SUMMARY FINANCIAL INFORMATION

Set forth below are summary statements of operations data for the ~~quarters~~ three month and nine month periods ended ~~June~~ September 30, 2003 and 2002 and years ended December 31, 2002 and 2001, and summary balance sheet data as of ~~June~~ September 30, 2003, December 31, 2002 and December 31, 2001. This information should be read in conjunction with our quarterly consolidated financial statements for the quarters ended ~~June~~ September 30, 2003 and our annual consolidated financial statements for the years ended December 31, 2002 and 2001 and notes thereto and Management's Discussion and Analysis , appearing elsewhere in this prospectus.

1 On January 28, May 12, and May 28, 2003 the holders of our 8% convertible notes converted their principal balance into common shares at a discounted conversion rate, which produced an expense on the induced conversion and accelerated the accretion of the unamortized debt discount, for a total non-cash interest expense of \$860,351.

2 The gain on restructuring of convertible notes arose in February 2002. The note holders agreed to waive accrued interest of \$315,000 and prepayment premiums of \$288,600, and to make the notes interest free until December 31, 2003. The interest free period was a benefit to us and produced a gain of \$237,764. As well, the removal of the discount-to-market conversion calculation produced a benefit to us called a "repurchase of beneficial conversion feature," of \$247,222. A full description of this restructuring may be found in Note 7 to the 2002 annual financial statements found elsewhere in this prospectus.

RISK FACTORS

The following factors should be considered carefully in evaluating Stockgroup and its business.

Our limited operating history makes it difficult for you to judge our prospects.

We have a limited operating history upon which an evaluation of our current business and prospects can be based. We have reported losses for each fiscal year since we became a public company. You should consider any purchase of our shares in light of the risks, expenses and problems frequently encountered by all companies in the early stages of its corporate development, such as lack of capital, difficulty attracting high quality personnel, lack of market exposure, and uncertainty about the viability of our business plan.

Liquidity and capital resources are uncertain.

Our cash used in operations for the first ~~six~~ nine months of 2003 was ~~\$552,048,720.167~~, our net losses for the same period were ~~\$1,637,817~~, and our accumulated deficit at ~~June~~ September 30, 2003 was ~~\$14,803,305~~ 15,079,199. ~~We repaid \$35,332 of our convertible notes, and \$47,000 in notes payable. Another use of cash was repayment of capital leases, totaling \$55,619. Sources of cash included \$95,745 for proceeds from exercise of warrants and stock options, and \$625,281 from issuance of shares and warrants under a Short Form Offering.~~

You should be cautioned that there can be no assurance that revenue, margins, and profitability will increase. We have ~~\$79,430,905~~ of capital lease obligations due within the next 12 months. There can be no assurance that we will be successful in raising a sufficient amount of additional capital or in internally generating a sufficient amount of capital to meet our operational requirements.

Our ability to continue as a going concern is uncertain

In view of our liquidity conditions described above, our ability to continue as a going concern is uncertain and dependent upon achieving a profitable level of operations and, if necessary, on our ability to obtain necessary financing to fund ongoing operations. As well, our ability to absorb a large unforeseen expenditure or other disaster is limited by our current lack of capital resources. Our auditors' report and Note 1 to our 2002 consolidated financial statements also discuss substantial doubt about our ability to continue as a going concern.

Computer equipment problems and failures could adversely affect our business.

Problems or failures in Internet-related equipment, including file servers, computers and software, could result in interruptions or slower response times for our Web-based services, which could reduce the attractiveness of our Web site, financial tools or investor relations services to advertisers and users. Should such interruptions continue for an extended period we could lose significant business and reputation. Equipment

Edgar Filing: STOCKGROUP INFORMATION SYSTEMS INC - Form SB-2/A

problems and failures could result from a number of causes, including an increase in the number of users of our Web site, computer viruses, outside programmers penetrating and disrupting software systems, human error, fires, floods, power and telecommunications failures and internal breakdowns. In addition, any disruption in Internet access and data feeds provided by third parties could have a material and adverse effect on our businesses. Our limited resources do not currently permit us to maintain an off-site disaster recovery facility. As a result, if we experience a major disaster such as a fire, theft, or intentional destruction of our computer equipment, it could have catastrophic results for our business.

