CENTRAL VALLEY COMMUNITY BANCORP
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Note 1. Basis of Presentation

The interim unaudited condensed consolidated financial statements of Central Valley Community Bancorp and subsidiary have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (the SEC). These interim condensed consolidated financial statements include the accounts of Central Valley Community Bancorp and its wholly owned subsidiary Central Valley Community Bank (the Bank) (collectively, the Company). All significant intercompany accounts and transactions have been eliminated in consolidation. Certain information and footnote disclosures normally included in the annual consolidated financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been omitted. The Company believes that the disclosures are adequate to make the information presented not misleading. These interim condensed consolidated financial statements should be read in conjunction with the audited financial statements and notes thereto included in the Company's 2006 Annual Report to Shareholders on Form 10-K. In the opinion of management, all adjustments, consisting of only normal recurring adjustments, necessary to present fairly the Company's financial position and shareholders' equity at June 30, 2007 and December 31, 2006, and the results of its operations for the three and six month interim periods ended June 30, 2007 and June 30, 2006 and its cash flows for the six month interim period ended June 30, 2007 and June 20, 2006 have been included. Certain reclassifications have been made to prior year amounts to conform to the 2007 presentation. The results of operations for interim periods are not necessarily indicative of results for the full year.

The preparation of these condensed consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Management has determined that since all of the banking products and services offered by the Company are available in each branch of the Bank, all branches are located within the same economic environment and management does not allocate resources based on the performance of different lending or transaction activities, it is appropriate to aggregate the Bank branches and report them as a single operating segment. No customer accounts for more than 10 percent of revenues for the Company or the Bank.

Note 2. Stock-Based Compensation

The Company has three stock-based compensation plans which are described as follows:

During 1992, the Bank established a Stock Option Plan for which shares are reserved for issuance to employees and directors under incentive and nonstatutory agreements. The Company assumed all obligations under this plan as of November 15, 2000, and options to purchase shares of the Company's common stock were substituted for options to purchase shares of common stock of the Bank. Outstanding options under this plan are exercisable until their

expiration, however, no new options will be granted under this plan.

On November 15, 2000, the Company adopted, and subsequently amended on December 20, 2000, the Central Valley Community Bancorp 2000 Stock Option Plan for which 912,864 shares remain reserved for issuance for options already granted to employees and directors under incentive and nonstatutory agreements and 1,386 remain reserved for future grants. The plan requires that the option price may not be less than the fair market value of the stock at the date the option is granted, and that the option price must be paid in full at the time it is exercised. The options under the plan expire on dates determined by the Board of Directors, but not later than ten years from the date of grant. The vesting period is determined by the Board of Directors and is generally over five years.

In March 2005, the Company adopted the Central Valley Community Bancorp 2005 Omnibus Incentive Plan. The plan provides for awards in the form of incentive stock options, non-statutory stock options, stock appreciation rights, and restricted stock. The plan also allows for performance awards that may be in the form of cash or shares of the Company, including restricted stock. The maximum number of shares that can be issued with respect to all awards under the plan is 476,000. The plan requires that the exercise price may not be less than 100% of the fair market value of the stock at the date the option is granted, and that the option price must be paid in full at the time it is exercised. The options and awards under the plan expire on dates determined by the Board of Directors, but not later than 10 years from the date of grant. The vesting period for the options and option related stock appreciation rights is determined by the Board of Directors and is generally over five years. There are no grants under this plan.

Stock Option Compensation

There were 78,900 options granted in 2007 and 15,000 were granted in 2006. For the six month periods ended June 30, 2007 and 2006, the compensation cost recognized for stock option compensation was \$96,000 and \$84,000, respectively. For the quarter ended June 30, 2007 and 2006, compensation cost recognized was \$59,000 and \$15,000, respectively. The recognized tax benefit for stock option compensation expense was \$165,000 and \$277,000, for the six month periods ended June 30, 2007 and 2006, respectively. For the three month periods ended June 30, 2007 and 2006, recognized tax benefits were \$131,000 and \$242,000, respectively. As of June 30, 2007, there was \$726,000 of total unrecognized compensation cost related to non-vested share-based compensation arrangements granted under the 1992 Plan and 2000 Plan. The cost is expected to be recognized over a weighted average period of 4 years.

The Company bases the fair value of the options granted on the date of grant using a Black-Scholes option pricing model that uses assumptions based on expected option life and the level of estimated forfeitures, expected stock volatility, risk free interest rate, and dividend yield. The "simplified" method described in SEC Staff Accounting Bulletin No. 107 was used to determine the expected term of the Company's options in 2007 and 2006. Stock volatility is based on the historical volatility of the Company's stock. The risk-free rate is based on the U. S. Treasury yield curve for the periods within the contractual life of the options in effect at the time of grant. The weighted average grant date fair value per share for the 78,900 options granted for the six months ended June 30, 2007 was \$5.75.

Stock Option Activity

A summary of the combined activity of the plans follows:

		Six Months ended June 30, 2007		
	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Average Intrinsic Value (In thousands)
Options outstanding, beginning of period	899,834	\$ 6.45		\$ 7,563
Options granted	78,900	14.69		
Options exercised	(59,030)	\$ 4.62		
Options canceled	(6,840)	\$ 13.07		
Options outstanding, end of period	912,864	\$ 7.24	5.05	\$ 7,094
Options vested or expected to vest at June 30, 2007	876,787	\$ 7.04	7.17	\$ 6,977
Options exercisable, end of period	697,784	\$ 5.22	3.95	\$ 6,822

The total intrinsic value of options exercised in the six months ended June 30, 2007 and 2006, was \$403,000 and \$928,000, respectively.

Note 3. Earnings per share

Basic earnings per share (EPS), which excludes dilution, is computed by dividing income available to common shareholders by the weighted-average number of common shares outstanding for the period. Diluted EPS reflects the potential dilution that could occur if securities or other contracts to issue common stock, such as stock options, stock

appreciation rights settled in stock or restricted stock awards, result in the issuance of common stock which shares in the earnings of the Company. There was no difference in the net income used in the calculation of basic earnings per share and diluted earnings per share.

8

A reconciliation of the numerators and denominators of the basic and diluted EPS computations is as follows:

Basic Earnings Per Share	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
In thousands (except share and per share amounts)	2007	2006	2007	2006
Net income	\$ 1,619	\$ 1,669	\$ 3,071	\$ 3,099
Weighted average shares outstanding	5,990,140	5,957,940	6,007,534	5,935,453
Net income per share	\$ 0.27	\$ 0.28	\$ 0.51	\$ 0.52

Diluted Earnings Per Share	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
In thousands (except share and per share amounts)	2007	2006	2007	2006
Net income	\$ 1,619	\$ 1,669	\$ 3,071	\$ 3,099
Weighted average shares outstanding	5,990,140	5,957,940	6,007,534	5,935,453
Effect of dilutive stock options	401,452	511,997	412,332	521,005
Weighted average shares of common stock and common stock equivalents	6,391,592	6,469,937	6,419,866	6,456,458
Net income per diluted share	\$ 0.25	\$ 0.26	\$ 0.48	\$ 0.48

Note 4. Comprehensive Income

Total comprehensive income is comprised of net earnings and net unrealized gains and losses on available-for-sale securities, which is the Company's only source of other comprehensive income. Total comprehensive income for the three-month periods ended June 30, 2007 and 2006 was \$1,062,000 and \$978,000 and was \$2,675,000 and \$2,235,000 for the six month periods ended June 30, 2007 and 2006, respectively.

Note 5. Commitments and Contingencies

In the normal course of business, the Company is a party to financial instruments with off-balance sheet risk. These financial instruments include commitments to extend credit and standby letters of credit. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the balance sheets. The contract or notional amounts of these instruments reflect the extent of involvement the Company has in particular classes of financial instruments. The Company uses the same credit policies in making commitments and conditional obligations as it does for loans.

Commitments to extend credit amounting to \$141,476,000 and \$133,937,000 were outstanding at June 30, 2007 and December 31, 2006, respectively. Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee.

Undisbursed lines of credit amounting to \$72,344,000 and \$71,040,000 were outstanding at June 30, 2007 and December 31, 2006, respectively. Undisbursed lines of credit are revolving lines of credit whereby customers can repay principal and advance principal during the term of the loan at their discretion and most expire between one and twelve months.

The Company has undisbursed portions of construction loans totaling \$17,938,000 and \$24,850,000 as of June 30, 2007 and December 31, 2006, respectively. These commitments are agreements to lend to a customer, subject to meeting certain construction progress requirements. The underlying construction loans have fixed expiration dates.

Standby letters of credit and financial guarantees amounting to \$1,137,000 and \$612,000 were outstanding at June 30, 2007 and December 31, 2006, respectively. Standby letters of credit and financial guarantees are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. Those guarantees are primarily issued to support private borrowing arrangements. Most guarantees carry a one year term or less. The fair value of the liability related to these standby letters of credit, which represents the fees received for issuing the guarantees, was not significant at June 30, 2007 and December 31, 2006. The Company recognizes these fees as revenue over the term of the commitment or when the commitment is used.

The Company generally requires collateral or other security to support financial instruments with credit risk. Management does not anticipate any material loss will result from the outstanding commitments to extend credit, standby letters of credit and financial guarantees.

The Company is subject to legal proceedings and claims which arise in the ordinary course of business. In the opinion of management, the amount of ultimate liability with respect to such actions will not materially affect the consolidated financial position or consolidated results of operations of the Company.

Note 6. Income Taxes

Accounting for Uncertainty in Income Taxes

In June 2006, the Financial Accounting Standards Board (FASB) issued FASB Interpretation (FIN) No. 48 "Accounting for Uncertainty in Income Taxes— an interpretation of FASB Statement 109". FIN 48 establishes a single model to address accounting for uncertain tax positions. FIN 48 clarifies the accounting for income taxes by prescribing a minimum recognition threshold a tax position is required to meet before being recognized in the financial statements. FIN 48 also provides guidance on derecognition, measurement classification, interest and penalties, accounting in interim periods, disclosure and transition. The Company has adopted FIN 48 as of January 1, 2007. The provisions of FIN 48 have been applied to all tax positions of the Company as of January 1, 2007. There was no cumulative effect of applying the provisions of FIN 48 and there was no significant effect on the Company's provision for income taxes for the six months ended June 30, 2007.

