QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2012

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____
 Commission File Number 001-33689

athenahealth, Inc.
 (Exact name of registrant as specified in its charter)

Delaware (State or other jurisdiction of incorporation or organization)	04-3387530 (I.R.S. Employer Identification No.)
---	---

311 Arsenal Street, Watertown, Massachusetts (Address of principal executive offices)	02472 (Zip Code)
---	---------------------

617-402-1000
 (Registrant's telephone number, including area code)
 (Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	<input checked="" type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/>	Smaller reporting company	<input type="checkbox"/>

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Edgar Filing: ATHENAHEALTH INC - Form 10-Q

As of October 15, 2012, there were 36,272,219 shares of the registrant's \$0.01 par value common stock outstanding.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited amounts in thousands, except per-share amounts)

1. BASIS OF PRESENTATION

The accompanying unaudited condensed consolidated financial statements have been prepared by athenahealth, Inc. (the “Company” or “we”) in accordance with accounting principles generally accepted in the United States (“GAAP”) for interim financial reporting and as required by Regulation S-X, Rule 10-01. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of the Company’s management, the accompanying unaudited condensed consolidated financial statements contain all adjustments (consisting of items of a normal and recurring nature) necessary to present fairly the financial position as of September 30, 2012, and the results of operations for the three and nine month periods ended September 30, 2012 and 2011 and cash flows for the nine month periods ended September 30, 2012 and 2011. The results of operations for the three and nine month periods ended September 30, 2012 is not necessarily indicative of the results to be expected for the full year. When preparing financial statements in conformity with GAAP, we must make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of, revenue and expenses during the reporting period. Actual results could differ from those estimates.

The Company considers events or transactions that occur after the balance sheet date but before the financial statements are issued to provide additional evidence relative to certain estimates or to identify matters that require additional disclosure. Subsequent events have been evaluated through the date of issuance of these financial statements. The accompanying unaudited condensed consolidated financial statements and notes thereto should be read in conjunction with the audited consolidated financial statements for the year ended December 31, 2011, included in our Annual Report on Form 10-K, which was filed with the Securities and Exchange Commission (“SEC”) on February 16, 2012.

In October 2012, the Company acquired Healthcare Data Services LLC, a web-based solutions provider and expert in health care data analysis and population health management for payers and providers.

Comprehensive Income: In June 2011, the Financial Accounting Standards Board (the “FASB”) issued Standards Update 2011-5, Comprehensive Income (Topic 220) as amended, requiring amendments to disclosure for presentation of comprehensive income. This guidance, effective retrospectively for the interim and annual periods beginning on or after December 31, 2011, requires presentation of total comprehensive income, the components of net income and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In December 2011, the FASB issued an amendment to this guidance which indefinitely defers the requirement to present reclassification adjustments out of accumulated other comprehensive income by component in both the statement in which net income is presented and the statement in which other comprehensive income is presented. This guidance is effective for annual periods beginning after December 15, 2011. The Company adopted the amended guidance requiring presentation of comprehensive financial statements for the three months ended March 31, 2012. Simultaneously, the Company made the decision to change the title of their income statement from Condensed Consolidated Statements of Operations to Condensed Consolidated Statements of Income to be consistent with the new presentation. The implementation of this guidance did not have a material impact on the Company’s consolidated results of operations or financial position.

Comprehensive income is defined as net income or loss and other changes in stockholders’ equity from transactions and other events from sources other than stockholders. Comprehensive income is reflected in the consolidated statements of comprehensive income.

2. NET INCOME PER SHARE

Basic net income per share is computed by dividing net income by the weighted average number of common shares outstanding during the period. Diluted net income per share is computed by dividing net income by the weighted average number of common shares outstanding and potentially dilutive securities outstanding during the period under the treasury stock method. Potentially dilutive securities include stock options, restricted stock units, and shares to be

purchased under the employee stock purchase plan. Under the treasury stock method, dilutive securities are assumed to be exercised at the beginning of the periods and as if funds obtained thereby were used to purchase common stock at the average market price during the period. Securities are excluded from the computations of diluted net income per share if their effect would be antidilutive to earnings per share.

Table of Contents

athenahealth, Inc.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited amounts in thousands, except per-share amounts)

The following table reconciles the weighted average shares outstanding for basic and diluted net income per share for the periods indicated:

	Three Months Ended September 30, 2012	Three Months Ended September 30, 2011	Nine Months Ended September 30, 2012	Nine Months Ended September 30, 2011
Net income	\$6,210	\$5,280	\$12,792	\$13,717
Weighted average shares used in computing basic net income per share	35,832	35,155	35,847	34,934
Net income per share - basic	\$0.17	\$0.15	\$0.36	\$0.39
Net income	\$6,210	\$5,280	\$12,792	\$13,717
Weighted average shares used in computing basic net income per share	35,832	35,155	35,847	34,934
Effect of dilutive securities	1,380	1,122	1,191	967
Weighted average shares used in computing diluted net income per share	37,212	36,277	37,038	35,901
Net income per share - diluted	\$0.17	\$0.15	\$0.35	\$0.38

The computation of diluted net income per share does not include 0.4 million and 0.4 million of stock options and restricted stock units for the three and nine months ended September 30, 2012, respectively, because their inclusion would have an antidilutive effect on net income per share. The computation of diluted net income per share does not include 0.4 million and 0.9 million of options and restricted stock units for the three and nine months ended September 30, 2011, because their inclusion would have an antidilutive effect on net income per share.

3. FAIR VALUE OF FINANCIAL INSTRUMENTS

The following table presents information about the Company's financial assets and liabilities that are measured at fair value on a recurring basis as of September 30, 2012 and December 31, 2011, and indicates the fair value hierarchy of the valuation techniques the Company utilized to determine such fair value. In general, fair values determined by Level 1 inputs utilize quoted prices (unadjusted) in active markets for identical assets or liabilities and fair values determined by Level 2 inputs utilize quoted prices (unadjusted) in inactive markets for identical assets or liabilities obtained from readily available pricing sources for similar instruments. The fair values determined by Level 3 inputs are unobservable values which are supported by little or no market activity. Investments include \$2.1 million of long-term corporate bonds in long-term investments that have been classified in investments and other assets on the condensed consolidated balance sheet at September 30, 2012. Investments include \$18.6 million of long-term U.S. government backed securities that have been classified in investments and other assets on the condensed consolidated balance sheet at December 31, 2011.

Total liabilities	\$—	\$—	\$(8,176)	\$(8,176)

Money markets, certificates of deposit, U.S. government backed securities, corporate bonds and commercial paper are valued using a market approach based upon the quoted market prices of identical instruments when available or other observable inputs such as trading prices of identical instruments in inactive markets or similar securities. It is the Company's policy to recognize transfers between levels of the fair value hierarchy, if any, at the end of the reporting period however there have been no such transfers during any periods presented.

