DORMAN PRODUCTS, INC. AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

FOR THE THIRTY-NINE WEEKS ENDED SEPTEMBER 26, 2009 AND SEPTEMBER 27, 2008 (UNAUDITED)

1. Basis of Presentation

As used herein, unless the context otherwise requires, “Dorman”, the “Company”, “we”, “us”, or “our” refers to Dorman Products, Inc. and its subsidiaries.

The accompanying unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and in accordance with the rules and regulations of the U.S. Securities and Exchange Commission (“SEC”). However, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation have been included. Operating results for the thirty-nine week period ended September 26, 2009 are not necessarily indicative of the results that may be expected for the fiscal year ending December 26, 2009. We may experience significant fluctuations from quarter to quarter in our results of operations due to the timing of orders placed by our customers. Generally, the second and third quarters have the highest level of customer orders, but the introduction of new products and product lines to customers may cause significant fluctuations from quarter to quarter. These financial statements should be read in conjunction with the consolidated financial statements and footnotes thereto included in our Annual Report on Form 10-K for the year ended December 27, 2008.

2. Sales of Accounts Receivable

We have entered into several customer sponsored programs administered by unrelated financial institutions that permit us to sell, without recourse, certain accounts receivable at discounted rates to the financial institutions. We do not retain any servicing requirements for these accounts receivable. Transactions under these agreements are accounted for as sales of accounts receivable. At September 26, 2009 and December 27, 2008, \$55.7 million and \$55.0 million, respectively, of accounts receivable were sold and removed from the consolidated balance sheets based upon standard payment terms. Selling, general and administrative expenses for the thirty-nine weeks ended September 26, 2009 and September 27, 2008 include \$1.5 million and \$1.8 million, respectively, in financing costs associated with these accounts receivable sales programs. During the thirty-nine weeks ended September 26, 2009 and September 27, 2008, we sold \$57.3 million and \$84.2 million, respectively, under these programs.

3. Inventories

Inventories include the cost of material, freight, direct labor and overhead utilized in the processing of our products, and are stated at the lower of average cost or market. Inventories were as follows:

	September 26, 2009	December 27, 2008
(in thousands)		
Bulk product	\$ 33,402	\$ 35,385
Finished product	59,828	55,558
Packaging materials	2,363	2,634
Total	\$ 95,593	\$ 93,577

4. Sale of Assets

On May 15, 2008, we sold certain assets of our Canadian Subsidiary for \$0.9 million, which was paid in installments through December 2008.

Page 7 of 22

Index

5. Stock-Based Compensation

Effective May 18, 2000 we amended and restated our Incentive Stock Option Plan (the "Plan"). Under the terms of the Plan, our Board of Directors may grant incentive stock options or non-qualified stock options or combinations thereof to purchase up to 2,345,000 shares of common stock to officers, directors and employees. Grants under the Plan must be made within 10 years of the date the plan was approved and are exercisable at the discretion of the Board of Directors, but in no event more than 10 years from the date of the grant. At September 26, 2009, options to acquire 322,330 shares were available for grant under the Plan. The Plan expires on December 13, 2009.

On December 12, 2008, our Board of Directors approved the 2008 Stock Option and Stock Incentive Plan, which was approved by our shareholders at the Company's Annual Meeting held on May 20, 2009. Under the 2008 Plan, our Board of Directors may grant incentive stock options, non-qualified stock options and/or shares of restricted stock to purchase up to 1,000,000 shares of common stock to officers, directors, and employees. Grants under the 2008 Plan must be made within 10 years of the date the plan was approved and are exercisable at the discretion of the Board of Directors, but in no event more than 10 years from the date of grant.

We expense the grant-date fair value of employee stock options. Compensation cost is recognized on a straight-line basis over the vesting period during which employees perform related services. The compensation cost charged against income for our stock-based compensation program for the thirty-nine weeks ended September 26, 2009 and September 27, 2008 was \$193,000 and \$180,000 before taxes. The compensation cost recognized is classified as selling, general and administrative expense in the consolidated statement of operations. No cost was capitalized during 2009 and 2008. We included a forfeiture assumption of 5.2% in 2009 and 4.6% in 2008 in the calculation of expense. Cash flows resulting from tax deductions in excess of compensation cost recognized in the financial statements is classified as financing cash flows.

We use the Black-Scholes option valuation model to estimate the fair value of options granted. Expected volatility and expected dividend yield are based on the actual historical experience of our stock. The expected life represents the period of time that options granted are expected to be outstanding and was calculated using the simplified method. The risk-free rate is based on the U.S. Treasury security with terms equal to the expected time of exercise as of the grant date. There were no stock options granted in the thirty-nine weeks ended September 26, 2009 or September 27, 2008.

