EQT CORPORATION

(Exact name of registrant as specified in its charter)

PENNSYLVANIA

(State or other jurisdiction of incorporation or organization)

25-0464690

(IRS Employer Identification No.)

625 Liberty Avenue, Pittsburgh, Pennsylvania

(Address of principal executive offices)

15222

(Zip code)

(412) 553-5700

(Registrant's telephone number, including area code)

Edgar Filing: EQT Corp - Form 10-Q

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large Accelerated Filer	<input checked="" type="checkbox"/>	Accelerated Filer	<input type="checkbox"/>
Non-Accelerated Filer	<input type="checkbox"/>	Smaller reporting company	<input type="checkbox"/>

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of March 31, 2011, 149,429,657 shares of common stock, no par value, of the registrant were outstanding.

EQT Corporation and Subsidiaries

Notes to Condensed Consolidated Financial Statements (Unaudited)

A. Financial Statements

The accompanying unaudited Condensed Consolidated Financial Statements have been prepared in accordance with United States generally accepted accounting principles for interim financial information and with the requirements of Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by United States generally accepted accounting principles for complete financial statements. In the opinion of management, these statements include all adjustments (consisting of only normal recurring accruals, unless otherwise disclosed in this Form 10-Q) necessary for a fair presentation of the financial position of EQT Corporation and subsidiaries as of March 31, 2011 and December 31, 2010 and the results of its operations and cash flows for the three month periods ended March 31, 2011 and 2010. Certain previously reported amounts have been reclassified to conform to the current year presentation. In this Form 10-Q, references to we, us, our, EQT, EQT Corporation, and the Company refer collectively to EQT Corporation and its consolidated subsidiaries.

The balance sheet at December 31, 2010 has been derived from the audited financial statements at that date but does not include all of the information and footnotes required by United States generally accepted accounting principles for complete financial statements.

Due to the seasonal nature of the Company's natural gas distribution and storage businesses and the volatility of commodity prices, the interim statements for the three month period ended March 31, 2011 are not necessarily indicative of the results that may be expected for the year ending December 31, 2011.

For further information, refer to the consolidated financial statements and footnotes thereto included in EQT Corporation's Annual Report on Form 10-K for the year ended December 31, 2010 as well as Management's Discussion and Analysis of Financial Condition and Results of Operations on page 17 of this document.

B. Segment Information

Operating segments are revenue-producing components of the enterprise for which separate financial information is produced internally and which are subject to evaluation by the Company's chief operating decision maker in deciding how to allocate resources.

The Company reports its operations in three segments, which reflect its lines of business. The EQT Production segment includes the Company's exploration for, and development and production of, natural gas, natural gas liquids (NGLs) and a limited amount of crude oil in the Appalachian Basin. EQT Midstream's operations include the natural gas gathering, transportation, storage and marketing activities of the Company. Distribution's operations primarily comprise the state-regulated natural gas distribution activities of the Company.

Edgar Filing: EQT Corp - Form 10-Q

Operating segments are evaluated on their contribution to the Company's consolidated results based on operating income, equity in earnings of nonconsolidated investments and other income. Interest expense and income taxes are managed on a consolidated basis. Headquarters' costs are billed to the operating segments based upon a fixed allocation of the headquarters' annual operating budget. Actual headquarters' expenses in excess of budget, which are primarily related to certain incentive compensation and administrative costs, are not allocated to the operating segments.

Substantially all of the Company's operating revenues, income from operations and assets are generated or located in the United States.

EQT Corporation and Subsidiaries

C. Derivative Instruments*Natural Gas Hedging Instruments*

The Company's primary market risk exposure is the volatility of future prices for natural gas and natural gas liquids, which can affect the operating results of the Company primarily through the EQT Production and EQT Midstream segments. The Company's overall objectives in its hedging program are to protect cash flows from undue exposure to the risk of changing commodity prices.

The Company uses non-leveraged derivative commodity instruments that are placed with major financial institutions whose creditworthiness is continually monitored. Futures contracts obligate the Company to buy or sell a designated commodity at a future date for a specified price and quantity at a specified location. Swap agreements involve payments to or receipts from counterparties based on the differential between a fixed price and a variable price for the commodity. Collar agreements require the counterparty to pay the Company if the index price falls below the floor price and the Company to pay the counterparty if the index price rises above the cap price. Put option contracts provide protection from dropping prices and require the counterparty to pay the Company if the index price falls below the contract price. The Company also engages in a limited number of basis swaps to protect earnings from undue exposure to the risk of geographic disparities in commodity prices and interest rate swaps to hedge exposure to interest rate fluctuations on short-term or long-term debt.

The Company recognizes all derivative instruments as either assets or liabilities at fair value on a gross basis. The accounting for the changes in fair value of the Company's derivative instruments depends on the use of the derivative instruments. At contract inception, the Company designates its derivative instruments as hedging or trading activities. To the extent that a derivative instrument has been designated and qualifies as a cash flow hedge, the effective portion of the change in fair value of the derivative instrument is reported as a component of accumulated other comprehensive income, net of tax, and is subsequently reclassified into earnings in the same line item associated with the forecasted transaction and in the same period or periods during which the forecasted transaction affects earnings. For a derivative instrument that has been

Edgar Filing: EQT Corp - Form 10-Q

designated and qualifies as a fair value hedge, the change in the fair value for the instrument is recognized as a portion of operating revenues in the Statements of Consolidated Income each period. In addition, the change in the fair value of the hedged item (natural gas inventory) is recognized as a portion of operating revenues in the Statements of Consolidated Income. The Company has elected to exclude the spot/forward differential for the assessment of effectiveness of the fair value hedges. Any hedging ineffectiveness and any change in fair value of derivative instruments that have not been designated as hedges, are recognized as a portion of operating revenues in the Statements of Consolidated Income each period.

Exchange-traded instruments are generally settled with offsetting positions. Over the counter (OTC) arrangements require settlement in cash. Settlements of derivative commodity instruments are reported as a component of cash flows from operations in the accompanying Statements of Condensed Consolidated Cash Flows.

EQT Corporation and Subsidiaries

Notes to Condensed Consolidated Financial Statements (Unaudited)

A portion of the derivative commodity instruments used by the Company to hedge its exposure to variability in expected future cash flows associated with the fluctuations in the price of natural gas related to the Company's forecasted sale of equity production and forecasted natural gas purchases and sales have been designated and qualify as cash flow hedges. A portion of the derivative commodity instruments used by the Company to hedge its exposure to adverse changes in the market price of natural gas stored in the ground have been designated and qualify as fair value hedges. The current hedge position extends through 2015. See "Commodity Risk Management" in "Management's Discussion and Analysis of Financial Condition and Results of Operations" of this Form 10-Q for further details of the Company's hedged position.

