news release

**NR RGI 3 May 30, 2006**

**Second Phase Drilling Starts at Radius s Natividad Project, Nicaragua**

Vancouver: Simon Ridgway, President of Radius Gold Inc. ( Radius ) is pleased to announce that Meridian Gold Inc. ( Meridian ) has started a second phase of drilling at Radius 's Natividad gold project in Nicaragua. Drilling is now underway on the first of approximately 50 planned holes.

Meridian anticipate that the second phase drill program will consist of roughly 4,800m of core drilling on priority targets. Drilling will first test targets on the Ahumada, Pavon Norte, Las Brisas, Manceras, Babaska, Pavon Central and Pavon Sur veins. Roughly 3,500m are planned on these veins. An additional 1,300m of coring are planned for new targets within the joint venture concession area. A drill collar plan will be posted shortly on Radius 's website at [www.radiusgold.com](http://www.radiusgold.com).

Over the last 9 months, Meridian has undertaken an intensive exploration program on the Natividad joint venture area. In October 2005 they flew an airborne magnetic and radiometric survey over about 500km<sup>2</sup> of the joint venture area. They have since conducted detailed mapping, prospecting, and sampling surveys within this zone and have discovered new gold mineralization at the Las Valles and Cerro Pastel areas to the northeast of Pavon North. The present drill program will test these new discoveries as well as the known high grade shoots along strike and down dip.

In the second quarter of 2005, Meridian completed 43 holes (6,396m) at Natividad. The drilling started to outline 2 distinct >5g/t Au pay shoots at Natividad, informally named the Pavon Norte and the Ahumada shoots. Ahumada has been outlined by 5 diamond drill holes: NAT013, 017, 018, 020 and PADH-1 (from Radius ' 2004 drilling). At a 1g/t Au cut off, a weighted average intersection of these 5 holes is 23.7 g/t Au over 2.7m. The Pavon Norte shoot is outlined by holes NAT05-025 to 029 and PADH5 and 6. At the same cut off, a weighted average for these holes is 9.6 g/t Au over 1.7m. These results were previously released in Radius new release NR RGI 5, dated July 25, 2005, titled Radius announces initial drill results from Natividad.

#

## Background

The Natividad (El Pavon) low sulphidation epithermal vein system was discovered by Radius in 2003. In September 2004, Meridian optioned Natividad from Radius. The agreement gives Meridian the exclusive option to acquire a 60% interest in El Pavon by spending an agreed amount on exploration, completing a feasibility study within four years and paying to Radius a set amount per ounce of resource defined by the feasibility study for the 60% of the ounces Meridian will acquire (see release NR-RGI 5, Sept. 23, 2004).

### **Qualified Person**

Mark Hawksworth, M.Sc., P.Geol., an employee of Meridian Gold Inc., is the Qualified Person responsible for the design and management of the Natividad exploration program, including the current drill program. Harmen Keyser, P.Geol., a Director of Radius, has verified that the results presented in this release are an accurate summary of the information provided to Radius by Meridian.

**Radius Gold Inc.**

An Exploration Stage Company

Notes to the Interim Consolidated Financial Statements

(Unaudited Prepared by Management)

Three Months Ended March 31, 2006

Expressed in Canadian Dollars

**1.**

**Nature and Continuance of Operations**

Radius Gold Inc. (The Company) was formed by the amalgamation of Radius Explorations Ltd. (Radius) (formerly RDU TSXV) and PilaGold Inc. (PilaGold) (formerly PRI TSXV) which became effective on July 1, 2004.

The Company is engaged in acquisition and exploration of mineral properties in Guatemala, Nicaragua, Mexico, Argentina, and Colombia. The amounts shown for the mineral properties represent costs incurred to date and do not reflect present or future values. The Company is in the process of exploring its mineral properties and has not yet determined whether the properties contain reserves that are economically recoverable. Accordingly, the recoverability of these capitalized costs is dependant upon the existence of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete their development and upon future profitable production.

The interim consolidated financial statements contained herein include the accounts of Radius Gold Inc. and its wholly-owned subsidiaries located in, Cayman Islands, Guatemala, Nicaragua, Panama, Mexico and the Dominican Republic.

The three months ending March 31, 2006 consolidated financial statements have been prepared by the Company in accordance with Canadian generally accepted accounting principles. All financial summaries included are presented on a comparative and consistent basis showing the figures for the corresponding period in the preceding year. The preparation of financial data is based on accounting principles and practices consistent with those used in the preparation of the annual financial statements. Certain information and footnote disclosure normally included in

financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted.

2.

