Table of Contents**BALLY TECHNOLOGIES, INC. AND SUBSIDIARIES****UNAUDITED CONDENSED CONSOLIDATED SUPPLEMENTAL CASH FLOW INFORMATION**

The following supplemental information is related to the unaudited condensed consolidated statements of cash flows:

	Three Months Ended September 30,		
	2009	(in 000s)	2008
Cash paid for interest	\$	2,944	\$ 9,833
Cash paid for income taxes, net of refunds		(8,278)	18,398
Non-cash investing and financing transactions:			
Pay-off of debt from refinancing	\$		\$ 275,000
Transfer of inventory to leased gaming equipment (1)		8,067	10,308
Reclassify property, plant and equipment to inventory (1)		1,423	5,009
Acquisition of Bally trademark		7,500	
Accrual of capital expenditures		314	577

(1) As a result of the inability to separately identify the cash flows associated with the construction of leased gaming equipment, the Company has included all additions to leased gaming equipment as an increase in inventory under cash used in operating activities in the unaudited condensed consolidated statement of cash flows. In addition, cash generated from the sale of used gaming equipment classified as leased gaming equipment is also included in cash provided by operating activities in the unaudited condensed consolidated statement of cash flows. The Company has one process to procure raw materials for the assembly of both inventory and leased gaming equipment. The materials requisition planning process considers the number of devices the Company expects to build for sale and for use in its gaming operations division during a particular period, but it does not separately earmark purchases for leased gaming equipment. Without such an earmarking process, the Company is unable to determine whether the parts used to construct leased gaming equipment during a particular period came from inventory on hand at the beginning of the period or was constructed from inventory procured during the period of deployment, thus requiring the expenditure of cash.

Table of Contents

**BALLY TECHNOLOGIES, INC. AND SUBSIDIARIES**

**NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

**1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

*Principles of presentation and consolidation*

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ( U.S. GAAP ) for interim financial information and reflect all adjustments, consisting of normal recurring adjustments, which management believes are necessary to fairly present the financial position, results of operations and cash flows of Bally Technologies, Inc. ( Bally or the Company ), a Nevada corporation, and its subsidiaries for the respective periods presented. Certain information and note disclosures normally included in annual financial statements prepared in accordance with U.S. GAAP have been condensed or omitted pursuant to those rules and regulations. The results of operations for an interim period are not necessarily indicative of the results that may be expected for any other interim period or the year as a whole. The accompanying unaudited condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto in the Company s Annual Report on Form 10-K for the fiscal year ended June 30, 2009. References to specific U.S. GAAP within this report cite topics within the Financial Accounting Standards Board ( FASB ) Accounting Standards Codification ( ASC ).

The Company is the general partner of Rainbow Casino Vicksburg Partnership ( RCVP ), which operates the Rainbow Casino. The limited partner is entitled to receive 10% of the net available cash flows of RCVP after debt service and other items, as defined in the limited partnership agreement, which increases to 20% of the net available cash flows based on the incremental amount of revenues in excess of \$35.0 million, payable quarterly through December 31, 2010. The Company holds the remaining economic interest in the partnership. The Company consolidates RCVP and records an adjustment to reflect the portion of the earnings of RCVP attributable to the limited partner as a noncontrolling interest.

All intercompany accounts and transactions have been eliminated in consolidation.

The Company has evaluated the financial statements for subsequent events occurring between the end of our most recent fiscal quarter and November 4, 2009, the date of filing of this Form 10-Q.

*Expense classification*

The classification of certain costs within the Unaudited Condensed Consolidated Statement of Operations for the three months ended September 30, 2008 have been corrected to conform to the current year presentation. The reclassification reflects certain costs of services associated with revenue presented in *Cost of gaming equipment and systems* of \$1.2 million for the three months ended September 30, 2008 that

## Edgar Filing: BALLY TECHNOLOGIES, INC. - Form 10-Q

had previously been presented as a component of *Selling, general and administrative expenses*. This correction was not material to the previously issued financial statements and does not have any impact on income from continuing operations, earnings per share, retained earnings, or cash flows.

### *Recently adopted accounting pronouncements - revenue recognition*

Effective July 1, 2009, the Company adopted the provisions of two new Accounting Standards Updates ( ASU ) affecting revenue recognition: ASU No. 2009-13, *Multiple Deliverable Revenue Arrangements* and ASU No. 2009-14, *Certain Revenue Arrangements That Include Software Elements*. The Company has elected to adopt these ASUs prior to the required effective date using the prospective method as permitted under the guidance. Accordingly, this guidance is being applied to all new or materially modified revenue arrangements entered into since the start of the Company's fiscal year of adoption, which is July 1, 2009.

Table of Contents

ASU No. 2009-13 replaces and significantly changes the existing separation criteria for multiple-deliverable revenue arrangements, by eliminating the criterion for objective and reliable evidence of fair value for the undelivered products or services to determine a unit of accounting. Instead, revenue arrangements with multiple deliverables should be divided into separate units of accounting if the deliverables meet both of the following criteria:

- The delivered items have value to the customer on a standalone basis. The item or items have value on a standalone basis if they are sold separately by any vendor or the customer could resell the delivered item(s) on a standalone basis; and
- If the arrangement includes a general right of return relative to the delivered items, delivery or performance of the undelivered items is considered probable and substantially in the control of the vendor.

ASU No 2009-13 also eliminates the use of the residual method of allocation and requires, instead, that arrangement consideration be allocated, at the inception of the arrangement, to all deliverables based on their relative selling price (i.e., the relative selling price method). When applying the relative selling price method, a hierarchy is used for estimating the selling price based first on vendor-specific objective evidence ( VSOE ), then third-party evidence ( TPE ) and finally management 's estimate of the selling price ( ESP ).

ASU No 2009-14 amends the scope of software revenue recognition to exclude all tangible products containing both software and nonsoftware components that function together to deliver the product 's essential functionality. As a result, certain products that were previously accounted for under the scope of software revenue recognition guidance will no longer be accounted for as software. Prior to July 1, 2009, the Company determined its gaming devices included software that was more than incidental to the product as a whole; accordingly, the sale of gaming devices were accounted for under the scope of software revenue recognition guidance. Application of the new guidance resulted in the Company determining that gaming devices no longer fall under the scope of software revenue recognition guidance. Under the new guidance, which applies to new or modified arrangements, revenue related to systems arrangements that contain software and nonsoftware deliverables, will require an allocation of the arrangement fee to the separate deliverables using the relative selling price method. Revenue for the software deliverables will continue to be recognized under the software revenue recognition guidance, while revenue for the nonsoftware deliverables will no longer be accounted for under the software revenue recognition guidance.

The impact of applying the new accounting guidance to new or materially modified arrangements entered into since July 1, 2009, did not have a material effect on revenue recognized for the three months ended September 30, 2009. The impact on future periods is dependent upon the prevalence of multiple deliverable arrangements whereby a combination of gaming devices, hardware, software, maintenance and product support fees and consulting services are sold under one arrangement and the software license is time-based. Under such arrangements, all revenue was previously recognized ratably over the term of the time-based license as the Company was unable to establish VSOE of fair value for the software maintenance and product support, which runs contemporaneously with the license period. Under the new guidance, revenue from non-software elements delivered under such multiple deliverable arrangements will no longer be deferred if VSOE of fair value does not exist for an undelivered element. Rather, the revenue allocated to the non-software elements using the relative selling price method would be recognized upon delivery and customer acceptance, and only the revenue allocated to the software elements will be deferred and recognized over the term of the time-based license.

In allocating the arrangement fees to separate deliverables under the new accounting guidance, the Company used VSOE of selling price for gaming devices, maintenance and professional services; a combination of TPE and ESP for hardware, and ESP for system software deliverables. ESP for system software was determined based upon the Company 's normal pricing and discounting practices.

*Other recently adopted accounting pronouncements*

On July 1, 2009, the Company adopted the new FASB ASC which establishes two levels of U.S. GAAP: authoritative and nonauthoritative. The ASC is now the single source of authoritative nongovernmental U.S. GAAP. All other literature is considered non-authoritative. The Company's adoption of this statement had no impact on the consolidated results of operations, financial position and cash flows, but rather changes the reference used to cite specific FASB accounting literature.

