will continue to develop original business models in order to expand its business domain by assertively supporting its customers' work.

THE AMERICAS. In North America, the major market for construction and mining equipment, new construction investments continued to grow in 2000. Although new housing starts in the private sector declined from the previous

Edgar Filing: KOMATSU LTD - Form 20-F

year, they nevertheless remained at a high level compared to the mid-'90s level. However, demand for construction equipment decreased for the second consecutive year, reflecting, in part, adjustments for expanded demand for rental equipment. In this environment, Komatsu America International Company focused its efforts on improving both production and sales. In production, the company accomplished a reduction of the lead-time between the receipt of orders and factory shipment to four weeks and one day, thus advancing its own inventory reduction and that of its distributors. In October 2000, the company opened a new parts depot in Las Vegas, to support distributors in the western U.S. region and improve customer service. With this facility, the company is now able to ensure better parts availability without increasing parts inventory on the part of distributors. Sales of the company declined from the previous year, adversely affected by slowed demand and inventory cutbacks on a short-term basis resulting from shortened lead-times. As a result of these efforts, however, Komatsu America International is better positioned to improve earnings in the future.

9

Komatsu is now able to offer "one-stop-shopping" to customers, which includes rental, parts, service and fleet management systems in addition to product variety. In 2001, Komatsu is planning aggressive new product launches worldwide in order to sharpen its market presence. In North America, following the introduction of three models of motor graders, Komatsu launched the D39PX/EX KOMSTAT small bulldozer, equipped with the Company's proprietary Hydro-Static Transmission (HST), and its original HM400 articulated dump truck, in May 2001.

Because the three-speed HST motor offers a choice of optimal speeds according to the type of work, the D39PX/EX achieves very high ground-leveling performance. In addition to its environment-friendly engine, which meets the Tier II standards of the United States, Europe and Japan, this small bulldozer features enhanced comfort, maintenance and reliability. North America is the world's largest bulldozer market, with our new bulldozer class accounting for about one-fourth of the current demand. North America and Europe are also major markets for articulated dump trucks. Komatsu is running sales expansion programs tailored by product, region and market segment to recover earnings.

In the mining equipment segment, the copper price improved, generating some signs of returning higher demand for large dump trucks. Nevertheless, the market fell short of a full-fledged recovery for demand, and Komatsu Mining Systems, Inc. continued to face difficulties. In this environment, the company promoted its "one-face" operation as the center of Komatsu's mining equipment business to meet the diverse needs of customers worldwide.

EUROPE. European demand for construction equipment continued to expand, registering a record-high level in 2000. Against this backdrop, Komatsu in Europe carried out aggressive marketing and promoted further reorganization and reinforcement of their distributors. As a result, they continued to expand sales on a local currency basis. Due to the drastic depreciation of the euro, however, Komatsu's European sales, after conversion to Japanese yen, resulted in a decline from the previous year. Komatsu UK Ltd., Komatsu Hanomag AG and Komatsu Utility Europe S.p.A. worked to secure earnings through further cost reductions, by expanding local procurement of parts and components and streamlining production. They also increased the product range being locally manufactured while expanding exports outside of the EU.

In April 2001, BAUMA2001, the world's largest construction equipment trade show, was held in Munich, Germany, with over 2,300 firms from 42 countries participating. During the seven days of the event, this 26th BAUMA show attracted over 390,000 visitors. Under the slogan Smart Solutions, the Komatsu Group displayed a total of 35 machines for different applications, such as road building, demolition, recycling, landscaping and mining. These included the

super-large,

10

renewed PC4000 hydraulic excavator that was introduced by Komatsu Mining Germany GmbH in June 2000. Komatsu emphasized not only the hardware but also a wide range of services designed to meet the diversified needs of customers as a solutions provider.

ASIA. In Southeast Asia, while demand for equipment began to improve, centering on the mining and forestry industries, overall demand did not fully recover. As a result, Komatsu's sales of construction and mining equipment remained at about the same level as the previous year.

PT Komatsu Indonesia Tbk focused on capitalizing on the rebounding demand in the mining and forestry industries. As part of its efforts, the company worked to reinforce product competitiveness in the forestry industry, including the introduction of the hydraulic excavator-based PC100F, equipped with locally-tailored attachments to the forestry industry. Also during the year, the company was certified for ISO 14001, meeting the international standards for environmental management systems at its assembly plant in June 2000.

In Thailand, Bangkok Komatsu Co., Ltd., which is engaged in production and sales of the PC200 hydraulic excavator, recorded cumulative production of 1,000 units in July 2000. Established in 1996 as the first plant for construction equipment in Thailand, Bangkok Komatsu started production and sales activities. However, the company faced a devastating drop in domestic demand resulting from the currency crisis in 1997. It quickly shifted to export-oriented production and has exported over 600 units to 27 countries in the four years since then.

Meanwhile, Komatsu made steady gains in sales in the infrastructure investment-driven Chinese market. In February 2001, Komatsu established Komatsu (China) Ltd. in Shanghai as a regional headquarters to coordinate operations in China with a promising market for growth. With this headquarters, Komatsu is now better positioned to more effectively use the functions of its production, sales and service foundations built over the years and quickly respond to customers' needs.

Utility Equipment. Demand for utility equipment continued to grow in the major markets of North America and Europe. In response to this growth, Komatsu Utility Europe, our European production base in Italy for utility equipment, expanded its production capacity, boosted exports outside of the EU by taking advantage of the depreciated euro, and implemented companywide quality improvement programs. As a result, the company made substantial gains in both sales and profits.

In the North American market, with total demand reaching over 100,000 units, or 45% of global demand, Komatsu Utility Corporation stepped up sales centering on backhoe loaders, mini

11

excavators and mini wheel loaders. The company also launched Komatsu-original crawler carriers that feature 360-degree turn capabilities for the upper structure, and tight-tail swing mini excavators. Komatsu supplies machines to the North American market from Komatsu Utility Europe, Komatsu Hanomag in Germany, the Awazu Plant and Komatsu Zenoah Co. in Japan. Anticipating further growth of the market, Komatsu has determined that it will be advantageous to engage in local production at a new plant in New Berry, South Carolina, as the third plant of Komatsu America International. The new plant is scheduled to

Edgar Filing: KOMATSU LTD - Form 20-F

commence production in 2002. With this addition, Komatsu will be well prepared to propel the utility equipment business.

Ground Engaging Tools (GET) Business In the "G" to the 21st strategy, Komatsu is readdressing its attention to the parts and service area, and reinforcing its construction and mining equipment business, which is a key earnings generator.

In December 2000, Komatsu acquired Hensley Industries, Inc., a leading manufacturer of buckets, teeth, edges and other products for construction and mining equipment in the international GET market. In the construction and mining equipment market, the percentage of hydraulic excavators, wheel loaders and other types of machines that use buckets is growing. With Hensley Industries in the Komatsu Group, Komatsu is ready to widen its parts lineup and supply price-competitive parts, particularly in North America.

Electronics Segment

The core business of Komatsu's electronics segment consists of its semiconductor materials operations, which includes the production of silicon wafers for the semiconductor industry; polycrystalline silicon, the raw material used in the production of silicon wafers; and silane gas, which is used in the manufacture of polycrystalline silicon. The electronics segment also produces LCD manufacturing equipment, excimer lasers and various electronic equipment and devices. Komatsu's electronics segment accounted for (Yen)117,745 million (US\$934 million), or 10.7%, of total net sales for fiscal 2001, representing a 30.3% increase in these sales over the prior fiscal year. Sales in Japan rose 19.1% to (Yen)74,455 million (US\$591 million) while sales outside Japan climbed 55.7% to 43,290 million (US\$344 million).

Silicon Wafers The semiconductor industry enjoyed worldwide growth in demand, driven by IT products such as PC's and mobile phones, and major players made large-scale investments in equipment. However, manufacturers of IT products implemented production adjustments due to the effects of the slowing U.S. economy, and the semiconductor market downturned in 2001.

Although the silicon wafer industry experienced a decline in demand resulting from the slack semiconductor market at the beginning of 2001, it closed the year with a record sales volume,

12

centering on 200mm wafers, on the back of the burgeoning semiconductor industry in 2000. Komatsu Electronic Metals Co., Ltd. worked to improve the quality and technology development of 200mm silicon wafers in both Japan and Taiwan, while undertaking aggressive sales operations in Japan and overseas. The company also accelerated the pace of structural reform, including reinforcement of its discrete wafer business, and strove to reduce total costs and expand sales in order to improve cost competitiveness and ensure profits.

As a result, the company increased sales by 23.0% over the previous year to (Yen)78,525 million (US\$623 million) for the year ended March 31, 2001. With respect to earnings, the company posted ordinary profits of (Yen)3,478 million (US\$28 million) supported by improved production efficiency, higher yields, reduced material costs and other variable expenses in addition to expanded sales, which offset a loss associated with the startup of Formosa Komatsu Silicon Corporation, a joint venture operation with a local partner in Taiwan. To solidify their market position in Taiwan, both Komatsu Electronic Metals and Formosa Komatsu Silicon completed facilities expansions to accommodate mass production and worked to expand sales.

Edgar Filing: KOMATSU LTD - Form 20-F

Polycrystalline Silicon Near-capacity production of the silicon wafer industry from the middle to the end of 2000 expanded demand for polycrystalline silicon, increasing worldwide sales to the semiconductor industry by 16% for 2000. Worldwide sales of monosilane gas also made a significant gain of almost 30% for 2000, supported by brisk demand from the semiconductor and LCD (liquid crystal display) industries.

Advanced Silicon Materials LLC. expanded sales over the previous year by focusing on unique monosilane gas-based products against the backdrop of market growth, while also expanding its shares of both the polycrystalline silicon and monosilane gas markets. However, the company continued to experience difficulties in terms of earnings due to such factors as the expanded amortization of the Butte Plant as it entered a full-scale production phase.

Electronic Equipment and Devices Demand for micromodules, for use in the temperature control of semiconductor lasers as the light source and laser diodes for optical amplification, continued to expand on the back of global telecommunications network infrastructure development, especially in the United States. The Wavelength Division Multiplexing (WDM) method for massive data transmission volume also called for the use of such modules. Capitalizing on this growth, Komatsu Electronics, Inc. registered a significant gain in sales over the previous year.

Komatsu Electronics' thermoelectric modules, which reflect the accumulated technological expertise of its joint R&D activities with Komatsu over the years, deliver high performance and reliability. The company enjoys the world's top market share for micromodules for use in fiber-optic

13

communication networks. To meet the rapid growth in demand more flexibly, the company expanded production capacity with new facilities and reached an alliance agreement for the production of micromodules with Ferrotec Corporation, a competitive manufacturer of thermoelectric modules. In May 2001, Hangzhou Dahe Precise Parts Co., Ltd., Ferrotec's subsidiary in China, embarked on part of the consigned assembly of thermoelectric modules of Komatsu Electronics.

Ferrotec has overwhelming shares of the global markets for magnetic fluid seals for computer hard-disk drives and semiconductor manufacturing equipment. Ferrotec is also aggressively pursuing sales of general-purpose thermoelectric modules for ordinary temperature control use.

Through this alliance, Komatsu is prepared to further expand the thermoelectric module business. Because the modules have large potential in a wide range of applications, Ferrotec and Komatsu are considering a joint development project to produce thermoelectric modules for power generation.

Excimer Lasers In August 2000, the Company and USHIO INC., a top manufacturer of industrial lamps, jointly established GIGAPHOTON INC., an affiliated company accounted for by the equity method, for Excimer lasers used in lithography tools for semiconductor manufacturing. The joint venture engages in the overall Excimer laser business, from R&D and production to sales and service. GIGAPHOTON is strategically positioned to integrate the competitive advantages of the twoparent companies: USHIO's credibility and track record in the semiconductor industry along with its strong sales and service networks in Japan and abroad, as well as the Company's leading-edge technologies and state-of-the-art Excimer laser production system.

For its first fiscal year, ended March 31, 2001, GIGAPHOTON capitalized on brisk

Edgar Filing: KOMATSU LTD - Form 20-F

market conditions driven by aggressive facilities investment among semiconductor manufacturers, and recorded higher shipments than the market growth average, with more sales than initially planned. In addition to the delivery of many G20K models of the KrF (Krypton Fluorine) Excimer laser, for 180nm use, to additional lines of semiconductor manufacturers, the launching of full-scale shipments of the G21K model, with improved optical performance for 130nm use, greatly contributed to a good start. The company also significantly reduced startup costs, achieving a considerable improvement in earnings compared with initial forecasts. This joint venture has particularly reinforced development and sales operations. Some promising outcomes have already emerged in the development of new products, such as ArF (Argon Fluorine) and F2 Excimer lasers, as well as in global business operations.

14

Other Operations Segment

This segment includes a variety of other activities conducted within Komatsu, consisting primarily of the manufacture and sale of a wide range of products and services, including metal forging and stamping presses, machine tools, sheet-metal machines, industrial robots, ammunition, logistics, computer software, diesel engines, metal casting, hydraulic equipment, armored vehicles, compressors and diesel generators. Komatsu engages in the design of manufacturing and distribution logistics solutions as well as the production of business systems and software packages through separate subsidiaries and affiliates.

Sales from other operations increased 19.7% over the previous year to (Yen)260,477 million (US\$2,067 million). Of this total, sales in Japan increased 3.7% to (Yen)206,817 million (US\$1,641 million), while sales outside of Japan climbed 195.1% to (Yen)53,660 million (US\$426 million). During the year under review, Komatsu sold its equity shares in Komatsu Construction and excluded it from consolidation during the second half. Meanwhile, the Company increased its equity holdings in Komatsu Forklift and converted it in to a subsidiary during the year, which also contributed to an increase in sales. The Company also sold its equity shares in Komatsu Soft Ltd. to Toyo Information Systems Co., Ltd. (currently, TIS Inc.). As a result, Komatsu Soft became a company accounted for by the equity method, from a consolidated subsidiary.

Industrial Machinery Business Komatsu Industries Corporation, in charge of sheet metal forming machinery and small and medium-sized presses, has implemented an extensive restructuring program since July 1999. In fiscal 2001, the company worked to expand sales and improve earnings, posting profits for the year as initially planned. During the year, in addition to the major line of CBS presses, the company stepped up sales of strategic products such as the E2W series of solid frame presses and the TFP series of twister fine plasma-cutting machines. The company has further reinforced its sales alliance with TRUMPF GmbH + Co. KG of Germany, effective since 1995, and expanded sales of TRUMPF's laser-cutting machines and punching presses in Japan, while also embarking on the supply of its PAS series of AC servomotor-driven press brake models to the German partner for European and U.S. sales.

In the large press business, sales of the WS-3TR series standard transfer presses to manufacturers of automotive body components remained robust, and the engineering business, including sales to major foreign automobile manufacturers for retrofitting of equipment, also contributed to improved sales.

During the year, Komatsu, Hitachi Zosen Corporation and Hitachi Zosen Fukui Co. agreed to begin joint sourcing of materials and parts for large and medium-sized presses in order to further reduce procurement costs. In the press-building

Edgar Filing: KOMATSU LTD - Form 20-F

industry in the United States and Europe, competition is intensifying. In addition, European press builders are becoming increasingly competitive due to the depreciated euro. In this environment, the companies have embarked on joint sourcing in order to

15

enhance their competitiveness.

Environmental Business Under the "G" to the 21st mid-range management strategy, Komatsu is working to expand its environmental business. Komatsu believes that the delivery of solutions through its technologies and systems to environmental problems faced by customers should lead to lucrative business opportunities.

As part of its commitment to the environmental business, Komatsu has delivered construction equipment expressly designed for environmental conservation, such as the mobile crusher/recycler series, and innovative technologies as represented by the on-site recycling method.

In addition, Komatsu has also been working to deliver recycling facilities by converging Komatsu's integrated engineering expertise, in order to promote more efficient reuse of growing construction waste. During the year under review, Komatsu developed a new business domain by delivering three recycling plants in Japan, including a comprehensive recycling plant for construction waste. Komatsu is determined to foster the growth of such recycling plants into a major business for the Company, thereby making contributions to the development of a recycling-oriented society.

Komatsu Forklift Komatsu Forklift posted sales of (Yen)104,649 million (US\$831 million) for fiscal year ended March 31, 2001, registering an increase of 18.5% over the previous year. In Japan, the company reorganized its domestic dealership and reinforced its sales force. It also implemented aggressive sales activities, including launches of the small engine-powered LEO Plus series and revamped models of the battery-powered reach-type AR series. As a result, the company expanded Japanese sales during the year.

Outside of Japan, the company also boosted sales of forklift trucks in the three key regions of the United States, Europe and Asia. In the United States, the company continued to strengthen its dealer networks, undertook aggressive sales to such large-scale customers as rental companies, and expanded its market share.

To strengthen the competitiveness of its forklift truck business, the Company and Komatsu Forklift have been forging an alliance with Linde of Germany in production and sales. As part of this arrangement, Komatsu Forklift embarked on Japanese sales of 33 models of Linde's forklift trucks in October 2000. Fiat OM Carrelli Elevatori S.p.A., an Italian subsidiary of Linde, launched production and sales of Komatsu Forklift's models in Europe. Future plans call for joint production with Linde in China, and supplying products made by Komatsu Forklift Inc. to Linde in the U.S. market on an OEM basis.

Komatsu Zenoah Komatsu Zenoah expanded sales of outdoor power equipment over the previous year. In Japan, where total demand remained sluggish, the company increased sales of its main product line by introducing new products, such as the world's lightest brushcutters, the BC200 series. During the year under review, the company continued to expand exports to the United States

16

Edgar Filing: KOMATSU LTD - Form 20-F

and Europe. In addition to selling a wider range of products equipped with environment-friendly strato-charged engines, the company boosted sales of popular hobby engines. Radio-controlled model cars powered by the new G230RC engine introduced in February 2001 have scored sweeping victories in major hobby car races since March 2001, including the International Friendship Race in Germany, the European Championships in Spain and the Australian Championships, demonstrating the high performance, quality and reliability of Komatsu Zenoah engines.

Komatsu Construction In October 2000, Komatsu sold its equity holdings in Komatsu Construction, with 69.15% of the shares of common stock outstanding, to TAKAMATSU CORPORATION. This action represents Komatsu's basic strategy of enhancing corporate value by concentrating management resources on the businesses where the Company can demonstrate a competitive advantage in the relevant technology or industry. Given such a consideration, Komatsu chose to entrust the management of Komatsu Construction to TAKAMATSU, which has original business strategies and a solid track record.

Net Sales Information

Financial information (other than net sales figures by geographic segment) is produced and discussed in this report as presented in Komatsu's audited consolidated financial statements. Net sales figures by geographic region presented and discussed herein reflect sales of Komatsu's products according to the geographic location of purchasers, rather than the geographic location of the Komatsu entity generating such sales. Net sales data by the geographic location of the Komatsu entity generating the sale is set forth in Note 20 to Komatsu's audited consolidated financial statements, included elsewhere in this report. Operating income by business segment is presented before corporate overhead and inter-segment eliminations.