## **Accounting Policy**

### Stock-Based Compensation

The Company grants options in accordance with the policies of the TSX Venture Exchange ( TSX-V ). The Company has adopted the CICA Handbook Section 3870 Stock-Based Compensation and Other Stock-Based Payments , which recommends the fair value-based methodology for measuring all compensation costs. Commencing January 1, 2004 the fair value of stock options awarded is recognized as an expense.

### Marketable Securities

Marketable securities are recorded at the lower of cost or market value.

### Cash and Cash Equivalents

Cash and cash equivalents included highly liquid investments with original maturities of three months or less.

**Escrow Shares**

As at March 31, 2006, there are 375,000 common shares held in escrow, the release of which is subject to regulatory approval. Effective May 31, 2005, 375,000 shares were released from escrow.

## Stock Options

The Company has established a formal stock option plan in accordance with the policies of the TSX-V under which it is authorized to grant options up to 10% of its outstanding shares to officers, directors, employees and consultants. The exercise price of each option equals the market price of the Company's stock as calculated on the date of grant. The options are for a maximum term of five years.

Stock option transactions and the number of stock options outstanding are summarized as follows:

**Share Capital** (cont d)

**Stock-Based Compensation**

The Company uses the fair value based method of accounting for stock options granted to consultants, directors, officers and employees. A non-cash compensation charge of \$1,230,750 associated with the granting of options to directors and employees has been recognized in the financial statements for the three months ended March 31, 2006, with a corresponding increase to contributed surplus. These compensation charges have been determined under the fair value method using the Black-Scholes option pricing model with the following assumptions:

Risk-free interest rate	4.02%
Expected stock price volatility	76.00%

Expected term in years	5.0
Expected dividend yield	0.0%

**4.**

**Related Party Transactions**

The Company incurred the following expenditures charged by officers and companies which have common directors with the Company:

	For the period ended March 31,	
	2006	2005
Expenses:		
Consulting fees	\$ -	\$ 1,180
Management fees	15,000	15,000
Salaries and benefits	19,608	-
Mineral property costs		
Consulting fees	48,005	33,000
	\$ 82,613	\$ 48,000

These expenditures were measured by the exchange amount which is the amount agreed upon by the transacting parties.

Advances and other receivables include \$25,640 due from directors, officers and employees of the Company. These were funds advanced for Company expenses and any balance owed will be paid back in the normal course of business.

Due from related parties of \$214,846 are amounts due from companies which have a common director with the Company and arose from shared administrative costs. The amount of \$101,075 was repaid subsequent to March 31, 2006. The balance owing is repayable in the normal course of business.

Accounts payable and advances include \$29,857 payable to a company which has a common director with the Company and officers of the Company.

Due to related parties of \$356 are amounts due to companies which have a common director with the Company and arose from shared administrative costs. The amount is repayable in the normal course of business.

**Segmented Information**

Operating segments are defined as components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operation decision maker, or decision-making group, in deciding how to allocate resources and in assessing performance. All of the Company's operations are within the mining sector relating to gold exploration. Due to the geographic and political diversity, the Company's exploration operations are decentralized whereby exploration managers are responsible for business results and regional corporate offices provide support to the exploration programs in addressing local and regional issues. The Company's operations are therefore segmented on a district basis. The Company's assets are located in Canada, Caymans, Argentina, Colombia, Guatemala, Nicaragua, Panama, Dominican Republic and Mexico.

Details of identifiable assets by geographic segments are as follows:

## Edgar Filing: RADIUS GOLD INC. - Form 6-K

	Period Ended March 31, 2006	Year Ended December 31, 2005
<b>Total Assets</b>		
Canada	\$ 15,143,573	\$ 13,059,538
Caymans	(85,157)	761,493

**Subsequent Events**

a)

Subsequent to March 31, 2006 75,000 options were exercised at a price of \$0.68.

b)

Subsequent to March 31, 2006 Meridian Gold Inc. (Meridian) repaid \$523,150 in advances and receivables. The advances were made pursuant to the joint venture agreement on the El Pavon concession, in Nicaragua between the Company and Meridian.

**RADIUS GOLD INC.**

**(the Company )**

**MANAGEMENT S DISCUSSION AND ANALYSIS**

**First Quarter Report March 31, 2006**

**General**

This Management's Discussion and Analysis ( MD&A ) supplements, but does not form part of, the unaudited interim consolidated financial statements of the Company for the three months ended March 31, 2006. The following information, prepared as of May 26, 2006, should be read in conjunction with the March 31, 2006 financial statements, which have been prepared in accordance with Canadian generally accepted accounting principles. All amounts are expressed in Canadian dollars unless otherwise indicated. The March 31, 2006 financial statements have not been reviewed by the Company's auditors.

