UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

(Mark One)

Quarterly report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

for the quarterly period ended March 31, 2012

Transition report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

for the transition period from to

Commission File No. 000-28344

FIRST COMMUNITY CORPORATION

(Exact name of registrant as specified in its charter)

Edgar Filing: FIRST COMMUNITY CORP /SC/ - Form 10-Q

South Carolina

(State or other jurisdiction of incorporation

or organization)

57-1010751

(I.R.S. Employer Identification No.)

5455 Sunset Boulevard, Lexington, South Carolina 29072

(Address of principal executive offices) (Zip Code)

(803) 951-2265

(Registrant's telephone number, including area code)

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15 (d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer, and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

Indicate by check mark whether the registrant is shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date: On May 10, 2012, 3,310,572 shares of the issuer's common stock, par value \$1.00 per share, were issued and outstanding.

Table of Contents**Notes to Consolidated Financial Statements (Unaudited)*****Note 1 - Basis of Presentation***

In the opinion of management, the accompanying unaudited consolidated balance sheets, and the consolidated statements of income, comprehensive income, changes in shareholders' equity, and the cash flows of First Community Corporation (the Company), present fairly in all material respects the Company's financial position at March 31, 2012 and December 31, 2011, the Company's results of operations and cash flows for the three months ended March 31, 2012 and 2011. The results of operations for the three months ended March 31, 2012 are not necessarily indicative of the results that may be expected for the year ending December 31, 2012.

In the opinion of management, all adjustments necessary to fairly present the consolidated financial position and consolidated results of operations have been made. All such adjustments are of a normal, recurring nature. All significant intercompany accounts and transactions have been eliminated in consolidation. The consolidated financial statements and notes thereto are presented in accordance with the instructions for Form 10-Q. The information included in the Company's 2011 Annual Report on Form 10-K should be referred to in connection with these unaudited interim financial statements.

Note 2 Earnings Per Common Share

The following reconciles the numerator and denominator of the basic and diluted earnings per common share computation:

(In thousands except average market price)

	Three months ended March 31,	
	2012	2011
Numerator (Net income available to common shareholders)	\$ 630	\$ 403
Denominator		
Weighted average common shares outstanding for:		
Basic earnings per share	3,308	3,272
Dilutive securities:		
Warrants - Treasury stock method	21	
Diluted earnings per share	3,329	3,272
The average market price used in calculating assumed number of shares	\$ 7.29	\$ 6.34

At March 31, 2012, there were 75,022 outstanding options at an average exercise price of \$19.69 and warrants for 196,000 shares at \$8.69. None of these options or warrants has an exercise price below the average market price of \$7.29 for the three-month period ended March 31,

Edgar Filing: FIRST COMMUNITY CORP /SC/ - Form 10-Q

2012, therefore they are not deemed to be dilutive. In the fourth quarter of 2011, we issued \$2.5 million in 8.75% subordinated notes maturing December 16, 2019. Interest is payable quarterly and the notes may be prepaid at anytime without penalty. Warrants for 107,500 shares of common stock at \$5.90 per share were issued in connection with the issuance of the subordinated debt. These warrants expire December 16, 2019 and are included in dilutive securities in the table above.

Table of Contents

Note 3 Assets and Liabilities Measured at Fair Value

In connection with the adoption of the Fair Value Option, the Company adopted the requirements of the FASB (Financial Accounting Standards Board) ASC (Accounting Standards Codification) Fair Value Measurement Topic which defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The Fair Value Measurement Topic also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1 Quoted prices in active markets for identical assets or liabilities.

Level 2 Observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

Following is a description of valuation methodologies used for assets and liabilities recorded at fair value on a recurring basis:

Investment Securities Available for Sale: Measurement is on a recurring basis based upon quoted market prices, if available. If quoted market prices are not available, fair values are measured using independent pricing models or other model-based valuation techniques such as the present value of future cash flows, adjusted for prepayment assumptions, projected credit losses, and liquidity. Level 1 securities include those traded on an active exchange or by dealers or brokers in active over-the-counter markets. Level 2 securities include mortgage-backed securities issued both by government sponsored enterprises and private label mortgage-backed securities. Generally these fair values are priced from established pricing models. Level 3 securities include corporate debt obligations and asset backed securities that are less liquid or for which there is an inactive market.

Loans: Loans that are considered impaired are recorded at fair value on a non-recurring basis. Once a loan is considered impaired, measurement is based upon FASB ASC 310-10-35 Loan Impairment. The fair value is estimated using one of several methods, including collateral liquidation value, market value of similar debt and discounted cash flows. Those impaired loans not requiring a specific charge against the allowance represent loans for which the fair value of the expected repayments or collateral meet or exceed the recorded investment in the loan. At March 31, 2012, substantially all of the total impaired loans were evaluated based on the fair value of the underlying collateral. When the Company records the fair value based upon a current appraisal, the fair value measurement is considered a Level 2 measurement. When a current appraisal is not available or there is estimated further impairment, the measurement is considered a Level 3 measurement.

Other Real Estate Owned (OREO): OREO is carried at the lower of carrying value or fair value on a non-recurring basis. Fair value is based upon independent appraisals or management's estimation of the collateral and is considered a Level 2 measurement. When the OREO value is based upon a current appraisal or when a current appraisal is not available or there is estimated further impairment, the measurement is considered a Level 3 measurement.

Derivative Financial Instruments: Interest rate swaps are carried at fair value and measured on a recurring

Table of Contents

Note 3 Assets and Liabilities Measured at Fair Value continued

basis. The measurement is based on valuation techniques including discounted cash flows analysis for each derivative. The analysis reflects the contractual remaining term of derivative, interest rates, volatility and expected cash payments. The measurement of the interest rate swap is considered to be a Level 3 measurement.

The following tables reflect the changes in fair values for the three-month periods ended March 31, 2012 and 2011 and where these changes are included in the income statement:

(Dollars in thousands)

March 31, 2012

-------	----	--------	----	----	--------	----

Table of Contents**Note 3 Assets and Liabilities Measured at Fair Value - continued**

The Company has a large percentage of loans with real estate serving as collateral. Loans which are deemed to be impaired are primarily valued on a nonrecurring basis at the fair value of the underlying real estate collateral. Such fair values are obtained using independent appraisals, which the Company considers to be Level 2 inputs. The aggregate amount of impaired loans was \$9.6 million and \$9.4 million for the three months ended March 31, 2012 and year ended December 31, 2011, respectively.

For Level 3 assets and liabilities measured at fair value on a recurring or non-recurring basis as of March 31, 2012, the significant unobservable inputs used in the fair value measurements were as follows:

(Dollars in thousands)	Fair Value as of March 31, 2012	Valuation Technique	Rate
Interest Rate Swap	\$ 553	Discounted cash flows	3.08%

Note 4 Investment Securities

The amortized cost and estimated fair values of investment securities are summarized below:

(Dollars in thousands)	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
March 31, 2012:				
Government sponsored enterprises	\$ 29	\$ 3	\$	\$ 32

	\$ 199,072	\$ 4,438	\$ 2,478	\$ 201,032

During the three months ended March 31, 2012 and March 31, 2011, the Company received proceeds of \$4.2 million and \$25.9 million, respectively, from the sale of investment securities available-for-sale, amounting to gains of \$190.6 thousand and \$1.1 million in earnings for each respective period. Losses from the sale of investments for the three months ended March 31, 2012 and March 31, 2011 amounted to \$179.9 thousand and \$1.0 million respectively. As prescribed by FASB ASC 320-10-35, for the quarter ended March 31, 2011, the Company recognized the credit component of an OTTI of its debt securities in earnings and the non-credit component in other comprehensive income

Table of Contents

(OCI) for those securities in which the Company does not intend to sell the security and it is more likely than not the Company will not be required to sell the securities prior to recovery.

At March 31 2012, corporate and other securities available-for-sale included the following at fair value: corporate bonds at \$1.5 million, mutual funds at \$894.6 thousand, foreign debt of \$59 thousand, and Federal Home Loan Mortgage Corporation (the FHLMC or Freddie Mac) preferred stock of \$19.8 thousand. At December 31 2011, corporate and other securities available-for-sale included the following at fair value: corporate bonds at \$1.4 million, mutual funds at \$904.9 thousand, foreign debt of \$59 thousand and FHLMC preferred stock of \$20.9 thousand.

Table of Contents*Note 4 Investment Securities continued*

During the three months ended March 31, 2012 and March 31, 2011, the Company recorded OTTI losses on and available-for-sale securities as follows:

(Dollars in thousands)	Three months ended March 31, 2012 Available-for-sale securities	Three months ended March 31, 2011 Available-for-sale securities
Total OTTI charge realized and unrealized	\$ 415	\$ 71
OTTI recognized in other comprehensive income (non-credit component)	215	67
Net impairment losses recognized in earnings (credit component)	\$ 200	\$ 4

During 2012 and 2011, an OTTI occurred of which only a portion was attributed to credit loss and recognized in earnings. The remainder was reported in other comprehensive income. The following is an analysis of amounts relating to credit losses on debt securities recognized in earnings during the three months ended March 31, 2012 and March 31, 2011.

