UNITED STATES  
SECURITIES AND EXCHANGE COMMISSION  
WASHINGTON, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF  
1934  
for the quarterly period ended March 31, 2015

TRANSITION REPORT UNDER SECTION 13 OR 15(d) OF THE EXCHANGE ACT  
For the transition period from \_\_\_\_\_ to \_\_\_\_\_

COMMISSION FILE NO. 000-50313

SURREY BANCORP

---

(Exact name of registrant as specified in its charter)

North Carolina 59-3772016  
(State or other jurisdiction of incorporation or organization) (IRS Employer Identification No.)

145 North Renfro Street, Mount Airy, NC 27030

---

(Address of principal executive offices)

(336) 783-3900

---

(Registrant's telephone number)

---

Check whether the registrant: (1) filed all reports required to be filed by Section 13 or 15(d) of the Exchange Act during the past 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).  
Yes No

Indicate by checkmark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act (Check one):

Large accelerated filer Accelerated filer

Edgar Filing: SURREY BANCORP - Form 10-Q

Non-accelerated filer    Smaller reporting company

Indicate by checkmark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes    No

State the number of shares outstanding of each of the issuer's classes of common equity, as of the latest practical date:

On May 14, 2015 there were 3,549,665 common shares issued and outstanding.

SURREY BANCORP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

NOTE 1. BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements were prepared in accordance with instructions for Form 10-Q and therefore, do not include all disclosures required by generally accepted accounting principles for a complete presentation of financial statements. In the opinion of management, the consolidated financial statements contain all adjustments necessary to present fairly the financial condition of Surrey Bancorp, (the “Company”), as of March 31, 2015, the results of its operations and comprehensive income for the three months ended March 31, 2015 and 2014, and its changes in stockholders’ equity and cash flows for the three months ended March 31, 2015 and 2014. These adjustments are of a normal and recurring nature. The results of operations for the three months ended March 31, 2015, are not necessarily indicative of the results expected for the full year. These consolidated financial statements should be read in conjunction with the Company’s audited financial statements and related disclosures for the year ended December 31, 2014, included in the Company’s Form 10-K. The balance sheet at December 31, 2014, has been taken from the audited financial statements at that date.

Organization

Surrey Bancorp began operation on May 1, 2003 and was created for the purpose of acquiring all the outstanding shares of common stock of Surrey Bank & Trust (“the Bank”). Stockholders of the bank received six shares of Surrey Bancorp common stock for every five shares of Surrey Bank & Trust common stock owned. The Company is subject to regulation by the Federal Reserve.

Surrey Bank & Trust was organized and incorporated under the laws of the State of North Carolina on July 15, 1996 and commenced operations on July 22, 1996. The Bank currently serves Surry County, North Carolina and Patrick County, Virginia and surrounding areas through five banking offices. As a state chartered bank, which is not a member of the Federal Reserve, the Bank is subject to regulation by the State of North Carolina Banking Commission and the Federal Deposit Insurance Corporation.

Surrey Investment Services, Inc., (“Subsidiary”) was organized and incorporated under the laws of the State of North Carolina on February 10, 1998. The subsidiary provides insurance services through SB&T Insurance and investment advice and brokerage services through LPL Financial.

On July 31, 2000, Surrey Bank & Trust formed Freedom Finance, LLC, a subsidiary operation specializing in the purchase of sales finance contracts from local automobile dealers.

The accounting and reporting policies of the Company, the Bank, and its subsidiaries follow generally accepted accounting principles and general practices within the financial services industry. Following is a summary of the more significant policies.

Critical Accounting Policies

The notes to the audited consolidated financial statements for the year ended December 31, 2014 contain a summary of the significant accounting policies. The Company believes our policies with respect to the methodology for the determination of the allowance for loan losses, and asset impairment judgments, including the recoverability of intangible assets involve a higher degree of complexity and require management to make difficult and subjective judgments which often require assumptions or estimates about highly uncertain matters. Changes in these judgments, assumptions or estimates could cause reported results to differ materially. These critical policies and their application

are periodically reviewed with the Audit Committee and our Board of Directors. See our Annual Report on Form 10-K for full details on critical accounting policies.

#### Principles of Consolidation

The consolidated financial statements include the accounts of the Company, the Bank and the subsidiaries. All significant intercompany transactions and balances have been eliminated in consolidation.

Table of Contents

SURREY BANCORP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1. BASIS OF PRESENTATION, CONTINUED

Presentation of Cash Flows

For purposes of reporting cash flows, cash and cash equivalents includes cash and amounts due from depository institutions (including cash items in process of collection). Overnight interest bearing deposits and federal funds sold are shown separately. Federal funds purchased are shown with securities sold under agreements to repurchase.

Investment Securities

Investments classified as available for sale are intended to be held for indefinite periods of time and include those securities that management may employ as part of asset/liability strategy or that may be sold in response to changes in interest rates, prepayments, regulatory capital requirements or similar factors. These securities are carried at fair value and are based on quoted market prices, where available. If quoted market prices are not available, fair values are based on quoted market prices of comparable instruments or significant other observable inputs.

Investment securities classified as held to maturity are those debt securities that the Bank has the ability and intent to hold to maturity. Accordingly, these securities are carried at cost adjusted for amortization of premiums and accretion of discount, computed by the interest-method over their contractual lives. At March 31, 2015 and December 31, 2014, the Bank had no investments classified as held to maturity.

Loans Held for Sale

The Bank originates and holds Small Business Administration (SBA) and United States Department of Agriculture (USDA) guaranteed loans in its portfolio in the normal course of business. Occasionally, the Bank sells the guaranteed portions of these loans into the secondary market. The loans are generally variable rate loans, which eliminates the market risk to the Bank and are therefore carried at cost. Fixed rate loans are carried at the lower of cost or market. The Bank recognizes gains on the sale of the guaranteed portion upon the consummation of the transaction. The Bank plans to continue to originate guaranteed loans for sales, however no such loans were funded and held for sale at March 31, 2015 and December 31, 2014.

