ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The information presented here should be read in conjunction with China Mobility Solutions, Inc.'s consolidated financial statements and related notes. In addition to historical information, the following discussion and other parts of this document contain certain forward-looking information. When used in this discussion, the words "believes," "anticipate," "expects," and similar expressions are intended to identify forward-looking statements. Such statements are subject to certain risks and uncertainties, which could cause actual results to differ materially from those projected due to a number of factors beyond the Company's control. The Company does not undertake to publicly update or revise any of its forward-looking statements even if experience or future changes show that the indicated results or events will not be realized. Readers are cautioned

Edgar Filing: CHINA MOBILITY SOLUTIONS, INC. (formerly Xin Net Corp.) - Form 10QSB/A

not to place undue reliance on these forward-looking statements, which speak only as of the date hereof. Readers are also urged to carefully review and consider the Company's discussions regarding the various factors, which affect its business, included in this section and elsewhere in this report.

CRITICAL ACCOUNTING POLICIES

Our discussion and analysis is based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, we evaluate our estimates, including those related to revenue recognition, accounts receivable and allowance for doubtful accounts, intangible and long-lived assets, and income taxes. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

An accounting policy is deemed to be critical if it requires an accounting estimate to be made based on assumptions about matters that are highly uncertain at the time the estimate is made, and if different estimates that reasonably could have been used or changes in the accounting estimate that are reasonably likely to occur could materially change the financial statements. We believe the following critical accounting policies reflect our more significant estimates and assumptions used in the preparation of our consolidated financial statements:

The Company had cash capital of \$5,843,782 at the quarter ended June 30, 2005. The Company has no other capital resources other than the ability to use its common stock to achieve additional capital raising. Other than cash capital, its other assets would be illiquid.

5

Need for Additional Financing:

The Company believes it has sufficient capital to meet its short-term cash needs, including the costs of compliance with the continuing reporting requirements of the Securities Exchange Act of 1934. However, if losses occur it may have to seek loans or equity placements to cover longer term cash needs to continue operations and expansion.

No commitments to provide additional funds have been made by management or other stockholders. Accordingly, there can be no assurance that any additional funds will be available to the Company to allow it to cover operations expenses.

If future revenue declines, or operations are unprofitable, it will be forced to develop another line of business, or to finance its operations through the sale of assets it has, or enter into the sale of stock for additional capital, none of which may be feasible when needed. The Company has no specific management ability, or financial resources or plans to enter any other business as of this date.

From the aspect of whether it can continue toward the business goal of maintaining and expanding the businesses in Canada and grow the new business of mobile marketing services in China, it may use all of its available capital without generating a profit.

The effects of inflation have not had a material impact on its operation, nor is it expected to in the immediate future.

Market Risk:

The Company does not hold any derivatives or investments that are subject to market risk. The carrying values of any financial instruments, approximate fair value as of those dates because of the relatively short-term maturity of these instruments which eliminates any potential market risk associated with such

instruments.

Future Trends:

For the Education Services side, we have operated for over two years now, the competition is very fierce in the market. The Canadian government has tightened its budget on English training for new immigrants, which lead to a termination of government funding for Windsor, and this change had negative effects to the revenue of Windsor Education Academy.

The Company has experienced growth in revenues in its Quicknet services, and it anticipates future growth in revenues although China must always be viewed as a highly competitive market where profitability may be difficult to achieve or sustain.
