

LITTLE SQUAW GOLD MINING CO
Form 424B3
August 29, 2006

Filed Pursuant to Rule 424(b)(3)

SEC File No. 333-133216

As filed with the Securities and Exchange

Commission on August 29, 2006

PROSPECTUS

Subject to Completion: Dated August 18, 2006

Little Squaw Gold Mining Company

This is a public offering up to 26,123,400 shares of the common stock, par value \$0.10 per share, of Little Squaw Gold Mining Company, by selling shareholders listed beginning on page 14 of this prospectus. All of the shares being offered, when sold, will be sold by selling shareholders. The shares of common stock registered for resale under this registration statement include:

10,726,400 shares of common stock held by selling shareholders;

5,000,000 shares of common stock acquirable upon conversion of 6% Convertible Debentures of Little Squaw Gold Mining Company in the principal amount of One Million United States Dollars (US\$1,000,000);

1,200,000 shares of common stock acquirable upon exercise of warrants at exercise prices of \$0.30 to \$0.40 per share;

3,000,000 shares of common stock acquirable upon exercise of Class A Warrants at the exercise price of \$0.30 per share;

5,697,000 shares of common stock acquirable upon exercise of Class B Warrants at \$0.35 to \$0.65 per share; and

500,000 shares of common stock issuable upon conversion of semi-annual accrued interest on the 6% Convertible Debenture.

The price at which the selling shareholders may sell the shares will be determined by the prevailing market price for the shares or in negotiated transactions.

We will not receive any proceeds from the sale or distribution of the common stock by the selling shareholders. We may receive proceeds from the exercise of the warrants, the Class A Warrants and/or the Class B Warrants upon exercise of these warrants, if any, and will use the proceeds from any exercise for general working capital purposes.

Our common stock is quoted on the National Association of Securities Dealers NASD Over-the-Counter Bulletin Board OTCBB under the symbol LITS . On August 17, 2006, the closing sale price for our common stock was \$1.65 on the NASD OTCBB.

Investing in our common stock involves risks. See Risk Factors and Uncertainties beginning on page 7.

These securities have not been approved or disapproved by the SEC or any state securities commission nor has the SEC or any state securities commission passed upon the accuracy or adequacy of this prospectus. Any representation to the contrary is a criminal offense.

The date of this prospectus is August 18, 2006.

You should rely only on the information contained in this prospectus. We have not authorized anyone to provide you with information different from the information contained in this prospectus. The information contained in this prospectus is accurate only as of the date of this prospectus, regardless of when this prospectus is delivered or when any sale of our common stock occurs.

SUMMARY INFORMATION

The Offering

This is an offering of up to 26,123,400 shares of our common stock by certain selling shareholders.

Shares Offered By the Selling Shareholders	26,123,400 shares of common stock, \$0.10 par value per share, including:
	10,726,400 shares of common stock held by selling shareholders;
	5,000,000 shares of common stock acquirable upon conversion of 6% Convertible Debentures of Little Squaw Gold Mining Company in the principal amount of One Million United States Dollars (US\$1,000,000);
	1,200,000 shares of common stock acquirable upon exercise of warrants at exercise prices of \$0.30 to \$0.40 per share;
	3,000,000 shares of common stock acquirable upon exercise of Class A Warrants at the exercise price of \$0.30 per share;
	5,697,000 shares of common stock acquirable upon exercise of Class B Warrants at the exercise price of \$0.35 per share during the first year from the date of issuance; \$0.50 per share during the second year from the date of issuance and \$0.65 for the third year from the date of issuance; and
	500,000 shares of common stock issuable upon conversion of semi-annual accrued interest on the 6% Convertible Debenture.
Offering Price	Determined at the time of sale by the Selling Shareholders
Common Stock Outstanding	26,806,706 shares

as of July 31, 2006

Use of Proceeds

We will not receive any of the proceeds of the shares offered by the Selling Shareholders. We may receive proceeds from the exercise of the warrants, the Class A Warrants or the Class B Warrants upon exercise of these warrants, if any, and will use the proceeds from any exercise for general working capital purposes.

Dividend Policy

We currently intend to retain any future earnings to fund the growth of our business. Therefore, we do not currently anticipate paying cash dividends.

OTC Bulletin Board Symbol

LITS

Unless otherwise indicated, the number of shares of our common stock outstanding excludes:

- 440,000 shares of common stock issuable upon vested exercise of options outstanding as of June 30, 2006 at a weighted average exercise price of approximately \$0.36 per share; and

- 900,000 shares of common stock issuable upon exercise of warrants outstanding as of June 30, 2006 at a weighted average exercise price of \$0.35 per share;

- 5,000,000 shares issuable upon conversion of 6% convertible debentures at the conversion price of \$0.20 per share outstanding as of June 30, 2006;

- 3,000,000 shares of common stock issuable upon exercise of Class A Warrants at an exercise price of \$0.30 through November 21, 2008;

- 310,000 shares of common stock available for future grant under our Restated 2003 Stock Option Plan as of June 30, 2006;

- 2,337,000 shares of common stock issuable upon exercise of Class B Warrants at an exercise price of \$0.35 per share through January 31, 2006, \$0.50 per share from February 1, 2007 through January 31, 2008, and \$0.65 per share from February 1, 2008 through January 31, 2009; and

- 3,360,000 shares of common stock issuable upon exercise of Class B Warrants at an exercise price of \$0.35 per share through February 24, 2007, \$0.50 per share from February 25, 2007 through February 24, 2008, and \$0.65 per share from February 25, 2008 through February 24, 2009.

Summary of Our Business

We, Little Squaw Gold Mining Company, are engaged in the business of acquiring, and exploring mineral properties throughout the Americas, primarily those containing gold and associated base and precious metals. We were incorporated under the laws of the State of Alaska on March 26, 1959. Our executive offices are located at 3412 S. Lincoln Dr., Spokane, WA 99203, and our phone number there is (509) 624-5831.

At this time our only property is an exploration stage property in Alaska referred to as the Chandalar property. The Chandalar property is located approximately 190 air miles NNW of Fairbanks, Alaska, and 48 miles NE of Coldfoot, in the Chandalar mining district. The center of the district is approximately 70 miles north of the Arctic Circle. We own in fee 426.5 acres of patented federal mining claims consisting of 21 lode claims, one placer claim and one mill site. We control an additional 13,406.5 acres of unpatented State of Alaska mining claims consisting of 115 claims. State mining claims provide exploration and mining rights to both lode and placer mineral deposits. The claims are contiguous, comprising a block covering 13,833 acres (21.6 square miles), and are being maintained by us specifically for the possible determination of possible placer and lode gold deposits. We do not intend to conduct mining operations on our own account at this time. Rather we plan to undertake cost efficient and effective exploration activities to discover mineralization and potentially mineral reserves, which may upgrade the value of our properties and then joint venture or sell properties to qualified major mining companies. We intend to focus our activities only on projects that are primarily gold deposits.

We are an exploration stage company, and none of the properties that we own or control contain any known ore reserves or mineralized material under the definition of ore reserves under SEC Industry Guide 7. Although there is a history of past lode and placer production on our Chandalar property, the property is at an early stage of exploration, and the probability that ore reserves that meet SEC guidelines will be discovered on an individual prospect at Chandalar is slight. We have assayed gold mineralization in samples from 28 prospects and five past producing mine sites on our Chandalar property. A great deal of further work is required on our properties before a final determination as to the economic and legal feasibility of a mining venture can be made. There is no assurance that a commercially viable deposit will be proven through the exploration efforts by us at Chandalar. The funds expended on our properties may not be successful in leading to the delineation of ore reserves that meet the criteria established under SEC guidelines.

Our initial focus is on exploration of our Chandalar property. The arctic climate limits exploration activities to a summer field season that generally starts in early May and lasts until freeze up in mid-September. There are many operating mines located elsewhere within North America that are located above the Arctic Circle. Management believes year-round operations at Chandalar are feasible should an exploitable deposit of gold be proven through seasonal exploration.

We believe we have sufficient working capital to fund exploration work on the Chandalar property and for working capital requirements for the next 12 months. We expect to fund additional work beyond the next twelve months through the possible exercise of warrants, private placement offerings of our securities or possibly by entering into a joint venture agreement on our Chandalar property with a senior mining company partner which could involve, in part, their purchasing our securities.

Selected Financial Data

The selected financial information presented below as of and for the periods indicated is derived from our financial statements contained elsewhere in this prospectus and should be read in conjunction with those financial statements.

RISK FACTORS AND UNCERTAINTIES

Readers should carefully consider the risks and uncertainties described below before deciding whether to invest in shares of our common stock.

Our failure to successfully address the risks and uncertainties described below, or other unknown risks, would have a material adverse effect on our business, financial condition and/or results of operations, and the trading price of our common stock may decline and investors may lose all or part of their investment.

Estimates of mineralized material are inherently forward-looking statements subject to error. Unforeseen events and uncontrollable factors can have significant adverse or positive impacts on the estimates. Actual results will inherently differ from estimates. The unforeseen events and uncontrollable factors include: geologic uncertainties including inherent sample variability, metal price fluctuations, variations in mining and processing parameters, and adverse changes in environmental or mining laws and regulations. The timing and effects of variances from estimated values cannot be accurately predicted.

We have no proven or probable reserves on our Chandalar property and we may never identify any commercially exploitable mineralization.

We have no probable or proven reserves, as defined in SEC Industry Guide 7, on our Chandalar property. Consequently, we have not completed a feasibility study on our Chandalar property, which is the only mineral property we currently own. Minerals may not be discovered in sufficient quantities and grade at Chandalar to justify commercial operations. Whether a mineral deposit will be commercially viable depends on a number of factors, some of which are: the particular attributes of the deposit, such as size, grade and proximity to infrastructure; metal prices, which are highly cyclical; and government regulations, including regulations relating to prices, taxes, royalties, land tenure, land use, importing and exporting of minerals and environmental protection. If we are unable to upgrade our mineralized material to proven and probable reserves in sufficient quantities to justify commercial operations, we will be unable to establish any mining operations, generate any revenues from our

properties or realize any return from our investments in exploration on our Chandalar property, which could result in a decline in our stock price.

We have no history of commercial production.

Small scale placer and lode miners have historically produced limited amounts of gold on the Chandalar property. Recorded historical production on the property since 1904 totals 83,987 ounces of gold (not all of the gold production has been recorded). Between 1979 and 1999 we were paid an 8% in kind production royalty of 1,246.14 ounces of gold on 15,735.54 ounces of gold mined by our placer miner lessees. Between 1970 and 1983 combined lode production from our operations and those of our lessees was 9,039 ounces of gold from 11,819 tons. These operations were economically marginal and did not yield profits of any significance to the company. We currently have no commercial placer or lode production operation at Chandalar, and have carried on our business of exploring the property at a loss. We expect to continue to incur losses unless and until such time as our properties enter into commercial production and generate sufficient revenues to fund our continuing operations. The establishment of new mining operations at Chandalar will require the commitment of substantial resources toward exploration work and the completion of a feasibility study. We currently do not have sufficient funds to completely explore the Chandalar property nor to complete a mining feasibility study should important quantities of mineralization be found. We expect to incur substantial losses for the foreseeable future related to operating expenses, exploration activities and capital expenditures, which may increase in subsequent years as needed consultants, personnel and equipment are retained as we continue exploration activities. The amounts and timing of expenditures will depend on the progress of ongoing exploration, the results of consultants analysis and recommendations, the rate at which operating losses are incurred, the execution of any joint venture agreements with strategic partners, our acquisition of additional properties, and other factors, many of which are beyond our control. We may not generate any revenues or achieve profitability.

Chandalar is located within the remote Arctic Circle region and exploration activities may be limited by climate and location.

Our initial focus is on exploration of our Chandalar property. The arctic climate limits exploration activities to a summer field season that generally starts in early May and lasts until freeze up in mid-September. The remote location of our Chandalar property limits access and increases exploration expenses. Costs associated with such activities are estimated to be between 25% and 50% higher than costs associated with similar activities in the lower 48 states in the United States. Transportation and availability of qualified personnel is also limited because of the remote location. Higher costs associated with exploration activities and limitations on the annual periods in which we can carry on exploration activities will increase the costs and time associated with our planned activities and could negatively affect the value of our property and securities.

We may be required to raise additional capital to fund our exploration programs on the Chandalar property.

We are an early stage company and currently do not have sufficient capital to fully fund any long-term plan of operation at the Chandalar property. We estimate that we currently have sufficient capital to fund our planned exploration work on the Chandalar property and our working capital requirements for the remainder of 2006; however, we estimate that we will require additional financing in 2007. We expect to accomplish this by private placement offerings of our securities similar to those by which the selling shareholders acquired their shares and under comparable terms, or by the possible exercise of outstanding warrants, or also possibly by entering into a joint venture agreement on our Chandalar property with a senior mining company partner which could involve, in part, their purchasing our securities. We estimate that we will require substantial additional financing thereafter, the level of which will depend on the results of our exploration work and recommendations of our management and consultants.

Failure to obtain sufficient financing may result in delaying or indefinite postponement of exploration on any or all of our properties or even a loss of property interest. Additional capital or other types of financing may not be available if needed or, if available, may not be available on favorable terms or terms acceptable to us.

Our exploration activities may not be commercially successful.

We currently have no properties that produce gold. Our initial and only property is currently the Chandalar property which is an exploration-stage project. Mineral exploration is highly speculative in nature, involves many risks and is frequently nonproductive. Unusual or unexpected geologic formations, and the inability to obtain suitable or adequate machinery, equipment or labor are risks involved in the conduct of exploration programs. We are currently conducting mineral exploration and deposit definition drilling at Chandalar. The success of this gold exploration is determined in part by the following factors:

- the identification of potential gold mineralization based on superficial analysis;
- availability of government-granted exploration permits;
- the quality of our management and our geological and technical expertise; and
- the capital available for exploration.

Substantial expenditures are required to establish proven and probable reserves through drilling and analysis, to determine metallurgical processes to extract metal, and to establish the mining and processing facilities and infrastructure at any site chosen for mining. Whether a mineral deposit at Chandalar would be commercially viable depends on a number of factors, which include, without limitation, the particular attributes of the deposit, such as size, grade and proximity to infrastructure; metal prices, which fluctuate widely; and government regulations, including, without limitation, regulations relating to prices, taxes, royalties, land tenure, land use, importing and exporting of minerals and environmental protection. Any mineralized material or gold resources that may be discovered at Chandalar may be in insufficient quantities to justify commercial operations.

Exploration activities involve a high degree of risk.

Our operations at Chandalar will be subject to all the hazards and risks normally encountered in the exploration for deposits of gold. These hazards and risks include, without limitation, unusual and unexpected geologic formations, seismic activity, rock bursts, pit-wall failures, cave-ins, flooding and other conditions involved in the drilling and removal of material, any of which could result in damage to, or destruction of, mines and other producing facilities, damage to life or property, environmental damage and legal liability. Milling operations, if any, are subject to various hazards, including, without limitation, equipment failure and failure of retaining dams around tailings disposal areas, which may result in environmental pollution and legal liability.

The parameters that would be used at Chandalar in estimating possible mining and processing efficiencies would be based on the testing and experience our management has acquired in operations elsewhere. Various unforeseen conditions can occur that may materially affect estimates based on those parameters. In particular, past mining operations at Chandalar indicate that care must be taken to ensure that proper ore grade control is employed and that proper steps are taken to ensure that the underground mining operations are executed as planned to avoid mine grade dilution, resulting in uneconomic material being fed to the mill. Mining contracts for the miners at Chandalar would include clauses addressing this issue to help ensure planned requirements are met. Other unforeseen and uncontrollable difficulties may occur in planned operations at Chandalar which could lead to failure of the operation.

If we make a decision to exploit the Chandalar property based on gold mineralization that may be discovered and proven, we plan to process the resource using technology that has been demonstrated to be commercially effective at other quartz vein hosted gold deposits in Alaska and elsewhere in the world. These techniques may not be as efficient or economical as we project, and we may never achieve profitability.

We may be adversely affected by fluctuations in gold prices.

The value and price of our securities, our financial results, and our exploration activities may be significantly adversely affected by declines in the price of gold and other precious metals. Gold prices fluctuate widely and are affected by numerous factors beyond our control such as interest rates, exchange rates, inflation or deflation, fluctuation in the value of the United States dollar and foreign currencies, global and regional supply and demand, and the political and economic conditions of gold producing countries throughout the world. The price for gold fluctuates in response to many factors beyond anyone's ability to predict. The prices that would be used in making any resource estimates at our Chandalar property would be disclosed and would probably differ from daily prices quoted in the news media. Percentage changes in the price of gold cannot be directly related to any estimated resource quantities at Chandalar, as they are affected by a number of additional factors. For example, a 10 percent change in the price of gold may have little impact on any estimated resource quantities at Chandalar and would affect only the resultant cash flow. Because any future mining at Chandalar would occur over a number of years, it may be prudent to continue mining for some periods during which cash flows are temporarily negative for a variety of reasons including a belief

that a low price of gold is temporary and/or that a greater expense would be incurred in permanently closing a mine there.

Mineralized material calculations and life-of-mine plans, if any, using significantly lower gold and precious metal prices could result in material write-downs of our investments in mining properties and increased reclamation and closure charges.

In addition to adversely affecting any of our mineralized material estimates and its financial aspects, declining metal prices may impact our operations by requiring a reassessment of the commercial feasibility of a particular project.

Such a reassessment may be the result of a management decision related to a particular event, such as a cave-in of a mine tunnel. Even if the Chandalar project may ultimately be determined to be economically viable, the need to conduct such a reassessment may cause substantial delays in establishing operations or may interrupt on-going operations, if any, until the reassessment can be completed.

Title to our properties may be subject to other claims.

There may be valid challenges to the title to properties we own or control and in the Chandalar mining district which, if successful, could impair our exploration activities. Title to such properties may be challenged or impugned due to unknown prior unrecorded agreements or transfers or undetected defects in titles.

A significant portion of our mineral rights to the Chandalar property consist of unpatented lode mining claims created and maintained on deeded state land in accordance with the laws governing Alaska state mining claims. We have no unpatented mining claims on federal land in the Chandalar mining district, or anywhere else. Unpatented mining claims are unique property interests, and are generally considered to be subject to greater title risk than other real property interests because the validity of unpatented mining claims is often uncertain. This uncertainty arises, in part, out of complex state laws and regulations. Also, unpatented mining claims are always subject to possible challenges by third parties or validity contests by the state government. In addition, there are few public records that definitively determine the issues of validity and ownership of unpatented state mining claims.

Estimates of mineralized material are subject to evaluation uncertainties that could result in project failure.

Our exploration and future mining operation, if any, at Chandalar is faced risks associated with being able to accurately predict the quantity and quality of mineralized material within the earth using statistical sampling techniques. Estimates of any mineralized material at Chandalar are made using samples obtained from appropriately placed underground workings and intelligently designed drilling. There is an inherent variability of assays between check and duplicate samples taken adjacent to each other and between sampling points that cannot be reasonably eliminated. Additionally, there also may be unknown geologic details that have not been identified or correctly appreciated at the current level of accumulated knowledge of our property. This results in uncertainties that cannot be reasonably eliminated from the process of estimating mineralized material. If these estimates prove to be unreliable, we may implement an exploitation plan that may not lead to commercially viable operations in the future.

We currently depend on a single property - the Chandalar property.

Our only mineral property at this time is the Chandalar property. We are solely dependent upon making a gold deposit discovery at Chandalar for the furtherance of the company, unless we are able to acquire additional properties or projects outside of Chandalar. Should we be able to make an economic find at Chandalar, we would then be solely dependent upon a single mining operation for our revenue and profits, if any.

Government regulation may adversely affect our business and planned operations.

Our mineral exploration activities are subject to various laws governing prospecting, mining, development, production, taxes, labor standards and occupational health, mine safety, toxic substances, land use, water use, land claims of local people and other matters. New rules and regulations may be enacted or existing rules and regulations may be applied in a manner which could limit or curtail exploration at our Chandalar property. The economics of any potential mining operation there would be particularly sensitive to changes in the State of Alaska's tax regime. At present, Alaska has a 7% net profits mining license tax on all mineral production (AS 43.65), a 3% net profits royalty on minerals from state lands (AS 38.05.212) (where we hold unpatented state mining claims), and a graduated mining claim rental beginning at \$0.50/acre. Alaska state corporate income tax is 9.4% if net profit is more than a set threshold amount. Alaska has an exploration incentive credit program (AS 27.30.010) whereby up to \$20 million in approved accrued exploration credits can be deducted from the state mining license tax, the state corporate income tax, and the state mining royalty. All new mining operations are exempt from the mining license tax for 3 1/2 years after production begins. This generally favorable state tax regime could be reduced or eliminated. Such an event could materially hinder our ability to finance the future exploitation of any gold deposit we might prove-up at Chandalar. Amendments to current laws, regulations and permits governing our operations and the general activities of mining and exploration companies, or more stringent implementation thereof, could cause unanticipated increases in our exploration expenses, capital expenditures or future production costs, or could result in abandonment or delays in establishing operations at our Chandalar property.

Our operations are subject to environmental risks.

All phases of our operations, if any, will be subject to federal, state and local environmental regulation in the various jurisdictions in which we operate now or in the future. These regulations mandate, among other things, the maintenance of air and water quality standards and land reclamation. They also set forth limitations on the generation, transportation, storage and disposal of solid and hazardous waste. Environmental legislation is evolving in a manner which will require stricter standards and enforcement, increased fines and penalties for non-compliance, more stringent environmental assessments of proposed projects and a heightened degree of responsibility for companies and their officers, directors and employees. Future changes in environmental regulation, if any, may adversely affect our operations. Environmental hazards may exist on the property which we hold, or properties we may come to hold interests in which are unknown to us at present and which have been caused by previous or existing owners or operators or lessees.

Failure to comply with applicable laws, regulations and permitting requirements may result in enforcement actions, including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed, and may include corrective measures requiring capital expenditures, installation of additional equipment, or remedial actions. We may be required to

compensate those suffering loss or damage by reason of our exploration or mining activities and may have civil or criminal fines or penalties imposed on us for violations of applicable laws or regulations.

Future production, if any, at our Chandalar mine prospects will involve the use of hazardous materials. Should these materials leak or otherwise be discharged from their containment systems, then we may become subject to liability for hazards that may not be insured against or for clean up work that may not be insured.

We do not insure against all risks.

Our insurances will not cover all the potential risks associated with our operations. We may also be unable to maintain insurances to cover these risks at economically feasible premiums. Insurance coverages may not continue to be available or may not be adequate to cover any resulting liability. Moreover, insurances against risks such as environmental pollution or other hazards as a result of exploration and production is not generally available to us or to other companies in the mining industry on acceptable terms. We might also become subject to liability for pollution or other hazards for which we may not be insured against or for which we may elect not to insure against because of premium costs or other reasons. Losses from these events may cause us to incur significant costs that could have a material adverse effect upon our financial condition and results of operations.

We compete with larger, better capitalized competitors in the mining industry.

The mining industry is acutely competitive in all of its phases. We face strong competition from other mining companies in connection with the acquisition of exploration-stage properties, or properties capable of producing precious metals. Many of these companies have greater financial resources, operational experience and technical capabilities than us. As a result of this competition, we may be unable to maintain or acquire attractive mining properties on terms it considers acceptable or at all. Consequently, our revenues, operations and financial condition and possible future revenues could be materially adversely affected by actions by our competitors.

We are dependent on our key personnel.

Our success depends on our key executives: Richard R. Walters, our President, and Ted Sharp, our Chief Financial Officer. The loss of the services of one or more of such key management personnel could have a material adverse effect on the Corporation. Our ability to manage our mineral exploration activities at our Chandalar property or other locations where we may acquire mineral interests, will depend in large part on the efforts of these individuals. We face intense competition for qualified personnel, and we may not be able to attract and retain such personnel.

Richard R. Walters, our President, and Ted Sharp, our Chief Financial Officer, do not dedicate 100% of their time on our business.

Richard R. Walters, our President, provides services under a consulting arrangement, which permits him to provide services to other companies. Mr. Walters also serves as a director and the Executive Vice President of Marifil Mines Limited, a public company traded on the Toronto Ventures Exchange, with properties in Argentina. Mr. Walters dedicates approximately 80% of his business time to Little Squaw, and his duties at Marifil Mines may detract from the time Mr. Walters can spend on our business. Ted Sharp, our Chief Financial Officer, also provides services under a consulting arrangement, which permits him to provide services to other companies. Mr. Sharp dedicates approximately 50% of his business time to Little Squaw, and currently, provides consulting services to a variety of

small business clients, which may detract from the time Mr. Sharp can spend on our business. Mr. Walters and Mr. Sharp often conduct business remotely by internet communication. In the event of a failure of laptop or telecommunications, or at times of internet connection disruption, Mr. Walters and Mr. Sharp's ability to communicate with other Company personnel or conduct company transactions may be obstructed.

Our officers and directors may have potential conflicts of interest due to their responsibilities with other entities.

The officers and directors of our company serve as officers and/or directors of other companies in the mining industry, which may create situations where the interests of the director or officer may become conflicted. The consulting arrangements of Mr. Walters and Mr. Sharp allow them to provide services to other companies. One of our key officers, Mr. Walters, consults for another mining company. He is an officer and director of Marifil Mines Limited, a Canadian public company listed on the Canadian Ventures Exchange. The companies to which Mr. Walters and Mr. Sharp provide services may be potential competitors with our company at some point in the future. The directors and officers owe our company fiduciary duties with respect to any current or future conflicts of interest.

We will be required to evaluate our internal controls under Section 404 of the Sarbanes-Oxley Act of 2002, and any adverse results from such evaluation could result in a loss of investor confidence in our financial reports and have an adverse effect on the price of our shares of common stock.

Pursuant to Section 404 of the Sarbanes-Oxley Act of 2002, we expect that beginning with our annual report on Form 10-KSB for the fiscal year ended December 31, 2007, we will be required to furnish a report by management on our internal controls over financial reporting. Such report will contain among other matters, an assessment of the effectiveness of our internal control over financial reporting, including a statement as to whether or not our internal control over financial reporting is effective. This assessment must include disclosure of any material weaknesses in our internal control over financial reporting identified by our management. Such report must also contain a statement that our auditors have issued an attestation report on our management's assessment of such internal controls. Public Company Accounting Oversight Board Auditing Standard No. 2 provides the professional standards and related performance guidance for auditors to attest to, and report on, our management's assessment of the effectiveness of internal control over financial reporting under Section 404.

We are compiling the system and process documentation and performing the evaluation needed to comply with Section 404, which is both costly and challenging. We may not be able to complete our evaluation, testing and any required remediation in a timely fashion. During the evaluation and testing process, we may identify one or more material weaknesses in our internal control over financial reporting, in which case we may not be able to assert that our internal controls are designed and operating effectively. If we are unable to assert that our internal control over financial reporting is effective as of December 31, 2007 (or if our auditors are unable to attest that our management's report is fairly stated or they are unable to express an opinion on the effectiveness of our internal controls), we could lose investor confidence in the accuracy and completeness of our financial reports, which would have a material adverse effect on our stock price.