## **Business of the Company**

The Company is in the business of acquiring, exploring and developing mineral properties in Central America and has a portfolio of projects in Nicaragua, Guatemala and southern Mexico.

### ***Nicaragua***

Radius's joint venture partner on the Natividad project, Meridian Gold Inc. ( Meridian ) continued its preparations for another round of diamond drilling at the central Nicaraguan project. In 2005, Meridian completed a total of 43 holes at Natividad. Meridian's work is beginning to outline 2 distinct pay shoots at Natividad. These have been informally named the Pavon Norte and the Ahumada shoots. Meridian is encouraged by the size and robust nature of the Natividad system and is continuing its work on the project.

Meridian has recently commenced a second phase drill program which will test the high-grade shoots described above, explore the Pavon North and Las Brisas veins for better mineralization at deeper levels than were tested last year, and test new zones discovered from the on-going regional work within the joint venture area.

Over the last nine months, Meridian has undertaken an intensive exploration programme on the Natividad joint venture area. In October 2005 they flew an airborne magnetic and radiometric survey over about 500km<sup>2</sup> of the joint venture area. They have since conducted detailed mapping, prospecting, and sampling surveys within this zone and have discovered new gold mineralization at the Las Valles and Cerro Pastel areas to the northeast of Pavon North.

Also in Nicaragua, Radius has adopted a two-pronged approach to the San Pedro project. The Company's field teams continued prospecting, mapping and sampling at the project with the aim of defining additional drill targets. At the same time, the Company is actively seeking a joint venture partner to assist it in exploring the project. A number of confidentiality agreements have been signed with interested parties and the Company hopes to make further progress on the project during the second quarter.

### *Guatemala*

In Guatemala, Radius's technical personnel continued to examine the feasibility of going underground at the Tambor gold project on the high grade gold mineralization at the zone known as the Guapinol prospect. Management also revisited the concept of joint venturing Tambor to an established gold producer and a number of confidentiality agreements have been signed with interested parties.

### *Mexico*

In Mexico, Radius optioned the Amatista Ag-Au project from a Mexican businessman and initiated an intensive exploration program at the site. The property covers 18 abandoned mine workings dating from Spanish colonial times which are aligned along a northwest-southeast trending belt over a distance of 10km and up to 3km wide northeast to southwest. The mines exploited low-sulfidation epithermal quartz veins, stockworks and breccias. In the first quarter, Radius's work focused on the main zone with the objective of mapping the structures, alteration and distribution of gold mineralization in detail and identifying targets for diamond drilling. The mine access road was rehabilitated giving access to the historic workings of the San Francisco mining camp, and a stream sediment and rock sampling program initiated within the project claim area. Based on results of this work, management has decided not to proceed with further work on the Amatista project.

Radius's teams continued their regional exploration program in Mexico, exploring a new alteration zone discovered in volcanic rocks overlying units that host several Au-Ag prospects and active projects. First-pass exploration returned anomalous gold-in-stream sediment values and low grade to anomalous rock sample results, and one float sample returned 2940ppb Au and 568 g/t Ag, from a large targeted area. A second phase of exploration commenced in January. In March, the Company also commissioned a Landsat clay-iron alteration and structural geological study of an extensive area in south-central Mexico. It is anticipated that this study will generate additional regional exploration targets for ground follow-up in the second or third quarters.

***Other Opportunities***

Radius continued to evaluate new project opportunities in other countries within South and Central American and the Caribbean region where the Company has long-term experience and an established business presence. Management will continue to evaluate potential regional plays throughout these areas and will react rapidly to any project opportunities that are a good fit with Radius's overall exploration strategy of acquiring large land positions in under-explored, but highly prospective regions.

**Results of Operations**

For the three months ended March 31, 2006, the Company had a consolidated net loss of \$1,561,487 (\$0.03 per share) compared to a net loss of \$290,342 (\$0.01 per share) for the three months ended March 31, 2005. Interest income increased for the 2006 period as compared to the 2005 period due to greater accrued interest being recorded. Corporate expenses decreased significantly overall, and especially in the categories of legal and accounting, public relations, and travel. The net loss for the 2006 was, however, significantly higher than the 2005 period due to a non-cash compensation charge in 2006 of \$1,230,750 and a write-off of exploration costs of \$307,861.

**Quarterly Information**

The following table provides information for the eight fiscal quarters ended March 31, 2006:

Nicaragua - During the three months ended March 31, 2006, the Company incurred \$382,985 in exploration costs in Nicaragua. Of that amount, the major expenditure categories include \$104,433 for geological consulting fees, \$73,864 for geochemistry, and \$34,896 for salaries.