Contingent consideration is recorded at fair value as an element of consideration paid with subsequent adjustments recognized in the consolidated statement of income. At the acquisition date and reporting date, the fair value of the accrued contingent consideration was determined using a probability-weighted income approach based on upside, downside and base case scenarios. This approach is based on significant inputs that are not observable in the market, which are referred to as Level 3 inputs. As of September 30, 2012, and December 31, 2011, the Company has accrued a liability of \$0.7 million and \$8.2 million respectively for the estimated fair value of contingent considerations estimated to be payable upon the acquired companies reaching specific performance metrics over a specified period of operations or time after acquisition. The elements that make up the contingent consideration are as follows:

Anodyne

The first potential contingent consideration related to our acquisition of Anodyne Health Partners, Inc. ("Anodyne") in 2009 ranged from zero to \$4.8 million and was payable in one installment based upon operational performance for the year ended December 31, 2010. Based on the actual operational performance for the year ended December 31, 2010, the Company paid \$2.4 million relating to the first potential contingent consideration in March of 2011.

The second potential contingent consideration related to our acquisition of Anodyne in 2009 ranged from zero to \$2.9 million and was payable in quarterly installments based upon the cross selling of the Company's services for the years ended December 31, 2010 and 2011, and the six-month period ended June 30, 2012. Any amounts not earned in the first potential

6

Table of Contents

athenahealth, Inc.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited amounts in thousands, except per-share amounts)

contingent consideration could be earned under the second potential contingent consideration in excess of the initial \$2.9 million bringing the total second potential contingent consideration to \$5.3 million. On December 31, 2011, the Company estimated the fair value of the second contingent consideration at \$1.4 million based on key assumptions including a probability adjusted level of 50% for the base case scenario and 25% for the upside and downside scenarios. The significant judgment related to the estimated earn-out payments by scenario was primarily based on the Company's i) past experience of our cross selling, ii) past experience of the timeline for converting pipeline opportunities into customers and iii) the remaining time period of this contingent consideration. At December 31, 2011, a large cross sell customer opportunity was included in the upside scenario which had a 25% probability. On March 31, 2012, the Company estimated the fair value of the second contingent consideration at \$3.4 million based on key assumptions including a 20% for the base case scenario, 70% for the upside scenario and 10% for the downside scenario. At March 31, 2012, this large cross sell opportunity was in final contract negotiations with the Company and therefore a higher probability was assigned to the upside scenario. The time period through which the contingent consideration could be earned elapsed on June 30, 2012. The Company accrued \$1.8 million as of June 30, 2012 for the final payment based on the final cross selling results which was paid during the three months ended September 30, 2012. There was no change in fair value during the three months ended September 30, 2012. The change in fair value of \$1.3 million for the nine month period ended September 30, 2012 is an increase in the general and administrative line item in the Condensed Consolidated Statements of Income. The Company paid \$1.8 million and \$2.7 million during the three and nine months period ended September 30, 2012, respectively, and \$3.9 million over the entire term of the second contingent consideration.

Proxsys

The first potential contingent consideration related to our acquisition of Proxsys LLC ("Proxsys") in 2011 ranges from zero to \$3.0 million and is payable in one installment in the first quarter of 2013 based upon revenue and new sales performance for the fiscal year ending December 31, 2012. In order to qualify for the earnout payment, the acquired subsidiary must achieve a minimum revenue threshold which was derived from both recurring revenue and revenue generated from new customers brought onto the service after the acquisition. Once that minimum revenue threshold is met, the amount of the payment is then determined by new sales of the Company's athenaCoordinator service offering since date of acquisition. At acquisition date and on December 31, 2011, the Company estimated the fair value of the first potential contingent consideration at \$2.4 million, the key assumptions relating to this potential contingent consideration included the athenaCoordinator revenue budget for the 2012 fiscal year, which included recurring revenue and estimates related new revenue generated from new customers based upon the existing sales pipeline and historical implementation timeline and a probability adjusted level of 60% for the base case and 25% and 15% for the upside and downside scenarios, respectively. The athenaCoordinator revenue budget for the 2012 fiscal year exceeded the minimum revenue threshold. The downside scenarios included a worse case scenario where the acquired subsidiary did not achieve the minimum revenue target. Certain contracts that were in an advanced negotiation stage at December 31, 2011 and estimated to close in the first quarter of 2012, did not close during the three months ended March 31, 2012; therefore as of March 31, 2012, the Company determined that it is more likely than not that the minimum revenue threshold for athenaCoordinator will not be achieved by a margin of 5-10%. On March 31, 2012, the Company determined that based on the reforecasted amounts and the pass fail structure of this contingent payment, the probability percentages have been adjusted to 90% for the worse case scenario and 10% for the upside scenario. On March 31, 2012, the Company estimated the fair value of the first potential contingent consideration at \$0.3 million. On June 30, 2012, and September 30, 2012, based on the continued delay in finalizing certain contracts, the Company determined that the upside scenario is no longer achievable and has given no value to the first contingent consideration. The change in fair value of \$0 and \$2.4 million is a decrease in the general and administrative expense line item in the Condensed Consolidated Statements of Income for the three and nine months ended September 30, 2012, respectively.

The second potential contingent consideration related to our acquisition of Proxsys in 2011 ranges from zero to \$5.0 million and is payable in quarterly installments based upon the cross selling of the Company's athenaCollector services into Proxsys' new and acquired customer and physician sender base, from acquisition to the second year anniversary of the acquisition in the third quarter of 2013. On December 31, 2011 and through June 30, 2012, the key assumptions relating to this potential contingent consideration included scenarios primarily based on the Company's i) past experience of our cross selling related to the Anodyne acquisition, ii) past experience of the timeline for converting pipeline opportunities into customers and iii) the remaining time period of this contingent consideration and a probability adjusted level of 65% for the base case and 25% and 10% for the upside and downside scenarios, respectively. As of September 30, 2012, a year after the acquisition, the Company has determined that it now has sufficient information into the actual cross sell opportunity base to adjust the scenarios. The Company has lowered its expectations of achievable cross sells within the earn out period for all scenarios and has a probability adjusted level of 60% for the base case and 20% for the upside and downside scenarios. The Company estimates the fair value of the contingent consideration at September 30, 2012 to be \$0.7 million. The change in fair value of \$3.7 million is a decrease in the general and administrative expense line item in the Condensed Consolidated Statements of

Total	\$ 87,976	\$(24) \$87,952

5. COMMITMENTS AND CONTINGENCIES

ADP AdvancedMD, Inc. (f/k/a AdvancedMD Software, Inc.)

On July 18, 2011, the Company filed a complaint against AdvancedMD Software, Inc. in the United States District Court for the District of Massachusetts. The complaint alleges that AdvancedMD Software, Inc. has infringed two of the Company's U.S. Patents: No. 7,617,116, which was issued on November 10, 2009, for "Practice Management and Billing Automation System" and No. 7,720,701, which was issued on May 18, 2010, for "Automated Configuration of Medical Practice Management Systems." On May 16, 2012, the Court entered the parties' joint stipulation of dismissal without prejudice of claims and counterclaims related to U.S. Patent No. 7,720,701. A Markman Hearing was held on September 14, 2012. The Court has not yet issued its Markman decision. The Company is seeking permanent injunctive relief, damages, pre- and post-judgment costs and interest, and attorneys' fees.