Failure to comply with the new rules may make it more difficult for us to obtain certain types of insurance, including director and officer liability insurance, and we may be forced to accept reduced policy limits and coverage and/or incur substantially higher costs to obtain the same or similar coverage. The impact of these events could also make it more difficult for us to attract and retain qualified persons to serve on our board of directors, on committees of our board of directors, or as executive officers.

Risks Related to this Offering

The market for our common shares has been volatile in the past, and may be subject to fluctuations in the future.

The market price of our common stock has ranged from a high \$0.55 and a low \$0.20 during the twelve month period ended December 31, 2005. The market price for our common stock close at \$1.65 on August 17, 2006. See "Market for Common Equity and Related Stockholder Matters" beginning on page 51 of this prospectus. The market price of our common stock may fluctuate significantly from its current level. The market price of our common stock may be subject to wide fluctuations in response to quarterly variations in operating results, announcements of technological innovations or new products by us or our competitors, changes in financial estimates by securities analysts, or other events or factors. In addition, the financial markets have experienced significant price and volume fluctuations for a number of reasons, including the failure of the operating results of certain companies to meet market expectations that have particularly affected the market prices of equity securities of many exploration-stage companies that have often been unrelated to the operating performance of such companies. These broad market fluctuations, or any

industry-specific market fluctuations, may adversely affect the market price of our common stock. In the past, following periods of volatility in the market price of a company's securities, class action securities litigation has been instituted against such a company. Such litigation, whether with or without merit, could result in substantial costs and a diversion of management's attention and resources, which would have a material adverse effect on our business, operating results and financial condition.

We have convertible securities outstanding, which if fully exercised could require us to issue 15,037,000 shares of our common stock and result in substantial dilution to existing shareholders.

As of June 30, 2006, we had 26,806,706 shares of common stock issued and outstanding. We may be required to issue the following shares of common stock upon exercise or conversion of convertible securities: 5,000,000 shares of common stock acquirable upon conversion of the 6% convertible debentures; 440,000 shares of common stock acquirable upon exercise of options; 900,000 shares of common stock acquirable upon exercise of warrants at \$0.30 to \$0.40 per share; 3,000,000 shares of common stock acquirable upon exercise of Class A Warrants at \$0.30 per share; and 5,697,000 shares of common stock acquirable upon the exercise of Class B Warrants at \$0.35 to \$0.65 per share. If these convertible securities are fully converted or exercised, we would issue an additional 15,037,000 shares of common stock, and our issued and outstanding share capital would increase to 41,815,420 shares. The convertible securities are likely to be exercised or converted at the time when the market price of our common stock exceeds the conversion or exercise price of the convertible securities. Holders of such securities are likely to sell the common stock upon conversion which could cause our share price to decline.

Broker-dealers may be discouraged from effecting transactions in our common stock because they are considered a penny stock and are subject to the penny stock rules.

Rules 15g-1 through 15g-9 promulgated under the Exchange Act impose sales practice and disclosure requirements on certain brokers-dealers who engage in certain transactions involving a penny stock. Subject to certain exceptions, a penny stock generally includes any non-NASDAQ equity security that has a market price of less than \$5.00 per share. The market price of our common stock on the OTCBB during the period from January 1, 2004 to December 31, 2005, ranged between a high \$0.55 and a low \$0.20, and our common stock is deemed penny stock for the purposes of the Exchange Act. The additional sales practice and disclosure requirements imposed upon brokers-dealers may discourage broker-dealers from effecting transactions in our common stock, which could severely limit the market liquidity of the stock and impede the sale of our stock in the secondary market.

A broker-dealer selling penny stock to anyone other than an established customer or accredited investor, generally, an individual with net worth in excess of \$1,000,000 or an annual income exceeding \$200,000, or \$300,000 together with his or her spouse, must make a special suitability determination for the purchaser and must receive the purchaser's written consent to the transaction prior to sale, unless the broker-dealer or the transaction is otherwise exempt. In addition, the penny stock regulations require the broker-dealer to deliver, prior to any transaction involving a penny stock, a disclosure schedule prepared by the United States Securities and Exchange Commission relating to the penny stock market, unless the broker-dealer or the transaction is otherwise exempt. A broker-dealer is also required to disclose commissions payable to the broker-dealer and the registered representative and current quotations for the securities. Finally, a broker-dealer is required to send monthly statements disclosing recent price information with respect to the penny stock held in a customer's account and information with respect to the limited market in penny stocks.

In the event that your investment in our shares is for the purpose of deriving dividend income or in expectation of an increase in market price of our shares from the declaration and payment of dividends, your investment will be compromised because we do not intend to pay dividends.

We have never paid a dividend to our shareholders, and we intend to retain our cash for the continued growth of our business. We do not intend to pay cash dividends on our common stock in the foreseeable future. As a result, your return on investment will be solely determined by your ability to sell your shares in a secondary market.

FORWARD-LOOKING STATEMENTS

We use words like expects, believes, intends, anticipates, plans, targets, projects or estimates in this prospectus. When we use these words and other, similar words and phrases or statements that an event, action or result will, may, could, or should occur, be taken or be achieved identify forward-looking statements. This prospectus contains forward-looking information which may include, but is not limited to, statements with respect to the following:

- future financial or operating performances of Little Squaw, its subsidiaries and its projects;
- the future price of gold, silver or other metals;
- the estimation of mineral resources and the realization of mineral reserves, if any, based on estimates;
- estimates related to costs of capital, operating and exploration expenditures;
- requirements for additional capital;
- government regulation of exploration activities operations, environmental risk and, as applicable, reclamation and rehabilitation expenses;
- title disputes or claims;
- limitations of insurance coverage; and
- the timing and possible outcome of pending regulatory and permitting matters.

Such forward-looking statements reflect our current views with respect to future events and are subject to certain risks, uncertainties and assumptions, including, the risks and uncertainties outlined under the sections titled Risk Factors and Uncertainties beginning at page 7 of this prospectus, Description of the Business beginning at page 31 of this

prospectus and Management's Discussion and Analysis beginning at page 45 of this prospectus. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those anticipated, believed, estimated or expected.

Our management has included projections and estimates in this prospectus, which are based primarily on management's experience in the industry, assessments of our results of operations, discussions and negotiations with third parties and a review of information filed by our competitors with the Securities and Exchange Commission or otherwise publicly available. We caution readers not to place undue reliance on any such forward-looking statements, which speak only as of the date made. We disclaim any obligation subsequently to revise any forward-looking statements to reflect events or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated events.

We qualify all the forward-looking statements contained in this prospectus by the foregoing cautionary statements.

DIVIDEND POLICY

We anticipate that we will retain any earnings to support operations and to finance the growth of our business. Therefore, we do not expect to pay cash dividends in the foreseeable future. Any further determination to pay cash dividends will be at the discretion of our board of directors and will be dependent on the financial condition, operating results, capital requirements and other factors that our board deems relevant. We have never declared a dividend.

SELLING SHAREHOLDERS

This prospectus covers the offering of up to 26,123,400 shares of our common stock by Selling Shareholders. We will not receive any proceeds from the sale of the shares by the Selling Shareholders.

If we issue all of the common stock issuable upon exercise of the warrants, Class A Warrants and/or Class B Warrants held by Selling Shareholders, we will receive proceeds of between \$0.30 and \$0.65 per share for aggregate proceeds ranging from \$3,253,950 to \$5,083,050, if fully exercised and depending on the year in which they may be exercised. We intend to use such proceeds, if any, for general working capital purposes. We cannot assure you that any of the warrants will be exercised.

The shares issued to the Selling Shareholders or issuable to Selling Shareholders upon exercise of the warrants are restricted shares under applicable federal and state securities laws and are being registered to give the Selling Shareholders the opportunity to sell their shares. The registration of such shares does not necessarily mean, however, that any of these shares will be offered or sold by the Selling Shareholders. The Selling Shareholders may from time to time offer and sell all or a portion of their shares in the over-the-counter market, in negotiated transactions, or otherwise, at market prices prevailing at the time of sale or at negotiated prices.

The registered shares may be sold directly or through brokers or dealers, or in a distribution by one or more underwriters on a firm commitment or best efforts basis. To the extent required, the names of any agent or broker-dealer and applicable commissions or discounts and any other required information with respect to any particular offer will be set forth in an accompanying prospectus supplement. See Plan of Distribution beginning on page 21 of this prospectus. The Selling Shareholders reserves the sole right to accept or reject, in whole or in part, any proposed purchase of the registered shares to be made directly or through agents. The Selling Shareholders and any agents or broker-dealers that participate with the Selling Shareholders in the distribution of their registered shares may be deemed to be underwriters within the meaning of the Securities Act of 1933, and any commissions received by them and any profit on the resale of the registered shares may be deemed to be underwriting commissions or discounts under the Securities Act of 1933.

We will receive no proceeds from the sale of the registered shares, and we have agreed to bear the expenses of registration of the shares, other than commissions and discounts of agents or broker-dealers and transfer taxes, if any.

Selling Shareholders Information

The following are the Selling Shareholders who own an aggregate of 10,726,400 shares of our common stock covered in this prospectus and have the right to acquire upon exercise an additional 9,897,000 shares of common stock upon exercise of warrant and 5,000,000 shares of common stock upon the conversion of the 6% Convertible Debenture. In addition, we registered an additional 500,000 shares of common stock to be issued in lieu of accrued interest payable under the 6% Convertible Debenture held by a Selling Shareholder. See Transactions with Selling Shareholders beginning on page 19 of this prospectus for further details. At July 31, 2006, we had 26,806,706 shares of common stock issued and outstanding.

(a)

All percentages are based on 26,806,706 shares of common stock issued and outstanding on July 31, 2006. Beneficial ownership is calculated based on the number of shares of common stock that each selling shareholder owns or controls or has the right to acquire within 60 days of July 31, 2006.

(b)

This table assumes that the Selling Shareholders will sell all of their shares available for sale during the effectiveness of the registration statement that includes this prospectus. The Selling Shareholders are not required to sell their shares. See Plan of Distribution beginning on page 21.

(c)

Assumes that all shares registered for resale by this prospectus have been issued and sold.

(1)

Includes 1,200,000 shares of common stock and 600,000 shares of common stock acquirable upon exercise of Class B Warrants within 60 days of July 31, 2006.

(2)

Includes 160,000 shares of common stock and 80,000 shares of common stock acquirable upon exercise of Class B Warrants within 60 days of July 31, 2006.

(3)

Includes 75,000 shares of common stock and 37,500 shares of common stock acquirable upon exercise of Class B Warrants within 60 days of July 31, 2006.

(4)

Includes 100,000 shares of common stock and 50,000 shares of common stock acquirable upon exercise of Class B Warrants within 60 days of July 31, 2006.

(5)

Includes 200,000 shares of common stock and 100,000 shares of common stock acquirable upon exercise of Class B Warrants within 60 days of July 31, 2006. Robert S. Tarangelo, in his capacity as portfolio manager of Belltown Capital, L.P., has sole investment and voting control over these securities.

(6)

Includes 2,600,000 shares of common stock and 1,300,000 shares of common stock acquirable upon exercise of Class B Warrants within 60 days of July 31, 2006. David Atkinson, in his capacity as portfolio manager of Forza Capital Management, L.L.C., has sole investment and voting control over these securities. The Class B Warrants cannot be exercised if the holder of such warrants would beneficially own more than 9.99% of the issued and outstanding shares of common stock of Little Squaw Gold Mining Company after giving effect to such exercise.

(7)

Includes 100,000 shares of common stock and 50,000 shares of common stock acquirable upon exercise of Class B Warrants within 60 days of July 31, 2006.

(8)

Includes 400,000 shares of common stock and 200,000 shares of common stock acquirable upon exercise of Class B Warrants within 60 days of July 31, 2006. Brad Lamensdorf, in his capacity as portfolio manager of BHL LP, has sole investment and voting control over these securities.

(9)

Includes 80,000 shares of common stock and 40,000 shares of common stock acquirable upon exercise of Class B Warrants within 60 days of July 31, 2006. Christian Gallagher has sole investment and voting control over these securities.

(10)

Includes 200,000 shares of common stock and 100,000 shares of common stock acquirable upon exercise of Class B Warrants within 60 days of July 31, 2006.

(11)

Includes 80,000 shares of common stock and 40,000 shares of common stock acquirable upon exercise of Class B Warrants within 60 days of July 31, 2006. Richard Watkins has sole investment and voting control over these securities.

(12)

Includes 200,000 shares of common stock and 100,000 shares of common stock acquirable upon exercise of Class B Warrants within 60 days of July 31, 2006.

(13)

Includes 1,400,000 shares of common stock and 700,000 shares of common stock acquirable upon exercise of Class B Warrants within 60 days of July 31, 2006.

(14)

Includes 400,000 shares of common stock and 200,000 shares of common stock acquirable upon exercise of Class B Warrants within 60 days of July 31, 2006. David Gaskell, as portfolio manager of Lewell Investments Limited, has sole investment and voting control over these securities.

(15)

Includes 400,000 shares of common stock and 200,000 shares of common stock acquirable upon exercise of Class B Warrants within 60 days of July 31, 2006.

(16)

Includes 100,000 shares of common stock and 50,000 shares of common stock acquirable upon exercise of Class B Warrants within 60 days of July 31, 2006.

(17)

Includes 80,000 shares of common stock and 40,000 shares of common stock acquirable upon exercise of Class B Warrants within 60 days of July 31, 2006. Ron Nicklas, as managing member of Penn Lits, has sole investment and voting control over these securities.

(18)

Includes 280,000 shares of common stock and 140,000 shares of common stock acquirable upon exercise of Class B Warrants within 60 days of July 31, 2006.

(19)

Includes 200,000 shares of common stock and 100,000 shares of common stock acquirable upon exercise of Class B Warrants within 60 days of July 31, 2006. Sole and separate property of William Poland.

(20)

Includes 200,000 shares of common stock and 100,000 shares of common stock acquirable upon exercise of Class B Warrants within 60 days of July 31, 2006.

(21)

Includes 100,000 shares of common stock and 50,000 shares of common stock acquirable upon exercise of Class B Warrants within 60 days of July 31, 2006.

(22)

Includes 200,000 shares of common stock and 100,000 shares of common stock acquirable upon exercise of Class B Warrants within 60 days of July 31, 2006.

(23)

Includes 140,000 shares of common stock and 70,000 shares of common stock acquirable upon exercise of Class B Warrants within 60 days of July 31, 2006.

(24)

Includes 200,000 shares of common stock and 100,000 shares of common stock acquirable upon exercise of Class B Warrants within 60 days of July 31, 2006.

(25)

Includes 400,000 shares of common stock and 200,000 shares of common stock acquirable upon exercise of Class B Warrants within 60 days of July 31, 2006.

(26)

RAB Special Situations (Master) Fund Limited is organized under the laws of the Cayman Islands. Phillip Richards has sole investment and voting control over the securities. The Selling Shareholder holds a 6% convertible debenture in the principal amount of \$1,000,000 convertible into 5,000,000 shares of common stock at \$0.20 per share and a Class A Warrant exercisable to acquire 2,500,000 shares of common stock at \$0.30 per share for a period of 3 years. The 6% convertible debenture and the Class A Warrant contain provisions that limit the selling shareholder's beneficial ownership in the class of common stock of Little Squaw to 9.99%. Includes 500,000 shares of common stock issuable upon conversion of semi-annual accrued interest on the 6% Convertible Debenture, of which 28,286 were issued on June 1, 2006 as payment for accrued interest amounting to \$31,397.26 at \$1.11 per share.

(27)

Includes 31,400 shares of common stock; a Class A Warrant exercisable to acquire 500,000 shares of common stock at \$0.30 per share for a period of 3 years; and Class B Warrants exercisable to acquire 949,500 shares of common stock at an exercise price ranging from \$0.35 to \$0.65 for a period of 3 years. Rhett Gustafson has sole investment and voting control over these securities. Strata Partners, LLC is a registered U.S. broker-dealer and received the Class A Warrant and Class B Warrants as placement agent fees.

(28)

Includes 400,000 shares of common stock and Warrants exercisable to acquire 400,000 shares of common stock at a price of \$0.30 until August 17, 2006, \$0.35 from August 18, 2006 to August 17, 2007 and \$0.40 from August 18, 2007 to August 17, 2008.

(29)

Includes 366,000 shares of common stock and 100,000 shares of common stock acquired through exercise of Warrants at a price of \$0.30 on May 25, 2006. This registration statement registers 200,000 shares of common stock for resale.

(30)

Includes 300,000 shares of common stock and Warrants exercisable to acquire 300,000 shares of common stock at a price of \$0.30 until October 16, 2006, \$0.35 from October 17, 2006 to October 16, 2007 and \$0.40 from October 17, 2007 to October 16, 2008.

(31)

Includes 200,000 shares of common stock and Warrants exercisable to acquire 200,000 shares of common stock at a price of \$0.30 until October 16, 2006, \$0.35 from October 17, 2006 to October 16, 2007 and \$0.40 from October 17, 2007 to October 16, 2008. James Vose has sole investment and voting control over these securities.

(32)

Includes 1,881,875 shares of common stock and 200,000 shares of common stock acquired through exercise of Warrants at a price of \$0.30 on May 22, 2006. This registration statement registers 400,000 shares of common stock for resale.

Except as noted above and based on information provided to us, none of the selling shareholders are affiliated or have been affiliated with any broker-dealer in the United States. Except as otherwise provided in this prospectus, none of the selling shareholders are affiliated or have been affiliated with us, any of our predecessors or affiliates during the past three years.

TRANSACTIONS WITH SELLING SHAREHOLDERS

Private Placement Transactions with Selling Shareholders

On January 31, 2006, we closed a private placement of 3,895,000 Units, at a price of \$0.25 per Unit for gross proceeds of \$973,750. Each Unit consisted of one share of the registrant's common stock, par value \$0.10, and one half of one (1/2) Class B Warrant. Each whole Class B Warrant is exercisable to acquire one additional share of common stock at an exercise price of \$0.35 per share during the one-year period commencing on the Closing Date, \$0.50 per share during the second year following the Closing Date, and \$0.65 per share during the third year following the Closing Date. The following selling shareholders participated in the private placement: Luisa H. Frazier, James LeCamp, Charles Peter Henry Francis Kernot, Robert S. Tarangelo, Belltown Capital Partners, L.P., Forza Partners, LP, and BHL LP. On February 24, 2006, we closed a private placement of 5,600,000 Units, at a price of \$0.25 per Unit for gross proceeds of \$1,400,000. Each Unit consisted of one share of the registrant's common stock, par value \$0.10, and one half of one (1/2) Class B Warrant. Each whole Class B Warrant is exercisable to acquire one additional share of common stock at an exercise price of \$0.35 per share during the one-year period commencing on the Closing Date, \$0.50 per share during the second year following the Closing Date, and \$0.65 per share during the third year following the Closing Date. The following selling shareholders participated in the private placement: Richard J. Bell, BHL LP, Blanchette Inc., Adrian Carmack, J.M. Finn Nominees Limited, Forza Partners, LP, David Neufeld, Nicholas Gallagher, James E. LaCamp, Lewell Investments Limited, Michael C. McGartland, Christopher Miller, Penn Lits, LLC, William Poland, Linda C. Ranelle, H. William Ranelle, Charles Patrick Reddell and Cynthia Reddell, Wolfe Rudman, Michael S. Schwartz, Brian K. Sneed and Kurt Alan Williams.

Transactions with Other Selling Shareholders

On August 12, 2005 our Board of Directors authorized a direct private placement offering of 1,200,000 units at \$0.25 per unit. Each unit consists of one share of common stock, and a three-year full share purchase warrant exercisable at \$0.30, \$0.35 and \$0.40 in the respective successive years. During the nine months ended September 30, 2005, we sold a total of 500,000 units for proceeds of \$125,000. Subsequently, 700,000 units were sold during the fourth quarter of 2005 for proceeds of \$175,000. No fees or commissions were paid, and net proceeds to us were \$300,000. The units were sold as follows:

-

On August 17 2005, we completed a private placement of 400,000 units to Earle & Rhea Foster, a selling shareholder, at \$0.25 per unit.

-

On September 19, 2005, we completed a private placement of 100,000 units to Carol S. & George C. Nichols, Jr. a selling shareholder, at \$0.25 per unit.

-

On October 17, 2005, we completed a private placement of 300,000 units to Laura O. & Ralph W. Kettell, II, a selling shareholder, at \$ 0.25 per unit.

•

On October 17, 2005, we completed a private placement of 200,000 units to Vose Partners, a selling shareholder, at \$0.25 per unit.

•

On October 17, 2005, we completed a private placement of 200,000 units to Wilbur G. Hallauer, a selling shareholder, at \$0.25 per unit. Mr. Hallauer beneficially owned greater than 10% of our issued and outstanding common stock prior to the private placement.

Except as described above and based on information available to us, there are no other relationships between us and any of these selling shareholders.

Transactions with RAB Special Situations (Master) Fund Limited

On November 21, 2005, the Company closed a private placement, issuing a 6% Convertible Debenture in the principal amount of US\$1,000,000 and a detached 2,500,000 Class A Warrant to one institutional investor. Cash proceeds to the Company, net of cash fees to the placement agent was \$900,000. The Debenture is convertible at any time at the option of the holder into shares of Common Stock, \$0.10 par value, at US\$0.20 per share, subject to certain adjustments, and the Warrant is exercisable to acquire 2,500,000 common shares at an exercise price of US\$0.30 per share until November 21, 2008, the term of the Convertible Debenture. Both the Convertible Debenture and Warrant are transferable. The 6% Convertible Debenture contains a mandatory conversion provision which grants the Company, at the Company's option, the ability to force conversion of the Debenture in whole or in part, subject to a 9.99% limitation of outstanding shares ownership provision, if the market price of the Company's common shares is sustained at or above \$0.50 per share for five consecutive trading days. The Class A Warrant also contains a

mandatory conversion provision which grants the Company, at the Company's option, the ability to force conversion of the Warrant in whole or in part, subject to a 9.99% limitation of outstanding shares ownership provision, if the market price of the Company's common shares is sustained at or above \$0.75 per share for five consecutive trading days. We are registering the shares of common stock acquirable upon conversion of the 6% Convertible Debenture and exercise of the Class A Warrants for resale by the selling shareholder in the amended registration statement in which this prospectus is included.

On June 1, 2006, the Company remitted interest to RAB Special Situations (Master) Fund Limited in the amount \$31,397.26 in the form of stock as allowed by terms of the 6% Convertible Debenture, resulting in 28,286 shares of common stock being issued to the holder. The stock price used as specified in the Debenture was the closing bid price five (5) business days prior to the due date of the interest payment, which was May 24, 2006. On that date our common stock closed at \$1.11 per share.

Under the terms of the Subscription Agreement, we agreed to prepare and file the registration statement in which this prospectus forms a part. The Subscription Agreement requires us to use reasonable efforts to cause the registration statement to be declared effective by the SEC as soon as possible, but in any event not later than the earlier of (a) March 21, 2006 (one hundred twenty (120) days following the closing date of the private placement) (or April 20, 2006 (one hundred fifty (150) in the event of an SEC review of the registration statement)), and (b) the fifth trading day following the date on which Little Squaw is notified by the SEC that the registration statement will not be reviewed or is no longer subject to further review and comments. Subject to certain limitations, we agreed that if (A) the registration statement is not filed on or prior to January 20, 2006 (sixty (60) calendar days after the closing date of the private placement); (1) the registration statement is not declared effective on or prior to the earlier of (a) March 21, 2006 (one hundred twenty (120) days following the closing date of the private placement) (or April 20, 2006 (one hundred fifty (150) in the event of an SEC review of the registration statement)), and (b) the fifth trading day following the date on which Little Squaw is notified by the SEC that the registration statement will not be reviewed or is no longer subject to further review and comments, or (2) the registration statement ceases to be effective and available to the selling shareholder as to its registrable securities without being succeeded within 20 trading days by an effective amendment thereto or by a subsequent registration statement filed with and declared effective by the SEC, then, in addition to any other rights available to the selling shareholder under the subscription agreement or applicable law on the failure by the us to comply with the requirement, we will be required to issue our shares to the selling shareholder, as liquidated damages and not as a penalty, with a fair market value (determined by the average closing price of our common stock on the OTCBB during the ten days preceding the issuance of such shares) equal to two percent (2%) of the price paid by the selling shareholder for the debenture and warrants and on each monthly anniversary of such failure until we comply; provided, however, that any liquidated damages that accrue under the subscription agreement shall not exceed eight percent (8%) of the price paid by the selling shareholder for the debentures and warrants.

We are registering the shares of common stock issued in the private placement and the shares of common stock issuable upon exercise of the warrants for resale by the selling shareholder in the registration statement in which this prospectus is included.

Transactions with Strata Partners, LLC

On September 23, 2005, we entered into a Placement Agent Agreement with Strata Partners, LLC, a U.S. registered broker dealer. Under the terms of a Placement Agent Agreement, we agreed to pay Strata Partners, LLC, as agent, a placement agent fee in the amount of agent compensation fee in an amount equal to eight percent (8%), as applicable, for sales effected by the agent and a lead agent fee agent in an amount equal to two percent (2%) of the aggregate gross proceeds of any placement during the term of the agreement. The agent also will receive warrants, as lead agent, to purchase common shares equal to three percent (3%) of the total number of common shares (or common stock equivalents) sold by us in the placement and warrants as selling agent to purchase additional common shares equal to seven percent (7%) of the total number of common shares (or common stock equivalents), as applicable, for sales effected by the agent. The terms, conditions and exercise price of the warrants to be issued to the agent shall be economically equivalent to the terms, conditions and exercise price of the securities issued by us in a placement. We also agreed to grant the agent the same registration rights granted to investors in a placement, if any, and reimburse the agent for all expenses incurred by it in the performance of the agent's obligations, including but not limited to the fees and expenses of our counsel and accountants and the cost of qualifying the placement, and the sale of the securities, in various states or obtaining an exemption from state registration requirements. We will reimburse the agent for actual expenses, including but not limited to accounting, legal and professional fees, incurred by the agent in connection with the Placement, not to exceed one-half percent (0.5%) of the gross offering proceeds. We agreed that the agent would serve as exclusive placement agent until January 31, 2006, extendable for a period of time thereafter by mutual consent. Prior to its expiration on January 31, 2006, we extended the agreement to February 28, 2006 to provide for the agent's compensation for the closing of the second tranche on February 24, as discussed below, which had been arranged by Strata Partners. In connection with the Placement Agent Agreement and its verbal extension, we paid Strata Partners the following fees:

Effective November 21, 2005, we entered into a Subscription Agreement with one institutional investor related to the placement of a 6% Convertible Debenture of the Registrant in the principal amount of One Million United States Dollars (US\$1,000,000) and a Class A Warrant exercisable into 2,500,000 shares of our common stock (for and in consideration

of One Million United States Dollars (US\$1,000,000)). We paid Strata Partners an agent's commission of 10% of the gross proceeds (\$100,000) and issued the agent a Class A Warrant exercisable into 500,000 shares of our common stock in connection with the transaction.