(Dollars in thousands)	2012 Available for Sale	2011 Available for Sale
Balance at beginning of period	\$ 930	\$ 2,143
Other-than-temporary-impairment not previously recognized	173	
Additional increase for which an other-than-temporary impairment was previously recognized related to credit losses	27	4
Other-than-temporary-impairment previously recognized on securities sold	(50)	(169)
Realized losses during the period	(77)	(28)
Balance related to credit losses on debt securities at end of period	\$ 1,003	\$ 1,950

Table of Contents

Note 4 Investment Securities - continued

For the three months ended March 31, 2012, there were two non-agency mortgage backed securities with OTTI in which only the amount of loss related to credit was recognized in earnings. In evaluating the non-agency mortgage backed securities, relevant assumptions such as prepayment rate, default rate and loss severity on a loan level basis are used in determining the expected recovery of the contractual cash flows. The assumptions are that all loans greater than 60 days delinquent will be resolved across a two-year period at loss severities based on location and category. The balance of the underlying portfolio cash flows are evaluated using ongoing assumptions for loss severities, prepayment rates and default rates. The ongoing assumptions for average prepayment rate, default rate and severity used in the valuations were approximately 5.6%, 2.5%, and 50.5%, respectively. The underlying collateral on substantially all of these securities is fixed rate residential first mortgages located throughout the United States. The underlying collateral includes various percentages of owner-occupied, as well as, investment related single-family, 2-4 family and condominium residential properties. The securities were purchased at various discounts to par value. Based on the assumptions used in valuing the securities, the Company believes the existing discount and remaining subordinated collateral provide coverage against future credit losses on the downgraded securities for which no OTTI has been recognized.

Table of Contents**Note 4 Investment Securities - continued**

The following tables show gross unrealized losses and fair values, aggregated by investment category and length of time that individual securities have been in a continuous loss position at March 31, 2012 and December 31, 2011.

Total	\$ 32,735	\$ 264	\$ 19,271	\$ 2,214	\$ 52,006	\$ 2,478

Government Sponsored Enterprise, Mortgage-Backed Securities: Beginning in 2008 and continuing through 2011 and into 2012, the bond markets and many institutional holders of bonds have come under a great deal of stress partially as a result of increasing delinquencies in the sub-prime mortgage lending market. At March 31, 2012, the Company's wholly-owned subsidiary, First Community Bank, N.A. (the "Bank"), owns mortgage-backed securities (MBSs) including collateralized mortgage obligations (CMOs) with a book value of \$122.5 million and approximate fair value of \$125.1 million issued by government sponsored entities (GSEs). Current economic conditions have impacted MBSs issued by GSEs such as the FHLMC and the Federal National Mortgage Association (the "FNMA" or "Fannie Mae"). These entities have experienced increasing delinquencies in the underlying loans that make up the MBSs and CMOs. As of March 31, 2012 and December 31, 2011, all of the MBSs issued by GSEs are classified as Available for Sale. Unrealized losses on these investments are not considered to be other than temporary and we have the intent and ability to hold these until they mature or recover the current book value. The contractual cash flows of the investments are guaranteed by the GSE. Accordingly, it is expected that the securities would not be settled at a price less than the amortized cost of the Company's investment. Because the Company has the ability and intent to hold these investments until a recovery of fair value, which may be maturity, the Company does not consider the investments to be other than temporarily impaired at March 31, 2012.

Table of Contents*Note 4 Investment Securities continued*

Non-agency mortgage backed securities: The Company also holds private label mortgage-backed securities (PLMBSs), including CMOs, at March 31, 2012 with an amortized cost of \$14.1 million and approximate fair value of \$13.2 million. Although these are not classified as sub-prime obligations or considered the high risk tranches, the majority of structured investments within all credit markets have been impacted by volatility and credit concerns and economic stresses beginning in 2008 and continuing through 2011 and into 2012. The result has been that the market for these investments has become less liquid and the spread as compared to alternative investments has widened dramatically. During the second quarter of 2008, the Company implemented a leverage strategy whereby we acquired approximately \$63.2 million in certain non-agency MBSs and CMOs. All of the mortgage assets acquired in this transaction were classified as prime or ALT-A securities and represented the senior or super-senior tranches of the securities. The assets acquired as part of this strategy were classified as held-to-maturity in the investment portfolio. Due to the significant spreads on these securities, they were all purchased at discounts. Each of the CMO pools included in this leverage transaction, as well as privately held CMOs held previously in the available-for-sale portfolio, has been analyzed by reviewing underlying loan delinquencies, collateral value and resulting credit support. These securities have continued to experience increasing delinquencies in the underlying loans that make up the MBSs and CMOs. Management monitors each of these pools on a quarterly basis to identify any deterioration in the credit quality, collateral values and credit support underlying the investments.

During the quarter ended March 31, 2012, the Company identified two PLMBS with a fair value of \$2.5 million that it considers other-than-temporarily-impaired. As prescribed by FASB ASC 320-10-65, the Company has recognized an impairment charge in earnings of \$199.8 thousand (credit component). The \$199.8 thousand represents the estimated credit losses on these securities for the quarter ended March 31, 2012. During the quarter ended March 31, 2011, no OTTI charges were recorded in earnings for the PLMBS portfolio. The credit losses were estimated by projecting the expected cash flows estimating prepayment speeds, increasing defaults and collateral loss severities. The credit loss portion of the impairment charge represents the difference between the present value of the expected cash flows and the amortized cost basis of the securities.

The following table summarizes as of March 31, 2012 the number of CUSIPs, par value, carrying value and fair value of the non-agency mortgage-backed/CMOs securities by credit rating. The credit rating reflects the lowest credit rating by any major rating agency. All non-agency mortgage-backed /CMO securities are in the super senior or senior tranche.

(Dollars in thousands)

Credit Rating	Number of CUSIPs	Par Value	Amortized Cost	Fair Value
AAA	6	\$ 1,411	\$ 1,411	\$ 1,404
AA	1	323	323	308
A1	1	356	356	346
Aa2	1	85	85	85
Aa3	1	285	285	282
Below Investment Grade	10	14,030	11,611	10,795
Total	20	\$ 16,490	\$ 14,071	\$ 13,220

During the first quarter of 2012, the Company sold two non-agency mortgage-backed securities that were rated below investment grade with a total book value of approximately \$1.4 million. The \$179.9 thousand loss on the sale of these securities was offset by a \$190.6 thousand gain on

Edgar Filing: FIRST COMMUNITY CORP /SC/ - Form 10-Q

the sale of one municipal bond and one Government sponsored enterprise mortgage-backed security, both of which were rated above investment grade. The sales of these non-agency mortgage-backed securities during the quarter have served to reduce the level of securities on the Company's balance sheet that are rated below investment grade.

Table of Contents

Note 4 Investment Securities - continued

Corporate Bonds: The Company's unrealized loss on investments in corporate bonds is the result of one bond that is rated Aa3 by Moody (investment grade) with a fair value of \$475.0 thousand and a book value of \$499.7 thousand. The economic conditions from 2009 to 2011 and into 2012 have had a significant impact on all corporate debt obligations. As a result, the spreads on all of the securities have widened dramatically and the liquidity of many of these investments has been negatively impacted. All of the corporate bonds held by the Company are reviewed on a quarterly basis to identify downgrades by rating agencies as well as deterioration of the underlying collateral or the issuer's ability to service the debt obligation. Other than the preferred term security, the Company does not consider these investments to be other-than-temporarily impaired at March 31, 2012.

Small Business Administration Pools: These pools are guaranteed pass-thru with the full faith and credit of the United States government. Because the Company has the ability and intent to hold these investments until a recovery of fair value, which may be maturity, the Company does not consider the investments to be other-than-temporarily impaired at March 31, 2012.

State and Local Governments and Other: There were no unrealized losses on these investments and the Company does not consider the investments to be other-than-temporarily impaired at March 31, 2012.

Table of Contents**Note 4 Investment Securities - continued**

The following sets forth the amortized cost and fair value of investment securities at March 31, 2012 by contractual maturity. Expected maturities differ from contractual maturities because borrowers may have the right to call or prepay the obligations with or without prepayment penalties. Mortgage-backed securities are based on average life at estimated prepayment speeds.

(Dollars in thousands)	Available-for-sale	
	Amortized Cost	Fair Value
Due in one year or less	\$ 12,974	\$ 12,823
Due after one year through five years	109,954	111,637
Due after five years through ten years	53,426	54,865
Due after ten years	17,395	17,692
	\$ 193,749	\$ 197,017

Loans outstanding to bank directors, executive officers and their related business interests amounted to \$11.3 million and \$6.4 million at March 31, 2012 and March 31, 2011, respectively. Repayments on these loans during the three months ended March 31, 2012 were \$749.3 thousand and loans made amounted to \$390.0 thousand. Repayments on these loans during the three months ended March 31, 2011 were \$200 thousand and loans made amounted to \$790 thousand. Related party loans are made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with unrelated persons and generally do not involve more than the normal risk of collectability.

Table of Contents**Note 5 Loans-continued**

The Company categorizes loans into risk categories based on relevant information about the ability of borrowers to service their debt, including: current financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors. The Company analyzes loans individually by classifying the loans as to credit risk. This analysis is performed on a monthly basis. The Company uses the following definitions for risk ratings:

Special Mention. Loans classified as special mention have a potential weakness that deserves management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or of the institution's credit position at some future date. Special mention assets are not adversely classified and do not expose an institution to sufficient risk to warrant adverse classification.

