**TESSCO Technologies Incorporated**

**Notes to Consolidated Financial Statements**

**September 30, 2007**

(Unaudited)

*Note 1. Description of Business and Basis of Presentation*

## Edgar Filing: TESSCO TECHNOLOGIES INC - Form 10-Q

TESSCO Technologies Incorporated, a Delaware corporation (TESSCO or the Company), is a leading provider of integrated product and supply chain solutions to the professionals that design, build, run, maintain and use wireless, mobile, fixed and in-building systems. The Company provides marketing and sales services, knowledge and supply chain management, product-solution delivery and control systems utilizing extensive Internet and information technology. Approximately 97% of the Company's sales are made to customers in the United States. The Company takes orders in several ways, including phone, fax, online and through electronic data interchange.

In management's opinion, the accompanying interim financial statements of the Company include all adjustments, consisting only of normal, recurring adjustments, necessary for a fair presentation of the Company's financial position for the interim periods presented. These statements are presented in accordance with the rules and regulations of the Securities and Exchange Commission (SEC). Certain information and footnote disclosures normally included in the Company's annual financial statements have been omitted from these statements, as permitted under the applicable rules and regulations. The results of operations presented in the accompanying interim financial statements are not necessarily representative of operations for an entire year. The information included in this Form 10-Q should be read in conjunction with the financial statements and notes thereto included in the Company's Form 10-K for the fiscal year ended April 1, 2007.

### *Note 2. Recently Issued Accounting Pronouncements*

## Edgar Filing: TESSCO TECHNOLOGIES INC - Form 10-Q

In September 2006, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standard (SFAS) No. 157, Fair Value Measurements, which provides guidance for using fair value to measure assets and liabilities. The standard also responds to investors requests for expanded information about the extent to which companies measure assets and liabilities at fair value, the information used to measure fair value, and the effect of fair value measurements on earnings. The standard applies whenever other standards require (or permit) assets or liabilities to be measured at fair value. The standard does not expand the use of fair value in any new circumstances. SFAS No. 157 is effective for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. The Company is reviewing SFAS No. 157 to determine the impact of adoption on its financial statements.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities Including an Amendment of FASB Statement No. 115. SFAS No. 159 permits an entity to measure many financial instruments and certain other items at fair value that are not currently required to be measured at fair value. Entities that elect the fair value option will report unrealized gains and losses in earnings at each subsequent reporting date. SFAS No. 159 is effective for fiscal years beginning after November 15, 2007. The Company is reviewing SFAS No. 159 to determine the impact of adoption on its financial statements.

### **Note 3. Borrowings Under Revolving Credit Facility and Long-Term Debt**

Edgar Filing: TESSCO TECHNOLOGIES INC - Form 10-Q

*On May 31, 2007, the Company replaced its previously existing \$30 million revolving line of credit facility with a new \$50 million revolving line of credit facility with SunTrust Bank and Wachovia Bank, N.A. The previous facility was established in September 2003 and had a term expiring in September 2007, was unsecured and had provided for monthly payments of interest accruing at a LIBOR rate plus an applicable margin ranging from 1.5% to 2.0%. The new facility has a term expiring in May 2010, with interest also payable monthly at a LIBOR rate plus an applicable margin, which ranges from 1.25% to 2.75%. Like the replaced facility, borrowing availability under this new facility is determined in accordance with a borrowing base. This new facility includes financial covenants, including a minimum tangible net worth, minimum cash flow coverage of debt service, and a maximum funded debt to EBITDA ratio. These financial covenants also apply to the existing term loan secured by the Company's Hunt Valley, Maryland facility. The new facility also limits the Company's ability to engage in certain transactions or activities, including (but not limited to) investments and acquisitions, sales of assets, payment of dividends, issuance of additional debt and other matters. At*

On May 31, 2007, the Company replaced its previously existing \$30 million revolving line of credit facility with a new

On May 31, 2007, the Company replaced its previously existing \$30 million revolving line of credit facility with a new

*September 30, 2007, the Company had a balance of \$4.4 million outstanding on its current revolving line of credit facility. At April 1, 2007, the Company had no outstanding balance on its revolving line of credit facility.*

*Note 4. Stock Compensation*

## Edgar Filing: TESSCO TECHNOLOGIES INC - Form 10-Q

The Company's selling, general and administrative expenses for the fiscal quarter and six months ended September 30, 2007 includes \$502,900 and \$1,079,700, respectively, of stock compensation expense. The Company's selling, general and administrative expenses for the fiscal quarter and six months ended September 24, 2006 includes \$462,400 and \$991,900, respectively, of stock compensation expense. Stock compensation expense is primarily related to our Performance Stock Unit (PSU) Program. In addition, the Company recorded an excess tax benefit directly to shareholders' equity of \$1,134,000, primarily related to the 164,831 PSUs which vested during the six months ended September 30, 2007.

**Performance Stock Units:** The following table summarizes the activity under the Company's PSU program:

	2007	Weighted Average Fair Value at Grant
Shares available for issue under outstanding PSUs, non-vested beginning of period	870,172	\$ 10.15
Granted	183,000	24.11
Vested	(164,831)	10.67
Forfeited/cancelled	(454,310)	9.25
Shares available for issue under outstanding PSUs, non-vested end of period	434,031	16.78

Of the 434,031 shares available for issuance under outstanding PSUs but not yet vested as of September 30, 2007, 251,031 shares have been earned, and assuming the respective participants remain employed by or associated with the Company on these dates, these shares will vest and be issued on or about May 1 of 2008, 2009 and 2010.

The vast majority of the PSUs cancelled during fiscal year 2008, 449,701 shares, related to the 2005 grant of PSUs which had a 3-year measurement period. During that period, actual earnings per share on a cumulative basis exceeded the threshold level, but did not reach the goal level, and thus, the underlying shares not earned from those PSUs were cancelled. Per the provisions of the 1994 Stock and Incentive Plan, the shares related to these PSUs were added back to the Plan and became available for future issuance.

During fiscal year 2008, the Compensation Committee of the Board of Directors, with the concurrence of the full Board of Directors, granted additional PSUs to selected key individuals and Directors, providing them with the opportunity to earn up to 183,000 additional shares of the Company's common stock in the aggregate, depending upon whether certain threshold or goal earnings per share targets are met, subject to individual performance for non-Director employees. These PSUs have only one measurement year (fiscal year 2008), with any shares earned at the end of fiscal year 2008 to vest 25% on or about May 1 of 2008, 2009, 2010 and 2011, provided that the participant remains employed by or associated with the Company on each such date.