The following table sets forth Komatsu's net sales by category of activity for the years ended March 31, 2001, 2000, and 1999, respectively:

Net Sales by Category of Activity

	Fiscal Year Ended 3/31/2001		Fiscal Year Ended 3/31/2000		Fiscal Year Ended 3/31/1999	
	(Millions of Yen)					
Construction and Mining Equipment	(Yen) 718,147	65.5%	(Yen) 747,647	70.8%	(Yen) 765,802	72.1%
Electronics	117,745	10.7%	90,335	8.6%	86,608	8.2%

Edgar Filing: KOMATSU LTD - Form 20-F

Other	260,477	23.8%	217,672	20.6%	209,187
Total	(Yen)1,096,369	100.0%	(Yen)1,055,654	100.0%	(Yen)1,061,597

The following table sets forth Komatsu's net sales by geographic markets for the years ended March 31, 2001, 2000, and 1999, respectively:

Net Sales by Geographic Markets

	Fiscal Year Ended 3/31/2001		Fiscal Year Ended 3/31/2000		
	(Millions of Yen)				
Japan	(Yen)586,865	53.5%	(Yen)553,822	52.5%	(Yen)52
Americas	241,091	22.0%	242,609	23.0%	27

Total	(Yen)1,096,369	100.0%	(Yen)1,055,654	100.0%	(Yen)1,06

Sales and Distribution

Komatsu's domestic and international sales and distribution functions in its construction and mining equipment segment, its principal and largest business segment, are conducted primarily through a network of subsidiaries, affiliates and independent distributors, and to a lesser extent by joint venture partners. While Komatsu's construction and mining equipment sales and distribution operations in Japan focus principally on retail sales to customers, Komatsu uses its extensive Japanese sales distributor network to offer rental programs to its customers, especially within its construction and utility equipment businesses.

Domestic Market:

Komatsu used to sell construction and mining equipment throughout Japan with its direct sales system. Komatsu has, however, shifted away from a direct sales system to an indirect system of authorized distributors. At the beginning of fiscal year 1999, Komatsu established a sales

Edgar Filing: KOMATSU LTD - Form 20-F

network of authorized distributors for its construction and mining equipment throughout Japan, and substantially all of Komatsu's sales are now made by such distributors. Distributors perform comprehensive sales and service functions mainly at each prefecture. Five of the 43 companies that compose Komatsu's authorized distributor network in Japan are independent companies, 19 are affiliates of the Company and 19 are consolidated subsidiaries of the Company.

In response to strong rental needs from customers, Komatsu has also committed to enhancing customer satisfaction through rental companies of distributors and dealers as part of the Komatsu Group.

The Komatsu service network covers 500,000 units of equipment sold in Japan. One hundred and thirty five distributors and dealers form the core of a service network that provides total customer-support service involving before-and after-sales service.

Overseas Markets:

Komatsu's construction and mining equipment are sold worldwide in approximately 160 countries. Komatsu believes that the global marketing and sales of its products are important to its continued growth.

Komatsu's overseas sales of construction and mining equipment are made through a sales and service network consisting of approximately 200 distributors. The distributors are supplied through trading companies and the Company's subsidiaries and affiliated companies, supported by Komatsu's liaison offices in major cities around the world. The subsidiaries and affiliated companies are located in Australia, Belgium, Brazil, Chile, France, the Federal Republic of Germany, Hong Kong, India, Indonesia, Italy, Mexico, Norway, Poland, the Republic of China, the Republic of South Africa, Russian Federation, Singapore, Spain, Thailand, United Arab Emirates, United Kingdom, the United States of America, and Vietnam. The subsidiaries and affiliated companies provide additional inventory and technical assistance to the distributors while facilitating the delivery of emergency spare parts.

Komatsu launched the SMAP network system in 1998, directly linking distributors and plants in Japan with product quality information. In 1999, Komatsu launched a system known as G-SMAP globally. With this network system, Komatsu is able to promptly transmit information on its construction and mining equipment to distributors and production bases around the world. All such information is simultaneously stored in the main database of G-SMAP and it is available to all users of the network, including distributors. Komatsu's development, production, sales and service personnel around the world can utilize the G-SMAP system to reduce the time needed for troubleshooting, to keep abreast of quality issues, and incorporate relevant information in new

19

product development. In this way, G-SMAP improves product quality and helps customers reduce costs. In addition, G-SMAP is designed to improve total customer support through processing, using and mutually sharing all information concerning sales, service and parts supply.

Patents and Licenses

Komatsu owns a substantial number of patents and utility model registrations, as well as applications for patents and utility model

Edgar Filing: KOMATSU LTD - Form 20-F

registrations, in Japan. It also owns a substantial number of patents and applications for patents in other countries where its products are marketed.

Moreover, Komatsu manufactures a variety of products under licensing agreements with other companies.

While Komatsu considers its patents and licenses, collectively, to be important for the operation of its business, it does not consider any one of its patents or licenses or any related group of them to be so important that its expiration or termination would materially affect the Company's business as a whole, nor does it believe that any category of its activities is materially dependent upon patents or upon licenses, or patent or license protection. Komatsu also owns and maintains a substantial number of trademarks and trade names that are registered or otherwise protected under the laws of various jurisdictions.

Competition

Substantially all of the products manufactured by Komatsu face highly competitive conditions both in domestic and overseas markets. Competitors include a large number of companies in and outside Japan, which vary in size, area of distribution and range of products. To address such intense competition, Komatsu places great emphasis on the high quality and performance of its products and related services.

While industry sales statistics for many of Komatsu's products are not available, either for Japan alone or on a worldwide basis, Komatsu believes that on the basis of both sales and production it is the largest manufacturer of construction and mining equipment in Japan and the second largest in the world after Caterpillar Inc., a United States corporation. Further, Komatsu believes that it is the largest manufacturer of large-sized presses in Japan.

Regulation

20

Komatsu's business segments are subject to various regulations throughout the world, which include restrictions on noise and emissions from construction and mining equipment, as well as various environmental controls regulating the manufacturing processes. Komatsu's operations and products are designed to comply with all applicable environmental regulations currently in effect for the relevant jurisdictions.

Komatsu believes that it remains in substantial compliance with existing applicable environmental control regulations and does not expect that the cost of complying with foreseeable requirements will have a material effect upon its financial position and the results of the operations. In 1992, Komatsu issued the Earth Environment Charter, a comprehensive corporate policy statement representing Komatsu's commitment to comply with all applicable regulations and industry standards for the protection of the environment. Komatsu annually reviews its compliance with the applicable environmental regulations that govern its operations.

Sources of Supply

The construction equipment and industrial machinery produced by Komatsu are

Edgar Filing: KOMATSU LTD - Form 20-F

composed of various types of parts and as it is not necessarily efficient in production to manufacture all of such component parts inside the Company, the Company only produces the major components internally and purchases other parts such as electrical components, tires, hoses, and batteries, etc. from the manufactures who specialize in manufacturing these, and the Company procures the rest of the parts from the Company's business partners materials such as metal forgings, machine components, sheet metal parts and various accessories.

C. Organizational Structure

The following list shows the principal subsidiaries:

Name of Company	Country of Incorporation	Ownership (%)
Komatsu Electronic Metals Co., Ltd.	Japan	63.4
Komatsu Forklift	Japan	51.9
Komatsu Zenoah Co.	Japan	55.3
Komatsu Castex Ltd.	Japan	100.0
Komatsu House, Ltd	Japan	88.5
Komatsu Logistics Corp.	Japan	96.9
Komatsu Industries Corporation	Japan	100.0

Komatsu (Changzhou) Construction Machinery Corp.	Republic of China	85.0

D. Property, Plants and Equipments

Edgar Filing: KOMATSU LTD - Form 20-F

Komatsu's manufacturing operations are conducted in 30 principal plants, 12 of which are located in Japan. As of March 31, 2001, the 30 plants had an aggregate manufacturing floor space of 1,485 thousand square meters (15,985 thousand square feet). In addition, Komatsu uses additional floor space at such plants and elsewhere for laboratories, office buildings, and employee housing and welfare facilities. Komatsu's plants are currently operating regularly, on a year-round basis, based upon at least one full shift per plant. Komatsu could increase its production by, among other

22

methods, requesting that its employees work overtime or by increasing the number of shifts working at its plants.

Almost all of Komatsu's manufacturing facilities and the land on which they are located are owned by Komatsu. A portion of the property owned by Komatsu is subject to mortgages or other types of liens which have been established on separate items of property. At March 31, 2001, the net book value of the property owned by Komatsu was (Yen)438,795 million, of which (Yen)32,879 million was subject to encumbrances.

The name and location of Komatsu's principal plants, their approximate aggregate floor space, and the principal products manufactured therein as of March 31, 2001, are as follows:

Name and Location	Floor Space		Principal product
	Square meter	thousand sq ft	
In Japan Awazu Plant Komatsu	245,000	2,637	Small and medium-sized bulldozers Small hydraulic excavators (under 4 tons) Rearswing radius hydraulic excavators Mini hydraulic excavators, Mini loaders (under 4 tons), Small and medium wheel loaders, Crawler carriers, Tractors, Pallet trucks, Forklifts, Converters, Armored vehicles, A
Komatsu Plant Komatsu	40,000	431	Large presses, Underground machinery
Osaka Plant Hirakata	138,000	1,485	Large bulldozers (20 tons and over), Large wheel loaders and large hydraulic excavators Mobile crushers, Mobile soil-improvement machines, grinders
Oyama Plant Oyama	193,000	2,078	Engines for construction machinery, Trucks, Buses, Dump trucks, vehicles, Diesel generators, Marine engines, Rolling stock engines, Low-pollution engines, Hydraulic equipment
Mooka Plant Mooka	65,000	700	Rough-terrain cranes, Dump trucks, Wheel loaders, Motor graders, Road construction machinery, Towing tractors
Komatsu Castex Ltd. Himi	57,000	614	Steel casting, Iron castings, P

Edgar Filing: KOMATSU LTD - Form 20-F

Komatsu Zenoah Co. Kawagoe and Koriyama	44,200	476	Mini-sized hydraulic excavators, loaders, Mini-sized agricultural equipment, General purpose engine equipment
Komatsu Forklift Co., Ltd. Oyama	47,750	514	Lift trucks, Automated conveyors, Automated warehouses, Refrigerated Freezer warehouses
Komatsu Electronic Metals Co., Ltd. Nagasaki and Miyazaki	57,000	613	High-purity silicon wafers
Komatsu Electronics, Inc. Hiratsuka	1,000	11	Thermoelectric modules, Temperature equipment

Overseas

23

Komatsu America International Company Tennessee, USA and Quebec, Canada	38,010	409	Hydraulic excavators, Wheel graders, Cranes
Komatsu Mining Systems, Inc. Illinois, USA	78,000	840	Large wheel loaders, Large wheel graders
Hensley Industries, Inc. Texas, USA	20,000	215	Buckets, Teeth, Adapter buckets
Komatsu Mexicana S.A. de C.V. Sahagun, Mexico	22,000	237	Small-sized presses, Attachments, equipment, and others
Komatsu do Brasil Ltda. Suzano, Sao Paulo, Brasil	57,000	614	Hydraulic excavators, Wheel loaders, Motor graders
Advanced Silicon Materials LLC. Washington and Montana, USA	62,927	678	Polycrystalline silicon wafers
Komatsu UK Ltd. Birtley, UK	60,000	646	Hydraulic excavators
Komatsu Hanomag AG Hannover, Germany	62,335	671	Wheel loaders, Compactors, Motor graders
Komatsu Utility Europe S.p.A. Este, Italy	34,000	366	Mini and small hydraulic excavators, loaders, Skidsteer loaders
Komatsu Mining Germany GmbH Dusseldorf, Germany	23,269	250	Super-large hydraulic excavators
P.T. Komatsu Indonesia Tbk Jakarta, Indonesia	45,546	490	Hydraulic excavators, Wheel graders, Motor graders, Dump trucks
Komatsu (Changzhou) Construction Machinery Corporation Jiangsu, China	14,300	154	Wheel loaders, Motor graders
Komatsu (Changzhou) Foundry Corporation Jiangsu, China	16,000	172	Iron castings and parts, Motor graders and industrial vehicles

Edgar Filing: KOMATSU LTD - Form 20-F

Bangkok Komatsu Co. Ltd. Chonburi, Thailand	13,464	145	Hydraulic excavators
Formosa Komatsu Silicon Corporation Mailiao, Yunlin, Taiwan	12,080	130	Silicon wafers

The head office of the Company is located in a ten-story office building in Tokyo, which is leased from Komatsu Building Co., Ltd., a 100%-owned consolidated subsidiary of the Company.

Item 5. Operating and Financial Review and Prospects

A. Operating results

Overview

The statements contained in this Overview section are based on management's current expectations. With the exception of the historical information contained herein, the statements

24

presented in this Overview section are forward-looking statements involving numerous risks and uncertainties that could significantly affect expected results. Actual results may differ materially.

Construction and Mining Equipment. In the recent past, the highest priority for Komatsu's Japanese construction equipment business has been to restructure the production system. The Company launched measures for this purpose in the fall of 1998, and completed all the plans for the subject fiscal year on schedule. The entire restructuring program was completed in August 2000 with the consolidation of the Tachikawa and Saitama plants of Komatsu Zenoah Co. to Kawagoe.

Komatsu's construction and mining equipment business already enjoys the advantage of our global networks for sales, service and production; brand power and predominant use of our equipment; and in-house production of key components. By adding IT to these advantages, Komatsu will facilitate growth in this business. The Company has defined the following four directions as the hub of the growth strategy:

(1) Globalization

Komatsu astutely anticipated the globalization of markets and appropriately established the sales, service and production bases. Komatsu will now press ahead with the creation of customer-driven organizations to enhance the market presence through finely-tuned marketing strategies. At the same time, by reinforcing and tailoring our marketing and globalizing R&D, Komatsu will enhance its globalization strongly with original features.

(2) Full-line offering

Komatsu is ready to consider and implement aggressive investments in high-growth products and business areas, including strategic alliances to complement its products and expertise.

(3) Environmental business

Komatsu is convinced of the vast business potential afforded by environmental

Edgar Filing: KOMATSU LTD - Form 20-F

protection for the construction and mining equipment business, and it is confident of future success in this area.

(4) Solutions to different stages of the product life cycle of construction and mining equipment

Komatsu will take active steps to expand the solutions-centered business in the areas of after-sales, ranging from lease and rental, parts and service, and sales of used equipment to logistics, and non-life insurance, all of which will expand sales and profits. In these after-sales markets, Komatsu

25

is confident of differentiating its products and technologies, notably through the use of IT. Komatsu also believes IT will have a major positive impact on changing the way of doing business and the business models.

Electronics. Operating profit from the electronics segment improved to (Yen)2,887 million (US\$23 million) in fiscal 2001 from a loss of (Yen)9,839 million (US\$96 million) in fiscal 2000.

Komatsu Electronic Metals Co., Ltd., having successfully concentrated production in Japan and Taiwan, is working to differentiate its technologies and business to gain the top global market position for 200mm wafers in terms of quality, cost and delivery.

Komatsu Silicon America, Inc. is operating the sales and service activities but its production facilities are currently inoperative.

Sales of polycrystalline silicon by Advanced Silicon Materials LLC. expanded over the previous year because of the strong demand in the silicon wafer market. Sales of monosilane gas also increased significantly, supported by brisk demand from the semiconductor and LCD industries. However, the company continued to experience difficulties in terms of earnings, due to such factors as the expanded amortization of the Butte Plant as it entered a full-scale production phase.

Management believes the Excimer laser business will be further strengthened in the global market by capitalizing upon an alliance with Ushio Inc. In thermoelectric modules and other products with established technological superiority, the Company is reinforcing its business bases with the goal of achieving substantial gains in both sales and profits. Committed to securing a reputation for total reliability, the Company is making strong efforts to support its customers in improving their quality, cost and delivery, as well as productivity, through the constant innovation of technology.

Others. In fiscal 2001, Komatsu sold its equity shares in Komatsu Construction and excluded it from consolidation during the second half. Meanwhile, the Company increased its equity holdings in Komatsu Forklift and converted it into a subsidiary during the year. The Company also sold its equity shares in Komatsu Soft Ltd. to Toyo Information Systems Co., Ltd. (currently, TIS Inc.). As a result, Komatsu Soft became a company accounted for by the equity method, from a consolidated subsidiary.

Komatsu's industrial machinery business comprises large presses for the automobile industry, sheet metal forming machines, small and medium-sized presses and machine tools.

26

Edgar Filing: KOMATSU LTD - Form 20-F

Foreign Exchange Rate Fluctuations. Sales to customers located outside Japan represented approximately 47% and 48% of Komatsu's net revenues in fiscal 2001 and fiscal 2000, respectively. A significant proportion of Komatsu's international sales has been denominated in United States dollars. An appreciation in the value of the yen against the US dollar could generally have an adverse effect on Komatsu's operations although Komatsu has reduced its exposure to changes in the exchange rate between the yen and the US dollar by increasing the local content of its products manufactured in the United States and elsewhere outside Japan. To further reduce foreign exchange risks, Komatsu executes forward exchange contracts as described in Item 11 below. The devaluation of the yen against the US dollar generally results in an increase for Komatsu's operating profit.

Results of Operations

Comparison of Fiscal 2001 with Fiscal 2000

Net Sales

Net sales in the fiscal year ended March 31, 2001 increased 3.9% over the previous fiscal year to (Yen)1,096,369 million (US\$8,701 million at US\$1=(Yen)126). Sales in Japan advanced 6.0% to (Yen)586,865 million (US\$4,658 million), while overseas sales rose 1.5% to (Yen)509,504 million (US\$4,043 million). As a result, the ratio of overseas sales to consolidated net sales for the year dipped from 47.5% in the previous fiscal year to 46.5%.

Domestic sales of construction and mining equipment were up from the previous fiscal year, owing primarily to efforts of IT use and the expansion of sales of machines for environment conservation, although the demand declined slightly. In the overseas market, while European economies remained strong in general, the United States economy, which had maintained a record-high length of buoyancy, began to slow down. The overall recovery pace of Asian economies slowed down. As a result, global sales of construction and mining equipment slid 3.9% from the previous fiscal year to (Yen)718,147 million (US\$5,700 million).

In the electronics business, the demand for silicon wafers dramatically increased and the market for polycrystalline silicon as the raw material for silicon wafers grew. Our operation in Taiwan expanded its production facilities and accelerated sales. Demand for micromodules for use in fiber optic communication networks also expanded. As a result, sales from the electronics business improved 30.3% over the previous fiscal year to (Yen)117,745 million (US\$934 million).

Elsewhere in other operations, the industrial machinery business reinforced its sales alliance, and

27

sales of outdoor power equipment were expanded by introducing renewed models. Komatsu Construction became an unconsolidated company by the sale of its ownership in October 2000. On the other hand, Komatsu Forklift became a consolidated company due to our increased ownership. As a result, sales from other operations expanded 19.7% to (Yen)260,477 million (US\$2,067 million). Overseas sales by region in fiscal year 2001 were as follows: sales in the Americas accounted for (Yen)241,091 million (US\$1,913 million), down 0.6%; sales in Europe increased 2.3% to (Yen)126,479 million (US\$1,004 million); sales in Asia (excluding Japan) and Oceania increased 17.7% to (Yen)117,136 million (US\$929 million); and sales in the Middle East and Africa fell 31.2% to (Yen)24,798 million (US\$197 million).