Substandard. Loans classified as substandard are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

Doubtful. Loans classified as doubtful have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

Table of Contents**Note 5 Loans-continued**

Loans not meeting the criteria above that are analyzed individually as part of the above described process are considered as pass rated loans. As of March 31, 2012 and December 31, 2011, and based on the most recent analysis performed, the risk category of loans by class of loans is shown in the table below. As of March 31, 2012 and December 31, 2011, no loans were classified as doubtful.

As a result of adopting the amendments in Accounting Standards Update (ASU) 2011-02 (Receivables-Topic 310), the bank reassessed all restructurings that occurred on or after the beginning of the fiscal year of adoption (January 1, 2011) to determine whether they are considered TDRs under the amended guidance. The bank identified as TDRs certain loans for which the allowance for loan losses had previously been measured under a general allowance methodology. Upon identifying those loans as TDRs, the bank identified them as impaired under the guidance in ASC 310-10-35. The amendments in ASU 2011-02 require prospective application of the impairment measurement guidance in ASC 310-10-35 for those loans newly identified as impaired. At March 31, 2012 and December 31, 2011, the recorded investment in loans for which the allowance was previously measured under a general allowance methodology and are now impaired under ASC 310-10-35 was \$7.6 million and \$7.7 million, respectively. An allowance for loans losses of \$1 thousand and \$2 thousand was associated with those loans at March 31, 2012 and December 31, 2011 respectively.

There were no loans determined to be TDRs that were restructured during the three month period ended March 31, 2012.

Table of Contents*Note 5 Loans-continued*

The following table, by loan category, presents loans determined to be TDRs in the last twelve months that had payment defaults during the three month period ended March 31, 2012. Any payment that is past due greater than 30 days is considered to be a payment default.

Troubled Debt Restructurings that subsequently defaulted this period (Dollars in thousands)	For the three months ended March 31, 2012	
	Number of Contracts	Recorded Investment
Mortgage-Commercial	3	\$ 56
Commercial & Industrial	1	9
Total TDRs	4	\$ 65

During the three month period ended March 31, 2012, four nonaccrual loans that had previously been restructured in the last twelve months had payment defaults.

In the determination of the allowance for loan losses, all TDRs are reviewed to ensure that one of the three proper valuation methods (fair market value of the collateral, present value of cash flows, or observable market price) is adhered to. All non-accrual loans are written down to their corresponding collateral value. All TDR accruing loans that have a loan balance that exceeds the present value of cash flows will have a specific allocation. All nonaccrual loans are considered impaired. Under ASC 310-10, a loan is impaired when it is probable that the bank will be unable to collect all amounts due including both principal and interest according to the contractual terms of the loan agreement.

Note 6 - Recently Issued Accounting Pronouncements

The following is a summary of recent authoritative pronouncements that could impact the accounting, reporting, and or disclosure of financial information by the Company.

In September 2011, the Intangibles topic was amended to permit an entity to consider qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test. These amendments were effective for the Company on January 1, 2012 and had no effect on the financial statements.

In April 2011, the criteria used to determine effective control of transferred assets in the Transfers and Servicing topic of the ASC was amended by ASU 2011-03. The requirement for the transferor to have the ability to repurchase or redeem the financial assets on substantially the agreed terms and the collateral maintenance implementation guidance related to that criterion were removed from the assessment of effective control. The other criteria to assess effective control were not changed. The amendments were effective for the Company on January 1, 2012 and had no effect on the financial statements.

ASU 2011-04 was issued in May 2011 to amend the Fair Value Measurement topic of the ASC by clarifying the application of existing fair value measurement and disclosure requirements and by changing particular principles or requirements for measuring fair value or for disclosing information about fair value measurements. The amendments were effective for the Company beginning January 1, 2012 and had additional disclosures are included in Note 3.

Table of Contents

Note 6 - Recently Issued Accounting Pronouncements-continued

The Comprehensive Income topic of the ASC was amended in June 2011. The amendment eliminates the option to present other comprehensive income as a part of the statement of changes in stockholders' equity and requires consecutive presentation of the statement of net income and other comprehensive income. The amendments were applicable to the Company on January 1, 2012 and have been applied retrospectively. In December 2011, the topic was further amended to defer the effective date of presenting reclassification adjustments from other comprehensive income to net income on the face of the financial statements. Companies should continue to report reclassifications out of accumulated other comprehensive income consistent with the presentation requirements in effect prior to the amendments while FASB redeliberates future requirements.

Other accounting standards that have been issued or proposed by the FASB or other standards-setting bodies are not expected to have a material impact on the Company's financial position, results of operations or cash flows.

Note 7 Fair Value of Financial Instruments

FASB ASC 825-10-50 Disclosure about Fair Value of Financial Instruments, requires the company to disclose estimated fair values for its financial instruments. Fair value estimates, methods, and assumptions are set forth below.

Cash and short term investments The carrying amount of these financial instruments (cash and due from banks, interest-bearing bank balances, federal funds sold and securities purchased under agreements to resell) approximates fair value. All mature within 90 days and do not present unanticipated credit concerns and are classified as Level 1.

Investment Securities Fair values are based on quoted market prices, where available and these are classified as Level 1. If quoted market prices are not available, fair values are based on quoted market prices of comparable instruments and are classified as Level 2. Other investments which include Federal Home Loan Bank stock and Federal Reserve Bank stock are not measured at fair value due to restrictions placed on transfer ability.

Loans Held for Sale The company originates fixed rate residential loans on a servicing released basis in the secondary market. Loans closed but not yet settled with an investor, are carried in the company's loans held for sale portfolio. These loans are fixed rate residential loans that have been originated in the company's name and have closed. Virtually all of these loans have commitments to be purchased by investors at a locked in by price with the investors on the same day that the loan was locked in with the company's customers. Therefore, these loans present very little market risk for the company and are classified as Level 2. The carrying amount of these loans approximates fair value.

Loans The fair value of loans are estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities and are classified as Level 2. As discount rates are based on current loan rates as well as management estimates, the fair values presented may not be indicative of the value negotiated in an actual sale.

Accrued Interest Receivable The fair value approximates the carrying value and is classified as Level 1.

Interest rate swap The fair value approximates the carrying value and is classified as Level 3.

Deposits The fair value of demand deposits, savings accounts, and money market accounts is the amount payable on demand at the reporting date. The fair value of fixed-maturity certificates of deposits is estimated by discounting the future cash flows using rates currently offered for deposits of similar remaining maturities. These are classified as Level 2.

Federal Home Loan Bank Advances Fair value is estimated based on discounted cash flows using current market rates for borrowings with similar terms and are classified as Level 2.

Table of Contents**Note 7 Fair Value of Financial Instruments - continued**

Short Term Borrowings The carrying value of short term borrowings (securities sold under agreements to repurchase and demand notes to the Treasury) approximates fair value. These are classified as Level 2.

Junior Subordinated Debentures The fair values of junior subordinated debentures is estimated by using discounted cash flow analyses based on incremental borrowing rates for similar types of instruments. These are classified as Level 2.

Accrued Interest Payable The fair value approximates the carrying value and is classified as Level 1.

Commitments to Extend Credit The fair value of these commitments is immaterial because their underlying interest rates approximate market.

The carrying amount and estimated fair value by classification Level of the Company's financial instruments as of March 31, 2012 are as follows:

(Dollars in thousands)	Carrying Amount	Total	March 31, 2012 Fair Value		
			Level 1	Level 2	Level 3
Financial Assets:					
Cash and short term investments	\$ 24,227	\$ 24,227	\$ 24,227

Note 8 Subsequent Events

Subsequent events are events or transactions that occur after the balance sheet date but before financial statements are issued. Recognized subsequent events are events or transactions that provide additional evidence about conditions that existed at the date of the balance sheet, including the estimates inherent in the process of preparing financial statements. Nonrecognized subsequent events are events that provide evidence about conditions that did not exist at the date of the balance sheet but arose after that date. Management has reviewed events occurring through the date the financial statements were available to be issued and no additional subsequent events occurred requiring accrual or disclosure.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

This report, including information included or incorporated by reference in this document, contains statements which constitute forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Forward-looking statements may relate to, among other matters, the financial condition, results of operations, plans, objectives, future performance, and business of our Company. Forward-looking statements are based on many assumptions and estimates and are not guarantees of future performance. Our actual results may differ materially from those anticipated in any forward-looking statements, as they will depend on many factors about which we are unsure, including many factors which are beyond our control. The words may, would, could, should, will, expect, anticipate, predict, project, potential, continue, assume, believe, intend, plan, forecast, goal, and estimate, as are meant to identify such forward-looking statements. Potential risks and uncertainties that could cause our actual results to differ materially from those anticipated in our forward-looking statements include, without limitation, those described under the heading Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2011 as filed with the Securities and Exchange Commission (the SEC) and the following:

- reduced earnings due to higher credit losses generally and specifically because losses in the sectors of our loan portfolio secured by real estate are greater than expected due to economic factors, including, but not limited to, declining real estate values, increasing interest rates, increasing unemployment, or changes in payment behavior or other factors;
- reduced earnings due to higher other-than-temporary impairment charges resulting from additional decline in the value of our private label mortgage backed securities (MBS) portfolio, specifically as a result of increasing default rates, and loss severities on the underlying real estate collateral.
- the amount of our loan portfolio collateralized by real estate and weaknesses in the real estate market;
- our ability to comply with our formal written agreement with our primary bank regulator and potential regulatory actions if we fail to comply;