The Company also enters into a limited amount of energy trading contracts to leverage its assets and limit its exposure to shifts in market prices and has a limited amount of other derivative instruments not designated as hedges.

Substantially all derivatives recognized in the balance sheet and used in hedging relationships are commodity contracts. All gains (losses) recognized in income or reclassified from accumulated other comprehensive income into income are reported in operating revenues. All derivative instrument assets and liabilities are reported in the Condensed Consolidated Balance Sheets as derivative instruments, at fair value. These derivative instruments are reported as either current assets or current liabilities due to their highly liquid nature. The Company can effectively net settle its derivative instruments at any time by taking offsetting positions.

	Three Months Ended March 31,	
	2011	2010
	(Thousands)	
Derivatives designated as cash flow hedges		
Amount of gain recognized in other comprehensive income (OCI) (effective portion), net of tax	\$ 4,199	\$ 77,519
Amount of gain reclassified from accumulated OCI into income (effective portion), net of tax (a)	\$ 16,905	\$ 14,107
Amount of gain (loss) recognized in income (ineffective portion) (b)	\$ (625)	\$ 1,801
Derivatives designated as fair value hedges (c)		
Amount of gain (loss) recognized in income for fair value commodity contracts	\$ (1,896)	\$
Fair value adjustment gain recognized in income for inventory designated as hedged item	\$ 1,633	\$
Derivatives not designated as hedging instruments		
Amount of loss recognized in income	\$ (1,679)	\$ (123)

(a) Includes \$0 and \$2.6 million for the three months ended March 31, 2011 and 2010, respectively, of unrealized hedge gains reclassified into earnings to offset lower of cost or market adjustments on hedged items. The Company also had an immaterial amount of OCI reclassified to interest expense related to an interest rate swap on long-term debt.

(b) No amounts have been excluded from effectiveness testing of cash flow hedges.

(c) The net impact on operating revenues for the first quarter of 2011 relates to the exclusion of the spot/forward differential from the assessment of effectiveness.

EQT Corporation and Subsidiaries

Notes to Condensed Consolidated Financial Statements (Unaudited)

	March 31, 2011	December 31, 2010
	(Thousands)	
Asset derivatives		
Derivatives designated as hedging instruments	\$ 104,416	\$ 141,834
Derivatives not designated as hedging instruments	75,255	83,505
Total asset derivatives	\$ 179,671	\$ 225,339
Liability derivatives		
Derivatives designated as hedging instruments	\$ 8,236	\$ 12,097
Derivatives not designated as hedging instruments	85,233	94,624
Total liability derivatives	\$ 93,469	\$ 106,721

The net fair value of derivative instruments changed during the first quarter of 2011 primarily as a result of an increase in forward natural gas prices and settlements. The absolute quantities of the Company's derivative commodity instruments that have been designated and qualify as cash flow hedges totaled 186 Bcf and 181 Bcf as of March 31, 2011 and December 31, 2010, respectively, and are primarily related to natural gas swaps and collars. The open positions at March 31, 2011 had maturities extending through December 2015. The absolute quantities of the Company's derivative commodity instruments that have been designated and qualify as fair value hedges totaled 6 Bcf as of March 31, 2011. No derivative commodity instruments were designated as fair value hedges as of December 31, 2010.

The Company had deferred net gains of \$52.5 million and \$65.2 million in accumulated other comprehensive income, net of tax, as of March 31, 2011 and December 31, 2010, respectively, associated with the effective portion of the change in fair value of its derivative commodity instruments designated as cash flow hedges. Assuming no change in price or new transactions, the Company estimates that approximately \$22.9 million of net unrealized gains on its derivative commodity instruments reflected in accumulated other comprehensive income, net of tax, as of March 31, 2011 will be recognized in earnings during the next twelve months due to the settlement of hedged transactions. This recognition occurs through an increase in the Company's net operating revenues resulting in the average hedged price becoming the realized sales price.

The Company is exposed to credit loss in the event of nonperformance by counterparties to derivative contracts. This credit exposure is limited to derivative contracts with a positive fair value. The Company believes that New York Mercantile Exchange (NYMEX) traded futures contracts have minimal credit risk because Commodity Futures Trading Commission regulations are in place to protect exchange participants, including the Company, from any potential financial instability of the exchange members. The Company's swap, collar and option derivative instruments are primarily with financial institutions and thus are subject to events that would impact those companies individually as well as that industry as a whole.

The Company utilizes various processes and analysis to monitor and evaluate its credit risk exposures. This includes closely monitoring current market conditions, counterparty credit spreads and credit default swap rates. Credit exposure is controlled through credit approvals and limits. To manage the level of credit risk, the Company deals with financial counterparties that are of investment grade or better, enters into netting agreements whenever possible and may obtain collateral or other security.

When the net fair value of any of the Company's swap agreements represents a liability to the Company which is in excess of the agreed-upon threshold between the Company and the financial institution acting as counterparty, the counterparty requires the Company to post cash or other

Edgar Filing: EQT Corp - Form 10-Q

collateral to the counterparty as a margin deposit for the derivative liability which is in excess of the threshold amount. The Company records these deposits as a current asset in the Condensed Consolidated Balance Sheets. When the net fair value of any of the Company's swap agreements represents an asset to the Company which is in excess of the agreed-upon threshold between the Company and the financial institution acting as counterparty, the Company requires the counterparty to remit funds as margin deposit in an amount equal to the portion of the derivative asset which is in excess of the threshold amount. The Company records a current liability for such amounts received. The Company had no such deposits in its Condensed Consolidated Balance Sheets as of March 31, 2011 and December 31, 2010.

EQT Corporation and Subsidiaries

Notes to Condensed Consolidated Financial Statements (Unaudited)

When the Company enters into exchange-traded natural gas contracts, exchanges may require the Company to remit funds to the corresponding broker as good-faith deposits to guard against the risks associated with changing market conditions. The Company records these deposits as current assets. Participants must make such deposits based on an established initial margin requirement as well as the net liability position, if any, of the fair value of the associated contracts. In the case where the fair value of such contracts is in a net asset position, the broker may remit funds to the Company, in which case the Company records a current liability for such amounts received. The initial margin requirements are established by the exchanges based on the price, volatility and the time to expiration of the related contract and are subject to change at the exchanges' discretion. The Company recorded a current asset of \$2.1 million as of March 31, 2011 and a current liability of \$0.5 million as of December 31, 2010 for such deposits in its Condensed Consolidated Balance Sheets.