Cordjia, LLC

On July 18, 2011, a complaint was filed in the Superior Court for Waldo County, Maine, against the Company entitled Cordjia, LLC v. athenahealth, Inc. The complaint alleges that the Company entered into a partnership with the plaintiff to purchase property in Maine, that the parties entered into a mutual non-disclosure agreement governing the sharing of confidential information between them, and that the Company subsequently terminated the partnership and purchased the property itself, using the confidential information obtained from the plaintiff to do so. The complaint purports to state claims for common-law fraud, negligent misrepresentation, breach of fiduciary duty, unjust enrichment, quantum meruit, promissory estoppel, breach of contract, and violation of the Maine Uniform Trade Secrets Act. The complaint seeks unspecified damages, fees and costs, and injunctive relief enjoining the Company from making further use of the plaintiff's confidential information and requiring the Company to return all confidential information in its possession to the plaintiff. On August 8, 2011, the Company filed a motion to dismiss for improper venue. On November 17, 2011, the Court granted the Company's motion to dismiss for improper venue as to the claims for unjust enrichment, quantum meruit, breach of contract, and violation of the Maine Uniform Trade Secret Act, and denied the Company's motion as to the other claims. On December 7, 2011, the plaintiff filed an amended complaint, and on December 19, 2011, the Company filed a motion to dismiss the remaining claims, or in the alternative, to stay the proceeding. On March 22, 2012, the Court granted the Company's motion to stay the Maine proceedings pending the Delaware case noted below.

On December 7, 2011, a complaint was filed in the Superior Court for New Castle County, Delaware, against the Company entitled Cordjia, LLC v. athenahealth, Inc. The complaint pertains to the same facts as stated above and alleges claims for breach of contract, unjust enrichment, quantum meruit, and violation of the Delaware Uniform Trade Secrets Act. The complaint seeks unspecified damages, fees and costs, an injunction enjoining the Company from making any further use of

Table of Contents

athenahealth, Inc.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited amounts in thousands, except per-share amounts)

the confidential information, and an order requiring the Company to return any copies of confidential information. On February 2, 2012, the Company filed a motion to dismiss the complaint. On March 30, 2012, the Court held oral argument on the Company's motion to dismiss.

On September 16, 2012, Cordjia agreed to dismiss with prejudice all of its actions and the parties filed joint stipulations of dismissal with prejudice as to all claims in the Delaware Superior Court and the Delaware Court of Chancery. On September 18, 2012, the parties filed a joint stipulation of dismissal with prejudice of the Maine Superior Court action; the Court granted this on September 25, 2012. Consequently, all claims against the Company in the actions have been dismissed with prejudice.

PPS Data, LLC

On July 28, 2011, a complaint was filed by PPS Data, LLC naming the Company in a patent infringement case (PPS Data, LLC v. athenahealth, Inc., Civil Action No. 3:11-cv-00746, United States District Court for the Middle District of Florida). The complaint alleges that the Company has infringed U.S. Patent No. 6,343,271 with a listed issue date of January 29, 2002, entitled "Electronic Creation, Submission, Adjudication, and Payment of Health Insurance Claims" (the "'271 Patent"). The complaint seeks an injunction enjoining infringement, damages, pre- and post-judgment costs and interest, and attorneys' fees. On September 8, 2011, the Company filed a motion to dismiss, or, in the alternative, a motion for summary judgment. On October 18, 2011, the plaintiff filed a motion for leave to amend its complaint to allege that the Company has infringed on U.S. Patent No. 6,341,265 with a listed issue date of January 22, 2002, entitled "Provider claim editing and settlement system," and U.S. Patent No. 7,194,416 with a listed issue date of March 20, 2007, entitled "Interactive creation and adjudication of health care insurance claims." The Court granted the plaintiff's motion for leave to amend its complaint on December 21, 2011, and on December 23, 2011, the plaintiff filed its amended complaint. On December 27, 2011, the Company filed a motion to dismiss, or, in the alternative, a motion for summary judgment of non-infringement with respect to the '271 Patent. On December 29, 2011, the United States Patent and Trademark Office granted the Company's request for reexamination of the '271 Patent. On January 9, 2012, the Company filed a motion to stay the case pending completion of the patent reexamination, and on March 1, 2012, the Court granted the Company's motion to stay the case. The Company believes that it has meritorious defenses to the amended complaint and will continue to contest the claims vigorously.

Medsquire, LLC

On December 6, 2011, a complaint was filed by Medsquire, LLC against the Company in a patent infringement case (Medsquire, LLC v. athenahealth, Inc., Civil Action No. 2:11-CV-10126-JHN-PLA, United States District Court for the Central District of California). The complaint alleges that the Company has infringed U.S. Patent No. 5,682,526 with a listed issue date of October 28, 1997, entitled "Method and System for Flexibly Organizing, Recording, and Displaying Medical Patient Care Information Using Fields in a Flowsheet." The complaint seeks damages, pre-judgment interest, and attorneys' fees. Medsquire, LLC and the Company have reached a confidential settlement in the matter. On October 4, 2012, the Court entered the parties' joint stipulation of dismissal with prejudice of all claims and counterclaims.

In addition, the Company is engaged from time to time in certain legal disputes arising in the ordinary course of business. The Company believes that it has adequate legal defenses and that the likelihood of a loss contingency relating to the ultimate disposition of any of these disputes or to any of the proceedings disclosed in this Note 5 is remote. When the likelihood of a loss contingency becomes at least reasonably possible with respect to any of these disputes or any of the proceedings disclosed in this Note 5, or, as applicable in the future, if there is at least a reasonable possibility that a loss exceeding amounts already recognized may have been incurred, we will revise our disclosures in accordance with the relevant authoritative guidance.

Additionally, the Company will accrue liability for legal contingencies when it believes that it is both probable that a liability has been incurred and that it can reasonably estimate the amount of the loss. The Company will review these accruals and adjust them to reflect ongoing negotiations, settlements, rulings, advice of legal counsel, and other relevant information. To the extent new information is obtained, and the Company's views on the probable outcomes

of claims, suits, assessments, investigations, or legal proceedings change, changes in the Company's accrued liabilities would be recorded in the period in which such determination is made.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations.

This Quarterly Report on Form 10-Q contains forward-looking statements. All statements other than statements of historical fact contained in this Quarterly Report on Form 10-Q are forward-looking statements, including those regarding expanded sales and marketing efforts; changes in expenses related to operations, selling, marketing, research and development, general and administrative matters, and depreciation and amortization; liquidity issues; additional fundraising; and the expected performance period and estimated term of our client relationships, as well as more general statements regarding our expectations for future financial and operational performance, product and service offerings, regulatory environment, and market trends. In some cases, you can identify forward-looking statements by terminology such as “may,” “will,” “should,” “expects,” “plans,” “anticipates,” “believes,” “estimates,” “predicts,” “potential,” or “continue”; the negative of these terms; or other comparable terminology. Forward-looking statements in this Item 2 include, without limitation, statements reflecting management’s expectations for future financial performance and operating expenditures, expected growth, profitability and business outlook, increased sales and marketing expenses, increased cross-selling efforts among the Company’s service offerings, expected client implementations, expected certification and regulatory approvals and the benefits of the Company’s current service offerings and research and development for new service offerings and the benefits of current and expected strategic and sales and marketing relationships.

Forward-looking statements are only current predictions and are subject to known and unknown risks, uncertainties, and other factors that may cause our actual results, levels of activity, performance, or achievements to be materially different from those anticipated by such statements. These factors include, among other things, those set forth in our Annual Report on Form 10-K for the fiscal year ended December 31, 2011, under the heading Part I, Item 1A “Risk Factors” and any set forth below under Part II, Item 1A, “Risk Factors.”

