will mature on June 15, 2014, unless earlier repurchased by the Company or converted. The Notes will be convertible, at any time prior to the close of business on the second scheduled trading day immediately preceding the maturity date, at an initial conversion rate of 56.9801 shares of the Company's common stock per \$1,000 principal amount of Notes, which is equivalent to an initial conversion price of approximately \$17.55, a 30% conversion premium based on the public offering price of \$13.50 per share in the Company's concurrent common stock offering. The conversion rate is subject to adjustment in certain circumstances.

The Company may redeem for cash all or part of the Notes on or after June 20, 2012, if the last reported sale price of its common stock for 20 or more trading days (whether or not consecutive) in a period of 30 consecutive trading days ending on the trading day prior to the date the Company provides the notice of redemption to holders exceeds 130% of the applicable conversion price in effect on each such trading day. Holders of the Notes may require the Company to purchase all or a portion of their Notes at a price equal to 100% of the principal amount of the Notes to be purchased, plus accrued and unpaid interest, in cash, upon the occurrence of certain fundamental changes involving the Company.

The Indenture contains customary terms and covenants, including that upon certain events of default occurring and continuing, either the Trustee or the holders of not less than 25% in aggregate principal amount of the Notes then outstanding may declare the entire principal amount of all the Notes, and the interest accrued on such Notes, if any, to be due and payable immediately. In the case of an event of default arising out of bankruptcy events, the principal amount of the Notes together with any accrued and unpaid interest thereon will automatically become immediately due and payable.