Certain of the Company's derivative instrument contracts provide that if the Company's credit ratings are lowered below investment grade, additional collateral must be deposited with the counterparty. This additional collateral can be up to 100% of the derivative liability. As of March 31, 2011, the aggregate fair value of all derivative instruments with credit-risk-related contingent features that are in a net liability position is \$7.0 million, for which the Company had no collateral posted on March 31, 2011. If the Company's credit rating had been downgraded below investment grade on March 31, 2011, the Company would have been required to post collateral of \$7.0 million for the liability position. Investment grade refers to the quality of the Company's credit as assessed by one or more credit rating agencies. The Company's unsecured medium-term debt was rated BBB by Standard & Poor's Rating Services (S&P), Baa1 by Moody's Investor Services (Moody's) and BBB by Fitch Ratings Service (Fitch) at March 31, 2011. In order to be considered investment grade, the Company must be rated BBB- or higher by S&P and Fitch and Baa3 or higher by Moody's. Anything below these ratings is considered to be non-investment grade.

D. Investments, Available-For-Sale

As of March 31, 2011, the investments classified by the Company as available-for-sale consist of approximately \$15.9 million of equity and bond funds intended to fund plugging and abandonment and other liabilities for which the Company self-insures.

	March 31, 2011			
	Adjusted Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
	(Thousands)			
Equity funds	\$ 9,849	\$ 4,345	\$	\$ 14,194
Bond funds	1,594	155		1,749
Total investments	\$ 11,443	\$ 4,500	\$	\$ 15,943

Unrealized gains or losses with respect to temporarily impaired investments classified as available-for-sale are recognized within the Condensed Consolidated Balance Sheets as a component of equity, accumulated other comprehensive income. The Company evaluates these investments quarterly and if the Company subsequently determines that a loss is other-than-temporary, any unrealized losses stemming from such impaired investments will be recognized in earnings.

Edgar Filing: EQT Corp - Form 10-Q

During the three month period ended March 31, 2010, the Company purchased additional securities with a cost basis totaling \$0.8 million.

During the three month period ended March 31, 2011, the Company sold available-for-sale securities for proceeds of \$14.0 million which resulted in gross realized gains of \$4.0 million, \$2.6 million of which was reclassified from accumulated other comprehensive income. The Company uses the average cost method to determine the cost of securities sold.

E. Fair Value Measurements

The Company records its financial instruments, principally derivative commodity instruments, available-for-sale investments and natural gas inventory hedged with fair value hedges at fair value in its Condensed Consolidated Balance Sheets. The Company has an established process for determining fair value which is based on quoted market prices, where available. If quoted market prices are not available, fair value is based upon models that use as

EQT Corporation and Subsidiaries

Notes to Condensed Consolidated Financial Statements (Unaudited)

inputs market-based parameters, including but not limited to forward curves, discount rates, broker quotes, volatilities and nonperformance risk. Nonperformance risk considers the effect of the Company's credit standing on the fair value of liabilities and the effect of the counterparty's credit standing on the fair value of assets. The Company estimates nonperformance risk by analyzing publicly available market information, including a comparison of the yield on debt instruments with credit ratings similar to the Company's or counterparty's credit rating and the yield of a risk free instrument. The Company also considers credit default swaps rates where applicable.

The Company has categorized its assets and liabilities recorded at fair value into a three-level hierarchy, based on the priority of the inputs to the valuation technique. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). Assets and liabilities included in Level 1 include the Company's futures contracts, available-for-sale investments and natural gas inventory hedged with fair value hedges. Assets and liabilities in Level 2 include the majority of the Company's swap agreements, and assets and liabilities in Level 3 include the Company's collar and option agreements and an insignificant portion of the Company's swap agreements. Since the adoption of fair value accounting, the Company has not made any changes to its classification of assets and liabilities in each category.

The fair value of assets and liabilities included in Level 2 is based on industry models that use significant observable inputs, including NYMEX forward curves and LIBOR-based discount rates. Swaps included in Level 3 are valued using internal models that use significant unobservable inputs; these internal models are validated each period with non-binding broker price quotes. The Company has not experienced significant differences between internally calculated values and broker price quotes. Collars and options included in Level 3 are valued using internal models calculated with market derived volatilities. The Company uses NYMEX forward curves to value futures, NYMEX swaps, collars and options. The NYMEX forward curves are validated to external sources at least monthly.

The following assets and liabilities were measured at fair value on a recurring basis during the period:

Description	March 31, 2011	Fair value measurements at reporting date using		
		Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
(Thousands)

Settlements		(13,491)
Transfers in and/or out of Level 3		
Balance at March 31, 2011	\$	97,364

The amount of total (losses) or gains for the period included in earnings attributable to the change in unrealized gains or losses relating to assets and liabilities still held as of March 31, 2011

Gains and losses related to derivative commodity instruments included in earnings for the period are reported in operating revenues in the Statements of Consolidated Income. All gains or losses included in earnings related to available-for-sale securities are reported as a separate component on the Consolidated Statements of Income.

The carrying value of cash equivalents and short-term loans approximates fair value due to the short maturity of the instruments.

The estimated fair value of long-term debt on the Condensed Consolidated Balance Sheets at March 31, 2011 and December 31, 2010 was approximately \$2 billion. The fair value was estimated using the Company's established fair value methodology based on quoted rates reflective of the remaining maturity.

F. Comprehensive Income

Total comprehensive income, net of tax, was as follows:

Three Months Ended		
March 31,		
2011		2010
(Thousands)		

Edgar Filing: EQT Corp - Form 10-Q

Accumulated other comprehensive income	\$ 23,869		\$ 38,104

EQT Corporation and Subsidiaries

Notes to Condensed Consolidated Financial Statements (Unaudited)

G. Income Taxes

The Company estimates an annual effective income tax rate based on projected results for the year and applies this rate to income before taxes to calculate income tax expense. Any refinements made due to subsequent information that affects the estimated annual effective income tax rate are reflected as adjustments in the current period. Separate effective income tax rates are calculated for net income from continuing operations and any other separately reported net income items, such as discontinued operations.

The Company's effective income tax rate for the three months ending March 31, 2011 is 37.1%. The estimated annual effective income tax rate as of March 31, 2010 was 36.2%. The Company currently estimates the 2011 annual effective income tax rate to be approximately 37.1%. The increase in the expected annual effective tax rate from 2010 is primarily the result of an increase in limitations imposed on certain state tax losses. This increase was partially offset by decreases in the rate from a regulatory asset recorded to recover deferred taxes as a result of deducting as repairs certain costs capitalized for financial accounting purposes and a change in the reserves for uncertain tax positions.

There were no material changes to the Company's methodology or to the balance recorded for unrecognized tax benefits during the three months ended March 31, 2011.

The Internal Revenue Service (IRS) has completed its audit and review of the Company's federal income tax filings through 2005. The only unresolved issue relates to research and experimentation tax credits of \$3.8 million claimed by the Company for years 2001 through 2005 which issue is currently under review by the Appeals Division of the IRS. The IRS began its audit and review of the Company's federal income tax filings for the 2006 through 2009 years during the second quarter of 2010. The Company also is the subject of various state income tax examinations. The Company believes that it is appropriately reserved for any uncertain tax positions.