As of September 30, 2007, there was approximately \$2.0 million of total unrecognized compensation costs related to PSUs. If the maximum target of PSUs outstanding were assumed to be earned, total unrecognized compensation costs would be approximately \$6.4 million.

**Stock Options:** In accordance with SFAS No. 123R, the fair value of the Company's stock options have been determined using the Black-Scholes-Merton option pricing model, based upon facts and assumptions existing at the date of grant. Stock options granted have exercise prices equal to the market price of the Company's common stock on the grant date.

The value of each option at the date of grant is amortized as compensation expense over the option service period. This occurs without regard to subsequent changes in stock price, volatility or interest rates over time, provided that the option remains outstanding. As of September 30, 2007, all outstanding stock options are fully vested. The following table summarizes the pertinent option information for outstanding options for the six months ended September 30, 2007:

	Shares	Weighted Average Exercise Price
Outstanding, beginning of period	185,000	\$ 8.07
Granted		
Exercised	(50,000)	7.33
Cancelled		
Outstanding and exercisable, end of period	135,000	8.34

***Note 5. Acquisition***

## Edgar Filing: TESSCO TECHNOLOGIES INC - Form 10-Q

On July 2, 2007, the Company acquired the net assets and business of NetForce Solutions, Inc. (NetForce), a provider of technical and sales training solutions to wireless, telecommunications, and networking industries. The purchase included substantially all the non-cash business assets for an initial cash payment of approximately \$650,000 and additional cash earn-out payments of up to approximately \$2.8 million over a four-year period, contingent on the achievement of certain earnings thresholds. The unaudited revenues earned by NetForce for calendar year 2006, prior to the acquisition, amounted to less than 1 percent of the amount of the Company's total revenue for fiscal year 2007.

The Company has included the financial results of NetForce in its consolidated financial statements beginning July 2, 2007 (Acquisition Date). Pro forma results have not been presented as the impact of the acquisition is not material and did not involve a significant amount of assets. This business is included in the installation, test and maintenance segment.

*For the period of July 2, 2007 through September 30, 2007, no additional earn-out has been accrued, because applicable annual fiscal year 2008 targets have not been met as of September 30, 2007.*

*Note 6. Income Taxes*

## Edgar Filing: TESSCO TECHNOLOGIES INC - Form 10-Q

Effective April 2, 2007, the Company adopted FASB Interpretation No. 48 (FIN 48), Accounting for Uncertainty in Income Taxes. As a result of the adoption of FIN 48, the Company recognized a \$72,100 decrease in beginning retained earnings as of April 2, 2007. As of April 2, 2007, the Company had total gross unrecognized tax benefits of approximately \$319,000, all of which, if recognized, would favorably affect the effective income tax rate in future periods. It is reasonably possible that within the next twelve months the Company's unrecognized tax benefits related to certain state tax issues and the timing of certain deductions may decrease by approximately \$200,000, as a result of the expiration of statutes of limitations. During the fiscal quarter ended September 30, 2007, there were no material increases or decreases in unrecognized tax benefits.

The Company's historical accounting policy with respect to interest and penalties related to tax uncertainties has been to classify these amounts as income taxes, and the Company continued this classification upon the adoption of FIN 48. As of April 2, 2007, the total amount of accrued interest and penalties related to uncertain tax positions recognized in the consolidated balance sheet was \$26,200. The total amount of interest and penalties related to tax uncertainties recognized in the statement of income for the fiscal quarter and six months ended September 30, 2007 was \$25,800 and \$36,100, respectively.

The Company files income tax returns in the U.S. federal, state and local jurisdictions. Income tax returns filed for fiscal years 2003 and earlier are no longer subject to examination by U.S. federal, state and local tax authorities. No federal, state and local income tax returns are currently under examination. Certain income tax returns for fiscal years 2004 through 2006 remain open to examination by U.S. federal, state and local tax authorities.

*Note 7. Earnings Per Share*

## Edgar Filing: TESSCO TECHNOLOGIES INC - Form 10-Q

The dilutive effect of all options and PSUs outstanding has been determined by using the treasury stock method. The weighted average shares outstanding is calculated as follows:

	Fiscal Quarters Ended		Six Months Ended	
	September 30, 2007	September 24, 2006	September 30, 2007	September 24, 2006
Basic weighted average common shares outstanding	5,328,100	6,155,300	5,374,400	6,213,000
Effect of dilutive common stock equivalents outstanding	210,500	182,700	242,100	162,800
Diluted weighted average common shares outstanding	5,538,600	6,338,000	5,616,500	6,375,800

As of September 30, 2007, stock options with respect to 135,000 shares of common stock were outstanding. All outstanding options and earned but unvested PSUs were included in the computation of diluted earnings per share because all such instruments were dilutive.

### *Note 8. Business Segments*

## Edgar Filing: TESSCO TECHNOLOGIES INC - Form 10-Q

The Company evaluates revenue, gross profit and inventory in three business segments: (1) Network infrastructure products, which are used to build, repair and upgrade wireless telecommunications, computing and Internet networks, and generally complement radio frequency transmitting and switching equipment provided directly by original equipment manufacturers (OEMs); (2) Mobile devices and accessory products, which include data devices, pagers and two-way radios and related accessories such as replacement batteries, cases, speakers, mobile amplifiers, power supplies, headsets, mounts, car antennas and various wireless data devices; and (3) Installation, test and maintenance products, which are used to install, tune, maintain and repair wireless communications equipment. Within the mobile devices and accessory products line of business, the Company sells to both commercial and consumer markets. The network infrastructure and installation, test and maintenance lines of business sell primarily to commercial markets. Beginning in fiscal year 2008, the Company expanded its regular review within each segment from three to four customer categories. These categories are: (1) commercial public carriers and network operators; (2) commercial resellers; (3) commercial self-maintained users and governments; and (4) consumers. These categories are described further below:

Commercial Public Carriers and Network Operators. Public carriers and network operators include systems operators that are generally responsible for building and maintaining the infrastructure system and provide airtime service to individual subscribers.

