UNITED STATES CELLULAR CORPORATION

(Exact name of Registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

62-1147325
(IRS Employer Identification No.)

8410 West Bryn Mawr, Suite 700, Chicago, Illinois 60631

(Address of principal executive offices) (Zip code)

Registrant's Telephone Number: **(773) 399-8900**

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Common Shares, \$1 par value	American Stock Exchange
8.75% Senior Notes Due 2032	New York Stock Exchange
7.5% Senior Notes Due 2034	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: **None**

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange

Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

As of June 29, 2007, the aggregate market value of registrant's Common Shares held by nonaffiliates was approximately \$1,530.3 million (based upon the closing price of the Common Shares on June 29, 2007, of \$90.60, as reported by the American Stock Exchange). For purposes hereof, it was assumed that each director, executive officer and holder of 10% or more of the voting power of U.S. Cellular is an affiliate.

The number of shares outstanding of each of the registrant's classes of common stock, as of January 31, 2008, is 54,449,362 Common Shares, \$1 par value, and 33,005,877 Series A Common Shares, \$1 par value.

DOCUMENTS INCORPORATED BY REFERENCE

Those sections or portions of the registrant's 2007 Annual Report to Shareholders filed as Exhibit 13 hereto, and of the registrant's Notice of Annual Meeting of Shareholders and Proxy Statement for its 2008 Annual Meeting of Shareholders scheduled to be held May 20, 2008, described in the cross reference sheet and table of contents included herein, are incorporated by reference into Parts II and III of this report.

TELEPHONE (773) 399-8900

PART I

Item 1. Business

General

United States Cellular Corporation (U.S. Cellular) was incorporated under the laws of the State of Delaware in 1983, and provided wireless service to approximately 6.1 million customers in five geographic market areas in 26 states as of December 31, 2007. U.S. Cellular believes that it is the sixth largest wireless operating company in the United States at December 31, 2007, based on internally prepared calculations of the aggregate number of customers in its consolidated markets compared to the number of customers disclosed by other wireless companies in their publicly released information. U.S. Cellular operates in only one reportable segment, wireless operations, and does not provide wireless services in any foreign country.

At December 31, 2007, U.S. Cellular owned interests in 218 consolidated wireless markets which covered portions of 34 states and a total population of 82.4 million. U.S. Cellular's average penetration rate in its consolidated markets, calculated by dividing the number of U.S. Cellular customers by the total population in such markets, was 7.4%. The 218 consolidated markets included 183 operating markets, or markets in which U.S. Cellular provides wireless services to customers, covering 26 states and a total population of 44.9 million. U.S. Cellular's average penetration rate in its consolidated operating markets was 13.6%. U.S. Cellular also owned investment interests in 17 other wireless markets. U.S. Cellular operated approximately 6,400 cell sites, had over 400 U.S. Cellular operated retail stores and had relationships with agents, dealers and non-Company retailers that aggregated over 1,300 locations.

U.S. Cellular has its principal executive offices at 8410 West Bryn Mawr, Chicago, Illinois 60631 (telephone number 773-399-8900). The Common Shares of U.S. Cellular are listed on the American Stock Exchange under the symbol **USM**. U.S. Cellular's 8.75% Senior Notes are listed on the New York Stock Exchange under the symbol **UZG**. U.S. Cellular's 7.5% Senior Notes are listed on the New York Stock Exchange under the symbol **UZV**. U.S. Cellular is a majority-owned subsidiary of Telephone and Data Systems, Inc. (AMEX symbol **TDS**). As of December 31, 2007, TDS owned 80.8% of the combined total of the outstanding Common Shares and Series A Common Shares of U.S. Cellular and controlled 95.6% of the combined voting power of both classes of common stock.

On January 17, 2008, the American Stock Exchange announced that it had entered into an agreement to be acquired by the New York Stock Exchange, subject to regulatory approvals. At this time, it is not known to what extent, if any, such an acquisition would affect U.S. Cellular's listing or listing requirements.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

U.S. Cellular's website address is <http://www.uscc.com>. U.S. Cellular files with, or furnishes to, the Securities and Exchange Commission (SEC) annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, as well as various other information. Investors may access, free of charge, through the About Us / Investor Relations portion of the website, U.S. Cellular's annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to such reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act as soon as reasonably practical after such material is filed electronically with the SEC. The public may read and copy any materials U.S. Cellular files with the SEC at the SEC's Public Reference Room at 100 F Street, NE, Washington D.C. 20549. The public may obtain information on the operation of the Reference Room by calling the SEC at 1-800-732-0330. The public may also view electronic filings of U.S. Cellular by accessing SEC filings at <http://www.sec.gov>.

Wireless Interests and Operating Markets

U.S. Cellular is a wireless telecommunications service provider. U.S. Cellular operates its adjacent wireless systems under an organizational structure in which it groups its markets (geographic service areas as defined by the Federal Communications Commission (FCC) in which wireless carriers are licensed, for fixed terms, to provide service) into geographic market areas to offer customers large service areas that primarily utilize U.S. Cellular's network. Since 1985, when it began providing wireless telecommunications service in Knoxville, Tennessee and Tulsa, Oklahoma, U.S. Cellular has expanded its wireless networks and customer service operations to cover five geographic market areas in portions of 26 states as of December 31, 2007. U.S. Cellular uses roaming agreements with other wireless carriers to provide service to customers in areas not covered by U.S. Cellular's network.

U.S. Cellular is subject to regulation by the FCC as a provider of Commercial Mobile Radio Services (CMRS). The FCC regulates the licensing, construction, and operation of CMRS and other wireless communications systems, as well as the provision of services over those systems. The FCC currently grants two licenses to provide cellular communication service in each cellular licensed area. Multiple licenses have been granted in each personal communications service (PCS) licensed area, and these licensed areas overlap with cellular licensed areas. See Regulation , below, for further discussion regarding licenses as well as the regulations promulgated by the FCC.

U.S. Cellular's ownership interests in wireless licenses include both consolidated and investment interests in cellular licenses covering metropolitan statistical areas (MSA) and rural service areas (RSA), PCS licenses, advanced wireless service licenses and 700 megahertz licenses, as designated by the FCC. The following table summarizes U.S. Cellular's interests in wireless markets at December 31, 2007.

	Total
Consolidated markets in which U.S. Cellular has a controlling interest	
Operating Markets	183
Non-Operating Markets	9
Subtotal	192
Consolidated markets in which U.S. Cellular has other interests(1)	26
Subtotal	218
Consolidated markets to be acquired pursuant to existing agreements (2)	25
Investment interests (3)	17
Total markets	260

(1) Includes other interests in licenses acquired by Carroll Wireless, L.P. (Carroll Wireless) and Barat Wireless, L.P. (Barat Wireless). U.S. Cellular consolidates Carroll Wireless and Barat Wireless for financial statement purposes, pursuant to the guidelines of FASB Interpretation No. 46(R), *Consolidation of Variable Interest Entities - an Interpretation of ARB No. 51*, (FIN 46(R)), as U.S. Cellular anticipates benefiting from or absorbing a majority of Carroll Wireless and Barat Wireless expected gains or losses.

(2) As of December 31, 2007, U.S. Cellular had rights to acquire majority interests in 17 additional licenses, resulting from an exchange transaction with AT&T Wireless that closed in August 2003. At the time of the exchange

transaction, U.S. Cellular obtained rights to acquire 21 licenses from AT&T Wireless. However, four of the 21 licenses are in markets where U.S. Cellular currently owns spectrum and, therefore, are not included in the number of consolidated markets to be acquired. Only the incremental markets are included in the number of consolidated markets to be acquired to avoid duplicate reporting of overlapping markets. During 2007, U.S. Cellular exercised its right to acquire two of the 21 licenses, which includes one of the 17 licenses reported above. The closing of the acquisitions did not take place prior to December 31, 2007, and so the incremental license continues to be included in the above number as of such date. The closing of the acquisitions is expected to occur in the first half of 2008. The rights to acquire 18 of the remaining licenses from AT&T Wireless expire on August 1, 2008, and the right to acquire one license does not have a stated expiration date. On November 30, 2007, U.S. Cellular entered into an agreement to exchange licenses with Sprint Nextel. All of the licenses that U.S. Cellular will transfer and all but two of the licenses that U.S. Cellular will receive overlap other existing U.S. Cellular licenses. Accordingly, only the two incremental licenses to be acquired in the exchange are reflected in the consolidated markets to be acquired pursuant to existing agreements. The exchange is expected to close in 2008. On December 3, 2007, U.S. Cellular entered into an agreement to acquire six 12 megahertz C block lower 700 megahertz licenses in Maine. This transaction is expected to close in 2008.

(3) Represents licenses in which U.S. Cellular owns an interest that is not a controlling financial interest and is accounted for using either the equity or the cost method of accounting.

U.S. Cellular manages the operations of all but two of the licenses in which it owns a controlling interest; U.S. Cellular has contracted with another wireless operator to manage the operations of these two licensees. U.S. Cellular also manages the operations of three additional licenses in which it does not own a controlling interest, through agreements with the controlling interest holder or holders. U.S. Cellular accounts for its interests in each of these three licenses using the equity method of accounting. U.S. Cellular does not manage the licenses that it consolidates pursuant to the guidelines of FIN 46 (R); the controlling interest holder manages these licenses.

For purposes of tracking population counts in order to calculate market penetration, when U.S. Cellular acquires a licensed area that overlaps a licensed area it already owns, it does not duplicate the population counts for any overlapping licensed area. Only incremental population counts are added to the reported amount of total market population in the case of an acquisition of a licensed area that overlaps a previously owned licensed area. The incremental population counts that are added in such event are referred to throughout this Form 10-K as incremental population measurements.

The total market population and population equivalents measures are provided to enable comparison of the relative size of each geographic market area to U.S. Cellular's total consolidated markets and to enable comparison of the relative size of U.S. Cellular's consolidated markets to its investment interests, respectively. The total population of U.S. Cellular's consolidated markets may have no direct relationship to the number of wireless customers or the revenues that may be realized from the operation of the related wireless systems. Therefore, effective with this report, U.S. Cellular is expanding its reporting of total population to include the population of its total consolidated markets as well as the population of its consolidated operating markets i.e., markets in which U.S. Cellular provides wireless service to customers in order to reflect its market penetration more accurately. Historically, total population has been reported only for total consolidated markets, regardless of whether U.S. Cellular was providing wireless services in those markets. For comparison purposes, total market population and penetration calculations for both total consolidated markets and consolidated *operating* markets are shown below.

For both consolidated markets and consolidated operating markets, the tables below aggregate the total population within each geographic market area, regardless of U.S. Cellular's percentage ownership in the licenses included in such geographic market areas.

Total Consolidated Markets

Geographic Market Areas	Population (1)	Customers	Penetration	States
Central Market Area	65,096,000	3,846,000	5.9%	AL, AR, FL, GA, IA, IL, IN, KS, KY, LA, MI, MN, MO, MS, NE, OH, OK, SD, TX, WI
Mid-Atlantic Market Area	11,677,000	1,180,000	10.1%	MD, NC, PA, SC, TN, VA, WV
New England Market Area	2,830,000	518,000	18.3%	ME, NH, VT
Northwest Market Area	2,287,000	431,000	18.8%	CA, OR, WA
New York Market Area	481,000	147,000	30.6%	NY
Total	82,371,000	6,122,000	7.4%	

(1) Represents 100% of the population of the licensed areas which U.S. Cellular consolidates, based on 2006 Claritas population estimates. Population in this context includes only the areas covering such markets and is only used for the purposes of calculating market penetration and is not related to population equivalents, as defined below.

Consolidated Operating Markets

Geographic Market Areas	Population (1)	Customers	Penetration	States
Central Market Area	32,497,000	3,846,000	11.8%	IA, IL, IN, KS, MI, MN, MO, NE, OH, OK, TX, WI
Mid-Atlantic Market Area	7,346,000	1,180,000	16.1%	MD, NC, PA, SC, TN, VA, WV
New England Market Area	2,344,000	518,000	22.1%	ME, NH, VT
Northwest Market Area	2,287,000	431,000	18.8%	CA, OR, WA
New York Market Area	481,000	147,000	30.6%	NY
Total	44,955,000	6,122,000	13.6%	

(1) Represents 100% of the population of the licensed areas which U.S. Cellular operates, based on 2006 Claritas population estimates. Population in this context includes only the areas covering such markets and is only used for the purposes of calculating market penetration and is not related to population equivalents, as defined below.

Investment Markets

The following table summarizes the markets in which U.S. Cellular owns an investment interest. For licenses in which U.S. Cellular owns an investment interest, the related population equivalents are shown, defined as the total population of each licensed area multiplied by U.S. Cellular's ownership interest in each such license.

Market Area/Market	2006 Total Population (1)	Current Percentage Interest (2)	Current Population Equivalents (3)
Los Angeles/Oxnard, CA	17,894,000	5.50%	984,000
Oklahoma City, OK	1,110,000	14.60%	162,000
Cherokee (NC RSA 1)	211,000	50.00%	106,000
Others (Fewer than 100,000 population equivalents each)			341,000
Total Population Equivalents in Investment Markets			1,593,000

(1) 2006 Total Population represents the total population of the licensed area in which U.S. Cellular owns an interest.

(2) Represents U.S. Cellular's percentage ownership interest in the licensed area as of December 31, 2007.

(3) Current Population Equivalents are derived by multiplying the amount in the 2006 Total Population column by the percentage interest indicated in the Current Percentage Interest column.

Strategic Acquisitions, Divestitures and Exchanges of Wireless Interests Completed During the Past Five Years

U.S. Cellular's business development strategy is to operate controlling interests in wireless licenses in areas adjacent to or in proximity to its other wireless licenses, thereby building contiguous operating market areas. U.S. Cellular anticipates that grouping its operations into market areas will continue to provide it with certain economies in its capital and operating costs. U.S. Cellular may continue to make opportunistic acquisitions or exchanges in markets that further strengthen its operating market areas and in other attractive markets. U.S. Cellular also seeks to acquire minority interests in licenses in which it already owns the majority interest and/or operates the license. From time to time, U.S. Cellular has divested outright or included in exchanges for other wireless interests certain consolidated and investment interests that are considered less essential to its operating strategy. As part of this strategy, U.S. Cellular from time-to-time may be engaged in negotiations relating to the acquisition or exchange of companies, strategic properties or wireless spectrum or the disposition of properties. In addition, U.S. Cellular may participate as a bidder, or member of a bidding group, in auctions for wireless spectrum administered by the FCC.

There can be no assurance that U.S. Cellular will be able to negotiate additional acquisitions or exchanges on terms acceptable to it or that regulatory approvals, where required, will be received. U.S. Cellular plans to retain minority interests in certain wireless licenses that it believes will earn a favorable return on investment. Other minority interests may be exchanged for interests in licenses that may enhance U.S. Cellular's operations or may be sold for cash or other consideration. U.S. Cellular also continues to evaluate the disposition of certain controlling interests

in wireless licenses that are not essential to its corporate development strategy.

FCC Auctions. From time to time, the FCC conducts auctions through which additional spectrum is made available for the provision of wireless services. The FCC previously auctioned some spectrum in the 700 megahertz band. The FCC auction of additional spectrum in the 700-megahertz band, designated by the FCC as Auction 73, began on January 24, 2008. As discussed below, U.S. Cellular is participating in Auction 73 indirectly through its interests in King Street Wireless, L.P. (King Street Wireless), which is participating in Auction 73. U.S. Cellular has participated in certain prior FCC auctions, as discussed below.

FCC anti-collusion rules place certain restrictions on business communications and disclosures by participants in an FCC auction. As noted above, Auction 73 began on January 24, 2008. If certain reserve prices are not met, the FCC will follow Auction 73 with a contingent auction, referred to as Auction 76. For purposes of applying its anti-collusion rules, the FCC has determined that both auctions will be treated as a single auction, which means that, in the event that the contingent auction is needed, the anti-collusion rules would last from the application deadline for Auction 73, which was December 3, 2007, until the deadline by which winning bidders in Auction 76 must make the required down payment. The FCC anti-collusion rules place certain restrictions on business communications with other companies and on public disclosures relating to U.S. Cellular's participation in an FCC auction. For instance, these anti-collusion rules may restrict the normal conduct of U.S. Cellular's business and/or disclosures by U.S. Cellular relating to the auctions, which could last 3 to 6 months or more. As of the time of the filing of this report, Auction 73 was still in progress.

Auction 73. A subsidiary of U.S. Cellular is a limited partner in King Street Wireless. King Street Wireless intends to qualify as a designated entity and be eligible for bid credits with respect to spectrum purchased in Auction 73.

In January 2008, U.S. Cellular made capital contributions and advances to King Street Wireless and/or its general partner of \$97 million to allow King Street Wireless to participate in Auction 73. As of the time of the filing of this report, Auction 73 was still in progress. King Street Wireless is in the process of developing its long-term business and financing plans. Pending finalization of King Street Wireless' long-term financing plans, and upon request by King Street Wireless, U.S. Cellular may agree to make additional capital contributions and/or advances to King Street Wireless and/or its general partner. U.S. Cellular will consolidate King Street Wireless and King Street Wireless, Inc., the general partner of King Street Wireless, for financial reporting purposes, pursuant to the guidelines of FIN 46(R), as U.S. Cellular anticipates benefiting from or absorbing a majority of King Street Wireless' expected gains or losses.

There is no assurance that King Street Wireless will be successful in the auction or that acceptable spectrum will be available at acceptable prices in the auction. If King Street Wireless is successful in Auction 73, it may be required to raise additional capital through additional debt or equity financing. In such case, U.S. Cellular may agree to make additional capital contributions and/or advances to King Street Wireless and/or its general partner to provide additional funding of any licenses granted to King Street Wireless pursuant to Auction 73. The possible amount of such additional capital contributions and/or advances is not known at this time but could be substantial. In such case, U.S. Cellular may finance such amounts from cash on hand, from borrowings under its revolving credit agreement and/or long-term debt. There is no assurance that U.S. Cellular will be able to obtain such additional financing on commercially reasonable terms or at all.

Auction 66. A wholly-owned subsidiary of U.S. Cellular is a limited partner in Barat Wireless, an entity which participated in the auction of wireless spectrum designated by the FCC as Auction 66. Barat Wireless was qualified to receive a 25% bid credit available to very small businesses, defined as businesses having annual gross revenues of less than \$15 million. At the conclusion of the auction on September 18, 2006, Barat Wireless was a successful bidder with respect to 17 licenses for which it had bid \$127.1 million, net of its bid credit. On April 30, 2007, the FCC granted Barat Wireless' applications with respect to the 17 licenses for which it was the successful bidder. These 17 license areas cover portions of 20 states and are in markets which are either adjacent to or overlap current U.S. Cellular licensed areas.

Auction 58. A wholly-owned subsidiary of U.S. Cellular is a limited partner in Carroll Wireless, an entity which participated in the auction of wireless spectrum designated by the FCC as Auction 58. Carroll Wireless was qualified to bid on closed licenses that were available only to companies included under the FCC definition of entrepreneurs, which are small businesses that have a limited amount of assets and revenues. In addition, Carroll Wireless bid on open licenses that were not subject to restriction. With respect to these licenses, however, Carroll Wireless was qualified to receive a 25% bid credit available to very small businesses. Carroll Wireless was a successful bidder for 16 license areas in Auction 58, which ended on February 15, 2005. The aggregate amount paid to the FCC for the 16 licenses was \$129.7 million, net of the bid credit to which Carroll Wireless was entitled. On January 6, 2006, the FCC granted Carroll Wireless' applications with respect to the 16 licenses for which it was the successful bidder. These 16 license areas cover portions of 10 states and are in markets which are either adjacent to or overlap current U.S. Cellular licensed areas.

Barat Wireless and Carroll Wireless are in the process of developing long-term business and financing plans. For financial statement purposes, U.S. Cellular consolidates Barat Wireless and Barat Wireless, Inc., the general partner of Barat Wireless and Carroll Wireless and Carroll

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

PCS, Inc., the general partner of Carroll Wireless, pursuant to the guidelines of FIN 46(R), as U.S. Cellular anticipates benefiting from or absorbing a majority of Barat Wireless and Carroll Wireless expected gains or losses.

Acquisitions and Exchanges. On December 3, 2007, U.S. Cellular entered into an agreement to acquire six 12 megahertz C block lower 700 megahertz licenses in Maine for \$5.0 million in cash. This transaction is expected to close in 2008.

On December 3, 2007, U.S. Cellular acquired a 12 megahertz C block lower 700 megahertz license in Kansas for \$3.2 million in cash.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

On November 30, 2007, U.S. Cellular entered into an exchange agreement with Sprint Nextel which calls for U.S. Cellular to receive from Sprint Nextel PCS spectrum in eight licenses covering portions of four states (Oklahoma, West Virginia, Maryland and Iowa) and, in exchange, for U.S. Cellular to deliver to Sprint Nextel PCS spectrum in eight licenses covering portions of Illinois. Six of the licenses that U.S. Cellular will receive from Sprint Nextel will add spectrum in areas where U.S. Cellular currently provides service and two of the licenses will provide coverage in areas with incremental population of approximately 88,000. No cash, customers, network assets or other assets or liabilities will be included in the properties transferred to or to be received from Sprint Nextel. The eight licenses U.S. Cellular will transfer to Sprint Nextel are in areas where U.S. Cellular currently provides service and has what it considers an excess of spectrum (i.e., it has more spectrum than is expected to be needed to continue to provide high quality service). The transaction is expected to be completed during the first half of 2008. As a result of this exchange transaction, U.S. Cellular recognized a pre-tax loss on exchange of assets of \$20.8 million during 2007.