Edgar Filing: KOMATSU LTD - Form 20-F

Earnings

Cost of sales in fiscal 2001 increased 1.0% from the previous year to (Yen)804,700 million (US\$6,387 million). The ratio of cost of sales to net sales decreased 2.1 percentage points to 73.4%.

Selling, general and administrative (SG&A) expenses for the year increased 9.2% to (Yen)263,854 million (US\$2,094 million), causing the ratio of SG&A expenses to net of sales to increase 1.2 percentage points over the previous year to 24.1%. As a result, operating income for fiscal 2001 increased 60.6% over the previous year to (Yen)27,815 million (US\$221million). This improvement was brought about primarily by improved earnings in the electronics business, owing to the recovery of demand for silicon wafers as compared with fiscal 2000.

Interest and other income and expenses in fiscal 2001 netted a loss of (Yen)7,751 million (US\$62 million), compared with a net gain of (Yen)2,077 million in the previous year. This loss resulted from the fact that net other income in fiscal 2000 included large gains such as sales of idle properties from the Osaka plant, while net other income in fiscal 2001 did not include such non-recurring gain. In fiscal 2001 and 2000, the Company recorded impairment losses on long-lived asset, which was related to temporarily idle production facilities due to the sluggish market, at its wholly-owned subsidiary in the electronics segment.

As a result, income before income taxes, minority interests and equity in earnings for the fiscal year increased 3.4% from previous year to (Yen)20,064 million (US\$159 million), the percentage of income before income taxes, minority interests and equity in earnings to net sales ended in 1.8%. Equity in earnings of affiliated companies in fiscal 2001 decreased 90.5% from the previous year to (Yen)385 million (US\$3 million). This decline was primarily derived from the fact that Applied Komatsu Technology, Inc., which had posted large profits in the previous year, became an unconsolidated company by the sale of its equity.

28

As a result, the Company's net income in fiscal 2001 decreased 48.4% from the previous year to (Yen)6,913 million (US\$55 million).

On a per share basis, net income amounted to (Yen)7.24 (US5.7c). Dividends per share were (Yen)6.00 (US4.8c). The corresponding figures for fiscal 2000 were (Yen)13.85 and (Yen)6.00, respectively.

Comparison of Fiscal 2000 with Fiscal 1999

Net Sales

Komatsu's net sales decreased 0.6% in fiscal 2000 to (Yen)971,055,654 million(US\$10,249 million) from (Yen)1,061,597 million in fiscal 1999. Domestic net sales increased 5.7% to (Yen)553,822 million (US\$5,377 million) in fiscal 2000 from (Yen)523,946 million in fiscal 1999, owing primarily to the positive effect of the government's economic stimulus measures and improved housing investments in Japan.

Overseas net sales decreased 6.7% to (Yen)501,832 million (US\$4,872 million) in fiscal 2000 from (Yen)537,651 million in fiscal 1999, due to construction and mining equipment operations, mainly attributable to the adverse effect of foreign exchange translations.

Edgar Filing: KOMATSU LTD - Form 20-F

Net sales in the Americas decreased 10.8% to (Yen)242,609 million (US\$2,355 million), mainly attributable to the adverse effect of foreign exchange translations, as well as dwindling demand for construction and mining equipment.

Net sales in Europe increased 3.7% to (Yen)123,633 million (US\$1,200 million), due to the brisk demand remaining for construction and mining equipment throughout the year under review.

Net sales in Asia (other than Japan) and in Oceania increased 2.8% to (Yen)99,558 million (US\$967 million) in fiscal 2000, due to the demand recovery in the logging and mining industries in Southeast Asia, and the continued growth of demand for construction and mining equipment in China.

Net sales in the Middle East and Africa decreased 27.1% to (Yen)36,032 million (US\$350 million), due to the falling market demand for construction and mining equipment.

Earnings

29

Cost of sales for fiscal 2000 declined 1.3% to (Yen)796,820 million (US\$7,736 million) from (Yen)807,255 million in fiscal 1999. The cost of sales to net sales ratio decreased 0.5% to 75.5% in fiscal 2000 from 76.0% in fiscal 1999.

SG&A expenses for fiscal 1999 decreased 3.4% to (Yen)241,516 million (US\$2,345 million). The ratio of SG&A expenses to net sales in fiscal 2000 was 22.9%, down 0.7% from 23.6% in fiscal 1999.

As a result, operating income for fiscal 2000 was (Yen)17,318 million (US\$178 million), an increase by (Yen)13,037 million from (Yen)4,281 million in fiscal 1999. This improvement was brought about primarily by improved earnings in the electronics business, owing to the recovery of demand for silicon wafers, and improved finances in the civil engineering and construction business, attributable to a substantial operating loss in the previous year.

Net interest and other income and expenses for fiscal 2000 contributed (Yen)2,077 million (US\$20 million), compared to a loss of (Yen)13,885 million in fiscal 1999. This increase resulted from the fact that other expenses in fiscal 1999 included a large write-off due to the devaluation of domestic marketable and investment securities, while net other income in fiscal 2000 included large gains on sales of assets such as an equity stake in Applied Komatsu Technology, Inc., plus the sale of idle properties at the Osaka Plant in Nakamiya district.

Interest and other income for fiscal 2000 also included a gain of (Yen)23,103 million (US\$224 million) from the sales of idle properties at the Osaka Plant in Nakamiya district. As a result of this profit and the decrease in selling, general and administrative expenses described above, income (loss) before income taxes, minority interests and equity in earnings increased in fiscal 2000, resulting in a net income of (Yen)19,395 million (US\$188 million), compared with a loss of (Yen)9,604 million in fiscal 1999.

Minority interests in income (loss) of consolidated subsidiaries was a loss after income tax of (Yen)88 million (US\$0.9 million) in fiscal 2000, representing a reduction of (Yen)6,950 million from income after income tax of (Yen)6,862 million in fiscal 1999. In fiscal 2000, equity in earnings of affiliated companies increased to (Yen)4,038 million (US\$39 million), from a loss of (Yen)7,575 million in fiscal 1999 due primarily to a gain on sales of assets, such as an equity stake in Applied Komatsu Technology, Inc.

Edgar Filing: KOMATSU LTD - Form 20-F

As a result, the Company's net income in fiscal 2000 totaled (Yen)13,395 million (US\$130 million), firmly moving the Company back into profitability.

30

On a per share basis, net income for fiscal 2000 amounted to (Yen)13.85 (US\$0.13), while cash dividends per share were (Yen)6.00 (US\$0.06) for the year. Cash dividends per share were (Yen)7.00 in fiscal 1999.

Performance by Segment

Komatsu operates in three business segments: Construction and mining equipment, electronics and other operations.

Construction and Mining Equipment. Fiscal 2001 net sales of construction and mining equipment totaled (Yen)718,147 million (US\$5,700 million), a decrease of 3.9% compared to (Yen)747,647 million in fiscal 2000, which represented an decrease of 2.4% compared to (Yen)765,802 million in fiscal 1999. Construction and mining equipment net sales accounted for 65.5% of Komatsu's worldwide net sales in fiscal 2001. While sales in Japan increased 4.7% to (Yen)305,593 million (US\$2,425 million) in fiscal 2001 from (Yen)291,804 million in fiscal 2000, sales outside Japan decreased 9.5% to (Yen)412,554 million (US\$3,274 million) in fiscal 2001. Sales in Japan represented 42.6% of total sales of construction and mining equipment, up 3.6% from the previous fiscal, while the proportion of sales outside Japan decreased to 57.4%. Overall, net sales of construction and mining equipment comprised 65.5% of Komatsu's total net sales in fiscal 2001, down 5.3% from 70.8% in fiscal 2000 and down 6.6% from 72.1% in fiscal 1999.

Operating income from the construction and mining equipment segment for fiscal 2001 decreased 22.1% compared to the previous fiscal to (Yen)22,203 million (US\$176 million). In fiscal 2000 operating income decreased 12.9% to (Yen)28,489 million from (Yen)32,697 million in fiscal 1999.

Electronics. In the electronics business, fiscal 2001 net sales from electronics operations increased 30.3% to (Yen)117,745 million (US\$934 million) from (Yen)90,335 million in fiscal 2000, as sales in Japan increased 19.1% to (Yen)74,455 million (US\$591 million), and sales outside Japan increased 55.7% to (Yen)43,290 million (US\$344 million). Fiscal 2000 net sales increased 4.3% to (Yen)90,335 million from (Yen)86,608 million in fiscal 1999. Electronics accounted for 10.7% of Komatsu's net sales in fiscal 2001, compared with 8.6% in fiscal 2000 and 8.2% in fiscal 1999.

KEM, a 59.9%-owned subsidiary of the Company engaged in the manufacture of silicon wafers, had sales of (Yen)78,525 million (US\$623 million) for fiscal 2001, a increase of 23.0% over sales of (Yen)63,862 million the previous fiscal year.

31

Operating income from the electronics segment for fiscal 2001 was an operating income of (Yen) 2,887 million (US\$ 23 million), which was supported by recovery of the silicon wafer business and expanded sales of thermoelectric modules for fiber-optic communications.

In fiscal 2001 and 2000, the Company recorded impairment losses on long-lived assets, which related to temporarily idle production facilities due to the

Edgar Filing: KOMATSU LTD - Form 20-F

sluggish market, at its wholly owned subsidiary in the electronics segment.

Other Operations. Fiscal 2001 sales from Komatsu's other operations increased 19.7% to (Yen)260,477 million (US\$2,067 million) from (Yen)217,672 million in fiscal 2000. During the year under review, Komatsu sold its equity shares in Komatsu Construction and excluded it from consolidation during the second half. Meanwhile, the Company increased its equity holdings in Komatsu Forklift and converted it into a subsidiary during the year, which also contributed to an increase in sales.

Operating income from other operating segments for fiscal 2001 increased 450.8%, compared to the previous fiscal year, to (Yen)6,450 million (US\$51 million).

Performance by Region

Japan. Net sales to customers in Japan increased 6.0% from (Yen)553,822 million in fiscal 2000 to (Yen)586,865 million (US\$4,658 million) in fiscal 2001. Operating income (loss) for Komatsu's operations in Japan increased from a income of (Yen)955 million in fiscal 2000 to a income of (Yen)29,253 million (US\$232 million) in fiscal 2001. The increase in sales came from recovery of the demand for construction equipment in Japan and an increase in the sales of domestic electronics operations. Compared to fiscal 1999, net sales to customers in Japan and operating income (loss) recorded by Komatsu's operations in Japan in fiscal 2000 increased by 5.7% (from (Yen)523,946 million) and increased by (Yen)11,007 million from an operating loss of (Yen)10,052 million, respectively.

Asia (Excluding Japan) and Oceania. Net sales to customers in the rest of Asia and Oceania increased 17.7% to (Yen)117,136 million (US\$930 million) in fiscal 2001 compared to (Yen)99,558 million in fiscal 2000. Net sales in fiscal 2000 increased 2.8% from (Yen)96,853 million in fiscal 1999. The increase in net sales in fiscal 2001 was due to recovery of the market demand in Asia for Komatsu's products. Net sales to customers in Asia (excluding Japan) and Oceania comprised 10.7% of Komatsu's worldwide net sales in fiscal 2001, up from 9.4% in fiscal 2000 and up from 9.1% in fiscal 1999.

Americas. Net sales to customers in North America, Central America and South America decreased 0.6% in fiscal 2001 to (Yen)241,091 million (US\$1,913 million) from (Yen)242,609 million in

32

fiscal 2000. Fiscal 2000 net sales decreased 10.8% over net sales of (Yen)272,091 million in fiscal 1999. The decrease in net sales in fiscal 2000 was due to decreased demand for construction equipment in North America. North American, Central American and South American net sales accounted for 22.0% of Komatsu's net sales worldwide in fiscal 2001, down from 23.0% in fiscal 2000 and 25.6% in fiscal 1999.

Operating loss for Komatsu's operations in the Americas decreased from a income of (Yen)12,354 million in fiscal 2000 and a income of (Yen)7,594 million in fiscal 1999 to a loss of (Yen)2,302 million (US\$18 million) in fiscal 2001.

Europe. Net sales to customers in Europe in fiscal 2001 increased 2.3% to (Yen)126,479 million (US\$1,004 million) from (Yen)123,633 million in fiscal 2000. Fiscal 2000 net sales increased 3.7% over (Yen)119,270 million in fiscal 1999. Increased sales in fiscal 2001 and 2000 were due primarily to increased sales of hydraulic excavators, wheel loaders and utility equipment. Net sales to customers in Europe comprised 11.5% of Komatsu's net sales worldwide in fiscal 2001, up from 11.7% in fiscal 2000 and 11.2% in fiscal 1999.

Edgar Filing: KOMATSU LTD - Form 20-F

In fiscal 2001, operating income from Komatsu's operations in Europe increased to (Yen)5,945 million (US\$47 million) from (Yen)4,284 million in fiscal 2000. Compared to fiscal 1999, operating income recorded in fiscal 2000 decreased by (Yen)4,969 million from (Yen)9,253 million.

Middle East and Africa. In the Middle East and Africa, Komatsu's net sales decreased 31.2% to (Yen)24,798 million (US\$197 million) in fiscal 2001 compared to (Yen)36,032 million in fiscal 2000, which represented a 27.1% decrease from net sales of (Yen)49,437 million in fiscal 1999. The sales decline came from a decrease in demand for the equipment in the Middle East and Africa. Net sales to customers in the Middle East and Africa comprised 2.3% of Komatsu's net sales worldwide in fiscal 2001, down from 3.4% in fiscal 2000 and 4.7% in fiscal 1999.

B. Liquidity and capital resources

Cash and cash equivalents as of March 31, 2001 were (Yen)39,760 million (US\$316 million), a decrease of (Yen)40,716 million from the previous fiscal year end. Net cash provided by operating activities was (Yen)69,976 million (US\$555 million) for fiscal 2001, approximately doubled from (Yen)34,224 million in the previous year.

Net cash used by investing activities in fiscal 2001 was (Yen)35,142 million (US\$279 million) and decreased by (Yen)54,022 million from (Yen)18,880 million provided in fiscal 2000. This decrease was principally due to a decrease in the proceeds from sales of property by (Yen)17,132 million and from

33

sales of marketable securities and investments by (Yen)82,657 million and a decrease in the purchase of marketable securities and investments by (Yen)55,996 million in fiscal 2001 compared to fiscal 2000. Net cash used in financing activities increased to (Yen)75,863 million (US\$602 million) in fiscal 2001, an increase of (Yen)14,298 million over (Yen)61,565 million used by financing activities in fiscal 2000, principally reflecting the increase of repurchase (net) of common stock by (Yen)6,767 million and repayment of capital lease obligations by (Yen)4,411 million.

Working capital in fiscal 2001 decreased 8.3% from the previous year, to (Yen)203,233 million (US\$1,613 million).

The current ratio (current assets divided by current liabilities) in fiscal 2001 decreased by 6.8% over the previous year to 134.9%, compared with 141.7% in fiscal 2000.

Capital expenditures in fiscal 2001 increased 37.4% over the previous year to (Yen)79,310 million (US\$629 million). The increase was caused primarily by the conversion of Komatsu Forklift to a consolidated subsidiary and capital expenditures for rental equipment to meet the growing demand. Capital expenditures in fiscal 2000 declined 49.7% from the previous year. Commitments for capital expenditures outstanding as of March 31, 2001 totaled (Yen)600 million (US\$5 million).

In the construction and mining equipment segment, which is a mature industry, Komatsu has already developed worldwide production and distribution capabilities. Accordingly, Komatsu does not anticipate that it will need to incur significant capital expenditures or other investments to expand its production in this segment.

At March 31, 2001, Komatsu had a cash balance of (Yen)39,760 million

Edgar Filing: KOMATSU LTD - Form 20-F

(US\$316 million). At that date, Komatsu's consolidated total debt was (Yen)468,486 million (US\$3,718 million), (Yen)230,137 million (US\$1,826 million) of which was short-term debt (including current portions of long-term debt). As of March 31, 2001, (Yen)34,026 million of Komatsu's long-term debt was scheduled to mature in fiscal 2002, (Yen)53,419 million in fiscal 2003, and (Yen)184,930 million in fiscal 2004 and thereafter.

Komatsu intends to meet its future capital expenditures, debt service and working capital requirements through cash flow from operations; borrowings, including under new lines of credit; securitization of accounts receivable; sales of real property; and capital markets funding, including commercial paper.

Komatsu has implemented an accounts receivable securitization program and such securitizations are expected to become an important source of funds for Komatsu in the future. As

34

of March 31, 2001, Komatsu had securitized accounts receivable totaling (Yen)127,155 million (US\$1,009 million) (or 24.4% of total accounts receivable at that date). Of this amount, (Yen)22,882 million related to receivables generated by Komatsu's Japanese operations and (Yen)104,273 million related to receivables generated by Komatsu's North American operations. As of March 31, 2000, Komatsu had securitized accounts receivable totaling (Yen)58,415 million (or 13.7% of total accounts receivable at that date). Of this amount, (Yen)17,455 million related to receivables generated by Komatsu's Japanese operations and (Yen)40,960 million related to receivables generated by Komatsu's North American operations.

As of July 31, 2001, the Company had outstanding (Yen)14,500 million of commercial paper issued under its (Yen)50,000 million commercial paper program, scheduled to mature in August 2001 and September 2001. As of July 31, 2001, Komatsu Finance America Inc. ("KFA") had outstanding US\$200 million of commercial paper issued under its US\$400 million commercial paper program (the "CP Program") and US\$593 million of notes issued under its US\$1,200 million Euro Medium Term Note Program ("EMTN Program"). Under the EMTN Program, the Company, KFA, Komatsu Finance (Netherlands) B.V. ("KFN") and Komatsu Australia Pty., Ltd. may from time to time issue notes denominated in any currency. The commercial paper issued under the CP Program have scheduled maturities during August and September of 2001 and the notes issued under the EMTN Program are scheduled to mature on various dates through September 2009. As of July 31, 2001, Komatsu Europe Coordination Center N.V. had outstanding EUR13 million of commercial paper issued under its EUR150 million commercial paper program, which have scheduled maturities during August, September, and November of 2001. As of July 31, 2001, Komatsu Finance (Netherlands) B.V. had EUR100 million of notes issued under its EMTN program, which are scheduled to mature on various dates through October 2004.

In December 1998, KFA issued US\$188 million of senior notes, of which US\$117 million is scheduled to mature in December 2003 and US\$71 million is scheduled to mature in December 2005. KFA used the net proceeds from the sale of these notes for working capital and other general corporate purposes of KFA and its U.S. affiliates (including, without limitation, the repayment of certain short-term indebtedness.)

In March 1999, the Company issued (Yen)35,000 million of unsecured bonds, scheduled to mature in March 2006. The Company used the net proceeds from the sale of these bonds for an acquisition of KSA, previously a wholly-owned subsidiary of KEM, and additional investment in KSA and ASiMI. They repaid bank loans using the paid-in capital.

The Company and certain consolidated subsidiaries have unused committed lines of credit amounting to (Yen)54,836 million (\$435 million) with certain financial institutions at the end of fiscal 2001.

C. Research and development, patents and licenses

Komatsu will continue to conduct research and development in the construction equipment, electronics, industrial machinery and other fields in order to enhance the functionality, quality and reliability of its products with an emphasis on environmental and social responsibility.

