- Appointment of Mr. Vasyly Latsanych to the position of MTS Vice President, Marketing
- An indicative offer to Sistema JSFC for the acquisition of Sistema Inventure CJSC (Sistema Inventure), which directly owns 29% of the voting stock of Moscow City Telephone Network (MGTS).

Commentary

Mr. Andrei Dubovskov, President and CEO of MTS, commented, Group revenue for the quarter increased 13% year-over-year to reach 3.128 billion US dollars. During the quarter we have delivered healthy revenue growth on the back of the seasonally strong mobile business performance and growing contributions from our retail and fixed business. Total revenues in Russia - including mobile, fixed and handset and equipment sales - have increased year-over-year by 9% to 76.1 billion rubles. Our mobile business demonstrated 10% year-over-year growth up to 63.1 billion rubles on the back on of higher voice and data usage; strong net subscriber additions coupled with a sequential decline in churn; rising sales of handsets and active sales of modems and data tariff plans as demand continues to grow for data as we expand our 3G networks.

Mr. Alexey Kornya, MTS Vice President and Chief Financial Officer, said, During the second quarter 2011, for the Group we realized strong sequential OIBDA growth of 16% for a margin of 41.6%. In Russia, OIBDA increased by 12% quarter-on-quarter to 32.5 billion rubles. This led to a sequential improvement in OIBDA margin of 42.7%. Seasonal factors, such as increased business activity and roaming, contributed to the growth, but we have also seen improvements in the underlying business stemming from: higher usage of data and value-added services; improvements in our fixed-line business, namely through the closing of our Comstar transaction and progress related to the integration of other acquired companies; a sequential reduction in dealer commissions as we have reduced our SIM-card sales, focused sales through our own stores and shifted more commissions to a revenue-sharing structure; and reduced G&A expenses by optimizing headcount and other costs throughout our retail network.

Mr. Dubovskov added, In April we announced our OIBDA margin guidance for the full-year 2011. Our range of 42-43% was based on an improved competitive environment and lower SIM-card sales. Since this time, we have reduced our SIM-card monthly sales by 25%. We have also moved many of our dealer contracts away from a fee-based system to a more aggressive revenue sharing model to improve subscriber quality and reduce the practice of discounting. While we were optimistic that the market would see the logic in reducing SIM sales, we are witnessing increased sales by our competitors. Though for now we have not yet increased our own sales of SIM-cards, we believe it is prudent to withdraw our guidance on OIBDA for the year due to the risk of increased competitive activity in SIM-card sales. Though we are making progress on other issues affecting profitability, including our interconnect balance; integration in our fixed-line business; and broader cost control measures, we can only indicate that margins should end the year in the low 40s.

Edgar Filing: MOBILE TELESYSTEMS OJSC - Form 6-K

This press release provides a summary of some of the key financial and operating indicators for the period ended June 30, 2011. For full disclosure materials, please visit <http://www.mtsgsm.com/resources/reports/>.