On February 1, 2007, U.S. Cellular acquired, for approximately \$18.2 million in cash, 100% of the membership interests in one wireless market in Iowa and obtained the 25 megahertz cellular license, expanding its wireless service in Iowa.

On April 21, 2006, U.S. Cellular acquired, for approximately \$18.9 million in cash, the remaining ownership interest in one wireless market in Tennessee, in which U.S. Cellular previously owned a 16.7% interest.

On December 19, 2005, U.S. Cellular completed an exchange of certain wireless markets in Kansas, Nebraska and Idaho with a subsidiary of ALLTEL. Under the agreement, U.S. Cellular acquired fifteen Rural Service Area (RSA) markets in Kansas and Nebraska in exchange for two RSA markets in Idaho and \$57.1 million in cash.

In 2004, U.S. Cellular purchased certain minority interests in several wireless markets in which it already owned a controlling interest for \$40.8 million in cash.

Pursuant to a transaction with AT&T Wireless that was completed on August 1, 2003, U.S. Cellular acquired rights to acquire 21 licenses that have not yet been assigned to U.S. Cellular. These rights, which have a recorded value of \$42.0 million, are included in Licenses on U.S. Cellular's Consolidated Balance Sheet. Of the 21 licenses, only 17 would add incremental territory to U.S. Cellular's consolidated markets; thus, only these 17 licenses are included in the number of consolidated markets to avoid duplicate reporting of overlapping markets. During 2007, U.S. Cellular exercised its right to acquire two of the 21 licenses, which includes one of the 17 licenses reported above. The closing of the acquisitions did not take place prior to December 31, 2007; therefore, the incremental license continues to be included as part of the 17 licenses as of such date. The closings of the acquisitions are expected to occur in the first half of 2008. The rights to acquire 18 of the remaining licenses from AT&T Wireless expire on August 1, 2008, and the right to acquire one license does not have a stated expiration date. U.S. Cellular anticipates acquiring these licenses prior to the expiration of its rights. All asset values related to the acquired or pending licenses were determined by U.S. Cellular.

Divestitures. On November 30, 2007, U.S. Cellular entered into an agreement with Sprint Nextel to exchange certain licenses. See discussion in *Acquisitions and Exchanges* above.

In October 2006, U.S. Cellular's interest in Midwest Wireless Communications, L.L.C. (Midwest Wireless) was sold to ALLTEL Corporation. In connection with the sale, U.S. Cellular became entitled to receive approximately \$106.0 million in cash with respect to its interest in Midwest Wireless. Of this amount, \$95.1 million was distributed upon closing and \$10.9 million was held in escrow to secure certain true-up, indemnification and other possible adjustments; the funds held in escrow were to be distributed in installments over a period of four to fifteen

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

months following the closing. During 2007, U.S. Cellular received \$4.0 million of funds that were distributed from the escrow, plus interest of \$0.3 million. On January 8, 2008, U.S. Cellular received a final distribution from the escrow of \$6.3 million, plus interest of \$0.5 million.

On December 19, 2005, U.S. Cellular completed an exchange of certain wireless markets in Kansas, Nebraska and Idaho with a subsidiary of ALLTEL. See discussion in *Acquisitions and Exchanges* above.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

On December 20, 2004, U.S. Cellular completed the sale of its Daytona Beach, Florida 20 megahertz C block PCS license to MetroPCS California/Florida, Inc. (MetroPCS) for \$8.5 million. U.S. Cellular recorded impairment losses related to the Daytona license of \$1.8 million in 2004 and a loss of \$0.3 million associated with buying out the former partner of the Daytona investment.

On November 30, 2004, U.S. Cellular completed the sale to ALLTEL of certain wireless properties. U.S. Cellular sold two consolidated markets and five minority interests to ALLTEL for \$80.2 million in cash, including repayment of debt and working capital that was subject to adjustment. U.S. Cellular recorded a gain of \$38.0 million related to the sale.

On February 18, 2004, U.S. Cellular completed the sale of certain of its wireless properties in southern Texas to AT&T Wireless for \$96.5 million in cash, including a working capital adjustment. The properties sold to AT&T Wireless included wireless assets and customers in six markets. U.S. Cellular recorded a loss of \$21.3 million related to the sale.

Competition

The wireless telecommunication industry is highly competitive. U.S. Cellular competes directly with several wireless service providers in each of its markets. In general, there are between three and five competitors in each wireless market in which U.S. Cellular provides service, excluding resellers and mobile virtual network operators (MVNOs). U.S. Cellular generally competes against each of the national wireless companies: AT&T Mobility, Sprint Nextel, T-Mobile USA and Verizon Wireless. However, not all of these competitors operate in each market where U.S. Cellular does business. These competitors have substantially greater financial, technical, marketing, sales, purchasing and distribution resources than U.S. Cellular. In addition, U.S. Cellular competes against both larger and smaller regional wireless companies in certain areas, including ALLTEL and Leap Wireless International, and resellers of wireless services. Since U.S. Cellular's competitors do not disclose their subscriber counts in specific regional service areas, market share for the competitors in each regional market cannot be precisely determined.

Since each of these competitors operates on systems using spectrum licensed by the FCC and has comparable technology and facilities, competition among wireless service providers for customers is principally on the basis of types of products and services, price, size of area covered, call quality, and responsiveness of customer service. U.S. Cellular employs a customer satisfaction strategy throughout its markets that it believes has contributed to its overall success, including a relatively low churn rate.

Wireless service providers continue to introduce new handset devices to gain a competitive advantage, as almost everyone who wants and can afford a wireless handset already has one. The wireless handset is more than just a means for communication. Consumers' attitudes have shifted, and continue to shift, and a wireless handset becomes more important year after year as it expands to become the primary communication link to the world as well as a personal entertainment center and source of information. As penetration in the industry increases over the next few years, U.S. Cellular believes that customer growth will be achieved primarily by capturing persons switching from other wireless carriers or increasing the number of multi-device users rather than by adding users that are new to the industry.

The use of national advertising and promotional programs by the national wireless service providers may be a source of additional competitive and pricing pressures in all U.S. Cellular markets, even if those operators may not provide direct service in a particular market. In addition, in the current wireless environment, U.S. Cellular's ability to compete depends on its ability to offer family and national calling plans. U.S. Cellular provides wireless services comparable to the national competitors, but the other wireless companies operate in a wider geographic area and are able to offer no- or low-cost roaming and long-distance calling packages over a wider area on their own networks than U.S. Cellular can offer on its network. If U.S. Cellular offers the same calling area as one of these competitors, U.S. Cellular will incur roaming charges for calls made in

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

portions of the calling area, which are not part of its network, thereby increasing its cost of operations. In the Central Market Area, U.S. Cellular's largest contiguous service area, U.S. Cellular can offer larger regional service packages without incurring significant roaming charges than it is able to offer in other parts of its network.

U.S. Cellular depends on roaming agreements with other wireless carriers to provide voice and data roaming capabilities in areas not covered by U.S. Cellular's network. If U.S. Cellular is unable to maintain or renew these agreements, U.S. Cellular's ability to continue to provide competitive nationwide wireless service to its customers could be impaired, which, in turn, would have an adverse effect on its wireless operations.

Bundled offerings, in the form of triple plays and quadruple plays (combination of cable or satellite television service, high-speed internet, wireline phone service, and wireless phone service), are becoming more common among some of U.S. Cellular's competitors. In addition, wireless carriers and others are beginning to roll out new or enhanced technologies to better meet the needs of the anytime, anywhere consumer. Convergence is taking place on many levels, including dual-mode devices that act as wireline or mobile phones depending on location and the incorporation of wireless hot spot technology in mobile handsets for improved in-building coverage and for making internet access seamless regardless of location. The path of future technology is uncertain as carriers decide between fourth generation technology paths, including LTE (Long Term Evolution) and WiMax. Although less directly a substitute for other wireless services, wireless data services such as Wi-Fi may be adequate for those who do not need full mobility wide-area roaming or full two-way voice services. Technological advances or regulatory changes in the future may make available other alternatives to wireless service, thereby creating additional sources of competition. The FCC's auction of 700 megahertz spectrum, which began in January 2008, is drawing interest not only from the existing wireless service providers but also from other companies such as Google, which may be looking to enter the wireless service industry.

U.S. Cellular's approach in 2008 and future years will be to focus on the unique needs and attitudes of its selected target segments towards wireless service. U.S. Cellular will deliver selected, targeted high quality products and services at fair prices and differentiate itself through the customer experience and service quality. U.S. Cellular's ability to compete successfully in the future will depend upon its ability to anticipate and respond to changes related to new service offerings and customer preferences, competitors' pricing strategies, technology, demographic trends and economic conditions.

Technology and System Design and Construction

Technology. Wireless communication systems transmit voice, data, graphics and video through the transmission of signals over networks of radio towers using radio spectrum licensed by the FCC. Access to local, regional, national and worldwide telecommunications networks is provided through system interconnections. Because wireless devices require no wireline connection, they allow for maximum mobility of the customer.

There have been a number of technological developments in the wireless industry since its inception. The first generation of wireless technology was analog. The second generation of wireless technologies is digital signal transmission technology, which allows wireless communication systems to provide voice service as well as wireless data applications. The third generation of wireless technologies enables greater speeds of data transmission and is therefore capable of supporting more complex data applications. In addition, other high-speed wireless technologies, such as Wi-Fi, are also being deployed and may offer mobile broadband capability. Fourth generation wireless technologies, including LTE and WiMax, are currently under development. The wireless standards bodies are working to standardize fourth generation wireless technologies to ensure consistent customer experiences. Fourth generation wireless technologies are planned to be different from previous wireless technologies in that they provide several fold improvement in throughput and capacity, as well as reduced latency for data applications. These improvements are focused to a large degree on bringing lower latency internet access to the mobile wireless experience. Fourth generation technologies accomplish this improvement through use of advanced access methods such as OFDMA (orthogonal frequency division multiple access), advanced modulation techniques such as QAM (quadrature amplitude modulation), advanced spatial processing such as MIMO (multiple input multiple output), and IP (Internet Protocol) core architecture.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

U.S. Cellular currently deploys code division multiple access (CDMA) 1XRTT digital technology throughout virtually all of its networks. Through roaming agreements with other CDMA-based wireless carriers, U.S. Cellular's customers may access CDMA service in virtually all areas of the United States. U.S. Cellular believes that CDMA technology offers advantages compared to the other second generation digital technologies, including greater spectral efficiency as well as better call quality. Another digital technology, Global System for Mobile Communication (GSM), has a larger installed base of customers worldwide. Since CDMA technology is not compatible with GSM technology, U.S. Cellular customers with CDMA only based handsets may not be able to use their handsets when traveling through areas serviced only by GSM-based networks.

Previously, U.S. Cellular deployed Time Division Multiple Access (TDMA) technology in a substantial portion of its markets. As of December 31, 2007, migration of U.S. Cellular's networks to CDMA technology and migration of customers who used TDMA or analog handsets to CDMA compatible handsets are substantially complete in all of its markets. However, since TDMA-based network equipment has analog capabilities embedded, U.S. Cellular will continue to operate its TDMA-based networks in order to meet the FCC mandate requiring retention of analog capability through February 2008. In addition, U.S. Cellular will continue to provide TDMA-based service to its customers who continue to use TDMA-based handsets and to roamers from other wireless carriers who have TDMA-based networks, until it is no longer economical to do so. U.S. Cellular intends to work with customers who have analog-only handsets in an effort to provide those customers with uninterrupted service prior to discontinuing operation of its TDMA-based networks.

A high quality network as well as continued prudent investments in the network will remain important factors for wireless companies to remain competitive. U.S. Cellular continually reviews its long-term technology plans. In late 2006, U.S. Cellular launched services based on Evolution-Data Optimized (EV-DO) technology, a third generation technology, on a limited basis. This technology, which increases the speed of data transmissions on the wireless network, is deployed by certain other wireless companies. U.S. Cellular will continue to evaluate additional investment in EV-DO technology in light of the demand for the deployment of such technology.

At this point in time, U.S. Cellular's approach to fourth generation wireless technologies is to seek to ensure that such technologies are reasonably backwards compatible with U.S. Cellular's current wireless technologies. U.S. Cellular is seeking to accomplish this by actively participating in the various standards bodies governing the development of fourth generation wireless technologies. Backward compatibility is intended to help ensure that U.S. Cellular and its customers have a clear and seamless path to new advanced services available on fourth generation networks if and when the adoption and demand for such new services and the competitive environment warrant the deployment of fourth generation wireless technology.

System Design and Construction. U.S. Cellular designs and constructs its systems in a manner it believes will permit it to provide high-quality service to substantially all types of wireless handsets that are compatible with its network technology, based on engineering studies which relate to specific markets. Such engineering studies are performed by U.S. Cellular personnel or third party engineering firms. Network reliability is given careful consideration and extensive redundancy is employed in many aspects of U.S. Cellular's network design. Route diversity, ring topology and extensive use of emergency standby power are also utilized to enhance network reliability and minimize service disruption from any particular network element failure.

In accordance with its strategy of building and strengthening its operating market areas, U.S. Cellular has selected high-capacity digital wireless switching systems that are capable of serving multiple markets through a single mobile telephone switching office. U.S. Cellular's wireless systems are designed to facilitate the installation of equipment that will permit microwave interconnection between the mobile telephone switching office and the cell sites. U.S. Cellular has implemented such microwave interconnection in many of the wireless systems it operates. In other areas, U.S. Cellular's systems rely upon wireline telephone connections to link cell sites with the mobile telephone switching office. Although the installation of microwave network interconnection equipment requires a greater initial capital investment, a microwave network enables a system operator to reduce the current and future charges associated with leasing telephone lines from a wireline telephone company.

Additionally, U.S. Cellular has developed and continues to expand a wide area data network to accommodate various business functions, including:

- order processing,

- over the air provisioning,
- automatic call delivery,
- intersystem handoff,
- credit validation,
- fraud prevention,
- call data record collection,
- network management,
- long-distance traffic, and
- interconnectivity of all of U.S. Cellular's mobile telephone switching offices and cell sites.

In addition, the wide area network accommodates virtually all internal data communications between various U.S. Cellular office and retail locations to process customer activations. The wide area network is deployed in all of U.S. Cellular's customer service centers (Customer Care Centers) for all customer service functions using U.S. Cellular's billing and information system.

U.S. Cellular believes that currently available technologies and appropriate capital additions will allow sufficient capacity on its networks to meet anticipated demand for voice services over the next few years. Increased demand for high-speed data and video services may require the acquisition of additional licenses or spectrum to provide sufficient capacity in markets where U.S. Cellular currently offers or may in the future offer these services.

Construction of wireless systems is capital-intensive, requiring substantial investment for land and improvements, buildings, towers, mobile telephone switching offices, cell site equipment, microwave equipment, engineering and installation. U.S. Cellular uses primarily its own personnel to engineer each wireless system it owns and operates, and engages contractors to construct the facilities.

The costs (exclusive of the costs to acquire licenses) to develop the systems in which U.S. Cellular owns a controlling interest have historically been financed primarily through proceeds from debt and equity offerings and, in recent years, with cash generated by operations and proceeds from the sales of wireless interests. U.S. Cellular expects to meet most of its future funding requirements with cash generated by operations and, on a temporary basis, with borrowings under its revolving credit facility. U.S. Cellular also may have access to public and private capital markets to help meet its long-term financing needs.

Products and Services

Wireless Handset Devices. U.S. Cellular offers a wide range of wireless handset devices and laptop cards for use by its customers. All of the wireless devices that U.S. Cellular offers are compatible with its CDMA 1XRTT network and all of the handsets U.S. Cellular currently offers are compliant with the FCC's E-911 requirements. U.S. Cellular's network also continues to facilitate analog traffic and its customer service and repair centers continue to provide service to users of analog handsets. In addition, U.S. Cellular offers a wide range of accessories, such as carrying cases, hands-free devices, batteries, battery chargers and other items to customers, and U.S. Cellular sells wireless devices to agents and other third-party distributors for resale.

U.S. Cellular frequently discounts wireless handset devices sold to new and current customers and provides upgraded handsets to current customers in response to competition, to attract new customers or to retain existing customers by reducing the cost of becoming or remaining a wireless customer. In most instances, where permitted by law, customers are generally required to sign a new service contract or extend their current service contract with U.S. Cellular at the time the handset sale takes place.

U.S. Cellular has established service facilities in many of its local markets to ensure quality service and repair of the wireless handset devices it sells. These facilities allow U.S. Cellular to improve its handset repair service by promptly assisting customers who experience equipment problems. Additionally, the following service repair programs are available to U.S. Cellular customers: over-the-counter exchange, Smart Phone advance exchange, loaner phones, express exchange and return, device recycling and returns of devices. U.S. Cellular maintains a repair facility in Tulsa, Oklahoma, to handle complex repair issues.

U.S. Cellular purchases wireless devices and accessory products from a number of manufacturers, with the substantial majority of such purchases currently made from Motorola, LG InfoComm, Samsung, Kyocera, UTStarcom, Nokia and Research In Motion. U.S. Cellular negotiates volume discounts with its suppliers and works with them in promoting specific equipment in its local advertising. U.S. Cellular does not own significant product warehousing and distribution infrastructure. Instead, it contracts with CAT Logistics for substantially all of its

handset and other product warehousing, distribution and direct customer fulfillment requirements.

Wireless Services. U.S. Cellular's customers are able to choose from a variety of packaged voice and data pricing plans that are designed to fit different usage patterns and customer needs. The ability to help a customer find the right pricing plan is central to U.S. Cellular's brand positioning. U.S. Cellular generally offers wide area and national consumer plans that can be tailored to a customer's needs by the addition of features or feature packages. Many plans enable small work groups or families to share the plan minutes, enabling customers to get more value for their money. Business rate plans are offered to companies to meet their unique needs. U.S. Cellular's national rate plans price all calls, regardless of where they are made or received in the United States, as local calls with no long distance or roaming charges. Additionally, U.S. Cellular offers a hybrid prepaid service plan, which includes packages of minutes for a monthly fee.

U.S. Cellular's **easyedge**™ brand of enhanced data services uses a binary runtime environment for wireless (BREW) technology, licensed from Qualcomm, and adds limited computer-like functionality to handsets, enabling applications to be downloaded over-the-air directly to the customer's wireless device. These enhanced data services include downloading news, weather, sports information, games, ring tones and other services. Applications are added to U.S. Cellular's **easyedge**™ catalog on an ongoing basis. Two new significant categories that were launched in 2007 include (1) a new ring tone portal, ToneRoom, which simplifies the discovery of ring tones for customers both through their handsets and through U.S. Cellular's new Web portal for ring tones, and (2) new Location Based Service offerings, such as Your Navigator, a Global Positioning System (GPS) based directions and points of interest application. Further enhancing the customer's ability to explore U.S. Cellular's **easyedge**™ catalog, U.S. Cellular introduced its Out the Door Provisioning technology to ensure that each new customer is automatically provisioned with data services at the time of contract signing. U.S. Cellular plans on further expansion of its **easyedge**™ and other enhanced services in 2008 and beyond.

During 2007, U.S. Cellular's Smartphone category was expanded with the addition of its first Windows Mobile handset device, the Motorola Q, and with the launch of a more consumer friendly, multi-media BlackBerry® device, the BlackBerry® 8830 Smartphone. Handset devices that are considered Smartphones use an identifiable operating system, often with the ability to add applications such as for enhanced data processing, connectivity or entertainment. In addition, U.S. Cellular expanded its messaging product offering with the launch of Premium SMS for both those customers who like to participate in Interactive TV voting campaigns as well as for those who want to purchase messaging content via short code, and introduced a new mobile music offering which enables simplified handset side-loading of full track music through Napster-to-Go. U.S. Cellular continues to offer SpeedTalk®, its push-to-talk service, to business customers through its Direct Sales channel but no longer offers this service to retail customers through its retail stores and agents.

In November 2006, U.S. Cellular launched certain enhanced multimedia services, including Digital Radio, Mobile TV and 3D Gaming, over its third generation EV-DO network in Milwaukee, Wisconsin.

Marketing

U.S. Cellular's marketing plan is focused on acquiring, retaining and growing customer relationships by offering high-quality products and services built around customer needs at fair prices, supported by outstanding customer service. U.S. Cellular operates under a unified brand name and logo, U.S. Cellular, across all its markets.

U.S. Cellular increases customer awareness using traditional media such as television, radio, newspaper and direct mail advertising, and nontraditional media such as the internet and sponsorships. U.S. Cellular has achieved its current level of penetration of its markets through a combination of a strong brand, promotional advertising and broad distribution, and has been able to sustain a high customer retention rate based on its high-quality wireless network and outstanding customer service. U.S. Cellular's advertising is directed at gaining and retaining customers, improving potential customers' awareness of the U.S. Cellular brand, increasing existing customers' usage of U.S. Cellular's services and increasing the public awareness and understanding of the wireless services it offers. U.S. Cellular attempts to select the advertising and promotion media that are most appealing to the targeted groups of potential customers in each local market. U.S. Cellular supplements its advertising with a focused public relations program. This program combines nationally supported activities and unique local activities, events, and sponsorships to enhance public awareness of U.S. Cellular and its brand. These programs are aimed at supporting the communities U.S. Cellular serves. The programs range from loaning phones to public service operations in emergencies, to assisting victims of domestic abuse through U.S. Cellular's Stop Abuse From Existing programs, to supporting safe driving programs.