Research and development ("R&D") expenses for fiscal 2001 increased 6.6% from the previous year, to (Yen)45,282 million (US\$359 million), representing 4.1% of net sales. Komatsu's consolidated R&D expenditures for the years ended March 31, 2000 and 1999 amounted to (Yen)42,460 million and (Yen)45,712 million, respectively. The construction and mining equipment segment accounted for R&D expenses of (Yen)26,992 million in fiscal 2001 compared to (Yen)23,757 million in fiscal 2000. The electronics segment recorded R&D expenses of (Yen)7,047 million in fiscal 2001 compared to (Yen)8,857 million in fiscal 2000.

Major R&D activities are conducted at the Research Division, which is comprised of the Advanced Research Laboratory and five research and development departments (the "R&D Departments"). The R&D Departments provide technology support for new businesses and promotion that strengthens the existing products throughout Komatsu. In addition, the R&D Departments play an important role in the development of technological innovations that are vital for Komatsu's long-term product offerings. The Development Division's Construction Equipment Technical Center, which supports the technical growth and advancement of construction and mining equipment, contributes to sustaining Komatsu's construction equipment business. Also, research groups and development teams have been formed at each business division to oversee the development of their individual projects.

Komatsu will focus on the following technical issues in the mid-to long-term for R&D activity:

(1) Information Technology (IT)

Equipping Komatsu's products and machines with IT will be one of the top priorities in the coming years. Komatsu plans to offer system-integrated products and services, including interfacing with machines in the field. Some examples of IT applications include:

- . Unmanned hauling system for mining

- . Automated dispatch and fleet control of a construction site
- . Remote diagnosis/support system for machines working in the field to allow for more accurate preventive maintenance

(2) Environmental Control Assessment and Development

Komatsu will work to produce low-emission, low-energy consumption vehicles and to use more recycled parts and material/components, longer-life coolant, and

Edgar Filing: KOMATSU LTD - Form 20-F

biodegradable hydraulic oil. All of Komatsu's product designs will be based on life cycle assessment. Komatsu will develop core technologies to further reduce the noise and vibration of equipment. Komatsu is also devoted to using its engineering resources to develop recycling equipment and services, such as mobile crushers and recycling plants.

(3) Supporting Geometry-shrink of Semiconductor Circuits

The acceleration of semiconductor geometry shrink has brought the 0.13 micron generation right around the corner. This trend is requiring new process technology, and the role of the material and equipment industry to support this move is becoming increasingly important. On the material (polycrystal silicon, silane gas and wafers) side, R&D effort devoted to silicon material and wafer manufacturing technology is made to improve crystal quality and flatness of wafers. Substantial progress has been made on semiconductor processes and progress in equipment technology is also on the way. Years of experience in R&D of diesel engines and construction equipment nurtured Komatsu's excellence in technology areas such as optics/laser technology, and heat technology.

Komatsu owns a substantial number of patents and utility model registrations, as well as applications for patents and utility model registrations, in Japan. It also owns a substantial number of patents and applications for patents in other countries where its products are marketed.

Komatsu also manufactures a variety of products under licensing agreements with other companies.

While Komatsu considers its patents and licenses, collectively, to be important in the operation of its business, it does not consider any one of its patents or licenses or any related group of them to be so important that its expiration or termination would materially affect Komatsu's business as a whole, nor does it believe that any category of its activities is materially dependent upon patents or licenses, or patent or license protection. Komatsu also owns and maintains a substantial number of trademarks and trade names that are registered or otherwise protected under the laws of various jurisdictions.

37

D. Trend information

United States and European economies slowed down in the second half of fiscal 2001, and the Japanese economy remained slack throughout fiscal 2001. In this light, there is a concern over prolonged sluggish economies worldwide in fiscal 2002. In this environment, Komatsu will deliver technology products and services to customers for their diversified expectations. To accomplish the goals of the "G" to the 21st mid-range management strategy, the Company is determined to win over the competition and ensure continued growth.

In the construction and mining equipment business, the Company is going to secure earnings and new growth by undertaking regional and market-specific activities based on globalized operations it had established in different parts of the world. Transcending the boundaries of conventional business styles, the Company is committed to delivering total solutions that customers seek by deploying IT and expanding the environmental business.

In the electronics and other businesses, the Company is going to focus its management resources on business areas where it can maintain a technological edge on a global scale in order to foster their business growth and improve profitability.

Edgar Filing: KOMATSU LTD - Form 20-F

Item 6. Directors, senior management and employees

A. Directors and senior management

All Directors and Statutory Auditors are elected by a general meeting of shareholders to serve terms of approximately two years and three years, respectively, according to the statutory maximum. However, a Director or a Statutory Auditor may serve any number of consecutive terms.

The Board of Directors elects from its members a number of Representative Directors, who have the power severally to represent the Company in all matters, and from among them, a President. At its discretion, the Board of Directors may also elect a Chairman, Executive Vice Presidents, Executive Managing Directors and Managing Directors from among its members. At the present time, the President and the Executive Vice President are Representative Directors.

The Statutory Auditors of the Company are not required to be, and are not, certified public accountants. Each Statutory Auditor audits the performance of duties by Directors, and may at any time request the Directors to report on the business activities of the Company, and

38

may investigate the business as well as the financial situation of the Company. Certain powers are provided under the Commercial Code of Japan to enable the Statutory Auditors to carry out these functions. Further, each Statutory Auditor continues to perform the function of examining the annual financial documents and the rendering of an opinion thereon for the general meeting of shareholders. The Statutory Auditors may not at the same time be Directors, managers or employees of the Company or of any of its subsidiaries.

Set forth below are the names of the Company's Directors and Statutory Auditors (as of June 27, 2001), their positions and offices with the Company, and the dates when they assumed such positions.

Name (Date of birth)	Current Positions with the Company	Date of Office	
Satoru Anzaki (Mar. 3, 1937)	Chairman of the Board	Mar.1985	Director
		Nov.1988	Managing Director
		Jun.1991	Executive Managing Director
		Jun.1995	President (Rep Director)
		Jun.2001	Chairman of the Board
Masahiro Sakane (Jan. 7, 1941)	President (Representative Director)	Jun.1989	Director
		Jun.1994	Managing Director
		Jun.1997	Executive Managing Director
		Jun.1999	Executive Vice President
		Jun.1999	Rep. Director
Jun.2001	President (Rep Director)		
Toshitaka Hagiwara (June 15, 1940)	Executive Vice President (Representative Director) Assistant to President, Corporate Administration, Related Businesses and Corporate Communications	Jun.1990	Director
		Jun.1995	Managing Director
		Jun.1997	Executive Managing Director
		Jun.1999	Executive Vice President
		Jun.1999	Rep. Director

40

There are no family relationships between any of the Directors or Statutory Auditors of the Company.

In order to strengthen its corporate governance as a global enterprise and facilitate its response to a changing business environment, the Company has

Edgar Filing: KOMATSU LTD - Form 20-F

reorganized its management as follows in 1999:

1. Stronger Board of Directors

To facilitate efficient deliberation and quick decision-making, the number of members of the Board were reduced from 26 to 8. The management decision-making and supervisory functions were separated from the executive functions. New external Board Directors were appointed in order to strengthen the transparency and objectivity of management.

2. Introduction of Executive Officer System

A total of 22 Executive Officers were appointed out of the Company's operating and functional divisions, with five of them concurrently assuming directorship.

Executive Officers were given clearly defined responsibilities.

3. Introduction of the Global Officer System

In order to strengthen global management, a total of 18 Global Officers were appointed from among the leaders of key subsidiaries.

Global Officers will participate in a global meeting once or twice a year to formulate policies for the Group's businesses.

4. Establishment of Committee on Reward

The Company plans to establish an advisory Committee on Reward, which will include external members, in order to ensure the transparency, validity and objectivity of executive rewards.

The committee will make recommendations to the Board of Directors regarding policies for rewards, including levels of awards and performance evaluations of directors and officers.

41

Membership will be based initially on the current Stock Option Committee and will include internal personnel, representatives of shareholders, external auditors, consultants and licensed attorneys.

Interest of Management in Certain Transactions

None

B. Compensation

Aggregate Compensation

The aggregate compensation, including bonuses but excluding retirement allowances, paid by the Company in fiscal 2001 to all Directors and Statutory Auditors as a group for services in all capacities, was (Yen)388 million.

Bonuses

Edgar Filing: KOMATSU LTD - Form 20-F

In accordance with customary Japanese business practices, annual bonuses are paid to the Directors and Statutory Auditors of the Company out of the "profit" of the Company available for dividends, as such "profit" is determined in accordance with the Japanese Commercial Code. Such bonuses are approved by the shareholders of the Company at a meeting customarily held in June of each year. Bonuses so paid are not deductible by the Company for tax purposes and for financial reporting purposes are not reported under selling, general and administrative expenses as a charge against income for the year in which they are paid. Included in the figure for aggregate compensation set forth above is a total of (Yen)70 million in bonuses paid to Directors and Statutory Auditors as a group in their capacities as such (excluding bonuses for their services as employees) in respect of the 2001 fiscal year, as approved by the Company's Shareholders at the General Meeting of Shareholders held on June 28, 2000.

Retirement Allowance

The Company has a severance payment plan for Directors and Statutory Auditors. The plan provides for lump-sum severance payments based on pertinent rules of the Company. The amount of provision made for such severance payments, as charged to operating income, for the year ended March 31, 2001 was (Yen)178 million.

42

Options to Purchase Securities from Registrant or Subsidiaries

On June 27, 2001, the shareholders of the Company authorized the acquisition by the Company of 1,100,000 shares of its common stock, for a total consideration of up to (Yen)1,000 million, through the period ending on the date of the Company's next annual general meeting of shareholders. The Company intends to transfer such treasury shares to the Directors and certain employees, under agreements granting such Directors or such employees the right to acquire a certain number of the treasury shares, at a contractually fixed price. The purchase price will be equal to the amount obtained by multiplying 1.05 by the average of closing prices applicable to ordinary transactions of Company shares on the Tokyo Stock Exchange during the month immediately preceding the month in which the date of grant of the rights occurs provided that the exercise price shall not be less than the closing price of Company shares on the Tokyo Stock Exchange as of the date of the grant. According to the agreement, the option price is (Yen)559 per share and the option exercise period runs from August 1, 2002 to July 31, 2007.

The following table sets forth the number of shares of the Company's common stock allocated to each of the Company's Directors under the Company's stock option plan.

Name	Number of shares	Name	Number of shares
Satoru Anzaki	80,000	Masahiro Sakane	80,000
Toshitaka Hagiwara	70,000	Koji Ogaki	60,000
Kazuhiro Aoyagi	60,000	Kunio Noji	40,000
Tetsuya Katada	20,000		

The following table shows the common stock option plan.

Years granted (Year ended March 31)	Total number of shares to be called for common stock (in thousands)	Exercise price per share
1999	1,000	700
2000	1,200	820

43

Number of employees by business segment

	Total	Construction and Mining Equip.	Electronics	Other	Corporate
2001	32,002	20,345	3,578	7,625	454
2000	28,522				
1999	31,785				

Segment information for 2000 and 1999 is not available.

The Company has a labor contract with the Komatsu Labor Union ("KLU") covering conditions of employment. This contract, which provides that all employees except management and certain other enumerated personnel must become union members, has been renegotiated every two years and its present term runs until July 31, 2003. The employees of the Company's principal Japanese subsidiaries are covered by separate labor contracts between such subsidiaries and the unions representing their employees. These contracts contain provisions generally similar to those contained in the Company's contract with KLU. Certain overseas employees of the Company and subsidiaries are also covered by labor contracts between the employer and unions in the relevant locale representing the employees.

E. Share ownership

The following table lists the number of shares owned by the Directors and Statutory Auditors of the Company as of March 31, 2001.

Name	Position	Number of shares (in thousands)
Satoru Anazaki	Chairman of the Board	132
Masahiro Sakane	President	37
Toshitaka Hagiwara	Executive Vice President	40

Masahiro Yoshiike	Statutory Auditor	2
Takaharu Dohi	Statutory Auditor	0

Item 7. Major Shareholders and Related Party Transactions

44

Edgar Filing: KOMATSU LTD - Form 20-F

A. Major Shareholders

The following table shows the number of Company shares held by holders of 5% or more of Company shares and their percentage ownership as of March 31, 2001.

Name of major shareholders	Shares owned (in thousands)	Percentage
NATS CUMCO	55,735	5.8%
The Taiyo Mutual Life Insurance Co.	55,224	5.8%

NATS CUMCO is the share nominee of CITIBANK, N.A. which is a trustee of the Company's ADR(American Depositary Receipts).

The major shareholders of 5% or more of the Company shares and their percentage ownership as of March 31, 2000 and 1999 are as follows,

As of March 31, 2000

Name of major shareholders	Shares owned (in thousands)	Percentage
The Taiyo Mutual Life Insurance Co.	55,224	5.7%

As of March 31, 1999

Name of major shareholders	Shares owned (in thousands)	Percentage
The Taiyo Mutual Life Insurance Co.	53,445	5.5%

The Company's major share holders do not have different voting rights.

As of March 31, 2001, 104 residents of the United States held approximately 15.4% of the outstanding shares of record.

To the best knowledge of the Company, the Company is not, directly or indirectly, controlled by another corporation or other entity, by the Government of Japan or by any foreign government, nor to the best of its knowledge does any person own more than ten percent of the Company's Common Stock.

B. Related party transactions

Since the beginning of Komatsu's last full fiscal year, Komatsu has not transacted with, nor does Komatsu currently plan to transact with a related party. In this paragraph, a related party includes: (a) enterprises that directly or indirectly through one or more intermediaries, control or are controlled by, or are under common control with, Komatsu; (b) associates; (c) individuals owning, directly or

indirectly, an interest in the voting power of Komatsu that gives them significant influence over Komatsu, and close members of any such individual's family; (d) key management personnel, namely those persons having authority and responsibility for planning, directing and controlling the activities of Komatsu, including directors and senior management of companies and close members of such individual's families; (e) enterprises for which a substantial interest in the voting power is owned, directly or indirectly, by any person described in (c) or (d) or over which such a person is able to exercise significant influence. This item includes enterprises owned by directors or major shareholders of Komatsu and enterprises that have a member of key management personnel in common with Komatsu. Close members of an individual's family are those that may be expected to influence, or be influenced by, that person in their dealings with Komatsu. An associate is an unconsolidated enterprise in which Komatsu has a significant influence or which has significant influence over Komatsu. Significant influence over an enterprise is the power to participate in the financial and operating policy decisions of the enterprise

Edgar Filing: KOMATSU LTD - Form 20-F

but is less than control over those policies. Shareholders beneficially owing a 10% interest in the voting power of Komatsu are presumed to have a significant influence on Komatsu.

To the best knowledge of the Company, no person owns more than ten percent of the Company's common stock.

C. Interests of experts and counsel

None

Item 8 Financial Information

A. Consolidated Statements and Other Financial Information

Refer to consolidated Financial Statements and Notes to Consolidated Financial Statements.

Legal Proceedings

Komatsu is involved in or subject to various ordinary, routine litigation and legal proceedings incidental to the normal conduct of its business, including with respect to regulatory matters. The outcome of these matters is not expected to have a material adverse effect on Komatsu's financial condition, liquidity or results of operations.

Dividend Policy

Concerning cash dividends to shareholders, the Company maintains a basic policy of redistributing

46

profits by taking payout ratios into account and linking returns more directly with business results, while ensuring sufficient internal reserves for reinvestment. Based on this policy, we have set fiscal 2001 year-end per share dividends at (Yen)3.0 for the second half, with total annual per share dividends to be set at (Yen)6.0, and the payout ratio of fiscal 2001 was 79.4%.

B. Significant changes

No significant change has occurred since the date of the annual financial statements.

Item 9 The Offer and Listing

A. Offer and listing details

The shares of common stock of the Company, par value 50 yen per share, are listed on the Tokyo Stock Exchange (TSE) and four other stock exchanges in Japan: Osaka, Nagoya, Fukuoka and Sapporo.

ADS's, each representing 4 shares of common stock, have been issued by Citibank N.A. of New York, as Depositary for the American Depositary Receipts

Edgar Filing: KOMATSU LTD - Form 20-F

(ADR's) evidencing the ADS's, and are traded in the US on the over-the-counter market.

EDR is listed on the Luxemburg Stock Exchange.

GBC is listed on the Frankfurt Stock Exchange.

As of July 31, 2001, 958,921,701 shares of common stock were outstanding. On the same date, 14,945,925 ADS's (equivalent to 59,783,700 shares of common stock, or approximately 6.2% of the total number of shares of common stock outstanding on that date) were outstanding and were held by 13 record holders of ADR's.

The following table sets forth for the periods indicated the reported high and low sales prices of the Company's stock on Tokyo Stock Exchange and the reported high and low sales prices of ADS's.

Period	TSE (Japanese Yen)		ADS (U.S. dollars)

- (2) In July 2000, the Company entered into a joint venture agreement with USHIO INC. whereby GIGAPHOTON INC. was jointly established in August 2000, for Excimer lasers used in lithography tools for semiconductor manufacturing. See Item 4. B. "Business Overview - Electronics Segment - Excimer Lasers".
- (3) In September 2000, the Company entered into a share purchase agreement with TAKAMATSU CORPORATION, pursuant to which Komatsu offered sale of its shares in Komatsu Construction to TAKAMATSU CORPORATION in the course of a tender offer commenced by TAKAMATSU CORPORATION in October 2000. In this connection, the Company entered into a financial assistance agreement with Komatsu Construction and TAKAMATSU CORPORATION concerning the improvement of financial condition of , Komatsu Construction. See Item 4. B. "Business Overview - Other Operations Segment - Komatsu Construction".
- (4) In September 2000, the Company entered into a basic agreement with Galveston-Houston Company pursuant to which in December 2000 Komatsu acquired Hensley Industries, Inc., a leading manufacturer of buckets, teeth, edges and other products for construction and mining equipment in the international GET market. See Item 4. B. "Business Overview - Construction and Mining Equipment Segment - Ground Engaging Tools (GET) Business".

D. Exchange controls

The Foreign Exchange and Foreign Trade Law of Japan, as amended ("Foreign Exchange Law"), and the cabinet orders and ministerial ordinances thereunder, regulate certain transactions involving a "non-resident of Japan" or a "foreign investor," including a portfolio on foreign ownership of debt or equity securities of Japanese companies.

"Non-residents of Japan" include individuals who are not resident in Japan and corporations whose principal offices are located outside of Japan. Generally, branches and other offices of Japanese corporations located outside of Japan are regarded as non-residents of Japan, but branches and other offices of non-resident corporations located within Japan are regarded as residents of Japan. "Foreign

49

investors" are defined to be: (i) individuals not resident in Japan; (ii) corporations which are organized under the laws of foreign countries or whose principal offices are located outside of Japan; (iii) corporations of which not less than 50 percent of the shares are held directly or indirectly by (i) or (ii) above; and (iv) any corporation in which: (a) a majority of the officers are non-resident individuals; or (b) a majority of the officers having the power to represent the corporation are non-resident individuals.

Edgar Filing: KOMATSU LTD - Form 20-F

The following is a summary of the pertinent regulations under the Foreign Exchange Law insofar as they affect debt securities of the Company, shares of the Company's Common Stock or Depositary Receipts representing such shares.