On January 31, 2006, we closed a private placement of 3,895,000 Units, at a price of \$0.25 per Unit for gross proceeds of \$973,750. We paid Strata Partners an agent's commission of 10% of the gross proceeds (\$97,370) and issued the agent 389,500 Class B Warrants in connection with the transaction.

On February 24, 2006, we closed a private placement of 5,600,000 Units, at a price of \$0.25 per Unit for gross proceeds of \$1,400,000. We paid Strata Partners an agent's commission of 10% of the gross proceeds (\$140,000) and issued the agent 560,000 Class B Warrants in connection with the transaction.

We previously issued Strata Partners, LLC 31,400 shares of common stock during the three months ended September 30, 2005, in reimbursement for certain expenses under the terms of a previous Placement Agent Agreement that terminated on July 1, 2005.

We are registering the shares of common stock issued in the private placement and the shares of common stock issuable upon exercise of the warrants for resale by the selling shareholder in the registration statement in which this prospectus is included. We also registered 949,500 shares of common stock acquirable upon the exercise of Class B Warrants in a registration statement on Form SB-2 filed with the SEC.

PLAN OF DISTRIBUTION

We are registering the shares of common stock on behalf of the selling shareholders. When we refer to selling shareholders, we intend to include donees and pledgees selling shares received from a named Selling Shareholder(s) after the date of this prospectus. All costs, expenses and fees in connection with this registration of the shares offered under this registration statement will be borne by us. Brokerage commissions and similar selling expenses, if any, attributable to the sale of shares will be borne by the selling shareholders. Assuming that the registration statement is effective, sales of shares may be effected by the selling shareholders from time to time in one or more types of transactions (which may include block transactions) on the over-the-counter market, in negotiated transactions, through put or call options transactions relating to the shares, through short sales of shares, or a combination of such methods of sale, at market prices prevailing at the time of sale, or at negotiated prices. Such transactions may or may not involve brokers or dealers. The selling shareholders have advised us that they have not entered into any agreements, understandings or arrangements with any underwriters or broker-dealers regarding the sale of their securities, nor is there an underwriter or coordinating broker acting in connection with the proposed sale of shares by the selling shareholders.

The selling shareholders may effect such transactions by selling shares directly to purchasers or through broker-dealers, which may act as agents or principals. Such broker-dealers may receive compensation in the form of discounts, concessions, or commissions from the selling shareholders and/or purchasers of shares for whom such broker-dealers may act as agents or to whom they sell as principal, or both (which compensation as to a particular broker-dealer might be in excess of customary commissions).

The selling shareholders and any broker-dealers that act in connection with the sale of shares might be deemed to be underwriters within the meaning of Section 2(11) of the Securities Act, and any commissions received by such broker-dealers and any profit on the resale of shares sold by them while acting as principals might be deemed to be underwriting discounts or commissions under the Securities Act. The selling shareholders may agree to indemnify any agent, dealer or broker-dealer that participates in transactions involving sales of the shares against some liabilities arising under the Securities Act.

Because the selling shareholders may be deemed to be underwriters within the meaning of Section 2(11) of the Securities Act, the selling shareholders will be subject to the prospectus delivery requirements of the Securities Act.

We have informed the selling shareholders that the anti-manipulative provisions of Regulation M promulgated under the Exchange Act may apply to their sales in the market.

In the event that the registration statement is no longer effective, the selling shareholders may resell all or a portion of the shares in open market transactions in reliance upon Rule 144 under the Securities Act, provided they meet the criteria and conform to the requirements of such Rule, including the minimum one year holding period.

Upon being notified by any Selling Shareholders that any material arrangement has been entered into with a broker-dealer for the sale of shares through a block trade, special offering, exchange distribution or secondary distribution or a purchase by a broker or dealer, we will file a supplement to this prospectus, if required, under Rule 424(b) of the Act, disclosing:

- the name of each selling shareholder(s) and of the participating broker-dealer(s),
- the number of shares involved,
- the price at which the shares were sold,
- the commissions paid or discounts or concessions allowed to the broker-dealer(s), where applicable,
- that the broker-dealer(s) did not conduct any investigation to verify information set out or incorporated by reference in this prospectus; and
- other facts material to the transaction.

LEGAL PROCEEDINGS

Neither we nor any of our property are currently subject to any material legal proceedings or other regulatory or governmental proceedings. We are not aware of any proceeding that a governmental authority is contemplating relating to us or our properties.

DIRECTORS, EXECUTIVE OFFICERS, PROMOTERS AND CONTROL PERSONS

The section sets forth certain information with respect to our current directors, executive officers and key employees as of August 18, 2006. The term for each director expires at our next annual meeting or until his or her successor is appointed.

Chief Financial Officer

(1) Mr. Schara was appointed as a director to fill a vacancy on our board of directors (resulting from the resignation of Jackie Stephens on September 13, 2005) on February 13, 2006.

(2) Mr. Sharp replaced Becky L. Corigliano as our Treasurer, Secretary and Chief Financial Officer on March 1, 2006. Ms. Corigliano resigned effective February 17, 2006.

Background and Experience

Richard R. Walters: Mr. Walters has been the President and a director since June 24, 2003; he was Acting Chief Financial Officer until November 1, 2003. Mr. Walters spends approximately 80% of his business hours each month on matters related to Little Squaw. He is an economic geologist, and holds a degree in geology from Washington State University (1967). He is a Certified Professional Geologist by the American Institute of Professional Geologists and licensed to practice as a geologist in the states of Alaska and Washington. From March 1994 to March 2000 he was a director, Chief Operating Officer and President of Yamana Resources, Inc., a Toronto Stock Exchange listed company now known as Yamana Gold Inc. From April 2000 to December 2004 he was the president of Marifil S.A., a private mineral exploration and holding company in Argentina. In February of 2005 Marifil S.A. was merged into Marifil Mines Limited a public company traded on the Toronto Ventures Exchange. Mr. Walters is a director and the Executive Vice President of Marifil Mines Limited.

Charles G. Bigelow: Mr. Bigelow has been a director since June 30, 2003. Mr. Bigelow spends approximately 25 hours per month on matters related to Little Squaw. He is an economic geologist with a degree in geology from Washington State University (1955). From 1972 to June 2005, he has served as the president of WGM Inc., a private consulting and

project management firm of geologists operating in Alaska. During the previous five years, he was also a Director and the President and Chief Executive Officer of Ventures Resource Corporation, a public mineral exploration company listed on the Toronto Ventures Stock Exchange. Mr. Bigelow retired in June 2005 and remains retired.

James K. Duff: Mr. Duff has been the Chairman of the Board of Directors since June 24, 2003. Mr. Duff spends approximately 10 hours per month on matters related to Little Squaw. He is a geologist with over 35 years of diverse international experience in the mining industry. Since September 2005, Mr. Duff has served as the President of South American Operations for Coeur d'Alene Mining Corporation, a public company traded on the New York Stock exchange. Between April 2004 and September 2005, he was the President and Chief Executive Officer of American International Ventures, and is currently serving as a director of that company. American International Ventures is a U.S. gold exploration company that trades on the NASDAQ OTC BB. From November 2002 to April 2004, Mr. Duff worked as a consultant to companies in the mining industry, including Coeur d'Alene Mines and other. He previously worked for Coeur d'Alene Mines for 12 years where he was Vice President of Business Development (from 1990 to November 2002). Mr. Duff has a BS degree in geology from the Mackay School of Mines at the University of Nevada, Reno and an MS degree in geology from the University of Idaho, and he completed the Program for Management Development at the Harvard School of Business. He is a past President and honorary Life Member of the Northwest Mining Association.

James A. Fish: Mr. Fish has been a director since June 24, 2003. Mr. Fish spends approximately 6 hours per month on matters related to Little Squaw. He received a degree in geology from Berea College in Kentucky in 1952 and a law degree from Gonzaga University School of Law in 1962. Mr. Fish has served an officer and director of Hanover Gold Company, Inc. since 1995 and Vice President for the last two years. Hanover is a development stage mining company listed on the NASD OTC BB. Since 1987, Mr. Fish has been Vice President and General Counsel for N.A. Degerstrom, Inc., a privately held mining and construction company based in Spokane, Washington.

Kenneth S. Eickerman: Mr. Eickerman became a director on March 4, 2004. Mr. Eickerman spends approximately 12 hours per month on matters related to Little Squaw. He received a B.A. degree in Business Administration from Washington State University and is a Certified Public Accountant. Mr. Eickerman has served as the Controller for Revett Minerals Inc., a Canadian mining company trading on the Toronto Stock Exchange, since April 2004. From January of 2004 to April of 2004 he was the CFO for Sullivan Homes, Inc, a privately owned construction/reality company in Spokane, WA that builds custom homes and develops commercial properties. From May 2002 to January 2004, he served as Vice President and Controller of Mustang Line Contractors, Inc., a company that builds electric transmission lines. Previously, he was the Controller and Treasurer for Apollo Gold, Inc from April 1999 to April 2002. Mr. Eickerman is Chairman of the Audit Committee and its designated Financial Expert.

William Orchow: Mr. Orchow became a director on July 20, 2004. Mr. Orchow spends approximately 10 hours per month on matters related to Little Squaw. He has served as a director, President and Chief Executive Officer of Revett Minerals, Inc., a Canadian company trading on the Toronto Stock Exchange, since September 2003. Prior to Revett, Mr. Orchow took time off, from January 2003 to August 2003. From November 1994 to December 2002, Mr.

Orchow was President and Chief Executive Officer of Kennecott Minerals Company, where he was responsible for the operation and business development of all of Kennecott Mineral s mines with the exception of its Bingham Canyon mine. From June 1993 to October 1994, he was President and Chief Executive Officer of Kennecott Energy Company, the third largest producer of domestic coal in the United States, and prior to that was Vice President of Kennecott Utah Copper Corporation. Mr. Orchow has also held senior management and director positions with Kennecott Holdings Corporation, the parent corporation of the aforementioned Kennecott entities. He has also been a director and member of the executive committee of the Gold Institute, a director of the National Mining Association and a director of the National Coal Association. Mr. Orchow is currently a member of the board of trustees of Westminster College in Salt Lake City and chairman of its finance committee. He graduated from the College of Emporia in Emporia, Kansas with a bachelor s degree in science. Mr. Orchow serves on the Audit Committee.

William V. Schara: Mr. Schara is a Certified Public Accountant, and has a Bachelor of Science Degree in Accounting from Marquette University. Mr. Schara spends approximately 10 hours per month on matters related to Little Squaw. He was also appointed to the Company s Audit Committee on February 13, 2005. Since December 2004 he has been employed as a management consultant for, and then since July of 2005 as the Chief Financial officer of, Minera Andes Inc., a Canadian development stage mining company listed on the Canadian Ventures Exchange and the NASDAQ OTC BB exchange. He previously worked for Yamana Gold Inc. and its predecessor companies from July 1995 to September 2003, the last four years of which were in the capacity of Vice President of Finance and Chief Financial Officer. Yamana Gold Inc. is a production stage Canadian public company trading on the Toronto Stock Exchange, the American Stock Exchange and the London Alternative Investment Market Exchange. Since September 2004, Mr. Schara has served as a director of Marifil Mines Limited, an exploration stage Canadian public company traded on the Canadian Ventures Exchange. Since October 2003, Mr. Schara has been the owner and operator of BudgetMap, a financial planning system retailer company. Mr. Schara has more than 25 years experience in finance and accounting with extensive experience in

business start-ups, international business, and managing small public companies and mining company joint ventures. Mr. Schara serves on the Audit Committee.

Ted R. Sharp: Mr. Sharp was appointed as our Chief Financial Officer, Secretary, and Treasurer effective March 1, 2006. Mr. Sharp spends approximately 50% of his business hours each month on matters related to Little Squaw.

Mr. Sharp is a Certified Public Accountant, and has Bachelor of Business Administration Degree in Accounting from Boise State University. Since 2003, he has been President of Sharp Executive Associates, Inc., a privately-held accounting firm providing Chief Financial Officer services to clients. Prior to 2003, he worked for 14 years in positions of Chief Financial Officer, Managing Director of European Operations and Corporate Controller for Key Technology, Inc., a publicly-traded manufacturer of capital goods. Mr. Sharp has more than 25 years of experience in treasury management, internal financial controls, U.S. Security and Exchange compliance and Corporate Governance.

The Company has entered into a management consulting contract with Mr. Sharp, engaging him on a part-time basis.

Our Directors are elected for a one-year term and until their successors have been elected and qualified. Executive Officers are appointed to serve until the meeting of the Board of Directors following the next annual meeting of shareholders and until their successors have been elected and qualified. There are no arrangements or understandings between any of the directors, executive officers, and other persons pursuant to which any of the foregoing persons were named as Directors or executive officers.

Jackie Stephens was a member of our Board of Directors during the year before resigning on September 13, 2005.

Becky L. Corigliano served as our Treasurer, Secretary and Chief Financial Officer during the year ended December 31, 2005, before resigning effective February 17, 2006.

As noted above, except for Mr. Eickerman, the Directors also act as directors for companies with a class of securities registered pursuant to Section 12 of the Exchange Act or subject to Section 15(d) of the Act.

No Director, or person nominated to become a Director or Executive Officer, has been involved in any legal action involving us during the past five years.

Promoters and Control Persons:

Not Applicable

Board Committees

Our Board of Directors has an Audit Committee and a Compensation Committee. The members of the Audit Committee are Mr. Eickerman, Mr. Orchow and Mr. Schara. The responsibilities of the Audit Committee include monitoring compliance with Company policies and applicable laws and regulations, making recommendations to the full Board of Directors concerning the adequacy and accuracy of internal systems and controls, the appointment of auditors and the acceptance of audits, and monitoring management's efforts to correct any deficiencies discovered in an audit or supervisory examination. Each of these Directors is an independent Director. The Audit Committee had four meetings in 2005. On March 4, 2004, Mr. Stephens resigned from the Audit Committee, and on September 13, 2005 resigned from the Board of Directors. Mr. Eickerman became a member of the Audit Committee and was designated by the Board of Directors as the Chairman of the Audit Committee and its Financial Expert. On February 13, 2006, Mr. Schara was appointed to replace Mr. Fish on the Audit Committee.

The Compensation Committee is composed of Mr. Fish, as its Chairman, and Mr. Bigelow. This Committee receives and considers recommendations from the President for compensation for consultants and the Directors. The Committee also is responsible for the administration of all awards made by the Board of Directors pursuant to the Restated 2003 Share Incentive Plan.

Our entire Board of Directors acts as a Nominating Committee. This committee does not have a charter nor has it adopted a policy with regard to consideration of director candidates recommended by shareholders. The Board of Directors does not believe that it is necessary to adopt specific criteria or procedures.

Code of Ethics

The Board of Directors considers and implements our business and governance policies.

On November 7, 2005, our Board of Directors adopted a Code of Business Conduct and Ethics for directors, officers and executive officers of Little Squaw Gold Mining Company and its subsidiaries and affiliates. All our directors and employees have been provided with a copy of this Code, and it is posted on our World Wide Web site at www.littlesquawgold.com. The document is intended to provide guidance for all directors and employees (including officers) and other persons who may be considered associates of our company to deal ethically in all aspects of its business and to comply fully with all laws, regulations, and company policies. If we make any amendments to this Code other than technical, administrative or other non-substantive amendments, or grant any waivers, including implicit waivers, from a provision of this Code to our chief executive officer, or chief financial officer, we will disclose the nature of the amendment or waiver, its effective date and to whom it applies on our website or in a report on Form 8-K filed with the Securities and Exchange Commission. A copy of the Code will be sent without charge to anyone requesting a copy by contacting us at our principal office.

This Code is in addition to other detailed policies relevant to business ethics that we may adopt from time to time.

Insider Trading Policy

We adopted an Insider Trading Policy on February 13, 2006. The policy defines an insider as a person who possesses, or has access to, material information concerning us that has not been fully disclosed to the public. Any employee, officer or director who believes he or she would be regarded as an insider who is contemplating a transaction in our stock must contact our CEO or CFO prior to executing the transaction to determine if he or she may properly proceed. In addition, all officers, directors and employees listed within the policy are prohibited from trading in our securities except during limited trading windows defined within the policy. Our Insider Trading Policy is posted on our website at www.littlesquaw.com.

EXECUTIVE COMPENSATION

Summary Compensation Table

A summary of cash and other compensation paid in accordance with management consulting contracts for our President and Chief Executive Officer for the three most recent years is as follows:

(1)

Includes \$12,863 in accrued fees from 2004.

(2)

Mr. Sharp was appointed as our Chief Financial Officer effective March 1, 2006.

(3)

Becky L. Corigliano served as the Treasurer/Secretary and Acting Chief Financial Officer of Little Squaw Gold Mining Company beginning November 1, 2003 and was appointed Chief Financial Officer by the Board of Directors on March 4, 2004. Ms. Corigliano resigned effective February 17, 2006.

Option/SAR Grants in Last Three Fiscal Years

There were no Option/SAR grants to executives or directors in fiscal 2005 or 2003.

On March 4, 2004, we issued options to purchase shares of common stock to the directors pursuant to the 2003 share incentive plan, in each case exercisable for a ten year period from the date of issuance at an exercise price of \$0.29 per share. The options were valued using a 45% discount of the average closing price of the last five trading days of 2003. The options were issued to the following directors:

Director	Option Shares	Vesting
Charles G. Bigelow	5,000	Immediately
James K. Duff	5,000	Immediately
James A. Fish	5,000	Immediately
Jackie E. Stephens (resigned effective September 13, 2005) ⁽¹⁾	5,000	Immediately

⁽¹⁾ Expired March 13, 2006.

On December 31, 2004, we issued options to purchase shares of common stock to the directors pursuant to the 2003 Share Incentive Plan, in each case exercisable for a ten year period from the date of issuance at an exercise price of \$0.22 per share. The options were valued using the average closing price of the last five trading days of 2004 at a 45% discount. The options were issued to the following directors:

Director	Option Shares	Vesting
Charles G. Bigelow	50,000	Immediately
James K. Duff	50,000	Immediately
Kenneth S. Eickerman	50,000	Immediately
James A. Fish	50,000	Immediately
William Orchow	50,000	Immediately
Jackie E. Stephens (resigned effective September 13, 2005) ⁽¹⁾	50,000	Immediately

⁽¹⁾ Expired March 13, 2006.

On November 12, 2004, our Board of Directors approved the issuance of 50,000 shares of common stock to each of its six independent directors for services in 2004. Charles G. Bigelow, James K. Duff, James A. Fish, Kenneth S. Eickerman, William Orchow and Jackie E. Stephens (resigned September 13, 2005) each received 50,000 shares under our 2003 Share Incentive Plan.

On March 1, 2006, we issued 25,000 shares of common stock, vesting May 1, 2006, and options to purchase 50,000 shares of common stock, vesting May 1, 2006, exercisable for a ten year period from the date of issuance at an

exercise price of \$0.40 per share to Ted R. Sharp under our Restated 2003 Share Incentive Plan, in connection with his appointment as our Treasurer, Secretary and Chief Financial Officer.

On March 29, 2006, we issued 50,000 shares of common stock and options to purchase 50,000 shares of common stock exercisable for a ten year period from the date of issuance at an exercise price of \$0.65 per share to William V. Schara under our Restated 2003 Share Incentive Plan, in connection with his appointment to our Board of Directors.

On June 20, 2006, we issued to Ken Eickerman, one of our directors, 25,000 shares of common stock as a result of exercise of 25,000 stock options, resulting in \$5,500 proceeds received by us.

Director Compensation

The Directors receive \$500 for each board meeting and \$300 for each committee meeting. During 2004 we deferred \$10,600 in board compensation.

Independent Contractor Agreements

We entered into an Independent Contractor Agreement dated June 30, 2003 for a term of four months with Richard R. Walters, as a consultant. The Agreement was renewed on October 1, 2003 through September 30, 2004. On November 12, 2004 and again on November 7, 2005, the Agreement was renewed retroactively to October 1, 2004 and October 1, 2005, respectively,

by our Board of Directors for an additional one year period under the original terms. The services provided by Mr. Walters include serving as our President and Chief Operating Officer and such other executive management functions as shall be requested by the Board of Directors. The Agreement renews each year on the anniversary date for a one year term, pending board approval. Either party may terminate the Agreement upon 15 days written notice. As consideration for performance of the services, we agreed to pay Mr. Walters a fee of \$175 per day worked, pro rated for each partial day worked. On February 15, 2006, the Board of Directors extended Mr. Walters Agreement for one year and increased the fee to \$300 per day worked, pro rated for each partial day worked. Mr. Walters is not an employee.

Mr. Walters is entitled to reimbursement for his expenses, with any expense greater than \$1,000 being subject to prior approval by the Compensation Committee. We may accrue and defer the payment of the fees and/or expenses from time to time until the Compensation Committee determines we have sufficient funds to make payment. Due to limited cash resources between July 1, 2004 and October 1, 2005, we accrued but did not pay Mr. Walters amounts payable under his contract. On December 31, 2005, Mr. Walters was paid all the accrued fees. No benefits are provided to Mr. Walters by us other than the compensation for his services.

We entered into an Independent Contractor Agreement, effective November 1, 2003, with Becky Corigliano, our former Chief Financial Officer, as a consultant. Her consulting services initially were limited to treasurer and corporate secretary functions. As part of those services, she was the Secretary, Treasurer and Acting Chief Financial Officer. On March 4, 2004, she became the Chief Financial Officer. On November 12, 2004 and again on November 7, 2005, the Agreement was renewed retroactively to November 1, 2004 and November 1, 2005, respectively, by the Board of Directors for an additional one year period under the original terms. The initial term of this Agreement is for a period of one year from the effective date. Either party may terminate the Agreement upon 15 days written notice. As consideration for the performance of the services, we paid Ms. Corigliano a fee of \$150 per day worked, prorated for each partial day worked. We also guaranteed a minimum of 10 full days work per month, a minimum monthly payment of \$1,500. Ms. Corigliano also was reimbursed for reasonable expenses previously approved by us. Ms. Corigliano received 67,103 shares of common stock subsequent to February 26, 2004 as a result of her designation as Chief Financial Officer. The shares issued to her were treasury shares held by us. The shares are subject to the restricted securities requirements of the Securities Act of 1933. No benefits were provided to Ms. Corigliano by us other than the accrued compensation for her services. Ms. Corigliano was not an employee. Ms. Corigliano resigned effective February 17, 2006.

We entered into an Independent Contractor Agreement, effective March 1, 2006, with Ted R. Sharp as a Management Consultant to serve as Secretary, Treasurer and Chief Financial Officer. The term of this Agreement is through December 31, 2006. Either party may terminate the Agreement upon 15 days written notice. As consideration for the performance of the services, we will pay Mr. Sharp a fee of \$7,500 per month. Mr. Sharp also will be reimbursed for reasonable expenses previously approved by us. As additional compensation for services, we issued 25,000 shares of Restricted Common Stock and 50,000 Stock Options under the Restated 2003 Share Incentive Plan. No benefits are provided to Mr. Sharp by us for his services. Mr. Sharp is not an employee and serves on a part time basis.

We entered into an Independent Contractor Agreement, effective January 10, 2006, with Robert G. Pate as a Management Consultant to serve as the Assistant Project Manager for the Chandalar project. Effective March 1, 2006 our Board of Directors confirmed the appointment of Mr. Pate as Vice President. The term of this Agreement is through December 31, 2006. Either party may terminate the Agreement upon 15 days written notice, however we may terminate Mr. Pate only for just cause. As consideration for the performance of services, we will pay Mr. Pate a fee of \$4,500 per month for a 15 day per month base work period plus \$225 per day for each non-field day worked in excess to 15 days per month and \$450 per day for each field day worked beyond the 15 day base period. Additionally, we will pay Mr. Pate an extra \$150 per day for each field day worked within the 15 day base period. Mr. Pate also will be reimbursed for reasonable expenses previously approved by us. As additional compensation for services, we have issued 25,000 shares of Restricted Common Stock and 50,000 Stock Options under the Restated 2003 Share Incentive Plan. No benefits are provided to Mr. Pate by us for his services. Mr. Pate is not an employee and serves on a part time basis.

We entered into an Independent Contractor Agreement, effective March 1, 2006, with Susan J. Schenk as a Management Consultant to serve as Manager of Investor Relations. The term of this Agreement is through December 31, 2006. Either party may terminate the Agreement upon 15 days written notice; however, we may terminate Ms. Schenk only for just cause. As consideration for the performance of services, we will pay Ms. Schenk a fee of \$4,000 per month plus \$150 per day for each day worked in excess of 16 days per month. Ms. Schenk also will be reimbursed for reasonable expenses previously approved by us. As additional compensation for services, we have issued 25,000 shares of Restricted Common Stock and 50,000 Stock Options under the Restated 2003 Share Incentive Plan. No benefits are provided to Ms. Schenk by us for her services. Ms. Schenk is not an employee and serves on a part time basis.

We entered into an Independent Contractor Agreement, effective January 10, 2006, with James C. Barker as a Management Consultant to serve as the Project Manager for the Chandalar project. The term of this Agreement is through

December 31, 2006. Either party may terminate the Agreement upon 15 days written notice. As consideration for the performance of services, we will pay Mr. Barker a fee of \$625 per day for each field day worked, or \$550 per day for each non-field day worked in each calendar month up to 15 days per month, then \$450 per day for each non-field day worked in excess of 15 days per month. Mr. Barker also will be reimbursed for reasonable expenses previously approved by us. No benefits are provided to Mr. Barker by us for his services. Mr. Barker is not an employee and serves on a part time basis.

SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

The following table sets forth certain information regarding the beneficial ownership of shares of the Company's common stock as of August 18, 2006 by:

- each person who is known by us to beneficially own more than 5% of our issued and outstanding shares of common stock;
- our named executive officers;
- our directors; and
- all of our executive officers and directors as a group.

Less than 1%.

(1)

Calculated based on 26,806,706 shares of common stock issued and outstanding as of July 31, 2006.

(2)

Includes 5,000 shares of common stock acquirable upon exercise of vested options exercisable before March 3, 2014.

(3)

Includes 50,000 shares of common stock acquirable upon exercise of vested options exercisable before December 31, 2014.

(4)

Includes shares of common stock acquirable upon exercise of vested options exercisable described in footnotes (2), (3), (7) and (8).

(5)

RAB Special Situations (Master) Fund Limited is organized under the laws of the Cayman Islands. The shareholder holds a 6% convertible debenture in the principal amount of \$1,000,000 convertible into 5,000,000 common stock at \$0.20 per share and a Class A Warrant exercisable to acquire 2,500,000 shares of common stock at \$0.30 per share before November 20, 2008. The 6% convertible debenture and the Class A Warrant contain provisions that limit the selling shareholder's beneficial ownership in the class of common stock of Little Squaw to 9.99%. Shares totaling 28,286 were issued to the holder on June 1, 2006 in for interest under the terms of the convertible debenture.

(6)

Includes 25,000 shares of common stock acquirable upon exercise of vested options exercisable before December 31, 2014.