On July 1, 2009, the Company adopted new accounting guidance related to business combinations which clarifies the accounting for certain separately identifiable intangible assets which an acquirer does not intend to actively use. This guidance requires an acquirer in a business combination to account for a defensive intangible asset as a separate unit of accounting which should be amortized to expense over the period the asset diminishes in value. Future effects will be dependent upon acquisitions of defensive intangible assets, if any, at that time. In addition, there is new guidance for determining the useful life of a recognized intangible asset. This guidance is applied prospectively to intangible assets acquired after the effective date. However, the disclosure requirements are applied prospectively to all intangible assets recognized in financial statements. In addition, the new guidance requires that an acquiring entity recognize all of the assets acquired and liabilities assumed in a transaction at the acquisition-date fair value with limited exceptions, requires the expense of acquisition costs, and also includes a substantial number of new disclosure requirements. The Company's adoption of this guidance did not have a significant impact on the disclosures or the consolidated results of operations, financial position and cash flows for the three months ended September 30, 2009.

Table of Contents

On July 1, 2009, the Company adopted new accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. Specifically, this guidance requires the recognition of a noncontrolling interest (minority interest) as equity in the consolidated financial statements and separate from the parent's equity. The amount of net income attributable to the noncontrolling interest will be included in consolidated net income on the face of the income statement. This guidance also clarifies that changes in a parent's ownership interest in a subsidiary that do not result in deconsolidation are equity transactions if the parent retains its controlling financial interest and requires that a parent recognize a gain or loss in net income when a subsidiary is deconsolidated. Such gain or loss will be measured using the fair value of the noncontrolling equity investment on the deconsolidation date. The guidance also includes expanded disclosure requirements regarding the interests of the parent and its noncontrolling interest. The adoption of this statement did not have a material impact on the consolidated results of operations, financial position and cash flows, but did affect presentation and disclosure. As a result of the adoption, the Company reclassified noncontrolling interests in the amount of \$2.4 million from minority interest to equity in the June 30, 2009 Unaudited Condensed Consolidated Balance Sheets and Statements of Stockholders' Equity. Certain reclassifications to the Unaudited Condensed Consolidated Statements of Operations have been made to prior period amounts to conform to the presentation of the current period. Recorded amounts for prior periods previously presented as Net income which are now presented as Net income attributable to Bally Technologies Incorporated, have not changed as a result of the adoption of this guidance.

On July 1, 2009, the Company adopted new accounting guidance requiring additional disclosures about fair value of financial instruments in interim and annual financial statements. The Company's adoption of this guidance resulted in the disclosure of information about the fair value of financial instruments consistent with the disclosures in the Company's most recent annual financial statements.

*Fair value of financial instruments*

The fair value of a financial instrument is the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced sale or liquidation. The carrying amounts reflected in the accompanying unaudited condensed consolidated balance sheets for cash equivalents, accounts and notes receivable, investment to fund jackpot liabilities, accounts payable, jackpot liabilities and variable rate long-term debt approximate their respective fair values.

All financial assets and liabilities are recognized or disclosed at fair value using a fair value hierarchy that maximizes the use of observable inputs and minimizes the use of unobservable inputs when measuring fair value. A financial instrument's categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. There are three levels of inputs that may be used to measure fair value:

- Level 1: quoted prices in active markets for identical assets or liabilities;
  
- Level 2: inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices in active markets for similar assets or liabilities, quoted prices for identical or similar assets or liabilities in markets that are not active, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities; or
  
- Level 3: unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Table of Contents

The Company's only significant financial asset or liability measured at fair value on a recurring basis, excluding accrued interest components, consisted of a cash flow hedge related to a variable rate debt instrument as of September 30, 2009 (which is included in accrued liabilities in the unaudited condensed consolidated balance sheets) as follows:

	Fair Value Measurements Using Input Type			
	Level 1	Level 2	Total	
	(in 000s)			
<b>Liability:</b>				
Derivative financial instrument	\$	1,294	\$	1,294

At June 30, 2009, the derivative financial instrument was an asset valued at \$255,000. The valuation techniques used to measure the fair value of the derivative financial instrument above in which the counterparties have high credit ratings, were derived from pricing models, such as discounted cash flow techniques, with all significant inputs derived from or corroborated by observable market data. The Company's discounted cash flow techniques use observable market inputs, such as LIBOR-based yield curves. See Note 4 to unaudited condensed consolidated financial statements, *Long-Term Debt*.

*Accounting for Derivative Instruments and Hedging Activity*

The Company assesses, both at the inception of each hedge and on an on-going basis, whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in cash flows of the hedged items. Such highly effective derivatives are granted hedge accounting treatment. The derivative financial instrument meets these requirements and is accounted for as a cash flow hedge.

The impact of the cash flow hedge on the unaudited condensed consolidated financial statements is depicted below:

Cash Flow Hedging Relationship	Amount of Gain (Loss) Recognized in OCI on Derivative (Effective Portion)	Location of Gain (Loss) Reclassified from Accumulated	Amount of Gain (Loss) Reclassified from Accumulated OCI into Income (Effective Portion)
	Three Months Ended September 30, 2009	OCI into Income (Effective Portion)	Three Months Ended September 30, 2009
	(in 000s)		
Interest rate swap agreement	\$ (2,230)	Interest expense	\$ (681)

*Inventories*

Inventories are stated at the lower of cost, determined on a first in, first out basis, or market. Cost elements included in work-in-process and finished goods include raw materials, direct labor and manufacturing overhead. Inventories consist of the following:

Edgar Filing: BALLY TECHNOLOGIES, INC. - Form 10-Q

	September 30, 2009	(in 000s)	June 30, 2009
Raw materials	\$ 39,933		\$ 40,662
Work-in-process	1,121		1,432
Finished goods	11,881		10,848
Total	\$ 52,935		\$ 52,942

Table of Contents**2. EARNINGS PER SHARE**

Basic earnings per share are computed by dividing reported earnings by the weighted average number of shares of common stock outstanding during the period. Diluted earnings per share reflect the additional dilution from all potentially dilutive securities.

The following is the computation of basic and diluted earnings per share applicable to the Company's common stock:

	<b>Three Months Ended September 30,</b>	
	<b>2009</b>	<b>2008</b>
	<b>(in 000s, except per share amounts)</b>	
Net income attributable to Bally Technologies, Inc.	\$ 30,624	\$ 30,304
After tax interest expense on convertible debt	14	69
Diluted earnings attributable to Bally Technologies, Inc.	\$ 30,638	\$ 30,373
Weighted average common shares outstanding	54,268	55,070
Dilutive effect of:		
Stock options, Restricted Stock Units ( RSU ) and restricted stock	3,307	2,835
Warrants	23	21
Convertible debt (1)	87	198
Weighted average diluted shares outstanding	57,685	58,124
Basic earnings attributable to Bally Technologies, Inc. per share	\$ 0.56	\$ 0.55
Diluted earnings attributable to Bally Technologies, Inc. per share	\$ 0.53	\$ 0.52

(1) The Company has certain related party debt outstanding which is convertible into common stock at the Company's discretion. See Note 5 to unaudited condensed consolidated financial statements, *Related Party Transactions*.

Certain securities were excluded from the diluted per share calculation because their inclusion would be anti-dilutive. Such securities consist of the following:

	<b>Three Months Ended September 30,</b>	
	<b>2009</b>	<b>2008</b>
	<b>(in 000s)</b>	
Stock options, RSU and restricted stock	550	632

Table of Contents**3. GOODWILL AND INTANGIBLE ASSETS**

Intangible assets consist of the following:

	Useful Life (Years)	September 30, 2009			June 30, 2009		
		Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount (dollars in 000s)	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Computer software	3 - 9	\$ 33,472	\$ (24,794)	\$ 8,678	\$ 27,488	\$ (19,083)	\$ 8,405
License rights	3 - 5	2,149	(1,908)	241	2,117	(1,814)	303
Trademarks	5	2,203	(1,758)	445	2,203	(1,693)	510
Core technology	5 - 8	22,763	(7,525)	15,238	22,763	(6,585)	16,178
Contracts	10	10,043	(5,615)	4,428	10,043	(5,364)	4,679
Other intangibles	3 - 7	3,089	(951)	2,138	7,627	(5,504)	2,123
Total finite lived intangible assets		73,719	\$ (42,551)	\$ 31,168	\$ 72,241	\$ (40,043)	\$ 32,198
Trade mark	indefinite	7,500		7,500			
Total		\$ 81,219	\$ (42,551)	\$ 38,668	\$ 72,241	\$ (40,043)	\$ 32,198

In September 2009, the Company recorded an intangible asset of approximately \$7.5 million related to one-time consideration given for a perpetual, world-wide license for the use of the Bally trademark in connection with the Company's business. Consideration for this intangible asset included approximately \$5.0 million related to the delivery of gaming devices and \$2.5 million in forgiveness of certain customer receivable balances. Previously, a royalty fee was paid and expensed based upon the number of units produced and sold using the trademark.