U.S. Cellular supports a multi-faceted distribution program, including retail sales and service centers, independent agents and direct sales, in the vast majority of its markets, plus the internet and telesales for customers who wish to contact U.S. Cellular through those channels. U.S. Cellular maintains a low customer churn rate by focusing on customer satisfaction, development of processes that are more

customer-friendly, extensive training of frontline sales and support associates and the implementation of retention programs. The marketing plan stresses the value of U.S. Cellular's service offerings and incorporates combinations of rate plans, additional value-added features and services and wireless telephone equipment which are designed to meet the needs of defined customer segments and their usage patterns.

Company retail store locations are designed to market wireless service to the consumer and small business segments in a setting familiar to these types of customers. U.S. Cellular's e-commerce site enables customers to activate service and purchase handsets online, and this site is continually evolving to address customers' current needs. Traffic on U.S. Cellular's Web site is increasing as customers use the site for gathering information, purchasing handsets, signing up for service, exploring **easyedge**SM applications and finding the locations of its stores and agents.

Direct sales consultants market wireless service to mid- and large-size business customers. Retail sales associates work in over 400 U.S. Cellular-operated retail stores and kiosks and market wireless service primarily to the consumer and small business segments. U.S. Cellular maintains an ongoing training program to improve the effectiveness of sales consultants and retail associates by focusing their efforts on obtaining customers by maximizing the sale of appropriate packages for the customer's expected usage and value-added services that meet customer needs.

U.S. Cellular has relationships with agents, dealers and non-Company retailers to obtain customers, and at December 31, 2007 had contracts with these businesses aggregating over 1,300 locations. Agents and dealers are independent business entities who obtain customers for U.S. Cellular on a commission basis. U.S. Cellular has provided additional support and training to its exclusive agents to increase customer satisfaction for customers they serve. U.S. Cellular's agents are generally in the business of selling wireless handsets, wireless service packages and other related products. U.S. Cellular's dealers include major appliance dealers, car stereo companies and mass merchants including regional and national companies. Additionally, in support of its overall internet initiatives, U.S. Cellular has recruited agents who provide services exclusively through the internet. No single agent, dealer or other non-Company retailer accounted for 10% or more of U.S. Cellular's operating revenues during the past three years.

U.S. Cellular also markets wireless service through resellers. The resale business involves the sale of wholesale access and minutes to independent companies that package and resell wireless services to end-users. These resellers generally provide prepaid and postpay services to subscribers under their own brand names and also provide their own billing and customer service. U.S. Cellular incurs no direct subscriber acquisition costs related to reseller customers. At December 31, 2007, U.S. Cellular had approximately 558,000 reseller customers. For the year ended December 31, 2007, revenues from resale business were less than 1% of total service revenues.

U.S. Cellular believes that, while strategy is set at the corporate level, day-to-day tactical operating decisions should be made close to the customer and, accordingly, it manages its operating market areas with a decentralized staff, including sales, marketing, network operations, engineering, human resources and finance personnel. Additionally, U.S. Cellular currently operates five regional Customer Care Centers whose personnel are responsible for customer service activities, and two national financial services centers, whose personnel perform other credit and customer payment activities.

Customers and System Usage

U.S. Cellular provides service to a broad range of customers from a wide spectrum of demographic segments. U.S. Cellular uses a segmentation model to classify businesses and consumers into logical groupings for developing new products and services, direct marketing campaigns, and retention efforts. U.S. Cellular focuses on both retail consumer and business customers, with its business customer focus being on small-to-mid-size businesses in vertical industries such as construction, retail, professional services and real estate. These industries are primarily served through U.S. Cellular's retail and direct sales channels.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

On average, the customers in U.S. Cellular's consolidated markets used their wireless systems approximately 859 minutes per month and generated retail service revenue of \$44.27 per month during 2007, compared to 704 minutes and \$41.44 per month in 2006. Additional revenues generated by roamers using U.S. Cellular's systems for voice and data services and higher regulatory fees such as universal service fund (USF) contributions which are billed to customers, brought U.S. Cellular's total average monthly service revenue per customer to \$51.13 during 2007, an increase of 8% from \$47.23 in 2006. U.S. Cellular anticipates that total service revenues will continue to grow for several years.

12

U.S. Cellular's main sources of revenues are from its own customers and from inbound roaming customers. The interconnectivity of wireless service enables a customer who is in a wireless service area other than the customer's home service area (a roamer) to place or receive a call in that service area. U.S. Cellular has entered into roaming agreements with operators of other wireless systems covering virtually all systems with TDMA and CDMA technology in the United States, Canada and Mexico. Roaming agreements offer customers the opportunity to roam on these systems. These reciprocal agreements automatically pre-register the customers of U.S. Cellular's systems in the other carriers' systems. In addition, a customer of a participating system roaming in a U.S. Cellular market where this arrangement is in effect is able to make and receive calls on U.S. Cellular's system. The charge for this service is negotiated as part of the roaming agreement between U.S. Cellular and the roaming customer's carrier. U.S. Cellular bills this charge to the customer's home carrier, which then bills the customer. In some instances, based on competitive factors, many carriers, including U.S. Cellular, may charge lower amounts to their customers than the amounts actually charged to the carriers by other wireless carriers for roaming.

U.S. Cellular's customer bills typically show separate charges for custom usage features, airtime in excess of the packaged amount (such packages may include roaming and toll usage), roaming, toll calls and data usage. Custom usage features provided by U.S. Cellular include wide-area, national and mobile-to-mobile call delivery, caller id/blocking, call forwarding, voice mail, call waiting and three-way calling. Custom data features provided by U.S. Cellular include email services, instant messaging, and text and picture messaging.

The following table summarizes certain information about customers and market penetration in U.S. Cellular's consolidated operations.

	Year Ended or At December 31,				
	2007	2006	2005	2004	2003
Total number of consolidated markets (1)	218	201	189	175	182
Total population of consolidated markets (000s) (2)	82,371	55,543	45,244	44,391	46,267
Total population of consolidated operating markets (000s)	44,955	44,043	43,362	39,893	39,549
Customers:					
at beginning of period (3)	5,815,000	5,482,000	4,945,000	4,409,000	4,103,000
net acquired (divested) during period (4)	6,000	23,000	60,000	(91,000)	(141,000)
additions during period (3)	1,761,000	1,535,000	1,540,000	1,557,000	1,357,000
disconnects during period (3)	(1,460,000)	(1,225,000)	(1,063,000)	(930,000)	(910,000)
at end of period (3)	6,122,000	5,815,000	5,482,000	4,945,000	4,409,000
Market penetration at end of period:					
Consolidated markets(5)	7.4%	10.5%	12.1%	11.1%	9.5%
Consolidated operating markets (5)	13.6%	13.2%	12.6%	12.4%	11.1%

(1) Represents the number of licensed areas in which U.S. Cellular owned a majority interest or other interest at the end of each year. The results of operations of these licensed areas are included in U.S. Cellular's Consolidated Statements of Operations.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

(2) The increase in Total Population in 2007 reflects the licenses awarded to Barat Wireless at the conclusion of Auction 66; the increase in Total Population in 2006 reflects the licenses awarded to Carroll Wireless at the conclusion of Auction 58; the decline in Total Population in 2004 reflects the divestitures of markets to AT&T Wireless and ALLTEL.

(3) Represents the number of wireless customers served by U.S. Cellular in the licensed areas referred to in footnote (1). The revenues earned from services to such customers are included in the Consolidated Statements of Operations.

(4) Represents the net number of wireless customers added to or subtracted from U.S. Cellular's customer base during the period due to acquisitions and divestitures of wireless licenses.

(5) Calculated by dividing the number of wireless customers at the end of the period by the total population of consolidated markets and consolidated operating markets, respectively, as estimated by Claritas.

Regulation

Regulatory Environment. U.S. Cellular's operations are subject to FCC and state regulation. The wireless licenses U.S. Cellular holds are granted by the FCC for the use of radio frequencies in the 700 megahertz band, the 800 megahertz band (cellular licenses), the 1900 megahertz band (personal communications service or PCS licenses), and in the 1700/2100 megahertz band (Advanced Wireless Services (AWS-1)), and are an important component of the overall value of U.S. Cellular's consolidated assets. The construction, operation and transfer of wireless systems in the United States are regulated to varying degrees by the FCC pursuant to the Communications Act of 1934 (Communications Act). In 1996, Congress enacted the Telecommunications Act of 1996 (Telecommunications Act), which amended the Communications Act. The Telecommunications Act mandated significant changes in telecommunications rules and policies to promote competition, ensure the availability of telecommunications services to all parts of the United States and streamline regulation of the telecommunications industry to remove regulatory burdens, as competition develops. The FCC has promulgated regulations governing construction and operation of wireless systems, licensing (including renewal of licenses) and technical standards for the provision of wireless service under the Communications Act, and is implementing the legislative objectives of the Telecommunications Act, as discussed below.

Licensing Wireless Service. For cellular telephone licensing purposes, the FCC has divided the United States into separate geographic markets (MSAs and RSAs). In each market, the allocated cellular frequencies are divided into two equal blocks of 25 megahertz each. The FCC originally allocated a total of 140 megahertz for broadband PCS. The FCC has allocated 90 megahertz for AWS-1 spectrum.

Subject to some conditions, the FCC also permits licensees to split their licenses and assign a portion, on either a geographic or frequency basis, or both, to a third party. The completion of acquisitions involving the transfer of control of all or a portion of a wireless system requires prior FCC approval. Acquisitions of minority interests generally do not require FCC approval. Whenever FCC approval is required, any interested party may file a petition to dismiss or deny the application for approval of the proposed transfer. See *Other Recent FCC Actions* below for additional wireless service licensing actions.

The FCC currently places no limit on the amount of spectrum that an entity may hold in a particular wireless market. The FCC previously prohibited entities that controlled a cellular system in a given market from controlling the competing cellular system in that market. In 2002, that rule was repealed for MSAs and in 2005 for RSAs. In 2003, the FCC eliminated the wireless spectrum cap, which had prohibited any one entity from holding more than 55 megahertz of cellular, PCS, and Specialized Mobile Radio (SMR) spectrum in a given cellular or PCS market. The FCC now determines whether an acquisition of wireless licenses is in the public interest on a case-by-case basis. Under current guidelines, the FCC will assess the competitive situation resulting from the proposed acquisition when, as a result of the proposed transaction, any one entity will control more than 95 megahertz of cellular, PCS, SMR and 700 megahertz spectrum in a given market. If the entity will control 95 megahertz of such spectrum or less, the FCC presumes that there are no competitive concerns.

Licensing Facilities. The FCC must be notified each time an additional cell site for a wireless system is constructed which enlarges the service area of a given cellular market. The height and power of base stations in wireless systems are regulated by FCC rules, as are the types of signals emitted by these stations. The FCC also imposes a requirement that all wireless licensees register and obtain FCC registration numbers for all of their antenna towers which require prior FAA clearance. All new towers must be registered at the time of construction. All wireless towers of less than 10 meters in height, building-mounted antennas and wireless telephones must comply with radio frequency radiation guidelines. The FCC also regulates tower construction in accordance with its regulations, which carry out its responsibilities under the National Environmental Policy Act and the Historic Preservation Act. In October 2004, the FCC adopted a Nationwide Programmatic Agreement which exempts certain new towers from historic preservation review, but imposes additional notification and approval requirements on carriers with respect to state historic preservation officers and Native American tribes with an interest in the tower's location. In addition to regulation by the FCC, wireless systems are subject to certain Federal Aviation Administration (FAA) regulations with respect to the siting, construction, painting and lighting of wireless transmitter towers and antennas as well as local zoning requirements. U.S. Cellular believes that its facilities are in compliance with these requirements.

Licensing Commercial Mobile Radio Service. Pursuant to 1993 amendments to the Communications Act, cellular, personal communications and advanced wireless services are classified as commercial mobile radio service, in that they are services offered to the public for a fee and are interconnected to the public switched telephone network. The FCC has determined that it will not require carriers providing such services to comply with a number of statutory provisions otherwise applicable to common carriers, such as the filing of tariffs.

All commercial mobile radio service wireless licensees must satisfy specified coverage requirements. Licensees which fail to meet the coverage requirements may be subject to forfeiture of their licenses. Cellular licensees were required, during the five years following the initial grant of the respective license, to construct their systems to provide service (at a specified signal strength) to the territory encompassed by their service area. Failure to provide such coverage resulted in reduction of the relevant license area by the FCC. All 30 megahertz block PCS licensees must construct facilities that provide coverage to one-third of the population of the service area within five years of the initial license grants and to two-thirds of the population within ten years. All other personal communication service licensees and certain 10 and 15 megahertz block licensees must construct facilities that provide coverage to one-fourth of the population of the licensed area or make a showing of substantial service in their license area within five years of the original license grants.

In a rulemaking proceeding concluded in July of 2004, the FCC amended its rules to add a substantial service option alternative for 30 megahertz block PCS licensees to the service specific construction benchmarks already available to these licensees. These rules, which took effect on February 14, 2005, give carriers greater flexibility to provide service based on the needs of individual customers and their own unique business plans. AWS-1 licensees are also subject to a substantial performance standard during their license term. The FCC is currently considering possible revisions to this performance standard, including a percentage of geographic or population coverage, in a proceeding which will likely conclude in 2008.

Cellular and PCS licenses are granted for ten-year periods. As an exception to the general rule, AWS-1 spectrum licenses granted before December 31, 2009 have a fifteen-year term. In April of 2007, the FCC amended its rules to establish initial license terms for 700 megahertz Commercial Services Band Licenses of ten years from February 17, 2009.

The FCC has established standards for conducting comparative renewal proceedings between a cellular licensee seeking renewal of its license and challengers filing competing applications. The FCC has (i) established criteria for comparing the renewal applicant to challengers, including the standards under which a renewal expectancy will be granted to the applicant seeking license renewal; (ii) established basic qualifications standards for challengers; and (iii) provided procedures for preventing possible abuses in the comparative renewal process. The FCC has concluded that it will award a renewal expectancy if the licensee has (i) provided substantial performance, which is defined as sound, favorable and substantially above a level of mediocre service just minimally justifying renewal; and (ii) complied with FCC rules, policies and the Communications Act. A majority of geographically licensed services, including PCS licensees and AWS-1 licensees also are afforded similar renewal expectancy. If renewal expectancy is awarded to an existing licensee, its license is renewed and competing applications are not considered. All of U.S. Cellular's licenses which it applied to have renewed between 1995 and 2007 have been renewed.

In April of 2007, the FCC established a separate renewal processing procedure for 700 megahertz Commercial Services Band licensees by eliminating the filing of competing applications to the renewal requests of 700 megahertz licensees. Under these revised procedures, however, 700 megahertz renewal applicants will be required to make substantial service showings which may in some cases require demonstration of service coverage which exceeds the FCC's buildout requirements for this service.

All of U.S. Cellular's approximately 1,100 FCC licenses for the microwave radio stations it used to link its cell sites with each other and with its mobile telephone switching offices were required to be renewed in 2001. All of those licenses were renewed for ten-year terms. All newly obtained microwave licenses receive ten-year terms as well. Over the next few years, due to the licensing of new satellite and other services in the relevant frequency bands, it is likely that certain of U.S. Cellular's remaining microwave facilities will need to be shifted to other

frequencies. It is anticipated that those changes will be made without affecting service to customers and that the cost of such changes will not be significant.

U.S. Cellular conducts and plans to conduct its operations in accordance with all relevant FCC rules and

regulations and anticipates being able to qualify for renewal expectancy in its upcoming renewal filings. Accordingly, U.S. Cellular believes that current regulations will have no significant effect on the renewal of its licenses. However, changes in the regulation of wireless operators or their activities and of other mobile service providers could have a material adverse effect on U.S. Cellular's operations.

E-911. There are certain ongoing regulatory proceedings before the FCC which are of particular importance to the wireless industry. In one proceeding, the FCC has imposed enhanced wireless 911, or E-911, regulations on wireless carriers. The rules require wireless carriers to provide different levels of detailed location information about E-911 callers depending on the capabilities of the local emergency call center, or Public Safety Answering Point (PSAP). U.S. Cellular has implemented phase one E-911 in all its markets where the local PSAP has requested the service and can process the location information requested. U.S. Cellular is also in compliance with the FCC's requirement that 95 percent of all the handsets in use on its network have GPS-capabilities.

In 2007, the FCC issued an order that requires wireless carriers to provide increasingly more accurate location information about E-911 callers to local PSAPs. The 2007 order requires carriers to transition from testing and confirming compliance with the FCC's location accuracy requirements in a geographic area as large as a state to testing and confirming compliance with the FCC's location accuracy requirements in the following smaller and smaller geographic areas: (i) each Department of Commerce Economic Area (currently 176 across the country) the carrier operates in by September 11, 2008; (ii) each MSA (currently 305 in the U.S.) or RSA (currently 427 in the U.S.) the carrier operates in by September 11, 2010 and (iii) the geographic area of each PSAP (over 7500 PSAPs in FCC's registry) in the carrier's service area no later than September 11, 2012. The 2007 order is controversial because many wireless carriers have argued that the technology does not currently exist to allow carriers to comply with these new accuracy requirements for every PSAP. Compliance with these requirements will likely require a significant commitment of personnel and financial resources for new equipment, software and additional location accuracy testing.

Communications Assistance to Law Enforcement Act. Under a 1994 federal law, the Communications Assistance to Law Enforcement Act (CALEA), all telecommunications carriers, including U.S. Cellular and other wireless licensees, have been required to implement certain equipment changes necessary to assist law enforcement authorities in achieving an enhanced ability to conduct electronic surveillance of those suspected of criminal activity. U.S. Cellular timely purchased and installed CALEA-compliant equipment prior to the effective date of the FCC's new CALEA rules.

Pending Proceedings Reciprocal Compensation. Since 1996, FCC rules generally have required symmetrical and reciprocal compensation, that is, payment at the same rate, for interconnecting wireless and local exchange facilities. Asymmetrical rates can be set if carrier costs justify such rates. In the absence of an order by a state public utilities commission establishing carrier interconnection costs, rates can be set in accordance with FCC default proxy rates or carriers may agree not to compensate each other, a so called bill and keep arrangement. The states have jurisdiction over such interconnection proceedings. In February 2005, the FCC adopted an order finding that state wireless termination tariffs, which certain local wireline carriers had sought to impose in the absence of interconnection agreements with wireless carriers, were unlawful. The order applied prospectively and required the negotiation of interconnection agreements to set rates. It also clarified that wireline carriers may request such agreements from wireless carriers, as well as vice versa, which had not been clear under the rules.

The FCC currently is considering changes to the entire system of intercarrier compensation, of which wireless-wireline interconnection is a part. It is not possible to predict with certainty the results of that proceeding but it is likely that the FCC will require increased emphasis on cost-based charges and, thus, that there would be fewer rate based subsidies for local exchange carriers, including those contained in interstate access charges, which wireless carriers also must pay on calls to wireline carriers deemed to be interstate calls under the FCC's rules. Such a result would be favorable to wireless carriers.

Pending Proceedings Automatic Roaming. In 2007, the FCC issued an order which requires wireless carriers to allow other wireless carriers customers to roam on their systems automatically, that is, by prior agreement between carriers. The FCC ruling applies only to real-time, two way switched voice or data services that are interconnected with the public switched network and text messaging services. This ruling is generally favorable to smaller and regional carriers who may have been at a competitive disadvantage relative to the national carriers if they were unable to obtain roaming arrangements on reasonable terms and conditions. The order, however, does not extend the obligation to markets in which the carrier seeking to roam holds an FCC license even if such carrier has yet to build out its network in such market. The FCC has sought additional comment on the possibility of extending this requirement to data roaming which is not connected to the public switched network, such as wireless broadband internet access. Action by the FCC on this data roaming issue is possible during 2008.

Pending Proceedings Truth in Billing. On March 18, 2005, the FCC released an Order and Notice of Proposed Rulemaking (NPRM) which adopted rules to regulate the wording of wireless carrier bills. The order also preempted state regulation of wireless billing. The NPRM, upon which the FCC has not acted, will impose additional requirements on wireless billing. The order became effective on August 25, 2005, and has been the subject of an appeal. In July 2006, the U.S. Court of Appeals for the Eighth Circuit reversed the FCC and set aside its order in a decision later upheld by that court on reconsideration. On January 22, 2008, the U.S. Supreme Court decided not to review the decision. Thus, conflicting state regulation of wireless bills will now be permitted, a result unfavorable to wireless carriers, unless the FCC finds another basis for pre-empting state regulation of wireless bills.