Commercial Resellers. Resellers include dealers and resellers that sell, install and service cellular telephone, paging and two-way radio communications equipment primarily for the consumer and small business markets. These resellers include local and national proprietorships and retailers, as well as sales and installation centers operated by cellular and paging carriers.

Commercial Self-Maintained Users and Governments. Self-maintained users (SMUs) and government customers include commercial entities such as major utilities and transportation companies, repair centers, and federal agencies and state and local governments, including public safety organizations.

Consumers. Consumers include customers that buy through any affinity partner relationships or directly from our consumer website, YourWirelessSource.comTM.

The Company measures segment performance based on segment gross profit. The segment operations develop their product offering, pricing and strategies, which are collaborative with one another and the centralized sales and marketing function. Therefore, the Company does not segregate assets, other than inventory, for internal reporting, evaluating performance or allocating capital. Product delivery revenue and certain cost of sales expenses have been allocated to each segment based on a percentage of revenues and/or gross profit, as applicable. The Company's goodwill at September 30, 2007 relates to acquisitions within its network infrastructure line of business.

**Note 9. Stock Buyback**

## Edgar Filing: TESSCO TECHNOLOGIES INC - Form 10-Q

On April 28, 2003, the Company's Board of Directors approved a stock buyback program, authorizing the purchase of up to 675,000 shares of its outstanding common stock. On October 20, 2005 and July 17, 2006, the Board of Directors amended the program, authorizing the purchase of an additional 675,000 and 600,000 shares, respectively, of outstanding common stock. On July 26, 2007 and August 14, 2007, the Board of Directors authorized the purchase of an additional 144,867 and 300,700 shares, respectively, of outstanding common stock under the stock buyback program. After accounting for the actions of the Board of Directors in authorizing the purchase of the additional shares, a total of 2,395,567 shares have been authorized for repurchase. Shares may be purchased from time to time in the open market, by block purchase, or through negotiated transactions, or possibly other transactions managed by broker-dealers. No time limit has been set for completion of the program. As of September 30, 2007, the Company had purchased 2,140,974

shares for approximately \$28.3 million, or an average of \$13.20 per share. Of the total shares repurchased, 346,107 shares had been repurchased in the first six months of fiscal year 2008 at an average price of \$13.96 per share.

*Note 10. Customer Concentration*

## Edgar Filing: TESSCO TECHNOLOGIES INC - Form 10-Q

The Company's future results could be negatively impacted by the loss of certain customer and/or vendor relationships. For the fiscal quarter and six months ended September 30, 2007, sales of products to the Company's top customer relationship, AT&T Mobility (formerly Cingular Wireless LLC), accounted for 25% of total revenues and 21% and 22% of total gross profits, respectively. For the fiscal quarter and six months ended September 30, 2007, sales of products related to the Company's top vendor relationship, the Nokia Inc. (Nokia) repair and replacement component relationship, accounted for 9% of total revenues and 7% and 8% of total gross profits, respectively. The Nokia relationship is a complete supply chain relationship and, therefore, the Company has no alternative sources of supply, and the Company's purchases, and ultimately its resale of these products, is dependent upon the continuation of the Nokia relationship. The Company also sells products other than Nokia repair and replacement materials to many of these customers. Absent this arrangement with Nokia, the Company would maintain the ability to sell these other products to these customers.

**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.**

This commentary should be read in conjunction with the Management's Discussion and Analysis of Financial Condition and Results of Operations from the Company's Form 10-K for the fiscal year ended April 1, 2007.

**Business Overview and Environment**

TESSCO Technologies Incorporated (TESSCO or the Company) is a leading provider of integrated product and supply chain solutions to the professionals that design, build, run, maintain and use wireless mobile, fixed and in-building systems. Although we sell products to customers in over 100 countries, approximately 97% of our sales are made to customers in the United States. We have operations and office facilities in Hunt Valley, Maryland, Reno, Nevada and San Antonio, Texas. Due to the diversity of our business, we are not significantly affected by seasonality. However, sales to our retailers generally peak in our second and third quarters in preparation for the winter holiday season. Also, our network infrastructure sales are typically affected by weather conditions in the United States, especially in our first quarter.

We offer a wide range of products that are classified into three business segments: network infrastructure; mobile devices and accessories; and installation, test and maintenance. Network infrastructure products, which are sold to our commercial customers, are used to build, repair and upgrade wireless telecommunications, computing and Internet networks. Sales of traditional network infrastructure products, such as cable, transmission lines and antennas are in part dependent on capital spending in the wireless communications industry. However, we have also been growing our offering of wireless broadband and network equipment products, which are not as dependent on the overall capital spending of the industry. Mobile devices and accessory products include data devices, pagers and two-way radios and related accessories. Mobile devices and accessory products are widely sold to commercial customers and consumers. Commercial customers include retail stores, value-added resellers and dealers. Consumers are primarily reached through our affinity partnerships, where we offer services including customized order fulfillment, outsourced call centers, and building and maintaining private label Internet sites. Approximately 50% of all of our mobile devices and accessory product sales for the fiscal quarter and six months ended September 30, 2007 were generated from sales to AT&T Mobility (AT&T) (formerly Cingular Wireless LLC). Installation, test and maintenance products, which are sold to our commercial customers, are used to install, tune, maintain and repair wireless communications equipment. Approximately 50% of all of our installation, test and maintenance sales for the fiscal quarter and six months ended September 30, 2007 were generated from the sales of replacement parts and materials for original equipment manufacturers, primarily Nokia, Inc. (Nokia). The remainder of this segment is made up of sophisticated analysis equipment and various frequency-, voltage- and power-measuring devices, as well as an assortment of tools, hardware and supplies required by service technicians. Both our repair and replacement parts sales and consumer sales through our affinity partnerships are reliant on relationships with a small number of vendors. Beginning in fiscal year 2008, we expanded our regular review within each segment from three to four categories. These categories are: (1) commercial public carriers and network operators; (2) commercial resellers; (3) commercial self-maintained users and governments; and (4) consumers. These categories are described further below:

Commercial Public Carriers and Network Operators. Public carriers and network operators include systems operators that are generally responsible for building and maintaining the infrastructure system and provide airtime service to individual subscribers.