We may not be able to compete successfully against current and future competitors.

We currently compete with several other companies offering similar services. Many of these companies have significantly greater financial resources, name recognition, and technical and marketing resources, and virtually all of them are seeking to improve their technology, products and services. We can not assure you that we will have the financial resources or the technological expertise to successfully meet this competition.

We are significantly influenced by our officers, directors and entities affiliated with them.

In the aggregate, ownership of Stockgroup shares by management represents approximately 17% of our present issued and outstanding shares of common stock. These shareholders, if acting together, will be able to significantly influence all matters requiring approval by shareholders, including the election of directors and the approval of mergers or other business combinations.

We may be unable to protect the intellectual property rights upon which our business relies.

We have or may pursue certain trademarks, and we have brand names, Internet domain names, Web site designs, programs and certain subscriber lists which make up the intellectual property we view as important to our business. It may be possible for a third party to copy or otherwise obtain or use our intellectual

Page 9

property without authorization or to develop similar technology independently. There can also be no assurance that our business activities will not infringe upon the proprietary rights of others, nor that other parties will not assert infringement claims against us, including claims that by, directly or indirectly, providing hyperlink text links to Web sites operated by third parties, we have infringed upon the proprietary rights of other third parties. Due to the global nature of the Internet, there can be no assurance that obtaining trademark protection in the United States will prevent infringements on our trademarks by parties in other countries. We have not sought or obtained any patents on our proprietary software and data processing applications.

We may be held liable for online information or services provided by us or third parties.

Because materials may be downloaded by the public on Internet services offered by us or the Internet access providers with whom we have relationships, and because third party information may be posted by third parties on our Web site through discussion forums and otherwise, there is the potential that claims will be made against us for defamation, negligence, copyright or trademark infringement or other theories. Such claims have been brought against providers of online services in the past. We have been named in two lawsuits in which defamation is alleged to have occurred on our Internet discussion forum called Bull Boards. The imposition of liability based on such claims could materially and adversely affect us.

Even to the extent such claims do not result in liability, we could incur significant costs in investigating and defending against such claims. The imposition on us of potential liability for information or services carried on or disseminated through our Web site could require implementation of measures to reduce exposure to such liability, which may require the expenditure of substantial resources and limit the attractiveness of services to members and users.

We post news clippings from other news Web sites on the Stockhouse and SmallCapCenter Web sites with links to the source site. Most publishers currently encourage this practice, although certain publishers have requested that we cease posting their stories. We have complied with their request in each case. To the extent that a large majority of news publishers prohibit posting of their stories on our Web sites or begin charging royalty fees for such stories, our Web site traffic could decrease or our costs could increase, thereby adversely impacting our profitability.

Our general liability insurance will not cover all potential claims to which we are exposed or may not be adequate to indemnify us for all liability that may be imposed. Any imposition of liability that is not covered by insurance or is in excess of insurance coverage could have a material adverse effect on our business, results of operations and financial condition.

Edgar Filing: STOCKGROUP INFORMATION SYSTEMS INC - Form SB-2/A

Trading of our stock may be restricted by the SEC's penny stock regulations which may limit a stockholder's ability to buy and sell our stock.