The Company recognizes accrued interest and penalties related to unrecognized tax benefits as a component of tax expense in the consolidated statements of income. There have been no significant changes to unrecognized tax benefits or accrued interest and penalties for the six months or the quarter ended June 30, 2007.

Note 7. Recent Accounting Developments

Fair Value Option for Financial Assets and Financial Liabilities

In February 2007, the FASB issued Statement No. 159 (SFAS 159), *The Fair Value Option for Financial Assets and Financial Liabilities – Including an Amendment of FASB Statement No. 115*. This standard permits an entity to choose to measure many financial instruments and certain other items at fair value at specified election dates. The entity will report unrealized gains and losses on items for which the fair value option has been elected in earnings at each subsequent reporting date. The fair value option: (a) may be applied instrument by instrument, with a few exceptions, such as investments otherwise accounted for by the equity method; (b) is irrevocable (unless a new election date occurs); and (c) is applied only to entire instruments and not to portions of instruments. The provisions of SFAS 159 are effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007, with early adoption permissible, subject to certain criteria. Management did not elect to early adopt SFAS 159 and does not expect SFAS 159 to have a material impact.

Accounting for Deferred Compensation and Postretirement Benefit Aspects of Collateral Assignment Split-Dollar Life Insurance Arrangements

In March 2007, the Emerging Issues Task Force (EITF) reached a final consensus on Issue No. 06-10 (EITF 06-10), *Accounting for Deferred Compensation and Postretirement Benefit Aspects of Collateral Assignment Split-Dollar Life Insurance Arrangements*. EITF 06-10 requires employers to recognize a liability for the post-retirement benefit related to collateral assignment split-dollar life insurance arrangements in accordance with SFAS No. 106 or APB Opinion No. 12. EITF 06-10 also requires employers to recognize and measure an asset based on the nature and substance of the collateral assignment split-dollar life insurance arrangement. The provisions of EITF 06-10 are

effective for the Company on January 1, 2008, with earlier application permitted, and are to be applied as a change in accounting principle either through a cumulative-effect adjustment to retained earnings or other components of equity or net assets in the statement of financial position as of the beginning of the year of adoption; or as a change in accounting principle through retrospective application to all prior periods. The Company does not expect adoption of EITF 06-10 to have a significant impact on its consolidated financial statements, results of operations or liquidity.

Note 8. Stock Repurchase

On October 18, 2006, the Board of Directors of the Company approved the adoption of a program to effect repurchases of the Company's common stock. The program allowed for repurchase of up to approximately \$1,000,000 of the Company's outstanding shares of common stock under the program for a period beginning on October 23, 2006 and ending June 30, 2007.

On April 18, 2007, the Board of Directors approved an additional stock repurchase of up to approximately \$2,000,000 of the Company's outstanding shares of common stock for a period beginning on April 18, 2007 and ending October 18, 2007.

As of June 30, 2007, the Company had repurchased 164,100 shares in open market transactions through brokers, at an average price of \$14.98 for a total cost of \$2,461,000.

Note 9. Subsequent Event

On July 19, 2007, the Company's Board of Directors declared a \$0.10 per share cash dividend for shareholders of record as of August 8, 2007, payable on August 24, 2007.

ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Certain matters discussed in this report constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. All statements contained herein that are not historical facts, such as statements regarding the Company's current business strategy and the Company's plans for future development and operations, are based upon current expectations. These statements are forward-looking in nature and involve a number of risks and uncertainties. Such risks and uncertainties include, but are not limited to (1) significant increases in competitive pressure in the banking industry; (2) the impact of changes in interest rates, a decline in economic conditions at the international, national or local level on the Company's results of operations, the Company's ability to continue its internal growth at historical rates, the Company's ability to maintain its net interest margin, and the quality of the Company's earning assets; (3) changes in the regulatory environment; (4) fluctuations in the real estate market; (5) changes in business conditions and inflation; (6) changes in securities markets; and (7) risks associated with acquisitions, relating to difficulty in integrating combined operations and related negative impact on earnings, and incurrence of substantial expenses. Therefore, the information set forth in such forward-looking statements should be carefully considered when evaluating the business prospects of the Company.

When the Company uses in this Quarterly Report on Form 10-Q the words "anticipate," "estimate," "expect," "project," "intend," "commit," "believe" and similar expressions, the Company intends to identify forward-looking statements. Such statements are not guarantees of performance and are subject to certain risks, uncertainties and assumptions, including those described in this Quarterly Report on Form 10-Q. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those anticipated, estimated, expected, projected, intended, committed or believed. The future results and shareholder values of the Company may differ materially from those expressed in these forward-looking statements. Many of the factors that will determine these results and values are beyond the Company's ability to control or predict. For those statements, the Company claims the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

On January 1, 2007, the Company adopted Financial Accounting Standards Interpretation No. 48 (FIN 48), *Accounting for Uncertainty in Income Taxes*. FIN 48 clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with FASB Statement No. 109, *Accounting for Income Taxes*. FIN 48 prescribes a recognition threshold and measurement attributable for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides

guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosures and transitions. See Note 6 to the unaudited condensed consolidated financial statements for further information related to implementation of FIN 48.

There have been no other changes to the Company's critical accounting policies from those discussed in the Company's 2006 Annual Report to Shareholders' on Form 10-K.

This discussion should be read in conjunction with our unaudited condensed consolidated financial statements, including the notes thereto, appearing elsewhere in this report.

OVERVIEW

Second Quarter 2007

In the second quarter of 2007, our consolidated net income was \$1,619,000 compared to net income of \$1,669,000 for the same period in 2006. Diluted EPS was \$0.25 for the second quarter 2007 compared to \$0.26 for the second quarter 2006. The slight decrease in net income was the result of an increase in average total loans of 10.2% offset by the increase in average total interest bearing deposits of 4.5% along with increasing rates on interest bearing deposits outpacing the increases on earning assets resulting in a decrease in net interest margin of 15 basis points for the second quarter of 2007 compared to the same period in 2006.

Annualized return on average equity for the second quarter of 2006 was 12.67% compared to 15.18% for the same period in 2006. Total average equity was \$51,079,000 for the second quarter 2007 compared to \$43,968,000 for the second quarter 2006. Equity increased primarily as a result of the net income included in retained earnings and proceeds from exercise of stock options offset by the repurchase of shares of the Company's common stock.

First Six Months of 2007

For the six months ended June 30, 2007, the Company's consolidated net income was \$3,071,000 compared to \$3,099,000 for same period in 2006. Diluted EPS was \$0.48 for both periods.

Annualized return on average equity for the six months ended June 30, 2007 was 12.11% compared to 13.64% for the same period in 2006. Annualized return on average assets for the six months ended June 30, 2007 was 1.29% compared to 1.33% for the same period in 2006. Total average equity was \$50,695,000 for the six months ended June 30, 2007 compared to \$43,327,000 for the same period in 2006. Equity increased primarily as a result of the net income and proceeds from exercise of stock options offset by the repurchase of shares of the Company's common stock.

In comparing the first half of 2007 to the first half of 2006, total loans continued to increase. Average total loans increased \$26,249,000 or 8.8% in the first six months of 2007 compared to the six months ended June 30, 2006 while average interest bearing liabilities were fairly consistent over the same period. While yields increased on earning assets, the rates paid on interest bearing liabilities increased at a faster rate. As a result net interest margin declined slightly by 11 basis points from June 30, 2006 to June 30, 2007. Asset quality continues to be strong. The Bank had three non-accrual loans totaling \$86,000 at June 30, 2007, compared to one loan at June 30, 2006 of \$29,000, and had no other real estate owned at June 30, 2007 or 2006.

Central Valley Community Bancorp (Company)

We are a central California-based bank holding company for a one-bank subsidiary, Central Valley Community Bank (Bank). We provide traditional commercial banking services to small and medium-sized businesses and individuals in the communities along the Highway 99 corridor in the Fresno and Madera Counties of central California. Additionally, we have a private banking office in Sacramento County and a loan production office in Stanislaus County. As a bank holding company, the Company is subject to supervision, examination and regulation by the Federal Reserve Bank.

At June 30, 2007, we had total loans of \$339,365,000, total assets of \$489,516,000, total deposits of \$421,907,000, and shareholders' equity of \$50,921,000.

Central Valley Community Bank (Bank)

The Bank commenced operations in January 1980 as a state-chartered bank. As a state-chartered bank, the Bank is subject to primary supervision, examination and regulation by the Department of Financial Institutions. The Bank's deposits are insured by the Federal Deposit Insurance Corporation up to the applicable limits thereof, and the Bank is subject to supervision, examination and regulations of the FDIC.

The Bank operates 12 branches which serve the communities of Fresno, Clovis, Kerman, Prather, Oakhurst, Madera, and Sacramento; and a loan production office which serves the Modesto community. Additionally the Bank operates Real Estate, Agribusiness and SBA departments that originate loans in California. According to the June 30, 2006 FDIC data, the Bank's seven branches in Fresno County (Clovis, Fresno, Kerman, and Prather) had a 3.9% combined deposit market share of all depositories including credit unions, thrifts, and savings banks.

The Bank anticipates additional branch openings in the future to meet the growing service needs of its customers. The branch expansions provide the Company with opportunities to expand its loan and deposit base. During 2006 we opened three new branch offices and in 2007 opened a new loan production office. Management expects that new offices will initially have a negative impact on earnings until the volume of business grows to cover fixed overhead expenses.

Key Factors in Evaluating Financial Condition and Operating Performance

As a publicly traded community bank holding company, we focus on several key factors including:

- Return to our stockholders;

- Return on average assets;
- Return on average assets;
- Asset quality;
- Asset growth; and
- Operating efficiency.

Return to Our Stockholders

Our return to our stockholders is measured in the form of return on average equity (ROE). Our annualized ROE was 12.11% for the six months ended June 30, 2007 compared to 15.17% for the year ended December 31, 2006 and 13.64% for the six months ended June 30, 2006. Our net income for the six months ended June 30, 2007 decreased \$28,000 or 0.9% to \$3,071,000 compared to \$3,099,000 for the six months ended June 30, 2006. Net income remained relatively flat due to increases in net interest income, non-interest income, and a decrease in the provision for credit losses, offset by an increase in non-interest expenses. Diluted EPS was \$0.48 for both of the six months ended June 30, 2007 and 2006.