Commercial Resellers. Resellers include dealers and resellers that sell, install and service cellular telephone, paging and two-way radio communications equipment primarily for the consumer and small business markets. These resellers include local and national proprietorships and retailers, as well as sales and installation centers operated by cellular and paging carriers.

Commercial Self-Maintained Users (SMUs) and Governments. SMUs and government customers include commercial entities such as major utilities and transportation companies, federal agencies and state and local governments, including public safety organizations.

## Edgar Filing: TESSCO TECHNOLOGIES INC - Form 10-Q

Consumers. Consumers are customers buying through any of our affinity-partner relationships or directly from our consumer website, YourWirelessSource.comTM.

The wireless communications distribution industry is competitive and fragmented, and is comprised of several national distributors. In addition, many manufacturers sell direct. Barriers to entry for distributors are relatively low, particularly in

the mobile devices and accessories market, and the risk of new competitors entering the market is high. Consolidation of larger wireless carriers has and will most likely continue to impact our current and potential customer base. In addition, the agreements or arrangements with our customers or vendors looking to us for product and supply chain solutions are typically of limited duration and are terminable by either party upon several months or otherwise relatively short notice. Our ability to maintain these relationships is subject to competitive pressures and challenges. We believe, however, that our strength in service, the breadth and depth of our product offering, our information technology system, our large customer base and purchasing relationships with approximately 350 manufacturers provide us with a significant competitive advantage over new entrants to the market.

Our second quarter revenues increased by 11.7% compared to the second quarter of last year. This growth was driven by our mobile devices and accessories commercial line of business. Gross profits also increased in our mobile devices and accessories commercial line of business as compared with the second quarter of last year. However, the increase in gross profit from our mobile devices and accessories line of business was more than offset by a decline in our installation, test and maintenance line of business due to gross profits from our Nokia relationship returning to historical levels as we had discussed in previous quarters. This overall decrease in gross profit, combined with an increase in operating expenses to support our growth initiatives and increased order volumes, resulted in a 61.4% decline in net income over the prior-year quarter.

## Results of Operations

The following table summarizes the unaudited results of our operations for the fiscal quarter and six months ended September 30, 2007 and September 24, 2006:

(Amounts in thousands, except per share data)	Fiscal Quarters Ended				Six Months Ended			
	September 30, 2007	September 24, 2006	\$ Change	% Change	September 30, 2007	September 24, 2006	\$ Change	% Change

**Second Quarter of Fiscal Year 2008 Compared with Second Quarter of Fiscal Year 2007**

## Edgar Filing: TESSCO TECHNOLOGIES INC - Form 10-Q

**Revenues.** Revenues for the second quarter of fiscal year 2008 increased 11.7% as compared with the second quarter of fiscal year 2007, primarily due to a 10.8% growth in commercial revenues and, to a much lesser extent, a 67.3% increase in consumer revenues. While sales in our network infrastructure line of business declined, sales in our mobile devices and accessories and installation, test and maintenance lines of business grew.

Network infrastructure sales decreased 2.4% as compared with the second quarter of fiscal year 2007, primarily due to a decrease in sales of broadband products partially offset by an increase in sales of antennas, power systems and wireless local area network (WLAN) products. Our decline in sales of network infrastructure products was in sales to public carriers and SMUs and governments, partially offset by an increase in sales to resellers, which is the result of our focus on diversification beyond the traditional infrastructure carrier customer.

Sales in the mobile devices and accessories line of business increased 27.3% in the second quarter of fiscal year 2008, as compared with the same period last year. The increase was due to a 25.9% increase in commercial sales and, to a much lesser extent, a 67.3% increase in consumer sales. The increase in commercial revenues for mobile devices and accessories, which are sold primarily to resellers, but also to SMUs and governments and public carriers and network operators, was primarily due to increased sales to a large national tier-one carrier, as well as other smaller resellers and users.

Revenues from our installation, test and maintenance line of business had a 1.5% increase from the prior-year quarter, primarily due to an increase in the sale of tools, supplies and safety products.

**Gross Profit.** Gross profit for the second quarter of fiscal year 2008 decreased 4.5% as compared with the second quarter of fiscal year 2007. Total commercial gross profit decreased 5.3%, while consumer gross profit increased 23.4%. Gross profit margin decreased to 21.6% in the second quarter of fiscal year 2008 from 25.3% in second quarter of fiscal year 2007. Gross profit margin in our network infrastructure segment decreased slightly from 25.1% in the second quarter of fiscal year 2007 to 24.9% in the second quarter of fiscal year 2008. Gross profit margin in our mobile devices and accessories segment decreased to 19.6% in the second quarter of this fiscal year from 21.5% in the second quarter of last fiscal year. This decline was primarily attributable to the commercial gross profit margin for our mobile devices and accessories, which decreased to 18.9% in the second quarter of this fiscal year from 20.7% for the second quarter of last fiscal year, principally due to product mix in sales to a large tier-one carrier. Consumer gross profit margin for our mobile devices and accessories decreased to 35.0% in the second quarter of this fiscal year from 47.5% for the second quarter of last fiscal year. Gross profit margin in our installation, test and maintenance line of business decreased from 34.8% in the second quarter of fiscal year 2007 to 21.5% in the second quarter of fiscal year 2008. This decline was due primarily to the return to historical levels of gross profit attributable to our Nokia repair and replacement parts relationship as a result of price changes as we discussed on previous occasions. Generally, our gross margins by product within these segments have been sustained, except as noted above for gross margins attributable to our relationships with a large tier-one carrier and Nokia, and generally these variations are related to sales mix within the segment product offerings. We account for inventory at the lower of cost or market, and as a result, write-offs/write-downs occur due to damage, deterioration, obsolescence, changes in prices and other causes.

Our ongoing ability to earn revenues and gross profits from customers and vendors looking to us for product and supply chain solutions is dependent upon a number of factors. The terms, and accordingly the factors, applicable to each affinity relationship often differ. Among these factors are the strength of the customer's or vendor's business, the supply and demand for the product or service, including price stability, changing customer or vendor requirements, and our ability to support the customer or vendor and to continually demonstrate that we can improve the way they do business. In addition, the agreements or arrangements on which our affinity relationships are based are typically of limited duration, and are terminable by either party upon several months or otherwise relatively short notice. These affinity relationships could also be affected by wireless carrier consolidation.