Mexico - During the three months ended March 31, 2006, the Company spent \$244,468 in exploration costs in Mexico. Of that amount, the major expenditure categories include \$113,409 for geological consulting fees, \$23,077 for travel and accommodation, and \$20,134 for licences, rights and taxes. Deferred exploration costs totalling \$307,861 were written off during the period for properties on which no further work is warranted.

Colombia - During the three months ended March 31, 2006, the Company spent \$8,250 on property investigations in Colombia.

**Related Party Transactions**

During the three months ended March 31, 2006, The Company incurred the following expenditures charged by officers and companies which have common directors with the Company:

	For the period ended March 31,	
	2006	2005
Expenses:		
Consulting fees	\$ -	\$ 1,180
Management fees	15,000	15,000
Salaries and benefits	19,608	-
Mineral property costs		
Consulting fees	48,005	33,000
	\$ 82,613	\$ 48,000

These expenditures were measured by the exchange amount which is the amount agreed upon by the transacting parties.

Advances and other receivables include \$25,640 due from directors, officers and employees of the Company. These were funds advanced for Company expenses and any balance owed will be paid back in the normal course of business.

Due from related parties of \$214,846 are amounts due from companies which have a common director with the Company and arose from shared administrative costs. The amount of \$101,075 was repaid subsequent to March 31, 2006. The balance owing is repayable in the normal course of business.

Accounts payable and advances include \$29,857 payable to a company which has a common director with the Company and officers of the Company.

Due to related parties of \$356 are amounts due to companies which have a common director with the Company and arose from shared administrative costs. The amount is repayable in the normal course of business.

### **Other Data**

Additional information related to the Company is available for viewing at [www.sedar.com](http://www.sedar.com).

### ***Share Position Outstanding Warrants and Options***

The Company's current outstanding share position is 53,295,988 common shares, and the following share purchase warrants and incentive stock options are currently outstanding:

**WARRANTS**

<u>No. of Shares</u>	<u>Exercise Price</u>	<u>Expiry Date</u>
Nil		

**STOCK OPTIONS**

<u>No. of Shares</u>	<u>Exercise Price</u>	<u>Expiry Date</u>
140,000	\$1.00	July 10, 2006

22,222	\$2.03	April 22, 2008
225,000	\$1.10	August 7, 2008
44,444	\$1.37	August 13, 2008
150,000	\$1.32	February 26, 2009
50,000	\$1.00	September 2, 2009
650,000	\$1.00	September 6, 2009
50,000	\$1.50	October 17, 2009
20,000	\$0.68	September 29, 2010
<u>2,735,000</u>	\$0.70	February 21, 2011
<u>5,043,332</u>		

**Financial Instruments**

The carrying value of cash and cash equivalents, receivables, due from/to related parties and accounts payable and accrued liabilities approximate fair value because of the short-term maturity of those instruments. Unless otherwise noted, it is management's opinion that the Company is not exposed to significant interest, currency or credit risks arising from these financial instruments.

### **Forward Looking Information**

Certain statements contained in this MD&A and elsewhere constitute forward-looking statements. Such forward-looking statements involve a number of known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the company to materially differ from any future results, performance or achievements expressed or implied by such forward-looking statements. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date the statements were made, and readers are advised to consider such forward-looking statements in light of the risks set forth below.

### **Risks and Uncertainties**

The business of mineral exploration and extraction involves a high degree of risk. Few properties that are explored ultimately become producing mines. At present, none of the Company's properties has a known commercial ore deposit. The Company's mineral properties are also located in emerging nations and consequently may be subject to a higher level of risk compared to developed countries. Operations, the status of mineral property rights, title to the properties and the recoverability of amounts shown for mineral properties in emerging nations can be affected by changing economic, regulatory and political situations. Other risks facing the Company include competition, environmental and insurance risks, fluctuations in metal prices, share price volatility and uncertainty of additional financing.

### **Internal Disclosure Controls and Procedures**

We have evaluated the effectiveness of our disclosure controls and procedures and have concluded that they are sufficiently effective to provide reasonable assurance that material information relating to the Company is made known to management and disclosed in accordance with applicable securities regulations.

### **Subsequent Events**

a)

Subsequent to March 31, 2006, 75,000 options were exercised at a price of \$0.68.

b)

Subsequent to March 31, 2006, Meridian Gold Inc. (Meridian) repaid \$523,150 in advances and receivables. The advances were made pursuant to the joint venture agreement on the El Pavon concession, in Nicaragua between the Company and Meridian.