Total amortization expense related to finite lived intangible assets was \$2.5 million and \$2.2 million for the three months ended September 30, 2009 and 2008, respectively, which included computer software amortization expense of \$1.1 million and \$1.0 million for the three months ended September 30, 2009 and 2008, respectively. Future amortization of finite lived intangible assets is scheduled as follows:

Year Ended June 30,	(in 000s)
2010 (remaining nine months of fiscal year)	\$ 7,354
2011	8,033
2012	5,863
2013	4,802
2014	1,179
Thereafter	3,937
Total	\$ 31,168

All goodwill is associated with the Gaming Equipment and Systems segment. The changes in the carrying amount of goodwill for the three months ended September 30, 2009, are as follows:

Edgar Filing: BALLY TECHNOLOGIES, INC. - Form 10-Q

	(in 000s)
Balance at June 30, 2009	\$ 161,960
Foreign currency translation adjustment	238
Balance at September 30, 2009	\$ 162,198

Table of Contents**4. LONG-TERM DEBT**

Long-term debt consists of the following:

	September 30, 2009	June 30, 2009
	(in 000s)	
Term loan facility	\$ 200,000	\$ 206,250
Related party debt (see Note 5)	2,800	2,800
Other, generally unsecured	51	37
Long-term debt	202,851	209,087
Less current maturities	(37,851)	(35,337)
Long-term debt, net of current maturities	\$ 165,000	\$ 173,750

On September 29, 2008, the Company entered into a \$225.0 million term loan and a \$75.0 million revolving credit facility (collectively, the Credit Facility). The Credit Facility matures in September 2012. The Company has the option to request an increase in the size of the term loan and/or revolving credit facility by up to \$50.0 million in the aggregate provided that certain conditions are met. The proceeds from the Credit Facility and cash-on-hand of \$14.6 million were used to repay the then existing bank term loans totaling \$289.6 million. The Company also used cash-on-hand to pay for transaction fees and expenses totaling \$10.7 million, which are being amortized to interest expense over the term of the Credit Facility.

As of September 30, 2009, there was approximately \$75.0 million of undrawn availability under the revolving credit facility. Availability under the revolving credit facility is reduced to the extent of outstanding letters of credit.

The interest rate on the Credit Facility is subject to a leverage-based pricing grid. If the Company's leverage ratio, as defined under the Credit Facility, is greater than 1.5, the interest rate will be LIBOR plus a margin of 3.25%; if the leverage ratio is between 1.0 and 1.5, the interest rate will be LIBOR plus a margin of 3.00%; and if the leverage ratio is below 1.0, the interest rate will be LIBOR plus a margin of 2.75%. In December 2008, the Company entered into a floating-to-fixed interest rate swap, as discussed below, fixing the interest rate of the term loan at 1.89% plus the applicable margin (2.75% at September 30, 2009) for the remaining term.

The term loan requires quarterly principal reductions of \$6.25 million during the first year, \$8.75 million during the second year and \$11.25 million during each of the third and fourth years of the agreement, with a balloon payment due at maturity in September 2012. The Credit Facility is collateralized by substantially all of the Company's domestic property and is guaranteed by each of the Company's domestic subsidiaries, excluding any noncontrolling interests, and is secured by a pledge agreement.

The Credit Facility contains a number of covenants that, among other things, restrict the ability of the Company and certain of its subsidiaries to dispose of assets, incur additional indebtedness or issue preferred stock, pay dividends or make other distributions, enter into certain acquisitions, repurchase equity interests or subordinated indebtedness, issue or sell equity interests of the Company's subsidiaries, engage in mergers or acquisitions or certain transactions with subsidiaries and affiliates, and that otherwise restrict corporate activities.

The financial covenants under the Credit Facility consist of a leverage ratio and a fixed charges coverage ratio. The leverage ratio is computed as total debt outstanding at the end of the quarter divided by the trailing twelve months Earnings Before Interest, Taxes, Depreciation and Amortization ( EBITDA ), excluding certain cash and non-cash charges. The fixed charges coverage ratio is computed as EBITDA, adjusted for both the trailing twelve months capital expenditures and cash taxes paid, divided by the trailing twelve months interest charges plus all payments of principal made during the previous twelve months.

A breach of any of the covenants or the inability to comply with the required financial ratios could result in a default under the Credit Facility. In the event of any such default, the lenders could elect to declare all borrowings outstanding under the Credit Facility, together with any accrued interest and other fees, to be due and payable. If the Company were unable to repay the indebtedness upon its acceleration, the lenders could proceed against the underlying collateral.

The Company was in compliance with all of the Credit Facility covenants as of September 30, 2009.

Table of Contents

The Company's related party debt, which totaled approximately \$2.8 million as of September 30, 2009 and June 30, 2009, consists primarily of the debt owed to the former principals of Sierra Design Group (SDG). See Note 5, *Related Party Transactions*.

*Interest Rate Swap Agreement*

In December 2008, the Company entered into a floating-to-fixed interest rate swap agreement with an original notional value of \$218.8 million and a maturity date of September 26, 2012. This interest rate swap serves to fix the floating LIBOR based debt under the term loan to fixed rate debt at an interest rate of 1.89% plus the applicable margin to manage the risk exposure to interest rate fluctuations.

The Company has documented and designated this interest rate swap as a cash flow hedge. Based on the assessment of effectiveness using statistical regression, the Company determined that the interest rate swap is effective. Effectiveness testing of the hedge relationship and measurement to quantify ineffectiveness is performed each fiscal quarter using the hypothetical derivative method. As the interest rate swap qualifies as a cash flow hedge, the Company adjusts the cash flow hedge on a quarterly basis to its fair value with a corresponding offset to accumulated OCI. The interest rate swap has been and is expected to remain highly effective for the life of the hedge. Effective amounts are reclassified to interest expense as the related hedged expense is incurred. Any ineffectiveness is reclassified from accumulated other comprehensive income to other income (expense). As of September 30, 2009, the Company had no ineffectiveness on its cash flow hedge. Amounts related to the swap expected to be reclassified from other comprehensive income to interest expense in the next twelve months total \$2.5 million.

Additional information on the Company's interest rate swap is as follows:

Interest Rate Swaps	Balance Sheet Location	Fair Value (in 000s)	Location of Offsetting Balance
Cash flow hedge \$200.0 million LIBOR based debt	Accrued Liabilities	\$ 1,294	Accumulated other comprehensive income (loss)

**5. RELATED PARTY TRANSACTIONS**

In connection with the previous acquisition of SDG, the consideration paid included subordinated debt issued to the former principals of SDG. Certain of the former principals are now employees of the Company. The subordinated debt totaled \$2.8 million, all of which was included in current maturities, at both September 30, 2009 and June 30, 2009.

The notes payable to the former principals of SDG are payable in annual installments plus interest at LIBOR plus 2% through calendar year 2009 (3.12% as of September 30, 2009). At the Company's discretion, the principal and accrued interest thereon can be paid in cash, or can be converted into shares of the Company's common stock using the average stock price for the 20 business days prior to the delivery of such shares.

Edgar Filing: BALLY TECHNOLOGIES, INC. - Form 10-Q

The Company leases a warehouse and office facility from an entity owned by a former officer of the Company. Rental payments totaled \$120,000 for both the three months ended September 30, 2009 and 2008.

Table of Contents**6. SHARE-BASED COMPENSATION***Employee Stock Purchase Plan*

In February 2008, the Company's stockholders approved the 2008 Employee Stock Purchase Plan (the 2008 ESPP Plan). The 2008 ESPP Plan provides that eligible employees are able to contribute up to 10% of their eligible earnings towards the quarterly purchase of the Company's common stock. The employee's purchase price is equal to 85% of the fair market value. During the three months ended September 30, 2009 and 2008, employees purchased 13,114 shares and 10,314 shares of common stock for approximately \$0.5 million and \$0.3 million, respectively, under the 2008 ESPP Plan.