As total revenues and gross profits from larger customer and vendor relationships, including AT&T and Nokia, increase, we occasionally experience and expect to continue to experience pricing pressures that may adversely affect future results. In an effort to mitigate the overall effect of these pressures and to meet these consistent challenges, we are focused on our continuing efforts to grow revenues and gross profits from other customer and vendor relationships.

**Selling, General and Administrative Expenses.** Total selling, general and administrative expenses increased by 1.8% in the second quarter of fiscal year 2008 as compared with the second quarter of fiscal year 2007. Selling, general and administrative expenses as a percentage of revenues decreased to 20.6% in the second quarter of fiscal year 2008 from 22.6% in the second quarter of fiscal year 2007. The largest factor contributing to the increase in total selling, general and administrative expenses was increased occupancy costs, labor costs and expenses related to business generation activities in support of our continuing increased focus on our commercial business during the second quarter of fiscal year 2008.

Occupancy costs increased by approximately \$433,400 in the second quarter of fiscal year 2008 as compared with the second quarter of fiscal year 2007, primarily due to rent and building maintenance costs related to our lease arrangement for additional office and warehouse space in Hunt Valley, Maryland beginning July 1, 2007.

Labor cost increases were primarily related to sales management and fulfillment. These labor costs were partially offset by decreased accruals related to our reward programs. Total labor costs, including benefits, increased by approximately \$328,300 from the second quarter of fiscal year 2007 to the second quarter of fiscal year 2008.

We continually evaluate the credit worthiness of our existing customer receivable portfolio and provide an appropriate reserve based on this evaluation. We also evaluate the credit worthiness of prospective customers and make decisions regarding extension of credit terms to such prospects based on this evaluation. Accordingly, we recorded a provision for bad debts of \$215,600 and \$332,200 for the second quarter ended September 30, 2007 and September 24, 2006, respectively.

**Interest, Net.** Net interest expense decreased from \$180,500 in the second quarter of fiscal year 2007 to \$115,900 in the second quarter of fiscal year 2008, primarily due to decreased average borrowings on our revolving line of credit facility.

**Income Taxes, Net Income and Diluted Earnings per Share.** The effective tax rate in the second quarter of fiscal year 2008 was 41.5% as compared with 38.0% in the second quarter of fiscal year 2007. The increase in the tax rate is primarily attributable to changes in our state tax effective rate. As a result of the factors discussed above, net income and diluted earnings per share for the second quarter of fiscal year 2008 decreased 61.4% and 55.2%, respectively, compared to the prior-year quarter.

#### **First Six Months of Fiscal Year 2008 Compared with First Six Months of Fiscal Year 2007**

**Revenues.** Revenues for the first six months of fiscal year 2008 increased 11.4% as compared with the first six months of fiscal year 2007, primarily due to a 10.8% growth in commercial revenues and, to a lesser extent, a 56.8% increase in consumer revenues. While we grew sales in our network infrastructure and mobile devices and accessories lines of business, sales in our installation, test and maintenance line of business decreased.

Network infrastructure sales increased 1.5% as compared with the first six months of fiscal year 2007, primarily due to an increase in sales of site support, WLAN and radio frequency products, partially offset by a decline in revenues from broadband products. Our growth in sales of network infrastructure product was in sales to resellers, as we have focused on diversification beyond the traditional infrastructure carrier customer. Although we believe the market for our network infrastructure products will continue to grow, there can be no assurance that these trends will continue.

Sales in the mobile devices and accessories line of business increased 35.3% in the first six months of fiscal year 2008, as compared with the prior-year period. The increase was due to a 34.6% increase in commercial sales, and, to a lesser extent, a 56.8% increase in consumer sales. The increase in commercial revenues for mobile devices and accessories, which are sold primarily to resellers, but also to SMUs and governments and public carriers and network operators, was primarily due to increased sales to a large national tier-one carrier, as well as other smaller resellers and users.

Revenues from our installation, test and maintenance line of business had a 17.2% decrease from the prior year, primarily due to a large decrease in sales of repair parts related to our major repair components relationship with Nokia.

**Gross Profit.** Gross profit for the first six months of fiscal year 2008 decreased 2.2% as compared with the first six months of fiscal year 2007. Total commercial gross profit decreased 2.8%, while consumer gross profit increased 19.6% over the prior year. Gross profit margin decreased to 22.1% in the first six months of fiscal year 2008 from 25.2% in first

six months of fiscal year 2007. Gross profit margin in our network infrastructure segment remained flat at 24.6% as compared with the first six months of 2007. In our installation, test and maintenance segment, gross profit margin decreased to 22.3% in the first six months of fiscal year 2008 from 32.6% in the first six months of fiscal year 2007, primarily due to price changes related to our Nokia relationship. Gross profit margin in our mobile devices and accessories segment decreased to 20.5% in the first six months of this fiscal year from 21.7% in the first six months of last fiscal year primarily due to product mix in sales to a large tier-one carrier. Commercial gross profit margin for our mobile devices and accessories decreased to 19.8% in the first six months of last fiscal year from 20.7% for the first six months of this fiscal year. Consumer gross profit margin for our mobile devices and accessories decreased to 37.0% in the first six months of last fiscal year from 48.5% for the first six months of this fiscal year. Generally, our gross margins by product within these segments have been sustained, except as noted above for gross profits attributable to our relationships with a large tier-one carrier and Nokia, and generally these variations are related to sales mix within the segment product offerings. We account for inventory at the lower of cost or market, and as a result, write-offs/write-downs occur due to damage, deterioration, obsolescence, changes in prices and other causes.

**Selling, General and Administrative Expenses.** Total selling, general and administrative expenses increased by 4.2% in the first six months of fiscal year 2008 as compared with the first six months of fiscal year 2007. Selling, general and administrative expenses as a percentage of revenues decreased to 21.0% in the first six months of fiscal year 2008 from 22.5% in the first six months of fiscal year 2007. The largest factors contributing to the increase in total selling, general and administrative expenses were increased labor costs, occupancy costs and expenses related to business generation activities in support of our continued increased focus on our commercial business during the first six months of fiscal year 2008.

Labor cost increases were primarily related to sales management and fulfillment. These labor costs were partially offset by decreased accruals related to our reward programs. Total labor costs, including benefits, increased by approximately \$631,500 from the first six months of fiscal year 2007 to the first six months of fiscal year 2008.