Return on Average Assets

Our return on average assets (ROA) is a measure we use to compare our performance with other banks and bank holding companies. Our annualized ROA for the six months ended June 30, 2007 was 1.29% compared to 1.47% for the year ended December 31, 2006 and 1.33% for the six months ended June 30, 2006. The decrease in ROA compared to December 2006 is due to the decrease in net income relative to our increase in average assets. Average assets for the six months ended June 30, 2007 were \$477,140,000 compared to \$470,221,000 for the year ended December 31, 2006. ROA for our peer group was 1.24% at March 31, 2007. Peer group from SNL Financial data includes holding companies in central California with assets from \$300 million to \$1 billion.

Development of Core Earnings

Over the past several years, we have focused on not only improving net income, but improving the consistency of our revenue streams in order to create more predictable future earnings and reduce the effect of changes in our operating environment on our net income. Specifically, we have focused on net interest income through a variety of processes, including increases in average interest earning assets as a result of loan generation and retention, and minimizing the effects of the recent inverted interest rate yield curve on our net interest margin by focusing on core deposits and managing the cost of funds. The Company's net interest margin (fully tax equivalent basis) was 5.68% for the first half of 2007, compared to 5.79% for the same period in 2006. The decrease in net interest margin is principally due to an increase in the Company's cost of funds which was not fully offset by the increase in yields on earning assets. In comparing the two periods, the effective yield on total earning assets increased 38 basis points while the cost of total interest bearing liabilities increased 81 basis points and the cost of total deposits increased 56 basis points. The Company's total cost of deposits for the six months ended June 30, 2007 was 1.86% compared to 1.30% for the same period in 2006. The Company has less exposure than many of its competitors to such interest expense increases, as 32.5% of its average deposits are non-interest bearing. Net interest income for the first half of 2007 was \$12,098,000 compared to \$12,010,000 for the same period in 2006.

Our non-interest income is generally made up of service charges and fees on deposit accounts, fee income from loan placements and other services, and gains from sales of investment securities. Non-interest income for the first six months of 2007 increased \$72,000 or 3.3% to \$2,275,000 compared to \$2,203,000 for the six months ended June 30, 2006 mainly due to increases in service charge income and other income, partially offset by decreases in loan placement fees and gains from sales of investment securities. Further detail of non-interest income is provided below.

Asset Quality

For all banks and bank holding companies, asset quality has a significant impact on the overall financial condition and results of operations. Asset quality is measured in terms of percentage of total loans and total assets, and is a key element in estimating the future earnings of a company. The Company had three non-performing loans totaling \$86,000 as of June 30, 2007, none at December 31, 2006, and one non-performing loan of \$29,000 as of June 30, 2006. Management maintains certain loans that have been brought current by the borrower (less than 30 days delinquent) on non-accrual status until such time as management has determined that the loans are likely to remain current in future periods. The Company did not have any other real estate owned at June 30, 2007, December 31, 2006, or June 30, 2006.

Asset Growth

As revenues from both net interest income and non-interest income are a function of asset size, the continued growth in assets has a direct impact in increasing net income and therefore ROE and ROA. The majority of our assets are loans and investment securities, and the majority of our liabilities are deposits, and therefore the ability to generate deposits as a funding source for loans and investments is fundamental to our asset growth.

The influence of our agricultural portfolio, particularly for raisins and nuts, is reflected in the differences in loan and deposit volumes from December 31, 2006 to June 30, 2007. Generally, agricultural processors sell the crops harvested in the fourth quarter of each year and hold the funds to be disbursed to the farmers until the first quarter of the following year creating a temporary increase in deposits. In the first quarter of each year, the farmers then pay down their agricultural loans with their crop proceeds. This trend is reflected in the first half of 2007 total assets, loan and deposit numbers. Total assets decreased 2.1% during the first six months of 2007 from \$500,059,000 as of December 31, 2006 to \$489,516,000 as of June 30, 2007. Total gross loans increased 5.2% to \$339,365,000 as of June 30, 2007 compared to \$322,662,000 as of December 31, 2006. Total deposits decreased 4.2% to \$421,907,000 as of June 30, 2007 compared to \$440,627,000 as of December 31, 2006. We continue to under perform in our loan to deposit ratio compared to our peers. Our loan to deposit ratio at June 30, 2007 increased to 80.4% compared to 73.2% at December 31, 2006. The loan to deposit ratio of our peers was 89.2% at March 31, 2007. Further discussion of loans and deposits is below.

Operating Efficiency

Operating efficiency is the measure of how efficiently earnings before taxes are generated as a percentage of revenue. The Company's efficiency ratio (operating expenses, excluding amortization of intangibles, divided by net interest income plus non-interest income, excluding gains from sales of securities) was 65.3% for the first six months of 2007 compared to 61.9% for the six months ended June 30, 2006. The deterioration in the efficiency ratio is due to the increase in operating expenses exceeding the increase in revenues, primarily due to the opening of three new branches during 2006. The Company's net interest income before provision for credit losses plus non-interest income increased 1.1% to \$14,373,000 for the six months ended June 30, 2007 compared to \$14,213,000 for the same period in 2006, while operating expenses increased 7.0% to \$9,461,000 from \$8,843,000 for the same period in 2006.

RESULTS OF OPERATIONS

Net Income for the First Six Months of 2007 Compared to the Six months ended June 30, 2006:

Net income decreased to \$3,071,000 for the six months ended June 30, 2007 compared to \$3,099,000 for the six months ended June 30, 2006. Basic earnings per share were \$0.51 and \$0.52 for the six months ended June 30, 2007 and 2006, respectively. Diluted earnings per share were \$0.48 for the six months ended June 30, 2007 and 2006. Annualized ROE was 12.11% for the six months ended June 30, 2007 compared to 13.64% for the six months ended June 30, 2006. Annualized ROA for the six months ended June 30, 2007 was 1.29% compared to 1.33% for the six months ended June 30, 2006.

Net income and profitability for the six months ended June 30, 2007 compared to the same period in the prior year remained relatively unchanged due mainly to the increases in net interest income and non-interest income, offset by increases in non-interest expenses. Net interest income after provision for credit losses increased due to a decrease in the provision for credit losses, an increase in average interest earning assets provided by our organic growth, and our ability to attract non-interest bearing deposits offset by an increase in the level of and rates paid on interest bearing liabilities. Non-interest expenses increased primarily due to salaries and benefits and occupancy and equipment expenses. Further discussion of salary and occupancy expenses is below.

Interest Income and Expense

Net interest income is the most significant component of our income from operations. Net interest income (the "interest rate spread") is the difference between the gross interest and fees earned on the loan and investment portfolio and the interest paid on deposits and other borrowings. Net interest income depends on the volume of and interest rate earned on interest earning assets and the volume of and interest rate paid on interest bearing liabilities.

The following table sets forth a summary of average balances with corresponding interest income and interest expense as well as average yield and cost information for the periods presented. Average balances are derived from daily balances, and non-accrual loans are not included as interest earning assets for purposes of this table.

earned on average earning assets	16,380	7.51%	15,206	7.13%
Interest expense and interest cost related to average interest-bearing liabilities	3,999	2.80%	2,864	1.99%
Net interest income and net interest margin				
(4)	\$ 12,381	5.68%	\$ 12,342	5.79%

(1) Calculated on a fully tax equivalent basis, which includes Federal tax benefits relating to income earned on municipal bonds totaling \$232 and \$292 in 2007 and 2006, respectively.

(2) Loan interest income includes loan fees of \$394 in 2007 and \$447 in 2006.

(3) Average loans do not include non-accrual loans.

(4) Net interest margin is computed by dividing net interest income by total average interest-earning assets.

Interest and fee income from loans increased 10.3% in the first six months of 2007 compared to the same period in 2006. The Company's continued focus on building relationships has resulted in an increase in loan volume which was the main reason for the \$1,263,000 increase. Average total loans for the first six months of 2007 increased 8.8% to \$325,541,000 compared to \$299,292,000 for the same period in 2006. Competition for loans is strong in the Central Valley of California. We have seen an increase in the number of regional and community banks opening branches and loan centers. This competition is often reflected in aggressive loan pricing. We are committed to providing our customers with the best price; however we are also committed to increasing our value to shareholders. We believe we were able to meet the challenge and reported an increase in the yield on loans of 10 basis points for the first six months of 2007 to 8.34% compared to 8.24% for the same period in 2006.

Interest income from total investments (total investments include investment securities, Federal funds sold, interest bearing deposits with other banks, and other securities) decreased \$40,000 in the first six months of 2007 compared to the same period in 2006, mainly due to the 13.4% decrease in average balances of total investment partially offset by the increased yields. Income from investments represents 20.8% of net interest income for the six months ended June 30, 2007.

In the first half of 2007, we sold certain municipal securities in order to provide liquidity for our loan growth. The result of the approximate \$5,655,000 liquidation was a net realized gain on sale of investments of \$44,000.

In an effort to increase yields, without accepting unreasonable risk, a significant portion of the investment portfolio is in high quality mortgage-backed securities (MBS) and collateralized mortgage obligations (CMOs). At June 30, 2007, we held \$36,160,000 or 40.4 % of the total market value of the investment portfolio in MBS and CMOs with an average yield of 5.6%. We understand the interest rate risks and prepayment risks associated with MBS and CMOs. In a declining interest rate environment, prepayments from MBS and CMOs could be expected to increase and the expected life of the investment could be expected to shorten. Conversely, if interest rates increase, prepayments could be expected to decline and the average life of the MBS and CMOs could be expected to extend. Additionally, changes in interest rates are reflected in the market value of the investment portfolio. During declining interest rates, the investment portfolio could be expected to have market value gains and in increasing rate environments, the market value could be expected to be negative. The change in market value, net of tax-effect, of the available-for-sale investment portfolio is also reflected in the Company's equity. At June 30, 2007, the average life of the investment portfolio was 3.9 years and the market value reflected a pre-tax unrealized loss of \$855,000. The Company reviewed its holdings in MBS and CMOs recently and none are invested in sub prime mortgage instruments.

A component of the Company's strategic plan has been to use its investment portfolio to offset, in part, its interest rate risk relating to variable rate loans. At June 30, 2007, an immediate rate increase of 200 basis points would result in an estimated decrease in the market value of the investment portfolio by approximately \$5,333,000. Conversely, with an immediate rate decrease of 200 basis points, the estimated increase in the market value of the investment portfolio is \$5,378,000. The modeling environment assumes management would take no action during an immediate shock of 200 basis points. The likelihood of immediate changes of 200 basis points is contrary to expectation, as evidenced by the changes in interest rates during the past 2 years which were in 25 basis point increments. However, the Company uses those increments to measure its interest rate risk in accordance with regulatory requirements and to measure the possible future risk in the investment portfolio. For further discussion of the Company's market risk, refer to Item 3 - Quantitative and Qualitative Disclosures about Market Risk.