Loans Receivable

Loans receivable that management has the intent and ability to hold for the foreseeable future or until maturity or payoff are reported at their outstanding principal amount adjusted for any charge-offs, the allowance for loan losses, and any deferred fees or cost on originated loans and unamortized premiums or discounts on purchased loans.

Loan origination fees and certain direct origination costs are capitalized and recognized as an adjustment of the yield of the related loan using the interest method. Discounts and premiums on any purchased residential real estate loans are amortized to income using the interest method over the remaining period to contractual maturity, adjusted for anticipated prepayments. Discounts and premiums on any purchased consumer loans are recognized over the expected lives of the loans using methods that approximate the interest method.

Interest is accrued and credited to income based on the principal amount outstanding. The accrual of interest on impaired loans is discontinued when, in management's opinion, the borrower may be unable to meet payments as they become due. When the interest accrual is discontinued, all unpaid accrued interest is reversed. Interest income is

subsequently recognized only to the extent cash payments are received. Payments received on nonaccrual loans are first applied to principal and any residual amounts are then applied to interest. When facts and circumstances indicate the borrower has regained the ability to meet the required payments, the loan is returned to accrual status. Past due loans are determined on the basis of contractual terms.

SURREY BANCORP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1. BASIS OF PRESENTATION, CONTINUED

Allowance for Loan Losses

The allowance for loan losses is established as losses are estimated to have occurred through a provision for loan losses charged to earnings. Loan losses are charged against the allowance when management believes the uncollectability of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance.

The allowance for loan losses is evaluated on a regular basis by management and is based upon management's periodic review of the collectability of the loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available.

The allowance consists of specific, general and unallocated components. The specific component relates to loans that are classified as impaired. For loans that are classified as impaired, an allowance is established when the discounted cash flows (or collateral value or observable market price) of the impaired loan is lower than the carrying value of that loan. The general component covers non-impaired loans and is based on historical loss experience adjusted for qualitative factors. An unallocated component is maintained to cover uncertainties that could affect management's estimate of probable losses. The unallocated component of the allowance reflects the margin of imprecision inherent in the underlying assumptions used in the methodologies for estimating specific and general losses in the portfolio.

A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan by loan basis for commercial and construction loans by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral if the loan is collateral dependent.

Large groups of smaller balance homogeneous loans are collectively evaluated for impairment. Accordingly, the Company does not separately identify individual consumer and residential loans for impairment disclosures.

Recent Accounting Pronouncements

The following is a summary of recent authoritative pronouncements:

In January 2014, the FASB amended Receivables topic of the Accounting Standards Codification. The amendments are intended to resolve diversity in practice with respect to when a creditor should reclassify a collateralized consumer mortgage loan to other real estate owned (OREO). In addition, the amendments require a creditor reclassify a collateralized consumer mortgage loan to OREO upon obtaining legal title to the real estate collateral, or the borrower voluntarily conveying all interest in the real estate property to the lender to satisfy the loan through a deed in lieu of foreclosure or similar legal agreement. The amendments will be effective for the Company for annual periods, and

interim periods within those annual period beginning after December 15, 2014, with early implementation of the guidance permitted. In implementing this guidance, assets that are reclassified from real estate to loans are measured at the carrying value of the real estate at the date of adoption. Assets reclassified from loans to real estate are measured at the lower of the net amount of the loan receivable or the fair value of the real estate less costs to sell at the date of adoption. The Company will apply the amendments prospectively. The Company does not expect these amendments to have a material effect on its financial statements.

Table of Contents

SURREY BANCORP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1. BASIS OF PRESENTATION, CONTINUED

Recent Accounting Pronouncements, continued

In May 2014, the FASB issued guidance to change the recognition of revenue from contracts with customers. The core principle of the new guidance is that an entity should recognize revenue to reflect the transfer of goods and services to customers in an amount equal to the consideration the entity receives or expects to receive. The guidance will be effective for the Company for reporting periods beginning after December 15, 2017. The Company will apply the guidance using a full retrospective approach. The Company does not expect these amendments to have a material effect on its financial statements.

In January 2015, the FASB issued guidance to eliminate from U.S. GAAP the concept of an extraordinary item, which is an event or transaction that is both (1) unusual in nature and (2) infrequently occurring. Under the new guidance, an entity will no longer (1) segregate an extraordinary item from the results of ordinary operations; (2) separately present an extraordinary item on its income statement, net of tax, after income from continuing operations; or (3) disclose income taxes and earnings-per-share data applicable to an extraordinary item. The amendments will be effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015, with early adoption permitted provided that the guidance is applied from the beginning of the fiscal year of adoption. The Company will apply the guidance prospectively. The Company does not expect these amendments to have a material effect on its financial statements.

In February 2015, the FASB issued guidance which amends the consolidation requirements and significantly changes the consolidation analysis required under U.S. GAAP. Although the amendments are expected to result in the deconsolidation of many entities, the Company will need to reevaluate all its previous consolidation conclusions. The amendments will be effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015, with early adoption permitted (including during an interim period), provided that the guidance is applied as of the beginning of the annual period containing the adoption date. The Company does not expect these amendments to have a material effect on its financial statements.

Other accounting standards that have been issued or proposed by the FASB or other standards-setting bodies are not expected to have a material impact on the Company's financial position, results of operations or cash flows.

Subsequent Events

Subsequent events are events or transactions that occur after the balance sheet date but before financial statements are issued. Recognized subsequent events are events or transactions that provide additional evidence about conditions that existed at the date of the balance sheet, including the estimates inherent in the process of preparing financial statements. Non-recognized subsequent events are events that provide evidence about conditions that did not exist at the date of the balance sheet but arose after that date. Management has reviewed events occurring through the date the financial statements were issued and no subsequent events have occurred requiring accrual or disclosure.

