Press release

Mobile TeleSystems Announces Financial Results for the Fourth Quarter and Full Year Ended December 31, 2011

March 12, 2012

Moscow, Russian Federation Mobile TeleSystems OJSC (MTS - NYSE: MBT), the leading telecommunications provider in Russia and the CIS, today announces its unaudited US GAAP financial results for the three months and full year ended December 31, 2011.

Key Financial Highlights of Q4 2011 and FY 2011

- Consolidated revenues down 8.9% q-o-q to \$2,982 million and up 9.1% y-o-y to \$12,319 million
- Consolidated OIBDA(1) down 11.4% q-o-q to \$1,276 million with 42.8% OIBDA margin and up 5.6% y-o-y to \$5,144 million with 41.8% OIBDA margin
- Consolidated net income(2) of \$393 million in Q4 2011 and a net income of \$1,444 million for FY 2011
- Free cash-flow(3) positive with \$1,026 million for FY 2011

Key Corporate and Industry Highlights

- Acquisition of TVT, leading provider of cable TV and fixed broadband services in the Republic of Tatarstan, for \$162.9 million(4)

Edgar Filing: MOBILE TELESYSTEMS OJSC - Form 6-K

- Completion of the acquisition of a 100% stake in CJSC Sistema-Inventure, which directly owns 29% of the ordinary shares of Moscow City Telephone Network, for RUB 10.56 billion(5)
- Redemption of \$400 million 2012 Eurobond
- Commercial launch of the 3G network in the 900 MHz range in Moscow and the Moscow region
- Received first license in Russia to provide wireless communication services in the LTE TDD (time-division duplexing) standard in the 2595 2620 MHz range in Moscow and the Moscow region

Commentary

Mr. Andrei Dubovskov, President and CEO of MTS, commented, "Our performance in 2011 was in line with our guidance, and we continue to increase the value we create from our markets. For the year, revenue increased by 9% in US dollar terms to 12.3 billion US dollars despite increased currency volatility in the later part of the year. Total revenues in Russia for 2011 - including mobile, fixed and handset sales - increased year-over-year by close to 9% to 311.9 billion rubles. In Q4 2011, revenues went up by 2% year-over-year to 79.8 billion rubles. In the mobile segment, our revenues in Q4 2011 rose by 3% year-over-year up to 66.3

-
- (1) See Attachment A for definitions and reconciliation of OIBDA and OIBDA margin to their most directly comparable US GAAP financial measures.
 - (2) Attributable to the Group.
 - (3) See Attachment B for reconciliation of free cash-flow to net cash provided by operating activity.
 - (4) MTS also assumed net debt in the amount of \$17.1 million
 - (5) MTS also assumed debt in the amount of RUB 10.41 billion
-

billion rubles impacted by: higher voice usage, growing contribution from data traffic revenues, overall focus on higher-value subscribers as seen in our growth in ARPU. Quarter-over-quarter revenues declined by 4% due to seasonally weaker voice usage, largely due to seasonal roaming factors. We also saw a decrease in sales of equipment and handsets primarily due to the reduction in wholesale sales in our retail division as we optimized our retail operations to drive usage and loyalty in our mobile and fixed businesses. Our fixed-line business revenue in 2011 increased by 10% due to M&A, network modernization and up-selling of existing customers. In Q4 2011, the sequential 5% decline in fixed business revenues resulted from seasonal factors and our strategic decision to reduce low-margin transit traffic on our networks, which is not a core focus of our operations.

Mr. Alexey Kornya, MTS Vice President and Chief Financial Officer, stated, In 2011, we delivered healthy Group OIBDA growth of 6% up to over 5.1 billion US dollars. This translated to a margin of 41.8%. In the second half of 2011, our margin rose by over 3 percentage points relative to the first half of the year, an improvement driven through strategic decisions taken in our Russian operations and efficiency measures throughout the organization. In Russia, absolute OIBDA improved in 2011 by 7% to 132.9 billion rubles. In 2011, this resulted in a margin of 42.6%. Key drivers behind the improvement included integration of acquired fixed-line providers in Moscow and the Russian regions; headcount optimization in our sales and marketing divisions; changing of relationships with dealers and the shift towards a revenue-sharing model for commissions; sensible tariff plans that have improved our interconnect balance and improvements in our retail operations.

Mr. Dubovskov added, In 2012, with growth to be limited by the macroeconomic environment, we must look within our markets to extract greater value for the operators. Certain segments, like data, will grow at current rates. Although we are expanding into new services and continue to focus on upselling customers on products like smartphones and convergent products, it is too early to see the impact from these segments given the scale of our business. Therefore we cannot guide for more than mid-single digit growth of 5 to 7% in local currency, a rate that should continue in the short- and medium-term. In the second half of 2011 we significantly improved our profitability through reducing sales and marketing expenses, amending dealer agreements to reward top-offs rather than SIM-card sales, promoting loyalty by introducing tariffs designed to stimulate on-net calling, and further streamlining G&A expenses. However, we see the subsequent improvement as more of a one-off improvement, rather than constituting some sort of a trend. Therefore, we forecast an OIBDA margin in the range of 40 to 42% for 2012. Though we will work to improve profitability, a number of factors will likely continue to pressure our OIBDA margin, such as slower topline growth, the delayed OIBDA impact of new dealer commissions, increasing labor costs due to higher social taxes, and the development of our retail business. Over the longer term, given our revenue guidance, we see an OIBDA margin of above 40% as being natural for a company of our size and scope.