Transactions under the Plan were as follows:

	Shares	Weighted Average Price	Weighted Average Remaining Term (In years)	Aggregate Intrinsic Value
Balance at December 27, 2008	820,100	\$5.91		
Exercised	(108,100)	2.53		
Cancelled	(1,500)	12.48		
Balance at September 26, 2009	710,500	\$6.40	4.1	\$5,674,000
Options exercisable at September 26, 2009	594,300	\$5.25	3.3	\$5,434,000

The total intrinsic value of stock options exercised during 2009 was \$1.2 million.

As of September 26, 2009, there was approximately \$0.4 million of unrecognized compensation cost related to non-vested stock options, which is expected to be recognized over a weighted-average period of approximately 3.2 years.

Cash received from option exercises under the Plan during 2009 was \$244,000. The excess tax benefit generated from options which were exercised during 2009 was \$338,000 and was credited to additional paid in capital.

Page 8 of 22

Index

6. Earnings Per Share

The following table sets forth the computation of basic earnings per share and diluted earnings per share:

	Thirteen Weeks Ended		Thirty-nine Weeks Ended	
	September 26, 2009	September 27, 2008	September 26, 2009	September 27, 2008
(in thousands, except per share data)				
Numerator:				
Net income	\$7,933	\$5,048	\$18,758	\$12,963
Denominator:				
Weighted average shares outstanding used in basic earnings per share calculation	17,657	17,660	17,647	17,684
Effect of dilutive stock options	341	386	329	375
Adjusted weighted average shares outstanding used in diluted earnings per share calculation	17,998	18,046	17,976	18,059
Basic earnings per share	\$0.45	\$0.29	\$1.06	\$0.73
Diluted earnings per share	\$0.44	\$0.28	\$1.04	\$0.72

Options to purchase 192,000 and 173,500 shares were outstanding at September 26, 2009 and September 27, 2008, respectively, but were not included in the computation of diluted earnings per common share, as their effect would have been antidilutive.

7. Common Stock Repurchases

On February 22, 2008, we announced that our Board of Directors authorized the repurchase of up to 500,000 shares of our outstanding common stock. Under this program, share repurchases may be made from time to time depending upon market conditions, share price and availability, and other factors at our discretion. Repurchases will take place in open market transactions or in privately negotiated transactions in accordance with applicable laws. During 2009, we repurchased and cancelled 3,600 shares of common stock under the plan.

We periodically repurchase at the then current market price and cancel common stock issued to our defined contribution profit sharing and 401(k) plan. For the thirty-nine weeks ended September 26, 2009, we repurchased and cancelled 63,364 shares of common stock. During 2008, we repurchased and cancelled 108,033 shares of common stock.

8. Related-Party Transactions

We have entered into a noncancelable operating lease for our primary operating facility from a partnership in which Richard N. Berman, our Chief Executive Officer, and Steven L. Berman, our Executive Vice President, are partners. Based upon the terms of the lease, payments in 2009 will be \$1.4 million. Total rental payments to the partnership under the lease arrangement were \$1.4 million in 2008.

Index

9. Income Taxes

At September 26, 2009, we have \$ 1.8 million of net unrecognized tax benefits, \$1.2 million of which would affect our effective tax rate if recognized. We recognize interest and penalties related to uncertain tax positions in income tax expense. As of September 26, 2009, we have approximately \$0.5 million of accrued interest related to uncertain tax positions.

The last year examined by the IRS was 2005, and all years up through and including that year are closed by examination. We are currently under examination for tax years 2003-2007 by one state tax authority to which we are subject to tax. The tax years 2004-2008 remain open to examination by the remaining major taxing jurisdictions in the United States to which we are subject. The tax years 2004-2008 remain open to examination in Sweden for our Swedish subsidiary.

10. Comprehensive Income

Comprehensive income includes all changes to shareholders' equity during a period, except those resulting from investment by and distributions to shareholders. Components of comprehensive income include net income and changes in foreign currency translation adjustments. Total comprehensive income was \$9.5 million and \$3.5 million for the thirteen weeks ended September 26, 2009 and September 27, 2008, respectively. Total comprehensive income was \$20.5 million and \$8.9 million for the thirty-nine weeks ended September 26, 2009 and September 27, 2008 respectively.

11. Fair Value Disclosures

The carrying value of financial instruments such as cash, accounts receivable, accounts payable, and other current assets and liabilities approximate their fair value based on the short-term nature of these instruments. Based on borrowing rates currently available to us for loans with similar terms and average maturities, the fair value of total long-term debt, including the current portion, was \$6.3 million at September 26, 2009 and \$15.4 million at December 27, 2008.

12. New Accounting Pronouncements

In June 2009, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standard ("SFAS") No. 168, "The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles, a replacement of FASB Statement No. 162". This statement modifies the Generally Accepted Accounting Principles ("GAAP") hierarchy by establishing only two levels of GAAP, authoritative and nonauthoritative accounting literature. Effective July 2009, the FASB Accounting Standards Codification ("ASC"), also known collectively as the "Codification," is considered the single source of authoritative U.S. accounting and reporting standards, except for additional authoritative rules and interpretive releases issued by the SEC. Nonauthoritative guidance and literature would include, among other things, FASB Concepts Statements, American Institute of Certified Public Accountants Issue Papers and Technical Practice Aids and accounting textbooks. The Codification was developed to organize GAAP pronouncements by topic so that users can more easily access authoritative accounting guidance. It is organized by topic, subtopic, section, and paragraph, each of which is identified by a numerical designation. This statement applies beginning in third quarter.