## NOTE 2. SECURITIES

Debt and equity securities have been classified in the balance sheets according to management's intent. The amortized costs of securities available for sale and their approximate fair values at March 31, 2015 and December 31, 2014 follow:

	Amortized Cost	Unrealized Gains	Unrealized Losses	Fair Value
<u>March 31, 2015</u>				
Government-sponsored enterprises	\$3,497,609	\$ 395	\$ 5,524	\$3,492,480
Mortgage-backed securities	24,008	704	-	24,712
Corporate bonds	300,000	-	30,000	270,000
Equities and mutual funds	557,986	38,684	10,232	586,438
	\$4,379,603	\$ 39,783	\$ 45,756	\$4,373,630
<u>December 31, 2014</u>				
Government-sponsored enterprises	\$3,500,000	\$ 1,170	\$ 4,640	\$3,496,530
Mortgage-backed securities	25,592	715	-	26,307
Corporate bonds	300,000	-	45,000	255,000
Equities and mutual funds	552,635	42,900	9,567	585,968
	\$4,378,227	\$ 44,785	\$ 59,207	\$4,363,805

At March 31, 2015 and December 31, 2014, substantially all government-sponsored enterprises securities were pledged as collateral on public deposits and for other purposes as required or permitted by law. The mortgage-backed securities were pledged to the Federal Home Loan Bank.

Maturities of mortgage-backed bonds are stated based on contractual maturities. Actual maturities of these bonds may vary as the underlying mortgages are prepaid. The investment in equities and mutual funds by nature have no maturity date and are classified as due in one year or less. The scheduled maturities of securities (all available for sale) at March 31, 2015, were as follows:

	Amortized Cost	Fair Value
Due in one year or less	\$1,057,986	\$1,086,833
Due after one year through five years	3,306,866	3,271,574
Due after five years through ten years	5,546	5,685
Due after ten years	9,205	9,538
	\$4,379,603	\$4,373,630

The following table shows investments' gross unrealized losses and fair value, aggregated by investment category and length of time that the individual securities have been in a continuous unrealized loss position, at March 31, 2015 and December 31, 2014. These unrealized losses on investment securities are a result of volatility in interest rates which relate to government-sponsored enterprises and corporate bonds issued by other banks and market volatility as it relates to equity and mutual fund investments at March 31, 2015 and December 31, 2014.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

## NOTE 2. SECURITIES, CONTINUED

Management considers the nature of the investment, the underlying causes of the decline in the market value and the severity and duration of the decline in market value in determining if impairment is other than temporary.

Consideration is given to (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near term prospects of the issuer, and (3) the intent and ability of the Company to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value. Based upon this evaluation, there are two securities in the portfolio at March 31, 2015, with unrealized losses for a period greater than 12 months. One of these securities also had unrealized losses for a period greater than 12 months at December 31, 2014. We have analyzed each individual security for Other Than Temporary Impairment (“OTTI”) purposes by reviewing delinquencies, loan-to-value ratios, and credit quality and concluded that all unrealized losses presented in the tables above are not related to an issuer’s financial condition but are due to changes in the level of interest rates and no declines are deemed to be other than temporary in nature.

The Company had realized gains of \$4,376 from the sales of equity and mutual fund investment securities for the three month period ended March 31, 2015, and realized gains of \$2,898 from the sales of equity and mutual fund investment securities for the three month periods ended March 31, 2014. Total proceeds from the sales amounted to \$11,135 and \$9,259 in 2015 and 2014, respectively.

## NOTE 3. EARNINGS PER COMMON SHARE

Basic earnings per common share for the three months ended March 31, 2015 and 2014 were calculated by dividing net income available to common stockholders by the weighted average number of common shares outstanding during the period.

The computation of diluted earnings per common share is similar to the computation of basic earnings per common share except that the denominator is increased to include the number of additional common shares that would have been outstanding if dilutive potential common shares had been issued. The numerator is adjusted for any changes in income or loss that would result from the assumed conversion of those potential common shares. The potential dilutive shares are represented by common stock options and by the Series A and D convertible preferred stock. Each share of the Series A preferred is convertible into 2.2955 shares of common stock. Each share of Series D preferred is convertible into 1.10 shares of common stock.

## NOTE 4. COMMITMENTS AND LETTERS OF CREDIT

At March 31, 2015, the Company had commitments to extend credit, including unused lines of credit of approximately \$43,318,000 and letters of credit outstanding of \$2,414,247.

## NOTE 5. LOANS

The major components of loans in the balance sheets at March 31, 2015 and December 31, 2014 are below.

	2015	2014
Commercial	\$52,969,456	\$56,602,425
Real estate:		
Construction and land development	5,788,579	10,061,249

Edgar Filing: SURREY BANCORP - Form 10-Q

Residential, 1-4 families	42,097,111	41,824,806
Residential, 5 or more families	1,229,561	1,109,586
Farmland	3,660,210	3,486,002
Nonfarm, nonresidential	81,314,177	74,275,793
Agricultural	633,283	675,474
Consumer, net of discounts of \$13,915 in 2015 and \$11,950 in 2014	4,743,081	4,997,023
	192,435,458	193,032,358
Deferred loan origination costs, net of (fees)	125,706	71,378
	192,561,164	193,103,736
Allowance for loan losses	(3,419,908 )	(3,554,664 )
	\$189,141,256	\$189,549,072

Credit Quality Indicators:

The Company categorizes loans into risk categories based on relevant information about the ability of borrowers to service their debt such as: current financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors. The Company analyzes loans individually by classifying the loans as to credit risk. Loans classified as substandard or special mention are reviewed quarterly by the Company for further impairment or improvement to determine if appropriately classified. All other loans greater than \$500,000, commercial lines greater than \$250,000 and personal lines of credit greater than \$100,000, and unsecured loans greater than \$100,000 are specifically reviewed at least annually to determine the appropriate loan grading. In addition, during the renewal process of any loan, as well as when a loan becomes past due, the Company will evaluate the loan grade.