This press release provides a summary of some of the key financial and operating indicators for the period ended December 31, 2011. For full disclosure materials, please visit <http://www.mtsgsm.com/resources/reports/>.

**Attachments to the Fourth Quarter and Full Year 2011
Earnings Press Release**

Attachment A

Non-GAAP financial measures. This press release includes financial information prepared in accordance with accounting principles generally accepted in the United States of America, or US GAAP, as well as other financial measures referred to as non-GAAP. The non-GAAP financial measures should be considered in addition to, but not as a substitute for, the information prepared in accordance with US GAAP. Due to the rounding and translation practices, US dollar and functional currency margins, as well as other non-GAAP financial measures, may differ.

Operating Income Before Depreciation and Amortization (OIBDA) and OIBDA margin. OIBDA represents operating income before depreciation and amortization. OIBDA margin is defined as OIBDA as a percentage of our net revenues. Our OIBDA may not be similar to OIBDA measures of other companies; is not a measurement under accounting principles generally accepted in the United States and should be considered in addition to, but not as a substitute for, the information contained in our consolidated statement of operations. We believe that OIBDA provides useful information to investors because it is an indicator of the strength and performance of our ongoing business operations, including our ability to fund discretionary spending such as capital expenditures, acquisitions of mobile and fixed operators and other investments and our ability to incur and service debt. While depreciation and amortization are considered operating costs under generally accepted accounting principles, these expenses primarily represent the non-cash current period allocation of costs associated with long-lived assets acquired or constructed in prior periods. Our OIBDA calculation is commonly used as one of the bases for investors, analysts and credit rating agencies to evaluate and compare the periodic and future operating performance and value of companies within the wireless telecommunications industry. OIBDA can be reconciled to our consolidated statements of operations as follows:

(10) Adjusted OIBDA results for Q4 2010 do not include long-lived and other assets impairment loss in the amount of \$137.8 million

Attachment B

Net debt represents total debt less cash and cash equivalents and short-term investments. Our net debt calculation is commonly used as one of the bases for investors, analysts and credit rating agencies to evaluate and compare our periodic and future liquidity within the wireless telecommunications industry. The non-GAAP financial measures should be considered in addition to, but not as a substitute for, the information prepared in accordance with US GAAP.

Net debt can be reconciled to our consolidated balance sheets as follows:

USD mln	As of Dec 31, 2010	As of Dec 31, 2011
Current portion of debt and of capital lease obligations	757.1	1,155.7
Long-term debt	6,392.6	7,554.0
Capital lease obligations	10.9	5.5
Total debt	7,160.6	8,715.2
Less:		
Cash and cash equivalents	927.7	1,850.8
Short-term investments	333.6	86.2
Net debt	5,899.3	6,778.2

Free cash-flow can be reconciled to our consolidated statements of cash flow as follows:

USD mln	For the year ended Dec 31, 2010	For the year ended Dec 31, 2011
Net cash provided by operating activities	3,617.2	3,849.0
Less:		
Purchases of property, plant and equipment	(1,914.3)	(2,239.8)
Purchases of intangible assets	(732.8)	(344.7)
Proceeds from sale of property, plant and equipment	6.8	22.6
Proceeds/(purchases) of other investments	749.7	(44.2)
Investments in and advances to associates	(2.9)	3.0
Acquisition of subsidiaries, net of cash acquired	(195.1)	(219.5)
Free cash-flow	1,528.6	1,026.4

Attachment C

Definitions

Subscriber. We define a subscriber as an individual or organization whose account shows chargeable activity within sixty one days in the case of post-paid tariffs, or one hundred and eighty three days in the case of our pre-paid tariffs, or whose account does not have a negative balance for more than this period.

Average monthly service revenue per subscriber (ARPU). We calculate our ARPU by dividing our service revenues for a given period, including interconnect, guest roaming fees and connection fees, by the average number of our subscribers during that period and dividing by the number of months in that period.

Average monthly minutes of usage per subscriber (MOU). MOU is calculated by dividing the total number of minutes of usage during a given period by the average number of our subscribers during the period and dividing by the number of months in that period.

Churn. We define our churn as the total number of subscribers who cease to be a subscriber as defined above during the period (whether involuntarily due to non-payment or voluntarily, at such subscriber's request), expressed as a percentage of the average number of our subscribers during that period.

Subscriber acquisition cost (SAC). We define SAC as total sales and marketing expenses and handset subsidies for a given period. Sales and marketing expenses include advertising expenses and commissions to dealers. SAC per gross additional subscriber is calculated by dividing SAC during a given period by the total number of gross subscribers added by us during the period.