Edgar Filing: FIRST COMMUNITY CORP /SC/ - Form 10-Q

- restrictions or conditions imposed by our regulators on our operations may make it more difficult for us to achieve our goals;
- the adequacy of the level of our allowance for loan losses and the amount of loan loss provisions required in future periods;
- results of examinations by our regulatory authorities, including the possibility that the regulatory authorities may, among other things, require us to increase our allowance for loan losses or write-down assets;
- significant increases in competitive pressure in the banking and financial services industries;
- changes in the interest rate environment which could reduce anticipated or actual margins;

Table of Contents

- changes in political conditions or the legislative or regulatory environment, including, but not limited to, the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act) and regulations adopted thereunder, changes in federal and/or state tax laws or interpretations thereof by taxing authorities, changes in laws, rules or regulations applicable to companies that have participated in the U.S. Treasury Department's Capital Purchase Program, and other governmental initiatives affecting the financial services industry;

- general economic conditions, either nationally or regionally and especially in our primary service area, being less favorable than expected resulting in, among other things, a deterioration in credit quality;

- changes occurring in business conditions and inflation;

- increased funding costs due to market illiquidity, increased competition for funding, and/or increased regulatory requirements with regard to funding;

- changes in deposit flows;

- changes in technology;

- changes in monetary and tax policies, including confirmation of the income tax refund claims received by the Internal Revenue Service (IRS);

- changes in accounting policies and practices, as may be adopted by the regulatory agencies, as well as the Public Company Accounting Oversight Board and the Financial Accounting Standards Board;

- the rate of delinquencies and amounts of loans charged-off;

- the rate of loan growth in recent years and the lack of seasoning of a portion of our loan portfolio;

- our ability to maintain appropriate levels of capital and to comply with our higher individual minimum capital ratios;

- our ability to attract and retain key personnel;
- our ability to retain our existing clients, including our deposit relationships;
- adverse changes in asset quality and resulting credit risk-related losses and expenses;
- loss of consumer confidence and economic disruptions resulting from terrorist activities; and
- other risks and uncertainties detailed from time to time in our filings with the SEC.

These risks are exacerbated by the developments in recent years in local, national and international financial markets, and we are unable to predict what effect these uncertain market conditions will continue to have on our Company. Beginning in 2008 and continuing into 2012, the capital and credit markets have experienced severe levels of volatility and disruption. There can be no assurance that these challenging developments will not continue to materially and adversely affect our business, financial condition and results of operations.

All forward-looking statements in this report are based on information available to us as of the date of this report. Although we believe that the expectations reflected in our forward-looking statements are reasonable, we cannot guarantee you that these expectations will be achieved. We undertake no obligation to publicly update or otherwise revise any forward-looking statements, whether as a result of new information, future events, or otherwise.

Table of Contents

Overview

The Company, a bank holding company registered under the Bank Holding Company Act of 1956, as amended, was incorporated under the laws of South Carolina in 1994 primarily to own and control all of the capital stock of the Bank, which commenced operations in August 1995. On October 1, 2004, the Company completed its acquisition of DutchFork Bancshares, Inc. and its wholly-owned subsidiary, Newberry Federal Savings Bank. During the second quarter of 2006, the Company completed its acquisition of DeKalb Bankshares, Inc., the holding company for The Bank of Camden. On September 15, 2008, the Company completed the acquisition of two financial planning and investment advisory firms, EAH Financial Group and Pooled Resources, LLC. In addition, the Bank expanded its residential mortgage business unit with the acquisition of the assets of Palmetto South Mortgage Corporation (Palmetto South), effective July 31, 2011. Palmetto South, which operates as a division of the Bank, offers mortgage loan products for home purchase or refinance in the South Carolina market area. The Company engages in a commercial banking business from our main office in Lexington, South Carolina and our 11 full-service offices located in Lexington (two), Forest Acres, Irmo, Cayce-West Columbia, Gilbert, Chapin, Northeast Columbia, Prosperity, Newberry and Camden. The Company offers a wide-range of traditional banking products and services for professionals and small-to medium-sized businesses, including consumer and commercial, mortgage, brokerage and investment, and insurance services. The Company also offers online banking to our customers. The Company's stock trades on The NASDAQ Capital Market under the symbol FCCO.

The following discussion describes our results of operations for the quarter ended March 31, 2012 as compared to the quarter ended March 31, 2011 and also analyzes our financial condition as of March 31, 2012 as compared to December 31, 2011. Like most community banks, we derive most of our income from interest we receive on our loans and investments. Our primary source of funds for making these loans and investments is our deposits, on which we pay interest. Consequently, one of the key measures of our success is our amount of net interest income, or the difference between the income on our interest-earning assets, such as loans and investments, and the expense on our interest-bearing liabilities, such as deposits. Another key measure is the spread between the yield we earn on these interest-earning assets and the rate we pay on our interest-bearing liabilities.

There are risks inherent in all loans, so we maintain an allowance for loan losses to absorb probable losses on existing loans that may become uncollectible. We establish and maintain this allowance by charging a provision for loan losses against our operating earnings. In the following section we have included a discussion of this process, as well as several tables describing our allowance for loan losses and the allocation of this allowance among our various categories of loans.

In addition to earning interest on our loans and investments, we earn income through fees and other expenses we charge to our customers. We describe the various components of this non-interest income, as well as our non-interest expense, in the following discussion.

The following discussion and analysis also identifies significant factors that have affected our financial position and operating results during the periods included in the accompanying financial statements. We encourage you to read this discussion and analysis in conjunction with the financial statements and the related notes and the other statistical information also included in this report.

Critical Accounting Policies

Edgar Filing: FIRST COMMUNITY CORP /SC/ - Form 10-Q

We have adopted various accounting policies that govern the application of accounting principles generally accepted in the United States and with general practices within the banking industry in the preparation of our financial statements. Our significant accounting policies are described in the footnotes to our unaudited consolidated financial statements as of March 31, 2012 and our notes included in the consolidated financial statements in our 2011 Annual Report on Form 10-K as filed with the SEC.

Certain accounting policies involve significant judgments and assumptions by us that have a material impact on the carrying value of certain assets and liabilities. We consider these accounting policies to be critical accounting policies. The judgment and assumptions we use are based on historical experience and other factors, which we believe to be reasonable under the circumstances. Because of the nature of the judgment and assumptions we make, actual results

Table of Contents

could differ from these judgments and estimates that could have a material impact on the carrying values of our assets and liabilities and our results of operations.

We believe the allowance for loan losses is the critical accounting policy that requires the most significant judgment and estimates used in preparation of our consolidated financial statements. Some of the more critical judgments supporting the amount of our allowance for loan losses include judgments about the credit worthiness of borrowers, the estimated value of the underlying collateral, the assumptions about cash flow, determination of loss factors for estimating credit losses, the impact of current events, and conditions, and other factors impacting the level of probable inherent losses. Under different conditions or using different assumptions, the actual amount of credit losses incurred by us may be different from management's estimates provided in our consolidated financial statements. Refer to the portion of this discussion that addresses our allowance for loan losses for a more complete discussion of our processes and methodology for determining our allowance for loan losses.

The evaluation and recognition of OTTI on certain investments including our private label mortgage-backed securities and other corporate debt security holdings requires significant judgment and estimates. Some of the more critical judgments supporting the evaluation of OTTI include projected cash flows including prepayment assumptions, default rates and severities of losses on the underlying collateral within the security. Under different conditions or utilizing different assumptions, the actual OTTI recognized by us may be different from the actual amounts recognized in our consolidated financial statements. See Note 4 to the financial statements for the disclosure of certain of the assumptions used as well as OTTI recognized in the financial statements during the three months ended March 31, 2012 and 2011.

Recent Legislative Developments

Markets in the United States and elsewhere have experienced extreme volatility and disruption over the past four plus years. These circumstances have exerted significant downward pressure on prices of equity securities and virtually all other asset classes, and have resulted in substantially increased market volatility, severely constrained credit and capital markets, particularly for financial institutions, and an overall loss of investor confidence. Loan portfolio performances have deteriorated at many institutions resulting from, among other factors, a weak economy and a decline in the value of the collateral supporting their loans. Dramatic slowdowns in the housing industry, due in part to falling home prices and increasing foreclosures and unemployment, have created strains on financial institutions. Many borrowers are now unable to repay their loans, and the collateral securing these loans has, in some cases, declined below the loan balance. In response to the challenges facing the financial services sector, beginning in 2008 a multitude of new regulatory and governmental actions have been announced, including the Emergency Economic Stabilization Act, approved by Congress and signed by President Bush on October 3, 2008 and the American Recovery and Reinvestment Act on February 17, 2009, among others. Some of the more recent actions include those described in Part I. Item 1. Business Supervision and Regulation of our 2011 Annual Report on Form 10-K as filed with the SEC.