Pending Proceedings Early Termination Fees. On May 18, 2005, the FCC issued two public notices seeking comment on whether wireless early termination fees are to be considered a rate under Section 332 of the Act and, thus, exempt from state regulation and/or state consumer class action or other lawsuits. FCC action is possible during 2008, and it would be in the interest of wireless carriers for the FCC to rule that such fees are, in fact, a wireless rate. Legislation has also been introduced in Congress which would regulate wireless carriers ability to charge early termination fees to customers.

Pending Proceedings Customer Proprietary Network Information (CPNI). FCC rules require all carriers to safeguard the CPNI of their customers and prevent its disclosure to any person not authorized by the customer to possess such information. CPNI is information relating to a customer s telephone usage, such as numbers called and numbers from which calls were received. Wireless carriers may themselves use CPNI to market additional wireless services to customers without their prior consent but must obtain such consent to market non-wireless services. The CPNI issue has become prominent recently in light of disclosures of unauthorized persons coming into possession, through fraudulent means, of the customer telephone records of certain wireless carriers and then selling such information. During 2007, the FCC issued an order which imposed additional obligations upon wireless carriers to safeguard customer data. Those regulations became effective on December 8, 2007. U.S. Cellular has implemented a series of new practices and procedures intended to comply with those regulations.

Pending Proceedings Backup Power Requirements. During 2007, the FCC issued an order which requires all wireless carriers to provide 24 hours of backup power to all switching sites and eight hours of backup power to each cell site (excluding sites where compliance is precluded by federal, state, tribal or local law, or by a risk to safety of life or health, or is prohibited by a legal obligation or agreement.) Within six months of the effective date of the rules (expected in mid 2008), each wireless carrier will be required to file a report with the FCC detailing its state of compliance. A carrier will then have an additional six months to file a compliance plan with the FCC with respect to those sites identified in the initial report for which the carrier is unable to provide the required amount of backup power.

Pending Proceedings Universal Service. The Telecommunications Act establishes principles and a process for implementing a modified universal service policy. This policy seeks nationwide, affordable service and access to advanced telecommunications and information services. It calls for reasonably comparable urban and rural rates and services. The Telecommunications Act also requires universal service to schools, libraries and rural health facilities at discounted rates. Wireless carriers must provide such discounted rates to such organizations in accordance with federal regulations. The FCC has implemented the mandate of the Telecommunications Act to create a universal service support mechanism to ensure that all Americans have access to telecommunications services. The Telecommunications Act requires all interstate telecommunications providers, including wireless service providers, to make an equitable and non-discriminatory contribution to support the cost of providing universal service, unless their contribution would be *de minimis*. At present, the provision of wireline and wireless telephone service in high cost areas is subsidized by support from the universal service fund, to which, as noted above, all carriers with interstate and international revenues must contribute. Such payments, which were based on a percentage of the total billed revenue of carriers for a given previous period of time, began in 1998.

Since February 2003, such payments have been based on estimates of future revenues. Previously, these payments were based on historical revenues. Carriers are free to pass such charges on to their customers. Wireless carriers are also eligible to receive universal service support payments in certain circumstances if they provide specified services in high cost areas. U.S. Cellular has sought designation as an eligible telecommunications carrier (ETC) qualified to receive universal service support in several states. To date, U.S. Cellular has been designated as an ETC in the states of Washington, Iowa, Wisconsin, Oregon, Oklahoma, Maine, Kansas, Nebraska and Missouri, and has received payments for services provided to high cost areas within those states.

In 2007, U.S. Cellular contributed over \$116 million into the universal service fund. It also received \$98 million in high cost support payments for its service to high cost areas in the states referred to above. Currently before the FCC for comment are proposals made by the Federal-State Joint Board and by the FCC itself to change the universal service high cost fund in various ways. These proposals include: the creation of separate wireless, wireline, and broadband funds, with an overall cap on all funds, including the wireless fund; a separate cap on payments to wireless carriers; elimination of the identical support rule, thereby requiring wireless carriers to receive support based on their own costs rather than wireline per line costs; using reverse auctions (a form of competitive bidding) to determine the amount of support to be provided to ETCs and limiting the number of carriers eligible to receive support for a given area. The FCC will consider these proposals and others in 2008. It is not certain which of them, if any, will be adopted. Adoption by the FCC of any form of cap, of limits on the number of carriers eligible to receive support for a given area, or of its proposals related to identical support or reverse auctions would likely reduce the amount of support that wireless carriers would be eligible to receive.

700 Megahertz Spectrum Auction. In January 2000, pursuant to a congressional directive, the FCC adopted service rules for licensing the commercial use of 30 megahertz of spectrum in the 747-762 megahertz and 777-792 megahertz spectrum bands. Subsequently, the FCC adopted service rules for the 688-746 megahertz band, portions of which were auctioned in 2002 and 2003. Those rules provided that a majority of the spectrum in these bands would be auctioned in large regional service areas, although there were portions available which cover individual MSA and RSA markets. The FCC has conducted two auctions for such MSA and RSA licensed spectrum and certain other portions of the 688-746 megahertz spectrum which ended in September 2002 and June 2003, respectively. An additional auction to license the remaining unauctioned 62 megahertz of 700 megahertz spectrum, consisting of REAG, EA and CMA licenses, commenced on January 24, 2008.

Other Recent FCC Developments. In October 2006, the FCC confirmed that it intended to expand competition in the broadband sector by opening up underutilized television broadcast spectrum for new low power fixed and personal/portable uses. The FCC left open important issues to be addressed in rulemaking proceedings such as how low power devices might be used on TV channels without causing harmful interference to broadcast incumbents and whether such low power uses should be provided on an unlicensed or a licensed basis.

Telecommunications Act - General. The primary purpose and effect of the Telecommunications Act is to open all telecommunications markets to competition. The Telecommunications Act makes most direct or indirect state and local barriers to competition unlawful. It directs the FCC to preempt all inconsistent state and local laws and regulations, after notice and comment proceedings. It also enables electric and other utilities to engage in telecommunications service through qualifying subsidiaries.

Only narrow powers over wireless carriers are left to state and local authorities. Each state retains the power to impose competitively neutral requirements that are consistent with the Telecommunications Act's universal service provisions and necessary for universal services, public safety and welfare, continued service quality and consumer rights. While a state may not impose requirements that effectively function as barriers to entry, it retains limited authority to regulate certain competitive practices in rural telephone company service areas.

In May 2003, the FCC adopted new spectrum leasing policies which permit licensees of cellular, PCS, and SMR spectrum, among other bands, to lease to third parties any amount of spectrum in any geographic area encompassed by their licenses, and for any period of time not extending beyond the current term of the license. The FCC has also adopted streamlined processing rules for applications for assignment and transfer of control of telecommunications carrier licenses. These new rules and policies were expanded and clarified by the FCC in July of 2004 to permit spectrum leasing in additional wireless services, to streamline processing of spectrum leasing applications as well as traditional license transfers and assignments and to establish new categories of spectrum leasing arrangements.

State and Local Regulation. U.S. Cellular is also subject to state and local regulation in some instances. In 1981, the FCC preempted the states from exercising jurisdiction in the areas of licensing, technical standards and market structure. In 1993, Congress preempted states from regulating the entry of wireless systems into service and the rates charged by wireless systems to customers. The siting and construction of wireless facilities, including transmitter towers, antennas and equipment shelters are still subject to state or local zoning and land use regulations. However, in 1996, Congress amended the Communications Act to provide that states could not discriminate against wireless carriers in tower zoning proceedings and had to decide on zoning requests with reasonable speed. In addition, states may still regulate other terms and conditions of wireless service.

In 2000, the FCC ruled that the preemption provisions of the Communications Act do not preclude the states from acting under state tort, contract, and consumer protection laws to regulate the practices of commercial mobile radio service carriers, even if such activities might have an incidental effect on wireless rates. This ruling has led to more state regulation of commercial mobile radio service carriers, particularly from the standpoint of consumer protection. U.S. Cellular intends to comply with state regulation and to seek reasonable regulation of its activities in this regard.

The FCC is required to forbear from applying any statutory or regulatory provision that is not necessary to keep telecommunications rates and terms reasonable or to protect consumers. A state may not apply a statutory or regulatory provision that the FCC decides to forbear from applying. In addition, the FCC must review its telecommunications regulations every two years and change any that are no longer necessary. Further, the FCC is empowered under certain circumstances to preempt state regulatory authorities if a state is obstructing the Communications Act's basic purposes.

U.S. Cellular and its subsidiaries have been and intend to remain active participants in proceedings before the FCC and state regulatory authorities. Proceedings with respect to the foregoing policy issues before the FCC and state regulatory authorities could have a significant impact on the competitive market structure among wireless providers and the relationships between wireless providers and other carriers. U.S. Cellular is unable to predict the scope, pace or financial impact of policy changes which could be adopted in these proceedings.

Radio Frequency Emissions. The FCC has adopted rules specifying standards and the methods to be used in evaluating radio frequency emissions from radio equipment, including network equipment and handsets used in connection with commercial mobile radio service. These rules were upheld on appeal by the U.S. Court of Appeals for the Second Circuit. The U.S. Supreme Court declined to review the Second Circuit's ruling. U.S. Cellular's network facilities and the handsets it sells to customers comply with these standards.

On December 7, 2004, the United States Court of Appeals for the District of Columbia upheld, in EMR Network v. FCC, the FCC's current requirements regarding radio frequency emissions and held that the FCC was not obliged to commence inquiry into the non-thermal effects of radio frequency emissions. The court also evaluated the studies relied upon by the plaintiffs and concluded they were insufficient. The FCC however, is considering changes in its rules regarding human exposure to radio frequency magnetic fields in a separate proceeding.

Media reports have suggested that radio frequency emissions from handsets, wireless data devices and cell sites may raise various health concerns, including cancer or tumors, and may interfere with various electronic medical devices, including hearing aids and pacemakers. Although some studies have suggested that radio frequency emissions may cause certain biological effects, most of the expert reviews conducted to date have concluded that the evidence does not support a finding of adverse health effects but that further research is appropriate. Research and studies are ongoing.

These concerns over radio frequency emissions may discourage the use of handsets and wireless data devices and may result in significant restrictions on the location and operation of cell sites, all of which could have a material adverse effect on U.S. Cellular's results of operations. Several class action and single-plaintiff lawsuits have been filed against several other wireless service operators and several wireless phone manufacturers, asserting product liability, breach of warranty and other claims relating to radio frequency transmissions to and from handsets and wireless data devices. The lawsuits seek substantial monetary damages as well as injunctive relief.

One important case in which the plaintiff alleged that his brain tumor had been caused by his wireless telephone use, Newman v. Verizon et al., was dismissed in the U.S. District Court in Maryland in October 2002. The U.S. Court of Appeals for the Fourth Circuit affirmed the dismissal in October 2003, upholding the lower court's decision that plaintiff had failed to produce admissible scientific evidence that mobile phone use causes brain cancer.

Several other cases alleging injury were filed as were class action cases alleging that wireless telephones increase the risk of adverse health effects unless they are used with headsets. In March 2005, the U.S. Court of Appeals for the Fourth Circuit reversed a lower court's decision in the case of Pinney v. Nokia, et al., which had dismissed five class action lawsuits alleging that the wireless industry had endangered consumers by selling mobile phones without headsets. The court found that the federal court did not have jurisdiction over the claims in four of the cases and held that the state law claims were not pre-empted by federal law in the fifth case. In October 2005, the U.S. Supreme Court declined to review the Fourth Circuit decision.

Subsequently, four of the cases were remanded to state courts in New York, Pennsylvania, Maryland and Georgia where they were filed. Thereafter, plaintiffs amended their complaints in two of the cases to add new defendants and those defendants removed the cases to federal court under the provisions of the newly enacted Class Action Reform Act. Plaintiffs have voluntarily dismissed all but one of the putative class action cases. That case is currently pending in federal district court. Also following the Fourth Circuit's decision in Pinney, the FCC was granted leave to participate as *amicus curiae* in a case alleging a brain injury from use of a wireless phone and has filed a brief indicating the agency's disagreement with the preemption aspect of that decision.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

In August 2007, a judge in the Superior Court of the District of Columbia dismissed six pending brain cancer class action lawsuits, against Qualcomm, Nokia and other handset manufacturers on federal pre-emption grounds.

There can be no assurance that the outcome of these or other lawsuits will not have a material adverse effect on the wireless industry, including U.S. Cellular. U.S. Cellular carries insurance with respect to such matters, but there is no assurance that such insurance would be sufficient, will continue to be available or will not be cost-prohibitive in the future.

Investments

U.S. Cellular owned 370,882 Common Shares of Rural Cellular Corporation (RCCC) at December 31, 2007. On July 30, 2007, RCCC announced that Verizon Wireless has agreed to purchase the outstanding shares of RCCC for \$45 per share in cash. The acquisition is expected to close in the first half of 2008. If the transaction closes, U.S. Cellular will receive approximately \$16.7 million in cash, recognize a \$16.4 million pre-tax gain and cease to own any interest in RCCC. The investment in RCCC is classified as available-for-sale for financial statement purposes.

A subsidiary of U.S. Cellular previously held a number of variable prepaid forward contracts (forward contracts) related to its investments in Vodafone Group Plc (Vodafone) American Depositary Receipts (ADRs). The forward contracts matured in May 2007. U.S. Cellular settled the forward contracts by delivery of Vodafone ADRs pursuant to the formula contained in the forward contracts and then disposed of all remaining Vodafone ADRs. As a result, U.S. Cellular no longer owns any Vodafone ADRs and no longer has any liability or other obligations under the related forward contracts. U.S. Cellular recognized a pre-tax gain of \$131.7 million at the time of delivery and sale of the shares. Since shares were delivered in the settlement of the forward contract, U.S. Cellular incurred a current tax liability in the amount of \$35.5 million at the time of delivery and sale of the shares.

U.S. Cellular and its subsidiaries did not make direct investments in RCCC or Vodafone but rather acquired these interests as a result of sales, trades or reorganizations of other assets. U.S. Cellular 's investment in RCCC is the result of a consolidation of several cellular partnerships in which U.S. Cellular subsidiaries held interests into RCCC, and the distribution of RCCC stock in exchange for these interests. U.S. Cellular 's former investment in Vodafone resulted from certain dispositions of non-strategic cellular investments to, or settlements with, AirTouch Communications, Inc. (AirTouch), in exchange for stock of AirTouch, which was then acquired by Vodafone whereby U.S. Cellular received ADRs representing Vodafone stock.

Employees

U.S. Cellular had approximately 8,400 full-time and part-time employees as of December 31, 2007. None of U.S. Cellular 's employees is represented by a labor organization. U.S. Cellular considers its relationship with its employees to be good.

Item 1A. Risk Factors

PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995

SAFE HARBOR CAUTIONARY STATEMENT

This Annual Report on Form 10-K, including exhibits, contains statements that are not based on historical fact and represent forward-looking statements, as this term is defined in the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical facts, that address activities, events or developments that U.S. Cellular intends, expects, projects, believes, estimates, plans or anticipates will or may occur in the future are forward-looking statements. The words believes, anticipates, estimates, expects, plans, intends, projects and other expressions are intended to identify these forward-looking statements, but are not the exclusive means of identifying them. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results, events or developments to be significantly different from any future results, events or developments expressed or implied by such forward-looking statements. Such risks, uncertainties and other factors include those set forth below under Risk Factors in this Form 10-K. However, such factors are not necessarily all of the important factors that could cause actual results, performance or achievements to differ materially from those expressed in, or implied by, the forward-looking statements contained in this document. Other unknown or unpredictable factors also could have material adverse effects on future results, performance or achievements. U.S. Cellular undertakes no obligation to update publicly any forward-looking statements whether as a result of new information, future events or otherwise. You should carefully consider the following risk factors and other information contained in, or incorporated by reference into, this Form 10-K to understand the material risks relating to U.S. Cellular's business.

RISK FACTORS

Intense competition in the markets in which U.S. Cellular operates could adversely affect U.S. Cellular's revenues or increase its costs to compete.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

Competition in the telecommunications industry is intense. U.S. Cellular's ability to compete effectively will depend, in part, on its ability to anticipate and respond to various competitive factors affecting the telecommunications industry. U.S. Cellular anticipates that competition may cause the prices for products and services to continue to decline, and the costs to compete to increase, in the future. Most of U.S. Cellular's competitors are national or global telecommunications companies that are larger than U.S. Cellular, possess greater resources, possess more extensive coverage areas and more spectrum within their coverage areas, and market other services with their communications services that U.S. Cellular does not offer. In addition, U.S. Cellular may face competition from technologies that may be introduced in the future or from new entrants into the industry. There can be no assurance that U.S. Cellular will be able to compete successfully in this environment. New technologies, services and products that are more commercially effective than the technologies, services and products offered by U.S. Cellular may be developed.

Sources of competition to U.S. Cellular's business typically include three to five competing wireless telecommunications service providers in each market, wireline telecommunications service providers, resellers (including mobile virtual network operators), and providers of other alternate telecommunications services. Many of U.S. Cellular's wireless competitors and other competitors have substantially greater financial, technical, marketing, sales, purchasing and distribution resources than U.S. Cellular.

These factors are not in U.S. Cellular's control. Changes in such competitive factors could result in product, service, pricing or cost disadvantages and could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.

A failure by U.S. Cellular's service offerings to meet customer expectations could limit U.S. Cellular's ability to attract and retain customers and could have an adverse effect on U.S. Cellular's operations.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

Customer acceptance of the services that U.S. Cellular offers is and will continue to be affected by technology and range of service-based differences from competition and by the operational performance, quality, reliability, and coverage of U.S. Cellular's networks. U.S. Cellular may have difficulty attracting and retaining customers if it is unable to meet customer expectations for a range of services, or if it is otherwise unable to resolve quality issues relating to its networks, billing systems or customer care, or if any of those issues limit U.S. Cellular's ability to expand its network capacity or subscriber base or otherwise place U.S. Cellular at a competitive disadvantage to other service providers in its markets. The level of customer demand for any U.S. Cellular next-generation services and products is uncertain. Customer demand could be impacted by differences in the types of services offered, service content, technology, footprint and service areas, network quality, customer perceptions, customer care levels and rate plans.

U.S. Cellular's system infrastructure may not be capable of supporting changes in technologies and services expected by customers, which could result in lost customers and revenues.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

The wireless telecommunications industry is experiencing significant changes in technologies and services expected by customers. Future technological changes or advancements may enable other wireless technologies to equal or exceed our current levels of service and render our system infrastructure obsolete. New technologies or services often render existing technology products, services or infrastructure obsolete, too costly or otherwise unmarketable. U.S. Cellular's system infrastructure may not be capable of supporting changes in technologies and services expected by customers. If U.S. Cellular is unable to meet future advances in or changes in competing technologies on a timely basis, or at an acceptable cost, it may not be able to compete effectively with other carriers, which could result in lost customers and revenues. This could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.

An inability to obtain or maintain roaming arrangements with other carriers on terms that are acceptable to U.S. Cellular could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.

U.S. Cellular's customers can access another carrier's digital system automatically only if the other carrier allows U.S. Cellular's customers to roam on its network. U.S. Cellular relies on roaming agreements with other carriers to provide roaming capability to its customers in areas of the U.S. outside its service areas and to improve coverage within selected areas of U.S. Cellular's network footprint. Such agreements cover traditional voice services as well as data services, which are an area of strong growth for U.S. Cellular and other carriers. Although U.S. Cellular currently has long-term roaming agreements with certain other carriers, these agreements generally are subject to renewal and termination if certain events occur, including, without limitation, if network standards are not maintained. Some competitors may be able to obtain lower roaming rates than U.S. Cellular because they have larger call volumes or because of their affiliations with, or ownership of, wireless carriers, or may be able to reduce roaming charges by providing service principally over their own network. In addition, the quality of service that a wireless carrier delivers during a roaming call may be inferior to the quality of service U.S. Cellular provides, the price of a roaming call may not be competitive with prices of other wireless carriers for such call, and U.S. Cellular's customers may not be able to use some of the advanced features, such as voicemail notification, or data applications that the customers enjoy when making calls within U.S. Cellular's network. U.S. Cellular's rate of adoption of new technologies, such as those enabling high-speed data services, could affect its ability to enter into or maintain roaming agreements with other carriers. In addition, U.S. Cellular's wireless CDMA and CDMA 1XRTT technology is not compatible with certain other technologies used by certain other carriers, such as GSM-based technologies, limiting the ability of U.S. Cellular to enter into roaming agreements with such other carriers. U.S. Cellular's roaming partners could switch their business to new operators or, over time, to their own networks. Changes in roaming usage patterns, rates per roaming minute of use or relationships with carriers whose customers generate roaming minutes of use on U.S. Cellular's network could have an adverse effect on U.S. Cellular's revenues and revenue growth.

If U.S. Cellular is unable to obtain or maintain roaming agreements with other wireless carriers that contain pricing and other terms that are competitive and acceptable to U.S. Cellular, and that satisfy U.S. Cellular's quality and interoperability requirements, its business, financial condition or results of operations could be adversely affected.

Changes in access to content for data or video services or access to new handsets being developed by vendors, or an inability to manage its supply chain or inventory successfully, could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.

U.S. Cellular's business increasingly depends on its access to content for data, music or video services and its access to new handsets being developed by vendors. U.S. Cellular's ability to obtain such access depends in part on other parties. If U.S. Cellular is unable to obtain access to content for data, music or video services or access to new handsets being developed by vendors on a timely basis, its business, financial condition or results of operations could be adversely affected.

