**ITEM 1.01. Entry into a Material Definitive Agreement.**

On May 10, KBR, Inc. (the “*Company*”), entered into a Share Purchase Agreement dated as of May 10, 2007 (the “*Agreement*”), by and among the Company’s wholly-owned subsidiary, Kellogg Brown & Root Holdings (U.K.) Limited (“*KBR U.K.*”), Balfour Beatty plc, The Weir Group plc (collectively, the “*Sellers*”), Babcock International Group plc (“*Babcock*”) and the Company, pursuant to which the Sellers will sell all of their respective interests in Devonport Management Limited (“*DML*”), including KBR U.K.’s 51% interest in DML, to Babcock for an aggregate purchase price of 350 million in cash. The purchase price will accrue interest at the rate of 1.5% per annum above LIBOR from July 9, 2007 through the date of closing of the Agreement. DML, through its subsidiary Devonport Royal Dockyard, is the primary dockyard performing refueling and related maintenance for the U.K.’s nuclear submarine fleet.

The Company has agreed to guarantee all of the obligations of KBR U.K. under the Agreement. In addition, the Agreement provides that if Babcock does not obtain approval of the acquisition by its shareholders (and such failure is not a result of any act or omission of the Sellers), Babcock will be required to pay the Sellers a break-up fee of an aggregate of 8 million.

The Sellers have made customary warranties and covenants in the Agreement. Sellers’ liability for breaches of the warranties is several (not joint and several) and is limited to an aggregate cap of 100 million, which reduces to £50 million after two years.

The closing under the Agreement is conditioned upon: (i) approval by Babcock’s shareholders and (ii) the consent of the U.K.’s Secretary of State of Defence. Babcock also has the ability to terminate the Agreement if there is a material adverse change in the business of DML between the execution and the closing of the Agreement.

A copy of the press release announcing the Agreement is attached hereto as Exhibit 99.1 and is incorporated herein by reference.
