This Quarterly Report on Form 10-Q contains a number of forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). These statements may be identified by use of words such as "anticipate," "believe," "could," "estimate," "expect," "intend," "seek," "may," "outlook," "plan," "potential," "predict," "project," "should," "will," "would" and similar terms and phrases, including references to assumptions.

Forward-looking statements are based upon various assumptions and analyses made by Dime Community Bancshares, Inc. (the "Holding Company," and together with its direct and indirect subsidiaries, the "Company") in light of management's experience and its perception of historical trends, current conditions and expected future developments, as well as other factors it believes appropriate under the circumstances. These statements are not guarantees of future performance and are subject to risks, uncertainties and other factors (many of which are beyond the Company's control) that could cause actual conditions or results to differ materially from those expressed or implied by such forward-looking statements. These factors include, without limitation, the following:

- the timing and occurrence or non-occurrence of events may be subject to circumstances beyond the Company's control;
- there may be increases in competitive pressure among financial institutions or from non-financial institutions;
- the net interest margin is subject to material short-term fluctuation based upon market rates;
- changes in deposit flows, loan demand or real estate values may adversely affect the business of The Dime Savings Bank of Williamsburgh (the "Bank");
- changes in accounting principles, policies or guidelines may cause the Company's financial condition to be perceived differently;
- changes in corporate and/or individual income tax laws may adversely affect the Company's business or financial condition;
- general economic conditions, either nationally or locally in some or all areas in which the Company conducts business, or conditions in the securities markets or the banking industry may be less favorable than the Company

- currently anticipates;
- legislation or regulatory changes may adversely affect the Company's business;
- technological changes may be more difficult or expensive than the Company anticipates;
- success or consummation of new business initiatives may be more difficult or expensive than the Company anticipates;
- litigation or other matters before regulatory agencies, whether currently existing or commencing in the future, may delay the occurrence or non-occurrence of events longer than the Company anticipates; and
- The risks referred to in the section entitled "Risk Factors."

The Company has no obligation to update any forward-looking statements to reflect events or circumstances after the date of this document.

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)
(Dollars in Thousands Except Per Share Amounts)

1. NATURE OF OPERATIONS

The Holding Company is a Delaware corporation and parent company of the Bank, a New York State chartered stock savings bank. The Holding Company's direct subsidiaries are the Bank, 842 Manhattan Avenue Corp., and Dime Community Capital Trust 1. The Bank's direct subsidiaries are Boulevard Funding Corp., Dime Insurance Agency Inc., DSBW Preferred Funding Corporation, DSBW Residential Preferred Funding Corp., Dime Reinvestment Corp., 195 Havemeyer Corp. and DSB Holdings NY, LLC.

The Bank maintains its headquarters in the Williamsburg section of Brooklyn, New York and operates twenty-five full service retail banking offices located in the New York City ("NYC") boroughs of Brooklyn, Queens, and the Bronx, and in Nassau County, New York. The Bank's principal business is gathering deposits from customers within its market area and via the internet, and investing them primarily in multifamily residential, commercial real estate and mixed used loans, as well as mortgage-backed securities ("MBS"), obligations of the U.S. Government and Government Sponsored Enterprises ("GSEs"), and corporate debt and equity securities. All of the Bank's lending occurs in the greater NYC metropolitan area.

2. SUMMARY OF ACCOUNTING POLICIES

In the opinion of management, the accompanying unaudited condensed consolidated financial statements contain all adjustments necessary for a fair presentation of the Company's financial condition as of June 30, 2016 and December 31, 2015, the results of operations and statements of comprehensive income for the three-month and six-month periods ended June 30, 2016 and 2015, and the changes in stockholders' equity and cash flows for the six-month periods ended June 30, 2016 and 2015. The results of operations for the three-month and six-month periods ended June 30, 2016 are not necessarily indicative of the results of operations for the remainder of the year ending December 31, 2016. Certain information and note disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") have been omitted pursuant to the rules and regulations of the U. S. Securities and Exchange Commission ("SEC").

The preparation of the condensed consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the condensed consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Please see "Part I - Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Critical Accounting Policies" for a discussion of areas in the accompanying unaudited condensed consolidated financial statements utilizing significant estimates.

These unaudited condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements as of and for the year ended December 31, 2015 and notes thereto.