In June 2009, the FASB issued new guidance concerning the transfer of financial assets. This guidance amends the criteria for a transfer of a financial asset to be accounted for as a sale, creates more stringent conditions for reporting a transfer of a portion of a financial asset as a sale, changes the initial measurement of a transferor's interest in transferred financial assets, eliminates the qualifying special-purpose entity concept and provides for new disclosures.

This new guidance is effective as of the beginning of each reporting entity's first annual reporting period that begins after November 15, 2009, for interim periods within that first annual reporting period and for interim and annual reporting periods thereafter. The Company is evaluating the impact of adoption of this new guidance on its financial statements.

Index

In June 2009, the FASB issued new guidance concerning the determination of the primary beneficiary of a variable interest entity (“VIE”). This new guidance amends current U.S. GAAP by: requiring ongoing reassessments of whether an enterprise is the primary beneficiary of a VIE; amending the quantitative approach previously required for determining the primary beneficiary of the VIE; modifying the guidance used to determine whether an entity is a VIE; adding an additional reconsideration event (e.g. troubled debt restructurings) for determining whether an entity is a VIE; and requiring enhanced disclosures regarding an entity’s involvement with a VIE. This new guidance is effective as of the beginning of each reporting entity’s first annual reporting period that begins after November 15, 2009, for interim periods within that first annual reporting period and for interim and annual reporting periods thereafter. The Company is evaluating the impact of adoption of this new guidance on its financial statements.

In May 2009, the FASB issued new guidance concerning subsequent events. This guidance establishes the standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued. This Statement also requires the disclosure of the date through which subsequent events have been evaluated. The Company adopted this guidance, as required, for the period ending June 27, 2009. Adoption of this guidance did not have a material impact on the Company’s consolidated financial statements. Refer to Note 13 for the required disclosure.

In April 2008, the FASB issued guidance on the determination of the useful life of intangible assets, which amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset. The adoption of the provisions of this guidance did not impact the Company’s consolidated results of operations and financial position.

In December 2007, the FASB issued new guidance on business combinations that changes the requirements for an acquirer’s recognition and measurement of the assets acquired and the liabilities assumed in a business combination. This guidance is effective for annual periods beginning after December 15, 2008 and should be applied prospectively for all business combinations entered into after the date of adoption.

In December 2007, the FASB issued new guidance concerning noncontrolling interests in consolidated financial statements. This guidance requires (i) that noncontrolling (minority) interests be reported as a component of shareholders’ equity, (ii) that net income attributable to the parent and to the noncontrolling interest be separately identified in the consolidated statement of operations, (iii) that changes in a parent’s ownership interest while the parent retains its controlling interest be accounted for as equity transactions, (iv) that any retained noncontrolling equity investment upon the deconsolidation of a subsidiary be initially measured at fair value, and (v) that sufficient disclosures are provided that clearly identify and distinguish between the interests of the parent and the interests of the noncontrolling owners. This guidance is effective for annual periods beginning after December 15, 2008 and should be applied prospectively. However, the presentation and disclosure requirements of the statement shall be applied retrospectively for all periods presented. The adoption of the provisions of this guidance did not have a material impact the Company’s consolidated financial position and results of operations.

In September 2006, the FASB issued guidance concerning fair value measurements. This guidance defines fair value, established a framework for measuring fair value and expands disclosures about fair value measurements. This statement applies under other accounting pronouncements that require or permit fair value measurements. Accordingly, this guidance does not require any new fair value measurements. The provisions of this guidance are to be applied prospectively and are effective for fiscal years beginning after November 15, 2007. The FASB has agreed to a one-year deferral of the fair value measurement requirements for non-financial assets and liabilities that are not required or permitted to be measured at fair value on a recurring basis. We adopted this guidance for financial assets and liabilities on December 30, 2007, and there was no impact on the Company’s consolidated results of operations and financial position. We adopted this guidance for non-financial assets and liabilities on December 28, 2008, and there was no impact on the Company’s consolidated results of operations and financial position.

13.