The Worker, Homeownership and Business Assistance Act of 2009 extended the applicability of the tax net operating loss carryback provision from 2 years to 5 years for either the 2008 or 2009 tax year. The Company elected to carryback its 2009 tax operating loss under this law and received a refund of \$121.5 million from the IRS during the first quarter of 2010. The net operating loss was primarily generated from intangible drilling costs (IDC) for the Company's drilling program that are deducted currently for tax purposes and from accelerated tax depreciation associated with the expansion of the Company's midstream business.

H. Short-Term Loans

As of March 31, 2011, the Company had outstanding under the revolving credit facility an irrevocable standby letter of credit of \$23.1 million and no loans. As of December 31, 2010, the Company had outstanding under the revolving credit facility loans of \$53.7 million and an irrevocable standby letter of credit of \$23.5 million. Commitment fees averaging approximately one-twentieth of one percent in the first quarter of 2011 and one-fortieth of one percent in the first quarter of 2010 were paid to maintain credit availability under the applicable revolving credit facility.

Edgar Filing: EQT Corp - Form 10-Q

The weighted average interest rate for short-term loans outstanding as of December 31, 2010 was 1.81% per annum. The maximum amount of outstanding short-term loans at any time during the three months ended March 31, 2011 and 2010 was \$104.0 million and \$139.7 million, respectively. The average daily balance of short-term loans outstanding during the three months ended March 31, 2011 and 2010 was approximately \$22.3 million and \$86.1 million, respectively, at weighted average annual interest rates of 1.81% and 0.47%, respectively.

EQT Corporation and Subsidiaries

8.5% to 9.0% Series A, due 2011 thru 2021	46,200	46,200
7.3% to 7.6% Series B, due 2013 thru 2023	30,000	30,000
7.6% Series C, due 2018	8,000	8,000
	1,949,200	1,949,200
Less debt payable within one year	6,000	6,000
Total long-term debt	\$ 1,943,200	\$ 1,943,200

The indentures and other agreements governing the Company's indebtedness contain certain restrictive financial and operating covenants including covenants that restrict the Company's ability to incur indebtedness, incur liens, enter into sale and leaseback transactions, complete acquisitions, merge, sell assets and perform certain other corporate actions. The covenants do not contain a rating trigger. Therefore, a change in Company's debt rating would not trigger a default under the indentures and other agreements governing the Company's long-term indebtedness.

Aggregate maturities of long-term debt are \$6.0 million in 2011, \$200.0 million in 2012, \$10.0 million in 2013, \$5.0 million in 2014 and \$160.0 million in 2015.

J. Dispositions

On February 1, 2011, the Company sold its natural gas processing complex in Langley, Kentucky and associated natural gas liquids pipeline for \$230.5 million. In conjunction with this transaction, the Company realized a pre-tax gain of \$22.8 million. The Langley processing complex included a 100 million cubic feet per day (MMcfd) cryogenic processing plant, a 75 MMcfd refrigeration processing plant and approximately 28,000 horsepower of compression.

K. Earnings Per Share

Potentially dilutive securities, consisting of options and restricted stock awards, which were included in the calculation of diluted earnings per share totaled 731,076 and 924,959 for the three months ended March 31, 2011 and March 31, 2010, respectively. Options to purchase common stock which were not included in potentially dilutive securities because they were anti-dilutive totaled 886,355 and 1,241,566 for the three months ended March 31, 2011 and March 31, 2010, respectively.

L. Subsequent Events

The Company has evaluated subsequent events through the date of financial statement issuance.

EQT Corporation and Subsidiaries

Management's Discussion and Analysis of Financial Condition and Results of Operations

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

CAUTIONARY STATEMENTS

Disclosures in this Quarterly Report on Form 10-Q contain certain forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended, and Section 27A of the Securities Act of 1933, as amended. Statements that do not relate strictly to historical or current facts are forward-looking and usually identified by the use of words such as anticipate, estimate, will, may, forecasts, approximate, expect, project, intend, plan, believe and other words of similar meaning in connection with any discussion of future operations and financial matters. Without limiting the generality of the foregoing, forward-looking statements contained in this report include the matters discussed in the section captioned "Outlook" in Management's Discussion and Analysis of Financial Condition and Results of Operations, and the expectations of plans, strategies, objectives, and growth and anticipated financial and operational performance of the Company and its subsidiaries, including guidance regarding the Company's drilling and infrastructure programs (including the Equitrans Marcellus expansion project) and technology, transactions, including asset sales and/or joint ventures involving the Company's assets, production and sales volumes, gathering, transmission and marketed volumes, revenue projections, reserves, operating costs, well costs (such as costs for drilling and fracing services), competition for drilling and completion services, capital expenditures, financing requirements and availability, hedging strategy, the effects of government regulation and tax position. These statements involve risks and uncertainties that could cause actual results to differ materially from projected results. Accordingly, investors should not place undue reliance on forward-looking statements as a prediction of actual results. The Company has based these forward-looking statements on current expectations and assumptions about future events. While the Company considers these expectations and assumptions to be reasonable, they are inherently subject to significant business, economic, competitive, regulatory and other risks and uncertainties, most of which are difficult to predict and many of which are beyond the Company's control. The risks and uncertainties that may affect the operations, performance and results of the Company's business and forward-looking statements include, but are not limited to, those set forth under Item 1A, "Risk Factors" of the Company's Form 10-K for the year ended December 31, 2010.

Any forward-looking statement speaks only as of the date on which such statement is made and the Company does not intend to correct or update any forward-looking statements, whether as a result of new information, future events or otherwise.

In reviewing any agreements incorporated by reference in this Form 10-Q, please remember such agreements are included to provide information regarding the terms of such agreements and are not intended to provide any other factual or disclosure information about the Company. The agreements may contain representations and warranties by the Company, which should not in all instances be treated as categorical statements of fact, but rather as a way of allocating the risk to one of the parties should those statements prove to be inaccurate. The representations and warranties were made only as of the date of the relevant agreement or such other date or dates as may be specified in such agreement and are subject to more recent developments. Accordingly, these representations and warranties alone may not describe the actual state of affairs as of the date they were made or at any other time.

CORPORATE OVERVIEW

Three Months Ended March 31, 2011

vs. Three Months Ended March 31, 2010

EQT's consolidated net income for the three months ended March 31, 2011 was \$122.3 million, \$0.82 per diluted share, compared with \$88.1 million, \$0.65 per diluted share, for the period ended March 31, 2010. The \$34.2 million increase in net income from 2010 to 2011 was primarily attributable to the gain on sale of the Langley natural gas processing complex, increased production sales volumes and reductions in reserves for certain non-income taxes, primarily relating to property tax settlements. These favorable variances were partially offset by lower average wellhead sales price, increased depreciation, depletion and amortization and lower margins as a result of lower seasonal price spreads.