Although we believe that the expectations reflected in the forward-looking statements contained in this Quarterly Report on Form 10-Q are reasonable, we cannot guarantee future results, levels of activity, performance, or achievements. Except as required by law, we are under no duty to update or revise any of such forward-looking statements, whether as a result of new information, future events, or otherwise, after the date of this Quarterly Report on Form 10-Q.

Overview

athenahealth provides business services that help medical caregivers achieve and sustain financial health by collecting more money and exercising more control over their administrative tasks. These services are designed to reduce the administrative burden of complex billing rules, quality measurement and reporting, clinical documentation and data exchange, patient communication, and many of the related tasks that distract medical providers and staff from the practice of medicine. Our services are delivered and consumed through a single instance of our cloud-based platform, athenaNet. We differentiate our services by regularly deploying updates and improvements through athenaNet to clients without any action on the part of the client. athenaNet enables us to quickly implement our solution at a low up-front cost and to seamlessly work in tandem with our clients in real time.

The services provided through our single-instance cloud are currently packaged as four integrated components: athenaCollector for revenue cycle management, athenaClinicals for electronic health record management, athenaCommunicator for patient communication management, and athenaCoordinator for referral cycle management. The use of our single-instance platform allows all clients to benefit from the collective knowledge of all of our other clients through our patented billing Rules Engine and our clinical Quality Management Engine. Our clients use these rules engines to monitor and benchmark their performance with peer practices across the network. Our business intelligence application, Anodyne solutions, also supports our clients in their pursuit of financial health by equipping users with data visualization tools and insight into their practice’s performance.

Each service we provide is supported by a model comprised of three distinct components: Software, Knowledge, and Work. The cloud-based software is provided at no extra charge to users but is the primary conduit through which we exchange information between clients, payers, and our staff of experts. Knowledge is infused into each of our services via our Rules Engine as we work with clients, payers, and other partners to codify rules associated with reimbursement, clinical quality measures, and other factors related to our clients’ performance. The third component to each of our services is the Work that we perform on behalf of our clients. Wherever possible, we replace manual

processes with automation, but where automation is not possible, we provide that manual labor rather than returning it to clients to be completed. This unique service model of Software, Knowledge, and Work has allowed us to align our success with our clients' performance, creating a continual cycle of improvement and efficiency. We charge clients a percentage of collections in most cases, so our financial results are a direct reflection of our ability to drive revenue to medical practices.

For the nine months ended September 30, 2012, we generated revenue of \$306.0 million from the sale of our services compared to \$231.6 million for the nine months ended September 30, 2011. Given the scope of our market opportunity, we have increased our spending each year on growth, innovation, and infrastructure. Our revenue is predominately derived from business services that we provide on an ongoing basis. This revenue is generally determined as a percentage of payments

Table of Contents

collected by us on behalf of our clients, so the key drivers of our revenue include growth in the number of physicians and other medical providers working within our client accounts, the collections of these physicians, and the number of services purchased. To provide these services, we incur expenses in several categories, including direct operating, selling and marketing, research and development, general and administrative, and depreciation and amortization expense. In general, our direct operating expense increases as our volume of work increases, whereas our selling and marketing expense increases in proportion to our intended growth rate of adding new accounts to our network of physician clients. Our other expense categories are less directly related to growth of revenues and relate more to our planning for the future, our overall business management activities, and our infrastructure. We manage our cash and our use of credit facilities to ensure adequate liquidity, in adherence to related financial covenants.

Critical Accounting Policies

The preparation of our consolidated financial statements in conformity with GAAP requires us to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities and the disclosures of contingent assets and liabilities as of the date of the financial statements, and the reported amounts of revenues and expenses during the reporting periods. Significant estimates and assumptions are used for, but are not limited to:

(1) revenue recognition; including our estimated expected customer life; (2) asset impairments; (3) depreciable lives of assets; (4) fair value of stock options; (5) allocation of direct and indirect expenses; (6) fair value of contingent consideration and acquired intangible assets; and (7) litigation reserves. Future events and their effects cannot be predicted with certainty, and accordingly, our accounting estimates require the exercise of judgment. The accounting estimates used in the preparation of our consolidated financial statements will change as new events occur, as more experience is acquired, as additional information is obtained and as our operating environment changes. We evaluate and update our assumptions and estimates on an ongoing basis and may employ outside experts to assist in our evaluations. Actual results could differ from the estimates we have used.

Critical accounting policies are those policies that affect our more significant judgments and estimates used in the preparation of our condensed consolidated financial statements. We believe our critical accounting policies include our policies regarding revenue recognition, and business combinations related to purchased intangibles and contingent consideration. For a more detailed discussion of our critical accounting policies, please refer to our Annual Report on Form 10-K for the fiscal year ended December 31, 2011, as filed with the SEC on February 16, 2012.

Financial Operations Overview

Revenue. We derive our revenue from two sources: from business services associated with our revenue cycle management, electronic health record management, patient communication management, care coordination and analytics offerings and from implementation and other services. Implementation and other revenue consist primarily of professional services fees related to assisting clients with the initial implementation of our services and for ongoing training and related support services. Business services accounted for approximately 97% of our total revenues for the nine months ended September 30, 2012 and 2011. Business services revenue are typically 2% to 8% of a practice's total collections depending upon the services purchased, the size, complexity, and other characteristics of the practice, plus a per-statement charge for billing statements that are generated for patients. Accordingly, business services revenue is largely driven by: the number of physician practices and other service providers we serve, the number of physicians and other medical providers working in those physician practices, the volume of activity and related collections of those physicians, the mix of our services used by those physician practices and other medical providers, and our contracted rates. There is moderate seasonality in the activity level of physician practices. Typically, discretionary use of physician services declines in the late summer and during the holiday season, which leads to a decline in collections by our physician clients about 30 to 50 days later. Additionally, the volume of activity and related collections vary from year to year based in large part on the severity, length and timing of the onset of the flu season. While we believe that the severity, length and timing of the onset of the cold and flu season will continue to impact collections by our physician clients, there can be no assurance that our future sales of these services will necessarily follow historical patterns. Implementation and other revenue are largely driven by the increase in the volume of our new business. As a result, we expect implementation and other revenue to increase in absolute terms for the foreseeable future but to remain relatively consistent as a percentage of total revenue. None of our clients accounted for more than 10% of our total revenues for the three and nine months ended September 30, 2012 and 2011.

Direct Operating Expense. Direct operating expense consists primarily of salaries, benefits, claim processing costs, other direct expenses, and stock-based compensation related to personnel who provide services to clients, including staff who implement new clients. We expense implementation costs as incurred. We include in direct operating expense all service costs associated with athenaCollector, athenaClinicals, athenaCommunicator, athenaCoordinator and Anodyne solutions. Although in we expect that direct operating expense will increase in absolute terms for the foreseeable future, the direct operating expense is expected to decline as a percentage of revenue as we increase automation. Direct operating expense does not include allocated amounts for rent, occupancy and other indirect costs (including building maintenance and utilities), depreciation, and amortization, except for amortization related to purchased intangible assets.