Occupancy costs increased by approximately \$544,900 in the first six months of fiscal year 2008 as compared with the first six months of fiscal year 2007, primarily due to rent and building maintenance costs related to our lease arrangement for additional office and warehouse space in Hunt Valley, Maryland beginning July 1, 2007.

Information technology expense increased by approximately \$431,300 in the first six months of fiscal year 2008 as compared with the first six months of fiscal year 2007, primarily due to an increase in software maintenance and licenses.

We continually evaluate the credit worthiness of our existing customer receivable portfolio and provide an appropriate reserve based on this evaluation. We also evaluate the credit worthiness of prospective customers and make decisions regarding extension of credit terms to such prospects based on this evaluation. Accordingly, we recorded a provision for bad debts of \$308,100 and \$672,000 for the first six months of fiscal year 2008 and fiscal year 2007, respectively.

**Interest, Net.** Net interest expense decreased from \$335,800 in the first six months of fiscal year 2007 to \$176,800 in the first six months of fiscal year 2008, primarily due to decreased average borrowings on our revolving line of credit facility.

**Income Taxes, Net Income and Diluted Earnings per Share.** The effective tax rate in the first six months of fiscal year 2008 was 40.4% as compared with 37.7% in the first six months of fiscal year 2007. The increase in the tax rate is primarily attributable to changes in our state tax

## Edgar Filing: TESSCO TECHNOLOGIES INC - Form 10-Q

effective rate. As a result of the factors discussed above, net income and diluted earnings per share for the first six months of fiscal year 2008 decreased 57.3% and 51.7%, respectively, compared to the prior year.

### **Liquidity and Capital Resources**

	Six Months Ended	
	September 30, 2007	September 24, 2006
Cash flow provided by operating activities	\$ 2,909,400	\$ 9,377,500
Cash flow used in investing activities	(4,304,600)	(5,987,900)
Cash flow used in financing activities	(390,300)	(5,676,500)
Net decrease in cash and cash equivalents	\$ (1,785,500)	\$ (2,286,900)

We generated \$2.9 million of net cash from operating activities in the first six months of fiscal year 2008 compared with \$9.4 million in the first six months of fiscal year 2007. In the first six months of fiscal year 2008, our cash inflow from operating activities was primarily driven by net income, net of certain non-cash elements such as, depreciation and amortization and non-cash stock compensation, as well as changes in working capital. The working capital change consisted of significant inventory purchases and increases to trade accounts payable as we prepare for the winter holiday season and increased stocked product offering, including wireless broadband products, as well as an increase in trade accounts receivable due to the timing of sales to our large tier-one carrier customer.

Capital expenditures of \$2.0 million in the first six months of fiscal year 2008 were down slightly from expenditures of \$2.1 million in the first six months of fiscal year 2007. In both periods, capital expenditures primarily consisted of investment in information technology and, in fiscal year 2007, training equipment.

On April 21, 2006, we acquired substantially all the non-cash net assets of TerraWave Solutions, Ltd. and its commonly owned affiliate, GigaWave Technologies, Ltd. for an initial cash payment of approximately \$3.8 million, and additional cash earn-out payments over a four-year period, contingent on the achievement of certain minimum earnings thresholds (\$1.5 million of the \$3.8 million cash amount paid at closing is a non-refundable prepayment against future earn-out payments, if any, amortizable over the four-year period). To the extent that certain minimum earnings thresholds are not achieved, we will not be able to recover this prepayment. The maximum amount of contingent future earn-out payments (after subtracting the \$1.5 million prepayment) is \$15.5 million. Contingent payments made under the terms of the purchase agreement are treated as an additional cost of the acquired businesses and additional goodwill has been and will continue to be recorded, if earnings targets are achieved. For the six month period ended September 30, 2007, approximately \$1.7 million was paid for additional earn-out payments based on the achievement of certain earnings thresholds in accordance with the terms of the purchase agreement. As of September 30, 2007, there is no accrual for additional earn-out payments, because applicable fiscal year 2008 targets have not been met as of September 30, 2007.

On July 2, 2007, we acquired the net assets and business of NetForce Solutions, Inc. (NetForce), a provider of technical and sales training solutions to wireless, telecommunications, and networking industries. The purchase included substantially all the non-cash business assets for an initial cash payment of approximately \$650,000 and additional cash earn-out payments of up to approximately \$2.8 million over a four-year period, contingent on the achievement of certain earnings thresholds. As of September 30, 2007, there is no accrual for additional earn-out payments, because applicable fiscal year 2008 targets have not been met as of September 30, 2007.

Net cash used for financing activities was \$390,300 in the first six months of fiscal year 2008 compared with a net cash outflow for financing activities of \$5.7 million for the first six months of fiscal year 2007. For fiscal year 2008 and fiscal year 2007, our cash outflow from financing activities was primarily related to treasury stock purchases, partially offset by net borrowings on our revolving line of credit. During the first six months of fiscal year 2008, we repurchased 346,107 shares of our outstanding common stock pursuant to our stock buyback program, compared with 962,663 shares purchased during the first six months of fiscal year 2007. From the beginning of our stock buyback program (the first quarter of fiscal year 2004), through the end of the second quarter of fiscal year 2008, a total of 2,140,974 shares have been purchased under this program for approximately \$28.3 million, or an average price of \$13.20 per share. The Board of Directors has authorized the purchase of up to 2,395,567 shares in the aggregate, and therefore, 254,593 shares remained available to be purchased as of the end of the second quarter of fiscal year 2008. We expect to fund future purchases, if any, from working capital and/or our revolving credit facility. No timetable has been set for the completion of this program.

We believe that our existing cash, payments from customers, and availability under our revolving line of credit facility will be sufficient to support our operations for the foreseeable future. To minimize interest expense, our policy is to use excess available cash to pay down any balance on our revolving line of credit facility. In doing so, the balance on our revolving line of credit facility could increase depending on our working capital and other cash needs. If we were to undertake an acquisition or other major capital purchases that require funds in excess of its existing sources of liquidity, we would look to sources of funding from additional credit facilities, debt and/or equity issuances. There can be no assurances that such additional future sources of funding would be available on terms acceptable to us, if at all.