The average realized sales price to EQT Corporation for production sales volumes was \$5.43 per Mcfe during the first quarter 2011 compared to \$6.45 per Mcfe in the same period of the prior year. Hedging activities resulted in an

EQT Corporation and Subsidiaries

Management's Discussion and Analysis of Financial Condition and Results of Operations

increase in the price of production sales volumes of \$0.46 per Mcfe in 2011 compared to \$0.22 per Mcfe in 2010 as a result of higher volumes being hedged and decreases in NYMEX natural gas prices in the current year.

See Investing Activities in Capital Resources and Liquidity for a discussion of capital expenditures.

EQT CORPORATION

Three Months Ended
March 31,

OPERATIONAL DATA	2011	2010	%
Average realized price to EQT Corporation (including hedges)			
Natural gas (\$/Mcf)	\$ 4.83	\$ 5.86	(17.6)
NGLs (\$/Bbl)	52.09	49.95	4.3
Crude oil (\$/Bbl)	78.39	75.95	3.2
Total (\$/Mcf) (a)	\$ 5.43	\$ 6.45	(15.8)
NYMEX	\$ 4.11	\$ 5.30	(22.5)
Average realized price to EQT Corporation (excluding hedges)			
Natural gas (\$/Mcf)	\$ 4.33	\$ 5.62	(23.0)
NGLs (\$/Bbl)	52.09	49.95	4.3
Crude oil (\$/Bbl)	78.39	75.95	3.2
Total (\$/Mcf) (a)	\$ 4.97	\$ 6.24	(20.4)
Natural gas sales volumes (MMcf)	40,135	27,491	46.0
NGL sales volumes (Mbbbls)	726	618	17.5
Crude oil sales volumes (Mbbbls)	31	21	47.6
Total produced sales volumes (MMcfe) (b)	43,047	30,000	43.5
Capital expenditures (thousands)	\$ 263,428	\$ 217,527	21.1

(a) Included in the price are revenues that are allocated to EQT Midstream for gathering and transportation of EQT Production produced gas and NGLs. The related revenue allocated to EQT Midstream totaled \$63.0 million (\$1.46 per Mcfe produced) and \$51.4 million (\$1.71 per Mcfe produced) for the three months ended March 31, 2011 and 2010, respectively

(b) NGLs were converted to Mcfe at the rate of 3.75 Mcfe per barrel and 3.86 Mcfe per barrel based on the liquids content for the three months ended March 31, 2011 and 2010, respectively, and crude oil was converted to Mcfe at the rate of six Mcfe per barrel for both periods.

The Company has reported the components of each segment's operating income and various operational measures in the sections below, and where appropriate, has provided information describing how a measure was derived. EQT's management believes that presentation of this information provides useful information to management and investors regarding the financial condition, operations and trends of each of EQT's segments without being obscured by the financial condition, operations and trends for the other segments or by the effects of corporate allocations of interest, income taxes and certain compensation expenses. In addition, management uses these measures for budget planning purposes.

Total operating expenses	90,713	71,246	27.3
Operating income	\$ 82,329	\$ 73,117	12.6

(a) Natural gas, NGL and oil production represents the Company's interest in natural gas, NGL and oil production measured at the wellhead. It is equal to the sum of total sales volumes, Company usage and line loss.

(b) NGLs were converted to Mcfe at the rate of 3.75 Mcfe per barrel and 3.86 Mcfe per barrel based on the liquids content for the three months ended March 31, 2011 and 2010, respectively, and crude oil

EQT Corporation and Subsidiaries

Management's Discussion and Analysis of Financial Condition and Results of Operations

was converted to Mcfe at the rate of six Mcfe per barrel for both periods.

(c) Average wellhead sales price is calculated as market price adjusted for hedging activities less deductions for gathering, processing and transmission. These deductions include those reported as revenue in EQT Midstream which totaled \$1.46/Mcfe and \$1.71/Mcfe for the three months ended March 31, 2011 and 2010, respectively. Additionally, third-party gathering, processing and transportation deductions totaled \$0.41/Mcfe and \$0.38/Mcfe for the three months ended March 31, 2011 and 2010, respectively.

(d) Capital expenditures for the three months ended March 31, 2011 and 2010 include \$8.7 million and \$7.2 million, respectively, for undeveloped property acquisitions.

(e) Production taxes include severance and production-related ad valorem and other property taxes.

Three Months Ended March 31, 2011

vs. Three Months Ended March 31, 2010

EQT Production's operating income totaled \$82.3 million for the three months ended March 31, 2011 compared to \$73.1 million for the three months ended March 31, 2010. The \$9.2 million increase in operating income was primarily due to increased sales of produced natural gas, NGLs and crude oil, partially offset by a lower average wellhead sales price and an increase in DD&A and SG&A.

Total operating revenues were \$173.0 million for the three months ended March 31, 2011 compared to \$144.4 million for the three months ended March 31, 2010. The increase in total operating revenues was due to an increase in production sales volumes which more than offset lower realized prices. The 43% increase in production sales volumes was the result of increased production from the 2009 and 2010 drilling programs, primarily in the Marcellus Shale and Huron plays. These increases were partially offset by the normal production decline in the Company's wells. The \$0.77 per Mcfe decrease in the average wellhead sales price was primarily due to a 23% decrease in the average NYMEX price partially offset by higher hedging gains compared to the first quarter of 2010 and a higher sales price for NGLs.

Operating expenses totaled \$90.7 million for the three months ended March 31, 2011 compared to \$71.2 million for the three months ended March 31, 2010. The increase in operating expenses was primarily the result of increases in DD&A and in SG&A. The depletion expense reflects an increase in volumes (\$16.6 million) and the unit rate (\$0.3 million). The increase in SG&A was primarily due to higher overhead costs associated with the growth of the Company.

Total operating expenses	39,889	48,784	(18.2)
Operating income	\$ 66,633	\$ 52,691	26.5
Equity in earnings of nonconsolidated investments	\$ 2,321	\$ 2,464	(5.8)
Other income	\$ 346	\$ 195	77.4

- (a) Included within storage, marketing and other operating revenues.
- (b) Percentage change over prior period can not be calculated due to a 0 denominator.

Three Months Ended March 31, 2011

vs. Three Months Ended March 31, 2010

EQT Midstream's operating income totaled \$66.6 million for the three months ended March 31, 2011 compared to \$52.7 million for the three months ended March 31, 2010. The \$13.9 million increase in operating income was primarily the result of increased gathered volumes and transmission throughput and decreased operating expenses,

EQT Corporation and Subsidiaries

Management's Discussion and Analysis of Financial Condition and Results of Operations

offset by decreased storage, marketing and other net operating revenues and a decreased average gathering fee resulting from a lower Marcellus gathering rate.