3. RECENT ACCOUNTING PRONOUNCEMENTS

In January 2016, the Financial Accounting Standards Board ("FASB") issued ASU 2016-01, an amendment to Recognition and Measurement of Financial Assets and Financial Liabilities (Subtopic 825-10). The objectives of the ASU are to: (1) require equity investments to be measured at fair value, with changes in fair value recognized in net income, (2) simplify the impairment assessment of equity investments without readily determinable fair values, (3) eliminate the requirement to disclose methods and significant assumptions used to estimate fair value for financial instruments measured at amortized cost on the balance sheet, (4) require the use of the exit price notion when

measuring the fair value of financial instruments, and (5) clarify the need for a valuation allowance on a deferred tax asset related to available-for-sale securities in combination with the entity's other deferred tax assets. The amendments in this ASU are effective for public business entities for annual periods, and interim periods within those annual periods, beginning after December 15, 2017. The Company is evaluating the potential impact of ASU 2016-01 on its consolidated financial statements.

In February 2016, the FASB issued ASU 2016-02, Leases (Topic 842). ASU 2016-02 requires companies that lease valuable assets to recognize on their balance sheets the assets and liabilities generated by contracts longer than a year. The amendments in this update are effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2018, however, early adoption is permitted. The Company is evaluating the potential impact of ASU 2016-02 on the its consolidated financial statements.

Table of Contents

In March 2016, the FASB issued ASU 2016-08, Revenue from Contracts with Customers (Topic 606): Principal Versus Agent Consideration - Reporting Revenue Gross Versus Net. The objective of the ASU is to align the recognition of revenue with the transfer of promised goods or services provided to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The amendments in this ASU are effective for public business entities for annual periods, and interim periods within those annual periods, beginning after December 15, 2017. The Company is evaluating the potential impact on its consolidated financial statements.

In March 2016, the FASB issued ASU 2016-09, Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting. The objectives of the ASU are to simplify accounting for the tax consequences of a stock payment and amend the manner in which excess tax benefits and a business's payments to satisfy the tax obligation for recipients of the shares should be classified. The amendments: (i) allow companies to estimate the number of stock awards they expect to vest, and (ii) revise the withholding requirements for classifying stock awards as equity. The amendments in this ASU are effective for public companies for fiscal years beginning after December 15, 2016, however, early adoption is permitted. The adoption of ASU 2016-09 is not expected to have a material impact on the Company's consolidated financial statements.

In June 2016, the FASB issued ASU No. 2016-013, "Financial Instruments – Credit Losses (Topic 326)", which requires the measurement of all expected credit losses for financial assets held at the reporting date be based on historical experience, current condition, and reasonable and supportable forecasts. Financial institutions and other organizations will now use forward-looking information to better inform their credit loss estimates. This guidance also amends the accounting for credit losses on available-for-sale debt securities and purchased financial assets with credit deterioration. For the Company, this guidance is effective for fiscal years and interim periods beginning after December 31, 2019. The Company is currently evaluating this guidance to determine the impact on its consolidated financial statements.

4. TREASURY STOCK

The Holding Company did not repurchase any of its common stock into treasury during the three or six month periods ended June 30, 2016, or the three-month period ended June 30, 2015. The Holding Company repurchased 20,000 shares of its common stock into treasury during the six months ended June 30, 2015 at a weighted average cost of \$15.00 per share.

On March 24, 2016, 28,044 shares of the Holding Company's common stock were released from treasury in order to satisfy potential future performance-based equity awards. The closing price of the Holding Company's common stock on that date was \$17.35, and the shares were released utilizing the average historical cost method.

On April 29, 2016, 60,675 shares of the Holding Company's common stock were released from treasury in order to fulfill benefit obligations under the 2013 Equity and Incentive Plan, and 12,424 shares of treasury stock were released in order to fulfill benefit obligations under the BMP. The closing price of the Holding Company's common stock on that date was \$18.11, and the shares were released utilizing the average historical cost method.

Shares either released from treasury stock for earned equity awards or returned to treasury stock due to forfeited equity awards were otherwise immaterial during the three-month and six-month periods ended June 30, 2016 and 2015.

Table of Contents

5. OTHER COMPREHENSIVE INCOME (LOSS)

The before and after tax amounts allocated to each component of other comprehensive income (loss) are presented in the table below. Reclassification adjustments related to securities available-for-sale are included in the line entitled net gain (loss) on securities and other assets in the accompanying condensed consolidated statements of income.

