**Issuance of Trust Preferred Securities**

Trustmark Corporation completed a private placement of \$60 million of trust preferred securities on August 18, 2006, through a newly formed Delaware trust affiliate, Trustmark Preferred Capital Trust I, (the "Trust"). The trust preferred securities mature September 30, 2036, are redeemable at the Corporation's option beginning after five years, and bear interest at a variable rate per annum equal to the three-month LIBOR plus 1.72%. Under applicable regulatory guidelines, these trust preferred securities qualify as Tier 1 capital. All of the common securities of the Trust are held by the Corporation.

The proceeds from the sale of the trust preferred securities were used by the Trust to purchase \$61,856,000 in aggregate principal amount of the Corporation's junior subordinated debentures. The net proceeds to the Corporation from the sale of the debentures to the Trust will be used by the Corporation to finance its merger with Republic Bancshares of Texas, Inc., which is expected to be completed at the close of business on August 25, 2006.

The debentures were issued pursuant to a Junior Subordinated Indenture, dated August 18, 2006 between the Corporation, as issuer, and Wilmington Trust Company, as trustee (the "Indenture"). Like the trust preferred securities, the debentures bear interest at a variable rate per annum equal to the three-month LIBOR plus 1.72%. The interest payments by the Corporation will be used to pay the quarterly distributions payable by the Trust to the holder of the trust preferred securities. However, so long as no event of default has occurred under the debentures, the Corporation may defer interest payments on the debentures (in which case the Trust will also defer distributions otherwise due on the trust preferred securities) for up to 20 consecutive quarters.

The debentures are subordinated to the prior payment of any other indebtedness of the Corporation that, by its terms, is not similarly subordinated. The trust preferred securities will be recorded as a long-term liability on the Corporation's balance sheet; however, for regulatory purposes the trust preferred securities will be treated as Tier 1 capital under rulings of the Federal Reserve Board, the Corporation's primary federal regulatory agency.

The debentures mature on September 30, 2036 but may be redeemed at the Corporation's option at anytime on or after September 30, 2011 or at anytime upon certain events, such as a change in the regulatory capital treatment of the debentures, the Trust being deemed an investment company or the occurrence of certain adverse tax events. The redemption price for the debentures is equal to 100% of the aggregate principal amount, plus accrued and unpaid interest, if any. Upon any redemption of the debentures, the Trust will redeem a like amount of the trust preferred securities.

The Corporation also entered into a Guarantee Agreement, dated August 18, 2006, pursuant to which it has agreed to guarantee the payment by the Trust of distributions on the trust preferred securities, and the payment of principal of the trust preferred securities when due, either at maturity or on redemption, but only if and to the extent that the Trust fails to pay distributions on or principal of the trust preferred securities after having received interest payments or principal payments on the notes from the Corporation for the purpose of paying those distributions or the principal amount of the trust preferred securities.