Total net operating revenues were \$106.5 million for the three months ended March 31, 2011 compared to \$101.5 million for the three months ended March 31, 2010. The increase in total net operating revenues was due to a \$10.2 million increase in gathering net operating revenues and a \$4.8 million increase in transmission net operating revenues, partially offset by a \$10.0 million decrease in storage, marketing and other net operating revenues.

Gathering net operating revenues increased due to a 31% increase in gathered volumes partially offset by an 8% decrease in the average gathering fee resulting from a lower Marcellus gathering rate. The volume increase was driven primarily by higher Marcellus Shale volumes gathered for EQT Production. The decrease in average gathering fee was primarily due to a reduction in the rate charged to EQT Production.

Transmission net revenues in the first quarter of 2011 increased from the prior year primarily as a result of higher firm transportation activity from affiliated shippers due to the increased Marcellus Shale volumes and increased capacity from Phase 1 of the Equitrans Marcellus expansion project, which came on-line during the fourth quarter of 2010.

The decrease in storage, marketing and other net revenues was primarily due to reductions in commodity price volatility, seasonal price spreads and volumes of third-party marketing that utilized pipeline capacity.

Total operating revenues decreased \$12.9 million, or 8%, primarily as a result of lower sales prices on decreased commercial activity partially offset by an increase in gathered volumes and increased transmission revenues from the Equitrans Marcellus expansion project. Total purchased gas costs decreased 34% primarily as a result lower gas costs on decreased commercial activity

Operating expenses totaled \$39.9 million for the three months ended March 31, 2011 compared to \$48.8 million for the three months ended March 31, 2010. The decrease in operating expenses was primarily due to a decrease of \$8.9 million in O&M which resulted from the reduction of certain non-income tax reserves as a result of property tax settlements.

Operating income	\$ 53,367	\$ 47,419	12.5

Three Months Ended March 31, 2011

vs. Three Months Ended March 31, 2010

Distribution's operating income totaled \$53.4 million for the first quarter of 2011 compared to \$47.4 million for the first quarter of 2010. The increase in operating income is primarily due to colder weather, an increase in the Company's West Virginia base rates and a decrease in operating expenses.

Net operating revenues were \$77.9 million for the first quarter of 2011 compared to \$76.8 million for the first quarter of 2010. The \$1.1 million increase in net operating revenues was primarily a result of increased net operating revenues from residential and commercial and industrial customers partially offset by a decrease in lower off systems and energy services. Net operating revenues from residential customers increased \$1.3 million as a result of colder weather and the approval of the Company's West Virginia base rate increase in August 2010. The weather in Distribution's service territory in the first quarter of 2011 was 3% colder than the first quarter of 2010 and approximately the same as the 30-year National Oceanic and Atmospheric Administration average for the

EQT Corporation and Subsidiaries

Management's Discussion and Analysis of Financial Condition and Results of Operations

Company's service territory. Commercial and industrial net revenues increased \$1.4 million due to colder weather and an increase in performance-based revenues, partially offset by lower usage. Off-system and energy services net operating revenues decreased \$1.6 million due to less asset optimization opportunities realized in 2011 partially offset by higher revenues from gathering activities resulting from increased rates. A decrease in the commodity component of residential tariff rates resulted in a decrease in both total operating revenues and purchased gas costs.

Operating expenses totaled \$24.5 million for the first quarter of 2011 compared to \$29.4 million for the first quarter of 2010. The \$4.9 million decrease in operating expenses was primarily due to the reduction of certain non-income tax reserves as a result of settlements with tax authorities and lower bad debt expense. The decrease in bad debt expense was primarily the result of a decrease in the commodity component of residential tariff rates and the Company's favorable collections experience. The Company will continue to closely monitor its collection rates and adjust its reserve for uncollectible accounts as necessary.

OUTLOOK

A substantial portion of the Company's drilling efforts in 2011 are expected to be focused on drilling horizontal wells in shale formations in Pennsylvania, West Virginia and Kentucky. Natural gas producers compete in the acquisition of properties, the search for and development of reserves, the production and sale of natural gas and the securing of labor and equipment required to conduct operations. Increased drilling activity in the Appalachian basin, especially the Marcellus play, is expected to result in higher competition for drilling and completion services and higher costs for drilling and fracing services.

The Company continues to be committed to profitably expanding its production and developing its reserves through cost-effective, technologically-advanced horizontal drilling in its existing plays. The Company currently expects natural gas sales volumes growth of approximately 34% in 2011.

EQT Corporation and Subsidiaries

Management's Discussion and Analysis of Financial Condition and Results of Operations

CAPITAL RESOURCES AND LIQUIDITY

Overview

The Company's primary sources of cash for the first quarter of 2011 were proceeds from operating activities and proceeds from the sale of the Langley natural gas processing complex. The Company used the cash primarily to fund its capital program and operations.

Operating Activities

Cash flows provided by operating activities totaled \$227.5 million for the first quarter of 2011 and \$275.4 million for the first quarter of 2010, a decrease of \$47.9 million in cash flows provided by operating activities between years. The decrease in cash flows provided by operating activities was primarily attributed to the receipt of a \$124.1 million tax refund in 2010 and a decrease in commodity prices in 2011, offset by an increase in produced volumes and gathered volumes in 2011.

Investing Activities

Net cash flows used in investing activities totaled \$3.9 million for the first quarter 2011 compared to \$218.3 million for the first quarter 2010. The decrease in cash flows used in investing activities was primarily attributed to the Company's receipt during the first quarter of 2011 of proceeds from the sale of the Langley natural gas processing complex, a dividend received from Nora Gathering LLC and the sale of available for sale securities. Capital expenditures totaled \$263.4 million for the first quarter of 2011 and \$217.5 million for the first quarter of 2010.

The company commenced drilling on (drilled) 52 gross wells during the first quarter 2011. Of these wells, 51 were horizontal wells; 28 targeting the Huron play and 23 targeting the Marcellus play. The Company drilled 108 gross wells, including 77 gross horizontal wells in the first quarter of 2010. Capital expenditures for drilling and development were \$48.6 million higher in 2011 than 2010 despite the decline in the number of wells on which drilling commenced as a result of an increase in the costs to complete wells in the first quarter 2011 which were drilled in 2010 compared to the cost to complete wells in the first quarter 2010 which were drilled in 2009. The Company turned in line 15 Marcellus Shale wells and 39 Huron wells in the first quarter of 2011 which were drilled in 2010. In the comparable quarter in 2010, the Company turned in line 33 horizontal Huron wells and no Marcellus Shale wells which were drilled in 2009.

Capital expenditures for the Midstream operations totaled \$29.1 million and \$34.7 million during the first quarter of 2011 and 2010, respectively. The 2011 and 2010 expenditures were for gathering pipeline and gathering compression projects. The \$5.6 million decrease is attributed to 2010 upgrades to the recently sold Langley natural gas processing complex.