Subsequent Events

The Company has evaluated subsequent events from September 26, 2009 to the date of this report on the form 10-Q. There were no subsequent events required to be recognized or disclosed in the financial statements.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL
CONDITION AND RESULTS OF OPERATIONS

Cautionary Statement Regarding Forward Looking Statements

Certain statements in this document constitute "forward-looking statements" within the meaning of the Federal Private Securities Litigation Reform Act of 1995. While forward-looking statements sometimes are presented with numerical specificity, they are based on various assumptions made by management regarding future circumstances over many of which the Company has little or no control. Forward-looking statements may be identified by words including "anticipate," "believe," "estimate," "expect," and similar expressions. The Company cautions readers that forward-looking statements, including, without limitation, those relating to future business prospects, revenues, working capital, liquidity, and income, are subject to certain risks and uncertainties that would cause actual results to differ materially from those indicated in the forward-looking statements. Factors that could cause actual results to differ from forward-looking statements include but are not limited to: (i) competition in the automotive aftermarket industry; (ii) concentration of the Company's sales and accounts receivable among a small number of customers and the extension of customer payment terms and price concessions; (iii) the impact of consolidation in the automotive aftermarket industry; (iv) weakness in the dollar and value of the Chinese Yuan increasing; (v) dependence on senior management and control by officers, directors, and family members; (vi) increase in OE patent filings; (vii) product quality; (viii) reliance on new product development; and/or (ix) the impact of increases in the cost of production. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those anticipated, estimated or projected. For additional information concerning factors that could cause actual results to differ materially from the information contained in this report, reference is made to the information in Part I, "Item 1A, Risk Factors" in the Company's Annual Report on Form 10-K for the fiscal year ended December 27, 2008.

Introduction

The following discussion should be read in conjunction with the unaudited condensed consolidated financial statements and notes of Dorman Products, Inc. and its subsidiaries included elsewhere in this Quarterly Report on Form 10-Q and with Management's Discussion and Analysis of Financial Condition and Results of Operations and audited financial statements and notes included in the Company's Annual Report on Form 10-K.

Overview

We are a leading supplier of Original Equipment (OE) Dealer "Exclusive" automotive replacement parts, automotive hardware, brake products, and household hardware to the automotive aftermarket and mass merchandise markets. Dorman automotive parts and hardware are marketed under the Dorman®, OE Solutions™, HELP!®, AutoGrade™, First Stop™, Conduct-Tite®, Pik-A-Nut®, and Scan-Tech™ brand names. We design, package and market over 92,000 different automotive replacement parts (including brake parts), fasteners and service line products manufactured to our specifications. Our products are sold under one of the seven Dorman brand names listed above. Our products are sold primarily in the United States through automotive aftermarket retailers (such as AutoZone, Advance and O'Reilly), national, regional and local warehouse distributors (such as Carquest and NAPA) and specialty markets including parts manufacturers for resale under their own private labels and salvage yards. Through our Scan-Tech subsidiary we are increasing our international distribution of automotive replacement parts, with sales into Europe, the Middle East and the Far East.

Index

The automotive aftermarket in which we compete has been growing in size; however, the industry which we supply continues to consolidate. As a result, our customers regularly seek more favorable pricing, product returns and extended payment terms when negotiating with us. While we do our best to avoid such concessions, in some cases pricing concessions have been made, customer payment terms have been extended and returns of product have exceeded historical levels. The product returns and more favorable pricing primarily affect our profit levels while payment term extensions generally reduce operating cash flow and require additional capital to finance the business. We expect both of these trends to continue for the foreseeable future. We have increased our focus on efficiency improvements and product cost reduction initiatives to offset the impact of these trends.

In addition, we are relying on new product development as a way to offset some of these trends and as our primary vehicle for growth. As such, new product development is a critical factor for our future success. We have invested heavily in resources necessary for us to increase our new product development efforts and to strengthen our relationships with our customers. These investments are primarily in the form of increased product development resources and awareness programs, customer service improvements and increased customer credits and allowances. This has enabled us to provide an expanding array of new product offerings and grow our revenues.

We may experience significant fluctuations from quarter to quarter in our results of operations due to the timing of orders placed by our customers. Generally, the second and third quarters have the highest level of customer orders, but the introduction of new products and product lines to customers may cause significant fluctuations from quarter to quarter.

We operate on a fifty-two, fifty-three week period ending on the last Saturday of the calendar year.

Sale of Assets

On May 15, 2008, we sold certain assets of our Canadian subsidiary for \$0.9 million. We realized a \$0.7 million tax benefit upon disposition of the business.

Results of Operations

The following table sets forth, for the periods indicated, the percentage of net sales represented by certain items in our Consolidated Statements of Operations:

	Percentage of Net Sales							
	For the Thirteen Weeks Ended				For the Thirty-nine Weeks Ended			
	September		September		September		September	
	26, 2009	%	27, 2008	%	26, 2009	%	27, 2008	%
Net Sales	100.0	%	100.0	%	100.0	%	100.0	%
Cost of goods sold	64.0		67.6		65.9		67.8	
Gross profit	36.0		32.4		34.1		32.2	
Selling, general and administrative expenses	22.8		23.1		23.2		23.8	
Income from operations	13.2		9.3		10.9		8.4	
Interest expense, net	-		0.2		-		0.3	
Income before taxes	13.2		9.1		10.9		8.1	
Provision for taxes	5.1		3.6		4.2		3.1	
Net Income	8.1	%	5.5	%	6.7	%	5.0	%

Edgar Filing: Dorman Products, Inc. - Form 10-Q

Thirteen Weeks Ended September 26, 2009 Compared to Thirteen Weeks Ended September 27, 2008

Net sales increased 7% to \$98.0 million for the third quarter ended September 26, 2009 from \$91.2 million in the same period last year. Revenues before the impact of exchange were up 8% over the prior year. Our revenue growth was driven by overall strong demand for our products and higher new product sales.