In addition, on April 5, 2012, President Obama signed the Jumpstart Our Business Startups Act (the JOBS Act), which is intended to stimulate economic growth by helping smaller and emerging growth companies access the U.S. capital markets. The JOBS Act amends various provisions of, and adds new sections to, the Securities Act of 1933 and the Securities Exchange Act of 1934, as well as provisions of the Sarbanes-Oxley Act of 2002. In addition, under the JOBS Act, a bank or bank holding company is permitted to have 2,000 shareholders before being subject to public company requirements and to deregister from the SEC when its shareholder count falls below 1,200. The SEC has been directed to issue rules implementing these amendments by April 5, 2013. We are currently evaluating the effects that these amendments, as well as the full JOBS Act, will have on the Company.

Although it is likely that further regulatory actions will arise as the Federal government attempts to address the economic situation, we cannot predict the effect that fiscal or monetary policies, economic control, or new federal or state legislation may have on our business and earnings in

the future.

Recent Regulatory Development

In April of 2010, the Bank entered into the Formal Agreement with the OCC, its primary regulator. The Formal Agreement is based on the findings of the OCC during a 2009 on-site examination of the bank. As reflected in

Table of Contents

the Formal Agreement, the OCC's primary concern with the Bank was driven by the rating agencies downgrades of non-agency MBS in its investment portfolio. These securities, purchased in 2004 through 2008, were all rated AAA by the rating agencies at the time of purchase; however, they have been impacted by the economic recession and the stress on the residential housing sector. These ratings do not reflect the discounted purchase price paid by the Bank. They only reflect their analysis of the performance of the security overall, and therefore, a downgrade does not capture the risk of loss to the Bank. The Formal Agreement did not require any adjustment to the Bank's balance sheet or income statement; nor did it change the Bank's well capitalized status. The OCC has, however, separately established the following individual minimum capital ratios for the bank: a Tier 1 leverage capital ratio of at least 8.00%, a Tier 1 risk-based capital ratio of at least 10.00%, and a Total risk-based capital ratio of at least 12.00%. As of December 31, 2011, the Bank exceeded each of these ratios and remained well capitalized.

The Board of Directors has appointed an independent compliance committee made up of directors to monitor and report on compliance with the terms of the Formal Agreement. The Bank intends to take all actions necessary to enable it to comply with the requirements of the Formal Agreement, and as of the date hereof, management has submitted all documentation required as of this date to the OCC. There can be no assurance that the Bank will be able to continue to comply fully with the provisions of the Formal Agreement, and the determination of our compliance will be made by the OCC. However, management believes the Bank is currently in compliance with all provisions of the Formal Agreement. Failure to meet the requirements of the Formal Agreement could result in additional regulatory requirements, which could result in regulators taking additional enforcement actions against the bank.

As previously disclosed, in June of 2010, the Company entered into the 2010 MOU with the Federal Reserve (2010 MOU). The 2010 MOU included, among other things, a requirement that the Company obtain the prior written approval of the Federal Reserve before declaring or paying any dividends or directly or indirectly accepting dividends or any other form of payment representing a reduction in capital from the Bank. The 2010 MOU has been terminated and the Company entered into a new MOU in 2011 (2011 MOU) with the Federal Reserve, which replaced the 2010 MOU in its entirety. The 2011 MOU eliminated the requirement that the Company receive prior approval from the Federal Reserve before declaring or paying any dividends. The 2011 MOU also provides that the Company will ensure that any Company dividends on common or preferred stock, or payments on trust preferred securities, are paid in accordance with applicable regulations and guidance issued by the Federal Reserve Board.

In addition, the 2011 MOU provides that if the Bank or the Company (on a consolidated basis) were to become less than adequately capitalized then the Company would not make payments on subordinated debt not related to trust preferred securities without Federal Reserve approval. The Bank and the Company are currently considered well capitalized. To be considered adequately capitalized, the OCC and Federal Reserve Board minimum regulatory capital guidelines for Tier 1 risk-based capital, total risk-based capital and Tier 1 leverage ratios are 4.0%, 8.0% and 4.0%, respectively. As of March 31, 2012, the Bank's risk-based capital ratios of Tier 1 capital, total capital and leverage were 15.53%, 16.38% and 9.70%, respectively, and the Company's risk-based capital ratios of Tier 1 capital, total capital, leverage ratio were 15.65%, 17.57% and 9.77%, respectively.

As in the 2010 MOU, the 2011 MOU includes, among other things, a requirement that the Company obtain the prior written approval of the Federal Reserve before appointing any new director or senior executive officer or changing the position of any senior executive officer; directly or indirectly, incurring, increasing or guaranteeing any debt; and directly or indirectly, purchasing or redeeming any shares of its stock. The 2011 MOU eliminates the requirement contained in the 2010 MOU that the Company obtain written approval from the Federal Reserve prior to taking dividends from the Bank. With respect to Bank dividends, the 2011 MOU only requires that any dividends from the Bank must be paid in compliance with requirements established by the Bank's regulators. The 2011 MOU will remain in effect until further modified or terminated by the Federal Reserve.

Comparison of Results of Operations for Three Months Ended March 31, 2012 to the Three Months Ended March 31, 2011

Net Income

Our net income for the three months ended March 31, 2012 was \$799 thousand, or \$0.19 diluted earnings per common share, as compared to \$570 thousand or \$0.12 diluted earnings per common share, for the three months ended March 31, 2011. The increase in net income between the two periods is primarily due to a decrease of \$130

Table of Contents

thousand in the provision for loan losses and a decrease of \$111 thousand in non-interest expense in the three months ended March 31, 2012 as compared to the same period in 2011. Average earning assets decreased by \$4.9 million in the first quarter of 2012 as compared to the same period in 2011. Average earning assets were \$548.0 million during the three months ended March 31, 2011 as compared to \$543.1 million during the three months ended March 31, 2012. The decrease in average earning assets was primarily a result of paying down Federal Home Loan Bank (FHLB) advances in the amount of \$4.0 million in the fourth quarter of 2011 and \$4.0 million in the first quarter of 2012. The decrease in earning assets was offset by a 6 basis point increase in our net interest margin on a tax equivalent basis. As a result, net interest income increased by \$55 thousand in the first three months of 2012 as compared to the first three months of 2011.

Net Interest Income

Please refer to the table at the end of this Item 2 for the yield and rate data for interest-bearing balance sheet components during the three-month periods ended March 31, 2012 and 2011, along with average balances and the related interest income and interest expense amounts.

Net interest income was \$4.5 million for the three months ended March 31, 2012 and 2011. The net interest margin on a taxable equivalent basis increased by 6 basis points from 3.30% at March 31, 2011 to 3.36% at March 31, 2012. The yield on earning assets for the three months ended March 31, 2012 and 2011 was 4.48% and 4.77%, respectively. The cost of interest-bearing liabilities during the first three months of 2012 was 1.36% as compared to 1.70% in the same period of 2011. As a result of the recessionary economic conditions in 2008 and continuing into 2012, interest rates continue to remain at historically low levels. Decreased loan demand has resulted in loans comprising 60.5% of average earning assets in the first quarter of 2012 as compared to 60.9% in the same period of 2011. The lower average loan balances as well as reinvesting cash flows from maturing loans and investments at interest rates that have continued to decline over the last year have resulted in the 29 basis point decline in the yield on earning assets during the two periods. Our cost of funds has declined by 34 basis point on average in the first quarter of 2012 as compared to the same period of 2011. Interest-bearing transaction accounts, money market accounts and savings deposits, which are typically our lower costing funds, represent 37.8% of our average interest bearing liabilities during the first quarter of 2012 as compared to 32.7% in the same period of 2011. Time deposits and borrowed funds, typically the higher costing funds, represent 62.2% of our average interest-bearing funds in the first quarter of 2012 as compared to 67.3% during the same period in 2011. The improvement in the overall mix of our funding sources continues to result in a reduction of our cost of funds during the first quarter of 2012.

Provision and Allowance for Loan Losses

At March 31, 2012 and December 31, 2011, the allowance for loan losses was \$4.7 million, or 1.43%, and \$4.7 million, or 1.45%, of total loans, respectively. Our provision for loan losses was \$230 thousand for the three months ended March 31, 2012, as compared to \$360 thousand for the three months ended March 31, 2011. This provision is made based on our assessment of general loan loss risk and asset quality. The allowance for loan losses represents an amount which we believe will be adequate to absorb probable losses on existing loans that may become uncollectible. Our judgment as to the adequacy of the allowance for loan losses is based on a number of assumptions about future events, which we believe to be reasonable, but which may or may not prove to be accurate. Our determination of the allowance for loan losses is based on evaluations of the collectability of loans, including consideration of factors such as the balance of impaired loans, the quality, mix, and size of our overall loan portfolio, the experience ability and depth of lending personnel, economic conditions (local and national) that may affect the borrower's ability to repay, the amount and quality of collateral securing the loans, our historical loan loss experience, and a review of specific problem loans. We also consider subjective issues such as changes in the lending policies and procedures, changes in the local/national economy, changes in volume or type of credits, changes in volume/severity of problem loans, quality of loan review and board of director oversight, and concentrations of credit. Periodically, we adjust the amount of the allowance based on changing circumstances. We charge recognized losses to the allowance and add subsequent recoveries back to the allowance for loan losses.