Table of Contents

Selling and Marketing Expense. Selling and marketing expense consists primarily of marketing programs (including trade shows, brand messaging, and on-line initiatives) and personnel-related expense for sales and marketing employees (including salaries, benefits, commissions, stock-based compensation, non-billable travel, lodging, and other out-of-pocket employee-related expenses). Although we recognize substantially all of our revenue when services have been delivered, we recognize a large portion of our sales commission expense at the time of contract signature and at the time our services commence. Accordingly, we incur a portion of our sales and marketing expense prior to the recognition of the corresponding revenue. We have increased our sales and marketing expenses from year to year and we expect to continue to increase our investment in sales and marketing by hiring additional direct sales personnel and support personnel to add new clients and increase sales to our existing clients and expand awareness through paid search and other similar initiatives. We also plan to expand our marketing activities, such as attending trade shows, expanding user groups, and creating new printed materials. As a result, we expect that, in the near-term, sales and marketing expense will increase in line with or slightly higher than revenue growth.

Research and Development Expense. Research and development expense consists primarily of personnel-related expenses for research and development employees (including salaries, benefits, stock-based compensation, non-billable travel, lodging, and other out-of-pocket employee-related expenses) and consulting fees for third-party developers. We expect that, in the near-term, research and development expenditures will increase in absolute terms and will likely increase in line with revenue growth as we develop and enhance new and existing services; however the amount of expenditures that should be capitalized as software development costs verses expensed as research and development could vary based on the specific projects we undertake.

General and Administrative Expense. General and administrative expense consists primarily of personnel-related expense for administrative employees (including salaries, benefits, stock-based compensation, non-billable travel, lodging, and other out-of-pocket employee-related expense), occupancy and other indirect costs (including building maintenance and utilities), and insurance premiums; software as a service fees; outside professional fees for accountants, lawyers, and consultants; and compensation for temporary employees. We expect that general and administrative expense will increase in absolute terms as we invest in infrastructure to support our growth. Though expenses are expected to continue to rise in absolute terms, we expect general and administrative expense to decline as a percentage of total revenue over time.

Depreciation and Amortization Expense. Depreciation and amortization expense consists primarily of depreciation of fixed assets and amortization of capitalized software development and acquisition costs, which we amortize over a two to three-year period from the time of release of related software code. As we grow, we will continue to make capital investments in the infrastructure of the business and we will continue to develop software that we capitalize. In the near term we expect depreciation and amortization expense to increase as a percentage of total revenue.

Other Income (Expense). Interest income represents earnings from our cash, cash equivalents, and investments. We expect that our interest expense will be insignificant until such time we determine it is appropriate to draw down on our credit facility.

Income Tax Provision. Income tax provision consists of federal and state income taxes in the United States and India. The difference between our effective tax rate and our statutory rate is mainly related to any changes in the fair value of contingent considerations related to non-tax deductible goodwill, the treatment of Incentive Stock Options (“ISOs”) and the impact of certain tax deduction limits related to certain of our highly compensated officers. The changes in fair value of contingent consideration related to non-tax deductible goodwill and the treatment of disqualifying dispositions related to ISOs are also treated as discrete items which means they are recorded in the quarter in which they occur and could cause significant differences between the quarterly and annual effective tax rate. Also, we substantially ceased issuing ISOs in 2009, but we expect continued volatility related to these options since we cannot anticipate when disqualifying dispositions related to these options will occur.

Results of Operations

Comparison of the Three and Nine Months Ended September 30, 2012 and 2011

Three Months Ended September 30,	Change	Nine Months Ended September 30,	Change
-------------------------------------	--------	------------------------------------	--------

Edgar Filing: ATHENAHEALTH INC - Form 10-Q

	2012 (in thousands)	2011	Amount	Percent	2012 (in thousands)	2011	Amount	Percent
Business services	\$ 102,256	\$ 80,640	\$ 21,616	27 %	\$ 295,915	\$ 223,475	\$ 72,440	32 %
Implementation and other	3,630	3,100	530	17 %	10,052	8,080	1,972	24 %
Total	\$ 105,886	\$ 83,740	\$ 22,146	26 %	\$ 305,967	\$ 231,555	\$ 74,412	32 %

Revenue. Total revenue for the three and nine months ended September 30, 2012, increased almost entirely due to an

Table of Contents

increase in business services revenue.

Business Services Revenue. The increase in business services revenue is primarily driven by the growth in the number of physicians and medical providers using our services. The summary of changes in the physicians and active medical providers using our revenue cycle management service, athenaCollector, electronic health record management service, athenaClinicals, and patient communication management service, athenaCommunicator are as follows:

	As of September 30,			
	2012 Amount	2011 Amount	Change Amount	Percent
Physicians - revenue cycle management service	27,013	22,477	4,536	20 %
Active medical providers - revenue cycle management service	38,145	31,675	6,470	20 %
Physicians - electronic health record management service	7,340	4,202	3,138	75 %
Active medical providers - electronic health record management service	10,062	5,849	4,213	72 %
Physicians - patient communication management service	8,739	2,931	5,808	198 %
Active medical providers - patient communication management service	12,149	4,117	8,032	195 %

Also contributing to this increase was the growth in related collections on behalf of these physicians and medical providers. The amount of collections processed are as follows:

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2012 (in millions)	2011	Change Amount	Percent	2012 (in millions)	2011	Change Amount	Percent
Collections processed	\$2,302.5	\$1,866.8	\$435.7	23 %	\$6,643.4	\$5,286.2	\$1,357.2	26 %

Implementation and Other Revenue. The increase in revenue from implementation and other revenue was driven by new client implementations and increased professional services for our larger client base. The increase in implementation and other revenue is the result of the increase in the volume of our new business.

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2012 (in thousands)	2011	Change Amount	Percent	2012 (in thousands)	2011	Change Amount	Percent
Direct operating costs	\$41,866	\$31,695	\$10,171	32 %	\$121,678	\$87,985	\$33,693	38 %

Direct Operating Costs. The increase in direct operating expense is primarily due to an increase in the number of claims that we processed on behalf of our clients and the related expense of providing services, including transactions expense and employee-related costs. The total claims submitted on behalf of clients are as follows:

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2012 (in millions)	2011	Change Amount	Percent	2012 (in millions)	2011	Change Amount	Percent
Total Claims submitted	17.7	14.9	2.8	19 %	53.0	42.9	10.1	24 %

Also contributing to this increase was the direct operating employee-related costs, including stock-based compensation, primarily due to the 24% increase in headcount since September 30, 2011. We increased headcount to meet the current and anticipated demand for our services as our customer base has expanded and includes larger medical groups.

Total	\$52,945	\$43,543	\$9,402	22 %	\$161,286	\$120,116	\$41,170	34 %	

Selling and Marketing Expense. Selling and marketing expense primarily increased due to employee-related costs, including stock-based compensation expense, internal sales commissions and external partner channel commission of \$3.3 million and \$11.8 million for the three and nine months periods, respectively, due to an increase in headcount, an increase in the fair value of our recently issued stock-based compensation awards and an increase in amount paid to external channel partners. Our sales and marketing headcount increased by 38% since September 30, 2011, as we hired additional sales personnel to focus on adding new customers and increasing penetration within our existing markets. The increase was also due to a \$1.0 million and \$7.6 million increase in travel-related expenses, consulting, online marketing, offline marketing and other marketing events for the three and nine months period, respectively.