## NOTE 6. ALLOWANCE FOR LOAN LOSSES, CONTINUED

Loans excluded from the scope of the annual review process above are generally classified as pass credits until: (a) they become past due; (b) management becomes aware of deterioration in the credit worthiness of the borrower; or (c) the customer contacts the Company for a modification. In these circumstances, the loan is specifically evaluated for potential classification as to special mention, substandard or even charged off. The Company uses the following definitions for risk ratings:

**Special Mention.** Loans classified as special mention have a potential weakness that deserves management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or of the institution's credit position at some future date.

**Substandard.** Loans classified as substandard are inadequately protected by the current net worth and payment capacity of the obligor or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

**Doubtful.** Loans classified as doubtful have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

Loans by credit quality indicator are provided in the following table.

	Total	Pass Credits	Special Mention	Substandard	Doubtful
<u>March 31, 2015</u>

## NOTE 7. TROUBLED DEBT RESTRUCTURINGS

For the three months ended March 31, 2015 and 2014, the following table presents loans modified during the period that were considered to be troubled debt restructurings.

	For the three months ended March 31, 2015		For the three months ended March 31, 2014	
	Pre- Modification of Outstanding Construction Investment	Post- Modification Outstanding Recorded Investment	Pre- Modification of Outstanding Construction Investment	Post- Modification Outstanding Recorded Investment
Troubled Debt Restructurings				
Construction and development	- \$ -	\$ -	- \$ -	\$ -
1-4 Family residential	-	-	3	159,927
Nonfarm, nonresidential	-	-	-	-
Commercial and industrial	-	-	-	-

During the three months ended March 31, 2015 and 2014, no loans that had previously been restructured were in default.

In the determination of the allowance for loan losses, management considers troubled debt restructurings and subsequent defaults in these restructurings by adjusting the loan grades of such loans, which figure into the environmental factors associated with the allowance. Defaults resulting in charge-offs affect the historical loss experience ratios which are a component of the allowance calculation. Additionally, specific reserves may be established on restructured loans evaluated individually.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 8. FAIR VALUE

The Company utilizes fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. Securities available for sale, trading securities and derivatives, if present, are recorded at fair value on a recurring basis. Additionally, from time to time, the Company may be required to record at fair value other assets on a nonrecurring basis, such as loans held for sale, loans held for investment and certain other assets. These nonrecurring fair value adjustments typically involve application of lower of cost or market accounting or write-downs of individual assets.

Fair Value Hierarchy

Under the Fair Value Measurements and Disclosures Topic of the FASB ASC, the Company groups assets and liabilities at fair value in three levels, based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value. These levels are:

Level 1 Valuation is based upon quoted prices for identical instruments traded in active markets.

Level 2 Valuation is based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market.

Level 3 Valuation is generated from model-based techniques that use at least one significant assumption not observable in the market. These unobservable assumptions reflect estimates of assumptions that market participants would use in pricing the asset or liability. Valuation techniques include use of option pricing models, discounted cash flow models and similar techniques.

Following is a description of valuation methodologies used for assets and liabilities recorded at fair value.

Investment Securities Available for Sale

Investment securities available for sale are recorded at fair value on a recurring basis. Fair value measurement is based upon quoted prices, if available. If quoted prices are not available, fair values are measured using independent pricing models or other model-based valuation techniques such as the present value of future cash flows, adjusted for the security's credit rating, prepayment assumptions and other factors such as credit loss assumptions. Level 1 securities include those traded on an active exchange, such as the New York Stock Exchange, U.S. Treasury securities that are traded by dealers or brokers in active over-the-counter markets and money market funds. Level 2 securities include mortgage-backed securities issued by government sponsored entities, municipal bonds and corporate debt securities. Securities classified as Level 3 include asset-backed securities in less liquid markets.

Loans

The Company does not record loans at fair value on a recurring basis. However, from time to time, a loan is considered impaired and an allowance for loan losses is established. Loans for which it is probable that payment of interest and principal will not be made in accordance with the contractual terms of the loan agreement are considered impaired. Once a loan is identified as individually impaired, management measures impairment in accordance with the Receivables Topic of the FASB ASC. The fair value of impaired loans is estimated using one of several methods, including collateral value, market value of similar debt, enterprise value, liquidation value and discounted cash flows.

Those impaired loans not requiring an allowance represent loans for which the fair value of the expected repayments or collateral exceed the recorded investments in such loans. At March 31, 2015, substantially all of the total impaired loans were evaluated based on the fair value of the collateral and discounted cash flows. In accordance with the Fair Value and Measurement Topic of the FASB ASC, impaired loans where an allowance is established based on the fair value of collateral require classification in the fair value hierarchy. When the fair value of the collateral is based on an observable market price or a current appraised value, the Company records the impaired loan as nonrecurring Level 2. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, the Company records the impaired loan as nonrecurring Level 3.

Table of Contents

## SURREY BANCORP

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

## NOTE 8. FAIR VALUE, CONTINUED

## Servicing Assets

A valuation of loan servicing rights is performed on an individual basis due to the small number of loans serviced. Loans are evaluated on a discounted earnings basis to determine the present value of future earnings. The present value of the future earnings is the estimated market value for the loan, calculated using consensus assumptions that a first party purchaser would utilize in evaluating a potential acquisition of the servicing. As such, the Company classifies loan servicing rights as Level 3.

## Foreclosed Assets

Foreclosed assets are adjusted to fair value upon transfer of the loans to foreclosed assets. Subsequently, foreclosed assets are carried at the lower of carrying value or fair value. Fair value is based upon independent market prices, appraised values of the collateral or management's estimation of the value of the collateral. When the fair value of the collateral is based on an observable market price or a current appraised value, the Company records the foreclosed asset as nonrecurring Level 2. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, the Company records the foreclosed asset as nonrecurring Level 3.

## Assets and Liabilities Recorded at Fair Value on a Recurring Basis

The table below presents the recorded amount of assets and liabilities measured at fair value on a recurring basis.