Page 13 of 22

Index

Cost of goods sold, as a percentage of net sales, decreased to 64.0% for the thirteen weeks ended September 26, 2009 from 67.6% in the same period last year. The reduction is due primarily to lower product return and warranty costs along with a reduction in freight expenses and certain material costs.

Selling, general and administrative expenses for the thirteen weeks ended September 26, 2009 increased 6% to \$22.3 million from \$21.0 million in the same period last year. The increase is the result of higher new product development spending and increased incentive compensation expense due to higher earnings levels. These increases were offset partially by lower operating costs in most other areas due to cost reduction initiatives.

Interest expense, net, decreased to \$0.1 million in the thirteen weeks ended September 26, 2009 from \$0.2 million in the same period last year due to lower borrowing levels and lower interest rates.

Our effective tax rate decreased slightly to 38.6% in the thirteen weeks ended September 26, 2009 from 39.0% in the same period last year.

Thirty-nine Weeks Ended September 26, 2009 Compared to Thirty-nine Weeks Ended September 27, 2008

Net sales increased 7% to \$280.7 million for the thirty-nine weeks ended September 26, 2009 from \$261.6 million in the same period last year. Revenues before the impact of exchange and the sale of our Canadian subsidiary were up 9% over the prior year. Our revenue growth was driven by overall strong demand for our products and higher new product sales.

Cost of goods sold, as a percentage of net sales, decreased to 65.9% for the thirty-nine weeks ended September 26, 2009 from 67.8% in the same period last year. The decrease is the result of a reduction of \$1.0 million in air freight costs compared to last year, and a reduction in other freight expenses and certain material costs.

Selling, general and administrative expenses for the thirty-nine weeks ended September 26, 2009 increased 4% to \$65.0 million from \$62.5 million in the same period last year. The increase is the result of higher new product development spending and increased incentive compensation expense due to higher earnings levels. Our continued focus on cost control has offset most of the variable costs associated with higher sales and inflationary cost increases.

Interest expense, net, decreased to \$0.2 million in the thirty-nine weeks ended September 26, 2009 from \$0.8 million in the same period last year due to lower borrowing levels and lower interest rates.

Our effective tax rate decreased slightly to 38.5% in the thirty-nine weeks ended September 26, 2009, from 38.7% in the same period last year.

Liquidity and Capital Resources

Historically, we have financed our growth through a combination of cash flow from operations, accounts receivable sales programs provided by certain customers and through the issuance of senior indebtedness through our bank credit facility and senior note agreements. At September 26, 2009, working capital was \$165.7 million, total long-term debt (including the current portion and revolving credit borrowings) was \$6.3 million and shareholders' equity was \$208.3 million. Cash and cash equivalents as of September 26, 2009 was \$5.7 million.

Over the past several years we have continued to extend payment terms to certain customers as a result of customer requests and market demands. These extended terms have resulted in increased accounts receivable levels and significant uses of cash flow. We participate in accounts receivable sales programs with several customers which allow us to sell our accounts receivable on a non-recourse basis to financial institutions to offset the negative cash

flow impact of these payment terms extensions. As of September 26, 2009 and December 27, 2008, we had sold \$55.7 million and \$55.0 million in accounts receivable under these programs and had removed them from our balance sheets based upon standard payment terms. We expect continued pressure to extend our payment terms for the foreseeable future. Further extensions of customer payment terms will result in additional uses of cash flow or increased costs associated with the sale of accounts receivable.

We have a \$30.0 million revolving credit facility which expires in June 2010. Borrowings under the facility are on an unsecured basis with interest at rates ranging from LIBOR plus 65 basis points to LIBOR plus 150 basis points based upon the achievement of certain benchmarks related to the ratio of funded debt to EBITDA. The interest rate at September 26, 2009 was LIBOR plus 65 basis points (0.90%). Borrowings under the facility were \$6.0 million as of September 26, 2009. We had approximately \$21.4 million available under the facility at September 26, 2009. The loan agreement also contains covenants, the most restrictive of which pertain to net worth and the ratio of debt to EBITDA.

Index

We also have outstanding \$0.4 million under a commercial loan granted in connection with the opening of a new distribution facility which bears interest at 4% payable monthly. The principal balance is paid monthly in equal installments through September 2013. The loan is secured by a letter of credit issued under our revolving credit facility.

Our business activities do not include the use of unconsolidated special purpose entities, and there are no significant business transactions that have not been reflected in the accompanying financial statements.