*Share-Based Award Plans*

Stock option activity as of and for the three months ended September 30, 2009 is summarized below:

	Shares (in 000s)	Exercise Price (per share)	Weighted Average Remaining Contractual Term (years)	Aggregate Intrinsic Value (in 000s)
Balance outstanding as of June 30, 2009	6,903	\$ 17.96		\$ 85,222
Granted	98	34.73		
Exercised	(722)	12.73		
Forfeited or expired	(14)	31.12		
Balance outstanding as of September 30, 2009	6,265	\$ 18.79	5.32	\$ 123,226
Exercisable as of September 30, 2009	4,848	\$ 17.32	5.06	\$ 102,413

Restricted stock and RSU activity as of and for the three months ended September 30, 2009 is summarized below:

	Restricted Stock (in 000s)	Weighted Average Grant Date Fair Value (per share)	RSUs (years)	Weighted Average Grant Date Fair Value (in 000s)
Balance outstanding as of June 30, 2009	310	\$ 30.42	623	\$ 17.71
Granted	48	34.85	42	38.98
Vested	(15)	17.65		
Forfeited or expired				
Balance outstanding as of September 30, 2009	343	\$ 31.61	665	\$ 19.06
Vested as of September 30, 2009			545	\$ 16.57

*Share-Based Compensation*

The following table presents share-based compensation expense included in the Company's unaudited condensed consolidated statements of operations:

	<b>Three Months Ended September 30,</b>	
	<b>2009</b>	<b>2008</b>
	<b>(in 000s)</b>	
Selling, general and administrative	\$ 2,641	\$ 2,895
Research and development	819	626
Cost of gaming equipment and systems and operations	39	37
Share-based compensation expense before tax	3,499	3,558
Income tax benefit	1,225	1,245
Net share-based compensation expense	\$ 2,274	\$ 2,313

Table of Contents

As of September 30, 2009, there was \$12.4 million of total unrecognized compensation expense related to the unvested portion of stock options which will be recognized over the subsequent 1.78 years. In addition, as of September 30, 2009, there was \$9.5 million of total unrecognized compensation expense related to the unvested portion of restricted stock and RSUs which will be recognized over the subsequent 1.66 years.

**7. STOCKHOLDERS EQUITY, WARRANTS AND RIGHTS**

*Warrants*

The Company issued 100,000 stock purchase warrants in February 2004 in connection with an acquisition. The strike price of the warrant is \$24.69 with a term of seven years. During the three months ended September 30, 2009, 30,269 stock purchase warrants were exercised for the first time and converted into 11,753 shares of the Company's common stock. The exercises were cashless and net shares were issued for the difference between the strike price of the warrant and the market value of the Company's common stock upon exercise.

*Share Repurchase Plan*

On January 28, 1999, the Company's Board of Directors approved a share repurchase plan under which, subject to price and market conditions, purchases of shares can be made from time to time in the open market or in privately negotiated transactions using available cash. The Company's share repurchase limit set on August 12, 2008 under its existing share repurchase plan was \$100 million.

During the three months ended September 30, 2009 and 2008, the Company repurchased 392,151 shares and 326,000 shares of common stock for \$15.2 million and \$11.0 million, respectively, under the share repurchase plan. As of September 30, 2009, \$46.5 million is available to be repurchased under the share repurchase plan in future periods.

*Special Stock*

The Company's Articles of Incorporation authorize the issuance of up to 10,000,000 shares of special stock ( Special Stock ). The Special Stock may be issued from time to time in one or more series, each having such designations, preferences and relative, participating, optional or other special rights, qualifications, limitations or restrictions as shall be stated and expressed in the resolution providing for the issuance of Special Stock or any series thereof adopted by the Board of Directors. Special Stock consists of non-voting stock where no holder of the Special Stock shall be entitled to vote at any meeting of stockholders or otherwise, except as may be specifically provided by law or as approved by the Board of Directors in certain limited circumstances at the time of the stock issuance.

To date, there have been four series of Special Stock authorized for issuance: the Initial Series, the Series B, the Series E and the Series F. In June 1996, the Company issued shares of Series E Special Stock to certain holders of the Company's 7 1/2% Convertible Subordinated

Debentures (which were retired in 1996) who elected to receive such stock in lieu of receiving common stock. The holders of shares of Series E Special Stock have no voting rights except as required by law. A total of 115 shares of Series E Special Stock remain outstanding. No other shares of Special Stock remain outstanding.

**8. INCOME TAXES**

The provision for income taxes for interim periods is based on the current estimate of the annual effective tax rate expected to be applicable for the full fiscal year and the impact of discrete items, if any, and is adjusted as necessary for quarterly events. The effective income tax rate was approximately 35% and 36% for the three months ended September 30, 2009 and 2008, respectively. The lower rate in fiscal 2010 predominantly reflects the reinstatement of the research and development tax credit which had not been in effect for the three months ended September 30, 2008 and which is currently set to expire again on December 31, 2009.

Table of Contents

The Internal Revenue Service ( IRS ) commenced examination of the Company s United States federal income tax returns for 2003 through 2005 in the fourth quarter of 2006. Throughout the examination, the IRS has proposed, and management has agreed to, certain adjustments related to the open tax years that have been recorded in the income tax provision. In January 2009, the IRS completed its field examination of the open tax years and issued a Revenue Agent s Report ( RAR ). Also in January 2009, the Company paid \$3.4 million in tax and \$1.2 million in interest to the IRS to settle certain agreed adjustments. The Company filed a formal protest regarding certain unagreed adjustments and the case was assigned to the IRS Laguna Niguel Appeals Office in August 2009. If successful in defending the Company s position, it would result in a reduction to unrecognized tax benefits and a corresponding reduction of income tax provisions of approximately \$4.8 million, excluding interest. If the IRS were to prevail in full, it would result in additional income tax provisions of approximately \$5.4 million, plus interest, for the tax years through 2005. No date has been set for the opening conference with the IRS Appeals Officer as of the date of this filing.

It is reasonably possible that within the next twelve months the Company will resolve some of the matters presently under consideration with the IRS which may increase or decrease unrecognized tax benefits for the open tax years. However, an estimate of such increase or decrease cannot reasonably be made.

As of September 30, 2009, the Company has \$17.3 million related to uncertain tax positions, excluding related accrued interest and penalties, \$15.5 million of which, if recognized, would impact the effective tax rate. As of September 30, 2009, the Company has \$5.3 million accrued for the payment of interest and penalties.

**9. COMMITMENTS AND CONTINGENCIES**

*Litigation*

Liabilities for loss contingencies arising from claims, assessments, litigation, fines and penalties, or other sources are recorded when it is probable that a liability has been incurred and the amount of the liability can be reasonably estimated. The Company has not recorded any loss accruals for these contingencies unless otherwise noted below.

On December 7, 2004, IGT filed a patent infringement lawsuit against the Company in the United States District Court for the District of Nevada. The complaint asserted that the Company s wheel-based games, such as Monte Carlo , Lucky Wheel and Cash For Life , its games with a reel in the top box, such as Bonus Frenzy , and its iVIEW products infringed on patents held by IGT, and sought injunctive relief and damages in unspecified amounts. As part of the defense, the Company asserted counterclaims seeking damages and other relief against IGT, including claims that IGT s patents were invalid, unenforceable and not infringed, as well as several claims that IGT engaged in anti-competitive conduct in violation of state and federal antitrust laws. In October 2008, the court granted the Company s motions for summary judgment, ruling that IGT s two wheel patents and a touch-screen player-tracking patent were invalid; that even if the patents were valid, the Company s wheel-based games at issue would not infringe; and that certain of its iVIEW products do not infringe the two asserted player-tracking patents. The court also found issues of material fact regarding IGT s alleged inequitable conduct before the U.S. Patent and Trademark Office and denied IGT s motions to dismiss those claims, leaving them for trial. However, the court postponed the trial until after IGT has appealed the court s summary judgments on patent infringement and validity. IGT appealed, and on October 22, 2009, the U.S. Court of Appeals for the Federal Circuit affirmed the District Court s decision in its entirety.

## Edgar Filing: BALLY TECHNOLOGIES, INC. - Form 10-Q

In April 2006, IGT filed a patent infringement lawsuit against the Company in the United States District Court for the District of Delaware. The complaint asserted that the Company's Bally Power Bonusing products infringe patents held by IGT, and sought injunctive relief and damages in unspecified amounts. Of the nine patents and 200 claims originally filed in the case by IGT, all but three patents and eight claims have been dismissed. On April 28, 2009, the District Court issued an order finding that the Company's Power Promotions, Power Bank, and SDS/CMP Power Winners products do not infringe IGT's patents. The court also found that the Company's ACSC Power Winners and ACSC Power Reward products infringe some patent claims asserted by IGT, but not others. Appeals by both parties are expected. In the meantime, the Company has undertaken technical changes to ensure non-infringement for the two products partially in question. The Company does not believe that potential infringement damages, if any, would be material to its financial position as the revenues from these two products to date have not been material.

In September 2006, the Company filed a patent infringement lawsuit against IGT in the United States District Court for the District of Nevada. The complaint asserted that certain of IGT's bonus wheel games infringe a patent held by the Company, and sought injunctive relief and damages. IGT filed an answer generally denying the claims and filed a motion for summary judgment which was granted in September 2008 declaring the wheel patent obvious and therefore invalid. On October 22, 2009, the Federal Appeals Court affirmed the District Court's decision.

Table of Contents

The Company is also a party to various lawsuits relating to routine matters incidental to its business. Management does not believe that the outcome of such litigation, including the matters discussed above, in the aggregate, will have a material adverse effect on its consolidated financial position, results of operations or cash flows.