(in thousands)

	Total	Level 1	Level 2	Level 3

## NOTE 8. FAIR VALUE, CONTINUED

The change in the fair value of corporate bond assets for the three month period ended March 31, 2015 was \$15,000. There was no change in the fair value for the three months period ended March 31, 2104.

## Assets and Liabilities Recorded at Fair Value on a Nonrecurring Basis

The Company may be required, from time to time, to measure certain assets or liabilities at fair value on a nonrecurring basis in accordance with U.S. generally accepted accounting principles. These include assets and liabilities that are measured at the lower of cost or market that were recognized at fair value below cost at the end of the period. Assets and liabilities measured at fair value on a nonrecurring basis are included in the table below.

(in thousands)

March 31, 2015	Total	Level 1	Level 2	Level 3
Impaired loans:

Foreclosed assets	281	-	-	281
Servicing assets	350	-	-	350
Total assets at fair value	\$2,061	\$ -	\$ -	\$2,061

## Financial Instruments

The following methods and assumptions were used by the Company in estimating its fair value disclosures for financial instruments:

Cash and due from banks: The carrying amounts reported in the balance sheet for cash and due from banks approximate their fair values.

Interest-bearing deposits with banks: Fair values for time deposits are estimated using a discounted cash flow analysis that applies interest rates currently being offered on certificates to a schedule of aggregated contractual maturities on

such time deposits.

Federal funds sold: Due to the short-term nature of these assets, the carrying value approximates fair value.

Securities: Fair values for securities, excluding restricted equity securities, are based on quoted market prices, where available. If quoted prices are not available, fair values are measured using independent pricing models or other model-based valuation techniques such as the present value of future cash flows, adjusted for the security's credit rating, prepayment assumptions and other factors such as credit loss assumptions. The carrying values of restricted equity securities approximate fair values.

Table of Contents

## SURREY BANCORP

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

## NOTE 8. FAIR VALUE, CONTINUED

Loans receivable: For variable-rate loans that reprice frequently and with no significant change in credit risk, fair values are based on carrying amounts. The fair values for other loans are estimated using discounted cash flow analysis, based on interest rates currently being offered for loans with similar terms to borrowers of similar credit quality. Loan fair value estimates include judgments regarding future expected loss experience and risk characteristics. The fair value of impaired loans is estimated using one of several methods, including collateral value, market value of similar debt, enterprise value, liquidation value and discounted cash flows.

Bank owned life insurance: The carrying amount reported in the balance sheet approximates the fair value as it represents the cash surrender value of the life insurance.

Deposit liabilities: The fair values disclosed for demand and savings deposits are, by definition, equal to the amount payable on demand at the reporting date. The fair values for certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently being offered on certificates to a schedule of aggregated contractual maturities on such time deposits.

Federal funds purchased, securities sold under agreements to repurchase and short-term debt: The carrying amounts of federal funds purchased, securities sold under agreements to repurchase and short-term debt approximate their fair values.

Long-term debt: The fair value of long-term debt is estimated using a discounted cash flow calculation that applies interest rates currently available on similar instruments.

Other liabilities: For fixed-rate loan commitments, fair value considers the difference between current levels of interest rates and the committed rates. The carrying amounts of other liabilities approximate fair value.

The following presents the carrying amount, fair value, and placement in the fair value hierarchy of the Company's financial instruments as of March 31, 2015 and December 31, 2014. This table excludes financial instruments for which the carrying amount approximates fair value.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Introduction

This discussion, analysis and related financial information are presented to explain the significant factors which affected Surrey Bancorp's financial condition and results of operations for the three months ended March 31, 2015 and 2014. This discussion should be read in conjunction with the financial statements and related notes contained within this report.

Surrey Bancorp ("Company") is a North Carolina corporation, located in Mount Airy, North Carolina. The Company was incorporated on February 6, 2003, and began business on May 1, 2003.

Surrey Bank & Trust ("Bank") is a North Carolina state chartered bank, located in Mount Airy, North Carolina. The Bank was chartered on July 15, 1996, and began operations on July 22, 1996. The Bank has two operating subsidiaries: Surrey Investment Services, Inc. and Freedom Finance, LLC.

Effective March 5, 1998, the Bank became a member of the Federal Home Loan Bank.

Highlights

Certain information contained in this discussion may include "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These forward-looking statements are generally identified by phrases such as "the Company expects," "the Company believes" or words of similar import. Such forward-looking statements involve known and unknown risks including, but not limited to, changes in general economic and business conditions, interest rate fluctuations, competition within and from outside the banking industry, new products and services in the banking industry, risk inherent in making loans such as repayment risks and fluctuating collateral values, problems with technology utilized by the Company, changing trends in customer profiles and changes in laws and regulations applicable to the Company. Although the Company believes that its expectations with respect to the forward-looking statements are based upon reliable assumptions within the bounds of its knowledge of its business and operations, there can be no assurance that actual results, performance or achievements of the Company will not differ materially from any future results, performance or achievements expressed or implied by such forward-looking statements.

Net income available for common stockholders for the three months ended March 31, 2015, was \$683,207 or \$0.17 per diluted share outstanding, compared to a \$631,173 or \$0.16 per diluted share outstanding, for the same period in 2014. Earnings for the three months ended March 31, 2015, are approximately 8.2% higher than for the same period in 2014. The increase in earnings results from an increase in net interest income and an increase in the recapture of loan loss reserves. Net interest income increased from \$2,285,803 in the first quarter of 2014 to \$2,422,776 in 2015. Most of this increase is due to loan growth. Average loans outstanding increased 4.7% from the first quarter of 2014 to 2015, or approximately \$8,587,000. The net interest margin increased from 4.12% to 4.17% from 2014 to 2015 due to lower deposit costs. Asset yields dropped from 4.74% in 2014 to 4.68% in 2015 but the reduction was offset by a reduction in the cost of funds. The cost of funds decreased from 0.68% in the first quarter of 2014 to 0.57% in the first quarter of 2015. The recapture of loan loss reserves increased from a recapture of \$62,362 in the first quarter of 2014 to a recapture of \$113,794 in 2015. The recapture of reserve is partially due to a reduction in gross loans since the beginning of the year and an increase in the percentage of loans carrying government guarantees. Gross loans decreased \$596,900 from December 31, 2014 to March 31, 2015. However, the percentage of loans carrying government guarantees increased from \$45,141,818, or 23.4% of gross loans at the end of 2014 to \$49,835,184, or 25.9% of gross loans at March 31, 2015. The decreased credit exposure resulted in lower reserves.