Cash generated from our operating activities was \$14.5 million in the thirty-nine weeks ended September 26, 2009. Net income, depreciation and a \$3.6 million increase in accrued compensation and other liabilities were the primary sources of operating cash flow. Accrued compensation and other liabilities increased primarily due to higher incentive compensation accruals in 2009. The primary use of cash was accounts receivable, which increased \$11.4 million due to sales growth.

Investing activities used \$5.9 million of cash in the thirty-nine weeks ended September 26, 2009 primarily as a result of additions to property, plant and equipment. Capital spending in 2009 consisted of tooling associated with new products, equipment associated with the expansion of a distribution center, upgrades to information systems and scheduled equipment replacements.

Financing activities used \$9.4 million of cash in the thirty-nine weeks ended September 26, 2009, primarily related to our repayment of outstanding amounts under our revolving credit facility and the purchase and cancellation of our common stock.

Based on our current operating plan, we believe that our sources of available capital are adequate to meet our ongoing cash needs for at least the next twelve months.

Foreign Currency Fluctuations

In 2008, approximately 80% of our products were purchased from suppliers in a variety of foreign countries. The products generally are purchased through purchase orders with the purchase price specified in U.S. dollars. Accordingly, we do not have exposure to fluctuations in the relationship between the dollar and various foreign currencies between the time of execution of the purchase order and payment for the product. To the extent that the dollar decreases in value to foreign currencies in the future, the price of the product in dollars for new purchase orders may increase.

The largest portion of our overseas purchases come from China. The value of the Chinese Yuan has increased relative to the U.S. Dollar since July 2005 when it was allowed to fluctuate against a basket of currencies. Most experts believe that the value of the Yuan will increase further relative to the U.S. Dollar over the next few years. Such a move would most likely result in an increase in the cost of products that are purchased from China.

Impact of Inflation

The overall impact of inflation has not resulted in a significant change in labor costs or the cost of general services utilized by the Company. During the second and third quarter of 2008 we experienced significant increases in the cost of our materials costs as a result of commodity price increases and weakness in the U.S. Dollar. The upward pressure on materials costs has eased as the U.S. economy weakened, but costs are up over the first half of 2008 levels. We have been able to offset a portion of these cost increases with higher selling prices; however, we may not be able to do so in the future. We will attempt to offset any further cost increases by passing along selling price increases to customers, through the use of alternative suppliers and by resourcing products to other countries. However, there can

be no assurance that we will be successful in these efforts.

Related-Party Transactions

We have a noncancelable operating lease for our primary operating facility from a partnership in which Richard N. Berman, our Chief Executive Officer, and Steven L. Berman, our President, are partners. Based upon the terms of the lease, payments in 2009 will be \$1.4 million. Total rental payments to the partnership under the lease arrangement were \$1.4 million in 2008.

Critical Accounting Policies

Our discussion and analysis of our financial condition and results of operations are based upon the consolidated financial statements, which have been prepared in accordance with U.S. generally accepted accounting principles. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets and liabilities, the disclosure of contingent liabilities and the reported amounts of revenues and expenses. We regularly evaluate our estimates and judgments, including those related to revenue recognition, bad debts, customer credits, inventories, goodwill and income taxes. Estimates and judgments are based upon historical experience and on various other assumptions believed to be accurate and reasonable under the circumstances. Actual results may differ materially from these estimates under different assumptions or conditions. We believe the following critical accounting policies affect our more significant estimates and judgments used in the preparation of our consolidated financial statements.

Allowance for Doubtful Accounts. The preparation of our financial statements requires us to make estimates of the collectability of our accounts receivable. We specifically analyze accounts receivable and historical bad debts, customer creditworthiness, current economic trends and changes in customer payment patterns when evaluating the adequacy of the allowance for doubtful accounts. A significant percentage of our accounts receivable have been, and will continue to be, concentrated among a relatively small number of automotive retailers and warehouse distributors in the United States. Our five largest customers accounted for 81% and 71% of net accounts receivable as of December 27, 2008 and December 29, 2007, respectively. A bankruptcy or financial loss associated with a major customer could have a material adverse effect on our sales and operating results.

Revenue Recognition and Allowance for Customer Credits. Revenue is recognized from product sales when goods are shipped, title and risk loss have been transferred to the customer and collection is reasonably assured. We record estimates for cash discounts, product returns and warranties, discounts and promotional rebates in the period of the sale ("Customer Credits"). The provision for Customer Credits is recorded as a reduction from gross sales and reserves for Customer Credits are shown as a reduction of accounts receivable. Amounts billed to customers for shipping and handling are included in net sales. Costs associated with shipping and handling are included in cost of goods sold. Actual Customer Credits have not differed materially from estimated amounts for each period presented.

Excess and Obsolete Inventory Reserves. We must make estimates of potential future excess and obsolete inventory costs. We provide reserves for discontinued and excess inventory based upon historical demand, forecasted usage, estimated customer requirements and product line updates. We maintain contact with our customer base in order to understand buying patterns, customer preferences and the life cycle of our products. Changes in customer requirements are factored into the reserves as needed.