The Securities and Exchange Commission has adopted regulations which generally define "penny stock" to be any equity security that has a market price (as defined) less than \$5.00 per share or an exercise price of less than \$5.00 per share, subject to certain exceptions. Our securities are covered by the penny stock rules, which impose additional sales practice requirements on broker-dealers who sell to persons other than established customers and "accredited investors". The term "accredited investor" refers generally to institutions with assets in excess of \$5,000,000 or individuals with a net worth in excess of \$1,000,000 or annual income exceeding \$200,000 or \$300,000 jointly with their spouse. The penny stock rules require a broker-dealer, prior to a transaction in a penny stock not otherwise exempt from the rules, to deliver a standardized risk disclosure document in a form prepared by the SEC which provides information about penny stocks and the nature and level of risks in the penny stock market. The broker-dealer also must provide the customer with current bid and offer quotations for the penny stock, the compensation of the broker-dealer and its salesperson in the transaction and monthly account statements showing the market value of each penny stock held in the customer's account. The bid and offer quotations, and the broker-dealer and salesperson compensation information, must be given to the customer orally or in writing prior to effecting the transaction and must be given to the customer in writing before or with the customer's confirmation. In addition, the penny stock rules require that prior to a transaction in a penny stock not otherwise exempt from these rules, the broker-dealer must make a special written determination that the penny stock is a suitable investment for the purchaser and receive the purchaser's written agreement to the transaction. These disclosure requirements may have the effect of reducing the level of trading activity in the secondary market for the stock that is subject to these penny stock rules. Consequently, these penny stock rules may affect the ability

of broker-dealers to trade our securities. We believe that the penny stock rules discourage investor interest in and limit the marketability of our common stock.

Future issuances of shares may adversely impact the value of our stock.

We may attempt to raise additional capital through the sale of common stock in the near future. Future issuances of common stock may dilute your position in us.

Our stock price is vulnerable to buying and selling pressures

Page 10

As there is a limited market for our common stock, there may be considerable volatility in our stock price due to selling and buying pressures. Future sales of shares by our existing or future shareholders could cause the market price of our common stock to decline. There are currently 20,842,696 outstanding shares of our common stock which may be traded without restriction in any market. In addition, there are 8,520,300 outstanding shares which may be traded outside the United States and which will become free trading in the United States upon effectiveness of this registration statement.

There are 2,326,000 shares underlying stock options which are exercisable within 60 days of this prospectus, and which if exercised may be traded without restriction in any market. Of these options, 1,768,600 of them have exercise prices at or below the market price as of the date of this prospectus.

There are also 3,514,638 shares underlying warrants which are exercisable as of the date of this prospectus, of which 800,000 are covered by a registration statement filed July 7, 2003 and accordingly are eligible for sale by the holders thereof in the public market subject to restrictions included in our agreements with the holders. Of the aforementioned 800,000 shares, 500,000 underlie warrants which have exercise prices at or below the market price as of the date of this prospectus.

Our board of directors may authorize and issue preferred shares

Our board of directors has the authority to issue preferred shares with rights, preferences and/or privileges senior to or on parity with the rights of the holders of common stock. The potential consequences to our investors include a loss of perceived value of the stock in the market and a loss of future earnings and dividends, if and when dividends are declared.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This prospectus contains "forward-looking statements." In some cases you can identify forward-looking statements by terminology such as "may", "will", "should", "could", "expects", "plans", "intends", "anticipates", "believes", "estimates", "predicts", "potential" or "continue" or the negative of such terms and other comparable terminology.

These forward-looking statements include, without limitation, statements about:

- our market opportunity;
- our strategies;
- competition;
- expected activities and expenditures as we pursue our business plan; and
- the adequacy of our available cash resources.

These statements appear in a number of places in this registration statement and include statements regarding the intent, belief or current expectations of the Company, its directors or its officers with respect to, among other things: (i) trends affecting our financial condition or results of operations, (ii) our business and growth strategies, (iii) the Internet and Internet commerce and (iv) our financing plans. Although we believe that the expectations reflected in the forward-looking statement are reasonable, we cannot guarantee future results, levels of activity, performance or achievements.

The accompanying information contained in this prospectus including, without limitation, the information set forth under the headings "Risk Factors", "Management's Discussion and Analysis of Financial Condition and Results of Operations", and "Business" identify important factors that could adversely affect actual results and performance. All forward-looking statements attributable to us are expressly qualified in their entirety by the foregoing cautionary statement.

USE OF PROCEEDS

We will not receive any proceeds from the sale of the securities by the selling security holders.

SELLING SECURITY HOLDERS