Noninterest income increased from \$581,928 in the first quarter of 2014 to \$625,234 in 2015. The increase primarily results from an increase in brokerage commissions from the Bank's brokerage and investment subsidiary, Surrey Investment Services, Inc., and increased fees from debit card transactions. Brokerage commissions increased from \$47,132 in the first quarter of 2014 to \$79,041 in 2015. Debit card income, included in other service charges and fees, increased by approximately \$21,000, or 21.1% from 2014 to 2015. Noninterest expenses increased 8.9% from \$1,867,387 in the first quarter of 2014, to \$2,032,668 in 2015. This increase was due to expenses associated with foreclosed assets. Increases in foreclosed assets expense, professional fees and other expense all increased as a result of cost required to take possession and dispose of foreclosed properties.

Table of Contents

ITEM MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF  
2. OPERATIONS, CONTINUED

On March 31, 2015, Surrey Bancorp's assets totaled \$256,244,969 compared to \$253,201,323 on December 31, 2014. Net loans were \$189,141,256 compared to \$189,549,072 on December 31, 2014. This net decrease was the result of a \$542,572 decrease in loans and net deferred fees and a \$134,756 net decrease in the loan loss reserve. Construction and commercial loans account for the decrease, with nonfarm, nonresidential loans representing most of the growth. There was a 42.5% decrease in construction loans while other real estate loans collectively grew 2.5%. Commercial loans decreased by 6.4%. Overall gross loans decreased 0.3%

Total deposits on March 31, 2015, were \$209,906,549 compared to \$206,666,581 at the end of 2014. This increase is attributable to an increase in interest-bearing demand deposits accounts, which increased from \$30,302,622 at December 31, 2014 to \$33,925,416 at March 31, 2015. Overall, noninterest-bearing and interest-bearing demand deposits increased 5.6% from 2014 totals, while savings deposits, including money market accounts, increased 2.5%. Certificates of deposit decreased 3.0% from December 31, 2014 totals.

Common stockholders' equity increased by \$688,343, or 1.87%, during the three months ended March 31, 2015. The increase is comprised of net income of \$728,434 and adjustments to other comprehensive income of \$5,136. Decreases included the declaration and accrual of preferred dividends of \$45,227. The net increase resulted in a common stock book value of \$9.46 per share, up from \$9.27 on December 31, 2014.

The book value per common share is calculated by taking total stockholders' equity, subtracting all preferred equity, and then dividing by the total number of common shares outstanding at the end of the reporting period.

Preferred stockholders' equity remained the same during the period ended March 31, 2015.

Financial Condition, Liquidity and Capital Resources

Investments

The Bank maintains a portfolio of securities as part of its asset/liability and liquidity management programs which emphasize effective yields and maturities to match its needs. The composition of the investment portfolio is examined periodically and appropriate realignments are initiated to meet liquidity and interest rate sensitivity needs for the Bank. The Company also invests funds in a brokerage account made up of selected equities and mutual funds. The investments were made to increase income in the holding company and improve yields.

Available for sale securities are reported at fair value and consist of bonds, notes, debentures and equity securities and mutual funds not classified as trading securities or as held to maturity securities.

Unrealized holding gains and losses, net of tax, on available for sale securities are reported as a net amount in a separate component of stockholders' equity. Realized gains and losses on the sale of available for sale securities are determined using the specific-identification method. Premiums and discounts are recognized in interest income using the interest method over the period to maturity or to call dates.

Declines in the fair value of individual held to maturity and available for sale securities below cost that are other than temporary are reflected as write-downs of the individual securities to fair value. Related write-downs are included in earnings as realized losses.

Investments in available for sale securities of \$4,373,630 consisted of Government-sponsored enterprise obligations with maturities ranging from 5 to 34 months, corporate bonds with maturities of 3.50 years, that reprice quarterly,

GNMA adjustable rate mortgage securities, which adjust annually, and equity securities and mutual funds.

Loans

Net loans outstanding on March 31, 2015, were \$189,141,256 compared to \$189,549,072 on December 31, 2014. The Bank maintains a loan portfolio dominated by real estate and commercial loans diversified among various industries. Approximately 63.6% of the Bank's loans as of March 31, 2015, are fixed rate loans with 36.4% floating with the Bank's prime rate or other appropriate internal or external indices.

Table of ContentsITEM MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF  
2. OPERATIONS, CONTINUEDDeposits

Deposits on March 31, 2015, were \$209,906,549, compared to \$206,666,581 on December 31, 2014. The March total consists of a base of approximately 12,778 accounts compared to 12,690 accounts at December 31, 2014. Interest-bearing accounts represent 74.3% of March 31, 2015 period end deposits versus 74.4% at December 31, 2014.

Stockholders' Equity

Surrey Bancorp and Surrey Bank & Trust are subject to various regulatory capital requirements administered by federal banking agencies. The Company and the Bank maintain strong capital positions which exceed all capital adequacy requirements of federal regulatory authorities. Common Equity Tier I Capital "CET1" is a new regulatory ratio resulting from BASEL III. CET1 primarily consist of the Company's and the Bank's common shares, common share surplus, retained earnings and accumulated other comprehensive income. The Company's and the Bank's capital ratios are presented in the following table.