Goodwill. We employ a discounted cash flow analysis and a market comparable approach in conducting our impairment tests. Earnings multiples of 5.25 to 5.5 times EBITDA were used when conducting these tests in 2008.

Income Taxes. We follow the asset and liability method of accounting for deferred income taxes. Under this method, income tax expense is recognized for the amount of taxes payable or refundable for the current year and for the change in the deferred tax liabilities and assets for the future tax consequences of events that have been recognized in an entity's financial statements or tax returns. We must make assumptions, judgments and estimates to determine our current provision for income taxes and also our deferred tax assets and liabilities and any valuation allowance to be recorded against a deferred tax asset. Our judgments, assumptions and estimates relative to the current provision for income taxes takes into account current tax laws, our interpretation of current tax laws and possible outcomes of current and future audits conducted by tax authorities. Changes in tax laws or our interpretation of tax laws and the resolution of current and future tax audits could significantly impact the amounts provided for income taxes in our consolidated financial statements. Our assumptions, judgments and estimates relative to the value of a deferred tax

asset takes into account predictions of the amount and category of future taxable income. Actual operating results and the underlying amount and category of income in future years could render our current assumptions, judgments and estimates of recoverable net deferred taxes inaccurate. Any of the assumptions, judgments and estimates mentioned above could cause our actual income tax obligations to differ from our estimates.

Index

Recent Accounting Pronouncements

In June 2009, the Financial Accounting Standards Board (“FASB”) issued Statement of Financial Accounting Standard (“SFAS”) No. 168, “The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles, a replacement of FASB Statement No. 162”. This statement modifies the Generally Accepted Accounting Principles (“GAAP”) hierarchy by establishing only two levels of GAAP, authoritative and nonauthoritative accounting literature. Effective July 2009, the FASB Accounting Standards Codification (“ASC”), also known collectively as the “Codification,” is considered the single source of authoritative U.S. accounting and reporting standards, except for additional authoritative rules and interpretive releases issued by the SEC. Nonauthoritative guidance and literature would include, among other things, FASB Concepts Statements, American Institute of Certified Public Accountants Issue Papers and Technical Practice Aids and accounting textbooks. The Codification was developed to organize GAAP pronouncements by topic so that users can more easily access authoritative accounting guidance. It is organized by topic, subtopic, section, and paragraph, each of which is identified by a numerical designation. This statement applies beginning in third quarter.

In June 2009, the FASB issued new guidance concerning the transfer of financial assets. This guidance amends the criteria for a transfer of a financial asset to be accounted for as a sale, creates more stringent conditions for reporting a transfer of a portion of a financial asset as a sale, changes the initial measurement of a transferor’s interest in transferred financial assets, eliminates the qualifying special-purpose entity concept and provides for new disclosures. This new guidance is effective as of the beginning of each reporting entity’s first annual reporting period that begins after November 15, 2009, for interim periods within that first annual reporting period and for interim and annual reporting periods thereafter. The Company is evaluating the impact of adoption of this new guidance on its financial statements.

In June 2009, the FASB issued new guidance concerning the determination of the primary beneficiary of a variable interest entity (“VIE”). This new guidance amends current U.S. GAAP by: requiring ongoing reassessments of whether an enterprise is the primary beneficiary of a VIE; amending the quantitative approach previously required for determining the primary beneficiary of the VIE; modifying the guidance used to determine whether an entity is a VIE; adding an additional reconsideration event (e.g. troubled debt restructurings) for determining whether an entity is a VIE; and requiring enhanced disclosures regarding an entity’s involvement with a VIE. This new guidance is effective as of the beginning of each reporting entity’s first annual reporting period that begins after November 15, 2009, for interim periods within that first annual reporting period and for interim and annual reporting periods thereafter. The Company is evaluating the impact of adoption of this new guidance on its financial statements.

In May 2009, the FASB issued new guidance concerning subsequent events. This guidance establishes the standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued. This Statement also requires the disclosure of the date through which subsequent events have been evaluated. The Company adopted this guidance, as required, for the period ending June 27, 2009. Adoption of this guidance did not have a material impact on the Company’s consolidated financial statements. Refer to Note 13 for the required disclosure.

In April 2008, the FASB issued guidance on the determination of the useful life of intangible assets, which amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset. The adoption of the provisions of this guidance did not impact the Company’s consolidated results of operations and financial position.

In December 2007, the FASB issued new guidance on business combinations that changes the requirements for an acquirer’s recognition and measurement of the assets acquired and the liabilities assumed in a business combination. This guidance is effective for annual periods beginning after December 15, 2008 and should be applied prospectively

for all business combinations entered into after the date of adoption.