Management's review of all investments before purchase includes an analysis of how the security will perform under several interest rate scenarios to monitor whether investments are consistent with our investment policy. The policy addresses issues of average life, duration, and concentration guidelines, prohibited investments, impairment, and prohibited practices.

Total interest income for the first six months of 2007 increased \$1,223,000, to \$16,097,000 compared to \$14,874,000 for the six months ended June 30, 2006. The increase was due to the 2.3% increase in the average balance of interest earning assets, combined with the 38 basis point increase in the yield on those assets. Average interest earning assets increased to \$436,320,000 for the six months ended June 30, 2007 compared to \$426,373,000 for the six months ended June 30, 2006. The yield on interest earning assets increased to 7.51% for the six months ended June 30, 2007 compared to 7.13% for the six months ended June 30, 2006. The \$9,947,000 increase in average earning assets can be attributed to our own organic growth in loans funded by Fed funds and by a decrease in the level of sales and maturities from the investment portfolio.

Interest expense on deposits for the six months ended June 30, 2007 increased \$1,218,000 or 45.7% to \$3,886,000 compared to \$2,668,000 for the six months ended June 30, 2006. This increase was due to an 85 basis point increase in deposit rates due to the repricing of deposits in the higher current interest rate environment, coupled with a \$2,619,000 increase in the volume of average interest bearing deposits. Average interest-bearing deposits were \$282,089,000 for the six months ended June 30, 2007 compared to \$279,470,000 for the same period ended June 30, 2006. The 0.9% increase was the result of organic growth in our market areas.

Average other borrowed funds decreased to \$3,867,000 with an effective rate of 5.84% for the six months ended June 30, 2007 compared to \$7,728,000 with an effective rate of 5.07% for the six months ended June 30, 2006. Included in other borrowings are advances from the Federal Home Loan Bank (FHLB) and a loan from a major bank, primarily to provide additional capital for the Bank in conjunction with the merger of Bank of Madera County in 2005. This bank loan matures in 2007, is indexed to prime rate or to the three-month LIBOR and reprices quarterly. The FHLB advances are fixed rate short-term borrowings.

In partial offset to the increase in the cost of interest bearing deposits and other borrowings, the increase in non-interest bearing demand deposits has contributed to keeping the Company's cost of funds low. The cost of total deposits was 1.86% for the first half of 2007 compared to 1.30% for the same period in 2006. Average demand deposits increased 3.6% to \$135,589,000 for the six months ended June 30, 2007 from \$130,872,000 for the six months ended June 30, 2006. The cost of all of our interest bearing liabilities increased 81 basis points to 2.80% for the six months ended June 30, 2007 compared to 1.99% for the six months ended June 30, 2006. Average transaction accounts (including interest bearing checking, money market accounts and non interest bearing demand deposits) decreased 0.8% to \$288,574,000 for the six months ended June 30, 2007 compared to \$290,986,000 for the six months ended June 30, 2006.

Net Interest Income before Provision for Credit Losses

Net interest income before provision for credit losses for the six months ended June 30, 2007 increased by \$88,000 or 0.7% to \$12,098,000 compared to \$12,010,000 for the six months ended June 30, 2006. This increase was primarily due to the 11 basis point decline in the net interest margin offset by an increase in average interest earning assets. Average interest earning assets were \$436,320,000 for the six months ended June 30, 2007 with a net interest margin of 5.68% compared to \$426,373,000 with a net interest margin of 5.79% for the six months ended June 30, 2006. For a discussion of the repricing of our assets and liabilities, see "Item 3 – Quantitative and Qualitative Disclosure about Market Risk."

Provision for Credit Losses

We provide for possible credit losses by a charge to operating income based upon the composition of the loan portfolio, past delinquency levels, losses and non-performing assets, economic and environmental conditions and other factors which, in management's judgment, deserve recognition in estimating credit losses. Loans are charged off when they are considered uncollectible or of such little value that continuance as an active earning bank asset is not warranted.

The establishment of an adequate credit allowance is based on both an accurate risk rating system and loan portfolio management tools. The Board has established initial responsibility for the accuracy of credit risk grades with the individual credit officer. The grading is then submitted to the Chief Credit Administrator (CCA), who reviews the grades for accuracy and makes recommendations to Credit Review who gives final approval. The risk grading and reserve allocations are analyzed annually by a third party credit reviewer and by various regulatory agencies.

Quarterly, the CCA sets the specific reserve for all adversely risk-graded credits. This process includes the utilization of loan delinquency reports, classified asset reports, and portfolio concentration reports to assist in accurately assessing credit risk and establishing appropriate reserves. Reserves are also allocated to credits that are not adversely graded. Historical loss experience within the portfolio along with peer bank loss experiences are used in determining the level of the reserves held.

The allowance for credit losses is reviewed at least quarterly by the Board's Audit/Compliance Committee and by the Board of Directors. Reserves are allocated to loan portfolio categories using percentages which are based on both historical risk elements such as delinquencies and losses and predictive risk elements such as economic, competitive and environmental factors. We have adopted the specific reserve approach to allocate reserves to each adversely graded asset, as well as to each impaired asset for the purpose of estimating potential loss exposure. Although the allowance for credit losses is allocated to various portfolio categories, it is general in nature and available for the loan portfolio in its entirety. Additions may be required based on the results of independent loan portfolio examinations, regulatory agency examinations, or our own internal review process. Additions are also required when, in management's judgment, the allowance does not properly reflect the portfolio's potential loss exposure.

The allocation of the allowance for credit losses is set forth below:

17

Loan Type (Dollars in Thousands)	June 30, 2007 Amount	Percent of Loans in Each Category to Total Loans	December 31, 2006 Amount	Percent of Loans in Each Category to Total Loans
Commercial & Industrial	\$ 1,292	0.0%	\$ 1,656	24.2%
Real Estate Secured	1,371	0.0%	1,210	46.3%
Real Estate - construction, land development and other land loans	285	0.0%	294	15.0%
Equity Lines of Credit	182	0.0%	171	6.8%
Agricultural Production	301	0.0%	227	5.3%
Consumer & Installment	220	0.0%	193	2.3%
Other	20	0.0%	1	0.1%
Non-specific reserve	72		57	
	\$ 3,743		\$ 3,809	

Managing credits identified through the risk evaluation methodology includes developing a business strategy with the customer to mitigate our potential losses. Management continues to monitor these credits with a view to identifying as early as possible when, and to what extent, additional provisions may be necessary.

Additions to the allowance for credit losses in the first six months of 2007 were \$240,000 compared to \$500,000 for the same period in 2006. The decrease in 2007 is due to our assessment of the required level and overall adequacy of the allowance for credit losses. During the six months ended June 30, 2007, the Company had net charge offs totaling \$306,000 compared \$414,000 for the same period in 2006.

The Company had three non-performing loans totaling \$86,000 as of June 30, 2007, none as of December 31, 2006, and \$29,000 as of June 30, 2006. Non-performing loans as a percentage of loans were 0.03% at June 30, 2007 compared to 0.01% at June 30, 2006. The Company did not have any other real estate owned at June 30, 2007, December 31, 2006 or June 30, 2006.

The net charge off ratio, which reflects net charge-offs to average loans for the six months ended June 30, 2007 was 0.09% compared to 0.14% for the same period in 2006. The historical ratios for the past three years were a net charge off ratio of 0.109% for 2006, 0.223% for 2005, and a net recovery ratio of 0.139% for 2004.

Based on information currently available, management believes that the allowance for credit losses is adequate to absorb estimated probable losses in the portfolio. However, no assurance can be given that we may not sustain charge-offs which are in excess of the allowance in any given period. Refer to "Allowance for Credit Losses" below for further information on the allowance for credit losses.

Non-Interest Income

Non-interest income is comprised of customer service charges, loan placement fees, gain on sales of investment securities, appreciation in cash surrender value of bank owned life insurance, Federal Home Loan Bank stock dividends, and other income. Non-interest income was \$2,275,000 for the six months ended June 30, 2007 compared to \$2,203,000 for the same period ended June 30, 2006. The \$72,000 increase in non-interest was primarily due to increases in customer service charges and other income partially offset by decreases in loan placement fees and the

gain on sales of investment securities.

Customer service charges increased \$152,000 to \$1,357,000 for the first six months of 2007 compared to \$1,205,000 for the same period in 2006, mainly due to an increase in transaction account service charge income. These increases are mainly due to an increase in the activity level as the average number of transaction accounts has increased and the increase in fees generated by the overdraft protection program.

We earn loan placement fees from the brokerage of single-family residential mortgage loans which is mainly for the convenience of our customers. Loan placement fees decreased \$68,000 in the first six months of 2007 to \$128,000 compared to \$196,000 for the six months ended June 30, 2006. Normal home sales due to “moving up” or relocating have decreased in Fresno and Madera counties on a period over period basis, as has refinancing activity, which is the major component of our loan placement fees. Commissions paid for personnel involved in generating loan placement fees are reflected as commissions in salary expense.

Net realized gains on sales of investment securities were \$44,000 for the first six months of 2007 compared to \$109,000 for the same period in 2006. In the first half of 2007, we sold certain municipal securities in order to provide liquidity for our loan growth. The result of the approximate \$5,655,000 liquidation was a net realized gain on sale of investments of \$44,000.

Appreciation in cash surrender value of bank owned life insurance (BOLI) remained relatively unchanged comparing the first half of 2007 with the same period in 2006. The average balance in this portfolio decreased comparing the two periods while the yield increased. The Bank's salary continuation, deferred compensation plans and the related BOLI are used as a retention tool for directors and key executives of the Bank.

The Bank holds stock from the Federal Home Loan Bank in relationship with the borrowing capacity and generally earns quarterly dividends. We currently hold \$1,971,000 in FHLB stock. Dividends in the first six months of 2007 increased \$11,000 compared to the same period in 2006.

Other income increased \$52,000 for the first six months of 2007 compared to the same period in 2006. The increase can be attributed primarily to an increase in merchant fees from bankcards.