We perform an analysis quarterly to assess the risk within the loan portfolio. The portfolio is segregated into similar risk components for which historical loss ratios are calculated and adjusted for identified changes in current portfolio characteristics. Historical loss ratios are calculated by product type and by regulatory credit risk classification. The allowance consists of an allocated and unallocated allowance. The allocated portion is determined by types and

Table of Contents

ratings of loans within the portfolio. The unallocated portion of the allowance is established for losses that exist in the remainder of the portfolio and compensates for uncertainty in estimating the loan losses. There can be no assurance that charge-offs of loans in future periods will not exceed the allowance for loan losses as estimated at any point in time or that provisions for loan losses will not be significant to a particular accounting period. The allowance is also subject to examination and testing for adequacy by regulatory agencies, which may consider such factors as the methodology used to determine adequacy and the size of the allowance relative to that of peer institutions. Such regulatory agencies could require us to adjust our allowance based on information available to them at the time of their examination.

The decrease in the provision for loan losses for the first three months of 2012 as compared to the same period in 2011 is a result of a continuation of moderating levels of classified and non-performing loans as well as some moderate improvement in economic conditions, including unemployment levels, in our markets. Our loan portfolio consists of a large percentage of real estate secured loans. Real estate values continue to be adversely impacted as a result of the economic downturn over the last several years. Impaired values of the underlying real estate collateral as well as continued slowdown in both residential and commercial real estate sales impacts our ability to sell collateral upon foreclosure. There is a risk that this trend will continue. The real estate collateral in each case provides an alternate source of repayment in the event of default by the borrower and may deteriorate in value during the time the credit is extended. If real estate values continue to decline, it is also more likely that we would be required to increase our allowance for loan losses. If during a period of reduced real estate values we are required to liquidate the property collateralizing a loan to satisfy the debt or to increase the allowance for loan losses, it could materially reduce our profitability and adversely affect our financial condition.

Non-performing assets were \$10.8 million (1.79% of total assets) at March 31, 2012 as compared to \$12.8 million (2.15% of total assets) at December 31, 2011. While we believe these ratios are favorable in comparison to current industry results, we continue to be concerned about the impact of this economic environment on our customer base of local businesses and professionals. There are 28 loans, totaling \$5.4 million, included in non-performing status (non-accrual loans and loans past due 90 days and still accruing) at March 31, 2012. The largest with a carrying value of \$2.0 million is secured by a first lien on an owner occupied commercial business property located in the midlands of South Carolina. The average balance of the remaining 27 loans is approximately \$127 thousand and the majority of these loans are secured by first mortgage liens. At the time the loans are placed in non-accrual status, we typically obtain an updated evaluation and, if the loan balance exceeds fair value, write the balance down to the fair value. At March 31, 2012, we had no loans delinquent more than 90 days and still accruing interest, and loans totaling \$3.3 million that were delinquent 30 days to 89 days representing 0.99% of total loans.

Our management continuously monitors non-performing, classified and past due loans, to identify deterioration regarding the condition of these loans. We have identified 3 loan relationships in the amount of \$2.4 million that are current as to principal and interest and not included in non-performing assets that could represent potential problem loans. These balances are included as substandard loans in Note 5 of the financial statements.

Table of ContentsAllowance for Loan Losses

(Dollars in thousands)	Three Month Ended	
	2012	March 31, 2011
Average loans outstanding	\$ 328,604	\$ 333,678
Loans outstanding at period end	\$ 331,090	\$ 334,156
Non-performing assets:

Unallocated	1,889	N/A	1,801	N/A
Total	\$ 4,745	100.0%	\$ 4,699	100.0%

Accrual of interest is discontinued on loans when management believes, after considering economic and business conditions and collection efforts that a borrower's financial condition is such that the collection of interest is doubtful. A delinquent loan is generally placed in nonaccrual status when it becomes 90 days or more past due. At the time a loan is placed in nonaccrual status, all interest, which has been accrued on the loan but remains unpaid is reversed and deducted from earnings as a reduction of reported interest income. No additional interest is accrued on the loan balance until the collection of both principal and interest becomes reasonably certain.

Non-interest Income and Non-interest Expense

Non-interest income during the first quarter of 2012 was \$1.5 million as compared to \$1.4 million during the same period in 2011. Deposit service charges decreased \$69 thousand. Mortgage origination fees increased \$532 thousand. The decrease in deposit service charges is primarily a result of lower overdraft protection fees due to a continued decrease in the number of items being presented on insufficient funds accounts during the first quarter of 2012 as compared to the same period in 2011. In July 2011 we acquired Palmetto South Mortgage which operates as a division of First Community Bank. This addition and the continuation of historically low interest rates have resulted in the increase in mortgage fee income in the first quarter of 2012 as compared to the same period in 2011. In the three months ended March 31, 2012, we had net gains on the sale of securities in the amount of \$11 thousand, as compared to \$134 thousand in the comparable period of 2011. During the first quarter of 2012 we sold three non-agency mortgage backed securities with a carrying value of \$1.4 million at a loss of \$180 thousand which was offset by sale of one municipal security and agency mortgage backed security with a total carrying value of approximately \$2.8 million for a gain of approximately \$191 thousand. The net gains in the first quarter of 2011 related primarily to the sale of certain non-agency mortgage-backed securities that had previously been written down to below investment grade as well as other investment grade non-agency mortgage backed securities. The sales in the first quarter of 2012 and 2011 served to reduce the level of securities on our balance sheet that are rated below investment grade. OTTI charges of \$200 thousand (credit component) on two private label mortgage backed securities were recognized during the first three months of 2012 (see note 4 to financial statements). This compares to an OTTI charge in the first quarter of 2011 of \$4 thousand on a preferred trust term security held in our portfolio. Since the first quarter of 2010, we have engaged a third party, on a quarterly basis, to obtain information about structure and anticipated cash flows and to assist us in evaluating and monitoring of our private label mortgage backed securities portfolio. As a result of the reduction in the balance of below investment grade securities in our portfolio the

exposure to future OTTI credit charges on these securities has been greatly reduced (see Financial Position discussion) management continues to monitor the remaining portfolio with a high degree of scrutiny.

Table of Contents

There can be no assurance that we will not conclude in future periods that conditions existing at that time indicate some or all of the securities may be sold or are other-than temporarily impaired, which would require a charge to earnings in such period. During the three months ended March 31, 2012 we repaid \$4.0 million in a FHLB advance that was to mature in January 2013. The loss on early extinguishment of this debt was \$121 thousand.

Total non-interest expense decreased by \$111 thousand or 2.4%, during the first quarter of 2012, as compared to the same quarter in 2011. Salary and benefit expense increased \$245 thousand from \$2.3 million in the first quarter of 2011, to \$2.6 million in the first quarter of 2012. At March 31, 2012, we had 158 full time equivalent employees as compared to 148 at March 31, 2011. This increase in number of full time equivalent employees along with normal salary adjustments made over the last twelve months account for the increase in salary and benefit expense between the two periods. The increase in the number of full time equivalent employees between the two periods is primarily a result of the addition of the Palmetto South Mortgage division. FDIC insurance assessments decreased \$71 thousand in the first quarter of 2012 as compared to the same period in 2011. The decrease is primarily a result of changes made to the base used to calculate the assessment. The assessment base changed to an asset based calculation effective for the second quarter of 2011. The assessment rate for the first quarter of 2011 was approximately 22 basis points on deposits. Beginning in the second quarter 2011 this rate changed to approximately 14 basis points of the bank's total average assets less bank tangible equity. In November 2009, all insured institutions, with limited exceptions, were required to prepay insurance assessments for a three-year period. Our prepayment made to the FDIC in December 2009 totaled approximately \$2.9 million. At March 31, 2012, the remaining prepaid insurance assessment amounted to \$729 thousand and is included in Other assets. Other real estate expenses decreased \$227 thousand in the first quarter of 2012 as compared to the same period in 2011. The decrease relates to moderating levels of accumulated delinquent taxes, insurance, legal fees and repair expenses incurred as the level of other real estate owned increased over the last several years. Amortization of intangibles decreased in the first quarter of 2012 in the amount of \$104 thousand. This decrease reflects that during the fourth quarter of 2011 the core deposit premium for the 2004 acquisition of DutchFork Bankshares became fully amortized. The amortization on that core deposit intangible was approximately \$35 thousand per month. The other changes in non-interest expense categories reflect normal fluctuations between the two periods.

The following is a summary of the components of other non-interest expense:

(In thousands)	Three months ended			
	2012		March 31, 2011	
Data processing	\$	124	\$	116
Supplies		43		42
Telephone		73		73
Correspondent services		42		51
Insurance		54		54
Postage		44		46
Professional fees		235		226
Director fees		109		70
Other		158		215
	\$	882	\$	893

Income Tax Expense

Our effective tax rate was 29.3% and 28.5% in the first quarter of 2012 and 2011, respectively. The slightly higher effective tax rate is a result of a lower amount of interest on tax exempt securities in the first quarter of 2012 as compared to the same period in 2011. Our effective tax rate is currently expected to remain at 29.0% to 32.0% throughout the remainder of 2012.