Capital expenditures at Distribution totaled \$6.2 million for the first quarter of 2011 compared to \$4.0 million for the first quarter of 2010. The \$2.2 million increase in capital expenditures was primarily due to the construction of the Company's natural gas fueling station and lower spending in the first quarter of 2010 due to inclement weather.

Financing Activities

Cash flows used in financing activities totaled \$85.0 million for the first quarter of 2011 compared to \$495.9 million provided by financing activities for the first quarter of 2010, a decrease of \$580.9 million in cash flows provided by financing activities between years. In the first quarter of 2010, the Company received \$527.7 million from a common stock offering of 12,500,000 shares. The Company used the net proceeds from the offering to accelerate development of its Marcellus Shale and Huron plays. In 2011 the Company repaid \$53.7 million of short-term loans with proceeds from the sale of the Langley natural gas processing complex.

EQT Corporation and Subsidiaries

Management's Discussion and Analysis of Financial Condition and Results of Operations

Security Ratings

The table below reflects the credit ratings for the outstanding debt instruments of the Company at March 31, 2011. Changes in credit ratings may affect the Company's cost of short-term and long-term debt (including interest rates and fees under its lines of credit), collateral requirements under derivative instruments and its access to the credit markets.

Rating Service	Senior Notes	Short-Term Rating
Moody's Investors Service (Moody's)	Baa1	P-2
Standard & Poor's Ratings Services (S&P)	BBB	A-3
Fitch Ratings (Fitch)	BBB	F2

On April 14, 2011, S&P affirmed its ratings on EQT. The outlook is negative.

On March 23, 2011, Fitch downgraded its rating on EQT to BBB from BBB+. The outlook is stable. Fitch stated that the key factor for the downgrade is increased business risk from EQT's growing focus on upstream operations.

On March 9, 2009, Moody's reaffirmed its ratings on EQT. The outlook is negative. Moody's stated that the ratings reflect the diversification and vertical integration among its three business segments as well as the Baa stand-alone quality of both its E&P and LDC operations.

The Company's credit ratings may be subject to revision or withdrawal at any time by the assigning rating organization and each rating should be evaluated independently of any other rating. The Company cannot ensure that a rating will remain in effect for any given period of time or that a rating will not be lowered or withdrawn entirely by a credit rating agency if, in its judgment, circumstances so warrant. If the credit rating agencies downgrade the Company's ratings, particularly below investment grade, the Company's access to the capital markets may be limited, borrowing costs and margin deposits on derivative contracts would increase, counterparties may request additional assurances and the potential pool of investors and funding sources may decrease. The required margin is also subject to significant change as a result of factors other than credit rating such as gas prices and credit thresholds set forth in agreements between the hedging counterparties and the Company.

The Company's debt instruments and other financial obligations include provisions that, if not complied with, could require early payment, additional collateral support or similar actions. The most important default events include maintaining covenants with respect to maximum leverage ratio, insolvency events, nonpayment of scheduled principal or interest payments, acceleration of other financial obligations and change of control provisions. The Company's current credit facility's financial covenants require a total debt-to-total capitalization ratio of no greater than 65%. The calculation of this ratio excludes the effects of accumulated other comprehensive income. As of March 31, 2011, the Company is in compliance with all existing debt provisions and covenants.

Commodity Risk Management

The substantial majority of the Company's commodity risk management program is related to hedging sales of the Company's produced natural gas. The Company's overall objectives in this hedging program are to protect cash flow from undue exposure to the risk of changing commodity prices. The Company's risk management program includes the use of exchange-traded natural gas futures contracts and options and OTC natural gas swap agreements and options (collectively, derivative commodity instruments) to hedge exposures to fluctuations in natural gas prices and for trading purposes. The derivative commodity instruments currently utilized by the Company are primarily fixed price swaps, collars and options.

As of April 17, 2011, the approximate volumes and prices of the Company's total hedge position for 2011 through 2013 production are:

**April through December

In 2008, the Company effectively settled certain derivative commodity swaps scheduled to mature during the period 2010 through 2013 by de-designating the swaps and entering into directly counteractive swaps. In 2009, the Company also terminated certain collars scheduled to mature during the period 2010 through 2012. As of the dates of these transactions, the Company had recorded a loss, net of tax, in accumulated other comprehensive income of approximately \$12 million (\$21 million pre-tax) for the swaps and a gain, net of tax, in accumulated other comprehensive income of approximately \$5 million (\$8 million pre-tax) for the collars. The net loss recorded in other comprehensive income from these transactions will be recognized in operating revenues in the Statements of Consolidated Income, and included in the average wellhead sales price, when the underlying physical transactions occur. As a result, the Company expects to recognize reduced operating revenues of approximately \$4.0 million over the final nine months of 2011, \$0.6 million in 2012 and \$2.5 million in 2013.

Commitments and Contingencies

In the ordinary course of business various legal and regulatory claims and proceedings are pending or threatened against the Company. While the amounts claimed may be substantial, the Company is unable to predict with certainty the ultimate outcome of such claims and proceedings. The Company has established reserves for pending litigation, which it believes are adequate, and after consultation with counsel and giving appropriate consideration to available insurance, the Company believes that the ultimate outcome of any matter currently pending against the Company will not materially affect the financial position, results of operations or liquidity of the Company.

Critical Accounting Policies

The Company's critical accounting policies are described in the notes to the Company's Consolidated Financial Statements for the year ended December 31, 2010 contained in the Company's Annual Report on Form 10-K. Any new accounting policies or updates to existing accounting policies as a result of new accounting pronouncements which have a material impact on the Company have been included in the notes to the Company's Condensed Consolidated Financial Statements for the period ended March 31, 2011. The application of the Company's critical accounting policies may require management to make judgments and estimates about the amounts reflected in the Condensed Consolidated Financial Statements. Management uses historical experience and all available information to make these estimates and judgments. Different amounts could be reported using different assumptions and estimates.

EQT Corporation and Subsidiaries

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Derivative Commodity Instruments

The Company's primary market risk exposure is the volatility of future prices for natural gas and NGLs, which can affect the operating results of the Company primarily through the EQT Production and EQT Midstream segments. The Company's use of derivatives to reduce the effect of this volatility is described in Note C to the Condensed Consolidated Financial Statements and under the caption "Commodity Risk Management" in Management's Discussion and Analysis of Financial Condition and Results of Operations of this Form 10-Q. The Company uses non-leveraged derivative commodity instruments that are placed with major financial institutions whose creditworthiness is continually monitored. The Company also enters into energy trading contracts to leverage its assets and limit its exposure to shifts in market prices. The Company's use of these derivative financial instruments is implemented under a set of policies approved by the Company's Corporate Risk Committee and Board of Directors.