Non-Interest Expenses

Salaries and employee benefits, occupancy, professional services, and data processing are the major categories of non-interest expenses. Non-interest expenses increased \$618,000 to \$9,461,000 for the six months ended June 30, 2007 compared to \$8,843,000 for the six months ended June 30, 2006.

The Company's efficiency ratio, measured as the percentage of non-interest expenses (exclusive of amortization of core deposit intangible assets) to net interest income before provision for credit losses plus non-interest income, was 65.3% for the first six months of 2007 compared to 61.9% for the six months ended June 30, 2006. The primary drivers for this change were increases in salaries and benefits expenses and occupancy expenses partially offset by the increased non-interest income.

Salaries and employee benefits increased \$171,000 or 3.3 % to \$5,372,000 for the first six months of 2007 compared to \$5,201,000 for the six months ended June 30, 2006. The increase in salaries and employee benefits for the 2007 period can be attributed to normal cost increases for salaries and benefits and an increase in the number of employees primarily from the new employees for our Downtown Fresno and Sunnyside branches in 2006. Commissions paid for loan placements are also in this category and decreased \$27,000 in the periods under review.

Occupancy and equipment expense increased \$170,000 to \$1,307,000 for the first six months of 2007 compared to \$1,137,000 for the six months ended June 30, 2007. The 14.9% increase in occupancy expense for the six months ended June 30, 2007 was due mainly to the opening of new branches in downtown Fresno and Sunnyside, the opening of our new loan production office in Modesto, our move to a new corporate headquarters and capitalized technology upgrades during 2006 and 2007.

Other non-interest expenses increased \$277,000 or 11.1% in the period under review. The following table shows significant components of other non-interest expense as a percentage of average assets.

For the six months ended June 30,	Other Expense 2007	Annualized % Avg. Assets	Other Expense 2006	Annualized % Avg. Assets
(Dollars in thousands)				
Advertising	\$ 252	0.11%	\$ 226	0.10%

Total other non-interest expense	\$ 2,782		\$ 2,505	

Provision for Income Taxes

The effective income tax rate was 34.3% for the six months ended June 30, 2007 compared to 36.4% for the six months ended June 30, 2006. Provision for income taxes totaled \$1,601,000 and \$1,771,000 for the six months ended June 30, 2007, and 2006, respectively. The decrease in the effective tax rate in the six months ended June 30, 2007 compared to the prior year comparable period is due primarily to an increase in the state tax deduction for loans made in designated enterprise zones in California.

Net Income for the Second Quarter of 2007 Compared to the Second Quarter of 2006:

Net income was \$1,619,000 for the second quarter ended June 30, 2007 compared to \$1,669,000 for the second quarter ended June 30, 2006. Basic earnings per share were \$0.27 and \$0.28 for the quarters ended June 30, 2007 and 2006, respectively. Diluted earnings per share were \$0.25 and \$0.26 for the quarters ended June 30, 2007 and 2006, respectively. Annualized ROE was 12.67% for the quarter ended June 30, 2007 compared to 15.18% for the quarter ended June 30, 2006. Annualized ROA for the three months ended June 30, 2007 was 1.35% compared to 1.45% for the quarter ended June 30, 2006.

The slight decrease in net income for the quarter ended June 30, 2007 compared to the same period in the prior year was mainly due to the increase in net interest income, offset by a decrease in non-interest income and an increase in non-interest expenses. Net interest income increased due to an increase in average interest earning assets provided by our organic growth, and our ability to attract non-interest bearing deposits, offset by an increase in the level of and rates paid on interest bearing liabilities. Non-interest expenses increased primarily due to salaries and benefits, occupancy expenses and other expenses.

Interest Income and Expense

The following table sets forth a summary of average balances with corresponding interest income and interest expense as well as average yield and cost information for the periods presented. Average balances are derived from daily balances, and non-accrual loans are not included as interest earning assets for purposes of this table.

Net interest income and net interest margin (4)	\$ 6,261	5.69%	\$ 6,200	5.84%

(1) Calculated on a fully tax equivalent basis, which includes Federal tax benefits relating to income earned on municipal bonds totaling \$108 and \$134 in 2007 and 2006, respectively.

(2) Loan interest income includes loan fees of \$221 in 2007 and \$185 in 2006.

(3) Average loans do not include non-accrual loans.

(4) Net interest margin is computed by dividing net interest income by total average interest-earning assets.

Interest and fee income from loans increased 10.8% in the second quarter of 2007 compared to the same period in 2006. Management believes its focus on building relationships, which resulted in an increase in loan volume, was the main driver of the \$685,000 increase. Average total loans for the second quarter of 2007 increased 10.2% to \$333,471,000 compared to \$302,584,000 for the same period in 2006. Competition for loans is strong in the Central Valley. We believe we were able to meet the challenge and reported an increase in the yield on loans of 4 basis points for the second quarter of 2007 to 8.40% compared to 8.36% for the same period in 2006.

Interest income from total investments (total investments include investment securities, Federal funds sold, interest bearing deposits with other banks, and other securities) decreased \$26,000 in the second quarter of 2007 compared to the same period in 2006, mainly due to a decrease in the average investment balance for the second quarter of 2007 compared to the same period in 2006 partially offset by the increased yields. The average balance of investments decreased \$15,366,000 or 12.8% to \$104,856,000 for the second quarter of 2007 from \$120,222,000 for the comparable 2006 period as sales and maturities in the investment portfolio were used to fund the growth in the loan portfolio. The yield on total investments for the quarter ended June 30, 2007 was 5.13% compared to 4.65% for the quarter ended June 30, 2006. Income from investments represents 20.2% of net interest income for the second quarter of 2007 compared to 20.9% for the same quarter in 2006.

Total interest income for the second quarter of 2007 increased \$659,000, to \$8,242,000 compared to \$7,583,000 for the quarter ended June 30, 2006. The increase was due to the 3.7% increase in the average balance of interest earning assets, combined with the 32 basis point increase in the yield on those assets. Average interest earning assets increased to \$440,213,000 for the quarter ended June 30, 2007 compared to \$424,389,000 for the quarter ended June 30, 2006. The yield on interest earning assets increased to 7.61% for the quarter ended June 30, 2007 compared to 7.29% for the quarter ended June 30, 2006. The \$15,824,000 increase in average earning assets can be attributed to our own organic growth.

Interest expense on deposits for the quarter ended June 30, 2007 increased \$657,000 or 46.7% to \$2,063,000 compared to \$1,406,000 for the quarter ended June 30, 2006. The cost of deposits, calculated by dividing annualized interest expense on interest bearing deposits by total deposits, increased 57 basis points to 1.96% for the quarter ended June 30, 2007 compared to 1.39% for the same period in 2006. This increase was due to the repricing of interest bearing deposits in the higher current interest rate environment. Additionally, average interest bearing deposits increased 4.7% or \$12,928,000 comparing the second quarter of 2007 to the same period in 2006. Average interest-bearing deposits were \$287,162,000 for the quarter ended June 30, 2007, with an effective rate paid of 2.87%, compared to \$274,234,000 for the same period in 2006, with an effective rate paid of 2.05%.

Average other borrowed funds decreased \$6,834,000 or 68.2% to \$3,190,000 with an effective rate of 6.14% for the quarter ended June 30, 2007 compared to \$10,024,000 with an effective rate of 5.27% for the quarter ended June 30, 2006. Included in other borrowings are advances from the Federal Home Loan Bank (FHLB) for liquidity and a loan from a major bank, primarily to provide additional capital for the Bank in conjunction with the merger of Bank of Madera County in 2005. This bank loan matures in 2007, is indexed to the prime rate or to the three-month LIBOR and reprices quarterly. The FHLB advances are fixed rate short-term borrowings.

The cost of all of our interest bearing liabilities increased 75 basis points to 2.91% for the quarter ended June 30, 2007 compared to 2.16% for the quarter ended June 30, 2006. The increase is due to the higher current interest rate environment as mentioned above. Offsetting the increase in the cost of interest bearing deposits and other borrowings, is the increase in non-interest bearing demand deposits which contributed to keeping the Company's cost of funds relatively low compared to its peers. Average demand deposits increased 4.1% to an average \$134,311,000 for the quarter ended June 30, 2007 from \$128,975,000 for the quarter ended June 30, 2006. Average transaction accounts (including interest bearing checking, money market accounts and non-interest bearing demand deposits) increased 12.4% to \$288,473,000 for the quarter ended June 30, 2007 compared to \$281,620,000 for the quarter ended June 30, 2006.

Net Interest Income before Provision for Credit Losses

Net interest income before provision for credit losses for the quarter ended June 30, 2007 increased \$85,000 or 1.4% to \$6,130,000 compared to \$6,045,000 for the quarter ended June 30, 2006. This increase was primarily due to the increase in average interest earning assets offset by the decrease in the net interest margin of 15 basis points and an increase in average interest-bearing liabilities. Average interest earning assets were \$440,213,000 for the quarter ended June 30, 2007 with a net interest margin of 5.69% compared to \$424,389,000 with a net interest margin of 5.84% for the quarter ended June 30, 2006. For a discussion of the repricing of our assets and liabilities, see "Item 3 - Quantitative and Qualitative Disclosure about Market Risk."

Provision for Credit Losses

Additions to the allowance for credit losses in the second quarter of 2007 were \$120,000 compared to \$100,000 for the second quarter of 2006. The increase in 2007 is principally due to the increase in the volume of outstanding loans and our assessment of the overall adequacy of the allowance for credit losses.

The Company had three non-performing loans totaling \$86,000 as of June 30, 2007 compared to one loan totaling \$29,000 as of June 30, 2006. The Company did not have any other real estate owned at June 30, 2007 or 2006.

The Company had \$58,000 net loan charge-offs for the second quarter of 2007 compared to net recoveries of \$130,000 for the same quarter in 2006. The net charge-off ratio, which reflects net charge-offs to average loans, was 0.017% for the quarter ended June 30, 2007 compared to a net recovery ratio of 0.004% for the quarter ended June 30, 2006. Refer to the allowance for credit losses section for further discussion of credit quality.

Non-Interest Income

Non-interest income is comprised primarily of customer service charges, loan placement fees and other service fees, net gains on sales of investments and assets, and other income. Non-interest income was \$1,116,000 for the quarter ended June 30, 2007 compared to \$1,146,000 for the same period ended June 30, 2006. The \$30,000 decrease in non-interest income comparing the quarter ended June 30, 2007 to the same period in 2006 was primarily due to increases in service charges and other income and a decrease in losses on sales of investment securities, offset by decreases in loan placement fees.