Operation of U.S. Cellular's supply chain and management of its inventory balances requires accurate forecasting of customer growth and demand, which has become increasingly challenging. If overall demand for handsets or the mix of demand for handsets is significantly different than U.S. Cellular's expectations, U.S. Cellular could face inadequate or excess supplies of particular models of handsets. This could result in lost sales opportunities or a buildup of inventory that could not be sold easily. Either of these situations could adversely affect U.S. Cellular's revenues, costs of doing business, results of operations or financial condition.

A failure by U.S. Cellular's business to acquire adequate radio spectrum could have an adverse effect on U.S. Cellular's business and operations.

U.S. Cellular's business depends on the ability to use portions of the radio spectrum licensed by the FCC. U.S. Cellular could fail to obtain sufficient spectrum capacity in new and existing markets, whether through FCC auctions or other transactions, in order to meet the potential expanded demands for existing services in critical markets, and to enable deployment of next-generation services. Such a failure could have a material adverse impact on the quality of U.S. Cellular's services or U.S. Cellular's ability to roll out such future services in some markets, or could require that U.S. Cellular curtail existing services in order to make spectrum available for next-generation services. U.S. Cellular may acquire more spectrum through a combination of alternatives, including participation in spectrum auctions. As required by law, the FCC has conducted auctions for licenses to use some parts of the radio spectrum. The decision to conduct auctions, and the determination of what spectrum frequencies will be made available for auction, are provided for by laws administered by the FCC. The FCC may not allocate spectrum sufficient to meet the demands of all those wishing to obtain licenses. U.S. Cellular may not be successful in FCC auctions in obtaining the spectrum that U.S. Cellular believes is necessary to implement its business and technology strategies. In addition, newly auctioned spectrum may not be compatible with existing spectrum, and vendors may not create suitable products to use such spectrum. U.S. Cellular also may seek to acquire radio spectrum through purchases and exchanges with other spectrum licensees or otherwise, including by purchases of other licensees outright. However, U.S. Cellular may not be able to acquire sufficient spectrum through these types of transactions, and U.S. Cellular may not be able to complete any of these transactions on favorable terms.

U.S. Cellular is currently participating and, to the extent conducted by the FCC, likely to participate in FCC auctions of additional spectrum in the future and, during certain periods, will be subject to the FCC's anti-collusion rules, which could have an adverse effect on U.S. Cellular.

From time to time, the FCC conducts auctions through which additional spectrum is made available for the provision of wireless services. U.S. Cellular has participated in such auctions in the past, is currently participating in an auction and is likely to participate in any other auctions conducted by the FCC in the future. FCC anti-collusion rules place certain restrictions on business communications and disclosures by participants in an FCC auction. The FCC auction of spectrum in the 700 megahertz band, referred to as Auction 73, began on January 24, 2008. If certain reserve prices are not met, the FCC will follow Auction 73 with a contingent auction, referred to as Auction 76. For purposes of applying its anti-collusion rules the FCC has determined that both auctions will be treated as a single auction, which means that, in the event that the contingent auction is needed, the anti-collusion rules would last from the application deadline for Auction 73, which was December 3, 2007, until the down payment deadline for Auction 76. Applicable FCC rules place certain restrictions on business communications with other companies and on public disclosures relating to U.S. Cellular's participation in the auction. These anti-collusion rules may restrict the normal conduct of U.S. Cellular's business and/or disclosures by U.S. Cellular relating to the auctions, which could last three to six months or more. The restrictions could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.

An inability to attract and/or retain management, technical, sales and other personnel could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

Due to competition for qualified management, technical, sales and other personnel, there can be no assurance that U.S. Cellular will be able to continue to attract and/or retain qualified personnel necessary for the development of its business. The loss of the services of existing personnel as well as the failure to recruit additional qualified personnel in a timely manner would be detrimental to U.S. Cellular's growth and activities requiring expertise. The failure to attract and/or retain such personnel could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.

U.S. Cellular's assets are concentrated in the U.S. wireless telecommunications industry. As a result, its results of operations may fluctuate based on factors related entirely to conditions in this industry.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

U.S. Cellular's assets are concentrated in the U.S. wireless telecommunications industry and, in particular, in the Midwestern portion of the United States. U.S. Cellular's focus on the U.S. wireless telecommunications industry, with concentrations of assets and operations in the Midwest, together with its positioning relative to larger competitors with greater resources within the industry, may represent increased risk for investors due to the lack of diversification.

Consolidation in the telecommunications industry could adversely affect U.S. Cellular's revenues and increase its costs of doing business.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

There has been a recent trend in the telecommunications and related industries towards consolidation of service providers through joint ventures, reorganizations and acquisitions. U.S. Cellular expects this trend towards consolidation to continue, leading to larger competitors over time. U.S. Cellular may be unable to compete successfully with larger companies that have substantially greater financial, technical, marketing, sales, purchasing and distribution resources or that offer more services than U.S. Cellular, which could adversely affect U.S. Cellular's revenues and costs of doing business.

Changes in general economic and business conditions, both nationally and in the markets in which U.S. Cellular operates, could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

U.S. Cellular's operating results may be subject to factors which are outside of U.S. Cellular's control, including changes in general economic and business conditions, both nationally and in the markets in which U.S. Cellular operates. Such factors could have a material adverse effect on U.S. Cellular's business, financial condition or results of operations.

Changes in various business factors could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

Changes in any of several factors could have an adverse effect on U.S. Cellular's business, financial condition or results of operations. These factors include, but are not limited to:

- demand for or usage of services,
- the pricing of services,
- the overall size and growth rate of U.S. Cellular's customer base,
- average revenue per unit,
- penetration rates,
- churn rates,
- selling expenses,
- net customer acquisition and retention costs,
- roaming rates,
- minutes of use,
- the mix of products and services offered by U.S. Cellular and purchased by customers, and
- the costs of providing products and services.

Advances or changes in telecommunications technology, such as Voice over Internet Protocol, WiMAX, or Long-Term Evolution (LTE) could render certain technologies used by U.S. Cellular obsolete, could reduce U.S. Cellular's revenues or could increase its costs of doing business.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

The telecommunications industry is experiencing significant technological change, as evidenced by evolving industry standards, ongoing improvements in the capacity and quality of digital technology, shorter development cycles for new products and enhancements and changes in end-user requirements and preferences. Technological advances and industry changes, such as the implementation by other carriers of third generation (3G) technology, wideband technologies such as Wi-Fi and WiMAX which do not necessarily rely on FCC-licensed spectrum or the development of fourth generation technology (4G) such as LTE, could cause the technology used on U.S. Cellular's wireless networks to become less competitive or obsolete. In addition, Voice over Internet Protocol, also known as VoIP, is an emerging technological trend that could cause a decrease in demand for U.S. Cellular's telephone services. U.S. Cellular may not be able to respond to such changes and implement new technology on a timely or cost-effective basis, which could reduce its revenues or increase its costs of doing business. If U.S. Cellular cannot keep pace with these technological changes or other changes in the telecommunications industry over time, its financial condition, results of operations or ability to do business could be adversely affected.

Changes in U.S. Cellular's enterprise value, changes in the supply or demand of the market for wireless licenses, adverse developments in the business or the industry in which U.S. Cellular is involved and/or other factors could require U.S. Cellular to recognize impairments in the carrying value of U.S. Cellular's license costs, goodwill, customer lists and/or physical assets.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

A large portion of U.S. Cellular's assets consists of intangible assets in the form of licenses and goodwill. U.S. Cellular also has substantial investments in long-lived assets such as property, plant and equipment. Licenses, goodwill and other long-lived assets must be reviewed for impairment annually, or more frequently if events or changes in circumstances indicate that the asset might be impaired. U.S. Cellular reviews its licenses, goodwill and other long-lived assets for impairment annually or whenever events or circumstances indicate that the carrying amount of an asset may not be fully recoverable. An impairment loss may need to be recognized to the extent the carrying value of the assets exceeds the fair value of such assets. The amount of any such impairment charges could be significant and could have a material adverse effect on U.S. Cellular's reported financial results for the period in which the charge is taken. The estimation of fair values requires assumptions by management about factors that are highly uncertain including future cash flows, the appropriate discount rate, and other factors. Different assumptions for these factors or valuation methodologies could create materially different results.

Costs, integration problems or other factors associated with acquisitions/divestitures of properties or licenses and/or expansion of U.S. Cellular's business could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

As part of U.S. Cellular's operating strategy, U.S. Cellular may expand the markets in which it operates through the acquisition of other telecommunications service providers, the acquisition of selected licenses or operating markets from such providers or through direct investment. The acquisition of additional businesses will depend on U.S. Cellular's ability to identify suitable acquisition candidates, to negotiate acceptable terms for their acquisition and to finance any such acquisitions. U.S. Cellular also will be subject to competition for suitable acquisition candidates. Any acquisitions, if made, could divert the resources and management time of U.S. Cellular and would require integration with U.S. Cellular's existing business operations and services. As a result, there can be no assurance that any such acquisitions will occur or that any such acquisitions, if made, would be made in a timely manner or on terms favorable to U.S. Cellular or would be successfully integrated into U.S. Cellular's operations. These transactions commonly involve a number of risks, including:

- entering markets in which U.S. Cellular has limited or no direct prior experience and competitors have stronger positions;
- uncertain revenues and expenses, with the result that U.S. Cellular may not realize the growth in revenues, anticipated cost structure, profitability, or return on investment that it expects;
- difficulty of integrating the technologies, services, products, operations and personnel of the acquired businesses;
- diversion of management's attention;
- disruption of ongoing business;

- impact on U.S. Cellular's cash and available credit lines for use in financing future growth and working capital needs;
- inability to retain key personnel;
- inability to successfully incorporate acquired assets and rights into U.S. Cellular's service offerings;
- inability to maintain uniform standards, controls, procedures and policies; and
- impairment of relationships with employees, customers or vendors.

Failure to overcome these risks or any other problems encountered in these transactions could have a material adverse effect on U.S. Cellular's business, financial condition or results of operations.

Also, the FCC's recent conditioning of its approvals for certain acquisitions proposed by other carriers on such carriers' acceptance of a voluntary cap on USF funding could provide a risk or impediment to expansion by U.S. Cellular.

If U.S. Cellular expands into new telecommunications businesses or markets, it may incur significant expenditures, a substantial portion of which must be made before any revenues will be realized. Such expenditures may increase as a result of the accelerated pace of regulatory and technological changes. Such expenditures, together with the associated high initial costs of providing service in new markets, may result in reduced cash flow until an adequate revenue base is established. There can be no assurance that an adequate revenue base will be established in any new technology or market which U.S. Cellular pursues.

If U.S. Cellular expands into new telecommunications businesses or markets, it will incur certain additional risks in connection with such expansion, including increased legal and regulatory risks and possible adverse reaction by some of its current customers. Such telecommunications businesses and markets are highly competitive and, as a new entrant, U.S. Cellular may be disadvantaged. The success of U.S. Cellular's entry into new telecommunications businesses or markets will be dependent upon, among other things, U.S. Cellular's ability to select new equipment and software and to integrate the new equipment and software into its operations, to hire and train qualified personnel and to enhance existing administrative, financial and information systems to accommodate the new businesses or markets. No assurance can be given that U.S. Cellular will be successful with respect to these efforts.

If U.S. Cellular is not successful with respect to its expansion initiatives, its business, financial condition or results of operations could be adversely affected.

A significant portion of U.S. Cellular's revenues is derived from customers who buy services through independent agents and dealers who market U.S. Cellular's services on a commission basis. If U.S. Cellular's relationships with these agents and dealers are seriously harmed, its revenues could be adversely affected.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

U.S. Cellular has relationships with agents, dealers and other third-party retailers to obtain customers. Agents and dealers are independent business people who obtain customers for U.S. Cellular on a commission basis. U.S. Cellular's agents are generally in the business of selling wireless telephones, wireless service packages and other related products. U.S. Cellular's dealers include major appliance dealers, car stereo companies and mass merchants including regional and national companies. Additionally, in support of its overall internet initiatives, U.S. Cellular has recruited agents which provide services exclusively through the internet.

U.S. Cellular's business and growth depends, in part, on the maintenance of satisfactory relationships with its agents, dealers and other third-party retailers. If such relationships are seriously harmed, U.S. Cellular's revenues and, as a result, its financial condition or results of operations, could be adversely affected.

U.S. Cellular's investments in technologies which are unproven or for which success has not yet been demonstrated may not produce the benefits that U.S. Cellular expects.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

U.S. Cellular is making investments in various new technologies and service and product offerings. These investments include technologies for enhanced data services offerings. U.S. Cellular expects new services, products and solutions based on these new technologies to contribute to future growth in its revenues. However, the markets for some of these services, products and solutions are still emerging and the overall potential for these markets remains uncertain. If customer demand for these new services, products and solutions does not develop as expected, U.S. Cellular's financial condition or results of operations could be adversely affected.

A failure by U.S. Cellular to complete significant network build and system implementation as part of its plans to improve the quality, coverage, capabilities and capacity of its network could have an adverse effect on its operations.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

U.S. Cellular's business plan includes significant build activities and enhancements to its network. As U.S. Cellular deploys, expands, and enhances its network, it may need to acquire additional spectrum. Also, as U.S. Cellular continues to build out and enhance its network, U.S. Cellular must, among other things, continue to:

- lease, acquire or otherwise obtain rights to cell and switch sites;
- obtain zoning variances or other local governmental or third-party approvals or permits for network construction;
- complete and update the radio frequency design, including cell site design, frequency planning and network optimization, for each of U.S. Cellular's markets; and
- improve, expand and maintain customer care, network management, billing and other financial and management systems.

Any difficulties encountered in completing these activities, as well as problems in vendor equipment availability, technical resources, system performance or system adequacy, could delay expansion of operations and product capabilities in new or existing markets or result in increased costs in all markets. Failure to successfully build out and enhance U.S. Cellular's network and necessary support facilities and systems in a cost effective manner, and in a manner that satisfies customer expectations for quality and coverage, could have an adverse effect on U.S. Cellular's business, business prospects, financial condition or results of operations.

Financial difficulties of U.S. Cellular's key suppliers or vendors, or termination or impairment of U.S. Cellular's relationships with such suppliers or vendors, could result in a delay or termination of U.S. Cellular's receipt of equipment, services or content which could adversely affect U.S. Cellular's business and results of operations.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

U.S. Cellular depends upon certain vendors to provide it with equipment, services or content that U.S. Cellular needs to continue U.S. Cellular's network build and upgrade and to operate its business. U.S. Cellular does not have operational or financial control over any of such key suppliers and has limited influence with respect to the manner in which these key suppliers conduct their businesses. If these key suppliers experience financial difficulties and are unable to provide equipment, services or content to U.S. Cellular on a timely basis or cease to provide such equipment, services or content or if such key suppliers otherwise fail to honor their obligations to U.S. Cellular, U.S. Cellular may be unable to maintain and upgrade its network or provide services to its customers in a competitive manner, or could suffer other disruptions to its business. In that event, U.S. Cellular's business, financial condition or results of operations could be adversely affected.

U.S. Cellular has significant investments in entities that it does not control. Losses in the value of such investments could have an adverse effect on U.S. Cellular's results of operations or financial condition.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

U.S. Cellular has significant investments in entities that it does not control, including a 5.5% ownership interest in the Los Angeles SMSA Limited Partnership (the LA Partnership) which represents a significant portion of U.S. Cellular's net income. U.S. Cellular cannot provide assurance that U.S. Cellular's proportionate share of income from the LA Partnership will continue at the current level in the future. A reduction in income from the LA Partnership could adversely affect U.S. Cellular's financial condition or results of operations.

War, conflicts, hostilities and/or terrorist attacks or equipment failure, power outages, natural disasters or breaches of network or information technology security could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

Wars, conflicts, hostilities, terrorist attacks, major equipment failures, power outages, natural disasters, breaches of network or information technology security or similar disasters or failures that affect U.S. Cellular's mobile telephone switching offices, information systems, microwave links, third-party owned local and long distance networks on which U.S. Cellular relies, U.S. Cellular's cell sites or other equipment or the networks of other providers which U.S. Cellular's customers use or on which they roam could have a material adverse effect on U.S. Cellular's operations. Although U.S. Cellular has certain back-up and similar arrangements, it has not established a formal, comprehensive business continuity or emergency response plan at this time. As a result, under certain circumstances, U.S. Cellular may not be prepared to continue its operations, respond to emergencies or recover from disasters or other similar events. U.S. Cellular's inability to operate its telecommunications system or access or operate its information systems even for a limited time period, or the loss or disclosure of customer data, may result in a loss of customers or impair U.S. Cellular's ability to serve customers or attract new customers, which could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.

The market price of U.S. Cellular's Common Shares is subject to fluctuations due to a variety of factors.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

U.S. Cellular's stock price is subject to fluctuations from time to time due to a variety of factors such as:

- general economic conditions;
- wireless and telecommunications industry conditions;
- fluctuations in U.S. Cellular's quarterly customer activations, churn rate, revenues, results of operations or cash flows;
- variations between U.S. Cellular's actual financial and operating results and those expected by analysts and investors; and
- announcements by U.S. Cellular's competitors.

Any of these or other factors could adversely affect the future market price of U.S. Cellular's stock, or cause the future market price of the stock to fluctuate from time to time.

Changes in accounting requirements or in guidance or interpretations related to such requirements, changes in industry practice, identification of errors or changes in estimates or assumptions could require restatements of financial information or amendments to disclosures included in this or prior filings with the SEC.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

U.S. Cellular prepares its consolidated financial statement in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP) and files such financial statements with the SEC in accordance with the SEC s rules and regulations. The preparation of financial statements in accordance with U.S. GAAP requires U.S. Cellular to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. U.S. Cellular bases its estimates on historical experience and on various other assumptions and information that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities. Actual results may differ from estimates under different assumptions or conditions. Changes in accounting requirements or in guidance or interpretations related to such requirements, changes in industry practice, identification of errors or changes in estimates or assumptions could require restatements of financial information or amendments to disclosures included in this or prior filings with the SEC.

Restatements of financial statements by U.S. Cellular and related matters, including resulting delays in filing periodic reports with the SEC, could have an adverse effect on U.S. Cellular's credit rating, liquidity, financing arrangements, capital resources and ability to access the capital markets, including pursuant to shelf registration statements; could adversely affect U.S. Cellular's listing arrangements on the American Stock Exchange and/or New York Stock Exchange; and/or could have other negative consequences, any of which could have an adverse effect on the trading prices of U.S. Cellular's publicly traded equity and/or debt and/or U.S. Cellular's business, financial condition or results of operations.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

U.S. Cellular announced restatements of its financial statements in November 2005 and November 2006, which resulted in delays in the filing of periodic reports with the SEC. This resulted in downgrades of U.S. Cellular's credit ratings, defaults under U.S. Cellular's revolving credit agreement and certain forward contracts, non-compliance under U.S. Cellular's debt indenture, non-compliance under the requirements of the American Stock Exchange with respect to the listing of the U.S. Cellular Common Shares and non-compliance with the requirements of the New York Stock Exchange with respect to the listing of certain series of U.S. Cellular debt thereon. These or possible future restatements and delays, or any subsequent delays in filing reports with the SEC, could have adverse consequences, including the following: U.S. Cellular's credit ratings could be further downgraded, which would result in an increase in its borrowing costs and could make it more difficult for U.S. Cellular to borrow funds on satisfactory terms. The lenders on U.S. Cellular's revolving credit agreement could refuse to waive or extend a waiver of defaults, impose restrictive covenants or conditions or require increased payments and fees. The holders of debt under U.S. Cellular's indenture could attempt to assert a default and, if this is successful and U.S. Cellular does not cure the default in a timely manner, accelerate such debt. The American Stock Exchange could begin delisting proceedings with respect to the U.S. Cellular Common Shares. The New York Stock Exchange could begin delisting proceedings with respect to U.S. Cellular debt that is listed thereon. U.S. Cellular may not be able to file shelf registration statements on Form S-3 for an extended period of time, which may limit U.S. Cellular's ability to access the capital markets. U.S. Cellular may not be able to use Form S-8 registration statements relating to its employee benefit plans, which may have an adverse effect on U.S. Cellular's ability to attract and retain employees. U.S. Cellular also could face shareholder litigation or SEC enforcement action.

The pending SEC investigation regarding the restatement of U.S. Cellular's financial statements could result in substantial expenses, and could result in monetary or other penalties.

The staff of the SEC is conducting an informal inquiry regarding U.S. Cellular's accounting practices in response to the restatements that were announced in November 2005 and November 2006. U.S. Cellular is cooperating fully with the SEC staff. However, depending upon the scope and duration of the SEC's review, substantial expenses and diversion of management's attention and resources for the foreseeable future could be required. Also, if U.S. Cellular is unsuccessful in defending against this or other investigations or proceedings, U.S. Cellular could incur monetary or other penalties that could have an adverse effect on its business, financial condition or results of operations.