Research and Development Expense. Research and development expense increased due to higher employee-related costs, including stock-based compensation expense, of \$2.3 million and \$6.9 million for the three and nine month periods as a result of the increased headcount and increase in the fair value of our recently issued stock-based compensation awards. Our research and development headcount increased 43% since September 30, 2011, as we hired additional research and development personnel in order to upgrade and extend our service offerings and develop new technologies.

General and Administrative Expense. General and administrative expense was primarily impacted by higher employee-related costs, an increase in infrastructure expenditures and changes in the fair value of the certain contingent consideration. An increase in higher employee-related costs, including stock-based compensation expense, of \$2.1 million and \$6.0 million is due to an increased headcount and increase in the fair value of our recently issued stock-based compensation awards for the three and nine months period respectively. Our general and administrative headcount increased by 22% since September 30, 2011, as we added personnel to support our growth. The increase in headcount drove an increase in our expenditures related to infrastructure by \$1.3 million and \$2.6 million, respectively.

The fair value considerations related to each of the contingent considerations are fully disclosed in Note 3 to the Condensed Consolidated Financial Statements. The impact of those described changes in the fair value of the contingent considerations on General and Administrative Expense in the Condensed Consolidated Statement of Income are as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2012	2011	2012	2011
	(in thousands)		(in thousands)	
First Anodyne contingent consideration	\$—	\$—	\$—	\$—
Second Anodyne contingent consideration	—	116	1,310	340
First Proxsys contingent consideration	—	—	(2,420)	—

Total	\$(3,675)	\$116	\$(4,785)	\$340

Edgar Filing: ATHENAHEALTH INC - Form 10-Q

Depreciation and Amortization Expense. Depreciation and amortization increased due to higher depreciation from fixed asset expenditures and software development costs in 2011 and 2012.

	Three Months Ended		Change		Nine Months Ended		Change		
	September 30, 2012	2011	Amount	Percent	September 30, 2012	2011	Amount	Percent	
Income tax provision	\$4,953	\$3,364	\$1,589	47 %	\$10,445	\$9,835	\$610	6 %	
Effective tax rate	44.4 %	38.9 %			44.9 %	41.8 %			

Income Tax Provision. The quarterly volatility and overall increase in our effective tax rate for the three and nine months

Table of Contents

ended September 30, 2012 compared to the effective tax rate for the three and nine months ended September 30, 2011 is due to an estimated higher annual effective tax rate for 2012 and significant discrete items in the nine months ended September 30, 2012. The annual effective tax rate for 2012 is based on higher estimated permanent differences for the year ending December 31, 2012, primarily related to compensation in excess of tax deduction limits and the change in the Andoyne contingent consideration which is treated as additional non-taxable goodwill. The changes in the Anodyne contingent consideration for the nine month period in 2012 was treated as a discrete item in the first and second quarter of 2012 and had an unfavorable impact on the estimated annual tax rate of 2%. The rate was also impacted by ISO disqualifying events which impacted the rate favorable by 0% and 3% for the three and nine month periods in 2012, respectively. Comparatively, the effective tax rate for the three and nine months ended September 30, 2011, was not impacted by compensation in excess of tax deduction limits or changes related to the Anodyne contingent consideration but did have a favorable impact of 1.5% and 2.5%, respectively, due to ISO disqualifications.

Liquidity and Capital Resources

Sources of Liquidity

As of September 30, 2012, our principal sources of liquidity consisted of cash, cash equivalents and available-for-sale investments of \$182.3 million. Our cash investments consist of corporate debt securities, U.S. Treasury, bank certificate of deposits, and government agency securities, and commercial paper. As specified in our investment policy, we place our investments in instruments that meet high credit quality standards, the policy limits the amount of our credit exposure to any one issue or issuer and seeks to manage these assets to achieve our goals of preserving principal, maintaining adequate liquidity at all times, and maximizing returns. As of September 30, 2012, we have no outstanding indebtedness. On October 20, 2011, we entered into a credit agreement which provides for a five-year \$100 million revolving credit facility. The credit facility can be increased by up to an additional \$100 million on the satisfaction of certain conditions, including obtaining lender commitments. There was no balance outstanding on the revolving credit facility during the nine months ended September 30, 2012. The credit facility contains certain covenants, including consolidated leverage ratio and minimum fixed charges coverage ratios. The interest rates applicable to revolving loans under the credit agreement are at either (i) the British Bankers Association London Interbank Offered Rate (“LIBOR”) plus an interest margin based on our consolidated leverage ratio, or (ii) the base rate (which is the highest of (a) the bank’s prime rate, (b) the Federal Funds rate plus 0.50%, and (c) one month LIBOR plus 1.00%) plus an interest margin based on our consolidated leverage ratio. We will pay a commitment fee during the term of the credit agreement which varies between 0.20% and 0.30% depending on the consolidated leverage ratio. We believe our sources of liquidity will be sufficient to sustain operations, to finance our strategic initiatives, to make payments on our contractual obligations, as well as our purchases of property and equipment for the foreseeable future. Our analysis is supported by the growth in our new customer base and a high rate of renewal rates with our existing customers and the corresponding increase in billings and collections. We may pursue acquisitions or investments in complementary businesses or technologies, in which case we may need to borrow against our revolving credit facility. There can be no assurance that we will continue to generate cash flows at or above current levels or that we will be able to maintain our ability to borrow under our existing credit facility or obtain additional financing.

Commitments

We enter into various purchase commitments with vendors in the normal course of business. We believe that our existing sources of liquidity will be adequate to fund these purchases during the year 2012. In the normal course of business, we make representations and warranties that guarantee the performance of services under service arrangements with clients. Historically, there has been no material losses related to such guarantees.

Operating Cash Flow Activities

	Nine Months Ended September 30,	
	2012	2011
Net income	\$12,792	\$13,717
Non-cash adjustments	24,558	16,575

Cash used in changes in operating assets and liabilities	8,830	8,949
Net cash provided by operating activities	\$46,180	\$39,241

The increase in cash flow from operations for the nine months ended September 30, 2012, compared to the nine months ended September 30, 2011, is mainly attributable to the actual and proportionate increase in the amount of non-cash adjustments compared to the net income for those periods. The non-cash adjustments include an increase of stock-based compensation of \$7.5 million and depreciation and amortization of \$7.0 million offset by a decrease in the change in fair value of the contingent consideration of \$5.1 million when comparing these periods. The increase in stock-based compensation is a result of an increase in the fair value of recently issued stock-based awards due to an increase in the stock price. The Company

Table of Contents

continues to offset its portion of their income tax assessments with net operating losses from stock based compensation from prior years as shown by the excess tax benefit amounts. The Company expects that the majority of these net operating losses will substantially be utilized in 2012 and the amount of taxes paid will increase in future years.