(7)

Includes 25,000 shares of common stock and 50,000 shares of common stock acquirable upon exercise of options, both of which were issued on March 1, 2006 and vest on May 1, 2006. The options are exercisable before May 1, 2016.

(8)

Includes 25,000 shares of common stock and 50,000 shares of common stock acquirable upon exercise of vested options issued on February 13, 2006. The options are exercisable before February 13, 2016.

(9)

Includes 50,000 shares of common stock acquirable upon exercise of vested options exercisable before March 29, 2016.

We have no knowledge of any other arrangements, including any pledge by any person of our securities, the operation of which may at a subsequent date result in a change in control of our company.

We are not, to the best of our knowledge, directly or indirectly owned or controlled by another corporation or foreign government.

CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Related Transactions

On January 21, 2005, we separately had related party transactions with William Orchow, a director, Wilbur G. Hallauer and another shareholder in which these parties advanced an aggregate amount of \$100,000 to us for operating capital purposes. The advances were evidenced by six month promissory notes payable on demand with accrued interest at 6% per annum. We had the right, any time prior to their maturity date on July 20, 2005, and without notice, to convert the Notes into restricted shares of our common stock and warrants. The initial conversion rate was \$0.30 per share and included one warrant per share initially at \$0.45. The exercise price of the warrants escalated to \$0.55 and \$0.75 in the second and third year from the date of issue. No payable demand was made, and the Notes matured on July 20, 2005, where upon we requested of all Note holders an extension of the term of the Notes. All parties to the Notes agreed to extend the term of the Notes for an indefinite period until we had the financial resources to repay them. In connection with the agreement to extend the term of the Notes the parties also agreed that the interest rate on the Notes would increase from 6% to 12%. At September 30, 2005, we had accrued \$3,000 of interest related to the Notes, which was subsequently paid. On October 18, 2005 a principal payment of \$25,000 plus interest due was paid on one of the convertible promissory notes in the amount of \$50,000 leaving a total balance due of \$75,000. On December 20, 2005, the remaining balance of \$75,000 and two months interest was paid on the convertible promissory notes.

Equity Compensation Plan Information

At a special meeting of shareholders on January 23, 2004, the shareholders voted to adopt the Little Squaw Gold Mining Company 2003 Share Incentive Plan. The Plan permits the grant of nonqualified stock options, incentive stock options and shares of common stock, referred to as restricted stock, to participants of the Plan. The purpose of the Plan is to promote our success and enhance the value of our assets by linking the personal interests of the participants to those of our shareholders, by providing participants with an incentive for outstanding performance. Pursuant to the terms of the Plan, 1,200,000 shares of unissued common stock, in aggregate, were authorized and reserved for issue under nonqualified stock options, incentive stock options and restricted stock grants. The Plan is administered by our Compensation Committee and subject to the terms and provisions of the Plan, the Compensation Committee, at any time and from time to time, may grant nonqualified stock options, incentive stock options and restricted stock to participants under the plan in such amounts, as the committee may determine. Eligible participants in the Plan include our employees, directors and consultants.

Options granted to participants under the Plan must be exercised no later than the tenth employment anniversary of the participant. If a participant shall die while employed by or while a Director of the Company, any Option held by him shall become exercisable in whole or in part if the Option was issued one year or more prior to the date of death, but only by the person or persons to whom the participant's rights under the Option shall pass by the participant's will or applicable laws of descent and distribution. All such Options shall be exercisable only to the extent that the participant was entitled to exercise the Option at the date of his death and only for six months after the date of death or prior to the expiration of the option period in respect thereof, whichever is sooner. If a participant ceases to be employed or act as a consultant or director of the company for cause, no Option held by such participant may be exercised following the date on which such participant ceases to be so employed or ceases to be a consultant or director, as the case may be. If a participant ceases to be employed by or act as a director of the company for any reason other than cause, then any Option held by such participant at the effective date thereof shall become exercisable in whole or in part for a period of up to six months thereafter.

Restricted stock may not be sold, transferred, pledged, assigned, or otherwise alienated or hypothecated until the end of the applicable period of restriction established by the Compensation Committee and specified in the award agreement granting the restricted stock, or upon earlier satisfaction of any other conditions, as specified by the Committee, in its sole discretion, and set forth in the award agreement. All rights with respect to the restricted stock granted to a participant under the Plan shall be available during his or her lifetime only to the participant. Each award agreement shall set forth the extent to which the participant shall have the right to retain restricted stock and following termination of the participant's employment with the company. Such provisions shall be determined in the sole discretion of the Compensation Committee, shall be included in the award agreement entered into with each participant, need not be uniform among all restricted stock issued pursuant to the Plan, and may reflect distinctions based on the reasons for termination.

Under the Plan, upon a change of control transaction

○

any and all Options granted hereunder shall become immediately exercisable; additionally, if a participant's employment is terminated for any other reason except cause within twelve (12) months of such Change in Control, the participant shall have until the earlier of: (i) twelve (12) months following such termination date; or (ii) the expiration of the Option, to exercise any such Option;

○

any period of restriction for restricted stock granted hereunder that have not previously vested shall end, and such restricted stock and restricted stock units shall become fully vested;

○

the target payout opportunities attainable under all outstanding awards which are subject to achievement of any performance conditions or restrictions that the committee has made the award contingent upon, shall be deemed to have been earned as of the effective date of the change in control, and such awards treated as follows: the vesting of all such awards denominated in shares shall be accelerated as of the effective date of the change in control the Compensation Committee has the authority to pay all or any portion of the value of the shares in cash; and

○

the Compensation Committee has authority to make any modifications to the awards as determined by the committee to be appropriate before the effective date of the change in control.

Under the Plan a Change in Control means any of the following events: (i) any organization, group, or person (as such term is used in Sections 13(d) and 14(d) of the Securities Exchange Act of 1934, as amended) (the Exchange Act) is or becomes the Beneficial Owner (as defined in Rule 13d-3 under the Exchange Act), directly or indirectly, of securities of the company representing thirty-five percent (35%) or more of the combined voting power of the then outstanding securities of the company; or (ii) during any two (2) year period, a majority of the members of the Board serving at the date of approval of this Plan by shareholders is replaced by Directors who are not nominated and approved by the Board; or (iii) a majority of the members of the Board are represented by, appointed by, or affiliated with any person whom the Board has determined is seeking to effect a Change in Control of the company; or (iv) the company shall be combined with or acquired by another company and the Board shall have determined, either before such event or thereafter, by resolution, that a Change in Control will or has occurred.

In November 2005 our Board of Directors ratified changes to the Plan that brought it into compliance with new IRS laws (principally Code 409A) that require companies to recognize the fair market value of stock options and other share based payments awarded to employees and associates as compensation expense. The new law becomes effective for us on January 1, 2006. Any new shares issued under our Plan will be based on their then current market price or higher. The Plan is now referred to as the Restated 2003 Share Incentive Plan.

During 2004, 620,000 shares of common stock and options to purchase common stock were issued under the original Plan. No shares have been issued under the restated Plan.

As of December 31, 2005, securities authorized for issuance under our original 2003 Share Incentive Plan, approved by the shareholders, as equity compensation were as follows:

	Number of securities to be issued upon exercise of outstanding options, warrants and rights	Weighted average exercise price of outstanding options, warrants and rights	Number of securities available for future issuance under equity compensation plans (excluding securities reflected in column (a))
	(a)	(b)	(c)
Equity compensation plan approved by shareholders	320,000 ⁽¹⁾	\$ 0.23	580,000
Equity compensation plans not approved by shareholders	--	--	-
	320,000		580,000

(1)

Includes 55,000 options held by a former director, which expired on March 13, 2006. Subsequent to December 31, 2005, we granted options exercisable to acquire 50,000 shares of common stock at \$0.65 per share; 50,000 shares of common stock at \$0.50 per share, 50,000 shares of common stock at \$0.40 per share, and 50,000 shares of common stock at \$0.63 per share under our restated 2007 Share Incentive Plan.

DESCRIPTION OF SECURITIES

Little Squaw Gold Mining Company is authorized to issue 200,000,000 shares of common stock, \$0.10 par value, and 10,000,000 shares of preferred stock, no par value.

Common Stock

Each holder of our common stock is entitled to one vote per share in the election of directors and on all other matters submitted to the vote of shareholders. No holder of our common stock may cumulate votes in voting for our directors.

Subject to the rights of the holders of any our preferred stock that may be outstanding from time to time, each share of our common stock will have an equal and ratable right to receive dividends as may be declared by the our board of directors out of funds legally available for the payment of dividends, and, in the event of liquidation, dissolution or winding up of our corporation, will be entitled to share equally and ratably in the assets available for distribution to our shareholders. No holder of our common stock will have any preemptive right to subscribe for any of our securities.

Our common stock is quoted on the NASD Over-the-Counter Bulletin Board under the trading symbol LITS.

Preferred Stock

Our directors are authorized by our Articles of Incorporation to issue, by resolution and without any action by our shareholders, up to 10,000,000 shares of preferred stock, no par value, in one or more series, and our directors may establish the designations, dividend rights, dividend rate, conversion rights, voting rights, terms of redemption, liquidation preference, sinking fund terms and all other preferences and rights of any series of preferred stock, including rights that could adversely affect the voting power of the holders of our common stock.

One of the effects of undesignated preferred stock may be to enable the board of directors to render more difficult or to discourage an attempt to obtain control of us by means of a tender offer, proxy contest, merger or otherwise, and thereby to protect the continuity of our management. The issuance of shares of preferred stock pursuant to the board of directors' authority described above may adversely affect the rights of holders of common stock. For example, preferred stock issued by us may rank prior to the common stock as to dividend rights, liquidation preference or both, may have full or limited voting rights and may be convertible into shares of common stock. Accordingly, the issuance of shares of preferred stock may discourage bids for the common stock at a premium or may otherwise adversely affect the market price of the common stock. As of the date of this filing, the directors have not designated any such preferred shares and therefore, no preferred shares are issued or outstanding.

Transfer Agent

The transfer agent and registrar for the our common stock is Columbia Stock Transfer Company, 1602 E. Seltice Way, Suite A PMB#303, Post Falls, ID 83854, U.S.A. Phone: (208) 664-3544; Fax: (208) 777-8998.

THE SEC'S POSITION ON INDEMNIFICATION FOR SECURITIES ACT LIABILITIES

Our Amended Articles of Incorporation provide that directors and officers shall be indemnified by us to the fullest extent authorized by the Alaska Corporations Code Section 490, against all expenses and liabilities reasonably incurred in connection with services for us or on our behalf. The Amended Articles of Incorporation also authorize the board of directors to indemnify any other person who we have the power to indemnify under Alaska law, and indemnification for such a person may be greater or different from that provided in the Amended Articles of Incorporation.

To the extent that indemnification for liabilities arising under the Securities Act may be permitted for our directors, officers and controlling persons, we have been advised that in the opinion of the SEC such indemnification is against public policy as expressed in the Securities Act and is, therefore, unenforceable.

DESCRIPTION OF THE BUSINESS

Overview

We, Little Squaw Gold Mining Company, are engaged in the business of acquiring and exploring mineral properties throughout the Americas, primarily those containing gold and associated base and precious metals. We are incorporated under the laws of the State of Alaska on March 26, 1959. Our executive offices are located at 3412 S. Lincoln Dr., Spokane, WA 99203, and our phone number there is (509) 624-5831.

At this time our only property is an exploration stage property in Alaska referred to as the Chandalar property. The Chandalar property is located approximately 190 air miles NNW of Fairbanks, Alaska, and 48 miles NE of Coldfoot, in the Chandalar mining district (Map 1). The center of the district is approximately 70 miles north of the Arctic Circle. We own in fee 426.5 acres of patented federal mining claims consisting of 21 lode claims, one placer claim and one mill site. We control an additional 13,406.5 acres of unpatented State of Alaska mining claims consisting of 115 claims. State mining claims provide exploration and mining rights to both lode and placer mineral deposits. The claims are contiguous, comprising a block covering

13,833 acres (21.6 square miles), and are being maintained by us specifically for the possible exploitation of placer and lode gold deposits.

Map 1 Location of the Chandalar mining district showing principal mines and prospects.

We do not intend to conduct mining operations on our own account at this time. Rather we plan to undertake cost efficient and effective exploration activities to discover mineralization and potentially mineral reserves, which may upgrade the value of our properties and then joint venture or sell properties to qualified major mining companies. We intend to focus our activities only on projects that are primarily gold deposits.

We are an exploration stage company. None of the properties that we own or control contain any known ore reserves or mineralized material under the definition of ore reserves within SEC Industry Guide 7. Although there is a history of past lode and placer production on our Chandalar property, the property is at an early stage of exploration. The probability that ore reserves that meet SEC guidelines will be discovered on an individual prospect at Chandalar is slight. A great deal of further work is required on our properties before a final determination as to the economic and legal feasibility of a mining venture can be made. There is no assurance that a commercially viable deposit will be proven or probable through the exploration efforts by us at Chandalar. We cannot assure you that funds expended on our properties will be successful in leading to the delineation of ore reserves that meet the criteria established under SEC guidelines.

Our initial focus is on exploration of our Chandalar property. The arctic climate limits exploration activities to a summer field season that generally starts in early May and lasts until freeze up in mid-September. There are many operating mines located elsewhere within North America that are located above the Arctic Circle. Management believes year-round operations at Chandalar are feasible should an exploitable deposit of gold be proven through seasonal exploration activities.

Our Planned Exploration for 2006

Our 2006 exploration plans include the following:

-

Explore the Chandalar property and to find and then acquire additional gold exploration properties of merit.

-

Complete the seasonal exploration program on the Chandalar property that was recommended by our geologic consultant. The focus of that program is on drilling ten prospects with about 10,000 feet of reverse circulation drilling in some 30 holes. Other high-grade gold-quartz vein targets and their associated low-grade aureoles have also been identified and will receive further evaluation work along with an area search for additional gold showings. Exploration of the potentially significant placer deposits at Chandalar will be a secondary priority, and will start with an engineering scoping studying using current data.

-

Acquire additional gold exploration properties in Alaska and elsewhere in the Americas that will allow us to conduct field operations year round.

- Support state and federal industrial enhancement projects that could bring power and a road into Chandalar.

We believe we have sufficient capital to complete our 2006 exploration program. See Management's Discussion and Analysis Plans for 2006 Summer Exploration Season.

Our Property and Projects

Our principal asset is ownership of the Chandalar property, which controls most of a historic mining district known as the Chandalar mining district. It consists of contiguous patented federal mining claims and unpatented State of Alaska mining claims totaling 9,993 acres (15.6 square miles). The patented ground holds the most important of the presently known gold-bearing structures. The Chandalar property is currently at the exploration stage. The Chandalar district has a history of prior production, but there is no current production, except for some small-scale placer operations by an independent miner, Mr. Delbert Ackels, on inlier claims of our claim block (Map 2).

Map 2 Our mining claims in the Chandalar mining district.

During 2004 we contracted the services of an independent geological consulting company, Pacific Rim Geological Consultants, Inc., of Fairbanks Alaska to review and analyze previous work done on Chandalar. The report was commissioned in February and completed in May, and is titled "Gold Deposits of the Chandalar Mining District, Northern Alaska: An information Review and Recommendations". Pacific Rim concluded that the gold mineralization at Chandalar is mesothermal, which can be described as formed at moderate to high temperatures and moderate to high pressures by deposition from hydrothermal fluids. Pacific Rim recommended an initial exploration program to better assess the gold lodes and the placer gold deposits at a cost of about \$1.4 million.

Information contained in this registration statement related to our Chandalar property is derived from the report entitled "Gold Deposits of the Chandalar Mining District, Northern Alaska: An information Review and Recommendations", by Pacific Rim Geological Consultants, Inc.

A preliminary field program to follow up on the work recommended by Pacific Rim was completed in two phases during the 2004 summer field season by James C. Barker, a Certified Professional Geologist licensed to practice in Alaska and under contract to us. Mr. Barker was one of the two co-authors of the Pacific Rim report. The 2004 field work and subsequent data analyses and reporting was completed at a cost of about \$77,000. A detailed technical description of the activity and results are contained in a December 20, 2004 report by Mr. Barker titled Summary of Field Investigations 2004 .

The first phase of the exploration program ended a twenty year hiatus of hard rock exploration on the property and involved a photo geologic lineament study, expansion of the claim block to catch outlying vein showings and reconnaissance sampling. The lineament study identified fifty-nine sites thought to be favorable for discovery of mineralization. The second phase of the 2004 season s program identified six new gold-bearing quartz veins, bringing the total number of known gold-bearing quartz veins and quartz vein swarms on the Chandalar property to more than 28 (Map 3).

Mr. Barker was again retained to carry out a surface exploration program during the 2005 summer field season. This program was of a more modest nature than previously because of lack of funds, lasting only the month of July. In all, 189 exploratory samples of stream sediments, soils and rock chips were taken, and a series of ten prospect maps were upgraded. This program was completed at a cost of approximately \$58,000.

Subsequently, on January 10, 2006, we entered into a consulting contract with Mr. Barker designating him as the Project Manager for the 2006 Chandalar exploration program.

We believe we have sufficient funds to continue our planned methodical exploration of the Chandalar gold mining district during 2006 by using geochemical and geophysical surveys over the extensively soil covered terrain, to continue building a suite of exploration drill targets and to conduct an initial drill test of at least ten targets identified as part of our 2006 exploration program.

History of Property

Gold was discovered in the Chandalar district in 1904, and over the years various operators have produced about 85,000 ounces of gold mainly from placer deposits, but also from high-grade gold-quartz veins. We were incorporated in 1959 for the purpose of acquiring the gold mining properties of the Chandalar mining district. Our operations during the 1960's resulted in the establishment of a mining camp, a mill, several airstrips, and exploitation

of a small amount of ore reserves in underground workings.

In 1972 and 1976, all of the lode mining claims in the Chandalar district were acquired by us except for seven 40-acre unpatented state claims. In 1978, we acquired all of the placer mining claims in the Chandalar district. During 2003, we purchased the seven 40-acre unpatented state mining claims in exchange for 350,000 shares of our common stock. In September of 2003 we staked 55 state unpatented mining claims, in 2004 we staked another eight unpatented state mining claims, and in 2005 we staked one more unpatented state mining claim, thereby increasing the total size of our Chandalar property to 9,993 acres (15.6 square miles).

During the 1970's and early 1980 s the lode and placer properties were leased to various parties for exploration and gold production. The quartz lodes were last worked from 1970 to 1983, when 9,039 ounces of gold were recovered from the milling of 11,819 tons averaging 1.02 ounces of gold per ton (oz/t Au). The material was extracted from surface and underground workings on three of four mineralized quartz structures lying mostly on the patented federal mining claims owned by us. Recorded placer gold production of the Chandalar district is 76,270 ounces of 845 fine gold. Our lessees produced 15,735.5 ounces of that total amount of placer gold between 1979 and 1999. All production of native (or raw) gold on the property has been 845 fineness (1,000 fine is pure gold). The raw gold is a natural alloy containing about 85% gold, 14% silver and 1% copper. The unpatented claims are located on property that was formerly all owned by the federal government; however, as of 1991, title to all of the properties had been transferred to the State of Alaska. By that date we had converted all previously held unpatented federal mining claims into unpatented state mining claims.

In November of 1989 and May of 1990 we entered into a ten year mining lease with Gold Dust Mines, Inc. for all our placer mining interests located on the Big Creek, St. Mary's Creek, Little Squaw Creek, Big Squaw Creek, and Tobin Creek. The lease provided for annual advance rentals of \$7,500 per creek drainage mined plus a ten percent (10%) royalty of all raw placer gold production to be paid in kind. Two percent (2%) of the 10% royalty were to be paid directly to the underlying royalty interest holders (i.e. our former management), and was to consist of the coarsest and largest particles of all gold produced. The Company received the remaining 8% of the gold royalty. During 1998 and 1999, Gold Dust s placer mining lease was limited to Big Creek. There was no mining conducted in 2000, 2001, 2002 or 2003. Since 1999, however, Gold Dust failed to pay the \$7,500 annual lease fee on the creek drainage it mined and failed to make the annual rental payments on the state mining claims it was mining on, as required by the mining lease, in all a sum of \$32,380. A portion of the 1999 production royalties owed to us in the amount of eleven ounces of gold nuggets was also not paid. In February 2000, the owners of Gold Dust, Mr. and Mrs. Delbert Ackels

(guarantors of Gold Dust's obligations to us) declared a Chapter 7 bankruptcy, which the court discharged in May of 2000. Our mining lease with Gold Dust was the sole asset of Gold Dust.

During the spring of 1990, Gold Dust Mines, Inc. (the lessee) transported about \$2.6 million in capital equipment to our Chandalar mining claims over the winter haul road from Coldfoot, located on the Alaska pipeline highway. This machinery included a large gravity-type alluvial mineral treatment plant (an IHC-Holland wash plant) together with a Bucyrus-Erie dragline, two big Caterpillar tractors, front end loaders, a churn drill and other large pieces of placer gold mining equipment. During the last part of the 1993 season, Gold Dust Mines moved its placer operations to the Big Creek and St. Mary's Creek drainages. In 1994, placer mining operations were concentrated on the St. Mary's Creek drainage. During 1995, placer mining operations were conducted on the St. Mary's Creek and Big Creek Drainages. During 1996, a lease amendment was entered into between us, as lessor, and Gold Dust Mines, as lessee, wherein Little Squaw Creek, Big Squaw Creek and Tobin Creek drainages were excluded from the lease. During 1996 to 1999, these placer mining operations were conducted only on the St. Mary's Creek and Big Creek drainages.

During 1988, a consulting mining engineer was hired to compile historical information on the entire placer and lode gold district. His comprehensive report was completed in January 1990, and is available for review by interested persons. A few conclusions from his report are incorporated in this section.

In the late summer of 1997, a placer mining lease was executed by us with Day Creek Mining Company, Inc., an Alaskan corporation. The lease included the placer mining claims only for the Tobin Creek, Big Squaw Creek and Little Squaw Creek drainages. It did not include the Big Creek and St. Mary's Creek drainages. The lessee was to have performed minimum exploratory drilling during each year of the lease. Only a minimum amount of drilling was performed the first year, with some good results down stream from the Mello Bench on Little Squaw Creek. Due to lack of financing, the lessee could not comply with the drilling requirements in 1998, and the lease was terminated by us giving a declaration of forfeiture to the lessees in February of 1999. Lessee has not contested the declaration of forfeiture.

We allowed some of our state mining claims on Big Creek and Little Squaw Creek to lapse in 2000 for lack of funds to pay the State of Alaska annual rental fees required to maintain them. The individual who had owned Gold Dust Mines, Inc. (Mr. Ackels) continued to do the annual assessment work on the remaining claims on behalf of us through the year 2002. In July of 2003, Mr. Ackels located state mining claims on his own behalf in the areas previously vacated by us. Mr. Ackels' claims are now inliers to our mining claim block, and he conducts seasonal placer mining operations on those claims, including a significant operation on Big Creek during 2005 which, pending a survey of claim corners, may have encroach on one of our claims. As a matter of principle, we intend to maintain and, and if needed, defend our claimholder rights. Any potential encroachment of Mr. Ackels' claims is not material to the assets or operations of the Company, and a determination of claim corners in Mr. Ackels' benefit would not materially affect the Company's current exploration plan or exploration plans in the future.

We did not accomplish any physical work on our Chandalar property during 2003 other than the location of additional state mining claims. All of our state mining claims were maintained in good standing by carrying forward and applying to the 2003/2004 annual state mandated assessment work requirements the value in excess of the minimum annual labor requirements built up from previous years. Dollar value in excess of the required annual amount can be carried forward as a credit for up to four years.

During 2004 we staked additional claims at Chandalar and completed a two phase summer field program, which was conducted by a certified professional geologist who is an independent consultant and licensed to practice in the State of Alaska. The objective of the field program was to assess the validity of historic records, refine known drilling targets and identify new drilling targets. Several prospects of previously unevaluated or unknown gold mineralization were found as described below in this document.

During 2005 we staked another claim, and completed a modest prospecting and geologic mapping program, which was limited by our lack of funds.

Total recorded production from the Chandalar mining district is about 85,000 ounces of gold (845 fine), although actual historic production was probably much greater than the recorded production. Recorded lode gold production from high-grade gold-quartz vein-shear zone deposits is 7,692 ounces from the Mikado and Little Squaw Mines combined, and 1,347 ounces from the Summit Mine. A total of 75,636 ounces of gold came from placer deposits. Most of the placer production was derived from the Big Creek and Little Squaw Creek drainages, with some additional production from the Tobin Creek drainage.

We believe that the long term potential for the Chandalar mining district lies in the possibility of finding economically exploitable gold quartz lodes, which will initially require a substantial drilling exploration commitment.

Location and Access

The Chandalar mining district lies north of the Arctic Circle at a latitude of about 67°30'. The district is about 190 air miles north of Fairbanks and 48 air miles east-northeast of Coldfoot, an important road traffic service center on the Dalton Highway. The Dalton Highway, which parallels the Trans Alaska Pipeline, is a major highway link to the Prudhoe Bay oil fields on Alaska's North Slope.

Access to Chandalar is either by aircraft from Fairbanks, or overland during the winter season via a 55-mile-long trail from Coldfoot to Chandalar Lake and then by unimproved road to Tobin Creek on our property. Multi-engine cargo aircraft can land at the state maintained 4,700 foot airfield at Chandalar Lake or at our 3,700 foot Squaw Lake airstrip.

All-weather road access to our property would have dramatic positive economic impacts on the exploration for and proving-up of any gold deposits we may find of our claims. On April 11, 2005 the State of Alaska (the plaintiff), after due notice, filed a lawsuit against the United States and sixteen companies and individuals (the defendants) to gain quiet title to the state's right-of-way for the historic Coldfoot to Chandalar Lake Trail. We consider this action by the State of Alaska to resolve title and right-of-way issues for road access into Chandalar to be a material event favorable to us should the state succeed in its lawsuit. Current access to our Chandalar property is only either by winter ice trail over this route, or by aircraft to airstrips located on the property. To date, the State of Alaska has settled with fourteen of the seventeen defendants either by default or agreement. The principal defendant, the U.S. Secretary of the Interior, has not settled. Negotiations are proceeding. On December 8, 2005 a U.S. District Court judge for the District of Alaska issued a Schedule and Planning Order for the pre-trial actions of the case. It specifies a time table during 2006 for the disclosure of all documents and witnesses, and motions to add other parties. It further states that all discovery must be completed by February 1, 2007, and any dispositive motions must be filed by March 2, 2007. When the time allowed for discovery and motion has passed, and all dispositive motions have been ruled upon, the Court will call upon the parties to certify that the case is ready for trial. We believe this will happen in the late Spring of 2007, pending lack of a pre-trial settlement. The Order contains an estimate that this case will require ten days for trial by jury.