Changes in facts or circumstances, including new or additional information that affects the calculation of potential liabilities for contingent obligations under guarantees, indemnities or otherwise, could require U.S. Cellular to record charges in excess of amounts accrued in the financial statements, if any, which could have an adverse effect on U.S. Cellular's financial condition or results of operations.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

The preparation of financial statements requires U.S. Cellular to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. U.S. Cellular bases its estimates on historical experience and on various other assumptions and information that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities. Actual results may differ from estimates under different assumptions or conditions. Changes in facts or circumstances, including new or additional information that affects the calculation of potential liabilities for contingent obligations under guarantees, indemnities or otherwise, could require U.S. Cellular to record charges in excess of amounts accrued in the financial statements, if any, which could have an adverse effect on U.S. Cellular's financial condition or results of operations.

A failure to successfully remediate the existing material weakness in internal control over financial reporting in a timely manner or the identification of additional material weaknesses in the effectiveness of internal control over financial reporting could result in inaccurate financial statements or other disclosures or fail to prevent fraud, which could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.

Pursuant to Section 404 of the Sarbanes-Oxley Act of 2002, U.S. Cellular is required to furnish a report of management's assessment of the design and effectiveness of its internal control over financial reporting as part of its Form 10-K filed with the SEC. U.S. Cellular management is also required to report on the effectiveness of U.S. Cellular's disclosure controls and procedures. The independent auditors of U.S. Cellular are required to attest to, and report on, the effectiveness of internal control over financial reporting. As disclosed in this Form 10-K, U.S. Cellular management has identified a material weakness in internal control over financial reporting and, accordingly, has determined that internal control over financial reporting was not effective at December 31, 2007. Reference is made to Item 9A of this Form 10-K for a description of such material weakness in internal control over financial reporting. Such material weakness could result in inaccurate financial statements or other disclosures or failure to prevent fraud, which could have an adverse effect on U.S. Cellular's business, financial condition or results of operations. Further, if U.S. Cellular does not successfully remediate any known material weaknesses in a timely manner, it could be subject to sanctions by regulatory authorities such as the SEC, it could fail to timely meet its regulatory reporting obligations, or investor perceptions could be negatively affected; each of these potential consequences could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.

Early redemptions of debt or repurchases of debt, issuances of debt, changes in operating leases, changes in purchase obligations or other factors or developments could cause the amounts reported under Contractual Obligations in U.S. Cellular's Management's Discussion and Analysis of Financial Condition and Results of Operations to be different from the amounts actually incurred.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

U.S. Cellular has reported amounts with respect to future contractual obligations under the caption "Contractual Obligations" in its Management's Discussion and Analysis of Financial Condition and Results of Operations included in this Form 10-K. The actual amounts disbursed in the future may differ materially from these currently reported amounts due to various factors, including early redemptions of debt or repurchases of debt, issuances of debt, changes in operating leases, changes in purchase obligations or other factors or developments.

An increase of U.S. Cellular's debt in the future could subject U.S. Cellular to various restrictions and higher interest costs and decrease its cash flows and earnings.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

U.S. Cellular may increase its debt in the future for acquisitions or other purposes. For example, U.S. Cellular may require substantial additional financing to fund capital expenditures, license purchases, operating costs and expenses, investments, or other growth initiatives. U.S. Cellular currently relies on its committed revolving credit facility to meet any additional short-term financing needs. Other sources of financing may include public or private debt. The agreements governing any indebtedness may contain financial and other covenants that could impair U.S. Cellular's flexibility and restrict U.S. Cellular's ability to pursue growth opportunities. In addition, increased debt levels could result in higher interest costs and lower net cash flows and earnings.

Uncertainty of access to capital for telecommunications companies, deterioration in the capital markets, other changes in market conditions, changes in U.S. Cellular's credit ratings or other factors could limit or restrict the availability of financing on terms and prices acceptable to U.S. Cellular, which could require U.S. Cellular to reduce its construction, development and acquisition programs.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

U.S. Cellular and its subsidiaries operate a capital-intensive business. U.S. Cellular has used internally-generated funds and has also obtained substantial funds from external sources to finance the build-out and enhancement of markets, to fund acquisitions and for general corporate purposes. U.S. Cellular also may require substantial additional capital for, among other uses, acquisitions of providers of wireless telecommunications services, spectrum license or system acquisitions, system development and network capacity expansion. There can be no assurance that sufficient funds will continue to be available to U.S. Cellular or its subsidiaries on terms or at prices acceptable to U.S. Cellular. Uncertainty of access to capital for telecommunications companies, deterioration in the capital markets, other changes in market conditions, changes in U.S. Cellular's credit ratings or other factors could limit or restrict the availability of financing on terms and prices acceptable to U.S. Cellular, which could require U.S. Cellular to reduce its construction, development and acquisition programs. In the long term, reduction of U.S. Cellular's construction, development and acquisition programs likely would have a negative impact on U.S. Cellular's consolidated revenues, income and cash flows.

Changes in the regulatory environment or a failure by U.S. Cellular to timely or fully comply with any regulatory requirements could adversely affect U.S. Cellular's financial condition, results of operations or ability to do business.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

U.S. Cellular's operations are subject to varying degrees of regulation by the FCC, state public utility commissions and other federal, state and local regulatory agencies and legislative bodies. Adverse decisions or increased regulation by these regulatory bodies could negatively impact U.S. Cellular's operations by, among other things, increasing U.S. Cellular's costs of doing business, permitting greater competition or limiting U.S. Cellular's ability to engage in certain sales or marketing activities.

U.S. Cellular's business requires licenses granted by the FCC to provide wireless telecommunications services. Typically, such licenses are issued for initial 10-year terms and may be renewed for additional 10-year terms subject to FCC approval of the renewal applications. Failure to comply with FCC requirements in a given service area could result in the revocation of U.S. Cellular's license for that area or in the imposition of fines. Court decisions and rulemakings, including rulemakings on intercarrier access compensation and universal service, could have a substantial impact on U.S. Cellular's wireless operations. Litigation and different objectives among federal and state regulators could create uncertainty and delay U.S. Cellular's ability to respond to new regulations. U.S. Cellular is unable to predict the future actions of the various regulatory bodies that govern U.S. Cellular, but such actions could have material adverse effects on U.S. Cellular's business.

For instance, currently before the FCC for comment are proposals made by the Federal-State Joint Board and by the FCC itself to change the universal service high cost fund in various ways. These proposals include: the creation of separate wireless, wireline, and broadband funds, with an overall cap on all funds, including the wireless fund; a separate cap on payments to wireless carriers; elimination of the identical support rules, thereby requiring wireless carriers to receive support based on their own costs rather than wireline per line costs; using reverse auctions (a form of competitive bidding) to determine the amount of support to be provided to eligible telecommunications carriers, and limiting the number of carriers eligible to receive support to a given area. The FCC will consider these proposals and others in 2008. It is not certain which of them, if any, will be adopted. Adoption by the FCC of any form of cap, of limits on the number of carriers eligible to receive support for a given area or of its proposals related to identical support or reverse auctions would likely reduce the amount of support that wireless carriers would be otherwise eligible to receive.

In addition, new or amended regulatory requirements could increase U.S. Cellular's costs and divert resources from other initiatives.

U.S. Cellular attempts to timely and fully comply with all regulatory requirements. However, in certain circumstances, U.S. Cellular may not be able to timely or fully comply with all regulatory requirements due to various factors, including changes to regulatory requirements, limitations in or availability of technology, insufficient time provided for compliance, problems encountered in attempting to comply or other factors. Any failure by U.S. Cellular to timely or fully comply with any regulatory requirements could adversely affect U.S. Cellular's financial condition, results of operations or ability to do business.

Changes in income tax rates, laws, regulations or rulings, or federal or state tax assessments could have an adverse effect on U.S. Cellular's financial condition or results of operations.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

U.S. Cellular does not have control over changes in income tax rates, laws, regulations or rulings, or federal and state tax assessments. Income taxes and other federal or state taxes represent significant expenses for U.S. Cellular. Accordingly, changes in income tax rates, laws, regulations or rulings, or federal and state tax assessments could have an adverse effect on U.S. Cellular's financial condition or results of operations.

Settlements, judgments, restraints on its current or future manner of doing business or legal costs resulting from pending and future litigation could have an adverse effect on U.S. Cellular's financial condition, results of operations or ability to do business.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

U.S. Cellular is regularly involved in a number of legal proceedings before the FCC and various state and federal courts. Such legal proceedings can be complex, costly, protracted and highly disruptive to business operations by diverting the attention and energies of management and other key personnel.

The assessment of legal proceedings is a highly subjective process that requires judgments about future events. The amounts ultimately received or paid upon settlement or other resolution of litigation and other contingencies may differ materially from amounts accrued in the financial statements. In addition, litigation or similar proceedings could impose restraints on U.S. Cellular's current or future manner of doing business. Such potential outcomes could have an adverse effect on U.S. Cellular's financial condition, results of operations or ability to do business.

The possible development of adverse precedent in litigation or conclusions in professional studies to the effect that radio frequency emissions from handsets, wireless data devices and/or cell sites cause harmful health consequences, including cancer or tumors, or may interfere with various electronic medical devices such as pacemakers, could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

Media reports have suggested that certain radio frequency emissions from wireless handsets may be linked to various health problems, including cancer or tumors, and may interfere with various electronic medical devices, including hearing aids and pacemakers. Concerns over radio frequency emissions may discourage use of wireless handsets or expose U.S. Cellular to potential litigation. Any resulting decreases in demand for wireless services, or costs of litigation and damage awards, could impair U.S. Cellular's ability to sustain profitability.

In addition, some studies have indicated that some aspects of using wireless phones while driving may impair drivers' attention in certain circumstances, making accidents more likely. These concerns could lead to potential litigation relating to accidents, deaths or serious bodily injuries, any of which could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.

Numerous state and local legislative bodies have proposed legislation restricting or prohibiting the use of wireless phones while driving motor vehicles. These laws or other laws, if passed, prohibiting or restricting the use of wireless phones while driving, could have the effect of reducing customer usage, which could cause an adverse effect on U.S. Cellular's business, financial condition, or results of operations.

There are potential conflicts of interests between TDS and U.S. Cellular.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

TDS owns over 80% of the combined total of both classes of common stock of U.S. Cellular, including a majority of the outstanding Common Shares and 100% of the Series A Common Shares, and controls approximately 95% of their combined voting power. As a result, TDS is effectively able to elect all of U.S. Cellular's nine directors and otherwise control the management and operations of U.S. Cellular. Four of nine members of the U.S. Cellular board are executive officers of TDS or U.S. Cellular. Four directors of U.S. Cellular are also directors of TDS. Directors and officers of TDS who are also directors or officers of U.S. Cellular, and TDS as U.S. Cellular's controlling shareholder, are in positions involving the possibility of conflicts of interest with respect to certain transactions concerning U.S. Cellular. When the interests of TDS and U.S. Cellular diverge, TDS may exercise its influence in its own best interests.

U.S. Cellular and TDS have entered into contractual arrangements governing certain transactions and relationships between them. These agreements were executed prior to the initial public offering of the U.S. Cellular's Common Shares and were not the result of arm's-length negotiations. Accordingly, there is no assurance that the terms and conditions of these agreements are as favorable to U.S. Cellular as could have been obtained from unaffiliated third parties. See "Certain Relationships and Related Transactions" in this Form 10-K.

Conflicts of interest may arise between TDS and U.S. Cellular when faced with decisions that could have different implications for U.S. Cellular and TDS, including technology decisions, financial budgets, the payment of distributions by U.S. Cellular, business activities and other matters. TDS also may take action that favors its other businesses and the interests of its shareholders over U.S. Cellular's wireless business and the interests of U.S. Cellular shareholders and debt holders. Because TDS controls U.S. Cellular, conflicts of interest could be resolved in a manner adverse to U.S. Cellular and its other shareholders or its debt holders.

The U.S. Cellular restated certificate of incorporation provides that, so long as not less than 500,000 Series A Common Shares are outstanding, U.S. Cellular, without the written consent of TDS, shall not, directly or indirectly own, invest or otherwise have an interest in, lease, operate or manage any business other than a business engaged solely in the construction of, the ownership of interests in and/or the management of wireless telephone systems. This limitation on the scope of U.S. Cellular's potential business could hurt the growth of U.S. Cellular's business. This restriction would preclude U.S. Cellular from pursuing attractive related or unrelated business opportunities unless TDS consents in writing. TDS has no obligation to consent to any business opportunities proposed by U.S. Cellular and may withhold its consent in its own best interests.

Certain matters, such as control by TDS and provisions in the U.S. Cellular restated certificate of incorporation, may serve to discourage or make more difficult a change in control of U.S. Cellular.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

TDS owns over 80% of the combined total of both classes of common stock of U.S. Cellular, including a majority of the outstanding Common Shares and 100% of the Series A Common Shares, and controls approximately 95% of their combined voting power. As a result, TDS is effectively able to elect all of U.S. Cellular's nine directors and otherwise control the management and operations of U.S. Cellular. The control of U.S. Cellular by TDS may tend to deter non-negotiated tender offers or other efforts to obtain control of U.S. Cellular and thereby deprive shareholders of opportunities to sell shares at prices higher than those prevailing in the market.

The U.S. Cellular restated certificate of incorporation also contains provisions which may serve to discourage or make more difficult a change in control of U.S. Cellular without the support of TDS or without meeting various other conditions. In particular, the authorization of multiple classes of capital stock with different voting rights could prevent shareholders from profiting from an increase in the market value of their shares as a result of a change in control of U.S. Cellular by delaying or preventing such change in control.

The U.S. Cellular restated certificate of incorporation also authorizes the U.S. Cellular board of directors to designate and issue Preferred Shares in one or more classes or series from time to time. Generally, no further action or authorization by the shareholders is necessary prior to the designation or issuance of the additional Preferred Shares authorized pursuant to the U.S. Cellular restated certificate of incorporation unless applicable laws or regulations would require such approval in a given instance. Such Preferred Shares could be issued in circumstances that would serve to preserve TDS' control of U.S. Cellular.

Any of the foregoing events or other events could cause revenues, customer additions, operating income, capital expenditures and or any other financial or statistical information to vary from U.S. Cellular's forward-looking estimates by a material amount.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

U.S. Cellular may from time-to-time provide forward-looking information, including estimates of future operating income; depreciation, amortization and accretion expenses; service revenues; net retail customer activations; and/or capital expenditures. Any such forward-looking information includes consideration of known or anticipated changes to the extent disclosed, but unknown or unanticipated events, including the risks discussed above, could cause such estimates to differ from the actual amounts by a material amount.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

The properties for mobile telephone switching offices, cell sites and retail locations are either owned or leased under long-term leases by U.S. Cellular, one of its subsidiaries or the partnership or corporation which holds the license issued by the FCC. U.S. Cellular has not experienced major problems with obtaining zoning approval for cell sites or operating facilities and does not anticipate any such problems in the future which are or will be material to U.S. Cellular and its subsidiaries as a whole. As of December 31, 2007, U.S. Cellular's property, plant and equipment, net of accumulated depreciation, totaled approximately \$2.6 billion.

U.S. Cellular leases office space for its headquarters buildings in Chicago, Illinois and Bensenville, Illinois. U.S. Cellular leases four regional offices. U.S. Cellular also has five customer care centers, of which one is owned and four are leased.

U.S. Cellular considers the properties owned or leased by it and its subsidiaries to be suitable and adequate for their respective business operations.

Item 3. Legal Proceedings

U.S. Cellular may from time to time be involved in legal proceedings before the FCC and/or various state and federal courts. In some cases, the litigation may involve disputes regarding rights to certain wireless telephone systems and other interests. If U.S. Cellular believes that a loss arising from such legal proceedings is probable and can be reasonably estimated, an amount is accrued in the financial statements for the estimated loss. If only a range of probable loss can be determined, the best estimate within that range is accrued; if none of the estimates within that range is better than another, the low end of the range is accrued. The assessment of legal proceedings is a highly subjective process that requires judgments about future events. The legal proceedings are reviewed at least quarterly to determine the adequacy of the accruals and related financial statement disclosure. The ultimate settlement of proceedings may differ materially from amounts accrued in the financial statements and could have a material effect on the results of operations, financial condition or cash flows.

Item 4. Submission of Matters to a Vote of Security Holders

No matters were submitted to a vote of securities holders during the fourth quarter of 2007.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Except as set forth below in this Item 5, the information required by this item is incorporated by reference from Exhibit 13 to this document, Annual Report sections entitled "Stock and Dividend Information" and "Consolidated Quarterly Information (Unaudited)".

The Board of Directors of U.S. Cellular has authorized the repurchase of up to 1% of the outstanding U.S. Cellular Common Shares held by non-affiliates in each three month period, primarily for use in employee benefit plans (the "Limited Authorization"). This authorization does not have an expiration date.

On March 6, 2007, the Board of Directors of U.S. Cellular authorized the repurchase of up to 500,000 Common Shares of U.S. Cellular (the "Additional Authorization") from time to time through open market purchases, block transactions, private transactions or other methods. This authorization was scheduled to expire on March 6, 2010. However, as discussed below, because this authorization was fully utilized on April 4, 2007, no further purchases are available under this authorization.

On April 4, 2007, U.S. Cellular entered into an agreement to purchase 670,000 of its Common Shares from an investment banking firm in a private transaction in connection with an accelerated share repurchase ("ASR"). This amount represents 170,000 shares under the Limited Authorization and 500,000 shares under the Additional Authorization, both described above. Including a per share discount and commission payable to the investment banking firm, the shares were repurchased for approximately \$49.1 million or \$73.22 per share. The repurchased shares are being held as treasury shares.

On July 10, 2007, pursuant to its Limited Authorization, U.S. Cellular entered into another ASR to purchase 168,000 of its Common Shares from an investment banking firm in a private transaction under the Limited Authorization. Including a commission payable to the investment banking firm, the shares were repurchased for approximately \$16.1 million or \$96.10 per share. The repurchased shares are being held as treasury shares.

On October 25, 2007, pursuant to its Limited Authorization, U.S. Cellular entered into another ASR to purchase 168,000 of its Common Shares, from an investment banking firm in a private transaction. Including a commission payable to the investment banking firm, the shares were repurchased for approximately \$16.2 million or \$96.52 per share. The repurchased shares are being held as treasury shares.

In connection with each ASR, the investment banking firm will purchase an equivalent number of shares in the open market over time. Each program must be completed within two years of the trade date of the respective ASR. At the end of each program, U.S. Cellular will receive or pay a price adjustment based on the average price of shares acquired by the investment banking firm pursuant to the ASR during the purchase period, less a negotiated discount. Generally, the purchase price adjustment can be settled, at U.S. Cellular's option, in cash or in U.S. Cellular Common Shares. The subsequent purchase price adjustments are reflected in Additional paid-in capital.

See further detail on the ASRs at Note 18, Common Shareholders' Equity, of the Notes to the Consolidated Financial Statements.

The following table provides certain information with respect to all purchases made by or on behalf of U.S. Cellular, and any open market purchase made by any affiliated purchaser (as defined by the SEC) of U.S. Cellular, of U.S. Cellular Common Shares during the fourth quarter of 2007.

U.S. CELLULAR PURCHASES OF COMMON SHARES

Period	(a) Total Number of Common Shares Purchased	(b) Average Price Paid per Common Share (1)	(c) Total Number of Common Shares Purchased as Part of Publicly Announced Plans or Programs (2)	(d) Maximum Number of Common Shares that May Yet Be Purchased Under the Plans or Programs (3)
October 1 31, 2007	168,000	\$ 96.52	168,000	
November 1 30, 2007				
December 1 31, 2007				
Total for or as of end of the quarter ended December 31, 2007	168,000	\$ 96.52	168,000	

(1) This represents the initial price per share paid in the October 25, 2007 ASR transaction. As noted above, at the end of the ASR transaction, U.S. Cellular will receive or pay a price adjustment based on the average price of shares acquired by the investment banking firm pursuant to the ASR during the purchase period. This ASR was settled in January 2008 and U.S. Cellular received \$2.5 million in cash proceeds upon such settlement.

(2) Reflects the purchase of the Limited Authorization applicable to the three month period from October 25, 2007 to January 25, 2008.

(3) As of October 25, 2007, U.S. Cellular purchased 168,000 Common Shares, utilizing substantially the maximum number of shares available for purchase under the Limited Authorization. Accordingly, the amount in this column is reported as zero at the end of each period because U.S. Cellular acquired substantially the maximum number of shares available for purchase in such period under the Limited Authorization on October 25, 2007.

The following is additional information with respect to the Limited Authorization:

- i. The date the program was announced was May 15, 2000 by Form 10-Q.
- ii. The share amount originally approved was up to 1% of the number of outstanding Common Shares of U.S. Cellular not held by TDS or any affiliate thereof in any three-month period. As of March 31, 2007, this permitted U.S. Cellular to acquire slightly more than 170,000 Common Shares in a three-month period based on the number of

unaffiliated Common Shares outstanding on such date, reflecting the fact that no shares were purchased within the preceding three months. U.S. Cellular utilized this authorization to purchase 170,000 shares in connection with the April 4, 2007 ASR as discussed above. Because U.S. Cellular acquired substantially the maximum number of shares available under the authorization on April 4, 2007, it was not able to purchase any additional shares until after July 4, 2007. As of July 10, 2007, the number of shares that U.S. Cellular could purchase under this authorization was slightly more than 168,000 Common Shares. As noted above, U.S. Cellular entered into an ASR on July 10, 2007 with respect to 168,000 Common Shares. As of October 10, 2007, the number of shares that U.S. Cellular could purchase under this authorization was slightly more than 168,000 Common Shares. As noted above, U.S. Cellular entered into an ASR on October 25, 2007 with respect to 168,000 Common Shares.