Debt Securities

The Foreign Exchange Law requires that a resident of Japan whose debt securities are being issued outside of Japan file a post facto report of

"capital transaction" with the Minister of Finance. Under the Foreign Exchange Law, payment of the principal of and interest on these debt securities (including any additional amounts payable pursuant to the terms of the securities) may in general be made by the issuer without any restrictions.

On March 28, 1996, the Company, Komatsu Finance America Inc., and Komatsu Finance (Netherlands) B.V. (the "Issuers") established and registered the US\$1 billion Euro Medium-Term Note Program on the London Stock Exchange. The aggregate nominal amount of the Notes under the Program was increased to US\$1.2 billion on April 1, 1999, and Komatsu Australia Pty. Ltd. joined the Program as an additional Issuer on March 31, 2000. Under this program, each of the Issuers may from time to time issue notes denominated in any currency.

Acquisition of Shares

In general, the acquisition of shares in a Japanese company listed on any stock exchange in Japan or traded on the over-the-counter market in Japan (the "listed shares") from a resident of Japan by a non-resident of Japan requires the resident of Japan to file a post facto report with the Minister of Finance

of the transaction. The Foreign Exchange Law gives the Minister of Finance the power in certain limited and exceptional circumstances to require prior approval for any such acquisition.

If a foreign investor intends to acquire the listed shares and as a result of such acquisition the aggregate of the shares in the relevant company already held by that foreign investor and certain related parties (as specified under the Foreign Exchange Law) and the number of such shares proposed to be acquired by that foreign investor would be 10 percent or more of the total issued shares, such foreign

50

investor will generally be subject to a post facto reporting requirement to the

Minister of Finance and any other competent Minister. In certain exceptional cases, a prior notification is required in respect of such an acquisition.

Under the Foreign Exchange Law and the regulations thereunder currently in effect, a holder of convertible bonds or warrants to subscribe for new shares which were issued or offered outside of Japan may acquire the listed shares upon the conversion or exercise of such convertible bonds or warrants without being subject to any of the aforesaid prior notification and/or post facto reporting

requirements.

Dividends and Proceeds of Sale

Under the Foreign Exchange Law and regulations thereunder, dividends paid on the shares of a Japanese corporation (including those in the form of Depository Receipts) held by non-residents of Japan and the proceeds of any sale of such shares within Japan may in general be converted into any foreign currency and repatriated abroad. The acquisition of shares by non-resident shareholders by way of stock splits is not subject to any of the prior notification and/or post facto reporting requirements.

Exercise or Transfer of Subscription Rights

The acquisition by a foreign investor of shares in a Japanese company upon the exercise of subscription rights is subject to the formalities and restrictions described in the second paragraph under "Acquisitions of Shares" above. However, if a foreign investor wishes to dispose of, rather than exercise, any subscription rights, he may sell the rights inside or outside of Japan without restriction.

Depository Receipts

When shares are deposited with a Depository located outside of Japan and Depository Receipts are issued in exchange therefor, the Depository is treated like any other foreign investor acquiring Shares.

E. Taxation

51

Debt Securities

Except as mentioned below, under the Japanese tax laws currently in effect, the interest on debt securities or corporate bonds (shasai) issued by a Japanese corporation is generally subject to the withholding of Japanese income tax and, in the case of a corporation (other than a non-Japanese corporation having no permanent establishment in Japan), to corporation tax, and premium (if any) on such debt securities is generally subject to Japanese income or corporation tax, depending on the status of the recipient.

Under Japanese tax laws currently in effect, the payment of interest on debt securities issued outside Japan by a Japanese company (on or after April 1, 1998 and on or before March 31, 2002) and the difference, if any, between the issue price and the amount payable upon redemption of such debt securities will not be subject to the withholding of Japanese income tax, if such interest or difference is payable outside of Japan to a non-resident of Japan or non-Japanese corporation which (in the case of interest) has submitted documents certifying its non-Japanese residency in accordance with the requirements set out in Japanese tax laws. Furthermore, such payment will not be subject to any other Japanese income or corporation tax, unless such non-resident or non-Japanese corporation has a permanent establishment in Japan and the payment is attributable to the business of such non-resident or non-Japanese corporation carried on in Japan through such permanent establishment. The Convention Between Japan and the United States of America for the Avoidance of Double Taxation and

Edgar Filing: KOMATSU LTD - Form 20-F

the Prevention of Fiscal Evasion with respect to Taxes on Income of March 1, 1971, as presently in effect (the "Tax Convention"), provides that the interest income of a United States resident or corporation from debt securities may be taxable by Japan if and to the extent that interest is paid by a resident of Japan or otherwise is from sources within Japan.

Under the Tax Convention, the maximum rate of Japanese tax on interest income of United States residents or corporations is 10 percent unless the recipient has a permanent establishment in Japan and the debt securities in respect of which such interest is paid are effectively connected with such permanent establishment, in which case such income will be taxed at the normal rates provided by the Japanese income or corporate tax laws.

There are no Japanese taxes payable on conversion of convertible bonds into shares of Common Stock or Depository Receipts.

Gains derived from the sales of debt securities of the Company outside of Japan by non-residents (including individuals and non-Japanese corporations), will not be subject to Japanese income or corporation taxes, except in limited circumstances. Gains derived by non-residents

52

(including individuals and non-Japanese corporations) from the sale in Japan of debt securities of the Company will be exempt from Japanese taxes on income if the non-resident does not have a permanent establishment in Japan.

Japanese inheritance and gift taxes at progressive rates may be payable by an individual who has acquired debt securities of the Company as legatee, heir or donee.

Common Stock and Depository Receipts

Generally, a non-resident of Japan or a non-Japanese corporation is subject to Japanese withholding tax on dividends paid by Japanese corporations. Stock splits are not subject to Japanese income tax. However, a transfer of retained earnings or legal reserve (but, in general, not capital surplus) to stated capital (whether made in connection with a stock split or otherwise) is treated as a dividend payment to shareholders for Japanese tax purposes and is, in general, subject to Japanese income tax. No such transfer would be necessary in connection with a stock split if the total par value of the shares in issue after the stock split does not exceed the stated capital.

Pursuant to the Tax Convention the maximum rate of Japanese withholding tax that may be imposed on dividends paid by a Japanese corporation to a United States resident individual or, subject to certain limited exceptions, a United States corporation is 15 percent unless such United States resident individual or United States corporation has a permanent establishment in Japan and the shares with respect to which the dividends are paid are effectively connected with the permanent establishment.

Gains derived from the sale outside of Japan of Common Stock or Depository Receipts by non-residents of Japan, including non-Japanese corporations, will not be in general subject to Japanese taxes on income.

Gains derived from the sale in Japan of Common Stock or Depository Receipts by a non-resident (including a non-Japanese corporation) are in general exempt from Japanese income or corporation taxes, unless the non-resident has a permanent establishment in Japan.

Edgar Filing: KOMATSU LTD - Form 20-F

Japanese inheritance and gift taxes, at progressive rates, may be payable by an individual who acquires Common Stock or Depositary Receipts as a legatee, heir or donee.

Item 11. Quantitative and Qualitative Disclosures About Market Risk

Market risk exposure

Komatsu is exposed to market risk primarily from changes in foreign currency exchange rates and interest rates with respect to international operations and foreign currency denominated credits and debts. In order to manage these risks that arise in the normal course of business, the companies enter into various derivative transactions pursuant to their policies and procedures. Komatsu does not enter into derivative financial transactions for trading or speculative purposes. Komatsu is exposed to credit-related losses in the event of nonperformance by counterparties to derivative financial instruments. However, because of the counterparties' high credit ratings, none are expected to fail to meet their obligations.

Foreign Exchange Risk

To reduce foreign exchange risks against foreign currency denominated assets and liabilities, Komatsu executes forward exchange contracts and option contracts in a range of 50% to 100% based on their projected cash flow in foreign currencies. Furthermore, to reduce foreign exchange risks in relation to medium-term and long-term foreign currency denominated assets and liabilities and to fix related costs, Komatsu has executed such forward exchange contracts for a portion of their

54

bonds and loans.

The following table provides information concerning the derivative financial

Edgar Filing: KOMATSU LTD - Form 20-F

instruments of Komatsu in relation to foreign currency exchange transactions existing as of March 31, 2001, which are translated into yen at the rate used on that date, together with the related weighted average contractual exchange rates as of March 31, 2001. As of March 31, 2001, the notional amount of option contracts is (Yen)3,395 million (US\$27 million).

Interest rate risk

To reduce risks and hedge cash flow, Komatsu engages in certain interest rate swaps, cross-currency swaps and cap option transactions for interest payment and interest receipt. Certain interest rate swap contracts are not qualified as hedging and are recorded at the fair value and the resulting gains are recognized as income.

The following tables provide information concerning the derivatives and other financial instruments of Komatsu that are sensitive to changes in interest rates, mainly including interest rate swaps, cross-currency swaps and debt obligations, excluding capital lease obligations. For debt obligations, the tables present principal cash flows and related weighted average interest rates by expected maturity dates. For interest rate and cross-currency swaps, the tables on the following page present notional amounts and weighted average for receipt and payment of interest rates. As of March 31, 2001, the notional amount and its average strike rate of interest cap transactions are (Yen)52,656 million (US\$418 million) and 6.31%, respectively.

Financial Review

Sales

Net sales in fiscal 2001 ended March 31, 2001 increased 3.9% over the previous fiscal year, to (Yen)1,096,369 million (US\$8,701 million at US\$1=(Yen)126).

Sales in Japan advanced 6.0%, to (Yen)586,865 million (US\$4,658 million), while overseas sales rose 1.5%, to (Yen)509,504 million (US\$4,043 million). As a result, the ratio of overseas sales to consolidated net sales for the year dipped from 47.5% in the previous fiscal year, to 46.5%.

Domestic sales of construction and mining equipment were up from the previous fiscal year, owing primarily to efforts of information technology utilization and the expansion of sales of machines for environment conservation, although the demand declined slightly. In overseas market, while European economies remained strong in general, the United States economy, which had maintained the record-high length of buoyancy, began to slow down. The recovery pace of overall Asian economies slowed down. As a result, global sales of construction and mining equipment slid 3.9% from the previous fiscal year, to (Yen)718,147 million (US\$5,700 million).

In the electronics business, the demand for silicon wafers dramatically increased and the market of polycrystalline silicon as the raw material for silicon wafers grew. Our operation in Taiwan expanded its production facilities and accelerated sales. Demand for micro modules for use in fiber optic

Edgar Filing: KOMATSU LTD - Form 20-F

communication network also expanded. As a result, sales from the electronics business improved 30.3% over the previous fiscal year, to (Yen)117,745 million (US\$934 million).

Elsewhere in the other operations, the industrial machinery business reinforced the sales alliance, and the sales of outdoor power equipment were expanded by introducing renewed models. Komatsu Construction Co., Ltd. became unconsolidated company by the sale of its ownership in October 2000. On the other hand, Komatsu Forklift Co., Ltd. became consolidated company due to our increased ownership. As a result, sales from other operations expanded 19.7%, to (Yen)260,477 million (US\$2,067 million).

Overseas sales by region in fiscal 2001 were as follows: sales in the Americas accounted for (Yen)241,091 million (US\$1,913 million), down 0.6%; sales in Europe advanced 2.3%, to (Yen)126,479 million (US\$1,004 million); sales in Asia (excluding Japan) and Oceania increased 17.7%, to (Yen)117,136 million (US\$929 million); and sales in the Middle East and Africa fell 31.2%, to (Yen)24,798 million (US\$197 million).

Earnings

Cost of sales in fiscal 2001 increased 1.0% from previous year, to (Yen)804,700 million (US\$6,387 million). The ratio of cost of sales to net sales grew 2.1 percentage points, to 73.4%. Selling, general and administrative (SG&A) expenses for the year increased 9.2%, to (Yen)263,854 million (US\$2,094 million), causing the ratio of SG&A expenses to net of sales to increase 1.2 percentage points over the previous year, to 24.1%. As a result, operating income for fiscal 2001 increased 60.6% over the previous year, to (Yen)27,815 million (US\$221 million). This improvement was brought about primarily by improved earnings in the electronics business, owing to the recovery of demand for silicon wafers as compared with fiscal 2000.

Interest and other income and expenses in fiscal 2001 netted to a loss of (Yen)7,751 million (US\$62 million), compared with a net gain of (Yen)2,077 million in the previous year. This resulted from the fact that net other income in fiscal 2000 included large gain such as sales of idle properties of the Osaka plant, while net other income in fiscal 2001 did not include such non recurring gain. In fiscal 2001 and 2000, the Company recorded impairment losses on long-lived asset, which was related to temporarily idle production

facilities due to the sluggish market, at its wholly owned subsidiary in the electronics segment.

As a result, income before income taxes, minority interests and equity in earnings for the fiscal year increased 3.4% from previous year to (Yen)20,064

Edgar Filing: KOMATSU LTD - Form 20-F

million (US\$159 million), the percentage of income before income taxes, minority interests and equity in earnings to net sales ended in 1.8%.

Equity in earnings of affiliated companies in fiscal 2001 decreased 90.5% from the previous year, to 385 million (US\$3 million). This decline was primarily derived from the fact that Applied Komatsu Technology, Inc., which had large profit in the previous year, became an unconsolidated company, by sale of its equity.

As a result, the Company's net income in fiscal 2001 decreased 48.4% from the previous year, to (Yen)6,913 million (US\$55 million).

On a per share basis, net income amounted to (Yen)7.24 (US\$5.7(cent)). Dividends per share were (Yen)6.00 (US\$4.8(cent)). The corresponding figures for fiscal 2000 were (Yen)13.85 and (Yen)6.00 respectively.

Liquidity and Capital Resources

Working capital in fiscal 2001 decreased 8.3% from the previous year, to (Yen)203,233 million (US\$1,613 million).

The current ratio in fiscal 2001 declined 6.8 percentage points from the previous year, to 134.9%.

Capital expenditures in fiscal 2001 increased 37.4% over the previous year, to (Yen)79,310 million (US\$629 million). The increase was caused primarily by the conversion of Komatsu Forklift Co., Ltd. to a consolidated subsidiary and the capital expenditures for rental equipment to meet the growing Financial Condition demand. Capital expenditures in fiscal 2000 declined 49.7% from the previous year. Commitments for capital expenditures outstanding as of March 31, 2001 totaled (Yen)600 million (US\$5 million).

R&D expenses in fiscal 2001 rose 6.6% over the previous year, to (Yen)45,282 million (US\$359 million), and represented 4.1% of net sales. Fiscal 2001 expenses for advertising and public relations activities jumped 24.1%, to (Yen)5,369 million (US\$43 million), or 0.5% of net sales.

Financial Condition

The Company continues to strengthen its financial position. In fiscal 2001, the Company combined its bank commitment lines and the credit lines that allow borrowings to a certain amount when necessary, that were formerly maintained separately in Japan and the United States. The combined global commitment line in the amount of US\$450 million allows the Company and certain subsidiaries to flexibly procure funds in yen or U.S. dollar from the banks of Japan, the United States and Europe. This allowed the Group companies in Japan and the United States to decrease debts and interest expenses. As a result, DER (debt-equity ratio) as of March 31, 2001, was maintained below 1 point at 0.99 to 1.

Cash and cash equivalents at the end of the fiscal year amounted to (Yen)39,760 million (US\$316 million), a decrease Business Risk of (Yen)40,716 million from the previous fiscal year. Net cash provided by operating activities in fiscal 2001 totaled (Yen)69,976 million (US\$555 million), an increase of (Yen)35,752 million from the previous fiscal year. This improvement was primarily from improved earnings in the electronics business. Net cash flows from investing activities for the fiscal year amounted to (Yen)35,142 million (US\$279 million), a decrease of (Yen)54,022 million from the previous fiscal year. Primary factor of the decrease is due to the decline in proceeds from sales of marketable securities and investments. Net cash outflows from in financing activities for the fiscal year came to (Yen)75,863 million (US\$602 million), an increase of (Yen)14,298 million from the previous fiscal year due to debt repayment and purchase of treasury stock.

Business Risk

The Company believes that, as an independent business entity, it has its own management strategy and resources to win against the competition within a foreseeable scope based on available information. The market conditions for the Company's individual businesses differ by region and change widely depending

Edgar Filing: KOMATSU LTD - Form 20-F

upon economic and competitive conditions. Profitability of the Company's global construction and mining equipment business, as its core operation, is affected primarily by the following factors:

- . Further intensification of competition in the Japanese market, where demand has declined considerably since 1997.
- . Further reduction in demand in North America brought about by greater-than-expected economic deceleration.
- . A considerable decline in demand in Europe, owing to the economic slowdown there.
- . A delay in the recovery of demand for mining equipment.

-29-

- . Significant increases in R&D expenses for construction and mining equipment in order to meet more stringent environmental protection regulations.
- . Greater-than-expected fluctuation in foreign exchange rates (especially vis-a-vis the U.S. dollar and the Euro).

With regard to the electronics business, the Company expects no financial burden resulting from sizable investments for the time being. However, the Company considers that the following factors could affect profitability: sharp changes in the semiconductor market and declining sales prices due to unbalanced supply and demand, along with intensified competition.

Although the profitability of other businesses is also affected by changes in their respective markets, this is not expected to have a significant impact on the Company's overall performance.

Market Risk Exposure

The companies are exposed to market risk primarily from changes in foreign currency exchange rates and interest rates with respect to international operations and foreign currency denominated credits and debts. In order to manage these risks that arise in the normal course of business, the companies enter into various derivative transactions pursuant to their policies and procedures. The companies do not enter into derivative financial transactions for trading or speculative purposes.

The companies are exposed to credit-related losses in the event of nonperformance by counterparties to derivative financial instruments. However, because of the counterparties' high credit ratings, none are expected to fail to meet their obligations.

Foreign Exchange Risk

To reduce foreign exchange risks against foreign currency denominated assets and liabilities, the companies execute forward exchange contracts and option contracts in a range of 50% to 100% based on their projected cash flow in foreign currencies. Furthermore, to reduce foreign exchange risks in relation to medium-term and long-term foreign currency denominated assets and liabilities and to fix related costs, the companies have executed such forward contracts for a portion of their bonds and loans.

The following table provides information concerning derivative financial instruments of the companies in relation to foreign currency exchange transactions existing as of March 31, 2001, which are translated into yen at the rate used on that date, together with the related weighted average contractual exchange rates as of March 31, 2001. As of March 31, 2001, the notional amount of option contracts is (Yen)3,395 million (US\$26,944 thousand).

Interest Rate Risk

To reduce risks and hedge the cash flow, the companies engage in certain interest rate swaps, cross-currency swaps and cap option transactions for interest payment and interest receipt. Certain interest rate swap contracts are not qualified as hedge and are recorded at the fair value and the resultant gains are recognized as income.

The following tables provide information concerning derivatives and other financial instruments of the companies that are sensitive to changes in interest rates, mainly including interest rate swaps, cross-currency swaps and debt obligations excluding capital lease obligations. For debt obligations, the tables present principal cash flows and related weighted average interest rates by expected maturity dates. For interest rate and cross-currency swaps, the tables on the following page present notional amounts and weighted average receive and pay interest rates. As of March 31, 2001, the notional amount and its average strike rate of interest cap transactions are (Yen)52,656 million (US\$417,905 thousand) and 6.31%, respectively.