Financial Position

Assets totaled \$601.5 million at March 31, 2012 as compared to \$593.9 million at December 31, 2011, an increase of \$7.6 million. Loans (excluding loans held for sale) at March 31, 2012 were \$331.1 million as compared to \$324.3 million at December 31, 2011. This increase of \$6.8 million resulted from funding in excess of \$15.4 million of new

Table of Contents

loan production in the first quarter of 2012, less scheduled pay downs during the period as well as transfers from loans to other real estate owned. At March 31, 2012 and December 31, 2011, loans (excluding loans held for sale) accounted for 60.0% of earning assets. The loan-to-deposit ratio at March 31, 2012 was 69.4% as compared to 69.8% at December 31, 2011. Investment securities decreased from \$206.7 million at December 31, 2011 to \$202.7 million at March 31, 2012. Deposits increased by \$12.3 million to \$476.9 million at March 31, 2012 as compared to \$464.6 million at December 31, 2011. The increase in deposits was primarily used to fund our loan growth and to prepay a \$4.0 million FHLB advance. This advance was scheduled to mature in the first quarter of 2013. We have continued focusing on growing our pure deposit base (deposits less certificates of deposits) while continuing to fund soundly underwritten loans.

During the first quarter of 2012, as previously discussed, we sold two below investment grade non-agency mortgage-backed securities with a total book value of approximately \$1.4 million. Subsequent to March 31, 2012, through May 1, 2012, we have sold an additional six non investment grade non-agency mortgage backed securities with a total book value of approximately \$9.8 million. The loss on the sale of these securities was approximately \$1.9 million and has been offset by gains of the approximate same amount from the sale of certain agency mortgage backed and municipal securities. The sales of these non-agency mortgage-backed securities have served to significantly reduce the level of securities on our balance sheet that are rated below investment grade. The cash generated from these transactions was reinvested in the investment portfolio in securities with a risk rating of 20% or less, thus further improving our risk based capital ratios. As previously noted, these downgraded investments have been under a great deal of scrutiny by our primary regulatory agency as a result of being downgraded. We have further discussed that, in our opinion, the rating system and the regulatory concerns do not properly reflect the overall credit risk in this type of multi-obligor securities since neither adequately considers the price paid by the holder of the bond. The decreased level of these below investment grade securities provides for improved regulatory capital ratios since the proceeds are primarily invested in lower regulatory risk weighted assets, as well as reduces the regulatory concern related to the downgraded securities portfolio. As previously noted, management continues to monitor the remaining portfolio with a high degree of scrutiny. There can be no assurance that we will not conclude in future periods that conditions existing at that time indicate some or all of the securities may be sold or are other-than temporarily impaired, which would require a charge to earnings in such period.

The non agency mortgage backed securities discussed above as well as certain other corporate securities generally started being downgraded in early 2009. The following chart provides a summary of the reduction in the book value of non-agency mortgage backed securities, in total and those that have been downgraded, as well as previously owned corporate downgraded securities since December 31, 2009 through March 31, 2012 and the recent sales occurring subsequent to March 31, 2012 through May 10, 2012. The significant reduction is a result of the transactions discussed above, monthly principal pay downs and to a lesser extent previously recorded OTTI.

	12/31/09	12/31/10	12/31/11	03/31/2012	Current (1)
Total Non-Agency MBS	\$ 65,793	\$ 51,436	\$ 16,487	\$ 14,071	\$ 3,998
Below Investment Grade Non-Agency MBS	\$ 42,863	\$ 37,078	\$ 13,633	\$ 11,611	\$ 1,728
Other Below Investment Grade Securities	\$ 8,857	\$ 1,877			
Total Below Investment Grade Securities	\$ 51,720	\$ 38,956	\$ 13,633	\$ 11,611	\$ 1,728

(1) Reflects status as of May 10, 2012, and, accordingly, reflects sales occurring in second quarter of 2012 through such date, as discussed above.

Quality loan portfolio growth continues to be a strategic focus in 2012 and thereafter. One of our goals as a community bank has been, and continues to be, to grow our assets through quality loan growth by providing credit to small and mid-size businesses, as well as individuals within the markets we serve. Loan production and portfolio growth rates continue to be impacted by the current economic recession, as borrowers are less inclined to leverage their corporate and personal balance sheets. However, we remain committed to meeting the credit needs of our local markets. A continuation of the very slow recovery from recessionary national and local economic conditions as well as deterioration

of asset quality within our Company could significantly impact our ability to grow our loan portfolio.

Table of Contents

Significant increases in regulatory capital expectations beyond the traditional well capitalized ratios and significantly increased regulatory burdens will impede our ability to leverage our balance sheet and expand the loan portfolio.

The following table shows the composition of the loan portfolio by category:

(In thousands)	March 31, 2012		December 31, 2011	
	Amount	Percent	Amount	Percent
Commercial, financial & agricultural	\$ 20,786	6.3%	\$ 20,608	6.4%
Real estate:				
Construction	14,796	4.4%	11,767	3.6%
Mortgage residential	38,986	11.8%	38,337	11.8%
Mortgage commercial	224,372	67.8%	220,288	67.9%
Consumer:				
Home Equity	27,119	8.2	27,976	8.6%
Other	5,031	1.5	5,335	1.7%
Total gross loans	331,090	100.0%	324,311	100.0%
Allowance for loan losses	(4,745)		(4,699)	
Total net loans	\$ 326,345		\$ 319,612	

In the context of this discussion, a real estate mortgage loan is defined as any loan, other than loans for construction purposes and advances on home equity lines of credit, secured by real estate, regardless of the purpose of the loan. Advances on home equity lines of credit are included in consumer loans. We follow the common practice of financial institutions in our market areas of obtaining a security interest in real estate whenever possible, in addition to any other available collateral. This collateral is taken to reinforce the likelihood of the ultimate repayment of the loan and tends to increase the magnitude of the real estate loan components. Generally we limit the loan-to-value ratio to 80%.

Market Risk Management

The effective management of market risk is essential to achieving our strategic financial objectives. Our most significant market risk is interest rate risk. We have established an Asset/Liability Management Committee (ALCO) to monitor and manage interest rate risk. The ALCO monitors and manages the pricing and maturity of assets and liabilities in order to diminish the potential adverse impact that changes in interest rates could have on net interest income. The ALCO has established policy guidelines and strategies with respect to interest rate risk exposure and liquidity.

A monitoring technique employed by the ALCO is the measurement of interest sensitivity gap, which is the positive or negative dollar difference between assets and liabilities that are subject to interest rate repricing within a given period of time. Also, asset/liability simulation modeling is performed to assess the impact varying interest rates and balance sheet mix assumptions will have on net interest income. Interest rate sensitivity can be managed by repricing assets or liabilities, selling securities available-for-sale, replacing an asset or liability at maturity or by adjusting the interest rate during the life of an asset or liability. Managing the amount of assets and liabilities repricing in the same time interval helps to hedge the risk and minimize the impact on net interest income of rising or falling interest rates.

We are currently liability sensitive within one year. However, neither the gap analysis nor asset/liability modeling is a precise indicator of our interest sensitivity position due to the many factors that affect net interest income, including changes in the volume and mix of earning assets and interest-bearing liabilities. Net interest income is also impacted by other significant factors, including changes in the volume and mix of earning assets and interest-bearing liabilities. Through simulation modeling, we monitor the effect that an immediate and sustained change in interest rates of 100 basis points and 200 basis points up and down will have on net interest income over the next twelve months.

Table of Contents

We entered into a five year interest rate swap agreement on October 8, 2008. The swap agreement has a \$10.0 million notional amount. We receive a variable rate of interest on the notional amount based on a three month LIBOR rate and pay a fixed rate interest of 3.66%. The contract was entered into to protect us from the negative impact of rising interest rates. Our exposure to credit risk is limited to the ability of the counterparty to make potential future payments required pursuant to the agreement. Our exposure to market risk of loss is limited to the changes in the market value of the swap between reporting periods. At March 31, 2012 and December 31, 2011, the fair value of the contract was a negative \$553 thousand and \$602 thousand, respectively. A fair value adjustment for the swap of \$33 thousand and \$4 thousand in other income for the periods ended March 31, 2012 and 2011, respectively. The fair value of the contract is the present value, over the remaining term of the contract, of the difference between the swap rate to maturity at the reporting date multiplied by the notional amount and the fixed interest rate of 3.66% multiplied by the notional amount of the contract.

Based on the many factors and assumptions used in simulating the effect of changes in interest rates, the following table estimates the percentage change in net interest income at March 31, 2012 and December 31, 2011 over twelve months.

Net Interest Income Sensitivity

Change in short-term interest rates	March 31, 2012	December 31, 2011
+200bp	+ 3.49%	+3.05%
+100bp	+ 2.08%	+2.06%
Flat		
-100bp	- 6.50%	-7.48%
-200bp	- 11.20%	-12.91%

The significant decrease in net interest income in a down 200 basis point environment primarily results from the current level of interest rates being paid on our interest bearing transaction accounts as well as money market accounts. The interest rates on these accounts are at a level where they cannot be repriced in proportion to the change in interest rates. The increase and decrease of 100 and 200 basis points assume a simultaneous and parallel change in interest rates along the entire yield curve. At the current historically low interest rate levels a downward shift of 200 basis points across the entire yield curve is unlikely.

We also perform a valuation analysis projecting future cash flows from assets and liabilities to determine the Present Value of Equity (PVE) over a range of changes in market interest rates. The sensitivity of PVE to changes in interest rates is a measure of the sensitivity of earnings over a longer time horizon. At March 31, 2012, the PVE exposure in a plus 200 basis point increase in market interest rates was estimated to be 3.24% as compared to 2.7% at December 31, 2011.