The Chandalar district is situated in rugged terrain just within the south flank of the Brooks Range where elevations range from 1,900 feet in the lower valleys to just over 5,000 feet on the surrounding mountain peaks. The region has undergone glaciation due to multiple ice advances originating from the north and while no glacial ice remains, the surficial land features of the area reflect abundant evidence of past glaciation. The district is characterized by deeply incised creek valleys that are actively down-cutting the terrain. The steep hill slopes are shingled with frost-fractured slabby slide rock, which is the product of arctic climate mass wasting and erosion. Consequently, bedrock exposure is mostly limited to ridge crests and a few locations in creek bottoms. Vegetation is limited to the peripheral areas at lower elevations where there are relatively continuous spruce forests in the larger river valleys. The higher elevations are characterized by arctic tundra.

Snow melt generally occurs toward the end of May followed by an intensive, though short, 90-day growing season with 24 hours of daylight and daytime temperatures that range from 60-80° Fahrenheit. Freezing temperatures return in late August and freeze-up typically occurs by early October. Winter temperatures, particularly in the lower elevations, can drop to -50° F or colder for extended periods. Annual precipitation is 15-20 inches, coming mostly in late summer as rain and as snow during the first half of the winter. Winter snow accumulations are modest. The area is essentially an arctic desert.

Mining Claims

At Chandalar, we currently own in fee twenty-one 20-acre patented federal lode claims, one 15-acre patented federal placer claim, and one 5-acre patented federal mill site. In addition, we hold twenty-six 40-acre unpatented State of Alaska claims lying largely within one hundred fifteen 160 acre unpatented state claims. The mining claims were located to cover most known gold bearing zones within an area approximately five miles by five miles. The total land position amounts to 13,833 acres (21.6 square miles) consisting of 426.5 acres of patented claims and 13,406.5 acres of unpatented claims. The claims are contiguous and form a single block that comprises our only mining property at this time.

Map 3 Mines, prospects and our drill targets in the Chandalar mining district.

35

Holders of State of Alaska unpatented mining claims are required to complete a minimum amount of annual labor on each claim and to additionally pay an annual rental on them. In the case of a claim block or group where the claims are adjacent, the total amount of required annual labor is determined by multiplying the number of claims by the amount required for an individual claim, and the excess value of labor expended on any one or more of the claims can be applied to the labor requirements on the other claims within the block or grouping. The amount of required annual labor work varies with the size and type of mining claim and the amount of annual rental payable varies with the size, type and age of the claim. Labor expenses in excess of the annual requirement can be carried forward as a credit for up to four years. However in the case of our Chandalar property, we have chosen to carry forward any excess value credit separately for each of our two types of state claims. Also, the holder of a state mining claim may make a cash payment to the state equal to the value of labor required in lieu of doing the assessment work.

The annual labor requirement for our Chandalar holdings is \$100 per 40-acre claim and \$400 per 160-acre claim. Currently, the combined annual labor requirement for our claims is \$28,200.

In the 2003/2004 assessment year, which ended on August 31, 2004, we spent \$46,970 on work that qualified for annual labor requirements. Our combined excess value credit for the two types of claims was \$54,595, with \$14,400 expiring on September 1, 2005, \$18,425 expiring on September 1, 2006, and \$5,073 expiring on September 1, 2008.

In the 2004/2005 assessment year, which ended on August 31, 2005, we spent \$73,072 on work that qualified for annual labor requirements. Our combined excess value credit for the two types of claims was \$88,067, with \$18,425 expiring on September 1, 2006, \$5,073 expiring on September 1, 2008, and \$64,569 expiring on September 1, 2009.

The annual rental fee for our unpatented state mining claims is \$130 for the 40-acre claims and \$100 for the 160-acre claims. The total annual rental obligation for the Chandalar property is currently \$12,205, and the rental fees are fully paid through November 30, 2006.

The total current annual combined mining claims assessment work and rental holding costs for our Chandalar property is \$50,105, which are included in mineral property maintenance expense and professional services expenses on our statement of operation. Our private property (patented mining claims) does not lie within any borough and is not subject to any property tax levies.

Our former management holds a mineral production royalty reservation on portions of the Chandalar property. It is a 2% royalty defined as a gross product royalty on placer gold mining and as a net smelter return on lode mining

production. The royalty on placer gold production is an in kind royalty to consist of the coarsest and largest particles of all gold produced. All of the patented federal mining claims are subject to this royalty as are 19 of the 90 unpatented state mining claims. The royalty is applicable to about 1,185 acres of the 9,993 acre property. We have an option agreement to purchase the royalty for a one time cash payment of \$250,000. The option terminates on June 23, 2013, if not exercised on or before that date.

Geology and Previous Exploration and Site Work

Lode gold occurs at Chandalar as high-grade quartz veins within large northwest trending shear zones in Paleozoic schists. To date more than 30 gold-bearing quartz veins or swarms of gold-bearing quartz veins have been identified on the property. The quartz veins are classified as being mesothermal of metamorphic orogenic origin. Mesothermal vein systems commonly have great vertical range, and at Chandalar the vertical extent of the gold mineralization is known to be in excess of 1,500 feet. The gold-bearing quartz veins are typically one to six feet thick, with exceptional thicknesses of up to twelve feet in parts of the Mikado mine. Portions of some of the veins where they display a ribbon appearance are of particularly good gold grade, often in the multi-ounce per ton range. Some of the veins are known to be more than a thousand feet long, and occur intermittently along laterally extensive shear zones; the Mikado shear for example, has been identified over a strike length of six miles. A thick blanket of frozen soil, rock scree and talus and landslides covers an estimated 80% to 90% of the property, largely concealing the gold-quartz veins making their exploration and discovery challenging.

Our patented lode mining claims contain the most important gold-bearing structures in the district, as far as is now known. Although high-grade gold showings in the Chandalar district have long been recognized in published literature, exploration necessary to establish the extent of mineralization has never been accomplished. The principal evaluation work done in the past on the lode deposits was done on the Mikado, Summit, Little Squaw, and Eneveloe-Bonanza Mines by lessees in the late 1970 s early 1980 s. Each of these mines has been minimally worked by means of several hundred feet of underground workings aggregating almost 2,000 feet in all. Limited surface work in the past within the district established the existence of gold-bearing zones on other prospects similar to the veins found at these mines. Sufficient work has never been accomplished on any of the veins and gold-bearing zones to define the presence of ore reserves that meet the criteria of SEC Industry Guide 7.

Drilling of the veins by previous operators is either extremely limited or, in most cases, non-existent. A low-grade gold aureole commonly occurs around the high-grade gold-quartz veins where chloritically and sericitically altered rocks contain stockworks of quartz veinlets. These aureoles, which extend outwards as much as 100 feet, have never been tested for low-grade bulk tonnage mining potential. We have identified several targets that may host high-grade gold-quartz vein deposits within low-grade bulk tonnage deposits, and substantial drilling and engineering work will be required to determine if such potential deposits exist in commercially viable quantities.

2004 and 2005 Field Programs

During the 2004 summer field season we conducted a two phase reconnaissance surface and underground sampling program on the Chandalar property. A deep soil sampling technique developed by us was employed to identify gold anomalies that may reflect hidden gold-quartz veins. The highlight of the first phase was the re-discovery of the historic Pioneer prospect. The Pioneer quartz vein is partially exposed in some old trenches and prospect pits. The Pioneer prospect, which is associated with a major shear zone at least three miles long, contains very high-grade gold values of unknown extent. A channel sample across the vein assayed 2.30 ounces of gold per ton over a width of 2.5 feet.

The 2004 summer field program was augmented by a structural geology study of the Chandalar district using existing high altitude aerial photography. The study was done by BlueMap Geomatics Ltd. located in Vancouver, British Columbia. The gold bearing quartz veins on the property occur within large shear zones or faults that form lineaments, and major structural intersections may be a controlling factor in the emplacement of the gold mineralization. BlueMap Geomatics identified numerous pronounced linears that they interpreted to represent deep-seated faults. This work was useful in defining sites for follow up exploration in 2005 that resulted in new prospects (Rock Glacier and Prospector East.)

Similar surface prospecting work and mineralization site appraisals continued during the summer of 2005, although at a lower level of activity for lack of sufficient funding. A summary description of the principal mines and prospects examined during the 2004 and 2005 summer field seasons is shown on Map 3 and is represented in the Table below. The samples described in the paragraphs below and in the prospect descriptions and in the Table were collected by us unless otherwise indicated. The samples typically consist of five to seven pounds of rock fragments collected on the surface or on the dumps of old workings or from within old prospect pits. Each sample consists of between twelve and twenty dollar size rock chips or fragments. The sampled material is primarily of vein quartz or rocks containing quartz veinlets. The samples were assayed by ALS Chemex USA Inc. in Sparks, Nevada using fire assays with a gravimetric finish for gold. (ALS Chemex operates under ISO certification and is a global provider of assays to mineral exploration and mining companies.) The samples are preliminary and strictly of a reconnaissance nature. In many cases the samples were not taken across the full width of the quartz veins, and therefore the samples do not represent a quantitative measurement of the gold content of the veins, nor should they be interpreted to indicate that mineralization is present in a quantity and grade that would represent an economically viable ore deposit. Substantial additional sampling and geological and engineering work would have to be completed to confirm the presence of

proven and probable reserves that meet SEC standards, and no assurance can be given that any such reserves will eventually be defined. Soil samples taken by us and reported below are strictly of a reconnaissance nature. The soil samples were taken by hammering a hollow steel pipe (split set rock bolt) about five feet into the ground. Then material from the last one to two feet inside the pipe was collected and submitted to ALS Chemex for geochemical analysis using atomic adsorption methods.

**TABLE OF THE MINES AND PROSPECTS OF OUR HOLDINGS
IN THE CHANDALAR MINING DISTRICT**

Map No.	Prospect	<u>Comments (1)</u>
		Au = Gold; Ag = Silver; ounces of gold per ton = oz Au/t
		(Detailed prospect descriptions can be found in the Chandalar Mining District Summary of Field Investigations 2004 Phase I & II and the Chandalar Mining District, A Report of Findings and Recommendations, 2005 reports.
1	Crystal	4 to 6 veins 6 to 9 feet wide are present with gold-bearing ribbon zones; 4.5 tons @ 45 oz Au/t produced in 1908 according to historic reports in our possession; high grade gold values are confirmed by our sampling
2	Big Squaw	channel sample across 12-ft. quartz vein with trace gold
3	Pioneer	mineralization hosted in shear zone; two channel samples across different portions of the vein collected by us assayed 2.30 oz Au/ton across 2.5 ft. and 0.82 oz Au/ton across 3.0 ft.; vein traced 2,000 ft. by soil samples and quartz float train; a sample of quartz float assayed 1.37 oz Au/t
4	Pallasgren	continuous chip samples by us across a 30-ft. wide quartz outcrop show strongly geochemically anomalous gold; random samples of a quartz vein exposed in a nearby prospect pit assayed 0.39 oz Au/t; associated soil sample assayed 1.91 ppm Au; massive iron bleed below quartz zone into creek
5	Grubstake	a 1981 sample from 1.6 ft. quartz vein assayed 0.32 oz Au/ton according to records in our possession
6	Grubstake East	caved adit explored quartz vein with mineralized vein material found in the mine dump; sampling by us verified the presence of anomalous gold in quartz; one sample from dump assayed 0.17 oz Au/t
7	Prospector East	3-ft. quartz vein exposed intermittently by pits for about 400 ft.; samples taken by us show highly anomalous silver associated with galena
8	Indicate-Tonapah	several large quartz veins and numerous old small mine workings and stamp mill sites; old unverified assays show strongly anomalous gold values; our chip sample across one 10 foot vein assayed .02 ppm Au; our random sample of nearby old stamp mill feed assayed 0.74 oz Au/t
9	Chandalar	vein parallel to Eneveloe vein; reports in our possession include a 2-ft. channel sample from a 6-ft. vein that assayed 2.26 oz Au/ton; a 1.5-ft. channel sample collected by us across a 5-ft. vein assayed 1.1 oz Au/ton
10	Jupiter	a 10-ft. quartz vein is exposed in road cut with disseminated sulfide minerals, and a second vein discovery was reported in 1981; we took a sample across the 10-ft. that assayed 0.11 oz Au/ton
11	Bonanza	three continuous channel samples collected by us of a 9-ft. zone of quartz, schist and clay assayed 0.5-ft. at 0.06 oz Au/ton, 3.0-ft. at 0.06 oz Au/ton and 6.0-ft. at 0.10 oz Au/ton

12	Drumlummon	reports in our files refer to several veins and gold-bearing quartz; apparently no further work has been done since early 20 th century; we found limonitic quartz breccia float associated with hydrothermally altered rocks; four samples of quartz float all anomalous in gold
13	St. Mary's	reports in our possession indicate 0.24 oz Au/ton from an 11-ft. thick vein and fault; three of our samples show traces of gold; placer gold deposit mined out below vein
14	Star Group	several veins; old unverified assays with one of 1.34 oz Au/ton, and 1981 trenching program reported trace to 0.74 oz Au/ton; vein can be traced for 4,000 ft.
15	Star No. 3	reports in our possession include a trench sample of 0.24 oz Au/ton across a 3.5-ft. vein; we have not yet verified
16	Shamrock	Samples collected by us indicate anomalous values of gold
17	Wildcat	Poorly exposed quartz vein at least 6-ft. thick with no visible mineralization
18	Jackpot	a tunnel exposes a 1.5-ft. vein of ribbon quartz; a reconnaissance of vein material collected by us on the dump assays 1.97 oz Au/ton
19	Woodchuck	a 3- to 6-ft. vein exposed in shaft; records in our possession indicate highly anomalous gold values
20	Little Kiska	records in our possession indicate presence of gold and antimony; pending our verification
21	Pedro	records in our possession indicate presence of gold; a quartz vein can be seen on high slope, but has not yet been investigated
22	Grubstake West	reports in our possession of old prospect pit with gold mineralization in quartz; Company remain to verify
23	Big Creek Bowl	numerous boulders of sulfide-quartz vein traced for 800 ft. indicate several mineralized quartz veins
24	Mercury	a 2-ft. quartz vein we found on the high ridge west of Big Squaw Creek; possible west extension of the Eneveloe veins that assayed 0.01 oz Au/t

25	Rock Glacier	large area of vein and associated rock occurs on a rock glacier that gouges the valley bottom of Little Squaw Creek where a number of quartz veins and shear zones intersect valley bedrock; ten random samples taken by us of the glacial quartz debris assayed an average of 2.38 ppm Au; 27 of 31 soil samples taken from glacial debris source area highly assayed anomalous in gold; four gold-bearing veins indicated under soil cover
26	Big Tobin	soil sampling by us defines a gold-arsenic anomaly & possible presence of a concealed quartz vein
27	Uranus	historic reports in our possession indicate presence of two quartz veins exposed in two prospect pits; the site was relocated by us and a reconnaissance sample collected by us of loose quartz vein material in one caved-in prospect pit assayed 1.47 oz Au/t; a 6-foot continuous chip sample across a quartz vein exposed in the second prospect pit assayed 0.40 oz Au/t; we have taken four soil samples along a 500-foot quartz float train that are anomalous in gold
28	McLellan	old unreported prospect pits discovered by us ; 4 to 6 veins present; reconnaissance sampling by us of one of the veins in an old trench assays 1.10 oz Au/t; several gold anomalous soil samples taken in the vicinity
	Little Squaw Mine	according to records in our possession about 380 tons of material were processed at a grade of 1.65 oz Au/ton; drill intercepts, including one of 10 ft. at 0.66 oz Au/ton, show deeper underlying untested mineralization
	Mikado Mine	gold occurs within fractured rock and quartz lenses of a shear zone; according to records in the our possession past production totaled 10,418 tons at a grade of 0.99 oz Au/ton
	Summit Mine	at least two gold-quartz veins are present; according to records in our possession, 142 tons of material were processed at a grade of 4.82 oz Au/ton; overall, a total of 1,401 tons at 1.29 oz Au/ton were produced; drill hole records show more veins were cut beneath the mine workings DDH 82-7 intercepted 5 feet @ 1.0 oz Au/t
	Eneveloe Mine	at least two gold-quartz veins are present; according to records in our possession, a zone of 1.0 oz Au/ton or greater was encountered on both levels of 1982 vintage tunnels, but there is no record of production; three 1982 drill hole intercepts contain significant gold values and indicate extensions of the veins
	Little Squaw Placer Mine	according to information in our possession reported production from drift mining on Mello Bench is 29,237 oz gold at a grade of 0.96 oz Au/cubic yard; 10.6 oz gold nugget recovered; significant volumes of unmined gold-bearing gravel remain

(1) Values shown in this column include only samples collected by the Company in 2004 and 2005 as channel samples or representative chip samples. Assays were performed by ALS Chemex.

Summary of Prospects

A summary of our material gold prospects is set forth in the following:

Little Squaw Vein: This gold-quartz vein is partially explored by trenches and two short tunnels decades old. According to records in our possession, previous operators defined an existing shoot of mineralized material containing approximately 2,000 tons at a grade of 1.55 oz Au/t. A reconnaissance sample taken by us from a quartz vein exposed in one of the trenches assayed 5.24 oz Au/t. Channel sampling by us in a tunnel below that trench yielded 19.98 oz Au/t over 3.54 feet of true width. This sample run includes a 0.84 foot interval of ribbon quartz that assays 89.12 oz Au/t with 15.85 oz Au/t. Another channel sample of this ribbon quartz taken ten feet farther along in the tunnel assayed 5.16 oz Au/t over 0.85 feet. The ribbon quartz derives its appearance from lenticular seams of dark colored iron sulfides and mica minerals within white quartz. We have concluded that the previously defined shoot of mineralized material is open to expansion by drilling, and we believe that previous operators may have underestimated the gold grade of the shoot because of technical difficulties in properly sampling zones within the quartz vein that contain wires and nuggets of native gold.

Crystal Prospect: In 1909 four tons of ore were extracted from an 8-foot-deep shaft driven into an 8-foot-wide quartz vein that was processed in a crude (three-stamp) mill. Historic records in our possession show that the four tons assayed 47.08 oz Au/t. The location of the Crystal Prospect was uncertain until we re-discovered it this year. The old shaft and associated trenches are completely sloughed in, but a set of veins can be traced over a strike length of at least 400 feet. Thick soil cover hampered efforts to find the limits of the veins. The main quartz vein is at least 5-to-6 feet thick, and a channel sample taken by us of a 0.67-foot-thick footwall portion of ribbon quartz assayed 3.64 oz Au/t. The Crystal vein appears to be very similar to the Little Squaw vein located along strike projection 1.5 miles away, but a correlation cannot be established because the intervening area is entirely covered. Extensive dozer trenching and soil sampling is planned to define the lateral extensions and possible linkage of these veins.

McLellan Prospect: This area contains a swarm of 5 previously unreported quartz veins that are poorly exposed, that we have traced for a distance of at least 1,000 feet along strike. Ribbon quartz has so far been found associated with two of the veins. The ribbon quartz characteristically weathers recessively because of the effect of decomposing sulfide minerals, and it is typically not exposed without trenching. A reconnaissance sample of this material gathered from the surface by us assayed 1.10 oz Au/t.

The McLellan Prospect is located about 1,500 feet from the Crystal Prospect, and we believe that it may be a faulted offset of the Crystal vein. Follow-up soil sampling and trenching is planned at the McLellan Prospect.

Pioneer Prospect: The Pioneer quartz vein, which saw limited exploration in the early 1900 s, is partially exposed in old trenches and prospect pits. The Pioneer prospect contains very high-grade gold values of undetermined extent, but it is associated with a major shear zone that is at least three miles long. A channel sample collected by us across the vein assayed 2.30 oz Au/t over a width of 2.5 feet, and another channel sample of a 3-foot-wide quartz vein taken 35 feet along strike from the first channel sample assayed 0.82 oz Au/t. Six anomalous soil samples taken by us from a depth of 4 to 5 feet along the soil covered projections of the vein average 0.260 parts per million (ppm) gold and are interpreted to indicate the possible presence of a buried vein extending outward from both ends of the trench, suggesting a possible vein strike length in excess of 1,500 feet with at least 150 feet of vertical relief exposed. Additional soil sampling and dozer trenching are planned to further define drilling targets at the Pioneer prospect.

Prospector East Prospect: Mineralization detected at this prospect is unusual for the Chandalar district because the prospect is characterized by high silver values relative to gold. It is located on north side of the property in low hills where few other veins have been found, probably because of thick soil cover. Two reconnaissance samples collected by us from the dump of an old caved tunnel assayed 23.8 oz Ag/t, 0.08 oz Au/t and 11.7 % Pb, and the other sample assayed 5.5 oz Ag/t, 0.09 oz Au/t and 2.2% Pb. The vein appears to be about 3 feet thick and is exposed in some old prospect pits over a strike length of 400 feet. So far, we have not been able to collect channel samples directly from the vein. The results of the dump samples can only be interpreted as an indication that important mineralization is present. Highly anomalous values in bismuth, silver and lead, along with the absence of zinc give this prospect a very distinct geochemical signature, which may be indicative of district scale metal zoning. Follow up trenching and soil sampling are planned.

Rock Glacier Prospect: A jumbled mass of ice bound soil, cobbles and boulders exceeding a million tons contains abundant rubble of vein quartz fragments that are highly anomalous in gold. Assays of twelve rock chip reconnaissance samples taken by us that were collected randomly of numerous quartz cobbles and boulders average 2.38 ppm gold, and the average geochemical assay of three the soil samples taken by us of material binding the slide material is 0.48 ppm gold. The rock glacier originates in a large meadow about a thousand feet up a mountainside. Soil samples taken in this source area show strong gold anomalies indicating buried mineralized quartz veins. An extensive soil sampling program is planned in this area, and geophysical techniques, such as ground magnetics and induced potential, may be useful to trace the veins below the thick cover. Map 4 and its accompanying table include details of locations and the assay of samples taken on this prospect.

Uranus Prospect: A series of previously unreported and closely spaced gold-quartz veins was found in a saddle high on a ridge opposite the Rock Glacier Prospect. Random chips of decomposed mineralized quartz are strewn in discrete linear streaks over the ground, forming a down hill quartz train more than 500 feet long. A randomly collected reconnaissance sample of this material taken by the Company shows it to be anomalous in gold content. Additionally, four soil samples taken by the Company along the quartz float train average 0.21 ppm Au. Two old prospect pits expose iron stained quartz. A reconnaissance sample of loose quartz vein material in one pit located within the quartz float train assayed 1.47 oz Au/t. A second old prospect pit some distance away partially exposes a large quartz vein, shown to be at least six feet thick. A six-foot continuous chip sample across the vein assayed 0.40 oz Au/t. The mineralized zone is of unknown width and length as there is no exposed bedrock except for in the two old pits, making this prospect especially intriguing for drilling exploration.

Big Tobin Prospect: Soil sampling has revealed an important set of mineralized shears in the Big Tobin area. They are important because they strike northeast in contrast to all other known mineralized structures, and they trend

directly toward the Mikado gold deposit about 1,000 feet away. The projected structural intersection is a target that merits additional follow-up work.

Mikado Mine: Records in our possession indicate that this mine has produced about 10,000 tons at an average grade of one ounce of gold per ton. Twenty-five-year-old mining engineering records show that significant un-mined mineralized material remains in the portion of the mine that was previously worked but that is now caved in. The previously mined vein carried multi-ounce gold grades in some places. Three reconnaissance rock samples collected by us that were gathered from the mine dumps in 2004 and 2005 assayed 23.28 oz Au/t with 5.24 oz Ag/t, 1.57 oz Au/t with 0.83 oz Ag/t and 0.95 oz Au/t with 0.19 oz Ag/t. Our consulting geologists have concluded that there are at least two shoots of strongly mineralized material which are open to extension at depth, and we intend to test these possible extensions by drilling during the 2006 field program.

Map 4 and Table. Sample map with assays of the Rock Glacier prospect on the Chandalar property

Our Chandalar mining claims cover all or major portions of three main drainages and lesser parts of a fourth drainage that radiate from the areas in which the gold-bearing quartz veins and associated shear zones are located. They include most of the areas where placer mining operations occurred in the past, as well as substantial portions of these drainages that have never been mined. The placer gold deposits in the Chandalar district are characterized by high-grade concentrations of native gold that occur in multiple horizons in second and third order streams in the

vicinity of auriferous quartz lodes. At least 76,000 ounces of gold are known to have been produced from four placer deposits at Chandalar, with recovery of some nuggets, the largest of which was 10.6 ounces according to records in our possession. The placer gold deposits were exploited by both open-cut and underground drift mining methods limited to unconsolidated but frozen gravels. Limited drilling by previous operators indicates that certain areas on the property, especially along Little Squaw and Big Squaw Creeks have potential for the discovery of significant quantities of placer gold. Substantial drilling and engineering work will be required to determine if such potential deposits exist in commercially viable quantities.

Progress was made during the 2004 and 2005 summer field seasons in defining geological features helpful in planning future drilling campaigns. The discovery of hydrothermal alteration haloes that envelop locations of strong gold mineralization within the major shear zones may be significant. We are methodically building a considerable suite of substantive drilling targets on the Chandalar property. The primary focus of the 2005 geological field program was to technically assess a suite of the prospects defined by the 2004 program for initial drilling in 2006. We believe that this work was successful in effectively advancing ten quartz lode gold prospects to the drilling stage (Map 3). Drill targets include both high-grade quartz vein underground deposits and targets for lower-grade deposits of disseminated gold within hydrothermally altered wall rocks of quartz

veins, which may be amenable to surface bulk mining methods. This drilling is intended to provide an initial test of the ten targets, and, following appraisal of the results, is expected to lead to intensified drilling on a few selected sites in 2007. The aim of the 2007 drilling would be to establish a mineral resource on the selected sites. We believe we have sufficient funds to undertake the proposed drilling program in 2006. We may not have sufficient funds to accomplish the 2007 follow up drilling, and may have to rely on further sales of our securities to pay for it. There can be no assurance that we would be successful in completing such a securities offering on terms acceptable to us.

Risks Related to the Chandalar Project

Competition

There is aggressive competition within the minerals industry to discover and acquire properties considered to have commercial potential. We compete for the opportunity to participate in promising exploration projects with other entities, many of which have greater resources than us. In addition, we compete with others in efforts to obtain financing to acquire and explore mineral properties.

Employees

We have no employees at this time. We rely on consulting contracts for our management and administrative personnel needs, including the persons who act as our President/Chief Executive Officer and Vice President. These contracts will expire on December 31, 2006 and January 31, 2007, respectively, unless renewed by the compensation committee of our board of directors. The contract with our former Chief Financial Officer/Secretary/Treasurer expired on February 17, 2006 with that individual's resignation. We have three additional management consulting contracts that became effective in the first quarter of 2006 and terminate on December 31, 2006.

We have established accounts with the State of Alaska to enable it to process payrolls to meet our 2006 Chandalar project field labor needs. The first of approximately ten hourly paid employees is scheduled to begin work in the first week of May 2006. These are seasonal jobs that are all expected to be terminated by October 2006.

Regulation

Our activities in the United States are subject to various federal, state, and local laws and regulations governing prospecting, exploration, production, labor standards, occupational health and mine safety, control of toxic substances, and other matters involving environmental protection and taxation. It is possible that future changes in these laws or regulations could have a significant impact on our business, causing those activities to be economically reevaluated at that time.