**10. SEGMENT AND GEOGRAPHICAL INFORMATION**

The Company operates in two business segments: (i) Bally Gaming Equipment and Systems which designs, manufactures, assembles, distributes and operates gaming devices and licenses computerized monitoring and bonusing systems for gaming devices, and (ii) Casino Operations which owns and operates a casino in Vicksburg, Mississippi.

Certain expenses related to Company-wide initiatives are managed at the corporate level and are not allocated to either operating segment. The accounting policies of these segments are consistent with the Company's policies for the unaudited consolidated condensed financial statements.

	Three Months Ended September 30,	
	2009	2008
(in 000s)		
<b>Revenues:</b>		
Gaming Equipment and Systems		
Gaming Equipment	\$ 62,003	\$ 107,240

## **ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

We begin this section with a summary of our key operating business divisions as of September 30, 2009. The overview is followed by a detailed analysis of our results of operations and our financial condition and liquidity as of and for the three months ended September 30, 2009 and 2008. References to we, our, us, or the Company refer to Bally Technologies, Inc. and its subsidiaries.

### **Forward Looking Statements**

Certain statements made or incorporated by reference in this Quarterly Report on Form 10-Q, in our other filings with the Securities and Exchange Commission (SEC), in our press releases and in statements made by or with the approval of authorized personnel constitute forward looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the Securities Act) and Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act), and are subject to the safe harbor created thereby. Forward looking statements reflect intent, belief or current expectations with respect to, among other things, future events and financial trends affecting us. Forward looking statements are typically identified by words such as believes, estimates, expects, anticipates, plans, should, would and expressions.

Although we believe the expectations reflected in any forward looking statements are reasonable, readers are cautioned that forward looking statements involve known and unknown risks and uncertainties, are not guarantees of future performance and that actual results, performance or achievements may differ materially from any future results, performance or achievements expressed or implied by such forward looking statements. These differences can arise as a result of the risks described in Item 1A, Risk Factors included in our Annual Report on Form 10-K for the fiscal year ended June 30, 2009 (the 2009 10-K), as well as other factors such as the impact of competition, the impact of any prolonged downturn in the economy or the financial markets, our ability to service debt, product development, foreign operations, dependence on key personnel, the ability to integrate future acquisitions, regulation by gaming authorities, the outcome of pending litigation matters, gaming taxes, market risks and the potential adverse effects to our financial condition, results of operations or prospects.

Forward looking statements in this Quarterly Report on Form 10-Q speak only as of the date hereof, and forward looking statements in documents incorporated by reference speak only as of the date of those documents. Unless otherwise required by law, we undertake no obligation to publicly update or revise these forward looking statements, whether as a result of new information, future events or otherwise. In light of these risks and uncertainties, we cannot assure you that the forward looking statements contained in this Quarterly Report on Form 10-Q will, in fact, transpire.

Table of Contents

**Business Overview**

We are a diversified, worldwide gaming company that designs, manufactures, distributes and operates gaming devices and computerized monitoring and accounting systems for gaming devices. In addition to selling our gaming devices, we also offer our customers a wide range of rental options. Our primary technologies include gaming devices for land-based, riverboat and Native American casinos, video lottery and central determination markets and specialized system-based hardware and software products. Our specialized system-based hardware and software products provide casinos with a wide range of marketing, data management, accounting, security and other software applications and tools to more effectively manage their operations. We also own and operate the Rainbow Casino, a dockside riverboat casino in Vicksburg, Mississippi.

We derive our revenue from the following four sources:

- *Gaming Equipment* Sale of gaming devices and related equipment, parts and conversion kits;
- *Gaming Operations* Operation of linked progressive systems, video lottery and centrally determined systems and the rental of gaming devices and content;
- *Systems* Sale of computerized monitoring systems and related recurring hardware and software maintenance revenue; and
- *Casino Operations* Operation of the Rainbow Casino.

We report our revenue and income in two reportable segments: the Bally Gaming Equipment and Systems segment, which includes our Gaming Equipment, Gaming Operations and Systems divisions, and our Casino Operations segment. Our total revenues were \$196.5 million and \$237.4 million for the three months ended September 30, 2009 and 2008, respectively. Revenue from our Bally Gaming Equipment and Systems segment represented approximately 95% and 96% of our total revenues for the three months ended September 30, 2009 and 2008, respectively.

We review certain financial measures in assessing our financial condition and operating performance not only in connection with creating our forecasts and in making comparisons to financial results from prior periods, but also in making comparisons to our competitors' financial results. We focus on fluctuations in revenue, cost and gross margin and also pay close attention to improvements in consolidated operating income, net income, diluted earnings per share, adjusted EBITDA (earnings before interest, taxes, depreciation and amortization, including asset charges and share-based compensation), cash flows from operations and free cash flow (cash flows from operating activities less capital expenditures) as they are key indicators of our success in growing our business. We also measure changes in selling, general and administrative expenses as a percent of revenue, which indicate management's ability to control costs, as well as changes in research and development as a percent of revenue, which demonstrate investment in our technology assets. The measures listed above are not a comprehensive list of all factors considered by us in assessing our financial condition and operating performance, and we may consider other individual measures as required by trends and discrete events arising in a specific period, but they are the key indicators that we generally weigh most heavily from period to period.

We are currently operating in a challenging economic environment and the combination of economic uncertainty, lower demand for replacement products and reduced opportunities from new or expanded markets has negatively impacted our consolidated results. The gaming sector was negatively impacted by lower consumer spending and limited resources available to fund capital projects. The replacement cycle for gaming machines in North America continues to be sluggish, but we are cautiously optimistic that gaming operators' replacement game buying demand will begin to improve in calendar 2010. In fiscal year 2010, we have or will be releasing significantly more games than last year along with a new cabinet and operating system. During the three months ended September 30, 2009 and 2008, we sold 2,418 and 5,199 new gaming devices in the United States and Canada, respectively. The adverse affects of this sluggish demand for game sales on our revenues is partially offset by the performance of gaming operations, our systems business, and our continued expansion into international markets during the period.

Edgar Filing: BALLY TECHNOLOGIES, INC. - Form 10-Q

International revenues were \$35.5 million and \$34.2 million for the three months ended September 30, 2009 and 2008, respectively.

Table of Contents

Despite the challenging economic conditions, we have experienced continued strength in Gaming Operations and Systems revenues during the period. Gaming Operations revenues were \$71.3 million and \$67.8 million during the three months ended September 30, 2009 and 2008, respectively. Revenues were higher than in the prior periods due primarily to the continued performance of existing and new premium game units and expansion in our centrally determined business. Gaming operations margins improved due to better management of our capital, more strategic placements and supply chain efficiencies. In addition, we experienced significant growth in the installed base of our centrally determined systems which increased by approximately 5,435 units over September 30, 2008 due primarily to increased placements, especially in the Class II and centrally determined markets. We have just released, or will soon release, some new products including our new spinning-wheel game, Cash Wheel, our all new Digital Tower Series platform, which includes 55555 Jackpot, Fireball, and our Jumbo and DualVision cabinets. We continue to focus our efforts on the introduction of new and innovative games and cabinets both for our video and stepper platforms.

Systems revenues were \$54.0 million and \$52.3 million for the three months ended September 30, 2009 and 2008, respectively. Maintenance revenue increased 10% in the three months ended September 30, 2009, when compared to the same period in the prior year as a result of an increased install base of customers on our systems. For systems, the new SDS® Version 11, which runs on both Unix and Windows off the same code base, our iVIEW Display Manager, and our Power Bonusing products are generating positive interest. We just released our Version 11.0 systems products, and the initial installations have been well received. In October 2009, a large resort and casino in southern California signed an agreement with the Company to provide up to 5,000 iVIEW Display Manager controllers. Over the last few years, we have continued our focus on the basics of enterprise software development, delivery, customer support and services discipline, on improving core products, providing quality upgrade options for our customers, and increasing customer satisfaction levels through better service and support which are all serving us well in these difficult economic times.

There have been several recent developments fueled by the economic situation which we believe will benefit us in the long term. Domestically, we are focused on the new opportunities including the potential expansion of gaming in Ohio, Illinois, Kansas, Iowa, Maryland, Massachusetts, and New Hampshire. The breadth and timing of such opportunities remains uncertain due to the political process in these jurisdictions as well as the difficult credit environment facing our customers and the risk of continued economic uncertainty. We are also engaged in expanding our position in Mexico as it moves to Class III gaming, as well as opportunities in the Italian and Australian markets. Further, as we continue to grow and become a strong player in Asia, opportunities are anticipated to arise in that region which would enable us to expand internationally.