Notes to Consolidated Financial Statements
Komatsu Ltd. and Consolidated Subsidiaries

1. Description of Business, Basis of Financial Statements and Summary of Significant Accounting Policies

Description of Business

Komatsu Ltd. ("the Company") and consolidated subsidiaries (together "the companies") manufacture and market primarily various types of construction and mining equipment throughout the world, and also engage in manufacturing and sales of electronics including semiconductor products, and other activities. The semiconductor industry has historically been cyclical and has experienced periodic downturns, which have had a material adverse effect on the semiconductor industry's demand for semiconductor products manufactured and marketed by the Company and certain subsidiaries.

The consolidated net sales of the Company and consolidated subsidiaries for the year ended March 31, 2001, consisted of the following:

Construction and mining equipment--65.5%, Electronics--10.7%, Others--23.8%.

Sales are made principally under the Komatsu brand name, and are almost entirely through sales subsidiaries and sales distributors. These subsidiaries and distributors are responsible for marketing and distribution and primarily sell to retail dealers in their geographical area. Of consolidated net sales in 2001, 46.5% were generated outside Japan, with 22.0% in the Americas, 11.5% in Europe, 10.7% in Asia (excluding Japan) and Oceania, and 2.3% in the Middle East and Africa.

The manufacturing operations of the Company and consolidated subsidiaries are conducted primarily at plants in Japan, the United States of America, Germany, the United Kingdom, Brazil, Italy, China and Taiwan.

Basis of Financial Statements

The accompanying consolidated financial statements are stated in Japanese yen, the currency of the country in which the Company is incorporated and principally operates. The translation of Japanese yen amounts into United States dollar amounts for the year ended March 31, 2001, is included solely for the convenience of readers outside Japan and has been made at the rate of (Yen)126 to \$1, the approximate rate of exchange prevailing at the Federal Reserve Bank of New York on March 30, 2001. Such translation should not be construed as a representation that Japanese yen amounts could be converted into United States

Edgar Filing: KOMATSU LTD - Form 20-F

dollars at the above or any other rate.

The accompanying consolidated financial statements reflect certain adjustments, not recorded in the companies' books, to present them in conformity with accounting principles generally accepted in the United States of America, modified for accounting for stock splits (Note 11). The major adjustments include those relating to accounting for postretirement benefits, leases, valuation losses of long-lived assets and accruals of certain expenses. Certain reclassification have been made to prior year amounts to conform with current year presentation.

Summary of Significant Accounting Policies

(1) Consolidation and Investments in Affiliated Companies

The consolidated financial statements include the accounts of the Company and all of its majority-owned domestic and foreign subsidiaries, except for certain minor subsidiaries.

In 2000, the Company increased its ownership in certain affiliated companies namely Komatsu Forklift Co., Ltd., and three other companies and newly invested in a company, and those companies became consolidated subsidiaries. In addition, the Company established a consolidated subsidiary and an affiliated company and acquired two U.S. companies (100% owned subsidiaries) which were accounted for by the purchase method during fiscal 2001.

The Company sold major part of ownership of certain consolidated subsidiaries namely Komatsu Soft Ltd., Komatsu Construction Ltd. and one other consolidated subsidiary and those companies were excluded from consolidated subsidiaries during fiscal 2001.

In 1999, the Company increased its ownership in certain affiliated companies namely Komatsu Zenoah Co., Komatsu Mining Germany GmbH and three other companies and those companies became consolidated subsidiaries as of March 31, 1999.

The accounts of certain foreign consolidated subsidiaries have been included on the basis of fiscal periods ended three months or less prior to March 31.

Investments in 20% to 50%-owned affiliated companies and certain minor subsidiaries not consolidated are, with minor exceptions, accounted for by the equity method. All significant intercompany transactions have been eliminated. The excess cost of investments in the subsidiaries and affiliated companies over their equity in the net assets at the dates of acquisition is generally being amortized on a straight-line method over the estimated periods benefited, not exceeding periods of 10 years.

(2) Translation of Foreign Currency Accounts

Under the provisions of Statement of Financial Accounting Standards ("SFAS") No. 52, "Foreign Currency Transaction," assets and liabilities are translated at the exchange rates in effect at each fiscal year-end, and income and expenses are translated at the average rates of exchange prevailing during each fiscal year in translating the financial statements of overseas subsidiaries. The resulting translation adjustments are accumulated in a separate component of the accumulated other comprehensive income (loss) in the accompanying consolidated balance sheets.

(3) Investment Securities

In compliance with SFAS No. 115, "Accounting for Certain Investments in Debt and Equity Securities," the Company has categorized noncurrent marketable equity securities and debt securities as investment securities available for

Edgar Filing: KOMATSU LTD - Form 20-F

sale which are stated at fair value. In fiscal 2001, the Company determined that the classification of certain investment securities as current assets at March 31, 2000 should be changed. These securities related primarily to investments made for the purpose of longer-term business affiliations and relationships. As a result, the Company has restated the previously reported balance sheet at March 31, 2000 by reclassifying investment securities of (Yen)40,219 million from marketable securities included in current assets to noncurrent investment securities. There was no impact on results of operations or financial position.

(4) Inventories

Inventories, consisting of finished products including finished parts held for sale, work in process, and materials and supplies, are stated at the lower of cost or market. Cost is determined by the last-in, first-out method for finished parts held for sale and by using actual costs accumulated under a job-order-cost system for other finished products and work in process. Cost of materials and supplies represents average cost.

(5) Property, Plant and Equipment, and Related Depreciation

Property, plant and equipment are stated at cost. Depreciation is computed principally using the declining-balance method at rates based on the estimated useful lives of the assets. Effective rates of depreciation for buildings, machinery and equipment for the years ended March 31, 2001, 2000 and 1999, are as follows:

	2001	2000	1999
Buildings.....	8%	8%	8%
Machinery and equipment.....	24%	25%	23%

Certain leased machinery and equipment are accounted for as capital leases in conformity with SFAS No. 13, "Accounting for Leases," from the fiscal year ended March 31, 2001. The aggregate cost included in property, plant and equipment and related accumulated depreciation as of March 31, 2001 were as follows:

	Million of yen	Thousands of U.S. dollars
Aggregate cost.....	(Yen)19,264	\$152,889
Accumulated depreciation.....	4,430	35,159

Ordinary maintenance and repairs are charged to income as incurred. Major replacements and improvements are capitalized. When properties are retired or otherwise disposed of, the property and related accumulated depreciation accounts are relieved of the applicable amounts and any differences are included in other income or expenses.

(6) Revenue Recognition

The companies recognize revenue from product sales at the time when title and risk of all ownership is transferred to independently owned and operated dealers or customers, which typically occurs when products are received and accepted by the customers for major products such as construction equipment and electronics products, and upon shipment for parts and certain other products. Lease revenues are recognized in the period earned.

In December 1999, the Securities and Exchange Commission issued Staff Accounting Bulletin No.101 ("SAB101"), "Revenue Recognition in Financial Statements". SAB101, as amended, summarizes certain of the SEC's views in

Edgar Filing: KOMATSU LTD - Form 20-F

applying generally accepted accounting principles to revenue recognition and provides guidance on revenue recognition issues. The companies adopted SAB101 in the year ended March 31, 2001 and adoption of this guidance did not have a material impact on the consolidated financial position or results of operation.

In fiscal 2001, Komatsu Construction Ltd., a consolidated subsidiary, was sold by the Company to a third party engaged in construction operation in Japan. Related income from short-term construction contracts and long-term construction contracts was generally recognized under the completed-contract method and the percentage-of-completion method, respectively, prior to the sale of that consolidated subsidiary.

(7) Income Taxes

In accordance with SFAS No. 109, "Accounting for Income Taxes," the deferred tax provision is determined by the asset and liability method. Under this method, deferred tax assets and liabilities are recognized based on temporary differences between financial statement and tax bases of assets and liabilities using enacted tax rates as of each balance-sheet date. On March 31, 1999, new income tax rates, effective April 1, 1999, were enacted. The effect on deferred tax assets and liabilities of changes in tax rates was recognized in income on the enactment date.

The companies compute and record income taxes currently payable based on their separate determinations of taxable income which may be different from accounting income.

Provision for income taxes is not recorded for undistributed earnings of foreign subsidiaries and affiliated companies because the Company considers that such earnings are permanently reinvested and/or would not result in material additional taxation should they be distributed to the Company under current circumstances.

(8) Postretirement Benefits

The defined benefit plans are accounted for in accordance with SFAS No. 87, "Employers' Accounting for Pensions," except for certain subsidiaries' pension plans which in the aggregate are not significant. Certain domestic subsidiaries also have local severance payment plans under which accrued severance liabilities are stated on the vested benefits obligation basis, which is the amount required to be paid if all eligible employees voluntarily terminated their employment as of the balance-sheet date.

The Company adopted SFAS No. 132, "Employers' Disclosure about Pensions and Other Postretirement Benefits,"

-40-

in the year ended March 31, 1999. SFAS No. 132 revised employers' disclosures about pension and other postretirement benefit plans. SFAS No. 132 did not change the recognition or measurement of those plans and did not affect the Company's consolidated financial position and results of operations.

(9) Free Share Distribution

The Commercial Code of Japan permits Japanese companies, upon approval by the Board of Directors, to issue shares, in the form of a stock split, to shareholders to the extent that the aggregate par value of the shares to be distributed does not exceed the excess of the common stock account over the par value of shares issued and outstanding (Note 11).

(10) Per Share Data

Basic net income (loss) per share has been computed by dividing net income (loss) by the weighted-average number of common shares outstanding during each

Edgar Filing: KOMATSU LTD - Form 20-F

fiscal year, after deducting treasury shares. Diluted net income (loss) per share reflects the potential dilution and has been computed on the basis that all convertible bonds were converted at the beginning of the year to the extent that it is not antidilutive.

Dividends per share shown in the accompanying consolidated statements of income have been presented on an accrual basis and include, in each fiscal year ended March 31, dividends approved or to be approved by shareholders after such date, but applicable to the year then ended.

(11) Consolidated Statements of Cash Flows

For the purposes of the consolidated statements of cash flows, cash and cash equivalents include highly liquid investments with an original maturity of three months or less to be cash equivalents.

(12) Derivative Financial Instruments

The companies use various derivative financial instruments to manage their interest rate and foreign currency exchange exposure. In determining whether these instruments qualify as a hedge, the companies use hedge criteria that include their effectiveness to reduce risk, specific identification of the asset or liability being hedged and the time horizon being hedged.

Financial Instruments Qualifying as Hedge

The companies enter into interest rate swap and cap agreements as a means of managing their rate exposures. Interest differentials on those interest rate swaps are accrued as interest rate change over the contract period. Premiums paid for interest rate caps are amortized over the life of contracts and are expensed as a part of interest expense.

The companies also enter into forward exchange contracts and swaps to hedge foreign currency exposure arising from foreign currency assets and liabilities and sales commitments.

Gains and losses on the foreign exchange contracts are recognized based on changes in exchange rates, and are offset by corresponding foreign exchange gains or losses on such assets and liabilities being hedged.

Gains and losses on the forward exchange contracts to hedge foreign currency commitments are deferred and included in the measurement of the related transactions, unless it is estimated that such deferral would lead to recognizing losses in later periods.

Financial Instruments Not Qualifying as Hedge

In May 1999, the Company entered into interest rate swap contracts with the notional amount of (Yen)40,000 million as a means of managing the Company and its group companies' interest rate exposures. During fiscal 2001, a consolidated subsidiary also entered into interest rate swap contract with the notional amount of (Yen)600 million (\$4,762 thousand) for the purpose of managing interest rate exposure of future borrowing. Those contracts did not meet the hedge criteria. Accordingly, those interest rate swaps were recorded in the accompanying consolidated balance sheets at their fair value as of March 30, 2001 and March 31, 2000, and the resultant losses of (Yen)365 million (\$2,897 thousand) and gains of (Yen)401 million from those interest rate swaps were recognized in the accompanying consolidated statements of income for the year ended March 31, 2001 and 2000, respectively.

(13) Impairment of Long-Lived Assets and Long-Lived Assets to be Disposed of

In accordance with SFAS No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed of," the long-lived assets and certain identifiable intangibles to be held and used by the companies are reviewed for impairment based on a cash flow analysis of related operations

Edgar Filing: KOMATSU LTD - Form 20-F

whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Long-lived assets and certain identifiable intangibles to be disposed of are reported at the lower of carrying amount or fair value less cost to sell.

In fiscal 2001 and 2000, the Company recorded impairment losses on long-lived asset, related to temporarily idle production facilities due to the sluggish market, at its wholly owned subsidiary in the electronics segment. Such impairment losses were calculated using the best estimate of discounted future cash flows based on the assumption to continue its operation. However, because of uncertainties in management's best estimate of future cash flows based on the assumption to continue its operation, the actual result with regard to losses of long-lived assets may have a materially unfavorable impact on the Company if the assumption of cash flow projection is changed in future.

On November 9, 1998, the Company announced its plans to restructure the domestic manufacturing plants for construction equipment, which also covered some of the group companies. Under such plans, the Company has been combining the manufacturing facilities of certain manufacturing plants of the Company and certain consolidated subsidiaries in order to achieve optimal manufacturing operations by improving the productivity of manufacturing through disposal of certain properties on a consolidated basis. This restructuring plan was completed during the year ended March 31, 2001.

-41-

As part of this restructuring plan, specified manufacturing facilities of certain consolidated subsidiaries were disposed of during fiscal 2000. Disposal losses of (Yen)196 million and (Yen)1,000 million were charged to income in fiscal 2000 and 1999, respectively.

(14) Comprehensive Income

The Company adopted SFAS No. 130, "Reporting Comprehensive Income," in the year ended March 31, 1999. Comprehensive income consists of net income, changes in foreign currency translation adjustments, net unrealized holding gains on securities available for sale and pension liability adjustments, and is included in the consolidated statements of shareholders' equity. SFAS No. 130 requires only additional disclosures in the consolidated financial statements and does not affect the Company's consolidated financial position and results of operations.

(15) Use of Estimates

The Company's management has made a number of estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, including impairment losses of long-lived assets and the disclosures of fair value of financial instruments and contingent assets and liabilities to prepare these financial statements in conformity with generally accepted accounting principles. Actual results could differ from the estimates and assumptions.

(16) New Accounting Standards

In September 2000, the Financial Accounting Standards Board ("FASB") issued SFAS No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities," a replacement of SFAS No. 125. SFAS No. 140 revises the standards for accounting for securitizations and requires certain disclosures. SFAS No. 140 is effective for all transfers of financial assets occurring after March 31, 2001, and for disclosures relating to securitization transactions for fiscal years ending after December 15, 2000. The effect of adopting SFAS No. 140 has been disclosed in Note 3.

In June 1998, FASB issued SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities as amended, in June 2000, by SFAS No. 138,

Edgar Filing: KOMATSU LTD - Form 20-F

"Accounting for Certain Derivative Instrument and Certain Hedging Activities, an amendment of FASB Statement No. 133." SFAS No. 133, as amended, establishes accounting and reporting standards for derivative instruments and hedging activities. SFAS No. 133 requires, as amended, that an entity recognize all derivatives as either assets or liabilities in the balance sheet and measure those instruments at fair value. Changes in the fair value of derivatives are recorded each period in current earnings or other comprehensive income (loss), depending on whether a derivative is designated as part of a hedge transaction and, if it is, depending on the type of hedge transaction. The ineffective portion of all hedges will be recognized in earnings. SFAS No. 133, as amended by SFAS No. 138, is effective for fiscal year beginning after June 15, 2000. The Company adopted SFAS No. 133 and 138 for the year beginning April 1, 2001. As of April 1, 2001, the adoption of the new accounting resulted in immaterial impact to net income and a decrease to other comprehensive income (loss) of approximately (Yen)670 million (\$5,317 thousand).

2. Supplemental Cash Flow Information

Additional cash flow information and noncash investing and financing activities for the years ended March 31, 2001, 2000 and 1999, are as follows:

	Millions of y	
	2001	2000
Additional cash flow information:		
Interest paid.....	(Yen) 22,385	(Yen) 25,007
Income taxes paid.....	18,311	20,922
Noncash investing and financing activities:		
Assets and liabilities of newly consolidated subsidiaries in fiscal 2001, 2000 and 1999 (Note 6):

Decrease of postretirement obligation.....	(11,250)	--
Capital lease obligations incurred.....	19,264	--

-42-

3. Trade Notes and Accounts Receivable

Edgar Filing: KOMATSU LTD - Form 20-F

The Company and certain of its consolidated subsidiaries follow the practice of including installment and lease receivables due after one year (less unearned interest) in current assets. Receivables due after one year (less unearned interest) amounted to (Yen)67,243 million (\$533,675 thousand) and (Yen)56,874 million at March 31, 2001 and 2000, respectively.

Lease receivables represent receivables from customers for equipment leased by Komatsu Forklift Co., Ltd., which became a consolidated subsidiary in fiscal 2001. These leases are accounted for as sales-type leases in conformity with SFAS No. 13. Revenue from sales-type leases are recognized at the inception of the lease.

At March 31, 2001, lease receivables comprised the following:

	Millions of yen	Thousands of U.S. dollars
	2001	2001
Minium lease payments receivable.....	(Yen)16,624	\$ 131,937
Unearned income.....	(1,536)	(12,190)
Net lease receivables.....	(Yen)15,088	\$ 119,747

The Company adopted SFAS No. 140 from fiscal 2001. The Company and its consolidated subsidiaries sold trade notes and accounts receivable of (Yen)282,431 million (\$2,241,516 thousand) in securitization transactions during fiscal 2001 and the related balance of outstanding sold notes and accounts receivable as of March 31, 2001 amount to (Yen)127,155 million (\$1,009,167 thousand). The receivables are removed from the accompanying consolidated balance sheet and gross gain or loss is recognized for the difference between the proceeds received and the net carrying value of the receivables sold.

The Company and its consolidated subsidiaries retain servicing responsibilities, however no contractual servicing fees are received from the third parties. The investors and the securitization trusts have no or limited recourse rights to the Company and its consolidated subsidiaries' assets in case of debtors' default. Appropriate reserves have been established for potential losses relating to the limited recourse of the sold receivables. Also the Company and its consolidated subsidiaries except for a certain U.S. subsidiary, as a transferor do not retain any interest in the receivables sold.

A certain U.S. subsidiary retains the right to receive excess spread results from the difference between the yield on the underlying receivables sold and the interest paid on the underlying securities issued, of which the fair value is subject to credit and prepayment risks on the transferred assets and amounted to approximately (Yen)539 million (\$4,278 thousand) under the following key economic assumptions for fiscal 2001.

Weighted-average life.....	48 months
Prepayment speed over the life.....	1.4%
Expected credit losses over the life.....	1.3%
Discount rate on cash flow.....	6.6%
Variable returns to transferee.....	5.9%

In fiscal 2001, the Company and its consolidated subsidiaries recognized net gains or losses from these securitizations of receivables, which were not material.

4. Inventories

Edgar Filing: KOMATSU LTD - Form 20-F

At March 31, 2001 and 2000, inventories comprised the following:

	Millions of yen	

	2001	

Finished products, including finished parts held for sale.....	(Yen) 171,600	(Ye
Work in process.....	52,162	
Materials and supplies.....	32,039	

Total.....	(Yen) 255,801	(Ye

5. Investment Securities

Investment securities at March 31, 2001 and 2000, primarily consisted of securities available for sale.