We expect to see a decrease in net cash flow from operations during the third quarter of fiscal year 2008. This is in part a result of the increase in inventory that occurred late in the second quarter which will be paid during the third quarter, as well as taking into account certain other payments that are expected to be made

during the third quarter against existing accounts payable. These items are included among trade accounts payable as of September 30, 2007. We do, however, anticipate this decrease in accounts payable to be offset to some extent by anticipated increased net income (net of certain non-cash elements such as depreciation and amortization and non-cash stock compensation) and by anticipated cash collections. There can be no assurances, however, whether or to what extent these anticipated events will occur and, correspondingly, the extent of any increases.

On May 31, 2007, we replaced our previously existing \$30 million revolving line of credit facility with a new \$50 million revolving line of credit facility with both SunTrust Bank and Wachovia Bank, N.A. The previous facility was established in September 2003 and had a term expiring in September 2007, was unsecured and had provided for monthly payments of interest accruing at a LIBOR rate plus an applicable margin ranging from 1.5% to 2.0%. The new facility has a term expiring May 2010, with interest payable monthly at the LIBOR rate plus an applicable margin, which ranges from 1.25% to 2.75%. Like the replaced facility, borrowing availability under this new facility is determined in accordance with a borrowing base. This new facility includes financial covenants, including a minimum tangible net worth, minimum cash flow coverage of debt service, and a maximum funded debt to EBITDA ratio. These financial covenants also apply to the existing term loan secured by our Hunt Valley, Maryland facility. The new facility also limits our ability to engage in certain transactions or activities, including (but not limited to) investments and acquisitions, sales of assets, payment of dividends, issuance of additional debt and other matters. As of September 30, 2007, we had \$45.6 million available on our revolving line of credit facility.

On May 1, 2007, we entered into a Second Amendment of Agreement of Lease with Atrium Building LLC, which among other things, provided for an extension, from November 30, 2007 to December 31, 2012, of the lease term provided for under the Agreement of Lease, dated November 3, 2003, as previously amended January 23, 2007, under which we lease approximately 94,000 square feet in Timonium, Maryland, where our corporate and administrative offices are located. The rental rate ranges from \$124,700 to \$144,600 per month at the close of the extended term. The contractual cash obligations under this amendment as of September 30, 2007 are \$748,400, \$3,068,900, \$3,255,800 and \$1,267,700 for fiscal years 2008, 2009 through 2010, 2011 through 2012, and thereafter, respectively.

On June 1, 2007, we entered into a Lease with MERRITT/BAVAR-VA, LLC under which we lease approximately 66,000 square feet of office and warehouse space in Hunt Valley, Maryland, adjacent to our Global Logistics Center, for a term beginning July 1, 2007 and expiring September 30, 2011. The monthly rental fee ranges from \$35,700 to \$38,500 throughout the lease term. The contractual cash obligations under this agreement as of September 30, 2007 are \$214,300, \$882,300 and \$611,700 for fiscal years 2008, 2009 through 2010, and 2011 through 2012, respectively.

#### **Recent Accounting Pronouncements**

## Edgar Filing: TESSCO TECHNOLOGIES INC - Form 10-Q

Effective April 2, 2007, we adopted Financial Accounting Standards Board (FASB) Interpretation No. 48 (FIN 48), Accounting for Uncertainty in Income Taxes. FIN 48 clarifies the accounting for income taxes by prescribing the minimum recognition threshold a tax position is required to meet before being recognized in the financial statements. FIN 48 also provides guidance on derecognition, measurement, classification, interest and penalties, accounting in interim periods, disclosure and transition. As a result of the adoption of FIN 48, we recognized a \$72,100 decrease in beginning retained earnings as of April 2, 2007. As of April 2, 2007, we had total gross unrecognized tax benefits of approximately \$319,000, all of which, if recognized, would favorably affect the effective income tax rate in future periods.

In September 2006, the FASB issued Statement of Financial Accounting Standard (SFAS) No. 157, Fair Value Measurements, which provides guidance for using fair value to measure assets and liabilities. The standard also responds to investors' requests for expanded information about the extent to which companies measure assets and liabilities at fair value, the information used to measure fair value, and the effect of fair value measurements on earnings. The standard applies whenever other standards require (or permit) assets or liabilities to be measured at fair value. The standard does not expand the use of fair value in any new circumstances. SFAS No. 157 is effective for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. We are reviewing SFAS No. 157 to determine the impact of adoption on our financial statements.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities Including an Amendment of FASB Statement No. 115. SFAS No. 159 permits an entity to measure many financial instruments and certain other items at fair value that are not currently required to be measured at fair value. Entities that elect the fair value option will report unrealized gains and losses in earnings at each subsequent reporting date. SFAS No. 159

is effective for fiscal years beginning after November 15, 2007. We are reviewing SFAS No. 159 to determine the impact of adoption on our financial statements.

**Critical Accounting Policies and Estimates**

## Edgar Filing: TESSCO TECHNOLOGIES INC - Form 10-Q

Our discussion and analysis of our financial condition and results of our operations are based on our unaudited consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amount of assets, liabilities, revenues and expenses and related disclosure of contingent assets and liabilities. Actual results may differ from these estimates under different assumptions or conditions.

For a detailed discussion on our critical accounting policies, please refer to our Annual Report on Form 10-K for the fiscal year ended April 1, 2007.

### **Off-Balance Sheet Arrangements**

We have no material off-balance sheet arrangements.

**Forward-Looking Statements**

## Edgar Filing: TESSCO TECHNOLOGIES INC - Form 10-Q

This Report may contain forward-looking statements. These forward-looking statements may generally be identified by the use of the words may, will, expects, anticipates, believes, estimates, and similar expressions, but the absence of these words or phrases does not necessarily mean that a statement is not forward looking. Forward looking statements involve a number of risks and uncertainties. Our actual results may differ materially from those described in or contemplated by any such forward-looking statement for a variety of reasons, including those risks identified in our most recent Annual Report on Form 10-K and other periodic reports filed with the Securities and Exchange Commission, under the heading Risk Factors and otherwise. Consequently, the reader is cautioned to consider all forward-looking statements in light of the risks to which they are subject.