Commodity Price Risk

For the derivative commodity instruments used to hedge the Company's forecasted production, the Company sets policy limits relative to the expected production and sales levels which are exposed to price risk. For the derivative commodity instruments used to hedge forecasted natural gas purchases and sales which are exposed to price risk and to hedge natural gas inventory which is exposed to changes in fair value, the Company sets limits related to acceptable exposure levels.

The financial instruments currently utilized by the Company include futures contracts, swap agreements, collar agreements and option contracts which may require payments to or receipt of payments from counterparties based on the differential between a fixed and variable price for the commodity. The Company also considers other contractual agreements in determining its commodity hedging strategy.

Management monitors price and production levels on a continuous basis and will make adjustments to quantities hedged as warranted. The Company's overall objectives in its hedging program are to protect cash flow from undue exposure to the risk of changing commodity prices.

With respect to the derivative commodity instruments held by the Company for purposes other than trading as of March 31, 2011, the Company hedged portions of expected equity production, portions of forecasted purchases and sales, and portions of natural gas inventory by utilizing futures contracts, swap agreements, collar agreements and option contracts covering approximately 181 Bcf of natural gas. See the "Commodity Risk Management" section of Management's Discussion and Analysis of Financial Condition and Results of Operations of this Form 10-Q for further discussion. A hypothetical decrease of 10% in the market price of natural gas from the March 31, 2011 levels would increase the fair value of non-trading natural gas derivative instruments by approximately \$77.3 million. A hypothetical increase of 10% in the market price of natural gas from the March 31, 2011 levels would decrease the fair value of non-trading natural gas derivative instruments by approximately \$75.1 million.

Edgar Filing: EQT Corp - Form 10-Q

The Company determined the change in the fair value of the derivative commodity instruments using a model similar to its normal determination of fair value as described in Note C. The Company assumed a 10% change in the price of natural gas from its levels at March 31, 2011. The price change was then applied to the derivative commodity instruments recorded on the Company's Condensed Consolidated Balance Sheet, resulting in the change in fair value.

The above analysis of the derivative commodity instruments held by the Company for purposes other than trading does not include the offsetting impact that the same hypothetical price movement may have on the Company's physical sales of natural gas. The portfolio of derivative commodity instruments held for risk management purposes approximates the notional quantity of a portion of the expected or committed transaction volume of physical commodities with commodity price risk for the same time periods. Furthermore, the derivative commodity instrument portfolio is managed to complement the physical transaction portfolio, reducing overall risks within limits. Therefore, an adverse impact to the fair value of the portfolio of derivative commodity instruments held for risk management purposes associated with the hypothetical changes in commodity prices referenced above should be offset by a favorable impact on the underlying hedged physical transactions, assuming the derivative commodity

instruments are not closed out in advance of their expected term, the physical derivative commodity instruments continue to function effectively as hedges of the underlying risk and the anticipated transactions occur as expected.

If the underlying physical transactions or positions are liquidated prior to the maturity of the derivative commodity instruments, a loss on the financial instruments may occur or the derivative commodity instruments might be worthless as determined by the prevailing market value on their termination or maturity date, whichever comes first.

Other Market Risks

The Company is exposed to credit loss in the event of nonperformance by counterparties to derivative contracts. This credit exposure is limited to derivative contracts with a positive fair value. The Company believes that NYMEX-traded futures contracts have minimal credit risk because the Commodity Futures Trading Commission regulations are in place to protect exchange participants, including the Company, from any potential financial instability of the exchange members. The Company's swap, collar and option derivative instruments are primarily with financial institutions and thus are subject to events that would impact those companies individually as well as that industry as a whole.

The Company utilizes various information technology systems to monitor and evaluate its credit risk exposures. This includes closely monitoring current market conditions, counterparty credit spreads and credit default swap rates. Credit exposure is controlled through credit approvals and limits. To manage the level of credit risk, the Company enters transactions with financial counterparties that are of investment grade, enters into netting agreements whenever possible and may obtain collateral or other security.

Approximately 66%, or \$177.7 million, of OTC derivative contracts outstanding at March 31, 2011 have a positive fair value. All derivative contracts outstanding as of March 31, 2011 are with counterparties having an S&P rating of A or above at that date.

As of March 31, 2011, the Company is not in default under any derivative contracts and has no knowledge of default by any counterparty to derivative contracts. The Company made no adjustments to the fair value of derivative contracts due to credit related concerns outside of the normal non-performance risk adjustment included in the Company's established fair value procedure. The Company will continue to monitor market conditions that may impact the fair value of derivative contracts reported in the Condensed Consolidated Balance Sheet.

The Company is also exposed to the risk of nonperformance by credit customers on physical sales of natural gas. A significant amount of revenues and related accounts receivable from EQT Production are generated from the sale of produced natural gas, NGLs and crude oil to certain marketers, including the Company's wholly owned marketing subsidiary EQT Energy, utility and industrial customers located mainly in the Appalachian area and a gas processor in Kentucky. Additionally, a significant amount of revenues and related accounts receivable from EQT Midstream are generated from the gathering of natural gas in Kentucky, Virginia, Pennsylvania and West Virginia.

The Company has a \$1.5 billion revolving credit facility that matures on December 8, 2014. The credit facility is underwritten by a syndicate of 20 financial institutions each of which is obligated to fund its pro-rata portion of any borrowings by the Company. As of March 31, 2011, the Company had outstanding under the revolving credit facility an irrevocable standby letter of credit of \$23.1 million and no loans.

Edgar Filing: EQT Corp - Form 10-Q

No one lender of the 20 financial institutions in the syndicate holds more than 10% of the facility. The Company's large syndicate group and relatively low percentage of participation by each lender is expected to limit the Company's exposure to problems or consolidation in the banking industry.

EQT Corporation and Subsidiaries

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of management, including the Company's Principal Executive Officer and Principal Financial Officer, an evaluation of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)), was conducted as of the end of the period covered by this report. Based on that evaluation, the Principal Executive Officer and Principal Financial Officer concluded that the Company's disclosure controls and procedures were effective as of the end of the period covered by this report.

Changes in Internal Control over Financial Reporting

There were no changes in internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the first quarter of 2011 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

In the ordinary course of business various legal and regulatory claims and proceedings are pending or threatened against the Company. While the amounts claimed may be substantial, the Company is unable to predict with certainty the ultimate outcome of such claims and proceedings. The Company has established reserves for pending litigation, which it believes are adequate, and after consultation with counsel and giving appropriate consideration to available insurance, the Company believes that the ultimate outcome of any matter currently pending against the Company will not materially affect the financial position, results of operations or liquidity of the Company.

PART II. OTHER INFORMATION

Item 1A. Risk Factors

Information regarding risk factors is discussed in Item 1A, Risk Factors of the Company's Form 10-K for the year ended December 31, 2010. There have been no material changes from the risk factors previously disclosed in the Company's Form 10-K.