Liquidity and Capital Resources

We believe our liquidity remains adequate to meet operating and loan funding requirements. Interest-bearing bank balances, federal funds sold, and investment securities available-for-sale represent 35.2% of total assets at March 31, 2012. We believe that our existing stable base of core deposits along with continued growth in this deposit base will enable us to meet our long-term and short-term liquidity needs successfully.

Edgar Filing: FIRST COMMUNITY CORP /SC/ - Form 10-Q

These needs include the ability to respond to short-term demand for funds caused by the withdrawal of deposits, maturity of repurchase agreements, extensions of credit and the payment of operating expenses. Other sources of liquidity, in addition to deposit gathering activities, include maturing loans and investments, purchase of federal funds from other financial institutions and selling securities under agreements to repurchase. We monitor closely the level of large certificates of deposits in amounts of \$100 thousand or more as they tend to be more sensitive to interest rate levels, and thus less reliable sources of funding for liquidity purposes. At March 31, 2012, the amount of certificates of deposits of \$100 thousand or more represented 16.9% of total deposits. These deposits are issued to local customers many of whom have other product relationships with the Bank, and none of these certificates of deposits are brokered deposits.

Table of Contents

Through the operations of our Bank, we have made contractual commitments to extend credit in the ordinary course of our business activities. These commitments are legally binding agreements to lend money to our customers at predetermined interest rates for a specified period of time. At March 31, 2012, we had issued commitments to extend credit of \$42 million, including \$24.3 million in unused home equity lines of credit, through various types of lending arrangements. We evaluate each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by us upon extension of credit, is based on our credit evaluation of the borrower. Collateral varies but may include accounts receivable, inventory, property, plant and equipment, commercial and residential real estate. We manage the credit risk on these commitments by subjecting them to normal underwriting and risk management processes.

Other than as described elsewhere in this report, we are not aware of any trends, events or uncertainties that we expect to result in a significant adverse effect on our liquidity position. However, no assurances can be given in this regard, as rapid growth, deterioration in loan quality, and poor earnings, or a combination of these factors, could change the liquidity position in a relatively short period of time. In addition, the Company must currently obtain preapproval of the Federal Reserve Board before increasing or guaranteeing any debt.

The Company has generally maintained a high level of liquidity and adequate capital, which along with continued retained earnings, we believe will be sufficient to fund the operations of the Bank for at least the next 12 months. Shareholders' equity was 8.2% and 8.1% of total assets at March 31, 2012 and December 31, 2011, respectively. The Bank maintains federal funds purchased lines, in the total amount of \$20.0 million, with two financial institutions, although these have not been utilized in 2011 or the first quarter of 2012. In addition, the Bank has a repo line in the amount of \$10.0 million with another financial institution. Specific investment securities would be pledged if and when we were to utilize the line. The FHLB of Atlanta has approved a line of credit of up to 25% of the Bank's assets, which would be collateralized by a pledge against specific investment securities and or eligible loans. We regularly review the liquidity position of the Company and have implemented internal policies establishing guidelines for sources of asset based liquidity and evaluate and monitor the total amount of purchased funds used to support the balance sheet and funding from noncore sources. We believe that our existing stable base of core deposits along with continued growth in this deposit base will enable us to meet our long term liquidity needs successfully.

The Federal Reserve Board and bank regulatory agencies require bank holding companies and financial institutions to maintain capital at adequate levels based on a percentage of assets and off-balance sheet exposures, adjusted for risk weights ranging from 0% to 100%. Under the capital adequacy guidelines, regulatory capital is classified into two tiers. These guidelines require an institution to maintain a certain level of Tier 1 and Tier 2 capital to risk-weighted assets. Tier 1 capital consists of common shareholders' equity, excluding the unrealized gain or loss on securities available for sale, minus certain intangible assets. In determining the amount of risk-weighted assets, all assets, including certain off-balance sheet assets, are multiplied by a risk-weight factor of 0% to 100% based on the risks believed to be inherent in the type of asset. Tier 2 capital consists of Tier 1 capital plus the general reserve for loan losses, subject to certain limitations. We are also required to maintain capital at a minimum level based on total average assets, which is known as the Tier 1 leverage ratio. At both the holding company and bank level, we are subject to various regulatory capital requirements administered by the federal banking agencies. To be considered well capitalized, we must maintain total risk-based capital of at least 10%, Tier 1 capital of at least 6%, and a leverage ratio of at least 5%. Generally, to be considered adequately capitalized, the OCC and Federal Reserve regulatory capital guidelines for Tier 1 capital, total capital and leverage capital ratios are 4.0%, 8.0% and 4.0%, respectively.

On April 6, 2010, the Bank entered into the Formal Agreement with the OCC, our primary bank regulator. The Formal Agreement is based on the findings of the OCC during a 2009 on-site examination of the Bank. As reflected in the Formal Agreement, the OCC's primary concern with the Bank was driven by the rating agencies downgrades of non-agency MBS in its investment portfolio. These securities, purchased in 2004 through 2008, were all rated AAA by the rating agencies at the time of purchase; however, they have been impacted by the economic recession and the stress on the residential housing sector (see discussion above under Investments and Note 5, Investments, to the Consolidated Financial Statements). The Formal Agreement did not require any adjustment to the Bank's balance sheet or income statement; nor did it change the Bank's well capitalized status.

Edgar Filing: FIRST COMMUNITY CORP /SC/ - Form 10-Q

In addition to the Formal Agreement, the OCC has separately established the following individual minimum capital ratios for the Bank: a Tier 1 leverage capital ratio of at least 8.00%, a Tier 1 risk-based capital ratio of at least

Table of Contents

10.00%, and a Total risk-based capital ratio of at least 12.00%. As of March 31, 2012 and December 31, 2011, the Bank exceeded each of these ratios and remained well capitalized. The Board of Directors has appointed an independent compliance committee made up of directors to monitor and report on compliance with the terms of the Formal Agreement. The Bank has taken and will continue to take all actions necessary to enable it to comply with the requirements of the Formal Agreement, and as of the date hereof management has submitted all documentation required as of this date to the OCC. There can be no assurance that the Bank will be able to continue to comply fully with the provisions of the Formal Agreement, and the determination of our compliance will be made by the OCC. However, management believes the Bank is currently in compliance with all provisions of the Formal Agreement. Failure to meet the requirements of the Formal Agreement could result in additional regulatory requirements, which could result in regulators taking additional enforcement actions against the Bank.

The Bank's risk-based capital ratios of leverage ratio, Tier 1, and total capital were 9.70%, 15.53%, and 16.78%, respectively, at March 31, 2012 as compared to 9.27%, 15.12%, and 16.38%, respectively, at December 31, 2011. The Company's risk-based capital ratios of leverage ratio, Tier 1, and total capital were 9.77%, 15.65%, and 17.57%, respectively at March 31, 2012 as compared to 9.40%, 15.33% and 17.25%, respectively at December 31, 2011. Our management anticipates that the Bank and the Company will remain a well capitalized institution for at least the next 12 months. In addition, we believe that we will continue to exceed the individual capital ratios established by the OCC noted above for at least the next 12 months.

The Company's ability to pay cash dividends may be limited by regulatory restrictions, by the Bank's ability to pay cash dividends to the Company, and by the need to maintain sufficient capital to support our operations. The Bank's ability to pay cash dividends to the Company is limited by its obligation to maintain sufficient capital and by other restrictions on its cash dividends that are applicable to national banks and banks that are regulated by the FDIC.

The approval of the OCC is generally required for the payment of dividends if the total of all dividends declared by a national bank in any calendar year exceeds the total of its net profits for that year combined with its retained net profits for the preceding two years, less any required transfers to surplus. In addition, as a national bank, the Bank also cannot pay dividends from permanent capital without prior OCC approval. As a result of the Bank's accumulated deficit of \$17.1 million at March 31, 2012 due primarily to the non-cash goodwill impairment charge of \$27.8 million in 2009, the bank is currently prohibited from paying dividends to the Company without the prior approval of the OCC. Finally, pursuant to the terms of the Formal Agreement, the Bank is currently not permitted to pay cash dividends to the Company without the prior consent of the OCC.

Further, the Company cannot pay cash dividends on its common stock during any calendar quarter unless full dividends on the Series T preferred stock for the dividend period ending during the calendar quarter have been declared and the Company has not failed to pay a dividend in the full amount of the Series T preferred stock with respect to the period in which such dividend payment in respect of its common stock would occur.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

There have been no material changes in our quantitative and qualitative disclosures about market risk as of March 31, 2012 from that presented in our Annual Report on Form 10-K for the year ended December 31, 2011. See the Market Risk Management subsection in Item 2, Management's Discussion and Analysis of Financial Condition and Results of Operations for quantitative and qualitative disclosures about market risk, which information is incorporated herein by reference.

Item 4. Controls and Procedures.

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures as defined in Exchange Act Rule 13a-15(e). Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that our current disclosure controls and procedures are effective as of March 31, 2012. There have been no significant changes in our internal controls over financial reporting during the fiscal quarter ended March 31, 2012 that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

The design of any system of controls and procedures is based in part upon certain assumptions about the likelihood of future events. There can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions, regardless of how remote.