Environmental Risks

Minerals exploration and mining are subject to potential risks and liabilities associated with pollution of the environment and the disposal of waste products occurring as a result of mineral exploration and production. Insurance against environmental risk (including potential liability for pollution or other hazards as a result of the disposal of waste products occurring from exploration and production) is not generally available to us (or to other companies in the minerals industry) at a reasonable price. To the extent that we become subject to environmental liabilities, the remediation of any such liabilities would reduce funds otherwise available to us and could have a material adverse effect on our financial condition. Laws and regulations intended to ensure the protection of the environment are constantly changing, and are generally becoming more restrictive.

Our Chandalar property contains an inactive small mining mill site with tailings impoundments, last used in 1983. The mill was capable of processing 100 tons of ore feed per day. A grand total of 11,918 tons were put through the mill, and into two small adjacent tailings impoundments. A December 19, 1990 letter from the Alaska Department of Environmental Conservation to the Division of Mining of the Department of Natural Resources states: Our samples indicate the tailings impoundments meet Alaska D.E.C. standards requirements and are acceptable for abandonment and reclamation. The Alaska DNR conveyed acknowledgement of receipt of this report to us in a letter dated December 24, 1990. We subsequently reclaimed the tailings impoundments, and expect that no further remedial action will be required. Vegetation has established itself on the tailings impoundments, thereby mitigating erosional forces. Concerning a related matter, the Alaska D.E.C. has identified a small area of low-level mercury contamination in a graveled staging area next to the mill and has designated it to be a medium priority assessment site in its state contaminated sites database. We have accrued a \$50,000 liability to execute a remediation plan proposed by us and approved by the Alaska D.E.C. Other than this minor mercury contamination, we know of no matters of concern to the Alaska D.E.C. regarding our and our predecessors' exploration and production activities on the properties.

Title to Properties

Our only mining property (Chandalar) lies on Alaska state land, except for the patented mining claims owned by us. The major portion of our property consists of State of Alaska unpatented mining claims. The validity of unpatented state mining claims is often uncertain, and such validity is subject to contest. Unpatented mining claims are unique property interests and are generally considered subject to greater title risk than patented mining claims, which are real property interests that are owned in fee simple. An important part of our property is patented federal mining claims held in fee simple.

The State of Alaska requires locators and holders of unpatented state mining claims to complete annual assessment work and to pay an annual cash rental on the claims in order to keep the claimant's title to the mining rights in good standing. We are not in default of any annual assessment work filing or annual claim rental payment.

State of Alaska unpatented mining claims are subject to a title reservation of 3% net profits royalty for all mineral production on net mining income of \$100,000 or more.

Our management has done a title chain search of the Company's patented federal mining claims. They believe we are the owner of the private property, and that the property is free and clear of liens and other third party claims except for a 2% mineral production royalty held by former management.

We have attempted to acquire and maintain satisfactory title to our Chandalar mining property, but we do not normally obtain title opinions on our properties in the ordinary course of business, with the attendant risk that title to some or all segments our properties, particularly title to the State of Alaska unpatented mining claims, may be defective.

Alaska Taxes Pertaining to Mining

Alaska has tax and regulatory policies that are widely viewed by the mining industry as offering one of the most favorable environments for establishing new mines in the United States. The mining taxation regime in Alaska has been stable for many years. There is discussion of taxation issues in the legislature but no changes have been proposed that would significantly alter the current state mining taxation structure. Although management has no reason to believe that new mining taxation laws which could adversely impact our Chandalar property will materialize, such event could and may happen in the future.

MANAGEMENT'S DISCUSSION AND ANALYSIS

General

Exploration Activities in 2004 and 2005

During 2004 and 2005, we focused on advancing exploration of the Chandalar property through surface prospecting and geologic mapping and sampling methods. No drilling or underground exploration work was involved. In 2004, Pacific Rim Geological Consulting Inc. of Fairbanks, Alaska completed a comprehensive independent technical report on the Chandalar property. Pacific Rim reviewed all of Little Squaw's extensive data on the Chandalar property that the Company has built up over the years, which includes data from various operators dating back to the early 1900's. They concluded the gold mineralization is of the mesothermal type, and the property has multi-million ounce gold discovery potential. Pacific Rim recommended additional exploration, some of which was completed in two phases during the 2004 summer field season by an independent certified professional geologist, James C. Barker, under contract to the Company. Mr. Barker was one of the two co-authors of the Pacific Rim report. The summer field program was augmented by a structural geology study of the Chandalar district using existing high altitude aerial photography. BlueMap Geomatics identified numerous pronounced linears that it interpreted to represent deep-seated faults. Interested parties may obtain a copy of this report from the Company by written request. The 2004 field work and subsequent data analyses and reporting were completed at a cost of about \$77,000. A detailed technical description of the activity and results are contained in a December 20, 2004 report by Mr. Barker titled "Summary of Field Investigations 2004." This work has been useful in defining targets for future exploration.

The objective of the 2004 exploration field program was to assess the validity of historic records, refine known drilling targets and identify new drilling targets. Several prospects of previously unevaluated or unknown gold mineralization were found, including six previously unknown gold-bearing quartz veins. During the 2004 summer field program we conducted a reconnaissance surface and underground sampling program of numerous gold-bearing veins on the property. We also conducted a soil geochemical sampling program using a deep penetrating sampling technique we developed to identify gold anomalies that may reflect hidden gold-quartz veins. Two previously unknown prospects containing six gold-quartz veins were discovered as a result of the field work, bringing the total number of known gold-bearing quartz veins and vein swarms on the property to 32. We expect to find more mineralized structures as exploration progresses because more than 80% of the property is covered by soil and landslide debris.

During the first quarter of 2005, we had planned to conduct the seasonal exploration program on the Chandalar property that was recommended by our geologic consultant, James C. Barker. His proposed program was budgeted at \$1.4 million. We expected to raise sufficient capital to hire Mr. Barker and other qualified independent geologic consultants to complete a two phase program, which would have included infrastructure repairs, geological field work, taking 600 rock and 4,000 soil samples, and doing ground-based and aerial geophysics surveys, aerial topographic surveys, and 5,000 feet of reverse air circulation drilling.

The planned 2005 summer program was to have been conducted in two staged phases as follows:

-

PHASE I would be geological investigations primarily to pin-point proposed drill sites throughout the district. This work would consist of various exploration activities, including the use of targeted soil sampling grids and ground and aerial geophysics.

-

PHASE II would be a reverse circulation drill program of 5,000 feet or more.

Phase I geophysical and geochemical surveys were anticipated to better define the fault structures, initially defined by BlueMap Geomatics, that host mineralized quartz veins. A technical assessment was then expected to be made of locations where drilling was thought to be warranted during phase II. Several sites where old drill holes indicate the downward extensions of quartz vein gold mineralization were targeted for verification drilling. The wide-spread occurrences of gold mineralization in large, through-going structures, at least four of which have a mining history, was reasoned to justify the work proposed in Phases I and II.

We were unable to obtain the financing required to undertake this phased exploration program due to unfavorable stock market conditions for the mining sector in early 2005. Instead, we undertook a modest surface exploration of the Chandalar property during the month of July 2005. Mr. Barker was again retained to carry out a surface exploration program during the 2005 summer field season. A small field crew concentrated work on ten of the gold quartz vein prospects, where geologic maps were produced of each and 189 rock, soil and stream sediment samples were taken for analysis. Importantly, their geologic reconnaissance found a close special association between many of the gold bearing quartz veins and intrusive bodies of mafic igneous rock masses (greenstones). Our geologists believe there may be a genetic link between the greenstones and the gold mineralization that can be used as an exploration tool. This program was completed at a cost of approximately \$58,000. A detailed technical description of the activity and results are contained in a January 2, 2006 report by Mr. Barker titled Chandalar Mining District, A Report of Findings and Recommendations, 2005 .

Subsequently, on January 10, 2006, we entered into a management consulting contract with Mr. Barker designating him as the Project Manager for the 2006 Chandalar exploration program.

We also retained the services of a licensed consulting geologist, Melvin Klohn, during the 2005 field season to review its extensive Chandalar property data and make a comprehensive week-long visit to site. Mr. Klohn examined most of the significant gold prospects on the property and said that he found the gold bearing quartz veins to be very similar to the important category of gold deposits often called lode gold or greenstone gold, which are major contributors to world gold production. He noted the district's prospects are aligned along a series of sub-parallel structural belts in a structural pattern similar to that of the famous Red Lake district in Ontario, Canada. He concluded that the Chandalar property presents a unique and appealing gold exploration opportunity.

Our work during the 2005 summer field season investigated old reports of quartz vein showings at the Pallasgreen and Drumlummon prospects. These sites had not been evaluated since their discovery by prospectors early in the 1900s. At the Pallasgreen prospect, mineralization was found along a multiple quartz vein system for approximately 400 feet. Soil samples geochemically anomalous in gold and an extensive iron bleed zone are indicative of mineralization in this area. The iron bleed, or ferricrete, is considered to be caused by ground water dissolution of buried metallic sulfides and re-participation of the metal ions, particularly iron, in the surface hydrologic bleed zone. Additionally, gold in soil values were found about 4,000 feet westward along strike, which will be further evaluated in 2006 as a possible extension of the Pallasgreen veins. Anomalous soil and rock results were also found in the Drumlummon area and in an unnamed site of vein quartz north of the Pallasgreen prospect. An additional 160-acre state mining claim was located to include this area in our property holding.

In 2005, we also completed further prospect definition work at the Pioneer, Crystal and Uranus sites, which established proposed drill targets. The Uranus results are of particular interest. There, a surface train of quartz float has been mapped for 500 feet down a hillside. An old prospect pit several feet deep was sunk into the quartz train. It is caved-in, but contains many loose chunks of iron stained quartz vein material. A reconnaissance sample composed of many random pieces of these chunks of quartz assayed 1.47 oz Au/t. Four intermittent soil samples taken from beneath the quartz float train average 0.21 ppm Au. Nearby, but separate from the quartz float train, is a second old prospect pit that partially exposes a large, sulfide impregnated quartz vein. A six-foot continuous chip sample across this vein assayed 0.40 oz Au/t. We view this information as reflecting a gold bearing quartz vein system, containing a series of sub-parallel veins, concealed beneath soil and tundra. The 2006 exploration plan

includes cutting trenches across this soil-covered area using an excavator. Given further positive findings, an initial drill testing of the Uranus site would take place.

Pre-drilling prospect mapping was also initiated during the 2005 field season at the Little Squaw, Eneveloe, Grubstake West, Rock Glacier and Summit areas. Little Squaw quartz vein rubble was traced about 2,500 feet eastward from the known exposures, and geologic mapping indicates that at least two mineralized quartz veins continue in that direction. The two Summit quartz veins were projected about 2,000 feet westward where they are believed to be partially covered by active accumulations of slide rock. Nevertheless, stream sediment sampling together with deep penetration soil sampling results from sites along and below its projection were highly anomalous in gold.

Plans for 2006 Summer Exploration Season

The planned 2006 seasonal exploration program for our Chandalar property builds on the 2005 work, and is very similar to the combination of Phase I and Phase II recommended by our geologic consultant, James C. Barker. A detailed version of the program costs is presented on pages 81 to 85 of Mr. Barker's January 2, 2006 report titled Chandalar Mining District, A Report of Findings and Recommendations, 2005. The quantity of proposed drilling in Phase II has been increased from 5,000 feet or more to 10,000 feet or more, and the project's projected cost is now approximately \$1.7 million dollars, as shown in the table below.

Proposed 2006 Chandalar Exploration Program Budget

EXPENSE CATEGORY

Planning, Permitting, Hiring	\$ 43,000
Equipment and Major Supplies Purchases (ATVs, Tractors, Vehicles)	350,000
Mobilization/Demobilization and interim charter Air Support	141,000
Contracted Geological and Technician Services	307,000
Contracted Camp Services	163,000
Contracted Aerial Geophysical Survey	50,000
Contracted Geological Studies	46,000
Contracted Geophysical Surveys	25,000
Contracted Drilling Services	189,000
Contracted Assaying Services	142,000
Site Fuel Consumption	50,000

Travel	40,000
Final Analyses and Report	40,000
Sub Total	\$ 1,586,000
Company Overhead (Management, Office support, Taxes and Insurance)	150,000
TOTAL	\$ 1,736,000

During late 2005 and early 2006, we raised sufficient cash to conduct the intended 2006 seasonal exploration program on the Chandalar property. We began our 2006 field exploration program during the second quarter of 2006 and expect to complete it in late 2006, weather permitting. There can be no assurance that should exploration proceed according to the recommended program, it will lead to the discovery and delineation of ore reserves that will conform to the criteria specified in SEC Industry Guide 7.

The drilling program planned for 2006 is intended to provide an initial test of the ten identified targets, and, following appraisal of the results, is expected to lead to intensified drilling selected high-priority sites in 2007. We have sufficient funds to undertake the proposed exploration and drilling program in 2006. Additionally, we have sufficient funds and financing to continue operations at a fully-staffed level for the next 12 months. We may not have sufficient funds to commence the 2007 follow up drilling, and may have to rely on further sales of its securities to finance our activities. There can be no assurance we would be successful in completing such a securities offering on terms acceptable to us.

Preparations during the six-month period ended June 30, 2006 for the 2006 Summer Exploration Season

We have secured the financing we need to pay for our exploration program for 2006 and have entered into management contracts with well-qualified project managers. We established accounts with the State of Alaska to enable us to process payrolls to meet our 2006 Chandalar project field labor needs. The first of approximately ten hourly paid employees began work in June 2006. These are seasonal jobs that are all expected to be terminated by October 2006.

We are implementing our drilling plans for the Chandalar property. In the first half of 2006, we paid \$348,858 in cash for capital equipment and secured additional equipment of \$23,053 through a capital lease to support the 2006 summer exploration season.

The main capital items are a mid-sized excavator, a small (D-4 size) dozer, nine all terrain vehicles, a pick-up truck and welding unit. During the second quarter, we entered into a contract with a drilling company to perform drilling services using equipment owned by the drilling company. All heavy equipment, except the contractor's drill, was moved overland to the site in March 2006.

A 20-man exploration and drilling camp has been set up under contract with a company which specializes in arctic field services. Our personnel reconditioned and upgraded the Squaw Lake airfield to accommodate heavy loads on multi-engine aircraft and established an adjacent bulk fuel offloading and storage depot. In addition, eleven of the planned drill sites were prepared; seven on the Little Squaw vein and four on the Rock Glacier vein system.

Exploration activities subsequent to June 30, 2006

Subsequent to the end of the reported period, the contractor's drill was flown to the site on July 22, 2006, and the planned drilling began. Truck and aircraft shipping delays caused approximately a week's setback in getting the drill to the project. Start-up operations were faced with unseasonably poor weather conditions, including spring blizzards, late snow melt, and then continual rains, which caused water-related ground stability problems. A section of the main road necessary for drilling access was blocked by an extensive mud slide, requiring the Company to build a detour route. On July 30th, a mechanical failure on the drill rig halted drilling for five days. All together, these delays have significantly impacted the drilling program schedule. It is now doubtful that all of the intended objectives of the drilling program can be met prior to the onset of winter, which normally occurs in mid-September, when the seasonal field operation will end. Our stated drilling plans are being revised to accommodate the changed situation. These revisions may include adding a second shift to drilling operations to make up for lost drill time, prioritization of drilling sites or drilling shorter holes on fewer drill targets.

As of August 10, 2006, twelve reverse circulation percussion drill holes totaling 2,923 feet have been completed. (Reverse circulation drilling produces chips of rock called cuttings, unlike diamond core drilling which produces a cylinder of rock called core.) All of the drill holes were drilled at angles designed to intercept their targeted quartz veins at right angles in order to obtain approximate true vein widths. Five of the holes are located on the Little Squaw gold-quartz lode vein system and seven on the Summit gold-quartz lode vein system. The two vein systems are sub-parallel and about a mile apart. All of the drill holes except the first one on the Little Squaw vein intercepted their targets, showing quartz vein intercepts within fault zones, sometimes associated with hydrothermally altered bedrock. Most of the drill holes hit multiple quartz veins five to fifteen feet thick, and/or zones of small veins interlaced with the schist host rock ten to thirty feet thick. Continuous five-foot sample intervals of the drill cuttings have been taken for the entire length of each of the drill holes. All samples from the twelve drill holes have been shipped to the assay laboratory. We anticipate receiving certified assay results for the first sample shipment batch in mid-September, which included the first four drill holes. The second shipment included the samples for the remaining eight drill holes, with those assay results are expected in late September or early October.

On the technical front, contract geological mapping by an independent consulting firm started on June 28th and is ongoing, with the objective of producing a district geological map linking gold mineralization to specific geological features. Our consultants have completed a preliminary 1:20,000 scale geological map covering over 50 square miles, which represents most of the Chandalar mining district, including areas not controlled by us. A final product will be completed in September 2006, after a brief second mapping expedition and results of trace element analyses and petrographic studies of the various identified rock formations are received.

Meanwhile, project manager and geologist Jim Barker has been directing our survey crews conducting detailed geological mapping as well as sampling of eighteen different gold quartz vein prospects. More than 400 samples of soil and rock samples and been collected and submitted for assay. This work, which is focused on proving-up the continuity of quartz veins, indicates that many of the thirty-five previously reported individual gold quartz vein prospects are linked, forming sets comprising nine separate vein systems, and it has already identified new gold prospects. One of these, discovered by Mr. Barker, is the Kiska. There, methodical gold panning of the soils over a 1,200-foot long zone found conspicuous colors and gold tails in the prospecting pan. Geochemical assay results of soil samples have confirmed the large and strong gold anomaly. Partial results have been received for the soil samples, showing gold in soils in the range of one-half to three and one-half parts per million. The Kiska gold bearing quartz vein(s) is completely covered by soil and rock scree. We are constructing a road to the Kiska with the intent to move the drill there next.

Liquidity and Capital Resources

We are an exploration stage company and has incurred losses since our inception. We have no recurring source of revenue and our ability to continue as a going concern is dependant on our ability to raise capital to fund its future exploration and working capital requirements. Our plans for the long term continuation as a going concern include financing our future operations through sales of our common stock and/or debt and the eventual profitable exploitation of its mining properties. Our plans may also, at some future point, include the formation of mining joint ventures with senior mining company partners on specific mineral properties whereby the joint venture partner would provide the necessary financing in return for equity in the property. During the

second half of 2005 and the first quarter of 2006, we were successful in obtaining approximately \$4 million in financing for operations through 2006.

On December 31, 2005, we had total liabilities of \$775,930, and total assets of \$1,361,630. This compares to total liabilities of \$87,792 and total assets of about \$367,560 on December 31, 2004. As of December 31, 2005, our liabilities consisted of \$709,546 of convertible debenture, \$6,575 accrued interest payable, \$50,000 for accrued remediation costs and \$9,809 in outstanding accounts payable. The Convertible Debenture has a face amount of \$1,000,000 and is reflected on our financial statements of our net of an unamortized discount of \$145,227 for the fair value of the debenture's beneficial conversion feature, and an unamortized discount of \$145,227 for the fair value of the detached warrant. As of December 31, 2005, we had current assets of \$904,494, including cash and cash equivalents of \$891,380; current liabilities of \$16,384; and working capital of \$888,110.

Our principal source of liquidity during the years ended December 31, 2005 and 2004, has been through debt and equity financing. Financing activities provided cash of \$1,216,875 during the year ended December 31, 2005, and \$288,313 during the year ended December 31, 2004. We used cash in operating activities of \$358,350 during the year ended December 31, 2005, and \$346,915 during the year ended December 31, 2004.

On June 30, 2006 we had total liabilities of \$987,297, and total assets of \$3,106,863. This compares to total liabilities of \$775,930 and total assets of \$1,361,630 on December 31, 2005. As of June 30, 2006, our liabilities consist of \$766,822 convertible debenture, net of discounts, \$22,566 capital lease, \$4,931 accrued interest, \$50,000 for environmental clean up, and \$120,147 in outstanding accounts payable. We had working capital of \$2,121,931 on June 30, 2006 and current assets of \$2,292,406, including cash and cash equivalents of \$2,218,785. We had current liabilities of \$170,475 at June 30, 2006.

Our principal source of liquidity during the six months ended June 30, 2006 and 2005, has been through debt and equity financing. Financing activities provided cash of \$2,199,597 and \$116,875 during the six months ended June 30, 2006 and 2005, respectively. We used cash in operating activities of \$511,034 and \$114,432 during the six months ended June 30, 2006 and 2005, respectively. Additionally, we used cash of \$348,858 to purchase equipment and acquired an additional \$23,053 of equipment through a capital lease during the six months ended June 30, 2006. We will utilize the majority of this equipment in our exploration programs for 2006 and beyond.

We estimate that we will expend approximately \$1.736 million on the 2006 Chandalar exploration program during 2006. Delays incurred in the drilling program could increase the cost of the 2006 exploration program. We anticipate we may be required to raise additional capital in 2007.

Private Placement Offerings

Placement Agent Agreement

On September 23, 2005, we entered into a Placement Agent Agreement with Strata Partners, LLC, a U.S. registered broker dealer. Under the terms of a Placement Agent Agreement, we agreed to pay Strata Partners, LLC, as agent, a placement agent fee in an amount equal to eight percent (8%), as applicable, for sales effected by the agent and a lead agent fee in an amount equal to two percent (2%) of the aggregate gross proceeds of any placement during the term of the agreement. The agent also will receive warrants, as lead agent, to purchase common shares equal to three percent (3%) of the total number of common shares (or common stock equivalents) sold by the Company in the placement and warrants as selling agent to purchase additional common shares equal to seven percent (7%) of the total number of common shares (or common stock equivalents), as applicable, for sales effected by the agent. The terms, conditions and exercise price of the warrants to be issued to the agent shall be economically equivalent to the terms, conditions and exercise price of the securities issued by us in a placement. We also agreed to grant the agent the same registration rights granted to investors in a placement, if any, and reimburse the agent for all expenses incurred by it in the performance of the agent's obligations, including but not limited to the fees and expenses of our counsel and accountants and the cost of qualifying the placement, and the sale of the securities, in various states or obtaining an exemption from state registration requirements. We agreed to reimburse the agent for actual expenses, including but not limited to accounting, legal and professional fees, incurred by the agent in connection with the Placement, not to exceed one-half percent (0.5%) of the gross offering proceeds. We agreed that the agent would serve as exclusive placement agent until January 31, 2006, extendable for a period of time thereafter by mutual consent. We paid Strata Partners, LLC (the lead agent and sole selling agent) all of the fees outlined above in connection with our November 21, 2005 placement of 6% Convertible Debentures and Class A Warrants.

We had previously issued Strata Partners, LLC 31,400 shares of common stock during 2005, in reimbursement for certain expenses under the terms of a previous Placement Agent Agreement that terminated on July 1, 2005.

Private Placements

On August 12, 2005 our Board of Directors authorized a direct private placement offering of 1,200,000 units at \$0.25 per Unit. Each unit consists of one common share and a three-year full share purchase warrant exercisable at \$0.30, \$0.35 and \$0.40 in the respective successive years. During the quarter ended September 30, 2005, we sold a total of 500,000 units for proceeds of \$125,000. The remaining 700,000 units were sold during the fourth quarter of 2005, for proceeds of \$175,000. No fees or commissions were paid, and net proceeds to us were \$300,000.

Convertible Debenture

On November 21, 2005, we closed a private placement, issuing a 6% Convertible Debenture in the principal amount of US\$1,000,000 and a detached 2,500,000 Class A Warrant to one institutional investor. Cash proceeds to us, net of cash fees to the placement agent was \$900,000. The Debenture is convertible into shares of Common Stock, \$0.10 par value, at \$0.20 per share, subject to certain adjustments, and the Warrant is exercisable to acquire 2,500,000 common shares at an exercise price of \$0.30 per share until November 21, 2008. Both the Convertible Debenture and Warrant are transferable. The 6% Convertible Debenture contains a mandatory conversion provision which grants us, at our option, the ability to force conversion of the Debenture in whole or in part, subject to a 9.99% limitation of outstanding shares ownership provision, if the market price of our common stock is sustained at or above \$0.50 per share for five consecutive trading days. The Class A Warrant also contains a mandatory conversion provision which grants us, at our option, the ability to force conversion of the Warrant in whole or in part, subject to a 9.99% limitation of outstanding shares ownership provision, if the market price of our common shares is sustained at or above \$0.75 per share for five consecutive trading days.

On June 1, 2006, the Company remitted interest to RAB Special Situations (Master) Fund Limited in the amount \$31,397.26 in the form of stock as allowed by terms of the 6% Convertible Debenture, resulting in 28,286 shares of common stock being issued to the holder. The stock price used as specified in the Debenture was the closing bid price five (5) business days prior to the due date of the interest payment, which was May 24, 2006. On that date Little Squaw's common stock closed at \$1.11 per share.

In connection with the placement, we issued to the placement agent a 500,000 Class A Warrant under the terms of a Placement Agent Agreement which is convertible into 500,000 common shares at an exercise price of US\$0.30 until November 21, 2008. This Class A Warrant includes the same mandatory conversion provision as the warrant issued to the debenture holder. The fair value of this warrant was estimated using the Black-Scholes option pricing model. The warrant with a fair value of \$30,000 is included in deferred financing costs, bringing the total to \$130,000 with the cash fee paid to the agent as described above. The deferred financing costs are being amortized over the life of the convertible debenture, which resulted in amortization of \$3,611 to interest expense being recorded in 2005.

Upon the issuance of the 6% Convertible Debenture on November 21, 2005, we were required allocate value to the warrant issued with the debenture, and to record a discount on the debenture for its conversion feature. In accordance with EIFT No. 00-27 Application of Issue No. 98-5 to Certain Convertible Instruments we recorded a discount in the amount of \$150,000. This discount is being amortized over the life of the convertible debenture, which resulted in accretion of \$4,773 to the convertible debenture being recorded in 2005.

Also, in accordance with EITF 98-5, Accounting for Convertible Securities with Beneficial Conversion Features or Contingently Adjustable Conversion Ratios , the Warrants issued in connection with the 6% Convertible Debenture were accounting for under APB 14, Accounting for Convertible Debt and Debt Issued with Stock Purchase Warrants . Under APB 14, the proceeds received from the investor are to be allocated to the 6% Debenture and the Warrant in proportion to their respective fair values. The fair value of the warrants was calculated using the Black-Scholes option pricing model. The warrants with a fair value of \$150,000 are presented as a component of additional paid-in capital in shareholder s equity. This discount is being amortized over the life of the Convertible Debenture, which resulted in amortization of \$4,773 to interest expense being recorded in 2005.