Investing Cash Flow Activities

The cash used by investing activities decreased \$3.2 million for the nine months ended September 30, 2012, as compared to the nine months ended September 30, 2011. Cash flows used in investing activities consist primarily of purchases of property and equipment, capitalized software development costs and our investment activities. We make investments in property and equipment and in software development on an ongoing basis. Our investment in equipment consists primarily of purchases of technology infrastructure to provide service stability and additional capacity to support our expanding client base. Our increase of \$9.7 million in equipment is primarily related to several new servers for our new data center located in Dallas, Texas and existing data centers located in Bedford, Massachusetts and Belfast, Maine. Our investment in software development consists of company managed-design, development, and testing of new application functionality. Our capitalized software development increased by \$5.4 million for the nine months ended September 30, 2012, compared to the nine months ended September 30, 2011, primarily related to the new automation activities related to the new athenaCoordinator service offering. The change of restricted cash is due to the timing of the payments made for contingent consideration relating to the Anodyne acquisition completed in 2009. The net change in proceeds and purchases of our available for sale investments is based upon the changes in maturity of our investments in securities. In the nine months ended September 30, 2011, we acquired a conference center located in Maine for \$7.0 million and Proxsys for \$27.9 million.

Financing Cash Flow Activities

The cash provided by financing activities was \$24.0 million for the nine months ended September 30, 2012, compared to cash provided by financing activities of \$10.3 million for the nine months ended September 30, 2011. The change is primarily attributable to the \$9.7 million payment related to our debt and interest rate swap in 2011. We elected to repay all of our outstanding debt balances under our equipment line of credit and term loan, as well as terminate our related interest rate derivative in May 2011. The increase of \$5.1 million in cash received from the exercise of stock options during the nine months ended September 30, 2012, compared to the nine months ended September 30, 2011 is primarily due to the overall increase in the strike price of the options exercised along with an increase in the number of options exercised during the comparable time periods. This increase was offset by an increase of \$3.7 million related to the cash paid to settle tax obligations through the net settlement method that our employees can elect when restricted stock units vest in the nine months ended September 30, 2012. The Company began issuing restricted stock units in 2010 and has since experienced an increase in the proportionate number of restricted stock units granted compared to options granted. The Company expects that the cash paid to settle tax obligations will increase in the near future as these issued restricted stock units begin to vest. The payment of contingent consideration relates to the Anodyne earn out which expired June 30, 2012. The amounts paid to date were accrued at the time of acquisition and therefore included as financing activities.

Contractual Obligations

We have contractual obligations under our operating leases for properties. The following table summarizes our long-term contractual obligations and commitments as of September 30, 2012:

	Payments Due by Period					
	Total	Less than 1 Year	2 - 3 Years	4 - 5 Years	After 5 years	Other
Operating lease obligations	\$34,827	\$8,748	\$ 15,688	\$ 5,099	\$5,292	\$—
Other	1,685	—	—	—	—	1,685
Total	\$36,512	\$8,748	\$ 15,688	\$ 5,099	\$5,292	\$1,685

The commitments under our operating leases shown above consist primarily of lease payments for our Watertown, Massachusetts, headquarters; our Rome, Georgia, offices; our Alpharetta, Georgia, offices; our Birmingham, Alabama, offices; our Austin, Texas, offices and our Chennai, India, offices.

Other amount consists of uncertain tax benefits. We have not utilized these uncertain tax benefits, nor do we have an expectation of when these uncertain tax benefits would be challenged. As of September 30, 2012, we cannot reasonably estimate when any future cash outlays would occur related to these uncertain tax positions.

Off-Balance Sheet Arrangements

As of September 30, 2012 and 2011, and December 31, 2011, we did not have any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as “structured finance” or “special purpose” entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or

Table of Contents

limited purposes. Other than our operating leases for office space, we do not engage in off-balance sheet financing arrangements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

Foreign Currency Exchange Risk. Our results of operations and cash flows are subject to fluctuations due to changes in the Indian rupee. None of our consolidated revenues are generated outside the United States. None of our vendor relationships, including our contracts with our offshore service providers International Business Machines Corporation and Vision Business Process Solutions, Inc., a subsidiary of Dell, Inc. (formerly Perot Systems Corporation), for work performed in India and the Philippines, is denominated in any currency other than the U.S. dollar. For the nine months ended September 30, 2012, less than 1% of our expenses occurred in our direct subsidiary in Chennai, India, and was incurred in Indian rupees. We therefore believe that the risk of a significant impact on our operating income from foreign currency fluctuations is not substantial.

Interest Rate Sensitivity. We had unrestricted cash, cash equivalents and available for sale investments totaling \$182.3 million at September 30, 2012. These amounts are held for working capital purposes and were invested primarily in deposits, money market funds, and short-term and long-term, interest-bearing, investment-grade securities. Due to the short and expected term of these investments, we believe that we do not have any material exposure to changes in the fair value of our investment portfolio as a result of changes in interest rates. The value of these securities, however, will be subject to interest rate risk and could fall in value if interest rates rise.

Interest Rate Risk. As of September 30, 2012, we had no outstanding long-term debt and capital lease obligations and there were no amounts outstanding under the revolving credit facility.

Item 4. Controls and Procedures.

Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in the reports that we file or submit under the Securities and Exchange Act of 1934 is (1) recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms and (2) accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure. As of September 30, 2012 (the "Evaluation Date"), our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities and Exchange Act of 1934). Our management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives, and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Our Chief Executive Officer and Chief Financial Officer have concluded based upon the evaluation described above that, as of the Evaluation Date, our disclosure controls and procedures were effective at the reasonable assurance level.

Changes in Internal Control

There have been no changes in our internal control over financial reporting for the quarter ended September 30, 2012, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II—OTHER INFORMATION

Item 1. Legal Proceedings.

ADP AdvancedMD, Inc. (f/k/a AdvancedMD Software, Inc.)

On July 18, 2011, the Company filed a complaint against AdvancedMD Software, Inc. in the United States District Court for the District of Massachusetts. The complaint alleges that AdvancedMD Software, Inc. has infringed two of the Company's U.S. Patents: No. 7,617,116, which was issued on November 10, 2009, for "Practice Management and Billing Automation System" and No. 7,720,701, which was issued on May 18, 2010, for "Automated Configuration of Medical Practice Management Systems." On May 16, 2012, the Court entered the parties' joint stipulation of dismissal without prejudice of claims and counterclaims related to U.S. Patent No. 7,720,701. A Markman Hearing was held on September 14, 2012. The Court has not yet issued its Markman decision. The Company is seeking permanent injunctive relief, damages, pre- and post-judgment costs and interest, and attorneys' fees.

Cordjia, LLC

On July 18, 2011, a complaint was filed in the Superior Court for Waldo County, Maine, against the Company entitled Cordjia, LLC v. athenahealth, Inc. The complaint alleges that the Company entered into a partnership with the plaintiff to purchase property in Maine, that the parties entered into a mutual non-disclosure agreement governing the sharing of confidential information between them, and that the Company subsequently terminated the partnership and purchased the property itself, using the confidential information obtained from the plaintiff to do so. The complaint purports to state claims

18

Table of Contents

for common-law fraud, negligent misrepresentation, breach of fiduciary duty, unjust enrichment, quantum meruit, promissory estoppel, breach of contract, and violation of the Maine Uniform Trade Secrets Act. The complaint seeks unspecified damages, fees and costs, and injunctive relief enjoining the Company from making further use of the plaintiff's confidential information and requiring the Company to return all confidential information in its possession to the plaintiff. On August 8, 2011, the Company filed a motion to dismiss for improper venue. On November 17, 2011, the Court granted the Company's motion to dismiss for improper venue as to the claims for unjust enrichment, quantum meruit, breach of contract, and violation of the Maine Uniform Trade Secret Act, and denied the Company's motion as to the other claims. On December 7, 2011, the plaintiff filed an amended complaint, and on December 19, 2011, the Company filed a motion to dismiss the remaining claims, or in the alternative, to stay the proceeding. On March 22, 2012, the Court granted the Company's motion to stay the Maine proceedings pending the Delaware case noted below.