The cost, gross unrealized holding gains and losses, and fair value for such investment securities by major security types at March 31, 2001 and 2000, are as follows:

	Millions of yen		

	Gross unrealized holding		

	Cost	Gains	Losses

At March 31, 2001			
Investment securities available for sale:			
Marketable debt securities.....	(Yen) 965	(Yen) --	(Yen) --
Marketable equity securities.....	39,876	16,072	1,377
Other investment securities.....	13,249	--	--

	(Yen) 54,090	(Yen) 16,072	(Yen) 1,377

-43-

Marketable equity securities.....	61,239	45,170	
Other investment securities.....	10,643	--	

Edgar Filing: KOMATSU LTD - Form 20-F

(Yen) 71,992 (Yen) 45,178 (Yen)

	Thousands of U.S.		
At March 31, 2001			
Investment securities available for sale			
Marketable debt securities.....	\$ 7,659	\$ --	\$ --
Marketable equity securities.....	316,476	127,556	
Other investment securities.....	105,151	--	
	\$ 429,286	\$ 127,556	\$ --

Maturities of marketable debt securities at March 31, 2001 and 2000 primarily fall within five years.

Unrealized holding gains and losses are included as a component of shareholders' equity until realized.

Proceeds from the sales of marketable securities and investment securities available for sale were (Yen)54,621 million (\$433,500 thousand), (Yen)137,278 million and (Yen)50,929 million for the years ended March 31, 2001, 2000 and 1999, respectively.

Net realized gains (losses) on the sales of marketable securities and investment securities available for sale during the years ended March 31, 2001, 2000 and 1999, amounted to (Yen)11,991 million (\$95,167 thousand), (Yen)16,993 million and (Yen)(4,679) million, respectively. They were included in the determination of net income. The cost of the marketable securities and investment securities sold was computed based on the average-cost method.

In fiscal 2001, the Company contributed certain marketable equity securities, not those of its subsidiaries and affiliated companies, to an employee retirement benefit trust fully administrated and controlled by an independent bank trustee, with no cash proceeds thereon. The transfer of the available-for-sale securities has been accounted for as a sale in accordance with SFAS No. 140 (a replacement of SFAS No. 125), and accordingly, the recorded pension liability has been reduced by the fair market value of the transferred securities. The fair market value of those securities at the time of contribution was (Yen)11,250 million (\$89,286 thousand), and net realized gain of (Yen)1,955 (\$15,516 thousand) from the transfer of those securities was recognized and included in interest and other income in the accompanying consolidated statement of income for the year ended March 31, 2001.

6. Investments in and Advances to Affiliated Companies

At March 31, 2001 and 2000, investments in and advances to affiliated companies comprised the following:

	Millions of yen		Thousands U.S. dolla
	2001	2000	2001
Investments in capital stock.....	(Yen)19,603	(Yen)26,635	\$ 155,57
Advances.....	4,928	211	39,11
Total.....	(Yen)24,531	(Yen)26,846	\$ 194,69

Edgar Filing: KOMATSU LTD - Form 20-F

As of March 31, 2000, the companies owned a 39.2% interest in Komatsu Forklift Co., Ltd., a public company in Japan which manufactured and distributed forklift products. The carrying value of the companies' investment as of March 31, 2000, was (Yen)14,903 million, with corresponding quoted market values of (Yen)5,228 million. In fiscal 2001, the Company acquired additional shares of Komatsu Forklift Co., Ltd. and increased its ownership interest from 39.2% to 50.8%. As a result, Komatsu Forklift Co., Ltd. became a consolidated subsidiary of the Company in fiscal 2001.

Dividends received from affiliated companies were (Yen)515 million (\$4,087 thousand), (Yen)324 million and (Yen)25 million during the years ended March 31, 2001, 2000 and 1999, respectively.

Trade notes and accounts receivable from affiliated companies at March 31, 2001 and 2000, were (Yen)47,712 million (\$378,667 thousand) and (Yen)44,050 million, respectively.

Short-term loans receivable from affiliated companies at March 31, 2001 and 2000, were (Yen)16,447 million (\$130,532 thousand) and (Yen)19,200 million, respectively.

-44-

Trade notes and accounts payable to affiliated companies at March 31, 2001 and 2000, were (Yen)5,819 million (\$46,183 thousand) and (Yen)5,506 million, respectively.

Net sales for the years ended March 31, 2001, 2000 and 1999, included net sales to affiliated companies in the amounts of (Yen)75,634 million (\$600,270 thousand), (Yen)83,001 million and (Yen)87,643 million, respectively.

Summarized financial information for affiliated companies at March 31, 2001 and 2000, and for the years ended March 31, 2001, 2000 and 1999, is as follows:

	Millions of yen	
	2001	2000
Current assets.....	(Yen)149,589	(Yen)155,
Net property, plant and equipment.....	45,669	60,
Other assets.....	13,914	32,
Total assets.....	(Yen)209,172	(Yen)249,
Current liabilities.....	(Yen)145,629	(Yen)153,
Noncurrent liabilities.....	23,734	21,
Shareholders' equity.....	39,809	74,
Total liabilities and shareholders' equity.....	(Yen)209,172	(Yen)249,

	Millions of yen		
	2001	2000	1999
Net sales.....	(Yen)240,256	(Yen)271,831	(Yen)259,

Edgar Filing: KOMATSU LTD - Form 20-F

 Net income (loss)..... (Yen) 2,424 (Yen) 8,259 (Yen) (15,

The summarized financial information as of and for the years ended March 31, 2000 and 1999 included the accounts of Komatsu Forklift Co., Ltd. and three other companies, which were newly consolidated in fiscal 2001. The aggregated total assets and shareholder's equity of these companies as of March 31, 2000 amounted to (Yen)78,510 million and (Yen)44,916 million, respectively. The aggregated net sales of these companies for the year ended March 31, 2000 and 1999 amounted to (Yen)63,369 million and (Yen)64,497 million, and the aggregated net loss of these companies amounted to (Yen)323 million and (Yen)4,240 million, respectively.

Also, the summarized financial information for the year ended March 31, 1999 included the accounts of Komatsu Zenoah Co., Komatsu Mining Germany GmbH, and three other companies, which were newly consolidated in fiscal 1999. The aggregate net sales and net losses of those consolidated companies for the year ended March 31, 1999 would have amounted to (Yen)79,385 million and (Yen)717 million, respectively, if those companies were consolidated subsidiaries at the beginning of fiscal 1999. The impact on net loss per share would not have been material if those companies were consolidated at the beginning of fiscal 1999.

The summarized financial information as of and for the years ended March 31, 2001 included the accounts of Komatsu Soft Ltd., which became an affiliated company from a consolidated subsidiary at the beginning of the fiscal 2001. The aggregated total assets and shareholders' equity of the affiliated company as of March 31, 2001 amounted to (Yen)9,844 million (\$78,127 thousand) and (Yen)4,245 million (\$33,690 thousand), respectively, and aggregated net sales and net income for the year ended March 31, 2001 amounted to (Yen)20,322 million (\$161,286 thousand) and (Yen)367 million (\$2,913 thousand), respectively.

7. Property, Plant and Equipment

 The major classes of property, plant and equipment at March 31, 2001 and 2000, are as follows:

	Millions of yen	
	2001	2000
Land.....	(Yen) 75,135	(Yen) 58,856
Buildings.....	304,925	270,961
Machinery and equipment.....	602,767	533,075
Construction in progress.....	44,736	56,252
Total.....	1,027,563	919,144
Less: accumulated depreciation.....	(588,768)	(521,610)
Net property, plant and equipment.....	(Yen) 438,795	(Yen) 397,534

8. Pledged Assets

Edgar Filing: KOMATSU LTD - Form 20-F

At March 31, 2001, assets pledged as collateral for short-term debt, long-term debt and guarantee for debt are as follows:

	Millions of y
Time deposits.....	(Yen) 81
Trade notes and accounts receivable.....	13
Property, plant and equipment--Less accumulated depreciation.....	32,87
Total.....	(Yen) 33,82

The above pledged assets were classified by type of liabilities to which they relate as follows:

	Millions of y
Liabilities appearing in the consolidated balance sheets as:	
Short-term debt.....	(Yen) 1,51
Long-term debt.....	31,31
Guarantee for debt.....	99
Total.....	(Yen) 33,82

9. Short-Term and Long-Term Debt

Short-term debt primarily consisted of short-term bank loans. The weighted-average annual interest rates applicable to short-term debt outstanding at March 31, 2001 and 2000, were 4.1% and 2.4%, respectively. The Company and certain consolidated subsidiaries have unused committed lines of credit amounting to (Yen)54,836 million (\$435,206 thousand) with certain financial institutions at the end of fiscal 2001.

Long-term debt at March 31, 2001 and 2000, consisted of the following:

	Millions
	2001
Long-term debt with collateral (Note 8):	
Banks, insurance companies and other financial institutions, maturing serially through 2001-2014, weighted-average rate 5.5%	
Government-owned banks and government agencies.....	(Yen) 14,035
Other.....	7,196
Long-term debt without collateral:	
Banks, insurance companies and other financial institutions,	

Edgar Filing: KOMATSU LTD - Form 20-F

maturing serially through 2001-2022, weighted-average rate 3.3%.....	85,824
Euro Medium-Term Notes with various interest rates maturing serially through 2001-2009.....	65,020
6.9% Senior Notes due 2003 (payable in U.S. dollars).....	13,426
1.8% Convertible Unsecured Bonds due 2004.....	27,447
7.0% Senior Notes due 2005 (payable in U.S. dollars).....	8,147
1.9% Unsecured Bonds due 2006.....	35,000
Capital lease obligations (Note 14).....	15,193
Other.....	1,087
<hr/>	
Total.....	272,375
Less: current maturities.....	(34,026)
<hr/>	
Long-term debt.....	(Yen)238,349
<hr/>	

The conversion price per share of the 1.8% convertible unsecured bonds at March 31, 2001, was (Yen)971.2, which was subject to adjustments under certain conditions. These bonds are redeemable anytime before maturity at the option of the Company, at the initial redemption price of 103% of the principal as of March 31, 2001.

In 1996, the Company, Komatsu Finance America Inc., and Komatsu Finance (Netherlands) B.V. (the "Issuers") registered the US\$1.0 billion Euro Medium-Term Note Program on the London Stock Exchange. On April 1, 1999, the registered amounts of Euro Medium-Term Notes Program were increased to US\$1.2 billion. On March 31, 2000, Komatsu Australia Holdings Pty. Ltd., formerly Komatsu Australia Pty. Ltd. was added as an issuer under the Program. Under the Program, each of the issuers may from time to time issue notes denominated in any currency as may be agreed between the relevant issuers and dealers. Komatsu Finance America Inc. issued (Yen)7,000 million (\$55,556 thousand) and US\$0 million during fiscal 2001,

-46-

and (Yen)29,800 million and US\$0 million during fiscal 2000 of Euro Medium-Term Notes with various interest rates and maturity dates. Komatsu Finance (Netherlands) B.V. issued (Yen)1,707 million (\$13,548 thousand) during fiscal 2001, and (Yen)8,139 million during fiscal 2000 of Euro Medium-Term Notes with various interest rates and maturity dates. To offset market risk exposure arising from changes in foreign exchange rates and interest rates on debts under the Program, cross-currency interest rate swap and interest rate swap contracts are utilized. The cross-currency interest rate swap contracts effectively convert yen-denominated debts and related interest into U.S. dollar and Euro obligations.

U.S. dollar interest rates are based on three month LIBOR with borrowing spreads of LIBOR minus 0.10% to LIBOR plus 0.59% for the years ended March 31, 2001 and 2000, respectively, depending upon the contract. The floating interest rates for fiscal 2001 and 2000 ranged from 6.39% to 7.34% and 4.87% to 6.69%, respectively.

The companies have also entered into interest rate and currency swap agreements for certain long-term debts (Note 18).

As is customary in Japan, substantially all bank loans are made under agreements which provide that the banks may require, under certain conditions, the borrower to provide collateral, additional collateral or guarantors for its loans.

Lending banks have a right to offset cash deposited with them against any debt or obligation that becomes due and, in the case of default and certain other specified events, against all other debt payable to the banks.

Edgar Filing: KOMATSU LTD - Form 20-F

Under certain loan agreements, the lender may require the borrower to submit proposals for the payment of dividends and other appropriations of earnings for the lender's review and approval before presentation to the shareholders. The companies have never received such a request.

Annual maturities of long-term debt subsequent to March 31, 2001, are as follows:

Year ending March 31	Millions of yen	Thousands of U.S. dollars
2002.....	(Yen) 34,026	\$ 270,048
2003.....	53,419	423,960
2004.....	88,427	701,802
2005.....	19,918	158,080
2006.....	54,826	435,127
2007 and thereafter.....	21,759	172,690
Total.....	(Yen) 272,375	\$2,161,707

10. Liability for Pension and Other Postretirement Benefits

The Company's employees, with certain minor exceptions, are covered by a severance payment and pension plan. The plan provides that 70% of the employee benefits are payable as a pension payment, commencing upon retirement at age 60 (mandatory retirement age) and that the remaining benefits are payable as a lump-sum severance payment based on remuneration, years of service and certain other factors at the time of retirement. The plan also provides for lump-sum severance payments, payable upon earlier termination of employment. The Company's funding policy is to contribute semiannually the amounts to provide not only for benefits attributed to service to date but also for those expected to be earned in the future.

Net periodic cost of the Company's plan for the years ended March 31, 2001, 2000 and 1999, included the following components:

	Millions of	
	2001	2000
Service cost--Benefits earned during the year.....	(Yen) 4,768	(Yen) 5,122
Interest cost on projected benefit obligation.....	3,826	3,907
Expected return on plan assets.....	(1,521)	(1,294)
Net amortization and deferral.....	1,782	2,834
Net periodic cost.....	(Yen) 8,855	(Yen) 10,569

The reconciliations of beginning and ending balances of the benefit obligations and the fair value of the plan assets of the Company's plan are as follows:

Assumptions used in determining costs of the Company's plan and the funded status information shown above are as follows:

	2001	2000	1999
Weighted-average discount rate	3.1%	3.1%	3.1%
Rate of increase in future compensation levels	2.3%	2.1%	2.4%
Expected long-term rate of return on plan assets	1.9%	2.3%	2.1%

As described in Note 5, the Company contributed certain marketable equity securities to an employee retirement benefit trust in fiscal 2001. The securities held in this trust are qualified as plan assets under SFAS No.87.

Certain foreign subsidiaries have various funded pension plans, of which the plan assets and the projected benefit obligations are calculated under the provisions of SFAS No. 87. The aggregated fair value of plan assets as of March 31, 2001 and 2000, was approximately (Yen)12,634 million (\$100,270 thousand) and (Yen)8,297 million, respectively, and the aggregated benefit obligations as of March 31, 2001 and 2000, were approximately (Yen)10,767 million (\$85,452 thousand) and (Yen)7,865 million, respectively. Discount rates of 3.0% to 10.0% and expected long-term rates of return on plan assets of 7.0% to 9.0% were used as assumptions in determining the actuarial value of benefit obligations for the years ended March 31, 2001, 2000 and 1999.

Certain domestic subsidiaries also have unfunded severance payment plans and/or pension plans similar to those of the Company for their employees with estimated projected benefit obligations of approximately (Yen)20,000 million (\$158,730 thousand), and estimated accumulated benefit obligations of approximately (Yen)17,000 million (\$134,921 thousand) as of March 31, 2001 which were approximately equal to the aggregated fair value of plan assets and accruals. The amounts of net periodic costs of certain foreign and domestic subsidiaries for the years ended March 31, 2001, 2000 and 1999, were (Yen)5,476 million (\$43,460 thousand), (Yen)2,945 million and (Yen)2,901 million, respectively.

Directors of the Company and domestic subsidiaries are primarily covered by unfunded retirement allowances plans.

Under the unfunded plans described in the preceding paragraphs, the amounts required if all employees and directors had voluntarily terminated their employment at each balance-sheet date are fully accrued. The payments to directors are subject to shareholders' approval.

During fiscal 1999, the Company and certain consolidated subsidiaries offered retirement incentive programs to employees. Expenses of (Yen)215 million and (Yen)6,476 million under this program were charged to income in fiscal 2000 and 1999, respectively, and paid or accrued severance payments for the employees who had accepted their entitlement to such programs up to March 31, 1999.

Total expenses of all severance-payment and pension plan premiums charged to income for the years ended March 31, 2001, 2000 and 1999, were (Yen)15,033 million (\$119,310 thousand), (Yen)14,140 million and (Yen)17,015 million, respectively. Total expenses of all severance payments for the years ended March 31, 2000 and 1999 included the additional severance payment under the retirement incentive programs paid up to March 31, 2000.

Certain foreign subsidiaries have postretirement benefit plans other than pensions, which are primarily not funded. The accumulated postretirement benefit obligation at March 31, 2001 and 2000, was (Yen)6,413 million (\$50,897 thousand)

-48-

and (Yen)3,714 million, respectively, and the accrued post-retirement benefit obligation at March 31, 2001 and 2000, was (Yen)3,512 million (\$27,873 thousand) and (Yen)2,955 million, respectively. The amounts of net periodic post-retirement benefits other than pensions for the years ended March 31, 2001, 2000 and 1999, were not material.

11. Shareholders' Equity

(1) Common Stock and Capital Surplus

Under the Commercial Code of Japan ("the Code"), certain issuance of common shares, including conversions of debt issued and exercises of warrants, are required to be credited to the common stock account for at least the greater of par value or 50% of the proceeds.

Edgar Filing: KOMATSU LTD - Form 20-F

The Code permits, upon approval of the Board of Directors, transfer of amounts from capital surplus to the common stock. Pursuant to resolutions of the Board of Directors, the Company from time to time has made free share distributions (Note 1). Such free share distributions have been accounted for by a transfer from capital surplus to common stock of the aggregate par value of shares issued or no change in common stock and capital surplus. Publicly owned corporations in the United States issuing shares in similar transactions would be required to account for them as stock dividends as of the shareholders' record date by reducing retained earnings and increasing appropriate capital accounts by an amount equal to the fair value of the shares issued.

If such United States practice had been applied to the cumulative free distributions made by the Company, capital surplus at March 31, 2001, would have been increased by (Yen)103,189 million (\$818,960 thousand) with a corresponding decrease in unappropriated retained earnings. If all convertible bonds were converted at March 31, 2001, 28,260,914 shares of the Company's common stock would be issuable. At March 31, 2001 and 2000, affiliated companies owned 1,575,357 and 4,368,021 shares of the Company's common stock, respectively.

(2) Retirement of the Company's Outstanding Shares

The Code permits a company to retire a portion of its outstanding shares upon approval of the shareholders at the annual general shareholders' meeting or of the Board of Directors if stipulated in the Articles of Corporation. On November 10, 1997, the Board of Directors passed a resolution approving the purchase and the retirement of the outstanding shares of the Company up to a maximum aggregate acquisition cost of (Yen)10,000 million and up to a maximum of 15,000,000 shares.

By March 31, 1999, the Company purchased 15,000,000 shares based on the resolution of the Board of Directors on November 10, 1997, and had retired shares totaling (Yen)9,203 million in 1998 and (Yen)570 million in 1999.