Net cash provided by operating activities was \$39.9 million and \$25.2 million during the three months ended September 30, 2009 and 2008, respectively. Cash flow from operations increased 59% for the three months ended September 30, 2009, when compared to the same period last year reflecting improved operating results and cash flow management. Since September 30, 2008, we have also reduced our debt by \$85.9 million, including paying down the revolving line of credit to zero.

Revenues from the Rainbow Casino decreased in the three months ended September 30, 2009 to \$9.2 million from \$10.0 million in the three months ended September 30, 2008. This decrease reflects the impact of competition from a new casino that opened in late October 2008, other nearby expansions, and the current challenging economic environment.

Management continuously monitors and reviews its selling, general and administrative expenses in comparison to revenues. Selling, general and administrative expenses were 23.9% of revenues and declined as a percentage of revenue during the three months ended September 30, 2009, when compared to 24.1% during the same period in the prior year.

**Results of Operations**

Our results of operations are summarized below:

	Overall Consolidated Operating Results Three Months Ended September 30,					
	2009		% Rev	2008		% Rev
Revenues	\$	196.5	100%	\$	237.4	100%

Net income attributable to Bally Technologies, Inc.	\$	30.6	16%	\$	30.3	13%

Table of Contents***Bally Gaming Equipment and Systems***

We are one of the leading providers of technology to the gaming industry. The Bally Gaming and Systems segment consists of three primary sub-groups: Gaming Equipment, which includes the sale of gaming devices and related equipment, parts and conversion kits; Gaming Operations, which includes the operation of wide-area progressive, video lottery and centrally determined systems and the rental of gaming devices and content; and Systems, which includes the sale and support of computerized monitoring systems and related recurring hardware and software maintenance revenue.

The summary financial results and operating statistics for Bally Gaming Equipment and Systems are as follows:

	2009		Three Months Ended September 30, % Rev		2008		% Rev	
	(dollars in millions)							
<b>Revenues:</b>								
Gaming Equipment	\$	62.0	33%	\$	107.3	47%		
Gaming Operations		71.3	38%		67.8	30%		
Systems		54.0	29%		52.3	23%		
Total revenues	\$	187.3	100%	\$	227.4	100%		
<b>Gross Margin:</b>								
Gaming Equipment(1)	\$	29.5	48%	\$	47.4	44%		
Gaming Operations		52.2	73%		47.2	70%

(1) Daily fee revenue from approximately 7,844 units included in the centrally determined systems end of period installed base total as of September 30, 2008 was deferred based upon the completion of certain contractual commitments necessary to recognize the revenue under our revenue recognition policy.

Table of Contents

**Three Months Ended September 30, 2009 Compared to Three Months Ended September 30, 2008**

Total revenues for our Bally Gaming Equipment and Systems segment decreased \$40.1 million, or 18%, in the three months ended September 30, 2009, when compared to the same period last year, as a result of the following:

**Gaming Equipment Revenue.** Gaming Equipment revenue decreased by \$45.3 million, or 42%, to approximately \$62.0 million primarily as a result of a 40% decrease in new gaming device sales to 3,936 units in the three months ended September 30, 2009, when compared to 6,598 units in the same period last year. In addition, during three months ended September 30, 2008, we sold 465 OEM units. ASP increased to \$14,115 in the three months ended September 30, 2009 compared to \$14,062 in the same period last year. The increase in ASP was driven by sales of premium cabinets.

**Gaming Equipment Gross Margin.** Gaming Equipment gross margin increased to 48% in the three months ended September 30, 2009 from 44%, in the same period last year, primarily as a result of a decrease in inventory write-downs of \$2.2 million and a decrease in material costs during the same period.

**Gaming Operations Revenue.** Gaming Operations revenue increased \$3.5 million, or 5%, to approximately \$71.3 million in the three months ended September 30, 2009, when compared to the same period last year, primarily as a result of an increase in participation, rental and license revenue. The improvement in participation and rental revenue was primarily from our installed base of devices connected to our centrally determined systems (Class II, Video Lottery and iVIEW network) that increased 12.5% from 43,523 units as of September 30, 2008 to 48,958 units as of September 30, 2009 primarily due to units added in Alabama as well as the recognition of previously deferred units in Florida. The improvement in license revenue was primarily from Washington.

**Gaming Operations Gross Margin.** Gross margin increased to 73% in the three months ended September 30, 2009 from 70%, in the same period last year, primarily as a result of the increases in participation, rental and license revenue which had little associated variable costs. Cost of gaming operations decreased \$1.5 million, or 7%, in the three months ended September 30, 2009, when compared to the same period last year, due primarily to a reduction in rental costs, gaming taxes, parts costs and royalty expense.

**Systems Revenue.** Systems revenue increased \$1.7 million, or 3%, to approximately \$54.0 million in the three months ended September 30, 2009 when compared to the same period last year primarily as a result of higher maintenance and service revenue as well as the continued acceptance of our products, including our iVIEW player-communication network, Business Intelligence, SDS for Windows, and suite of bonusing products. Maintenance and service revenue increased \$1.2 and \$0.6 million, respectively, in the three months ended September 30, 2009, when compared to the same period last year, as a result of the increased install base of customers on our systems.

**Systems Gross Margin.** Systems gross margin decreased to 67% in the three months ended September 30, 2009 from 68%, in the same period last year, primarily as a result of an increase in parts and freight expense associated with several large go-lives during the current quarter.

Table of Contents

*Selling, General and Administrative Expenses.* Selling, general and administrative expenses decreased \$5.3 million, or 11%, in the three months ended September 30, 2009, when compared to the same period last year, due primarily to decreases in salaries and related expenses, consulting fees and legal fees. The decrease in salaries and related expenses was primarily due to a decrease in commissions and bonus expense with the reduction in revenue. The decrease in consulting expense was due to a companywide initiative to reduce the amount of outside consulting work and convert individuals to full time positions only where necessary. The decrease in legal fees was due to a reduction in litigation during the same period.

*Research and Development Costs.* Research and development costs decreased \$0.4 million, or 2%, in the three months ended September 30, 2009, when compared to the same period last year. The Company remains focused on its technology assets due to the competitive landscape that requires a continual investment in future generations of gaming products and systems.

*Depreciation and Amortization Expense.* Depreciation and amortization expense increased \$0.7 million, or 17%, in the three months ended September 30, 2009, when compared to same period last year, primarily as a result of additions of property and equipment and leased gaming equipment year over year and certain core technology assets acquired late in the first quarter of fiscal 2009 amortizing during the current period.

**Casino Operations**

Our Rainbow Casino is one of five casinos currently operating in the Vicksburg, Mississippi market. Our casino draws customers primarily from within a 75-mile radius surrounding Vicksburg which includes Jackson, Mississippi. The summary of our financial results and operating statistics for our Casino Operations is as follows:

	2009	Three Months Ended September 30, % Rev		2008	% Rev
		(dollars in millions)			
Revenue	\$ 9.2	100%		\$ 10.0	100%
Selling, general and administrative	\$ 1.8	20%		\$ 2.1	21%
Depreciation and amortization	\$ 1.0	11%		\$ 0.7	7%
Operating income	\$ 2.5	27%		\$ 2.9	29%
Operating statistics:					
Average number of gaming devices	805			832	
Average number of table games	6			10	

**Three Months Ended September 30, 2009 Compared to Three Months Ended September 30, 2008**

*Casino Operations.* Revenue decreased by 8% for the three months ended September 30, 2009 when compared to the same period last year due primarily to increased competition from the opening of a competitor's expansion project in the fourth quarter of fiscal 2008. In addition, a downturn in the economy reduced patronage during the quarter. The Mississippi River counties reported a 10% decline in gaming revenues during the three months ended September 30, 2009, when compared to the same period last year. In addition, there was a 3% reduction in the

## Edgar Filing: BALLY TECHNOLOGIES, INC. - Form 10-Q

average number of gaming devices at our property and a 40% reduction in the average number of table games during the three months ended September 30, 2009, when compared to the same period last year. The reduction in gaming devices was primarily due to the removal of certain unprofitable games. The reduction in table games had a minimal effect on revenue because they were seldom opened due to lack of demand.

*Selling, General and Administrative Expenses.* Selling, general and administrative expenses decreased by \$0.3 million, or 14%, for the three months ended September 30, 2009, when compared to the same period last year, due primarily to a decrease in advertising and promotional expenditures during the period.

*Depreciation and Amortization Expense.* Depreciation and amortization expense increased by \$0.3 million, or 43%, for the three months ended September 30, 2009, when compared to the same period last year, as a result of the increase in the number of newer slot machines deployed during the period.

Table of Contents**Parent Company**

The summary financial results of Bally Technologies, Inc., our parent entity, are set forth below. These results also include certain other income and expenses that are otherwise not allocated to a specific business segment.