On December 7, 2011, a complaint was filed in the Superior Court for New Castle County, Delaware, against the Company entitled *Cordjia, LLC v. athenahealth, Inc.* The complaint pertains to the same facts as stated above and alleges claims for breach of contract, unjust enrichment, quantum meruit, and violation of the Delaware Uniform Trade Secrets Act. The complaint seeks unspecified damages, fees and costs, an injunction enjoining the Company from making any further use of the confidential information, and an order requiring the Company to return any copies of confidential information. On February 2, 2012, the Company filed a motion to dismiss the complaint. On March 30, 2012, the Court held oral argument on the Company's motion to dismiss.

On September 16, 2012, Cordjia agreed to dismiss with prejudice all of its actions and the parties filed joint stipulations of dismissal with prejudice as to all claims in the Delaware Superior Court and the Delaware Court of Chancery. On September 18, 2012, the parties filed a joint stipulation of dismissal with prejudice of the Maine Superior Court action; the Court granted this on September 25, 2012. Consequently, all claims against the Company in the actions have been dismissed with prejudice.

PPS Data, LLC

On July 28, 2011, a complaint was filed by PPS Data, LLC naming the Company in a patent infringement case (*PPS Data, LLC v. athenahealth, Inc.*, Civil Action No. 3:11-cv-00746, United States District Court for the Middle District of Florida). The complaint alleges that the Company has infringed U.S. Patent No. 6,343,271 with a listed issue date of January 29, 2002, entitled "Electronic Creation, Submission, Adjudication, and Payment of Health Insurance Claims" (the "'271 Patent"). The complaint seeks an injunction enjoining infringement, damages, pre- and post-judgment costs and interest, and attorneys' fees. On September 8, 2011, the Company filed a motion to dismiss, or, in the alternative, a motion for summary judgment. On October 18, 2011, the plaintiff filed a motion for leave to amend its complaint to allege that the Company has infringed on U.S. Patent No. 6,341,265 with a listed issue date of January 22, 2002, entitled "Provider claim editing and settlement system," and U.S. Patent No. 7,194,416 with a listed issue date of March 20, 2007, entitled "Interactive creation and adjudication of health care insurance claims." The Court granted the plaintiff's motion for leave to amend its complaint on December 21, 2011, and on December 23, 2011, the plaintiff filed its amended complaint. On December 27, 2011, the Company filed a motion to dismiss, or, in the alternative, a motion for summary judgment of non-infringement with respect to the '271 Patent. On December 29, 2011, the United States Patent and Trademark Office granted the Company's request for reexamination of the '271 Patent. On January 9, 2012, the Company filed a motion to stay the case pending completion of the patent reexamination, and on March 1, 2012, the Court granted the Company's motion to stay the case. The Company believes that it has meritorious defenses to the amended complaint and will continue to contest the claims vigorously.

Medsquire, LLC

On December 6, 2011, a complaint was filed by Medsquire, LLC against the Company in a patent infringement case (*Medsquire, LLC v. athenahealth, Inc.*, Civil Action No. 2:11-CV-10126-JHN-PLA, United States District Court for the Central District of California). The complaint alleges that the Company has infringed U.S. Patent No. 5,682,526 with a listed issue date of October 28, 1997, entitled "Method and System for Flexibly Organizing, Recording, and Displaying Medical Patient Care Information Using Fields in a Flowsheet." The complaint seeks damages, pre-judgment interest, and attorneys' fees. Medsquire, LLC and the Company have reached a confidential settlement in the matter. On October 4, 2012, the Court entered the parties' joint stipulation of dismissal with prejudice of all claims

and counterclaims.

In addition, from time to time the Company may be subject to other legal proceedings, claims, and litigation arising in the ordinary course of business. The Company does not, however, currently expect that the ultimate costs to resolve any pending matter will have a material effect on the Company's consolidated financial position, results of operations, or cash flows.

Item 1A. Risk Factors.

Our operating results and financial condition have varied in the past and may in the future vary significantly depending on a number of factors. Except for the historical information in this report, the matters contained in this report include forward-

Table of Contents

looking statements that involve risks and uncertainties. The following factors, among others, could cause actual results to differ materially from those contained in forward-looking statements made in this report and presented elsewhere by management from time to time. Such factors, among others, may have a material adverse effect upon our business, results of operations, and financial condition.

In Part I-Item 1A (“Risk Factors”) of our Annual Report on Form 10-K for the fiscal year ended December 31, 2011, which was filed with the Securities and Exchange Commission on February 16, 2012, we describe risk factors related to the Company. The following risk factors are either new or have changed materially from those set forth in our Annual Report on Form 10-K for the year ended December 31, 2011. You should carefully review these risks and those described in our Annual Report on Form 10-K and in other reports we file with the Securities and Exchange Commission in evaluating our business.

Due to the particular nature of certain services we provide or the manner in which we provide them, we may be subject to government regulation unrelated to health care.

While our services are primarily subject to government regulations pertaining to health care, certain aspects of those services may require us to comply with regulatory schemes from other areas. Examples of such regulatory schema include:

Antitrust Laws. Our national cloud-based network allows us access to cost and pricing data for a large number of providers in most regional markets, as well as to the contracted rates for third-party payers. To the extent that our services enable providers to compare their cost and pricing data with those of their competitors, those providers could collude to increase the pricing for their services, to reduce the compensation they pay their employees, or to collectively negotiate agreements with third parties. Similarly, if payers are able to compare their contracted rates of payment to providers, those payers may seek to reduce the amounts they might otherwise pay. Such actions may be deemed to be anti-competitive and a violation of federal antitrust laws. To the extent that we are deemed to have enabled such activities, we could be subject to fines and penalties imposed by the U.S. Department of Justice or the Federal Trade Commission and be required to curtail or terminate the services that permitted such collusion.

Debt Collection Laws. As a billing service that offers patient communication and registration services, our employees or those of our service providers may from time to time come into contact with patients who owe our clients outstanding amounts. Communications with patients that relate to amounts owed may be deemed to subject us or our service providers to federal or state debt collection laws and regulations. Such laws and regulations, if deemed to apply to us, could require registration with government agencies and compliance with significant administrative obligations (e.g., to maintain an in-state office with local employees), which could result in increased expenses and subject us to fines and penalties for violation. Following the disclosure in 2012 of the methods used by debt collector Accretive Health to obtain payment of amounts owed by patients to one of its hospital clients, heightened focus on debt collection practices may lead to additional regulation and greater scrutiny of existing debt collection practices.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

Not applicable.

Item 3. Defaults Upon Senior Securities.

Not applicable.

Item 4. Mine Safety Disclosures.

None.

Item 5. Other Information.

Not applicable.