We are not able to identify or control all circumstances that could occur in the future that may adversely affect our business and operating results. Without limiting the risks that we describe in our periodic reports and elsewhere, among the risks that could lead to a materially adverse impact on our business or operating results are the following: termination or non-renewal of limited duration agreements or arrangements with our vendors and affinity partners which are typically terminable by either party upon several months notice; loss of significant customers or relationships, including affinity relationships; loss of customers either directly or indirectly as a result of consolidation among large wireless service carriers and others within the wireless communications industry; the strength of the customers, vendors and affinity partners business; economic conditions that may impact customers ability to fund or pay for the purchase of our products and services, including credit risk; our dependence on a relatively small number of suppliers and vendors, which could hamper our ability to maintain appropriate inventory levels and meet customer demand; failure of our information technology system or distribution system; technology changes in the wireless communications industry, which could lead to significant inventory obsolescence and/or our inability to offer key products that our customers demand; third-party freight carrier interruption; increased competition from competitors, including manufacturers or national and regional distributors of the products we sell and the absence of significant barriers to entry which could result in pricing and other pressures on profitability and market share; our inability to access capital and obtain financing as and when needed; transitional and other risks associated with acquisitions of companies that we may undertake in an effort to expand our business; the possibility that, for unforeseen reasons, we may be delayed in entering into or performing, or may fail to enter into or perform, anticipated contracts or may otherwise be delayed in realizing or fail to realize anticipated revenues or anticipated savings; our inability to protect certain intellectual property, including systems and technologies on which we rely; and our inability to hire or retain for any reason our key professionals, management and staff.

### Available Information

## Edgar Filing: TESSCO TECHNOLOGIES INC - Form 10-Q

Our Internet Web site address is: [www.tessco.com](http://www.tessco.com). We make available free of charge through our Web site, our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13 or 15(d) of the Exchange Act as soon as reasonably practicable after such documents

are electronically filed with, or furnished to, the Securities and Exchange Commission. Also available on our Web site is our Code of Business Conduct and Ethics.

**Item 3. Quantitative and Qualitative Disclosures About Market Risk.**

In October 2005, we entered into an interest rate swap agreement on our existing bank term loan. We believe our exposure to market risks, including exchange rate risk, interest rate risk and commodity price risk, is not material at the present time.

**Item 4. Controls and Procedures.**

## Edgar Filing: TESSCO TECHNOLOGIES INC - Form 10-Q

The Company's Chief Executive Officer (CEO) and Chief Financial Officer (CFO) have evaluated the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (Exchange Act)) as of the end of the period covered by this quarterly report. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system's objectives will be met. Based on the evaluation of these controls and procedures required by Rules 13a-15(b) or 15d-15(b) of the Exchange Act, the Company's management, including the CEO and CFO, have concluded that, as of the end of the period covered by this quarterly report, the Company's disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and to provide reasonable assurance that such information is accumulated and communicated to the Company's management, including the Company's CEO and CFO, as appropriate to allow timely decisions regarding required disclosure. During the period covered by this quarterly report, there have been no changes to the Company's internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

### **Part II. Other Information**

#### **Item 1. Legal Proceedings.**

Lawsuits and claims are filed against us from time to time in the ordinary course of business. We do not believe that any lawsuits or claims currently pending against the Company, individually or in the aggregate, are material, or will have a material adverse affect on our financial condition or results of operations.

#### **Item 1A. Risk Factors.**

There were no material changes in the risk factors previously disclosed in the Company's Annual Report on Form 10-K for the fiscal year ended April 1, 2007.

**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.**

## Edgar Filing: TESSCO TECHNOLOGIES INC - Form 10-Q

The following table sets forth information with respect to purchases of TESSCO common stock by the Company or any affiliated purchasers during the second quarter of fiscal year 2008.

### Issuer Purchases of Equity Securities

Period (1)	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs (2)
July 2, 2007 through July 29, 2007		\$ N/A		600,700
July 30, 2007 through September 2, 2007	342,662	13.95	342,662	258,038
September 3, 2007 through September 30, 2007	3,445	15.26	3,445	254,593
Total	346,107	\$ 13.96	346,107	254,593

(1) Periods indicated are fiscal accounting months for the second quarter of fiscal year 2008.

(2) Values are as of the end of the fiscal accounting month or quarter, as applicable.

On April 28, 2003, our Board of Directors announced a stock buyback program and authorized the purchase of up to 675,000 shares of our common stock pursuant to the program. On October 20, 2005 and July 17, 2006, our Board of Directors amended the program and authorized the purchase of an additional 675,000 and 600,000 shares, respectively, of outstanding common stock. On July 26, 2007 and August 14, 2007, our Board of Directors authorized the purchase of an additional 144,867 and 300,700 shares, respectively, of outstanding common stock under the stock buyback program. After accounting for the actions of the Board of Directors in authorizing the purchase of the additional shares, a total of 2,395,567 shares have been authorized for repurchase. During the second quarter of 2008, the Company repurchased 346,107 shares of its common stock for approximately \$4.8 million. All shares repurchased during the second quarter of fiscal year 2008 were repurchased under this program. As of September 30, 2007, we had purchased an aggregate of 2,140,974 shares of our outstanding common stock pursuant to this program for approximately \$28.3 million, or an average price of \$13.20 per share. Accordingly, as of September 30, 2007, 254,593 shares remained available for repurchase. Shares may be purchased from time to time under this program in the open market, by block purchase, or through negotiated transactions, or possibly other transactions managed by broker-dealers. No timetable has been set for completion of the program.

### Item 3. Defaults Upon Senior Securities.

None.

**Item 4. Submission of Matters to a Vote of Security Holders.**

## Edgar Filing: TESSCO TECHNOLOGIES INC - Form 10-Q

The information regarding the submission of matters to a vote of security holders, set forth on page 19 of the Company's quarterly report on Form 10-Q for the fiscal quarter ended July 1, 2007, filed with the SEC on August 15, 2007, is incorporated herein by reference.

### **Item 5. Other Information.**

None.

**Item 6. Exhibits.**

(A) EXHIBITS:

- 31.1 Rule 15d-14(a) Certification of Robert B. Barnhill, Jr., Chief Executive Officer.
- 31.2 Rule 15d-14(a) Certification of David M. Young, Chief Financial Officer.
- 32.1 Section 1350 Certification of Robert B. Barnhill, Jr., Chief Executive Officer.
- 32.2 Section 1350 Certification of David M. Young, Chief Financial Officer.

**Signature**

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