On May 2, 2000, the Board of Directors passed a resolution approving the purchase and retirement of outstanding shares of the Company up to a maximum aggregate acquisition cost of (Yen)7,000 million (\$55,556 thousand) and up to a maximum of 10,000,000 shares before the close of the next general shareholders' meeting in 2001 as permitted by the Company's Articles of Corporation.

By May 17, 2000, the Company purchased and retired 10,000,000 shares having a market value of (Yen)6,340 million (\$50,317 thousand) based on the resolution of the Board of Directors on May 2, 2000.

(3) Appropriated for Legal Reserve

The Code provides that an amount at least equal to 10% of all cash payments which are made as an appropriation of retained earnings applicable to each fiscal period shall be appropriated as a legal reserve until such reserve equals 25% of the stated amount of capital stock. Legal reserve may be used to eliminate or reduce a deficit by resolution of the shareholders or may be transferred to common stock by resolution of the Board of Directors.

(4) Unappropriated Retained Earnings and Dividends

The amount of retained earnings available for dividends under the Code is based on the amount recorded in the Company's general books of account maintained in accordance with generally accepted Japanese accounting practices. The adjustments included in the accompanying financial statements but not recorded in the general books of account, as explained under "Basis of Financial Statements" in Note 1, have no effect on the determination of retained earnings available for dividends under the Code. In addition to the Code provision requiring an appropriation for legal reserve as discussed above, the Code imposes certain limitations on the amount of retained earnings available for dividends. Retained earnings of (Yen)264,970 million (\$2,102,937 thousand), included in the Company's general books of account as of March 31, 2001, is not restricted by the limitations under the Code.

The Code permits transfers, upon approval of shareholders, of a portion of unappropriated retained earnings available for dividends to capital stock account without issuance of any shares. Dividends are approved by the

Edgar Filing: KOMATSU LTD - Form 20-F

shareholders at the meeting held subsequent to the statutory fiscal period to which the dividends are applicable. A semiannual interim dividend payment may be made by resolution of the Board of Directors. Such dividends are payable to shareholders of record at the end of each such fiscal or interim six-month period.

On June 27, 2001, the shareholders authorized payment of a cash dividend totaling (Yen)2,866 million (\$22,746 thousand) to shareholders of record on March 31, 2001. In accordance with the Code, the declaration of this dividend has not been reflected in the consolidated financial statements as of March 31, 2001. Dividends are reported in the Consolidated Statements of Shareholders' Equity when paid.

-49-

(5) Stock Option Plan

On June 28, 2000, the shareholders authorized the acquisition of 1,200,000 shares of the Company's common stock for the total consideration not exceeding (Yen)1,000 million (\$7,937 thousand) during the period up to the close of the following annual general shareholders' meeting in fiscal 2001. On June 29, 1999, the shareholders authorized the acquisition of 1,200,000 shares of the Company's common stock for the total consideration not exceeding (Yen)1,200 million during the period up to the close of the following annual general shareholders' meeting in fiscal 2000. On June 26, 1998, the shareholders authorized the acquisition of 1,000,000 shares of the Company's common stock for the total consideration not exceeding (Yen)1,000 million during the period up to the close of the following annual general shareholders' meeting in fiscal 1999. The Company intends to transfer such treasury shares to directors and certain employees under an agreement granting the right for them to request such transfers at a predetermined price. The purchase price is set to equal an amount obtained by multiplying by 1.05 an average of the closing prices applicable to ordinary transactions of shares of the Company on the Tokyo Stock Exchange on all days for a month immediately preceding the month in which the date of grant of the right falls, provided that the exercise price shall not be less than the closing price of the shares of the Company on the Tokyo Stock Exchange at the date of the grant. Based on the resolutions of the shareholders' meeting on June 28, 2000, and June 29, 1999 and June 26, 1998, the Company acquired 1,200,000 shares, 1,200,000 shares and 1,000,000 shares of its common stock from the market for the plan during the years ended March 31, 2001, 2000 and 1999, respectively. The options vest 100% on each of the grant dates and were and will be exercisable from July 1, 2001, 2000 and 1999, respectively.

SFAS No. 123, "Accounting for Stock-Based Compensation," defines a fair value based method of accounting for a stock option. This statement gives entities a choice of recognizing related compensation expense by adopting the new fair value method or to continue to measure compensation using the intrinsic value approach under APB Opinion No. 25 ("Accounting for Stock Issued to Employees"), the former standard. The Company chose to use the intrinsic value measurement prescribed by APB Opinion No. 25 and no additional compensation cost was incurred in fiscal 2001, 2000 and 1999. Had compensation cost for the Company's stock option plans been determined consistent with SFAS No. 123, the Company's net income (loss) and net income (loss) per share for the years ended March 31, 2001, 2000 and 1999 would have been as follows:

	Millions of yen		
	2001	2000	1999
Net income (loss).....	(Yen) 6,637	(Yen) 13,451	(Yen) (12,64)

Edgar Filing: KOMATSU LTD - Form 20-F

	Yen		
	2001	2000	1999
Net income (loss) per share			
Basic.....	(Yen) 6.95	(Yen) 13.60	(Yen) (13.0)
Diluted.....	6.95	13.51	(13.0)

1.8% Japanese yen convertible bonds, due 2004, was excluded from the diluted net income (loss) per share calculation for fiscal 2001 and 1999 because the effect would have been antidilutive.

The following table summarizes information about stock option activity for fiscal 2001 and 2000:

	Number of shares	Weighted average exercise price		Weighted average remaining
		Yen	U.S. dollars	
Outstanding at March 31, 1999.....	1,000,000	(Yen) 700		
Granted.....	1,200,000	(Yen) 820		
Exercised.....	--	--		
Cancelled or Expired.....	(20,000)	(Yen) 820		
Outstanding at March 31, 2000.....	2,180,000	(Yen) 765		
Granted.....	1,200,000	(Yen) 758	\$ 6.02	
Exercised.....	(10,000)	(Yen) 700	\$ 5.56	
Cancelled or Expired.....	--	--		
Outstanding at March 31, 2001.....	3,370,000	(Yen) 763	\$ 6.06	4.22
[Exercisable at March 31, 2000].....	1,000,000	(Yen) 700		
[Exercisable at March 31, 2001].....	2,170,000	(Yen) 765	\$ 6.07	

-50-

The fair value of these stock options was estimated using the Black-Scholes option pricing model under the following assumptions:

	2001	2000	1999
Grant-date fair value.....	(Yen) 230 (\$1.83)	(Yen) 207	(Yen) 270
Expected life.....	6 years	6 years	6 years

Deferred gains on sales of property for tax purposes.....	21,156	
Other.....	5,073	
	(Yen) 35,959	(Ye
=====		

The net change in the total valuation allowance for the years ended March 31, 2001 and 2000, was a decrease of (Yen)575 million (\$4,563 thousand) and an increase of (Yen)139 million, respectively.

Income taxes in Japan applicable to the companies, imposed by the national, prefecture and municipal governments, in the aggregate result in a normal statutory tax rate of approximately 41.7% for the year ended March 31, 2001 and 2000, and 47.0% for the year ended March 31, 1999. However, due to a change in Japanese income tax regulations, effective April 1, 1999, the normal statutory tax rate was reduced to approximately 41.7% and such a rate was used in calculating the deferred taxes at March 31, 2001, 2000 and 1999.

The overall effective tax rates reflected in the consolidated statements of income (income taxes as a percentage of income (loss) before income taxes, minority interests and equity in earnings) for the years ended March 31, 2001, 2000 and 1999, were 68.4%, 51.3% and 21.5%, respectively.

The differences between the normal tax rates and the effective tax rates for the years ended March 31, 2001, 2000 and 1999, are summarized as follows:

	2001

Normal tax rate.....	41.7%
Increase (decrease) in tax rates resulting from:	
Operating losses of subsidiaries.....	23.1
Expenses not deductible for tax purposes.....	6.6
Realization of tax benefits on operating losses of subsidiaries.....	(1.3)
Income of foreign subsidiaries taxed at lower than Japanese normal rate.....	(5.0)
Effect of tax rate change.....	--
Other, net.....	3.3

Effective tax rate.....	68.4%

-53-

Foreign subsidiaries are subject to income taxes of the countries in which they operate.

At March 31, 2001 and 2000, no deferred tax liabilities were recognized for undistributed earnings of foreign subsidiaries and affiliated companies aggregating (Yen)36,161 million (\$286,992 thousand) and (Yen)40,063 million, respectively, because the Company currently does not expect those earnings to be distributed and/or believes that no material additional taxation would result should they be distributed to the Company under the current circumstances.

At March 31, 2001, certain subsidiaries had operating loss carryforwards aggregating approximately (Yen)79,535 million (\$631,230 thousand), which may be used as a deduction in determining taxable income in future periods. The operating loss carryforwards of (Yen)63,688 million (\$505,461 thousand) expire through December 31, 2020, while the remainder have an indefinite carryforward period.

14. Rent Expenses

The companies leases office space and equipment, employees' housing, etc., under cancelable and noncancelable operating lease agreements. Rent expenses under such leases amounted to (Yen)16,128 million (\$128,000 thousand), (Yen)13,468 million and (Yen)10,680 million, respectively, for the years ended March 31, 2001, 2000 and 1999. Certain lease contracts for equipment that would be classified as capital lease in conformity with SFAS No.13 were capitalized.

At March 31, 2001, the future minimum lease payments under these leases are as follows:

Year ending	Millions of yen			C l
	Capital leases	Operaing lease commitment	Total	
2002.....	(Yen) 4,665	(Yen) 3,202	(Yen) 7,867	
2003.....	3,846	3,209	7,055	
2004.....	3,213	3,727	6,940	
2005.....	1,940	3,318	5,258	
2006.....	1,107	3,313	4,420

Less: amounts representing interest.....	(1,289)			
Present value of net minimum capital lease payments..	(Yen)15,193			

15. Research and Development and Advertising Expenses

Research and development expenses charged to costs and expenses for the years ended March 31, 2001, 2000 and 1999, amounted to (Yen)45,282 million (\$359,381 thousand), (Yen)42,460 million and (Yen)45,712 million, respectively.

Edgar Filing: KOMATSU LTD - Form 20-F

Advertising expenses charged to costs and expenses as incurred for the years ended March 31, 2001, 2000 and 1999, amounted to (Yen)5,369 million (\$42,611 thousand), (Yen)4,327 million and (Yen)5,579 million, respectively.

16. Net Income (Loss) per Share

A reconciliation of the numerators and denominators of the basic and diluted net income (loss) per share computations is as follows:

	Millions of yen	
	2001	2000
Net income (loss).....	(Yen) 6,913	(Yen) 13,395

Diluted common shares outstanding.....	955,250,229	995,318,457

-54-

	Yen		U.S. cents	
	2001	2000	1999	2001
Net income (loss) per share:				
Basic.....	(Yen) 7.24	(Yen) 13.85	(Yen) (12.77)	5.7 (cent)
Diluted.....	7.24	13.76	(12.77)	5.7 (cent)

1.8% Japanese yen convertible bonds, due 2004, was excluded from the net diluted income (loss) per share calculation for fiscal 2001 and 1999 because the effect would have been antidilutive.

17. Commitments and Contingent Liabilities

At March 31, 2001, the companies were contingently liable for discounted and transferred receivables on a recourse basis with the financial institutions of (Yen)8,705 million (\$69,087 thousand) (Note 3) and also as guarantors of indebtedness of others, including letters of awareness and keep-well agreements

Edgar Filing: KOMATSU LTD - Form 20-F

aggregating (Yen)29,485 million (\$234,008 thousand), including (Yen)2,274 million (\$18,048 thousand) relating to affiliated companies. With regard to sale of a subsidiary, the Company guarantees to the purchaser to pay up to (Yen)4,258 million (\$33,794 thousand) as of March 31, 2001 relating to the credit risk of subsidiary's outstanding receivables at the time of the sale. Management of the Company believes that losses from those contingent liabilities, if any, would not have a material effect on the consolidated financial statements.

Commitments for capital expenditures outstanding at March 31, 2001, aggregated approximately (Yen)600 million (\$4,762 thousand).

The companies are involved in certain legal actions and claims arising in the ordinary course of their business. It is the opinion of management and legal counsel that such litigation and claims will be resolved without material effect on the companies' financial position.

The companies have business activities with customers, dealers and associates around the world and their trade receivables from and guarantees to such parties are well diversified to minimize concentrations of credit risks. Management does not anticipate incurring losses on their trade receivables in excess of established allowances.

18. Derivative Financial Instruments

The companies utilize derivative financial instruments such as interest rate swap agreements and foreign exchange contracts to reduce market risks of changes in interest rates on interest payment and receipt and changes in currency exchange rates on assets and liabilities. The companies do not enter into derivative financial transactions for trading or speculation purposes.

The companies are exposed to credit-related losses in the event of nonperformance by counterparties to derivative financial instruments, but they do not expect any counterparties to fail to meet their obligations because of the high credit rating of the counterparties. The primary derivative instruments used by the companies are as follows:

(1) Interest Rate Swap and Cap Agreements Financial Instruments Qualifying as Hedge

The companies have entered into interest rate swap and cap agreements, partly concurrent with currency swap agreements for the purpose of managing their interest rate and foreign currency exposure for certain short-term and long-term debts and investment securities in an aggregate notional amount of (Yen)254,848 million (\$2,022,603 thousand) and (Yen)210,615 million at March 31, 2001 and 2000, respectively.

Financial Instruments Not Qualifying as Hedge

The Company has entered into interest rate swap contracts as a means of managing the Company and its group companies' interest rate exposures for short-term and long-term debts in a notional amount of (Yen)40,600 million (\$322,222 thousand) and (Yen)40,000 million at March 31, 2001 and 2000, respectively. These contracts do not qualify as a hedge and are accounted for accordingly as more fully explained in Note 1 (12). (2) Foreign Exchange Contracts Notional principal amounts of foreign exchange contracts outstanding at March 31, 2001 and 2000, are set forth below.

Millions of yen		Thousands of U.S. dollars
-----		-----
2001	2000	2001

Edgar Filing: KOMATSU LTD - Form 20-F

 Forwards and options:

To sell foreign currencies	(Yen) 33,074	(Yen) 28,755	\$262,492
To purchase foreign currencies	28,528	19,196	226,413
Options (purchased)	3,395	--	26,944

The companies enter into forward foreign exchange contracts and options to hedge existing assets and liabilities and certain sale commitments denominated in foreign currencies (principally U.S. dollar and Euro). The terms of these foreign exchange contracts rarely extend beyond three months except for those related to long-term debts denominated in foreign currencies which have the same terms as the underlying debts.

Net foreign currency transaction gains of (Yen)2,908 million (\$23,079 thousand), losses of (Yen)4,323 million, and losses of (Yen)2,596 million for the years ended March 31, 2001, 2000 and 1999, respectively, were included in the determination of net income (loss).

-55-

19. The Fair Value of Financial Instruments

(1) Cash and Cash Equivalents, Time Deposits, Trade Notes and Accounts Receivables, Other Current Assets, Short-Term Debt, Trade Notes and Accounts Payables, and Other Current Liabilities

The carrying amount approximates fair value because of the short maturity of these instruments.

(2) Investment Securities

The fair values of investment securities available for sale are based on quoted market prices.

(3) Installment Receivables

The fair values of installment receivables are based on the present value of future cash flows through maturity, discounted using estimated current interest rates. The fair values computed on such a basis approximate the carrying amounts (Note 3).

(4) Long-Term Debt

The fair values of each of the long-term debts are based on the quoted price in the most active market or the present value of future cash flows associated with each instrument discounted using the current borrowing rate for similar debt of comparable maturity.

(5) Derivative Financial Instruments

The fair values of derivative financial instruments, consisting principally of foreign currency contracts and interest swap agreements, are estimated by obtaining quotes from brokers.

The carrying amounts and the estimated fair values of the financial instruments, including financial instruments not qualifying as hedge, as of March 31, 2001 and 2000, are summarized as follows:

Millions of yen

 2001

2000

Edgar Filing: KOMATSU LTD - Form 20-F

Limitations

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could affect the estimates.

20. Business Segment Information

Under SFAS No. 131, "Disclosures about Segments of an Enterprise and Related Information," operating segments are defined as components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision maker, in deciding how to allocate resources and in assessing performance. The operating segments are managed separately because each operating segment represents a strategic business unit that offers different products and services.

The companies operate on a worldwide basis principally with three operating segments: 1) Construction and mining equipment, 2) Electronics, 3) Others. Prior to fiscal 2000, the Company disclosed the five operating segments:

1) Construction and mining equipment, 2) Electronics, 3) Civil engineering and construction, 4) Industrial machinery, and 5) Others. However, due to the change of the business operation, including the sale of major subsidiary namely Komatsu Construction Ltd. which belonged to the civil engineering and construction segment, the management of the Company has reduced the operating segments from five to three segments from fiscal 2001, and accordingly the segment disclosures for fiscal 2000 and 1999 have been restated.

The following tables present certain information regarding the companies' operating segments and geographic information at March 31, 2001, 2000 and 1999, and for the years then ended:

Report of Independent Public Accountants

To the Shareholders and the Board of Directors of Komatsu Ltd.:

We have audited the accompanying consolidated balance sheets of KOMATSU LTD. (a Japanese corporation) and consolidated subsidiaries as of March 31, 2001 and March 31, 2000-as restated (see Note 1.(3)) and the related consolidated statements of income, shareholders' equity and cash flows for each of the three years in the period ended March 31, 2001, expressed in yen. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Komatsu Ltd. and consolidated subsidiaries as of March 31, 2001 and 2000, and the results of their operations and their cash flows for each of the three years in the period ended March 31, 2001, in conformity with accounting principles generally accepted in the United States of America (see Note 1).

In our opinion, the amounts translated into U.S. dollars in the accompanying consolidated financial statements have been computed on the basis set forth in Note 1.

Report of Independent Public Accountants

To the Shareholders and the Board of Directors
of Komatsu Ltd.:

We have audited the accompanying consolidated balance sheets of KOMATSU LTD. (a Japanese corporation) and consolidated subsidiaries as of March 31, 2001 and 2000—as restated (see Note 1(3)), and the related consolidated statements of income, shareholders' equity and cash flows for each of the three years in the period ended March 31, 2001, expressed in yen. These financial statements and

Edgar Filing: KOMATSU LTD - Form 20-F

the schedules referred to below are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedules based on our audits.

We conducted our audits in accordance with generally accepted auditing standards in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Komatsu Ltd. and consolidated subsidiaries as of March 31, 2001 and 2000, and the results of their operations and their cash flows for each of the three years in the period ended March 31, 2001, in conformity with accounting principles generally accepted in the United States of America (see Note 1).

In our opinion, the translated amounts in the accompanying consolidated financial statements translated into U.S. dollars have been computed on the basis set forth in Note 1.

Our audits were made for the purpose of forming an opinion on the basic financial statements taken as a whole. The information in the supplemental notes and a schedule listed in the index to consolidated financial statements are presented for purposes of complying with the Securities and Exchange Commission's rules and are not part of the basic financial statements. These supplemental notes and the schedule have been subjected to the auditing procedures applied in our audits of the basic financial statements and, in our opinion, fairly state, in all material respects, the financial data required to be set forth therein, in relation to the basic financial statements taken as a whole.
