-
- a. *U.S. Pharmaceutical Sales.* These amounts represent proprietary hospital pharmaceuticals, such as the anesthesia agent, Ultane[®] (sevoflurane); neuromuscular blockers and pain management products; as well as the vitamin D therapy, Zemplar[®] (paricalcitol injection), that were part of U.S. Hospital Products Sales in 2003.
- b. *U.S. Hospital Products Sales.* Most of this business segment is expected to be spun off as the major operating component of Hospira, with the remainder moving to U.S. Pharmaceutical Sales and Other Sales as described in footnotes a and d. Prior to the expected spin-off, only the domestic core hospital businesses that are expected to be spun off to Hospira are reported in U.S. Hospital Products Sales.
- c. *International Division Sales.* No reporting changes have been made to Abbott's international hospital business prior to the expected spin-off. After the spin-off, we will continue to report sales for the International Division by its pharmaceuticals and nutritional components. The pharmaceuticals component will include the reclassification of the hospital pharmaceuticals that were included in the hospital component in 2003. The nutritional component of the international division will be unchanged. Please note that after the spin-off, we will include these reclassifications in an 8-K that will reflect Abbott's final segment reporting structure.
- d. *Other Sales.* Abbott will retain, as part of the Medical Products Group, Abbott Vascular Devices and Spinal Concepts. Both of these businesses were previously part of U.S. Hospital Products Sales. For segment reporting purposes, these businesses are now included in Other Sales.