- iii. There is no expiration date for the program.

- iv. The Limited Authorization did not expire during the fourth quarter of 2007.

- v. U.S. Cellular has not determined to terminate the foregoing Common Share repurchase program prior to expiration, or to cease making further purchases thereunder, during the fourth quarter of 2007.

Item 6. Selected Financial Data

Incorporated by reference from Exhibit 13 to this Form 10-K, Annual Report section entitled Selected Consolidated Financial Data, except for ratios of earnings to fixed charges, which are incorporated herein by reference from Exhibit 12 to this Form 10-K.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Incorporated by reference from Exhibit 13 to this Form 10-K, Annual Report section entitled Management's Discussion and Analysis of Financial Condition and Results of Operations.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Incorporated by reference from Exhibit 13 to this Form 10-K, Annual Report section entitled Market Risk.

Item 8. Financial Statements and Supplementary Data

Incorporated by reference from Exhibit 13 to this Form 10-K, Annual Report sections entitled Consolidated Statements of Operations, Consolidated Statements of Cash Flows, Consolidated Balance Sheets, Consolidated Statements of Common Shareholders' Equity, Notes to Consolidated Financial Statements, Consolidated Quarterly Information (Unaudited), Management's Report on Internal Control Over Financial Reporting and Report of Independent Registered Public Accounting Firm.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

U.S. Cellular maintains disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) that are designed to ensure that information required to be disclosed in its reports filed or submitted under the Exchange Act is processed, recorded, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to U.S. Cellular's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow for timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives.

As required by SEC Rule 13a-15(b), U.S. Cellular carried out an evaluation, under the supervision and with the participation of management, including its Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of U.S. Cellular's disclosure controls and procedures as of the end of the period covered by this Annual Report. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that U.S. Cellular's disclosure controls and procedures were not effective as of December 31, 2007 because of the material weakness in accounting for income taxes described below. Notwithstanding the material weakness that existed as of December 31, 2007, management has concluded that the consolidated financial statements included in this Annual Report on Form 10-K present fairly, in all material respects, the financial position, results of operations and cash flows of U.S. Cellular in conformity with accounting principles generally accepted in the United States of America (GAAP).

Management's Report on Internal Control Over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act. U.S. Cellular's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP. U.S. Cellular's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the issuer; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP, and that receipts and expenditures of the issuer are being made only in accordance with authorizations of management and, where required, the board of directors of the issuer; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the issuer's assets that could have a material effect on the interim or annual consolidated financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Under the supervision and with the participation of U.S. Cellular's management, including its Chief Executive Officer and Chief Financial Officer, U.S. Cellular conducted an evaluation of the effectiveness of its internal control over financial reporting as of December 31, 2007, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis. Management identified the following material weakness in internal control over financial reporting as of December 31, 2007:

U.S. Cellular did not maintain effective controls over the completeness, accuracy, presentation and disclosure of its accounting for income taxes. Specifically, U.S. Cellular did not have effective controls designed and in place to monitor the difference between the income tax basis and the financial reporting basis of assets and liabilities and reconcile the resulting basis difference to its deferred income tax asset and liability balances. This control deficiency affected deferred income tax asset and liability accounts and income taxes payable. This control deficiency resulted in the restatement of U.S. Cellular's annual consolidated financial statements for 2005, 2004, 2003 and 2002, the interim consolidated financial statements for all quarters in 2005, 2004 and 2003, the interim consolidated financial statements for the first and second quarters of 2006, as well as adjustments, including audit adjustments, to the 2006 third quarter interim consolidated financial statements and the 2006 and 2007 annual consolidated financial statements. Additionally, this control deficiency could result in a misstatement of the aforementioned accounts that would result in a material misstatement to U.S. Cellular's interim or annual consolidated financial statements that would not be prevented or detected. Accordingly, our management has determined that this control deficiency constitutes a material weakness.

As a result of the material weakness identified above, management has concluded that U.S. Cellular did not maintain effective internal control over financial reporting as of December 31, 2007 based on criteria established in *Internal Control - Integrated Framework* issued by the COSO.

The effectiveness of U.S. Cellular's internal control over financial reporting as of December 31, 2007 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in the firm's report which is incorporated by reference into Item 8 of this Annual Report on Form 10-K from Exhibit 13 filed herewith.

Changes in Internal Control Over Financial Reporting

The following changes in U.S. Cellular's internal control over financial reporting during the quarter ended December 31, 2007 have materially affected, or are reasonably likely to materially affect U.S. Cellular's internal control over financial reporting:

Property, Plant and Equipment During the fourth quarter of 2007, U.S. Cellular implemented enhancements to internal controls related to accounting for property, plant and equipment, including controls to ensure accurate recording of transfers and disposals of assets. The scope of these changes include improvements to the fixed assets management system and supporting processes and procedures, including a cycle count program covering cell sites and switches and improved financial system integration, which management believes has enhanced its internal controls related to property, plant and equipment. Extensive training was provided related to these enhanced procedures and controls. As a result of these changes in internal control, management has determined that the control deficiencies associated with accounting for property, plant and equipment no longer constitute a material weakness as of December 31, 2007. U.S. Cellular has ongoing activities in this area to further improve the related processes and controls.

Remediation Activities Related to Previously Disclosed Material Weaknesses in Internal Control Over Financial Reporting

U.S. Cellular previously reported in its Quarterly Report on Form 10-Q for the period

ended March 31, 2007 that it had remediated the material weakness in accounting for forward contracts and related derivative instruments that had existed at December 31, 2006.

In addition to the material weakness related to income tax accounting identified above, management had also reported the following material weaknesses in internal control over financial reporting from December 31, 2005 through September 30, 2007:

1. U.S. Cellular did not maintain a sufficient complement of personnel with an appropriate level of accounting knowledge, experience and training in the application of GAAP commensurate with the financial reporting requirements and the complexity of U.S. Cellular's operations and transactions. Further, U.S. Cellular did not have a sufficient number of qualified personnel to create, communicate and apply accounting policies and procedures in compliance with GAAP. This control deficiency contributed to the material weaknesses discussed herein and the restatement of U.S. Cellular's annual consolidated financial statements for 2005, 2004, 2003 and 2002, the interim consolidated financial statements for all quarters in 2005, 2004 and 2003, the interim consolidated financial statements for the first and second quarters of 2006, as well as adjustments, including audit adjustments, to the 2006 third quarter interim consolidated financial statements and the 2006 annual consolidated financial statements. Additionally, this control deficiency could result in a misstatement of substantially all accounts and disclosures that would result in a material misstatement to U.S. Cellular's interim or annual consolidated financial statements that would not be prevented or detected.
2. U.S. Cellular did not maintain effective controls over its accounting for property, plant and equipment. Specifically, effective controls were not designed and in place to ensure accurate recording of transfers and disposals of equipment. This control deficiency affected depreciation expense, property, plant and equipment and accumulated depreciation. This control deficiency resulted in the restatement of U.S. Cellular's annual consolidated financial statements for 2005, 2004 and 2003, the interim consolidated financial statements for all quarters in 2005 and 2004, the interim consolidated financial statements for the first and second quarters of 2006, as well as adjustments, including audit adjustments, to the 2006 third quarter interim consolidated financial statements and the 2006 annual consolidated financial statements. Additionally, this control deficiency could result in a misstatement of the aforementioned accounts that would result in a material misstatement to U.S. Cellular's interim or annual consolidated financial statements that would not be prevented or detected.

As indicated above in the Changes in Internal Control Over Financial Reporting, management determined that the control deficiencies related to accounting for property, plant and equipment no longer constitute a material weakness as of December 31, 2007. Management has addressed the material weakness in internal control over financial reporting related to personnel and policies and is currently addressing the material weakness in internal control over financial reporting related to income tax accounting. Management's remediation activities included the following:

Personnel and Policies TDS provides shared services to U.S. Cellular including assistance on technical accounting issues and external financial reporting. TDS and U.S. Cellular have undertaken a multi-year program to improve technical accounting expertise, documentation of policies, and automation of accounting and financial reporting. This program has included the following activities:

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

- Accounting Review Committee - The Accounting Review Committee consists of TDS Corporate Controller, U.S. Cellular's Controller and TDS Telecom's Controller, along with members of their accounting teams. The Committee oversees the accounting treatment for current, unusual or nonrecurring matters. The Committee has retained external financial accounting experts to advise the Committee on technical accounting matters and, in addition, to provide updates related to current accounting developments on a

quarterly basis.

- **Accounting Policies and Processes** U.S. Cellular, with the assistance of external consultants, has performed a comprehensive review of key accounting policies and processes to remediate the material weaknesses in internal control over financial reporting that existed at December 31, 2006 and to improve the design and operating effectiveness of controls and processes. Such improvements included the development and enhancement of written accounting policies and procedures, including policies and procedures for new accounting pronouncements, as well as communication and training related to the policies and procedures. In addition, U.S. Cellular formalized policies and procedures related to researching and documenting accounting matters impacting U.S. Cellular, including reviews of conclusions reached at multiple levels.
- **Training** U.S. Cellular, with the assistance of external consultants, developed and conducted a comprehensive training program specific to the needs of accounting personnel. Formal group training sessions were conducted in 2006 and 2007, and additional classes will be conducted in the future. As a result of these training efforts, management has developed greater expertise within each organization with respect to pertinent areas of accounting.
- **Recruiting** TDS and U.S. Cellular have added several new director, manager and staff level positions which enhanced the overall level of technical accounting expertise and enabled improvements in controls and processes. Specifics related to each company are as follows:
 - TDS a Manager, Accounting and Reporting was added in the second quarter of 2005; a Manager, External Reporting was added in the third quarter of 2005; a Director of Accounting Policy and a Director, Internal Controls and SOX Compliance were added in the third quarter of 2006; a Manager of Accounting Policy was added in the first quarter of 2007; and a Director of Tax Accounting was added in the third quarter 2007. A new Senior Vice President and Corporate Controller was added in the third quarter of 2007 as a result of the retirement of the previous Senior Vice President and Corporate Controller.
 - U.S. Cellular a Vice President and Controller was added in the second quarter of 2005 and promoted to Executive Vice President Finance and Chief Financial Officer in the first quarter of 2007; a Director, Accounting Policy and Reporting was added in the second quarter of 2006; a Manager, Accounting Policy and a Director of Internal Controls were added in the fourth quarter of 2006; a Manager, Accounting Policy and Research, a Director of Operations Accounting and a Director Remediation Projects were added in the second quarter of 2007; a Manager of Internal Controls, a Manager of Consolidations and a Manager of Operating Markets Accounting were added in the third quarter of 2007; and a second Director of Operations Accounting was added in the fourth quarter of 2007.

As a result of these activities and the effective operation of related processes and procedures, management has concluded that the control deficiencies associated with personnel and accounting policies and procedures no longer constitute a material weakness at December 31, 2007. U.S. Cellular has ongoing activities in this area to further improve the related processes and controls.

Income Tax Accounting TDS provides shared services to U.S. Cellular including assistance with accounting for income taxes. During 2007, TDS implemented tax provisioning software which enhanced internal controls related to accounting for income taxes on a TDS enterprise-wide basis, including U.S. Cellular. Further, during 2007, TDS took the following steps (which individually were not considered to have a material effect on U.S. Cellular's internal control over financial reporting):

- With the assistance of external tax advisors, enhanced controls and policies with respect to monitoring the difference between the income tax basis and financial reporting basis of assets and liabilities and reconciling the difference to the deferred income tax asset and liability balances. The scope of this project encompassed controls over income taxes on a TDS enterprise-wide basis, including U.S. Cellular.
- Provided extensive training to associates to strengthen their technical expertise in GAAP, including accounting for income taxes.
- Reorganized the tax department to have a separate group responsible solely for income tax accounting which reports directly to the Senior Vice President and Corporate Controller, and hired a Director of Tax Accounting in the third quarter of 2007 to lead this group.

U.S. Cellular is in the process of further enhancing controls to address the remaining income tax accounting control deficiencies which together constitute a material weakness at December 31, 2007.

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM
ON FINANCIAL STATEMENT SCHEDULE**

To the Board of Directors of

United States Cellular Corporation:

Our audits of the consolidated financial statements and of the effectiveness of internal control over financial reporting referred to in our report dated February 29, 2008 appearing in the Annual Report to Shareholders of United States Cellular Corporation (which report and consolidated financial statements are incorporated by reference in this Annual Report on Form 10-K) also included an audit of the financial statement schedule listed in Item 15(a)(2) of this Form 10-K. In our opinion, this financial statement schedule presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements.

**LOS ANGELES SMSA LIMITED PARTNERSHIP
FINANCIAL STATEMENTS**

U.S. Cellular's investment in Los Angeles SMSA Limited Partnership is accounted for by the equity method. Pursuant to Rule 3-09 of Regulation S-X, U.S. Cellular is required to include audited financial statements of such investment in this Form 10-K filing. The partnership's financial statements were obtained by U.S. Cellular as a limited partner. U.S. Cellular's ownership percentage of Los Angeles SMSA Limited Partnership is 5.5%.

S-3

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Partners of

Los Angeles SMSA Limited Partnership:

We have audited the accompanying balance sheets of Los Angeles SMSA Limited Partnership (the Partnership) as of December 31, 2007 and 2006, and the related statements of operations, changes in partners' capital, and cash flows for each of the three years in the period ended December 31, 2007. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Partnership is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of the Partnership's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such financial statements present fairly, in all material respects, the financial position of the Partnership as of December 31, 2007 and 2006, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2007, in conformity with accounting principles generally accepted in the United States of America.

NOTES TO FINANCIAL STATEMENTS**YEARS ENDED DECEMBER 31, 2007, 2006 AND 2005****(Dollars in thousands)****1. ORGANIZATION AND MANAGEMENT**

Los Angeles SMSA Limited Partnership Los Angeles SMSA Limited Partnership (the Partnership) was formed on January 1, 1984. The principal activity of the Partnership is providing cellular service in the Los Angeles metropolitan service area.

The partners and their respective ownership percentages as of December 31, 2007, 2006 and 2005 are as follows:

General Partner:	
AirTouch Cellular* (General Partner)	40.0%
Limited Partners:	
AirTouch Cellular*	42.30%
Cellco Partnership	12.20%
United States Cellular Corporation	5.50%

*AirTouch Cellular is a wholly-owned subsidiary of Verizon Wireless (VAW) LLC (a wholly-owned subsidiary of Cellco Partnership (Cellco) doing business as Verizon Wireless).

2. SIGNIFICANT ACCOUNTING POLICIES

Use of Estimates The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from those estimates. Estimates are used for, but not limited to, the accounting for: allocations, allowance for uncollectible accounts receivable, unbilled revenue, fair value of financial instruments, depreciation and amortization, useful lives and impairment of assets, accrued expenses, and contingencies. Estimates and assumptions are periodically reviewed and the effects of any material revisions are reflected in the financial statements in the period that they are determined to be necessary.

Revenue Recognition The Partnership earns revenue by providing access to the network (access revenue) and for usage of the network (airtime/usage revenue), which includes roaming and long distance revenue. In general, access revenue is billed one month in advance and is recognized when earned; the unearned portion is classified in advance billings. Airtime/usage revenue, roaming revenue and long distance revenue are recognized when service is rendered and included in unbilled revenue until billed. Equipment sales revenue associated with the sale of wireless handsets and accessories is recognized when the products are delivered to and accepted by the customer, as this is considered to be a separate earnings process from the sale of wireless services. In accordance with the provisions of Emerging Issues Task Force (EITF) Issue No. 00-21, *Accounting for Revenue Arrangements with Multiple Deliverables*, the Partnership recognizes customer activation fees as part of equipment revenue. The roaming rates charged by the Partnership to Cellco do not necessarily reflect current market rates. The Partnership will continue to re-evaluate the rates on a periodic basis (see Note 5). The Partnership's revenue recognition policies are in accordance with the Securities and Exchange Commission's (SEC) Staff Accounting Bulletin (SAB) No. 101, *Revenue Recognition in Financial Statements*, SAB No. 104, *Revenue Recognition*, and EITF Issue No. 00-21.

Operating Costs and Expenses Operating expenses include expenses incurred directly by the Partnership, as well as an allocation of certain administrative and operating costs incurred by Cellco or its affiliates on behalf of the Partnership. Employees of Cellco provide services performed on behalf of the Partnership. These employees are not employees of the Partnership and therefore, operating expenses include direct and allocated charges of salary and employee benefit costs for the services provided to the Partnership. The General Partner believes such allocations, principally based on the Partnership's percentage of total customers, customer gross additions or minutes-of-use, are reasonable. The roaming rates charged to the Partnership by Cellco do not necessarily reflect current market rates. The Partnership will continue to re-evaluate the rates on a periodic basis (see Note 5).

Income Taxes The Partnership is not a taxable entity for federal and state income tax purposes. Any taxable income or loss is apportioned to the partners based on their respective partnership interests and is reported by them individually.

Inventory Inventory is owned by Cellco and held on consignment by the Partnership. Such consigned inventory is not recorded on the Partnership's financial statements. Upon sale, the related cost of the inventory is transferred to the Partnership at Cellco's cost basis and included in the accompanying Statements of Operations.

Allowance for Doubtful Accounts The Partnership maintains allowances for uncollectible accounts receivable for estimated losses resulting from the inability of customers to make required payments. Estimates are based on the aging of the accounts receivable balances and the historical write-off experience, net of recoveries.

Property, Plant and Equipment Property, plant and equipment primarily represents costs incurred to construct and expand capacity and network coverage on Mobile Telephone Switching Offices and cell sites. The cost of property, plant and equipment is depreciated over its estimated useful life using the straight-line method of accounting. Leasehold improvements are amortized over the shorter of their estimated useful lives or the term of the related lease. Major improvements to existing plant and equipment are capitalized. Routine maintenance and repairs that do not extend the life of the plant and equipment are charged to expense as incurred.

Upon the sale or retirement of property, plant and equipment, the cost and related accumulated depreciation or amortization is eliminated from the accounts and any related gain or loss is reflected in the Statements of Operations.

Network engineering costs incurred during the construction phase of the Partnership's network and real estate properties under development are capitalized as part of property, plant and equipment and recorded as construction-in-progress until the projects are completed and placed into service.

FCC Licenses The Federal Communications Commission (FCC) issues licenses that authorize cellular carriers to provide service in specific cellular geographic service areas. The FCC grants licenses for terms of up to ten years. In

1993 the FCC adopted specific standards to apply to cellular renewals, concluding it will reward a license renewal to a cellular licensee that meets certain standards of past performance. Historically, the FCC has granted license renewals routinely. The current terms of the Partnership's FCC licenses expire in April 2017, October 2014 and February 2016. The General Partner believes it will be able to meet all requirements necessary to secure renewal of the Partnership's cellular licenses. FCC wireless licenses totaling \$79,543 are recorded on the books of the Partnership as of December 31, 2007 and 2006. There are additional wireless licenses issued by the FCC that authorize the Partnership to provide cellular service recorded on the books of Cellco.

Valuation of Assets Long-lived assets, including property, plant and equipment and intangible assets with finite lives, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. The carrying amount of a long-lived asset is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. The impairment loss, if determined to be necessary, would be measured as the amount by which the carrying amount of the asset exceeds the fair value of the asset.

The FCC licenses recorded on the books of the Partnership are evaluated for impairment by the General Partner. In addition, Cellco believes that under the Partnership agreement it has the right to allocate, based on a reasonable methodology, any impairment loss recognized by Cellco for all licenses included in Cellco's national footprint. Cellco does not charge the Partnership for the use of any FCC license recorded on its books (except for the annual cost of \$27,035 related to the spectrum lease, as discussed in Note 5).

The FCC licenses, on the books of Cellco and the Partnership, are treated as an indefinite life intangible asset under the provisions of Statement of Financial Accounting Standards (SFAS) No. 142, *Goodwill and Other Intangible Assets* and are not amortized, but rather are tested for impairment annually or between annual dates, if events or circumstances warrant. All of the licenses in Cellco's nationwide footprint are tested in the aggregate for impairment under SFAS No. 142.

Cellco evaluates its wireless licenses for potential impairment annually, and more frequently if indications of impairment exist. Cellco tests its licenses on an aggregate basis, in accordance with EITF No. 02-7, *Unit of Accounting for Testing Impairment of Indefinite-Lived Intangible Assets*, using a direct value methodology in accordance with SEC Staff Announcement No. D-108, Use of the Residual Method to Value Acquired Assets other than Goodwill. The direct value approach determines fair value using estimates of future cash flows associated specifically with the wireless licenses. If the fair value of the aggregated wireless licenses is less than the aggregated carrying amount of the wireless licenses, an impairment is recognized. Cellco evaluated its wireless licenses for potential impairment as of December 15, 2007 and December 15, 2006. These evaluations resulted in no impairment of Cellco's wireless licenses.

Concentrations To the extent the Partnership's customer receivables become delinquent, collection activities commence. No single customer is large enough to present a significant financial risk to the Partnership. The Partnership maintains an allowance for losses based on the expected collectibility of accounts receivable.