Private Placements Subsequent to the Close of 2005

On November 7, 2005, our Board of Directors approved an equity financing of up to \$2,000,000 of our securities at a price equal to or greater than the terms of the November 21, 2005 Convertible Debenture. On January 31, 2006, we closed the first tranche of 3,895,000 Units, at a price of \$0.25 per Unit for gross proceeds of \$973,750. Each Unit consisted of one share of common stock and one half of one (1/2) Class B Warrant. Each whole Class B Warrant is exercisable to acquire one additional share of common stock at an exercise price of \$0.35 per share during the one-year period commencing on the Closing Date, \$0.50 per share during the second year following the Closing Date, and \$0.65 per share during the third year following the Closing Date. Additionally, each Class B Warrant contains a mandatory conversion provision which grant us, at our option, the ability to force conversion of each whole Warrant if the market price of our common shares is sustained at or above \$0.875 per share for five consecutive trading days. In connection with this portion of the placement, we paid an Agent's commission of 10% of the gross proceeds and issued the agent 389,500 Class B Warrants.

On February 24, 2006, we closed the second tranche of an additional 5,600,000 Units, at a price of \$0.25 per Unit for gross proceeds of \$1,400,000. This second closing brings the total gross proceeds received to \$2,373,750 and the total Units sold to 9,495,000, including an oversubscription of 1,495,000 Units which had been approved by our Board of Directors on February 13, 2006. Each Unit consisted of one share of our common stock and one half of one (1/2) Class B Warrant. The Units of this second closing are identical to those of the first closing on January 31, 2006. In connection with this portion of the placement, we paid an Agent's commission of 10% of the gross proceeds and issued the agent 560,000 Class B Warrants, bringing the total number of Class B Warrants issued to the Agent for both tranches to 945,500.

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements.

Contractual Obligations

With the exception of management consulting contracts and the Convertible Debenture described above, we had no material contractual obligations as of December 31, 2005.

Inflation

We not believe that inflation has had a significant impact on its consolidated results of operations or financial condition.

Critical Accounting Policies

We have identified our critical accounting policies, the application of which may materially affect the financial statements, either because of the significance of the financials statement item to which they relate, or because they require management judgment in making estimates and assumptions in measuring, at a specific point in time, events which will be settled in the future. The critical accounting policies, judgments and estimates which management believes have the most significant effect on the financial statements are set forth below:

-

Estimates of the recoverability of the carrying value of our mining and mineral property assets. Our estimate of carrying value is based partially on the valuation opinion of a qualified independent third party. However, if future results vary materially from the assumptions and estimates used by us and this third party, we may be required to recognize an impairment in the assets carrying value.

-

Expenses and disclosures associated with accounting for stock-based compensation. We used the Black-Scholes option pricing model to estimate the fair market value of stock options issued under our stock-based compensation plan, which determines the recognition of associated compensation expense. This valuation model requires the use of judgment in applying assumptions of risk-free interest rate, stock price volatility and the expected life of the options.

While we believe we have applied appropriate judgment in the assumptions and estimates, variations in judgment in applying assumptions and estimates used in this valuation could have a material effect upon the reported operating results.

-

Estimates of our environmental liabilities. Our potential obligations in environmental remediations or reclamation activities are considered critical due to the assumptions and estimates inherent in accruals of such liabilities, including uncertainties relating to specific reclamation and remediation methods and costs, the application and changing of environmental laws, regulations and interpretations by regulatory authorities.

-

Accounting for Convertible Securities. We used the Black-Scholes option pricing model and other valuation considerations to estimate the fair market value of the detachable warrant and beneficial conversion feature of a

convertible debenture. We used APB-14, EITF No. 98-5, EITF No. 00-27 and other guidance to allocate value to the individual components of this convertible security. The associated discounts to the fair value of the convertible debenture form the basis for amortization and accretion over future periods. While we believe we have applied appropriate judgment in the assumptions and estimates, variations in judgment in applying assumptions and estimates used in the valuation or future results, could have a material effect upon the allocation of fair value of the components of the convertible securities, together with the reported operating results as discounts are recognized as interest expense over the life of the securities.

Significant Equipment Purchases and Requirements

With the completion of the private placements in 2005 and in 2006, we are aggressively implementing our drilling plans for the Chandalar property. In the first quarter of 2006, we have paid \$349,215 in cash for capital equipment to support the 2006 summer exploration season. The main capital items are a mid-sized excavator, a small (D-4 size) dozer, seven all terrain vehicles, a pick-up truck and welding unit. In addition, we are negotiating a contract with a drilling company to perform drilling services using equipment owned by the drilling company. All heavy equipment, except the contractor's drill, was moved overland to the site in March 2006. The drill is scheduled to be flown to the site in July of 2006.

Expected Significant Changes in the Number of Employees

We have established accounts with the State of Alaska to enable us to process payrolls to meet our 2006 Chandalar project field labor needs. The first of approximately ten hourly paid employees is scheduled to begin work in the first week of May 2006. These are seasonal jobs that are all expected to be terminated by October 2006.

MARKET FOR COMMON EQUITY AND RELATED SHAREHOLDER MATTERS

Our common stock is quoted on the OTC Bulletin Board which is sponsored by the National Association of Securities Dealers (NASD). The OTC Bulletin Board is a network of security dealers who buy and sell stock. The dealers are connected by a computer network which provides information on current bids and asks as well as volume information. The OTC Bulletin Board is not considered a national exchange.

Our Common stock is traded on the NASDAQ Over The Counter Bulletin Board under the symbol LITS. The following table shows the high and low bid information for the Common stock for each quarter of the fiscal years 2003, 2004, 2005 and the first and second quarters of 2006. The quotations reflect inter-dealer prices, without retail mark-up, mark-down or commission and may not represent actual transactions.

As of August 17, 2006, the closing price for our common stock was \$1.65 per share as quoted by the NASD OTCBB.

HOLDERS OF RECORD

As of December 31, 2005, there were 3,366 shareholders of record of our common stock and approximately 858 additional shareholders whose shares are held through brokerage firms or other institutions. As of June 30, 2006 we had 3,339 registered shareholders.

TRANSFER AGENT AND REGISTRAR

Our registrar and transfer agent for our common shares is Columbia Stock Transfer Company, 1602 E. Seltice Way, Suite A PMB#303, Post Falls, ID 83854, U.S.A. Phone: (208) 664-3544; Fax: (208) 777-8998.

USE OF PROCEEDS

We will not receive any of the proceeds of the shares offered by the Selling Shareholders. We may receive proceeds from the exercise of the Class A Warrants upon exercise of these warrants, if any, and will use the proceeds from any exercise for general working capital purposes.

LEGAL MATTERS

The law firm Guess & Rudd P.C. have acted as our counsel by providing separate opinions, covering the aggregate, on the validity of the securities.

EXPERTS

The financial statements as of December 31, 2005 and 2004, included in this prospectus and elsewhere in the registration statement have been audited by DeCoria, Maichel & Teague P.S., independent registered public accounting firm, as indicated in their report with respect thereto, and are included herein in reliance upon the authority of said firm as experts in auditing and accounting in giving said reports.

The information contained in the report titled *Gold Deposits of the Chandalar Mining District, Northern Alaska: An information Review and Recommendations* was prepared by Pacific Rim Geological Consultants, Inc., of Fairbanks Alaska.

The information contained the report titled *Summary of Field Investigations 2004* was prepared by James C. Barker, a Certified Professional Geologist licensed to practice in Alaska.

The information contained in the report titled *Interim Summary Report: Little Squaw Gold Mining Company, Properties in the Chandalar Mining district, Alaska* was prepared by Melvin Klohn, a geologist licensed to practice in the state of Washington.

The information contained in the report titled *Structural and Lithological Features Observed From Air Photo Mosaic* was prepared by BlueMap Geomatics Ltd., of Vancouver British Columbia.

The information contained in the report titled Chandalar Mining District, A Report of Findings and Recommendations, 2005 was prepared by James C. Barker, a Certified Professional geologist licensed to practice in Alaska.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and

Stockholders of Little Squaw Gold Mining Company

We have audited the accompanying balance sheets of Little Squaw Gold Mining Company, (An Exploration Stage Company) (the Company) as of December 31, 2005 and 2004, and the related statements of operations, changes in stockholders' equity and cash flows for the years then ended and from the date of inception on March 26, 1959 through December 31, 2005. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Little Squaw Gold Mining Company as of December 31, 2005 and 2004, and the results of its operations and its cash flows for the years then ended and from the date of inception on March 26, 1959 through December 31, 2005 in conformity with accounting principles generally accepted in the United States of America.

Little Squaw Gold Mining Company

(An Exploration Stage Company)

Notes to Financial Statements

1.

ORGANIZATION AND DESCRIPTION OF BUSINESS

Little Squaw Gold Mining Company (Company), was incorporated under the laws of the State of Alaska on March 26, 1959. The Company is engaged in the business of acquiring and exploring mineral properties throughout the Americas, primarily those containing gold and associated base and precious metals. The Company's common stock trades on the NASDAQ OTC BB exchange under the ticker symbol LITS.

The Company is an exploration stage company and has incurred losses since its inception. The Company has no recurring source of revenue and its ability to continue as a going concern is dependant on the Company's ability to raise capital to fund its future exploration and working capital requirements. The Company's plans for the long term continuation as a going concern include financing the Company's future operations through sales of its common stock and/or debt and the eventual profitable exploitation of its mining properties. During the second half of 2005 and the first quarter of 2006, the Company has been successful in obtaining financing for operations through 2006.

During 2004 and 2005, the Company focused on advancing exploration of the Chandalar property through surface prospecting and geologic mapping and sampling methods. No drilling or underground exploration work was involved; however, the Company plans significant drilling and exploration work in 2006 and beyond.

Unless otherwise indicated, amounts provided in these notes to the financial statements pertain to continuing operations.

2.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Exploration Stage Enterprise

The Company's financial statements are prepared using the accrual method of accounting and according to the provisions of Statement of Financial Accounting Standards No. 7, Accounting for Development Stage Enterprises, as it devotes substantially all of its efforts to acquiring and exploring mining interests that will eventually provide sufficient net profits to sustain the Company's existence. Until such interests are engaged in commercial production, the Company will continue to prepare its financial statements and related disclosures in accordance with entities in the exploration stage.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Significant estimates used in preparing these financial statements include those assumed in estimating the recoverability of the cost of mining claims, accrued remediation costs, beneficial conversion features of convertible debt, deferred financing costs and deferred tax assets and related valuation allowances. Actual results could differ from those estimates.

Cash and Cash Equivalents

For the purpose of the balance sheet and statement of cash flows, the Company considers all highly liquid investments purchased, with an original maturity of three months or less, to be a cash equivalent. At December 31, 2005, the Company's cash deposits, held in bank certificates of deposit, exceeded the Federal Deposit Insurance Corporation (FDIC) limits.

Little Squaw Gold Mining Company

(An Exploration Stage Company)

Notes to Financial Statements

2.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, CONTINUED:

Plant, Equipment, and Accumulated Depreciation

Plant and equipment are stated at cost, cost is determined by cash paid or shares of the Company's common stock issued. The Company's mill buildings and equipment are located on the Company's unpatented state mining claims located in the Chandalar mining district of Alaska. All such assets are fully depreciated. A small amount of office equipment is located at Company offices in Spokane, Washington. Assets are depreciated over lives of five to seven years, resulting in depreciation expense of \$846 and \$493 being recognized for 2005 and 2004, respectively.

Income Taxes

Income taxes are recognized in accordance with Statement of Financial Accounting Standards No. 109, "Accounting for Income Taxes," whereby deferred income tax liabilities or assets at the end of each period are determined using the tax rate expected to be in effect when the taxes are actually paid or recovered. A valuation allowance is recognized on deferred tax assets when it is more likely than not that some or all of these deferred tax assets will not be realized.

Net Loss Per Share

Statement of Financial Accounting Standards No. 128, Earnings per Share, requires dual presentation of basic earnings per share (EPS) and diluted EPS on the face of all income statements issued after December 15, 1997, for all entities with complex capital structures. Basic EPS is computed as net income divided by the weighted average number of common shares outstanding for the period. Diluted EPS reflects the potential dilution that could occur from common shares issuable through stock options, warrants, and other convertible securities. The dilutive effect of convertible and exercisable securities would be:

For years ended December 31,

2005

2004

Stock Options

320,000

320,000

Warrants

4,200,000

1,036,389

Convertible debenture

5,000,000

0

Total possible dilution

9,520,000

1,356,389

At December 31, 2005 and 2004, the effect of the Company's outstanding options and common stock equivalents would have been anti-dilutive. Accordingly, only basic EPS is presented.

Mining and Mineral Properties

Cost of acquiring mineral properties are capitalized by the project area. Costs to maintain mineral rights and leases are expensed as incurred. Exploration costs are expensed in the period in which they occur. When a property reaches the production stage, the related capitalized costs are amortized using the units-of-production method on the basis of periodic estimates of ore reserves. Mineral properties are periodically assessed for impairment of value, and any subsequent losses are charged to operations at the time of impairment. If a property is abandoned or sold, its capitalized costs are charged to operations.

Little Squaw Gold Mining Company

(An Exploration Stage Company)

Notes to Financial Statements

2.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, CONTINUED:

Fair Values of Financial Instruments

The carrying amounts of financial instruments, including cash and cash equivalents, prepaid expenses, interest receivable, accounts payable and interest payable approximated their fair values as of December 31, 2005 and 2004. Related party liabilities approximated their fair values based upon the terms of payment at December 31, 2004. The convertible debenture approximated its fair value after consideration of the fair value of the related embedded beneficial conversion feature and detached warrants at December 31, 2005.

Deferred Financing Costs

Financing costs incurred in connection with the Company's financing activities are amortized using the effective interest method over the three year life of the financing. For the year ended December 31, 2005, the Company incurred deferred financing costs in the form of \$100,000 cash paid and \$30,000 of warrants issued to a placement agent in connection with the Company's issue of a convertible debenture. The fair value of the warrants was estimated using the Black-Scholes option pricing model. For the year ended December 31, 2005, there was \$3,611 of amortization of deferred financing costs included in interest expense. The convertible debenture and associated warrants are discussed in Note 5 "Convertible Debenture" of these financial statements.

Reclamation and Remediation

The Company's operations have been, and are subject to, standards for mine reclamation that have been established by various governmental agencies. In June 2001, the Financial Accounting Standards Board (FASB) issued SFAS No. 143, *Accounting for Asset Retirement Obligations*. SFAS 143 requires the Company to record the fair value of an

asset retirement obligation as a liability in the period in which the Company incurs a legal obligation for the retirement of tangible long-lived assets. A corresponding asset is also recorded and depreciated over the life of the asset. After the initial measurement of the asset retirement obligation, the liability will be adjusted at the end of each reporting period to reflect changes in the estimated future cash flows underlying the obligation. Determination of any amounts recognized upon adoption is based upon numerous estimates and assumptions, including future retirement costs, future inflation rates and the credit-adjusted risk-free interest rates.

Remediation liabilities on non operating properties are recognized according to the provisions of Statement of Position 96-1.

The Company accrues costs associated with environmental remediation obligations when it is probable that such costs will be incurred and they are reasonably estimable. Such costs are based on management's estimate of amounts expected to be incurred when the remediation work is performed.

Little Squaw Gold Mining Company

(An Exploration Stage Company)

Notes to Financial Statements

2.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, CONTINUED:

New Accounting Pronouncements

On December 16, 2004, the Financial Accounting Standards Board (the "FASB") issued Statement of Financial Accounting Standards, or Statement, No. 123 (revised 2004), Share-Based Payment ("Statement 123(R)"), which is a revision of FASB Statement No. 123, Accounting for Stock-Based Compensation ("Statement 123"). Statement 123(R) supersedes Accounting Principles Board Opinion No. 25 ("APB 25"), Accounting for Stock Issued to Employees, and amends FASB Statement No. 95, Statement of Cash Flows. Generally, the approach in Statement 123(R) is similar to the approach described in Statement 123. Statement 123(R) requires that all share-based payments to employees, including grants of employee stock options, be recognized in the income statement based on their fair values. Pro forma disclosure is no longer an option. Statement 123(R) is effective for small business issuers at the beginning of the first interim or annual period beginning after December 15, 2005.

As permitted by Statement 123, management currently accounts for share-based payments to employees using APB 25's intrinsic value method. Management expects to adopt Statement 123(R) on January 1, 2006 using the modified prospective method and is unable to estimate stock-based compensation expense to be recorded in 2006.

Stock-based Compensation: At December 31, 2005 and 2004, the Company had a stock plan for key employees, non-employee directors and management consultants which is more fully described in Note 5. The Company accounts for stock options as prescribed by Accounting Principles Board Opinion No. 25 and discloses pro forma information as provided by Statement 123, Accounting for Stock Based Compensation.

3.

MINING AND MINERAL PROPERTIES

Mining Claims

At December 31, 2005 and 2004, the Company's mining properties were as follows:

2005

2004

Chandalar claims

\$

264,000

\$

264,000

2003 purchased claims

35,000

35,000

Unpatented state claims staked

22,041

22,041

Total

\$

321,041

\$

321,041

Buildings and Equipment

Located on the Company's unpatented state mining claims in the Chandalar District are certain mining and milling buildings and other mining equipment that have long since been fully depreciated and have no book value. Accordingly, the Company has removed their cost basis and the associated accumulated depreciation from its financial statements.

See Note 9: Subsequent Events for capital asset additions after the close of 2005.

Little Squaw Gold Mining Company

(An Exploration Stage Company)

Notes to Financial Statements

4.

CONVERSION OF RELATED PARTY DEBTS

Conversion of Related Party Debts to Common Stock

On January 21, 2005, the Company separately entered into related party transactions with William Orchow, a director, Wilbur G. Hallauer, a greater than 10% shareholder, and another shareholder in which these parties advanced an aggregate amount of \$100,000 to the Company for operating capital purposes. The advances were evidenced by six month promissory notes payable on demand, or if no demand is made, on July 20, 2005, with accrued interest at 6% per annum. The Company had the right, any time prior to their maturity date on July 20, 2005, and without notice, to convert the Notes into restricted shares of common stock and warrants. The initial conversion rate would have been \$0.30 per share and included one warrant per share initially at \$0.45. The exercise price of the warrants would have escalated to \$0.55 and \$0.75 in the second and third year from the date of issue. No conversion was made by the Company and no demand for payment was made by the holders of the promissory notes, and the notes subsequently matured on July 20, 2005, whereupon the Company requested of all note holders an extension of the term of the notes.

All parties to the notes agreed to extend the term of the Notes for an indefinite period until the Company had the financial resources to repay them. In connection with the agreement to extend the term of the Notes, the parties also agreed that the interest rate on the notes would increase from 6% to 12% per annum for the extended period. All principal and interest obligations of the promissory notes were paid during the last quarter of 2005, and no stock was issued in connection with these related party transactions. Interest expense of \$7,500 and \$0 was recognized for the years ended December 31, 2005 and 2004, respectively.

5.

CONVERTIBLE DEBENTURE

On November 21, 2005, the Company closed a private placement, issuing a 6% Convertible Debenture in the principal amount of US\$1,000,000 and a detached 2,500,000 Class A Warrant to one institutional investor. The Debenture is convertible at any time at the option of the holder into shares of Common Stock, \$0.10 par value, at US\$0.20 per share, subject to certain adjustments, and the Warrant is exercisable to acquire 2,500,000 common shares at an

exercise price of US\$0.30 per share until November 21, 2008, the term of the Convertible Debenture. Both the Convertible Debenture and Warrant are transferable. The Convertible Debenture contains a mandatory conversion provision which grants the Company, at the Company's option, the ability to force conversion of the Debenture in whole or in part, subject to a 9.99% limitation of outstanding shares ownership provision, if the market price of the Company's common shares is sustained at or above \$0.50 per share for five consecutive trading days. The Class A Warrant also contains a mandatory conversion provision which grants the Company, at the Company's option, the ability to force conversion of the Warrant in whole or in part, subject to a 9.99% limitation of outstanding shares ownership provision, if the market price of the Company's common shares is sustained at or above \$0.75 per share for five consecutive trading days.

In connection with the placement, the Company issued to the placement agent a 500,000 Class A Warrant under the terms of a Placement Agent Agreement which is convertible into 500,000 common shares at an exercise price of US\$0.30 until November 21, 2008. This Class A Warrant includes the same mandatory conversion provision as the warrant issued to the debenture holder. Valuation of the Warrant and the associated amortization of deferred financing costs are described in Note 2 of these financial statements.

Little Squaw Gold Mining Company

(An Exploration Stage Company)

Notes to Financial Statements

5.

CONVERTIBLE DEBENTURE, CONTINUED:

Upon the issuance of the 6% Convertible Debenture on November 21, 2005, the Company was required to allocate value to the warrant issued with the debenture, and to record a discount on the debenture for the fair value of its beneficial conversion feature. In accordance with EITF No. 00-27 Application of Issue No. 98-5 to Certain Convertible Instruments the Company recorded a discount in the amount of \$150,000. This discount is being amortized over the life of the convertible debenture, which resulted in accretion of \$4,773 to the convertible debenture being recorded in 2005.

Also, in accordance with EITF No. 98-5, Accounting for Convertible Securities with Beneficial Conversion Features or Contingently Adjustable Conversion Ratios, the Warrants issued in connection with the Convertible Debenture were accounted for under APB 14, Accounting for Convertible Debt and Debt Issued with Stock Purchase Warrants.

Under APB 14, the proceeds received from the investor are to be allocated to the Debenture and the Warrant in proportion to their respective fair values. The fair value of the warrants was estimated using the Black-Scholes option pricing model. The warrants with a fair value of \$150,000 are presented as a component of additional paid-in capital in shareholder's equity. This discount is being amortized over the life of the convertible debenture, which resulted in amortization of \$4,773 to interest expense being recognized in 2005.

6.

STOCKHOLDERS EQUITY

At December 31, 2003, the Company had one class of \$0.10 par value common stock outstanding with 12,000,000 shares available for issue. At a special meeting of shareholders originally convened December 19, 2003, then adjourned to January 23, 2004, (due to the absence of a voting majority necessary to ratify certain proposals), the shareholders voted to increase the Company's authorized shares of common stock to 200,000,000 and to create a class of preferred stock with 10,000,000 shares authorized for issue.

Common Stock Issued to Officer

On March 4, 2004, the Company issued the former CFO, Becky Corigliano, 67,103 shares of the Company's restricted common stock from its treasury following her appointment as Chief Financial Officer. In connection with the issue, the Company recognized \$6,710 of compensation expense in its 2004 financial statements based on management's estimate of the value of the stock issued.

Common Stock Issued to Directors

On December 31, 2004, the Company issued each of its six independent directors 50,000 shares for a total of 300,000 shares, of the Company's restricted common stock under the 2003 Share Incentive Plan. As a result the Company recognized \$59,200 share based expense for director's fees estimated by the fair value of the shares issued.

On May 13, 2005 the Company, by resolution of its Board of Directors, issued 112,903 restricted common shares to Mr. James Duff for his services as Chairman of the Board of Directors and in connection with working with the Company's management in attempts to obtain financing for the Company. As a result the Company recognized \$25,969 of share based expense estimated by the fair value of the shares issued. There were no issues of common stock in 2005 to Directors in relation to their service as directors.

Little Squaw Gold Mining Company

(An Exploration Stage Company)

Notes to Financial Statements

6.

STOCKHOLDERS EQUITY, CONTINUED:

Common Stock Issued to Consultants

On October 25, 2004, the Company issued 60,000 shares of the Company's restricted common stock to Sussex Avenue Partners, LLC for consulting services relating to management advisement, strategic planning and marketing in connection with its business, together with advisory and consulting related to shareholder management and public relations. The Company issued an additional 30,000 shares of restricted common stock to Sussex Avenue Partners, LLC on December 13, 2004 for similar services. An expense of \$29,400 was recorded in connection with the issuance based on the estimated value of the aggregate shares issued.

On January 6, 2005, the Company issued 20,000 restricted common shares to Mr. Terry Swanger in partial fulfillment of payment for consulting services by Swanger Eriksen and Associates as provided for in a Letter Agreement dated October 14, 2004. The consulting services were related to the formulation and implementation of a marketing plan to introduce the Company to U.S. markets. The Letter Agreement was terminated on February 28, 2005. An expense of \$5,600 was recorded in connection with the issuance based on the estimated value of the shares issued.

On February 13, 2005, the Company issued 30,000 shares of the Company's restricted common stock to Sussex Avenue Partners, LLC for consulting services similar to those performed during 2004. An expense of \$8,400 was recognized in connection with the issuance based on the estimate value of the shares issued.

Common Stock Issued to Placement Agent

On March 1, 2005 the Company entered into a Placement Agent Agreement with a broker-dealer to act as a placement agent for the Company. On July 1, 2005, the Company issued 31,400 shares of its common stock to Strata Partners,

LLC as reimbursement for expenses incurred under the terms of the agreement that terminated July 1, 2005. An expense of \$5,337 was recorded in connection with the issuance based on the estimated value of the shares issued.

Private Placements

On August 12, 2005 the Company's Board of Directors authorized a direct private placement offering of 1,200,000 units at \$0.25 per Unit. Each unit consists of one common share of the Company, and a three-year full share purchase warrant exercisable at \$0.30, \$0.35 and \$0.40 in the respective successive years. During the quarter ended September 30, 2005, the Company sold a total of 500,000 units for proceeds of \$125,000. The remaining 700,000 units were sold during the fourth quarter of 2005, for proceeds of \$175,000. No fees or commissions were paid, and total net proceeds to the Company were \$300,000.

See Note 9: Subsequent Events for details of additional private placements made subsequent to the end of 2005.

Little Squaw Gold Mining Company

Notes to Financial Statements

6.

STOCKHOLDERS' EQUITY, CONTINUED:

Stock Warrants

For the years ended December 31, 2005 and 2004, the Company had the following types of stock purchase warrants outstanding:

2004 Private Placement Warrants

During 2004, and in connection with the Company's private placement of its common stock, warrants were issued and were exercisable at \$0.45 per common share and expired on September 19, 2005. As of December 31, 2004, 173,611 warrants had been exercised, yielding net cash proceeds of \$70,313, leaving 1,036,389 of these warrants issued and outstanding. On May 18, 2005, the Company's Board of Directors authorized a temporary reduction of the exercise price of these warrants to \$0.25 through June 24, 2005 after which time the remaining unexercised warrants reverted back to their original \$0.45 exercise price. As a result of the price reduction, 75,000 warrants were exercised during the second quarter ended June 30, 2005, yielding net cash proceeds of \$16,875. The remaining warrants expired on September 19, 2005.

2005 Private Placement Warrants

In 2005, warrants were issued in connection with the Company's private placement of its common stock on August 12, 2005, and are exercisable at \$0.30, \$0.35 and \$0.40 per common share in the respective three successive years and expire in the third and fourth quarters of 2008, three years from their purchase date. These warrants contain no

mandatory conversion provision. At December 31, 2005 there were 1,200,000 of these warrants were issued and outstanding.

Class A Warrants

The Class A Warrants were issued in connection with the Company's private placement of its common stock on November 21, 2005, and are exercisable at \$0.30 per common share and expire on November 21, 2008. The Class A Warrants contain a mandatory conversion provision which grants the Company, at the Company's option, the ability to force conversion of the warrants in whole or in part, subject to a 9.99% limitation of outstanding shares ownership provision, if the market price of the Company's common shares is sustained at or above \$0.75 per share for five consecutive trading days. At December 31, 2005 there were two Class A Warrants issued and outstanding with exercise privileges for a total of 3,000,000 common shares.