Customer service charges increased \$15,000 to \$665,000 for the second quarter of 2007 compared to \$650,000 for the same period in 2006 due primarily to an increase in analysis service charges on business checking accounts. Loan placement fees decreased \$82,000 to \$63,000 for the second quarter of 2007 compared to \$145,000 for the same period in 2006 due to a decrease in new residential mortgage loan refinancing. Other income increased \$27,000 to \$309,000 for the second quarter of 2007 compared to \$282,000 for the same period in 2006, primarily due to increases in merchant card fees.

Non-Interest Expenses

Salaries and employee benefits, occupancy, professional services, and data processing are the major categories of non-interest expenses. Non-interest expenses increased \$310,000 to \$4,756,000 for the quarter ended June 30, 2007 compared to \$4,446,000 for the same period in June 30, 2006.

The Company's efficiency ratio, measured as the percentage of non-interest expenses (exclusive of amortization of core deposit intangible assets) to net interest income before provision for credit losses plus non-interest income (excluding net gains from sales of securities and assets), was 65.3% for the second quarter of 2007 compared to 61.9% for the second quarter of 2006.

Salaries and employee benefits increased \$40,000 or 1.5% to \$2,664,000 for the second quarter of 2007 compared to \$2,624,000 for the second quarter of 2006. The increase in salaries and employee benefits for the second quarter of 2007 can be attributed to an increase in the number of employees and normal cost increases for salaries and benefits, the new employees for new branch offices in downtown Fresno and the Sunnyside area of Fresno, incentive based compensation due to increased loan production profitability, and stock based compensation expense.

Occupancy and equipment expense increased \$75,000 to \$657,000 for the second quarter of 2007 compared to \$582,000 for the second quarter of 2006. The 12.9% increase in occupancy expense for the quarter ended June 30, 2007 was due mainly to normal increases in rent on existing leaseholds, and other occupancy and equipment related expenses mainly associated with opening new branches in downtown Fresno and Sunnyside area, new corporate headquarters, relocation of our Kerman office into a larger facility, and the opening of our new Modesto loan production office.

Other non-interest expenses increased \$195,000 or 15.7% in the period under review. The increase is mainly due to incremental expenses associated with the above facility expansion.

Provision for Income Taxes

The effective income tax rate was 31.7% for the second quarter of 2007 compared to 36.9% for the same period in 2006. Provision for income taxes totaled \$751,000 and \$976,000 for the quarter ended June 30, 2007, and 2006, respectively. The decrease in the effective tax rate in the three months ended June 30, 2007 compared to the prior year comparable period is due primarily to an increase in the state tax deduction for loans made in designated enterprise zones in California.

FINANCIAL CONDITION

Summary of Changes in Consolidated Balance Sheets

June 30, 2007 compared to December 31, 2006

As of June 30, 2007, total assets were \$489,516,000, a decrease of 2.1%, or \$10,543,000, compared to \$500,059,000 as of December 31, 2006. Total gross loans increased 5.2% or \$16,703,000, to \$339,365,000 as of June 30, 2007 compared to \$322,662,000 as of December 31, 2006. Total deposits decreased 4.2% or, \$18,720,000 to \$421,907,000 as of June 30, 2007 compared to \$440,627,000 as of December 31, 2006. Stockholders' equity increased to \$50,921,000 as of June 30, 2007 compared to \$49,778,000 as of December 31, 2006.

Investments

Our investment portfolio consists primarily of agency securities, mortgage backed securities, municipal securities, and overnight investments in the Federal Funds market and are all classified as available-for-sale. As of June 30, 2007, \$30,159,000 was held as collateral for public funds, treasury, tax, and for other purposes. Our investment policies are established by the Board of Directors and implemented by our Investment/Asset Liability Committee. It is designed primarily to provide and maintain liquidity, to enable us to meet our pledging requirements for public money and borrowing arrangements, to generate a favorable return on investments without incurring undue interest rate and credit risk, and to complement our lending activities.

The level of our investment securities, as described in the table below, is generally considered higher than our peers due mostly to our relatively low loan to deposit ratio. The amortized cost of these investment securities decreased 13.1% from \$104,117,000 at December 31, 2006 to \$90,446,000 at June 30, 2007. The fair value of the portfolio reflected an unrealized loss of \$855,000 at June 30, 2007 compared to an unrealized loss of \$195,000 at December 31, 2006.

We held \$1,971,000 in Federal Home Loan Bank stock as of June 30, 2007 compared to \$1,891,000 as of December 31, 2006. The increase is the result of additional stock purchases and stock dividends received.

The following table sets forth the carrying values and estimated fair values of our investment securities portfolio at the dates indicated:

June 30, 2007 Investment Type	Amortized Cost	Gross Unrealized Gain	Gross Unrealized (Loss)	Estimated Market Value
U.S. Government agencies	\$ 26,460	\$ 46	\$ (280)	\$ 26,226
Obligations of states and political subdivisions	23,886	99	(465)	23,520
U.S. Government agencies collateralized by mortgage obligations	36,340	115	(295)	36,160
Other securities	3,760	-	(75)	3,685
	\$ 90,446	\$ 260	\$ (1,115)	\$ 89,591

December 31, 2006 Investment Type	Amortized Cost	Gross Unrealized Gain	Gross Unrealized (Loss)	Estimated Market Value
U.S. Government agencies	\$ 28,643	\$ 34	\$ (358)	\$ 28,319
Obligations of states and political subdivisions	26,210	373	(168)	26,415
U.S. Government agencies collateralized by mortgage obligations	45,561	204	(237)	45,528
Other securities	3,703	-	(43)	3,660
	\$ 104,117	\$ 611	\$ (806)	\$ 103,922

Management periodically evaluates each investment security for other than temporary impairment, relying primarily on industry analyst reports, observation of market conditions and interest rate fluctuations. Management has the ability and intent to hold securities with established maturity dates until recovery of fair value, which may be maturity, and believes it will be able to collect all amounts due according to the contractual terms for all of the underlying investment securities; therefore, management does not consider these investments to be

other-than-temporarily-impaired.

Loans

Total gross loans increased 5.2% or \$16,703,000, to \$339,365,000 as of June 30, 2007 compared to \$322,662,000 as of December 31, 2006. The following table sets forth information concerning the composition of our loan portfolio at the dates indicated:

24

Loan Type (Dollars in thousands)	June 30, 2007	% of Total loans	December 31, 2006	% of Total loans
Commercial & industrial	\$ 75,710	22.3%	\$ 78,441	24.2%
Real estate	140,091	41.2%	128,790	39.8%
Real estate - construction, land development and other land loans	53,200	15.6%	48,424	15.0%
Secured by Farmland	26,193	7.7%	20,796	6.5%
Equity lines of credit	21,649	6.4%	21,858	6.8%
Agricultural Production	15,102	4.4%	17,102	5.3%
Consumer and installment	7,832	2.3%	7,549	2.3%
Other	271	0.1%	454	0.1%
	340,048	100.0%	323,414	100.0%
Deferred loan fees, net	(683)		(752)	
Allowance for credit losses	(3,743)		(3,809)	
Total loans	\$ 335,622		\$ 318,853	

As of June 30, 2007, a concentration of loans existed in loans collateralized by real estate (real estate, real estate construction, land development and other land loans, and equity lines of credit) comprising 70.9% of total loans. This level of concentration is consistent with 68.0% at December 31, 2006. Although management believes the loans within this concentration have no more than the normal risk of collectibility, a substantial decline in the performance of the economy in general or a decline in real estate values in the our primary market areas, in particular, could have an adverse impact on collectibility, increase the level of real estate-related non-performing loans, or have other adverse effects which alone or in the aggregate could have a material adverse effect on our business, financial condition, results of operations and cash flows. The Company is not involved in any sub-prime mortgage lending activities and the loan portfolio does not include any sub prime mortgage loans at June 30, 2007 or December 31, 2006.

We believe that our commercial real estate loan underwriting policies and practices result in prudent extensions of credit, but recognize that our lending activities result in relatively high reported commercial real estate lending levels. Commercial real estate loans include certain loans which represent low to moderate risk and certain loans with higher risks.

The Board of Directors reviews and approves concentration limits and exceptions to limitations of concentration are reported to the Board of Directors at least quarterly.

Non-performing assets. Non-performing assets consist of non-performing loans, other real estate owned (“OREO”), and repossessed assets. Non-performing loans are those loans which have (i) been placed on non-accrual status, (ii) been subject to troubled debt restructurings, (iii) been classified as doubtful under our asset classification system, or (iv) become contractually past due 90 days or more with respect to principal or interest and have not been restructured or otherwise placed on non-accrual status. A loan is classified as non-accrual when 1) it is maintained on a cash basis because of deterioration in the financial condition of the borrower, 2) payment in full of principal or interest under the original contractual terms is not expected, or 3) principal or interest has been in default for a period of 90 days or more unless the asset is both well secured and in the process of collection.

At June 30, 2007 and December 31, 2006, we had no OREO, repossessed assets or restructured loans. At June 30, 2007 we had three non-accrual loans totaling \$86,000 compared to no non-accrual loans at December 31, 2006. At June 30, 2007, we estimated the potential for any losses from these credits would have a minimal impact on the allowance for credit losses. Management can give no assurance that non-accrual and other non-performing loans will

not increase in the future.

A summary of non-accrual, restructured, and past due loans at June 30, 2007 and December 31, 2006 is set forth below. The Company had no restructured loans and no accruing loans past due more than 90 days at June 30, 2007 and December 31, 2006. Management can give no assurance that non-accrual and other non-performing loans will not increase in the future.

Composition of Non-accrual, Past Due and Restructured Loans

(Dollars in Thousands)	June 30, 2007	December 31, 2006
Non-accrual Loans		
Real Estate	-	-
Commercial and Industrial	\$ 86	-
Total non-accrual	86	-
Accruing loans past due 90 days or more	-	-
Restructured loans	-	-
Total non-performing loans	\$ 86	\$ -
Nonperforming loans to total loans	0.03%	0.00%
Ratio of non-performing loans to allowance for credit losses	2.30%	0.00%
Loans considered to be impaired	-	\$ -
Related allowance for credit losses on impaired loans	-	-

We measure our impaired loans by using the fair value of the collateral if the loan is collateral-dependent and the present value of the expected future cash flows discounted at the loan's effective interest rate if the loan is not collateral-dependent. As of June 30, 2007, there were three non-accrual loans totaling \$86,000 that were considered impaired but did not require any valuation allowance. We place loans on non-accrual status that are delinquent 90 days or more or when a reasonable doubt exists as to the collectibility of interest and principal. Management maintains certain loans that have been brought current by the borrower (less than 30 days delinquent) on non-accrual status until such time as management has determined that the loans are likely to remain current in future periods.