	Ratio	Minimum Required For Capital Adequacy Purposes	
March 31, 2015:			
Total Capital (to Risk-Weighted Assets)			
Surrey Bancorp (Consolidated)	21.93 %	8.0	%
Surrey Bank & Trust	21.58 %	8.0	%

Table of ContentsITEM MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF  
2. OPERATIONS, CONTINUEDAsset Quality

The Company actively monitors delinquencies, nonperforming assets and potential problem loans. Unsecured loans past due more than 90 days are placed into nonaccrual status. Secured loans reach nonaccrual status when they surpass 120 days past due. When facts and circumstances indicate the borrower has regained the ability to meet the required payments, the loan is returned to accrual status.

Management reviews all criticized loans on a periodic basis for possible charge offs. Any unsecured loans that are 90 plus days past due must be charged off in full. If secured, a reserve equal to the potential loss will be established. Any charge off must be reported to the Board of Directors within 30 days. On a monthly basis, a management report of recovery actions is provided to the Board of Directors.

Nonperforming assets are detailed below.

	March 31, 2015	December 31, 2014		
Nonaccrual loans	\$2,639,553	\$2,988,949		
Loans past due 90 days and still accruing	27,059	53,185		
Foreclosed assets	175,526	280,821		
Total	\$2,842,138	\$3,322,955		
Total assets	\$256,244,969	\$253,201,323		
Ratio of nonperforming assets to total assets	1.11	%	1.31	%

At March 31, 2015, the Bank had loans totaling \$2,639,553 in nonaccrual status. Nonaccrual loans totaling \$555,630 were current at the end of March. The guaranteed portion of nonaccrual loans at March 31, 2015 is \$1,338,866. Foreclosed assets at March 31, 2015 primarily consist of nonfarm, nonresidential properties. Loans that were considered impaired but were still accruing interest at March 31, 2015, including troubled debt restructurings, totaled \$2,695,275. A loan is considered impaired when, based on current information and events, it is probable that the Bank will be unable to collect all amounts due under the contractual terms of the loan agreement. Specific reserves on nonaccrual and impaired loans totaled \$321,774 at March 31, 2015, or 6.0% of the balances outstanding.

Nonaccrual and impaired loans still accruing are summarized below:

	March 31, 2015	December 31, 2014
Construction and development	\$12,953	\$13,536
1-4 family residential	1,104,813	601,587
Nonfarm, nonresidential	2,904,188	2,658,937
Commercial and industrial	1,052,132	1,399,470
Consumer	18,381	8,854
Other loans	242,361	228,111
Total impaired and nonaccrual	\$5,334,828	\$4,910,495
Guaranteed portion	\$2,207,232	\$2,090,348

At March 31, 2015, consumer loans totaling \$415,778 are included above that were not individually evaluated for impairment in the determination of the allowance for loan loss reserve (See Note 6). These loans are primarily home equity loans collateralized by 1-4 family properties which are considered consumer loans. These loans are on nonaccrual status at March 31, 2015 and therefore considered impaired.

Table of ContentsITEM MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF  
2. OPERATIONS, CONTINUED

The loan portfolio is dominated by real estate and commercial loans. The general composition of the loan portfolio is as follows:

	March 31, 2015			December 31, 2014		
Construction and development	\$5,788,579	3.01	%	\$10,061,249	5.21	%
1-4 family residential	42,097,111	21.88	%	41,824,806	21.67	%
Multi-family	1,229,561	0.64	%	1,109,586	0.57	%
Farmland	3,660,210	1.90	%	3,486,002	1.81	%
Nonfarm, nonresidential	81,314,177	42.26	%	74,275,793	38.48	%
Total real estate	134,089,638	69.69	%	130,757,436	67.74	%
Agricultural	633,283	0.33	%	675,474	0.35	%
Commercial and industrial	52,969,456	27.52	%	56,602,425	29.32	%
Consumer	4,743,081	2.46	%	4,997,023	2.59	%
Total loans	\$192,435,458	100.00	%	\$193,032,358	100.00	%

The concentrations represented above do not, based on managements' assessment, expose the Bank to any unusual concentration risk. Based on the Bank's asset size, the concentrations that are above area peer group analysis are nonfarm nonresidential and commercial and industrial loans. Management recognizes the inherent risk associated with commercial real estate and commercial lending, including a borrower's actual results of operations not corresponding to those projected by the borrower when the loan was funded; economic factors such as the number of housing starts and increases in interest rates, etc.; depression of collateral values; and completion of projects within the original cost and time estimates. The Bank mitigates some of that risk by actively seeking government guarantees on these loans. Collectively, the Bank has approximately \$62,895,089 in loans that carry government guarantees. The guaranteed portion of these loans amounts to \$49,835,184 at March 31, 2015. Loan guarantees by loan class are below:

	March 31, 2015	Guaranteed Portion		
		Amount	Percentage	
Construction and development	\$5,788,579	\$15,455	0.27	%
1-4 family residential	42,097,111	576,171	1.37	%
Multi-family	1,229,561	7,569	0.62	%
Farmland	3,660,210	757,877	20.71	%
Nonfarm, nonresidential	81,314,177	35,034,171	43.08	%
Total real estate	134,089,638	36,391,243	27.14	%
Agricultural	633,283	-	-	%
Commercial and industrial	52,969,456	13,443,941	25.38	%
Consumer	4,743,081	-	-	%
Total loans	\$192,435,458	\$49,835,184	25.90	%

Loans in higher risk categories, such as non-owner occupied nonfarm, non-residential property and commercial real estate construction represent a small segment of our loan portfolio. Commercial construction loans included in construction and development loans amounted to \$1,956,921, or 1.02% of total loans at March 31, 2015. Non-owner occupied nonfarm, non-residential properties included in nonfarm, non-residential loans above amounted to \$14,115,423, or 7.34% of total loans at March 31, 2015.