In December 2007, the FASB issued new guidance concerning noncontrolling interests in consolidated financial statements. This guidance requires (i) that noncontrolling (minority) interests be reported as a component of shareholders' equity, (ii) that net income attributable to the parent and to the noncontrolling interest be separately identified in the consolidated statement of operations, (iii) that changes in a parent's ownership interest while the parent retains its controlling interest be accounted for as equity transactions, (iv) that any retained noncontrolling equity investment upon the deconsolidation of a subsidiary be initially measured at fair value, and (v) that sufficient disclosures are provided that clearly identify and distinguish between the interests of the parent and the interests of the noncontrolling owners. This guidance is effective for annual periods beginning after December 15, 2008 and should be applied prospectively. However, the presentation and disclosure requirements of the statement shall be applied retrospectively for all periods presented. The adoption of the provisions of this guidance did not have a material impact the Company's consolidated financial position and results of operations.

Page 17 of 22

Index

In September 2006, the FASB issued guidance concerning fair value measurements. This guidance defines fair value, established a framework for measuring fair value and expands disclosures about fair value measurements. This statement applies under other accounting pronouncements that require or permit fair value measurements. Accordingly, this guidance does not require any new fair value measurements. The provisions of this guidance are to be applied prospectively and are effective for fiscal years beginning after November 15, 2007. The FASB has agreed to a one-year deferral of the fair value measurement requirements for non-financial assets and liabilities that are not required or permitted to be measured at fair value on a recurring basis. We adopted this guidance for financial assets and liabilities on December 30, 2007, and there was no impact on the Company's consolidated results of operations and financial position. We adopted this guidance for non-financial assets and liabilities on December 28, 2008, and there was no impact on the Company's consolidated results of operations and financial position.

Item 3. Quantitative and Qualitative Disclosure about Market Risk

Our market risk is the potential loss arising from adverse changes in interest rates. Substantially all of our borrowings as well as our accounts receivable sale programs bear interest rates tied to LIBOR. Under the terms of our revolving credit facility and customer-sponsored programs to sell accounts receivable, a change in either the lender's base rate, LIBOR or discount rates under our accounts receivable sale programs would affect the rate at which we could borrow funds thereunder. Hypothetically, a one percentage point increase in LIBOR would increase our interest expense on our variable rate debt and our financing costs associated with our sales of accounts receivable by approximately \$0.6 million annually. This estimate assumes that our variable rate debt balance and the level of sales of accounts receivable remains constant for an annual period and the interest rate change occurs at the beginning of the period. The hypothetical changes and assumptions may be different from what actually occurs in the future.

We have not historically and do not intend to use derivative financial instruments for trading or to speculate on changes in interest rates or commodity prices. We are not exposed to any significant market risks, foreign currency exchange risk or interest rate risk from the use of derivative instruments.

Item 4. Controls and Procedures

Quarterly Evaluation of Our Disclosure Controls and Internal Controls

As of September 26, 2009, the Company carried out an evaluation, under the supervision and with the participation of the Company's Disclosure Committee and the Company's management, including the Chief Executive Officer and the Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to paragraph (b) of Exchange Act Rules 13a-15 or 15d-15. Based upon that evaluation, the Chief Executive Officer and the Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective.

Changes in Internal Control Over Financial Reporting

There were no changes in the Company's internal control over financial reporting identified in connection with the evaluation required by paragraph (d) of Exchange Act Rules 13a-15 or 15d-15 that was conducted during the last fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Item 4T. Controls and Procedures

Not Applicable

PART II: OTHER INFORMATION

Item 1. Legal Proceedings

We are a party to or otherwise involved in legal proceedings that arise in the ordinary course of business, such as various claims and legal actions involving contracts, competitive practices, patent rights, trademark rights, product liability claims and other matters arising out of the conduct of our business. In the opinion of management, none of the actions, individually or in the aggregate, would likely have a material financial impact on us.

Page 18 of 22

Index

Item 1A. Risk Factors

New Product Development. We rely on new product development in part to offset the effect that price concessions, extended payment terms, and product returns on existing products has on our profit levels and cash flow. There can be no assurance that our product development efforts will be successful, that we will be able to cost-effectively have these products manufactured on our behalf, that we will be able to successfully market these products or that margins generated from sales of these products will recover costs of our development efforts. If we are not able to develop and successfully market a sufficient number of new products our business may be adversely affected.

Impact of Increased Cost of Production. The cost of materials may increase as a result of commodity price increases and other increased costs of production. We will attempt to offset any cost increase that may arise by raising prices charged to our customers, using alternative low-cost suppliers, and by sourcing product manufacturing activities to other countries. If we are not able to offset the impact of such cost increases successfully, our profit margin could be adversely affected.

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, “Item A, Risk Factors” in our Annual Report on Form 10-K for the year ended December 27, 2008, which could materially affect our business, financial condition or future results. The risks described in our Annual Report on Form 10-K are not the only risks we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

We made no purchase of shares under our Stock Repurchase Program this period.

Item 3. Defaults Upon Senior Securities Not Applicable

Item 4. Submission of Matters to a Vote of Security Holders Not Applicable

Item 5. Other Information Not Applicable