Classified Assets. From time to time, management has reason to believe that certain borrowers may not be able to repay their loans within the parameters of the present repayment terms, even though, in some cases, the loans are current at the time. These loans are graded in the classified loan grades of "substandard," "doubtful," or "loss" and include non-performing loans. Each classified loan is monitored monthly.

Allowance for Credit Losses. We have established a methodology for the determination of provisions for credit losses. The methodology is set forth in a formal policy and takes into consideration the need for an overall allowance for credit losses as well as specific allowances that are tied to individual loans. Our methodology for assessing the appropriateness of the allowance consists of several key elements, which include the formula allowance and a specific allowance for identified problem loans.

In originating loans, we recognize that losses will be experienced and that the risk of loss will vary with, among other things, the type of loan being made, the creditworthiness of the borrower over the term of the loan, general economic conditions and, in the case of a secured loan, the quality of the collateral securing the loan. The allowance is increased by provisions charged against earnings and reduced by net loan charge offs. Loans are charged off when they are deemed to be uncollectible, or partially charged off when portions of a loan are deemed to be uncollectible. Recoveries are generally recorded only when cash payments are received.

The allowance for credit losses is maintained to cover losses inherent in the loan portfolio. The responsibility for the review of our assets and the determination of the adequacy lies with management and our Directors' Audit Committee. They delegate the authority to the CCA to determine the loss reserve ratio for each type of asset and reviews, at least quarterly, the adequacy of the allowance based on an evaluation of the portfolio, past experience, prevailing market conditions, amount of government guarantees, concentration in loan types and other relevant factors.

The allowance for credit losses is an estimate of the losses that may be sustained in our loan and lease portfolio. The allowance is based on two principles of accounting: (1) Statement of Financial Accounting Standards (SFAS) No. 5, "Accounting for Contingencies," which requires that losses be accrued when they are probable of occurring and estimable; and (2) SFAS No. 114, "Accounting by Creditors for Impairment of a Loan" and SFAS No. 118, "Accounting by Creditors for Impairment of a Loan—Income Recognition and Disclosures," which requires that losses be accrued based on the differences between the value of collateral, present value of future cash flows or values that are observable in the secondary market and the loan balance.

Credit Administration adheres to an internal asset review system and loss allowance methodology designed to provide for timely recognition of problem assets and adequate valuation allowances to cover expected asset losses. The Bank's asset monitoring process includes the use of asset classifications to segregate the assets, largely loans and real estate, into various risk categories. The Bank uses the various asset classifications as a means of measuring risk and determining the adequacy of valuation allowances by using a nine-grade system to classify assets. All credit facilities exceeding 90 days of delinquency require classification.

The following table sets forth information regarding our allowance for credit losses at the dates and for the periods indicated:

26

(In thousands)	For the Six Month Period Ended June 30, 2007	For the Twelve Month Period Ended December 31, 2006
Balance, beginning of the year	\$ 3,809	\$ 3,339
Provision charged to operations	240	800
Losses charged to allowance	(347)	(721)
Recoveries	41	391
Balance, end of period	\$ 3,743	\$ 3,809
Ratio of non-performing loans to allowance for credit losses	0.03%	0.0%
Allowance for credit losses to total loans	1.10%	1.18%

As of June 30, 2007 the balance in the allowance for credit losses was \$3,743,000 compared to \$3,809,000 as of December 31, 2006. The decrease was due to charge offs during the first half of 2007 being greater than the amount of the provision for credit losses. Charge offs totaled \$347,000 and consisted mainly of one commercial relationship. The balance of commitments to extend credit on undisbursed construction and other loans and letters of credit was \$142,613,000 as of June 30, 2007 compared to \$134,549,000 as of December 31, 2006. Risks and uncertainties exist in all lending transactions, and even though there have historically been no charge offs on construction and other loans that have not been fully disbursed, our management and Directors' Loan Committee have established reserve levels based on historical losses as well as economic uncertainties and other risks that exist as of each reporting period.

As of June 30, 2007 the allowance was 1.10% of total gross loans compared to 1.18% as of December 31, 2006. During the six months ended June 30, 2007, there were no major changes in loan concentrations that significantly affected the allowance for credit losses. There have been no significant changes in estimation methods during the periods presented. Assumptions regarding the collateral value of various under performing loans may affect the level and allocation of the allowance for credit losses in future periods. The allowance may also be affected by trends in the amount of charge offs experienced or expected trends within different loan portfolios. Non-performing loans totaled \$86,000 as of June 30, 2007, and there were no non-performing loans as of December 31, 2006. Management believes the allowance at June 30, 2007 is adequate based upon its ongoing analysis of the loan portfolio, historical loss trends and other factors. However, no assurance can be given that the Company may not sustain charge-offs which are in excess of the allowance in any given period.

Deposits and Borrowings

Total deposits decreased \$18,720,000 or 4.2% to \$421,907,000 as of June 30, 2007 compared to \$440,627,000 as of December 31, 2006. Interest bearing deposits decreased \$6,723,000 or 2.3% to \$283,722,000 as of June 30, 2007 compared to \$290,445,000 as of December 31, 2006. Non-interest bearing deposits decreased \$11,997,000 or 8.0% to \$138,185,000 as of June 30, 2007 compared to \$150,182,000 as of December 31, 2006. As previously discussed above, we had several agricultural processors who held crop funds, mainly for raisins and nuts, in the fourth quarter of 2006 which were then paid out to farmers in the first quarter of 2007.

By expanding our branching network we anticipate broadening our deposit gathering base. We opened additional branches during 2006 in downtown Fresno, in the Sunnyside area of Fresno, and on Financial Drive in Fresno, California. We also relocated our Kerman branch to a larger facility the first quarter of 2007 and plan to relocate our Clovis in-store branch to a larger stand alone facility in early 2008.

The composition of the deposits and average interest rates paid at June 30, 2007 and December 31, 2006 is summarized in the table below.

(Dollars in thousands)	June 30, 2007	Percent of Total Deposits	Effective Rate	December 31, 2006	Percent of Total Deposits	Effective Rate
NOW Accounts	\$ 51,228	12.1%	0.78%	\$ 56,177	12.8%	0.10%
MMA Accounts	98,353	23.3%	2.63%	109,069	24.7%	2.34%
Time Deposits	113,617	26.9%	4.29%	104,170	23.6%	3.65%
Savings Deposits	20,524	4.9%	0.49%	21,029	4.8%	0.45%
Total Interest-bearing	283,722	67.2%	2.76%	290,445	65.9%	2.20%
Non-interest bearing	138,185	32.8%		150,182	34.1%	
Total deposits	\$ 421,907	100.0%		\$ 440,627	100.0%	

Short-term borrowings totaled \$10,625,000 as of June 30, 2007 compared to \$3,250,000 as of December 31, 2006. Short-term borrowings at June 30, 2007, represent principal payments coming due in the next twelve months on the loan with a major bank (described below) and FHLB advances. We maintain a line of credit with the FHLB collateralized by government securities. Refer to Liquidity below for further discussion of FHLB advances.

The Company has a non-revolving loan agreement with a major bank under which it initially borrowed \$2,500,000 and which had \$625,000 in outstanding principal balance at June 30, 2007. The loan matures on December 31, 2007, bears interest indexed to the prime rate or LIBOR, at the Company's election and reprices each quarter.

Capital

Our stockholders' equity increased to \$50,921,000 as of June 30, 2007 compared to \$49,778,000 as of December 31, 2006. The increase in stockholders' equity is a result of net income of \$3,071,000 for the six months ended June 30, 2007 combined with the proceeds from the exercise of stock options, offset by the change in the unrealized losses on the available for sale investment securities, and the repurchase of our common stock. During the six months ended June 30, 2007, the Company repurchased 137,900 shares of its common stock for \$2,066,000 in open market trading with \$536,000 remaining to repurchase shares as authorized by the Company's Board of Directors.

During the period the Company's borrowing with a major bank, described above, remains outstanding, which is expected to be through December 2007, the Bank does not anticipate paying dividends to the Company except for dividends that are necessary to meet the ordinary and usual operating expenses of the Company provided that the Bank would not pay any dividend that would cause it to be deemed not "well capitalized" under applicable banking laws and regulations.

Management considers capital requirements as part of its strategic planning process. The strategic plan calls for continuing increases in assets and liabilities, and the capital required may therefore be in excess of retained earnings. The ability to obtain capital is dependent upon the capital markets as well as our performance. Management regularly evaluates sources of capital and the timing required to meet its strategic objectives

The following table presents the Company's and the Bank's capital ratios as of June 30, 2007 and December 31, 2006.

(Dollars in thousands)	June 30, 2007		December 31, 2006	
	Amount	Ratio	Amount	Ratio

Liquidity

Liquidity management involves our ability to meet cash flow requirements arising from fluctuations in deposit levels and demands of daily operations, which include funding of securities purchases, providing for customers' credit needs and ongoing repayment of borrowings. Our liquidity is actively managed on a daily basis and reviewed periodically by our management and Director's Asset/Liability Committees. This process is intended to ensure the maintenance of sufficient funds to meet our needs, including adequate cash flow for off-balance sheet commitments.

Our primary sources of liquidity are derived from financing activities which include the acceptance of customer and, to a lesser extent, broker deposits, federal funds facilities and advances from the Federal Home Loan Bank of San Francisco. These funding sources are augmented by payments of principal and interest on loans, the routine maturities and pay downs of securities from the securities portfolio, the stability of our core deposits and the ability to sell investment securities. Primary uses of funds include withdrawal of and interest payments on deposits, originations and purchases of loans, purchases of investment securities, and payment of operating expenses.

As a means of augmenting our liquidity, we have established federal funds lines with correspondent banks. At June 30, 2007 our available borrowing capacity includes approximately \$18,000,000 in federal funds lines with our

Edgar Filing: CENTRAL VALLEY COMMUNITY BANCORP - Form 10-Q

correspondent banks and \$19,324,000 in unused FHLB advances. We believe our liquidity sources to be stable and adequate. At June 30, 2007, we were not aware of any information that was reasonably likely to have a material effect on our liquidity position.