The consolidated recapture of loan losses was \$113,794 for the first three months of 2015 compared to a recapture of \$62,362 for the same period in 2014. Gross loans decreased \$596,900 from December 31, 2014 to March 31, 2015. However, the percentage of loans carrying government guarantees increased from \$45,141,818, or 23.4% of gross loans at the end of 2014 to \$49,835,184, or 25.9% of gross loans at March 31, 2015. The decreased credit exposure resulted in lower reserves.

The reserve for loan losses on March 31, 2015, was \$3,419,908 or 1.77% of period end loans. This percentage is derived from total loans. Approximately \$62,895,000 of total loans outstanding at March 31, 2015, are government guaranteed loans which carry guarantees ranging from 49% to 100% of the outstanding loan balance. When the guaranteed portion of the loans, for which the Bank has no credit exposure, is removed from the equation the loan loss reserve is approximately 2.39% of outstanding loans. At December 31, 2014 the loan loss reserve percentage was 1.83% of total loans and 2.40% of loans net of government guarantees.

Table of ContentsITEM MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF  
2. OPERATIONS, CONTINUED

The level of reserve is established based upon management's evaluation of historical loss data and the effects of certain environmental factors on the loan portfolio. The historical loss portion of the reserve is computed using the average loss data from the past applied to its corresponding category of loans. However, historical losses only reflect a small portion of the Bank's loan loss reserve. The environmental factors represent risk from external economic influences on the credit quality of the loan portfolio. These factors include the movement of interest rates, unemployment rates, past due and charge off trends, loan grading migrations, movement in collateral values and the Bank's exposure to certain loan concentrations. Positive or negative movements in any of these factors have an effect on the credit quality of the loan portfolio. As a result, management continues to actively monitor the Bank's asset quality affected by these environmental factors. The following table is a summary of loans past due at March 31, 2015 and December 31, 2014.

	March 31, 2015		December 31, 2014		
	30-89 Days	90 Days Plus	30-89 Days	90 Days Plus	
Construction and development	\$14,539	\$-	\$94,736	\$-	
1-4 family residential	1,264,395	59,841	637,000	172,981	
Nonfarm, non-residential	298,478	663,902	243,206	663,902	
Commercial and industrial	110,934	878,035	84,221	1,271,937	
Consumer	208,300	28,181	218,680	55,428	
Other loans	-	-	-	-	
	\$1,896,646	\$1,629,959	\$1,277,843	\$2,164,248	
Non-accrual loans included above	\$481,023	\$1,602,900	\$370,697	\$2,109,942	
Guaranteed portion	\$132,804	\$1,163,058	\$100,869	\$1,935,839	
Ratio to total loans	0.99	% 0.85	% 0.66	% 1.12	%
Ratio to total loans, net of guarantees	1.24	% 0.33	% 0.80	% 0.15	%

Past due loans are reviewed weekly and collection efforts assessed to determine potential problems arising in the loan portfolio. Proactive monitoring of past due accounts allows management to anticipate trends within the portfolio and make appropriate adjustments to collection efforts and to the allowance for loan losses. Collectively, past dues increased slightly from December 31, 2014 to March 31, 2015. The increase is in the 30-89 day time frame, as the 90 day plus time frame decreased. The largest increase is in 1-4 family residential loans which increased \$627,395. Three loans make up \$585,469 of the increase in 1-4 family residential delinquencies.

Net of loan guarantees, total past dues have increased from \$1,405,383 at December 31, 2014, to \$2,230,743 at March 31, 2015, or 58.7%. Total past due loans at March 31, 2015 consist of forty-eight loans with an average balance of \$73,470, compared to fifty-seven loans at December 31, 2014, with an average balance of \$58,614. Loans over \$250,000 delinquent at March 31, 2015 and December 31, 2014 amounted to \$1,261,779 and \$1,223,882, respectively. The March 2014 and December 2014 totals consist of three loans, respectively, two of which are the same. The guaranteed portion of these loans at March 31, 2015 and December 31, 2014, is \$752,731 and \$1,072,042, respectively.

Management believes that its loan portfolio is sufficiently diversified such that a downturn in a particular market or industry will not have a significant impact on the loan portfolio or the Bank's financial condition. Management believes that its provision and reserve offer an adequate allowance for loan losses and provide an appropriate reserve for the loan portfolio. The Bank lends primarily in Surry County, North Carolina and Patrick County, Virginia and

surrounding counties.

ITEM MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF  
2. OPERATIONS, CONTINUED

Interest Rate Sensitivity and Liquidity

One of the principal duties of the Bank's Asset/Liability Committee is management of interest rate risk. The Bank utilizes quarterly asset/liability reports prepared by a regional correspondent bank to project the impact on net interest income that might occur with hypothetical interest rate changes. The committee monitors and manages asset and liability strategies and pricing.

Another function of the Asset/Liability Committee is maintaining adequate liquidity and planning for future liquidity needs. Having adequate liquidity means the ability to meet current funding needs, including deposit withdrawals and commitments, in an orderly manner without sacrificing earnings. The Bank funds its investing activities, including making loans and purchasing investments, by attracting deposits and utilizing short-term borrowings when necessary.

At March 31, 2015, the liquidity position of the Company was excellent, in management's opinion, with short-term liquid assets of \$53,615,789 compared to \$49,129,109 at December 31, 2014. To provide supplemental liquidity, the Bank has seven unsecured lines of credit with correspondent banks totaling \$35,500,000. At March 31, 2015, there were no advances against these lines. Additionally, the Bank has a secured borrowing arrangement with the Federal Home Loan Bank (FHLB). The maximum credit available under this agreement approximates \$12,776,000 of which \$6,250,000 had been advanced at March 31, 2015.

ITEM 4. CONTROLS AND PROCEDURES

As of the end of the period covered by the report, an evaluation was performed under the supervision and with the participation of the Company's management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Exchange Act Rule 13a-15e. Based on the evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the design and operation of these disclosure controls and procedures were effective. There have not been any changes in the Company's internal control over financial reporting that occurred during the Company's last quarter that has materially affected, or is reasonably likely to materially affect, internal control over financial reporting.