Cellco and the Partnership rely on local and long distance telephone companies, some of whom are related parties, and other companies to provide certain communication services. Although management believes alternative telecommunications facilities could be found in a timely manner, any disruption of these services could potentially have an adverse impact on the Partnership's operating results.

Although Cellco and the General Partner attempt to maintain multiple vendors for its network assets and inventory, which are important components of its operations, they are currently acquired from only a few sources. Certain of these products are in turn utilized by the Partnership and are important components of the Partnership's operations. If the suppliers are unable to meet Cellco's needs as it builds out its network infrastructure and sells service and equipment, delays and increased costs in the expansion of the Partnership's network infrastructure or losses of potential customers could result, which would adversely affect operating results.

Financial Instruments The Partnership's trade receivables and payables are short-term in nature, and accordingly, their carrying value approximates fair value.

Due from General Partner Due from General Partner principally represents the Partnership's cash position. Cellco manages, on behalf of the General Partner, all cash, inventory, investing and financing activities of the Partnership. As such, the change in due from General Partner is reflected as an investing activity or a financing activity in the Statements of Cash Flows depending on whether it represents a net asset or net liability for the Partnership.

Additionally, administrative and operating costs incurred by Cellco on behalf of the General Partner, as well as property, plant, and equipment transactions with affiliates, are charged to the Partnership through this account. Interest income or interest expense is based on the average monthly outstanding balance in this account and is calculated by applying the General Partner's average cost of borrowing from Verizon Global Funding, a wholly-owned subsidiary of Verizon Communications, Inc., which was approximately 5.4%, 5.4% and 4.8% for the years ended December 31, 2007, 2006 and 2005, respectively. Included in net interest income is interest income of \$34,304, \$38,286 and \$25,354 for the years ended December 31, 2007, 2006 and 2005, respectively, related to the due from General Partner.

Distributions The Partnership is required to make distributions to its partners on a quarterly basis based upon the Partnership's operating results, cash availability and financing needs as determined by the General Partner at the date of the distribution.

Recently Issued Accounting Pronouncements In September 2006, the FASB issued SFAS No. 157, Fair Value Measurement. SFAS No. 157 defines fair value, expands disclosures about fair value measurements, establishes a framework for measuring fair value in generally accepted accounting principles and establishes a hierarchy that categorizes and prioritizes the sources to be used to estimate fair value. The Partnership is required to adopt SFAS No. 157 effective January 1, 2008 on a prospective basis, except for those items where the Partnership has elected a partial deferral under the provisions of FASB Staff Position (FSP) No. FAS 157-b, Effective Date of FASB Statement No. 157, which was issued during the first quarter of 2008. FSP 157-b permits deferral of the effective date of SFAS 157 for one year, for all nonfinancial assets and nonfinancial liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). The deferral applies to measurements of fair value used when testing wireless licenses, other intangible assets, and other long-lived assets for impairment. The Partnership does not expect this standard to have an impact on the financial statements.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities*. SFAS No. 159 permits entities to choose to measure eligible items at fair value, and to report unrealized gains and losses in earnings on items for which the fair value option has been elected. The Partnership is required to adopt SFAS No. 159 effective January 1, 2008. The Partnership does not expect this standard to have an impact on the financial statements.

In June 2006, the EITF reached a consensus on EITF No. 06-3, *How Taxes Collected from Customers and Remitted to Governmental Authorities Should Be Presented in the Income Statement*. EITF No. 06-3 permits that such taxes may be presented on either a gross basis or a net basis as long as that presentation is used consistently. The adoption of EITF No. 06-3 on January 1, 2007 did not impact the financial statements. We present the taxes within the scope of EITF No. 06-3 on a net basis.

3. PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment consists of the following as of December 31, 2007 and 2006:

	Useful Lives	2007	2006
Land		\$ 7,664	\$ 8,380
Buildings and improvements	10-40 years	400,605	352,758
Cellular plant equipment	3-15 years	2,534,976	2,339,005
Furniture, fixtures and equipment	2-5 years	77,267	65,882
Leasehold improvements	5 years	184,399	153,934
		3,204,911	2,919,959
Less accumulated depreciation and amortization		1,637,929	1,367,888
Property, plant and equipment, net		\$ 1,566,982	\$ 1,552,071

Capitalized network engineering costs of \$15,101 and \$14,214 were recorded during the years ended December 31, 2007 and 2006, respectively. Construction-in-progress included in certain of the classifications shown above, principally cellular plant equipment, amounted to \$145,093 and \$182,700 at December 31, 2007 and 2006, respectively. Depreciation and amortization expense for the years ended December 31, 2007, 2006 and 2005 was \$291,303, \$264,400 and \$237,233, respectively.

Tower Transactions Prior to the acquisition of the Partnership interest by Cellco in 2000, Vodafone Group Plc (Vodafone), then parent company of AirTouch Cellular, entered into agreements to sublease all of its unused space on up to 430 of its communications towers (Sublease Agreement) to SpectraSite Holdings, Inc. (SpectraSite) in exchange for \$155,000. At various closings in 2001 and 2000, SpectraSite leased 274 communications towers owned and operated by the Partnership for \$98,465. At December 31, 2007 and 2006, the Partnership has \$63,515 and \$68,434, respectively, recorded as deferred gain on lease transaction. The Sublease Agreement requires monthly maintenance fees for the existing physical space used by the Partnership's cellular equipment. The Partnership paid \$9,777, \$9,718 and \$8,816 to SpectraSite pursuant to the Sublease Agreement for the years ended December 31, 2007, 2006 and 2005, respectively, which is included in cost of service in the accompanying Statements of Operations. The terms of the Sublease Agreement differ for leased communication towers versus those owned by the Partnership and range from 20 to 99 years.

4. ACCOUNTS PAYABLE AND ACCRUED LIABILITIES

Accounts payable and accrued liabilities consist of the following:

	2007	2006
Accounts payable	\$ 32,222	\$ 51,784

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

Non-income based taxes and regulatory fees	31,431	37,597
Accrued commissions	14,152	15,548
Accounts payable and accrued liabilities	\$ 77,805	\$ 104,929

S-13

5. TRANSACTIONS WITH AFFILIATES AND RELATED PARTIES

Significant transactions with affiliates (Cellco and its related entities) and other related parties, including allocations and direct charges, are summarized as follows for the years ended December 31, 2007, 2006 and 2005:

	2007		2006		2005
Service revenues (a)	\$ 219,495	\$	215,812	\$	152,079
Equipment and other revenues (b)	(25,126)		(33,911)		(9,704)
Cost of service (c)	458,912		439,658		294,055
Cost of equipment (d)	64,427		52,927		39,234
Selling, general and administrative (e)	741,137		623,738		562,740

a. Service revenues include roaming revenues relating to customers of other affiliated markets, long distance, data and allocated contra-revenues including revenue concessions.

b. Equipment and other revenues include switch revenue, sales of handsets and accessories and allocated contra-revenues including equipment concessions and coupon rebates.

c. Cost of service includes roaming costs relating to customers roaming in other affiliated markets and allocated cost of telecom, long distance, and handset applications.

d. Cost of equipment includes handsets, accessories, and allocated warehousing and freight.

e. Selling, general and administrative expenses include salaries, commissions and billing, and allocated office telecom, customer care, sales and marketing, advertising, and commissions.

All affiliate transactions captured above, are based on actual amounts directly incurred by Cellco on behalf of the Partnership and/or allocations from Cellco. Revenues and expenses were allocated based on the Partnership's percentage of total customers or gross customer additions or minutes of use, where applicable. The General Partner believes the allocations are reasonable. The affiliate transactions are not necessarily conducted at arm's length.

The Partnership had net purchases involving plant, property, and equipment with affiliates of \$160,165, \$225,547 and \$247,165 in 2007, 2006 and 2005, respectively.

On October 19, 2007, the Partnership entered into lease agreements for the right to use additional spectrum owned by Cellco. The initial term of these agreements is ten years. The 2007 annual lease commitment of \$27,035 represents the costs of financing the spectrum, and does not necessarily reflect the economic value of the services received. No additional spectrum purchases or lease commitments, other than the \$27,035 have been entered into by the Partnership as of December 31, 2007.

6. COMMITMENTS

The General Partner, on behalf of the Partnership, and the Partnership itself have entered into operating leases for facilities, equipment and spectrum used in its operations. Lease contracts include renewal options that include rent expense adjustments based on the Consumer Price Index as well as annual and end-of-lease term adjustments. Rent expense is recorded on a straight-line basis. The noncancelable lease term used to calculate

S-14

the amount of the straight-line rent expense is generally determined to be the initial lease term, including any optional renewal terms that are reasonably assured. Leasehold improvements related to these operating leases are amortized over the shorter of their estimated useful lives or the noncancelable lease term. For the years ended December 31, 2007, 2006 and 2005, the Partnership recognized a total of \$66,102, \$53,502 and \$49,606, respectively, as rent expense related to payments under these operating leases, which was included in cost of service and general and administrative expenses in the accompanying Statements of Operations.

Aggregate future minimum rental commitments under noncancelable operating leases, excluding renewal options that are not reasonably assured, for the years shown are as follows:

Years		Amount
2008	\$	69,945
2009		65,369
2010		55,827
2011		48,102
2012		40,831
2013 and thereafter		154,439
Total minimum payments	\$	434,513

From time to time the General Partner enters into purchase commitments, primarily for network equipment, on behalf of the Partnership.

7. CONTINGENCIES

Cellco is subject to various lawsuits and other claims including class actions, product liability, patent infringement, antitrust, partnership disputes, and claims involving relations with resellers and agents. Cellco is also defending lawsuits filed against itself and other participants in the wireless industry alleging various adverse effects as a result of wireless phone usage. Various consumer class action lawsuits allege that Cellco breached contracts with consumers, violated certain state consumer protection laws and other statutes and defrauded customers through concealed or misleading billing practices. Certain of these lawsuits and other claims may impact the Partnership. These litigation matters may involve indemnification obligations by third parties and/or affiliated parties covering all or part of any potential damage awards against Cellco and the Partnership and/or insurance coverage. All of the above matters are subject to many uncertainties, and outcomes are not predictable with assurance.

The Partnership may be allocated a portion of the damages that may result upon adjudication of these matters if the claimants prevail in their actions. Consequently, the ultimate liability with respect to these matters at December 31, 2007 cannot be ascertained. The potential effect, if any, on the financial statements of the Partnership, in the period in which these matters are resolved, may be material.

In addition to the aforementioned matters, Cellco is subject to various other legal actions and claims in the normal course of business. While Cellco's legal counsel cannot give assurance as to the outcome of each of these matters, in management's opinion, based on the advice of such legal counsel, the ultimate liability with respect to any of these actions, or all of them combined, will not materially affect the financial statements of the Partnership.

8. RECONCILIATION OF ALLOWANCE FOR DOUBTFUL ACCOUNTS

	Balance at Beginning of the Year		Additions Charged to Operations		Write-offs Net of Recoveries		Balance at End of the Year
Accounts Receivable Allowances:							
2007	\$ 12,028	\$	39,694	\$	(34,747)	\$	16,975
2006	9,274		25,088		(22,334)		12,028
2005	11,853		16,578		(19,157)		9,274

INDEX TO EXHIBITS

Exhibit Number	Description of Documents
3.1	Restated Certificate of Incorporation, as amended, is hereby incorporated by reference to an exhibit to U.S. Cellular's Amendment No. 2 on Form 8 dated December 28, 1992, to U.S. Cellular's Report on Form 8-A.
3.2	Restated Bylaws, as amended, are hereby incorporated by reference to Exhibit 3.1 to U.S. Cellular's Current Report on Form 8-K dated November 8, 2007.
4.1	Restated Certificate of Incorporation, as amended, is hereby incorporated by reference to an exhibit to U.S. Cellular's Amendment No. 2 on Form 8 dated December 28, 1992 to U.S. Cellular's Report on Form 8-A.
4.2	Restated Bylaws, as amended, are hereby incorporated by reference to Exhibit 3.1 to U.S. Cellular's Current Report on Form 8-K dated November 8, 2007.
4.3	Amended and Restated Revolving Credit Agreement dated December 9, 2004 among United States Cellular Corporation and the lenders named therein, Toronto Dominion (Texas) LLC, as administrative agent, Wachovia Capital Markets, as syndication agent, and Citibank, N.A. and LaSalle Bank National Association as co-documentation agents is hereby incorporated by reference to Exhibit 4.1 to U.S. Cellular's Current Report on Form 8-K dated December 9, 2004.
4.4(a)	Indenture dated June 1, 2002 between U.S. Cellular and BNY Midwest Trust Company of New York, is hereby incorporated by reference to Exhibit 4.1 to Form S-3 (File No. 333-88344).
4.4(b)	Form of Second Supplemental Indenture, dated as of October 31, 2002, between U.S. Cellular and BNY Midwest Trust Company, relating to \$130,000,000 of United States Cellular Corporation's 8.75% Senior Notes due 2032, is hereby incorporated by reference to Exhibit 4.1 to U.S. Cellular's Current Report on Form 8-K dated October 31, 2002.
4.4(c)	Form of Third Supplemental Indenture dated as of December 3, 2003 between U.S. Cellular and BNY Midwest Trust Company, relating to \$444,000,000 of United States Cellular Corporation's 6.70% Senior Notes due 2033 is hereby incorporated by reference to Exhibit 4.1 to U.S. Cellular's Current Report on Form 8-K dated December 3, 2003.
4.4(d)	Form of Fourth Supplemental Indenture dated as of June 9, 2004 between United States Cellular Corporation and BNY Midwest Trust Company, relating to \$330,000,000 of United States Cellular Corporation's 7.50% Senior Notes due 2032 is hereby incorporated by reference to Exhibit 4.1 to U.S. Cellular's Current Report on Form 8-K dated June 9, 2004.
4.4(e)	Form of Fifth Supplemental Indenture dated as of June 21, 2004 between United States Cellular Corporation and BNY Midwest Trust Company, relating to \$100,000,000 of United States Cellular Corporation's 6.70% Senior Notes due 2033 is hereby incorporated by reference to Exhibit 4.1 to U.S. Cellular's Current Report on Form 8-K dated June 21, 2004.
4.5	Intercompany Credit Agreement dated November 9, 2005, between Telephone & Data Systems, Inc. and United States Cellular Corporation is hereby incorporated by reference to Exhibit 4.1 to U.S. Cellular's Current Report on Form 8-K dated November 9, 2005.
9.1	Amendment and Restatement (dated as of April 22, 2005) of Voting Trust Agreement dated as of June 30, 1989, is hereby incorporated by reference to the Exhibit filed on Amendment No. 3 to the Schedule 13D dated May 2, 2005 filed by the trustees of such voting trust with respect to TDS Common Shares.
10.1	Tax Allocation Agreement, between U.S. Cellular and TDS, is hereby incorporated by reference to an exhibit to U.S. Cellular's Registration Statement on Form S-1 (Registration No. 33-16975).
10.2	Cash Management Agreement, between U.S. Cellular and TDS, is hereby incorporated by reference to an exhibit to U.S. Cellular's Registration Statement on Form S-1 (Registration No. 33-16975).
10.3	

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

Registration Rights Agreement, between U.S. Cellular and TDS, is hereby incorporated by reference to an exhibit to U.S. Cellular's Registration Statement on Form S-1 (Registration No. 33-16975).

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

Exhibit Number	Description of Documents
10.4	Exchange Agreement, between U.S. Cellular and TDS, as amended, is hereby incorporated by reference to an exhibit to U.S. Cellular's Registration Statement on Form S-1 (Registration No. 33-16975).
10.5	Intercompany Agreement, between U.S. Cellular and TDS, is hereby incorporated by reference to an exhibit to U.S. Cellular's Registration Statement on Form S-1 (Registration No. 33-16975).
10.6	Employee Benefit Plans Agreement, between U.S. Cellular and TDS, is hereby incorporated by reference to an exhibit to U.S. Cellular's Registration Statement on Form S-1 (Registration No. 33-16975).
10.7	Insurance Cost Sharing Agreement, between U.S. Cellular and TDS, is hereby incorporated by reference to an exhibit to U.S. Cellular's Registration Statement on Form S-1 (Registration No. 33-16975).
10.8(a)*	U.S. Cellular 2006 Executive Officer Annual Incentive Plan Effective January 1, 2006 is hereby incorporated by reference to Exhibit 10.1 to U.S. Cellular's Current Report on Form 8-K dated July 12, 2006.
10.8(b)*	U.S. Cellular 2007 Executive Officer Annual Incentive Plan Effective January 1, 2007 is hereby incorporated by reference to Exhibit 10.1 to U.S. Cellular's Current Report on Form 8-K dated August 8, 2007.
10.9*	TDS Supplemental Executive Retirement Plan (As Amended and Restated, Effective January 1, 2005) is hereby incorporated by reference to Exhibit 99.1 to TDS' Current Report on Form 8-K dated November 2, 2006.
10.10*	Compensation Plan for Non-Employee Directors, as amended as of August 29, 2007, is hereby incorporated by reference to exhibit 10.1 to U.S. Cellular's Quarterly Report on Form 10-Q for the quarter ended September 30, 2007.
10.11(a)*	U.S. Cellular 2005 Long-Term Incentive Plan, as amended, is hereby incorporated by reference to Exhibit B to U.S. Cellular's Notice of Annual Meeting to Shareholders and Proxy Statement dated April 5, 2005.
10.11(b)*	First Amendment to U.S. Cellular 2005 Long-Term Incentive Plan is hereby incorporated by reference to Exhibit 10.1 to U.S. Cellular's Current Report on Form 8-K dated March 7, 2006.
10.11(c)*	Second Amendment to U.S. Cellular 2005 Long-Term Incentive Plan is hereby incorporated by reference to Exhibit 10.4 to U.S. Cellular's Current Report on Form 8-K dated December 10, 2007.
10.11(d)*	Third Amendment to U.S. Cellular 2005 Long-Term Incentive Plan is hereby incorporated by reference to Exhibit 10.5 to U.S. Cellular's Current Report on Form 8-K dated December 10, 2007.
10.11(e)*	Fourth Amendment to U.S. Cellular 2005 Long-Term Incentive Plan is hereby incorporated by reference to Exhibit 10.6 to U.S. Cellular's Current Report on Form 8-K dated December 10, 2007.
10.12*	Form of U.S. Cellular Executive Deferred Compensation Agreement - Phantom Stock Account for Deferred Bonus, is hereby incorporated by reference to Exhibit 10.3 to U.S. Cellular's Current Report on Form 8-K dated December 10, 2007.
10.13(a)*	U.S. Cellular Executive Deferred Compensation Interest Account Plan, is hereby incorporated by reference to Exhibit 10.1 to U.S. Cellular's Current Report on Form 8-K dated December 10, 2007.
10.13(b)*	Election Form for U.S. Cellular Executive Deferred Compensation Interest Account Plan, is hereby incorporated by reference to Exhibit 10.2 to U.S. Cellular's Current Report on Form 8-K dated December 10, 2007.
10.14*	U.S. Cellular 2003 Employee Stock Purchase Plan is hereby incorporated by reference to Exhibit 99.1 to U.S. Cellular's Registration Statement on Form S-8 (Registration No. 333-103543).
10.15*	Form of Long-Term Incentive Plan Stock Option Award Agreement is hereby incorporated by reference to Exhibit 10.4 to U.S. Cellular's Current Report on Form 8-K dated March 7, 2006.

Edgar Filing: UNITED STATES CELLULAR CORP - Form 10-K

Exhibit Number	Description of Documents
10.16*	Form of Long-Term Incentive Plan Restricted Stock Unit Award Agreement is hereby incorporated by reference to Exhibit 10.5 to U.S. Cellular's Current Report on Form 8-K dated March 7, 2006.
10.17*	Form of Long-Term Incentive Plan 2006 Stock Option Award Agreement for John E. Rooney, is hereby incorporated by reference to Exhibit 10.2 to U.S. Cellular's Current Report on Form 8-K dated March 7, 2006.
10.18*	Form of Long-Term Incentive Plan 2006 Restricted Stock Unit Award Agreement for John E. Rooney, is hereby incorporated by reference to Exhibit 10.3 to U.S. Cellular's Current Report on Form 8-K dated March 7, 2006.
10.19*	Letter Agreement between U.S. Cellular and Steven T. Campbell dated June 1, 2005, is hereby incorporated by reference to Exhibit 99.2 to U.S. Cellular's Current Report on Form 8-K dated June 1, 2005.
10.20*	Terms of Letter Agreement between United States Cellular Corporation and John E. Rooney dated March 28, 2000 is hereby incorporated by reference to Exhibit 10 to U.S. Cellular's Quarterly Report on Form 10-Q for the quarterly period ended March 31, 2000.
10.21	Letter Agreement dated April 4, 2007 between U.S. Cellular and Citigroup, is hereby incorporated by reference to Exhibit 10.1 to U.S. Cellular's Current Report on Form 8-K dated April 4, 2007.
11	Statement regarding computation of earnings per share (included in footnote 3 to financial statements in Exhibit 13).
12	Statement regarding computation of ratio of earnings to fixed charges for the years ended December 31, 2007, 2006, 2005, 2004 and 2003.
13	Incorporated portions of 2007 Annual Report to Shareholders.
21	Subsidiaries of United States Cellular Corporation.