	<b>Three Months Ended September 30,</b>	
	<b>2009</b>	<b>2008</b>
	<b>(dollars in millions)</b>	
General and administrative	\$ 3.6	\$ 8.2
Depreciation and amortization	0.0	0.3
Operating loss	\$ 3.6	\$ 8.5
Other income (expense)		
Interest income	\$ 0.7	\$ 1.2
Interest expense	(3.3)	(5.1)
Other, net	0.1	(2.6)
Total other expense	\$ (2.5)	\$ (6.5)
Income tax expense	\$ (17.0)	\$ (17.1)
Net income (loss) attributable to noncontrolling interests	\$ 0.7	\$ (0.5)

**Three Months Ended September 30, 2009 Compared to Three Months Ended September 30, 2008**

*General and Administrative Expenses.* General and administrative expenses decreased \$4.6 million, or 56%, in the three months ended September 30, 2009, when compared to the same period last year, primarily as a result of a decrease in accounting fees of \$2.8 million and a decrease in legal fees of \$1.7 million during the same period.

*Other Income (Expense).* Other expense decreased \$4.0 million, or 62%, in the three months ended September 30, 2009, when compared to the same period last year. Other expense decreased primarily due to the write-off of previously capitalized debt issuance costs of \$0.8 million upon the financing of the Company's new term loan and revolving credit facility in the prior year quarter and a decrease in losses incurred on foreign currency transactions as a result of the weakening U.S. dollar. Interest expense decreased \$1.8 million primarily due to a reduction in both the principal balance and the interest rate on the term loan which decreased from 5.80% in three months ended September 30, 2008 to 4.64% in the same period this year.

*Income Tax Expense.* The effective income tax rate for the three months ended September 30, 2009 and 2008 was 35% and 36%, respectively. At the end of each interim period, we make our best estimate of the effective tax rate expected to be applicable for the full fiscal year and the impact of discrete items, if any, and adjust the quarterly rate, as necessary.

*Net income (loss) attributable to noncontrolling interests.* Net income (loss) attributable to noncontrolling interests increased in the three months ended September 30, 2009, when compared to the same period last year, due primarily to an increase in net earnings from certain noncontrolling

interests.

Table of Contents**Financial Condition and Liquidity****Working Capital**

	September 30, 2009	June 30, 2009	Increase (decrease)	
			Amount	%
	(in 000s)			
Cash and cash equivalents	\$ 84,867	\$ 64,598	\$ 20,269	31%
Total long-term debt, including current maturities	\$ 202,851	\$ 209,087	\$ (6,236)	(3)%
Total current assets	\$ 433,780	\$ 423,639	\$ 10,141	2%
Total current liabilities	171,867	178,050	(6,183)	(3)%
Net working capital	\$ 261,913	\$ 245,589	\$ 16,324	7%

As of September 30, 2009 and June 30, 2009, we had \$84.9 million and \$64.6 million, respectively, in consolidated cash and cash equivalents which included approximately \$3.2 million and \$3.1 million, respectively, of cash utilized in our Casino Operations segment that is held in vaults, cages or change banks. Pursuant to various state gaming regulations, certain cash accounts are maintained to ensure availability of funds to pay wide-area progressive jackpot awards in installments rather than in one lump-sum. At September 30, 2009 and June 30, 2009, these accounts had an aggregate value of approximately \$9.6 million and \$9.1 million, respectively, which are classified as restricted cash in our unaudited condensed consolidated balance sheets. In addition, we purchase U.S. Treasury Strip Securities for the benefit of jackpot winners who elect to receive winnings in annual or weekly installment payments. These securities are included in restricted long-term investments in the accompanying unaudited condensed consolidated balance sheets, and totaled \$12.7 million and \$12.1 million as of September 30, 2009 and June 30, 2009, respectively.

Our net working capital increased \$16.3 million in the three months ended September 30, 2009, when compared to the same period last year, and was primarily affected by a \$20.3 million increase in cash and cash equivalents (see *Cash Flow Summary*) and by the following components:

- A decrease of \$16.4 million in prepaid and refundable income tax due to the receipt of a refund and the use of prepayments for the current quarter's estimated tax;
- An increase of \$6.5 million in current accounts and notes receivable due primarily to certain new systems contracts and international sales during the period;
- A decrease of \$5.8 million in current deferred revenue, offset by a \$2.8 million decrease in current deferred cost of revenue, due to the recognition of previously deferred sales and related costs in accordance with our revenue recognition policy;

## Edgar Filing: BALLY TECHNOLOGIES, INC. - Form 10-Q

- A decrease of \$4.1 million in accounts payable and accrued liabilities due primarily to reductions in accounting and legal fees and inventory expenditures. Inventory expenditures have declined due to improved processes in managing cash, including the implementation of purchasing and inventory controls; and
- An increase of \$2.5 million in current maturities of long-term debt due primarily to the increase in quarterly note payments from \$6.25 million to \$8.75 million beginning in December 2009, offset by reductions in capital lease obligations which were paid in full in April 2009.

On September 29, 2008, we entered into a \$225.0 million term loan and a \$75.0 million revolving credit facility (collectively, the Credit Facility ). We also have the option to request an increase in the size of the term loan and/or revolving Credit Facility by up to \$50.0 million in the aggregate provided that certain conditions are met. The proceeds from the Credit Facility and cash on hand of \$14.6 million were used to repay the then existing bank term loans totaling \$289.6 million. The Company used cash-on-hand to pay for transaction fees and expenses totaling \$10.7 million which are being amortized over the term of the Credit Facility.

As of September 30, 2009, there was approximately \$75.0 million of undrawn availability under the revolving credit facility. Availability under the revolving credit facility is reduced to the extent of outstanding letters of credit.

Table of Contents

The interest rate on the Credit Facility is subject to a leverage based pricing grid. If our leverage ratio, as defined under the Credit Facility, is greater than 1.5, the interest rate will be LIBOR plus a margin of 3.25%; if the leverage ratio is between 1.0 and 1.5, the interest rate will be LIBOR plus a margin of 3.00%; and if the leverage ratio is below 1.0, the interest rate will be LIBOR plus a margin of 2.75%. In December 2008, we entered into a floating-to-fixed interest rate swap to fix the floating LIBOR based debt under the term loan to fixed rate debt at an interest rate of 1.89% plus an applicable margin (2.75%, as of September 30, 2009) for the remaining term.

The term loan requires quarterly principal reductions of \$6.25 million during the first year, \$8.75 million during the second year and \$11.25 million during each of the third and fourth years of the agreement, with a balloon payment due at maturity in September 2012. The Credit Facility matures in September 2012. The Credit Facility is collateralized by substantially all of our domestic property and is guaranteed by each of our domestic subsidiaries, excluding any noncontrolling interests, and is secured by a pledge agreement.

The Credit Facility contains a number of covenants that, among other things, restrict our ability and certain of our subsidiaries to dispose of assets, incur additional indebtedness or issue preferred stock, pay dividends or make other distributions, enter into certain acquisitions, repurchase equity interests or subordinated indebtedness, issue or sell equity interests of our subsidiaries, engage in mergers or acquisitions or certain transactions with subsidiaries and affiliates, and that otherwise restrict corporate activities.

The financial covenants under the Credit Facility consist of a leverage ratio and a fixed charges coverage ratio. The leverage ratio is computed as total debt outstanding at the end of the quarter divided by the trailing twelve months Earnings Before Interest, Taxes, Depreciation and Amortization ( EBITDA ), excluding certain cash and non-cash charges. The fixed charges coverage ratio is computed as EBITDA, adjusted for both the trailing twelve months capital expenditures and cash taxes paid, divided by the trailing twelve months interest charges plus all payments of principal made during the previous twelve months. We were in compliance with all of the covenants under the Credit Facility as of September 30, 2009.

Management believes that cash flows from current operating activities will provide us with sufficient capital resources and liquidity to operate our business for at least the next 12 months.

At September 30, 2009, we had no material commitments for capital expenditures.

*Cash Flow Summary*

Cash flows from operating activities are derived primarily from our two business segments, the Bally Gaming Equipment and Systems segment and the Rainbow Casino operating segment. The Bally Gaming Equipment and Systems segment consists of three primary cash flow sources: Gaming Equipment, which includes the sale of gaming devices and related equipment, parts and conversion kits; Gaming Operations, which includes the operation of linked progressive systems, video lottery and centrally determined systems and the rental of gaming devices and content; and Systems, which includes the sale and support of computerized monitoring systems and related recurring hardware and software maintenance revenue. Cash flows from Casino Operations are derived from the operation of the Rainbow Casino. We utilize our cash to acquire materials for the manufacture of goods for resale, to pay payroll, interest, taxes and selling, general and administrative expenses and to fund research and development activities.