See Note 9: Subsequent Events for details of the Class B Warrants issued subsequent to the end of the year in connection with the Company's private placement of its common stock on January 31, 2006.

Little Squaw Gold Mining Company

(An Exploration Stage Company)

Notes to Financial Statements

6.

STOCKHOLDERS' EQUITY, CONTINUED:

2003 Share Incentive Plan:

In 2004, the shareholders voted to adopt the Little Squaw Gold Mining Company 2003 Share Incentive Plan (the Plan). The Plan permits the grant of nonqualified stock options, incentive stock options and shares of common stock to participants of the Plan. The purpose of the Plan is to promote the success of the Company and enhance the value by linking the personal interests of the participants to those of the Company's shareholders, by providing participants with an incentive for outstanding performance. Pursuant to the terms of the Plan, 1,200,000 shares of the Company's authorized but unissued common stock were reserved for issue. Options granted to participants under the Plan must be exercised no later than the tenth anniversary of the grant. Eligible participants in the Plan include the Company's employees, directors and consultants.

In November 2005 the Company's Board of Directors ratified changes to the Plan that brought it into compliance with new IRS laws (principally Code 409A) that require companies to recognize the fair market value of stock options and other share based payments awarded to employees and associates as compensation expense. The new law becomes effective for the Company on January 1, 2006. Any new shares issued under the Plan will be based on their then current market price or higher. The Plan is now referred to as the Restated 2003 Share Incentive Plan.

During 2004, 300,000 shares of restricted common stock and 320,000 options to purchase common stock were issued under the original Plan. No shares have been issued under the restated Plan. The following table summarizes stock option activity under this plan:

The stock options are exercisable immediately upon grant and for a period of 10 years. In the event of cessation of the holder's relationship with the Company, the holder's exercise period terminates 6 months following such cessation. Accordingly, subsequent to December 31, 2005, 55,000 options held by a former director were forfeited on March 13, 2006.

Little Squaw Gold Mining Company

(An Exploration Stage Company)

Notes to Financial Statements

6.

STOCKHOLDERS EQUITY, CONTINUED:

The Company accounts for the Plan under the recognition and measurement principles of APB Opinion No. 25, *Accounting for Stock Issued to Employees*, and related interpretations. No stock-based employee compensation cost is reflected in net income, except to the extent that the market value of the underlying common stock on the date of grant exceeded the exercise price of stock options. Pro forma net loss presented below was determined as if the Company had accounted for their employee stock options under the fair value method of Statement 123.

There were no grants of stock options for the year ended December 31, 2005.

The fair value of stock options was estimated at the date of grant using the Black Scholes option pricing model, which requires the use of highly subjective assumptions, including the expected volatility of the stock price, which may be difficult to estimate for small business issuers traded on micro-cap stock exchanges. The fair value of each option grant was estimated on the grant date using the following weighted average assumptions:

December 31,

REMEDIATION LIABILITY

In 1990, the Alaska Department of Environmental Conservation (Alaska DEC) notified the Company that soil samples taken from a gravel pad adjacent to the Company's Tobin Creek mill site contained elevated levels of mercury. In response to the notification, the Company engaged a professional mining engineer to evaluate the cost and procedure of remediating the affects of the possible contamination at the site. In 1994, the engineer evaluated the contamination and determined it to consist of approximately 160 cubic yards of earthen material and estimated a cost of approximately \$25,000 to remediate the site. In 2000, the site was listed in the Alaska DEC's contaminated sites database as a medium priority contaminated site. During 2003, the Company's management reviewed its estimate of the cost that would be ultimately required to fulfill its remediation obligations at the site and determined that its accrual for remediation should be adjusted, based upon estimated general and administrative costs that would be included in the remediation effort and the affect of inflation on the 1994 cost estimate and increased the accrual to \$36,000. During 2004, management updated its estimate of undiscounted cash costs to remediate the site, and increased the accrual for remediation costs to \$50,000 at December 31, 2004. At December 31, 2005 the Company reaffirmed the validity of the \$50,000 estimate and did not change the accrual. The Company's remediation cost accrual is classified as a non-current liability, as management believes its remediation activities will not occur during the upcoming year.

The Company's management believes that the Company is currently in substantial compliance with environmental regulatory requirements and that its accrued environmental remediation costs are representative of management's estimate of costs required to fulfill its obligations. Such costs are accrued at the time the expenditure becomes probable and the costs can reasonably be estimated. The Company recognizes, however, that in some cases future environmental expenditures cannot be reliably determined due to the uncertainty of specific remediation methods, conflicts between regulating agencies relating to remediation methods and environmental law interpretations, and changes in environmental laws and regulations. Any changes to the Company's remediation plans as a result of these factors could have an adverse affect on the Company's operations. The range of possible losses in excess of the amounts accrued cannot be reasonably estimated at this time.

8.

INCOME TAXES

At December 31, 2005 and 2004, the Company had deferred tax assets which were fully reserved by valuation allowances. The deferred tax assets were calculated based on an expected future tax rate of 15%. Following are the components of such assets and allowances at December 31, 2005 and 2004:

2005

2004

Deferred tax assets arising from:

Unrecovered promotional and exploratory costs

\$

56,000

At December 31, 2005 and 2004, the Company had federal tax-basis net operating loss carryforwards totaling \$1,237,445 and approximately \$803,000, respectively, which will expire in various amounts from 2006 through 2025.

Little Squaw Gold Mining Company

(An Exploration Stage Company)

Notes to Financial Statements

8.

INCOME TAXES, CONTINUED:

The Tax Reform Act of 1986 substantially changed the rules relative to the use of net operating loss and general business credit carryforwards in the event of an ownership change of a corporation. Due to the change in ownership during June 2003, the Company is restricted in the future use of net operating loss and tax credit carryforwards generated before the ownership change. As of December 31, 2005, this limitation is applicable to accumulated net operating losses of approximately \$150,727, which were incurred prior to the change of ownership and would substantially limit the use of the Company's respective, existing losses.

The above estimates are based upon management's decisions concerning certain elections which could change the relationship between net income and taxable income. Management decisions are made annually and could cause the estimates to vary significantly.

Net operating losses expire as follows:

December 31,

2006

\$

38,377

SUBSEQUENT EVENTS

Private Placements

On November 7, 2005 the Board of Directors approved an equity financing of up to \$2,000,000 of Company securities at a price equal to or greater than the terms of the November 21, 2005 Convertible Debenture. On January 31, 2006, the Company closed the first tranche of 3,895,000 Units, at a price of \$0.25 per Unit for gross proceeds of \$973,750. Each Unit consisted of one share of common stock and one half of one (1/2) Class B Warrant. Each whole Class B Warrant is exercisable to acquire one additional share of common stock at an exercise price of \$0.35 per share during the one-year period commencing on the Closing Date, \$0.50 per share during the second year following the Closing Date, and \$0.65 per share during the third year following the Closing Date. Additionally, each Class B Warrant contains a mandatory conversion provision which grant the Company, at the Company's option, the ability to force conversion of each whole Warrant if the market price of the Company's common shares is sustained at or above \$0.875 per share for five consecutive trading days. In connection with this portion of the placement, the Company paid an Agent's commission of 10% of the gross proceeds and issued the agent 389,500 Class B Warrants.

(An Exploration Stage Company)

Notes to Financial Statements

9.

SUBSEQUENT EVENTS, CONTINUED:

On February 24, 2006, the Company closed the second tranche of an additional 5,600,000 Units, at a price of \$0.25 per Unit for gross proceeds of \$1,400,000. This second closing brings the total gross proceeds received to \$2,373,750 and the total Units sold to 9,495,000, including an oversubscription of 1,495,000 Units which had been approved by the Board of Directors on February 13, 2006. Each Unit consisted of one share of the registrant's common stock and one half of one (1/2) Class B Warrant. The Units of this second closing are identical to those of the first closing on January 31, 2006. In connection with this portion of the placement, the Company paid an Agent's commission of 10% of the gross proceeds and issued the agent 560,000 Class B Warrants, bringing the total number of Class B Warrants issued to the Agent to 949,500.

Board and Management Team Enhancements

On January 10, 2006, the Company entered into a management consulting contract with Mr. James Barker designating him as the Project Manager for the 2006 Chandalar exploration program.

On February 13, 2006, the Board of Directors of the Company elected Mr. William Schara as a director to fill a director vacancy created by the September 13, 2005 resignation of Mr. Jackie Stephens.

On March 1, 2006, the Board of Directors appointed Ted R. Sharp as Chief Financial Officer, Secretary, and Treasurer of the Company. The Company entered into a management consulting contract with Mr. Sharp, engaging him on a part-time basis. In connection with Mr. Sharp's appointment, the Company issued 25,000 shares of Restricted Common Stock and 50,000 Stock Options under the Restated 2003 Share Incentive Plan.

Also on March 1, 2006, the Board of Directors approved the appointment of Mr. Bob Pate as Vice President. The Company entered into a management consulting contract with Mr. Pate, engaging him on a part-time basis. In connection with Mr. Pate's appointment, the Company issued 25,000 shares of Restricted Common Stock and 50,000 Stock Options under the Restated 2003 Share Incentive Plan.

On March 6, 2006, the Company contracted with Ms. Susan Schenk as Manager of Investor Relations to assist in improving awareness of Little Squaw in equity markets. The Company entered into a management consulting contract with Ms. Schenk, engaging her on a part-time basis. In connection with Ms. Schenk's appointment, the Company issued 25,000 shares of Restricted Common Stock and 50,000 Stock Options under the Restated 2003 Share Incentive Plan.

Purchase of Equipment

With the completion of the private placements in 2005 and in 2006, the Company is aggressively implementing its drilling plans for the Chandalar property. In the first quarter of 2006, the Company has paid \$349,215 in cash for capital equipment to support the 2006 summer exploration season.

Little Squaw Gold Mining Company**Notes to Financial Statements (Unaudited)****1.****BASIS OF PRESENTATION:**

The unaudited financial statements have been prepared by the Company in accordance with accounting principles generally accepted in the United States of America for interim financial information, as well as the instructions to Form 10-QSB. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of the Company's management, all adjustments (consisting of only normal recurring accruals) considered necessary for a fair presentation of the interim financial statements have been included. Operating results for the six-month period ended June 30, 2006 are not necessarily indicative of the results that may be expected for the full year ending December 31, 2006.

For further information refer to the financial statements and footnotes thereto in the Company's Annual Report on Form 10-KSB for the year ended December 31, 2005.

Net Loss Per Share

Statement of Financial Accounting Standards No. 128, Earnings per Share, requires dual presentation of basic earnings per share (EPS) and diluted EPS on the face of all income statements issued after December 15, 1997, for all entities with complex capital structures. Basic EPS is computed as net income divided by the weighted average number of common shares outstanding for the period. Diluted EPS reflects the potential dilution that could occur from common shares issuable through stock options, warrants, and other convertible securities. The dilutive effect of convertible and exercisable securities would be:

<u>For periods ended</u>	June 30, 2006	December 31, 2005	June 30, 2005
Stock Options	440,000	320,000	320,000

Warrants	9,597,000	4,200,000	-
Convertible debenture	5,000,000	5,000,000	-
Total possible dilution	15,037,000	9,520,000	320,000

For the periods ended June 30, 2006 and 2005, the effect of the Company's outstanding options and common stock equivalents would have been anti-dilutive. Accordingly, only basic EPS is presented.

2.

RECLASSIFICATIONS:

The Statement of Operations presented herein contains reclassifications of expenses for the periods ended June 30, 2005 and Inception to Date (March 26, 1959) through June 30, 2006 to conform to revisions in the Company's financial reporting. The nature of these reclassifications was to segregate Exploration Expenses and report them as a separate item on the Statement of Operations. These reclassifications had no effect on the reported Net Loss or Loss per Share for the periods.

Little Squaw Gold Mining Company

Notes to Financial Statements (Unaudited)

3.

2003 SHARE INCENTIVE PLAN:

Stock-Based Compensation:

As of January 1, 2006, the Company adopted Statement of Financial Accounting Standards No. 123 (revised 2004), Share-Based Payment (SFAS 123(R)), which requires the measurement of the cost of employee services received in exchange for an award of an equity instrument on the grant-date fair value of the award. The Company has chosen to use the modified prospective transition method under SFAS 123(R). The Company's Financial Statements for the six months ended June 30, 2006 reflect the impact of this adoption.

In accordance with the modified prospective transition method, the Company's unaudited consolidated financial statements for prior periods have not been restated to reflect the impact of SFAS 123(R). Stock-based non-cash compensation expense recognized under SFAS 123(R) for the six months ended June 30, 2006 was \$58,715, which is the total weighted average grant-date fair value of the options granted and vested during the period, and was recorded to Professional services and Other general and administrative expenses in the Unaudited Statement of Operations. The effect of the adoption of SFAS 123(R) on basic loss per share was nil.

During the six months ended June 30, 2005, the Company recognized no stock based compensation nor reported the pro forma effect of any stock based compensation expense as no stock based awards were made.

Stock Options:

Under the Company's Restated 2003 Share Incentive Plan (the Plan), options to purchase shares of common stock may be granted to key employees, contract management and directors of the Company. The Plan permits the granting of nonqualified stock options, incentive stock options and shares of common stock. Upon exercise of options, shares of common stock are issued from the Company's treasury stock or, if insufficient treasury shares are available, from authorized but unissued shares. Options are granted at a price equal to the closing price of the common stock on the

date of grant. The stock options are generally exercisable immediately upon grant and for a period of 10 years. In the event of cessation of the holder's relationship with the Company, the holder's exercise period terminates 6 months following such cessation. A total of 1,200,000 shares are authorized under the Plan, of which 425,000 restricted common shares have been issued and are included in the outstanding shares of the Company.

Prior to January 1, 2006, the Company applied Accounting Principles Board Opinion No. 25, Accounting for Stock Issued to Employees in accounting for stock-based employee compensation arrangements whereby compensation cost related to stock options was generally not recognized in determining net income and the pro forma impact of compensation cost related to stock options was disclosed. No stock options were issued in the six-month period ended June 30, 2005, therefore no compensation cost related to stock options was disclosed for that period.

Little Squaw Gold Mining Company

Notes to Financial Statements (Unaudited)

3.

2003 SHARE INCENTIVE PLAN, CONTINUED:

For the period ended June 30, 2006, the fair value of stock options was estimated at the date of grant using the Black-Scholes option pricing model, which requires the use of highly subjective assumptions, including the expected volatility of the stock price, which may be difficult to estimate for small business issuers traded on micro-cap stock exchanges. The fair value of each option grant was estimated on the grant date using the following weighted average assumptions:

Risk-free interest rate

4.58% - 4.79%

Expected dividend yield

--

Expected term

10 years

Expected volatility

109% - 128%

The risk-free interest rate is based on the U.S. Treasury yield curve at the time of the grant. The expected term of stock options granted is the 10-year life of the grant. The expected volatility is based on historical volatility.

A summary of stock option transactions for the six months ended June 30, 2006 is as follows:

	Shares	Weighted-Average Exercise Price (per share)	Weighted Average Remaining Contractual Term (Years)
Options outstanding at the beginning of the period	320,000	\$ 0.22	
Granted	200,000	\$ 0.55	
Exercised	(25,000)	\$ 0.22	
Forfeited	(55,000)	\$ 0.22	
Options outstanding at the end of the period	440,000	\$ 0.36	8.9
Options exercisable at the end of the period	440,000	\$ 0.36	8.7
Options available for future grants	435,000		

The weighted average grant-date fair value of stock options granted during the six months ended June 30, 2006 was \$0.90 per share. The aggregate intrinsic value of vested options at June 30, 2006 was \$409,150 at a price of \$1.30 per exercisable share.

Little Squaw Gold Mining Company

Notes to Financial Statements (Unaudited)

4.

STOCKHOLDERS EQUITY:

Common Stock and Stock Warrants

On November 7, 2005 the Board of Directors approved an equity financing of up to \$2,000,000 of Company securities at a price equal to or greater than the terms of the November 21, 2005 Convertible Debenture. On January 31, 2006, the Company closed the first tranche of 3,895,000 Units, at a price of \$0.25 per Unit for gross proceeds of \$973,750 and net proceeds of \$876,375. Each Unit consisted of one share of common stock and one half of one (1/2) Class B Warrant. Each whole Class B Warrant is exercisable at the option of the holder to acquire one additional share of common stock at an exercise price of \$0.35 per share during the one-year period commencing on the Closing Date, \$0.50 per share during the second year following the Closing Date, and \$0.65 per share during the third year following the Closing Date. Additionally, each Class B Warrant contains a mandatory conversion provision which grant the Company, at the Company's option, the ability to force conversion of each whole Warrant if the market price of the Company's common shares is sustained at or above \$0.875 per share for five consecutive trading days. In connection with this portion of the placement, the Company paid an Agent's commission of 10% of the gross proceeds and issued the agent 389,500 Class B Warrants.

On February 24, 2006, the Company closed the second tranche of an additional 5,600,000 Units, at a price of \$0.25 per Unit for gross proceeds of \$1,400,000 and net proceeds of \$1,260,000. This second closing brought the total gross proceeds received to \$2,373,750, net proceeds to \$2,136,375 and the total Units sold to 9,495,000, including an oversubscription of 1,495,000 Units which was approved by the Board of Directors on February 13, 2006. Each Unit consisted of one share of the registrant's common stock and one half of one (1/2) Class B Warrant. The Units of this second closing are identical to those of the first closing on January 31, 2006. In connection with this portion of the placement, the Company paid an Agent's commission of 10% of the gross proceeds and issued the agent 560,000 Class B Warrants, bringing the total number of Class B Warrants issued to the Agent to 949,500.

Stock and Option Grants to Affiliates

On March 1, 2006, the Board of Directors approved the appointment of an individual as Vice President. In connection with that appointment, the Company issued 25,000 shares of Restricted Common Stock and 50,000 Stock Options under the Restated 2003 Share Incentive Plan.

On March 1, 2006, the Board of Directors appointed an individual as Chief Financial Officer, Secretary, and Treasurer of the Company. In connection with that appointment, the Company issued 25,000 shares of Restricted Common Stock and 50,000 Stock Options under the Restated 2003 Share Incentive Plan.

On March 6, 2006, the Company contracted with a Manager of Investor Relations. In connection with that appointment, the Company issued 25,000 shares of Restricted Common Stock and 50,000 Stock Options under the Restated 2003 Share Incentive Plan.

On March 29, 2006, the Board of Directors issued to a director 50,000 shares of Restricted Common Stock and 50,000 Stock Options under the Restated 2003 Share Incentive Plan in connection with his appointment as a director on February 13, 2006.

GLOSSARY OF TERMS

ADIT:

An opening driven horizontally into the side of a mountain or hill for providing access to a mineral deposit.

ALTERED ROCKS:

Bedrock wherein the minerals constituting it have been wholly or partially converted to other minerals, commonly chlorite or sericite, by the action or cooking of hot gasses and water (hydrothermal fluids) rising from deep within the earth.

ASSAY:

A chemical test performed on a sample of ores or minerals to determine the amount of valuable metals contained within the sample.

AUREOLES:

A zone surrounding an igneous or quartz intrusion in which the character of the surrounding rock has been altered by heat and introduced hot liquids.

AURIFEROUS:

Said of a substance or mineral-bearing deposit that contains gold.

BRECCIA:

A rock in which angular fragments are surrounded by a mass of fine-grained minerals.

DEVELOPMENT:

Work carried out for the purpose of opening up a mineral deposit and making the actual ore extraction possible.

DISSEMINATED ORE:

Ore carrying small particles of valuable minerals spread more or less uniformly through the host rock.

DRIFT:

A horizontal underground opening that follows along the length of a vein or rock formation as opposed to a cross-cut which crosses the rock formation.

EXPLORATION:

Work involved in searching for ore, usually by employing the science of geology and drilling or driving a drift.

EXPLORATION STAGE:

A U.S. Security and Exchange Commission descriptive category applicable to public mining companies engaged in the search for mineral deposits and ore Reserves and which are not either in the mineral development or the ore production stage.

FERRICRETE:

A soil zone more or less cemented by iron oxide.

FOOTWALL:

The rock on the underside of a vein or ore structure.

FRACTURE:

A break in the rock, the opening of which allows mineral bearing solutions to enter. A cross-fracture is a minor break extending at more-or-less right angles to the direction of the principal fractures.

GEOPHYSICAL

SURVEY:

Indirect methods of investigating the subsurface geology using the applications of physics including electric, gravimetric, magnetic, electromagnetic, seismic, and radiometric principles.

GRADE:

The average assay of a ton of ore, reflecting metal content.

HANGING WALL:

The rock on the over side of a vein or ore structure.

HIGH GRADE:

A subjective term said of ore containing a relatively high mineral content, often in reference to possible ores that are of relatively high value compared to those of medium or low value from within the same mineral deposit or body of mineralization. High grade ores are those generally requiring selective mining methods. As used herein, the term is applied to ore that contains one ounce or more of gold per ton.

HYDROTHERMAL:

Said of magmatic (molten rock) emanations high in water content and the rocks, mineral deposits, alteration products and springs produced by them.

INLIER CLAIMS:

Mining claims of others that lie within, or are enclosed by, a block of many claims owned by another.

LODE:

A mineral deposit consisting of a zone of veins, disseminations or breccias in consolidated rock, as opposed to placer deposits.

LOW GRADE:

A subjective term said of rock containing a relatively low ore-mineral content, often in reference to possible ores that are of relatively low value compared to those of medium or high value from within the same mineral deposit, or body of mineralization. Low grade ores are those often amenable to bulk mining methods. As used herein, the term is applied to rock that contains one tenth ounce or less of gold per ton.

MESOTHERMAL:

Said of a mineral deposit formed at moderate to high temperatures and moderate to high pressures by deposition from hydrothermal fluids at considerable depth within the earth.

METAMORPHIC

ROCKS:

Rocks which have undergone a change in texture and composition as the result of heat and pressure from having been buried deep in the earth.

MILL:

A processing plant that extracts and produces a concentrate of the valuable minerals or metals contained in an ore. The concentrate must then be treated in some other type of plant, such as a smelter, to affect recovery of the pure metal, recovery being the percentage of valuable metal in the ore that is recovered by metallurgical treatment.

RESERVES:

Identified resources of mineral-bearing rock from which the mineral can be extracted profitably with existing technology and under present economic conditions.

MINE:

An underground or surface excavation for the extraction of mineral deposits.

MINERAL:

A naturally occurring inorganic element or compound having an orderly internal structure and characteristic chemical composition, crystal form, and physical properties.

MINERAL RESERVE:

The economically mineable part of a measured or indicated mineral resource. Appropriate assessments, often called *feasibility studies*, have been carried out and include consideration of and modification by realistically assumed mining, metallurgical, economic, marketing, legal, environmental, social, and governmental factors. These assessments demonstrate, at the time of reporting, that extraction is reasonably justified. Mineral reserves are sub-divided, in order of increasing confidence, into *probable* and *proven* categories. A *probable* reserve is the economically mineable part of an *indicated* (and in certain circumstances, *measured*) resource. A *proven* reserve is the economically mineable part of a *measured* resource.

MINERAL

RESOURCE:

A deposit or concentration of natural, solid, inorganic or fossilized organic substance in such quantity and at such grade or quality that extraction of the material at a profit is potentially possible.

MINERALIZED

MATERIAL or

DEPOSIT:

A mineralized body, which has been delineated by appropriate drilling and/or underground sampling to support a sufficient tonnage and average grade of metal(s). Under SEC standards, such a deposit does not qualify as a reserve until a comprehensive evaluation, based upon unit cost, grade, recoveries, and other factors, conclude current economic feasibility to extract it.

MINERALIZATION:

The presence of economic minerals in a specific area or geological formation.

ORE:

Material that can be mined and processed at a positive cash flow under current economic circumstances.

PATENTED

MINING CLAIM:

A mineral claim originally staked on land owned by in the United States Government, where all its associated mineral rights have been secured by the claimant from the U.S. Government in compliance with the laws and procedures relating to such claims, and title to the surface of the claim and the minerals beneath the surface have been transferred from the U.S. Government to the claimant. Annual mining claim assessment work is not required, and the claim is taxable real estate. Mining claims located on State of Alaska lands cannot be patented.

PLACER:

A place where gold or other heavy minerals are or can be obtained by washing sand or gravel. Placer deposits are formed by attrition by river or stream action of the lighter rocks leaving the relatively inert, tough, and heavy minerals in a concentrated layer, generally along the contact of the alluvial material with the underlying bedrock.

PROSPECT:

An area that is a potential site of mineral deposits, based on preliminary exploration. A prospect is distinct from a mine in that it is non-producing.

PROSPECTING:

The search for outcrops or other surface expressions of mineral deposits with the objective of making a valuable discovery.

RECLAMATION:

The restoration of a site to acceptable regulatory standards after mining or exploration activity is completed.

RECOVERY:

The percentage of valuable metal in the ore that is recovered by metallurgical treatment.

RESERVES:

That part of a mineral deposit, which could be economically and legally extracted or produced at the time of the reserve determination. Reserves are customarily stated in terms of Ore when dealing with metalliferous minerals.

RESOURCE:

The calculated amount of material in a mineral deposit, based on limited drill information.

SEC INDUSTRY

GUIDE 7:

This is the United States reporting standard for the mining industry for securities purposes. It is contained in a publication of the United States Security and Exchange Commission (SEC) known as Industry Guide 7, which summarizes requirements for disclosure by mining companies. It defines proven and probable Reserves using its own definitions, and prohibits the disclosure of quantitative estimates for all mineralization other than in those two Reserve categories. Similarly, it restricts disclosure of value of estimates to Reserves only, which the SEC policy generally requires to be on a historic cost accounting basis.

SHEAR or SHEARING:

The deformation of rocks by lateral movement along numerous parallel planes, known as faults, generally resulting from stress or pressure and producing such metamorphic structures as cleavage and schistosity.

STRIKE:

The direction, or bearing from true north, of a vein or rock formation measured on a horizontal surface.

TAILINGS:

Fine grained or ground up material rejected from a mill after more of the recoverable valuable minerals have been extracted. Can also mean the waste material resulting from placer mining.

UNPATENTED

MINING CLAIM:

A mineral claim staked on federal, state or, in the case of severed mineral rights, private land to which a deed from the U.S. Government or other mineral title owner has not been received by the claimant. Unpatented claims give the claimant the exclusive right to explore for and to develop the underlying minerals and use the surface for such purpose. However, the claimant does not own title to either the minerals or the surface, and the claim is subject to annual assessment work requirements and the payment of annual rental fees which are established by the governing authority of the land on which the claim is located. The claim may or may not be subject to production royalties payable to that governing authority. Mining claims located on State of Alaska lands cannot be deeded to the claimant.

VEIN:

A zone or belt of mineralized rock having a more or less regular constitution in length, width and depth, and lying within boundaries which clearly separates it from neighboring rock.

VEINLET:

A tiny vein, stringer or filament of mineral (commonly quartz) traversing a rock mass of different material, and usually one of a number making a Lode.