The following table reflects the Company's credit lines, balances outstanding, and pledged collateral at June 30, 2007 and December 31, 2006:

Credit Lines (In thousands)	June 30, 2007	Balance at June 30, 2007	December 31, 2006	Balance at December 31,2006
Unsecured Credit Lines (interest rate varies with market)	\$ 18,000	\$ -0-	\$ 18,000	\$ -0-
	Collateral pledged \$30,019		Collateral pledged \$16,848	
Federal Home Loan Bank (interest rate at prevailing interest rate)	Fair Value of Collateral \$30,259	\$ 10,000	Fair Value of Collateral \$16,758	\$ 2,000
	Collateral pledged \$2,265		Collateral pledged \$2,271	
Federal Reserve Bank (interest rate at prevailing discount interest rate)	Fair Value of Collateral \$2,198	\$ -0-	Fair Value of Collateral \$2,200	\$ -0-

The liquidity of the parent company, Central Valley Community Bancorp is primarily dependent on the payment of cash dividends by its subsidiary, Central Valley Community Bank, subject to limitations imposed by the regulations.

OFF-BALANCE SHEET ITEMS

In the ordinary course of business, the Company is a party to financial instruments with off-balance risk. These financial instruments include commitments to extend credit and standby letters of credit. Such financial instruments are recorded in the financial statements when they are funded or related fees are incurred or received. For a fuller discussion of these financial instruments, refer to Note 5 – Commitments and Contingencies of the Company's condensed consolidated financial statements included herein and Note 10 – Commitments and Contingencies in the Company's 2006 Annual Report to Shareholders' on Form 10-K.

In the ordinary course of business, the Company is party to various operating leases. For a fuller discussion of these financial instruments, refer to Note 10 – Commitments and Contingencies in the Company's 2006 Annual Report to Shareholders' on Form 10-K.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Interest rate risk ("IRR") and credit risk constitute the two greatest sources of financial exposure for insured financial institutions. IRR represents the impact that changes in absolute and relative levels of market interest rates may have upon our net interest income ("NII"). Changes in the NII are the result of changes in the net interest spread between interest-earning assets and interest-bearing liabilities (timing risk), the relationship between various rates (basis risk), and changes in the shape of the yield curve.

We realize income principally from the differential or spread between the interest earned on loans, investments, other interest-earning assets and the interest incurred on deposits and borrowings. The volumes and yields on loans, deposits and borrowings are affected by market interest rates. As of June 30, 2007, approximately 80.5% of our loan portfolio was tied to adjustable rate indices. The majority of these adjustable rate loans are tied to prime and reprice within 90 days. The majority of our time deposits have a fixed rate of interest. As of June 30, 2007, 92.8% of our time deposits mature within one year or less. As of June 30, 2007, \$625,000 of our short-term debt reprices on a quarterly basis.

Changes in the market level of interest rates directly and immediately affect our interest spread, and therefore profitability. Sharp and significant changes to market rates can cause the interest spread to shrink or expand significantly in the near term, principally because of the timing differences between the adjustable rate loans and the maturities (and therefore repricing) of the deposits and borrowings.

Our management and Board of Director's Asset/Liability Committees ("ALCO") are responsible for managing our assets and liabilities in a manner that balances profitability, IRR and various other risks including liquidity. The ALCO operates under policies and within risk limits prescribed by, reviewed and approved by the Board of Directors.

The ALCO seeks to stabilize our NII by matching rate-sensitive assets and liabilities through maintaining the maturity and repricing of these assets and liabilities at appropriate levels given the interest rate environment. When the amount of rate-sensitive liabilities exceeds rate-sensitive assets within specified time periods, NII generally will be negatively impacted by an increasing interest rate environment and positively impacted by a decreasing interest rate environment. Conversely, when the amount of rate-sensitive assets exceeds the amount of rate-sensitive liabilities within specified time periods, net interest income will generally be positively impacted by an increasing interest rate environment and negatively impacted by a decreasing interest rate environment. The speed and velocity of the repricing of assets and liabilities will also contribute to the effects on our NII, as will the presence or absence of periodic and lifetime interest

rate caps and floors.

Simulation of earnings is the primary tool used to measure the sensitivity of earnings to interest rate changes. Earnings simulations are produced using a software model that is based on actual cash flows and repricing characteristics for all of our financial instruments and incorporate market-based assumptions regarding the impact of changing interest rates on current volumes of applicable financial instruments.

Interest rate simulations provide us with an estimate of both the dollar amount and percentage change in NII under various rate scenarios. All assets and liabilities are normally subjected to up to 300 basis point increases and decreases in interest rates in 100 basis point increments. Under each interest rate scenario, we project our net interest income. From these results, we can then develop alternatives in dealing with the tolerance thresholds.

Approximately 80.5% of our loan portfolio is tied to adjustable rate indices and 53.6% of our loan portfolio reprices within 90 days. As of June 30, 2007, we had 90 loans totaling \$48,516,000 with floors ranging from 1% to 8% and ceilings ranging from 10% to 25%. In the current rate environment, the number of loans affected by floors and ceilings is minimal.

30

The following table shows the effects of changes in projected net interest income for the twelve months ending June 30, 2008 under the interest rate shock scenarios stated. The table was prepared as of June 30, 2007, at which time prime interest rate was 8.25%. The amounts identified in the table are not materially different from what we showed at December 31, 2006.

Sensitivity Analysis of Impact on Interest Income of Rate Changes

Hypothetical Change in Rates	Projected Net Interest Income (\$000)	\$ Change from Rates at June 30, 2007 (\$000)	Percent Change from Rates at June 30, 2007
UP 300 bp	\$ 27,485	\$ 3,806	16.07%
UP 200 bp	25,748	2,069	8.74%
UP 100 bp	24,139	460	1.94%
UNCHANGED	23,679	0	-
DOWN 100 bp	23,512	(167)	(0.70%)
DOWN 200 bp	22,410	(1,269)	(5.36%)
DOWN 300 bp	20,844	(2,835)	(11.97%)

Assumptions are inherently uncertain, and, consequently, the model cannot precisely measure net interest income or precisely predict the impact of changes in interest rates on net interest income. Actual results will differ from simulated results due to timing, magnitude and frequency of interest rate changes, as well as changes in market conditions and management strategies which might moderate the negative consequences of interest rate deviations. In the model above, the simulation shows that the Company is neutral over the one-year horizon. If interest rates increase or decline, there will be similar positive and negative impact to net interest income.

ITEM 4. CONTROLS AND PROCEDURES

As of the end of the period covered by this report, management, including the Company's Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures with respect to the information generated for use in this Quarterly Report. The evaluation was based in part upon reports provided by a number of executives. Based upon, and as of the date of that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that the disclosure controls and procedures, as so amended, were effective to provide reasonable assurances that information required to be disclosed in the reports the Company files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that information required to be disclosed by the Company in the reports that it files or submits is accumulated and communicated to management as appropriate to allow timely decisions regarding required disclosure.

There was no change in the Company's internal controls over financial reporting during the quarter ended June 30, 2007 that has materially affected, or is reasonably likely to materially affect, the Company's internal controls over financial reporting.

In designing and evaluating disclosure controls and procedures, the Company's management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable, not absolute, assurances of achieving the desired control objectives and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

PART II OTHER INFORMATION

ITEM 1 LEGAL PROCEEDINGS

None to report.

ITEM 1A RISK FACTORS In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, "Item 1A. Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2006, which could materially affect our business, financial condition or future results. The risks described in our Annual Report on Form 10-K are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results."

ITEM 2 CHANGES IN SECURITIES AND USE OF PROCEEDS

A summary of the repurchase activity for the Company's quarter ending June 30, 2007 follows.

31

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plan (1)	Approximate Dollar Value of Shares that May Yet Be Purchased Under Current Plan
04/01/2007 – 04/30/2007	-	-	-	\$ 2,000,000
05/01/2007 – 05/31/2007	79,900	\$ 14.86	79,900	\$ 812,906
06/01/2007 – 06/30/2007	18,600	\$ 14.90	18,600	\$ 535,766
Total	98,500	\$ 14.87	98,500	

(1) The Company approved a stock repurchase program effective April 18, 2007 and ending October 18, 2007 with the intent to purchase shares for an aggregate amount of \$2,000,000. During the quarter ended June 30, 2007, the Company repurchased 98,500 shares at a cost of \$1,464,234.

(2) All share repurchases were effected in accordance with the safe harbor provisions of Rule 10b-18 of the Securities Exchange Act.

ITEM 3 DEFAULTS UPON SENIOR SECURITIES

None to report.

ITEM 4 SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

a. The Company's 2007 Annual Meeting of Shareholders was held May 16, 2007.

b. At the 2007 annual meeting the shareholders took the following actions:

- Elected Directors of the Company to serve until the 2008 Annual Meeting of Shareholders and until their successors are elected and qualified.
- In the election for directors, no candidates were nominated for election as a director other than the nominees of the Board of Directors whose names were set forth in the Company's proxy statement dated April 9, 2007. Set forth below is a tabulation of the votes cast in the election of Directors with respect to each nominee for office:

Director	Votes Cast for Election	Withheld
Sidney B. Cox	4,405,847	2,076
Daniel N. Cunningham	4,405,847	2,076
Edwin S. Darden, Jr.	4,405,847	2,076
Daniel J. Doyle	4,405,847	2,076
Steven D. McDonald	4,405,847	2,076
Louis McMurray	4,405,847	2,076
Wanda L. Rogers	4,405,847	2,076
William S. Smittcamp	4,405,847	2,076

Joseph B. Weirick	4,405,847	2,076
-------------------	-----------	-------

- The ratification of the appointment of Perry-Smith LLP for the 2007 fiscal year as the Company's independent registered public accounting firm. The appointment was ratified by the following votes:

32

Votes for: 4,352,173 Votes against: 46,142 Abstentions: 9,608

ITEM 5 OTHER INFORMATION

None to report.

ITEM 6 EXHIBITS

(a) Exhibits

Exhibit No.	Description
<u>31.1</u>	Certification of the Chief Executive Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
<u>31.2</u>	Certification of the Chief Financial Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
<u>32.1</u>	Certification of the Chief Executive Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002
<u>32.2</u>	Certification of the Chief Financial Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002

SIGNATURES

Pursuant to the requirements of the Exchange Act, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