Our primary sources of liquidity include existing cash and cash equivalents, cash flows from operating activities and the availability of funds under our revolving credit facility. Cash flow from operating activities is net income adjusted for certain non-cash items and changes in operating assets and liabilities.

Cash flows provided by operating activities were \$39.9 million in the three months ended September 30, 2009 as compared to \$25.2 million in the same period last year, a \$14.7 million improvement primarily due to the positive impact from a \$13.6 million net increase in changes in operating assets and liabilities during the same period. The net increase in changes in operating assets and liabilities included a reduction in prepaid and refundable income tax and income tax payable of \$20.2 million for an income tax refund and the use of prepaid taxes for our quarterly tax payment.

Cash utilized for investing activities is primarily for additions to property, plant and equipment for purchases of furniture, fixtures, office and gaming equipment, improvements in leaseholds and the manufacture of goods for lease or rental, as well as investments in technology assets. During the three months ended September 30, 2009, we made capital expenditures of \$3.5 million. In addition, we purchased \$1.5 million in intangible assets and advanced \$5.0 million to a customer during the same period.

Table of Contents

Cash utilized for financing activities is primarily for the payment of capitalized debt financing fees and principal payments on our debt, as well as for the purchase of shares of our common stock. We made payments of \$6.3 million on our notes payable during the three months ended September 30, 2009. We also purchased 392,151 shares of our common stock for \$15.2 million under our share repurchase plan and paid employee payroll taxes of \$0.2 million with the swap of 4,575 shares of common stock during the same period.

Cash provided by financing activities is primarily from proceeds from the exercise of stock options and purchases of stock by employees under our Employee Stock Purchase Plan ( ESPP ). During the three months ended September 30, 2009, employees exercised options for 722,587 shares of common stock for \$9.2 million and purchased 13,114 shares of common stock for \$0.4 million under our ESPP.

**Critical Accounting Policies**

A description of our critical accounting policies can be found in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations in the 2009 10-K. With exception to revenue recognition which is discussed below, there were no material changes to those policies during the three months ended September 30, 2009.

**Recently adopted accounting pronouncements Revenue recognition**

ASU No. 2009-13 replaces and significantly changes the existing separation criteria for multiple-deliverable revenue arrangements, by eliminating the criterion for objective and reliable evidence of fair value for the undelivered products or services to determine a unit of accounting. Instead, revenue arrangements with multiple deliverables should be divided into separate units of accounting if the deliverables meet both of the following criteria:

- The delivered items have value to the customer on a standalone basis. The item or items have value on a standalone basis if they are sold separately by any vendor or the customer could resell the delivered item(s) on a standalone basis; and
- If the arrangement includes a general right of return relative to the delivered items, delivery or performance of the undelivered items is considered probable and substantially in the control of the vendor.

ASU No 2009-13 also eliminates the use of the residual method of allocation and requires, instead, that arrangement consideration be allocated, at the inception of the arrangement, to all deliverables based on their relative selling price (i.e., the relative selling price method). When applying the relative selling price method, a hierarchy is used for estimating the selling price based first on vendor-specific objective evidence ( VSOE ), then third-party evidence ( TPE ) and finally management's estimate of the selling price ( ESP ).

ASU No. 2009-14 amends the scope of software revenue recognition to exclude all tangible products containing both software and nonsoftware components that function together to deliver the product's essential functionality. As a result, certain products that were previously accounted for under the scope of software revenue recognition guidance will no longer be accounted for as software. Prior to July 1, 2009, we determined our

gaming devices included software that was more than incidental to the product as a whole; accordingly, the sale of gaming devices were accounted for under the scope of software revenue recognition guidance. Application of the new guidance resulted in our determination that gaming devices no longer fall under the scope of software revenue recognition guidance. Under the new guidance, which applies to new or modified arrangements, revenue related to systems arrangements that contain software and nonsoftware deliverables, will require an allocation of the arrangement fee to the separate deliverables using the relative selling price method. Revenue for the software deliverables will continue to be recognized under the software revenue recognition guidance, while revenue for the nonsoftware deliverables will no longer be accounted for under the software revenue recognition guidance.

The impact of applying the new accounting guidance to new or materially modified arrangements entered into since July 1, 2009, did not have a material effect on revenue recognized for the three months ended September 30, 2009. The impact on future periods is dependent upon the prevalence of multiple deliverable arrangements whereby a combination of gaming devices, hardware, software, maintenance and product support fees and consulting services are sold under one arrangement and the software license is time-based. Under such arrangements, all revenue was previously recognized ratably over the term of the time-based license as we were unable to establish VSOE of fair value for the software maintenance and product support, which runs contemporaneously with the license period. Under the new guidance, revenue from non-software elements delivered under such multiple deliverable arrangements will no longer be deferred if VSOE of fair value does not exist for an undelivered element. Rather, the revenue allocated to the non-software elements using the relative selling price method would be recognized upon delivery and customer acceptance, and only the revenue allocated to the software elements will be deferred and recognized over the term of the time-based license.

In allocating the arrangement fees to separate deliverables under the new accounting guidance, we used VSOE of selling price for gaming devices, maintenance and professional services; a combination of TPE and ESP for hardware, and ESP for system software deliverables. ESP for system software was determined based upon our normal and discounting pricing practices.

#### **Other Recently Issued Accounting Pronouncements**

For a description of other recently issued accounting pronouncements, see Note 1 to the unaudited condensed consolidated financial statements, Summary of Significant Accounting Policies.

Table of Contents

**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

*Interest Rate Risk*

As of September 30, 2009, we had total debt outstanding of approximately \$202.9 million, consisting primarily of \$200.0 million outstanding under our term loan, \$2.8 million in related party debt, and \$0.1 million in other debt. See Note 4 to unaudited condensed consolidated financial statements, *Long-Term Debt*. See Item 3. Quantitative and Qualitative Disclosures About Market Risk in the 2009 10-K, to which there were no material changes during the period covered by this Quarterly Report on Form 10-Q.

*Foreign Currency Exchange Rate Risk*

Our foreign subsidiaries generally use their domestic currency as their functional currency. A 10% fluctuation in the exchange rates of these currencies against the U.S. dollar would result in a corresponding change in earnings reported in the consolidated group of approximately \$0.3 million.

**ITEM 4. CONTROLS AND PROCEDURES**

**Evaluation of Disclosure Controls and Procedures**

As required by Rule 13a-15(b) promulgated under the Exchange Act, our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Exchange Act Rule 13a-15(e) and 15d-15(e) as of the end of the period covered by this report.

Based on this evaluation our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of September 30, 2009.

It should be noted that any system of controls, however well designed and operated, can provide only reasonable and not absolute assurance that the objectives of the system will be met. In addition, the design of any control system is based in part upon certain assumptions about the likelihood of future events. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, have been detected or that judgments in decision-making are not based on faulty input.

**Changes in Internal Control Over Financial Reporting during the Quarter Ended September 30, 2009**

Although we update our internal controls as necessary to accommodate any modifications to our business processes and accounting procedures as part of our normal operations, there were no changes in our internal control over financial reporting that occurred in the three months ended September 30, 2009 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

**PART II**

**ITEM 1. LEGAL PROCEEDINGS**

## Edgar Filing: BALLY TECHNOLOGIES, INC. - Form 10-Q

For a description of our legal proceedings, see Note 9 to the unaudited condensed consolidated financial statements, Commitments and Contingencies, which is incorporated by reference in response to this item.

### ITEM 1A. RISK FACTORS

The Company is subject to risks and uncertainties that could cause our actual results to differ materially from the expectations expressed in the forward looking statements. Factors that could cause our actual results to differ from expectations are described under Item 1A. Risk Factors in the 2009 10-K, to which there were no material changes during the period covered by this Quarterly Report on Form 10-Q.

### ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Our Board of Directors approved a share repurchase plan under which, subject to price and market conditions, purchases of shares can be made from time to time in the open market or in privately negotiated transactions using available cash. On August 12, 2008, the Company's Board of Directors reset the existing share repurchase plan to purchase up to \$100 million of common stock. Our quarterly share repurchases under this plan, excluding treasury shares acquired in non-cash transactions related to forfeited stock awards and shares exchanged for options exercised, were as follows:

Period	Total Number of Shares (or Units) Purchased	Average Price Paid Per Share (Per Unit)	Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares (or Units) That May Be Purchased Under the Plans or Programs
July 1 - July 31, 2009				\$ 61,724,603
August 1 - August 31, 2009	19,200	39.91	19,200	\$ 60,958,333
September 1 - September 30, 2009	372,951	\$ 38.81	372,951	\$ 46,483,028
Total	392,151	\$ 38.87	392,151