	Pre-tax Amount	Tax Expense (Benefit)	After tax Amount
Three Months Ended June 30, 2016			
Securities held-to maturity and transferred securities:			
Change in non-credit component of OTTI	\$ 8	\$ 4	\$ 4
Change in unrealized loss on securities transferred to held-to-maturity	14	6	8
Total securities held-to-maturity and transferred securities	22	10	12
Securities available-for-sale:			
Change in net unrealized gain during the period	47	21	26
Total securities available-for-sale	47	21	26
Defined benefit plans:

Total other comprehensive income	\$ (1,460)	\$ (658)	\$ (802)

Table of Contents

Activity in accumulated other comprehensive gain (loss), net of tax, was as follows:

	Securities Held-to- Maturity and Transferred Securities	Securities Available- for-Sale	Defined Benefit Plans	Derivative Liability	Total Accumulated Other Comprehensive Gain (Loss)
Balance as of January 1, 2016	\$ (760)	\$ (122)	\$ (7,919)	\$ -	\$ (8,801)
Other comprehensive income (loss) before reclassifications	22	34	-	(526)	(470)
Amounts reclassified from accumulated other comprehensive loss	-	-	468	-	468
Net other comprehensive income (loss) during the period	22	34	468	(526)	(2)
Balance as of June 30, 2016	\$ (738)	\$ (88)	\$ (7,451)	\$ (526)	\$ (8,803)
Balance as of January 1, 2015	\$ (826)	\$ 736	\$ (8,457)	\$ -	\$ (8,547)
Other comprehensive income (loss) before reclassifications	10	20	(586)	-	(556)
Amounts reclassified from accumulated other comprehensive loss	-	(760)	514	-	(246)
Net other comprehensive income (loss) during the period	10	(740)	(72)	-	(802)
Balance as of June 30, 2015	\$ (816)	\$ (4)	\$ (8,529)	\$ -	\$ (9,349)

6. EARNINGS PER SHARE ("EPS")

Basic EPS is computed by dividing income attributable to common stock by the weighted-average common shares outstanding during the reporting period. Diluted EPS is computed using the same method as basic EPS, but reflects the potential dilution that would occur if "in the money" stock options were exercised and converted into common stock. In determining the weighted average shares outstanding for basic and diluted EPS, treasury stock and unallocated ESOP shares are excluded. Vested restricted stock award shares are included in the calculation of the weighted average shares outstanding for basic and diluted EPS. Unvested restricted stock award shares are recognized as a special class of securities under ASC 260.

The following is a reconciliation of the numerators and denominators of basic EPS and diluted EPS for the periods presented:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2016	2015	2016	2015
Net income per the Consolidated Statements of Income	\$ 11,208	\$ 11,529	\$ 61,245	\$ 23,307
Less: Dividends paid and earnings allocated to participating securities	(24)	(33)	(55)	(73)
Income attributable to common stock	\$ 11,184	\$ 11,496	\$ 61,190	\$ 23,234
Weighted average common shares outstanding, including participating securities	36,946,082	36,412,733	36,874,535	36,344,359
Less: weighted average participating securities	(192,525)	(245,046)	(202,885)	(266,424)
Weighted average common shares outstanding	36,753,557	36,167,687	36,671,650	36,077,935

Edgar Filing: DIME COMMUNITY BANCSHARES INC - Form 10-Q

Basic EPS	\$0.30	\$0.32	\$1.67	\$0.65
Income attributable to common stock	\$11,184	\$11,496	\$61,190	\$23,234
Weighted average common shares outstanding	36,753,557	36,167,687	36,671,650	36,077,935
Weighted average common equivalent shares outstanding	65,028	91,690	69,420	80,886
Weighted average common and equivalent shares outstanding	36,818,585	36,259,377	36,741,070	36,158,821
Diluted EPS	\$0.30	\$0.32	\$1.67	\$0.64

Common equivalent shares resulting from the dilutive effect of "in-the-money" outstanding stock options are calculated based upon the excess of the average market value of the Holding Company's common stock over the exercise price of outstanding in-the-money stock options during the period.

Table of Contents

There were 80,000 and 126,453 weighted-average stock options outstanding for the three-month periods ended June 30, 2016 and 2015, respectively, which were not considered in the calculation of diluted EPS since their exercise prices exceeded the average market price during the period. There were 80,000 and 136,292 weighted-average stock options outstanding for the six-month periods ended June 30, 2016 and 2015, respectively, which were not considered in the calculation of diluted EPS since their exercise prices exceeded the average market price during the period.

7. ACCOUNTING FOR STOCK BASED COMPENSATION

During the three-month and six-month periods ended June 30, 2016 and 2015, the Holding Company and Bank maintained the Dime Community Bancshares, Inc. 2001 Stock Option Plan for Outside Directors, Officers and Employees, the 2004 Stock Incentive Plan and the 2013 Equity and Incentive Plan (collectively, the "Stock Plans"), which are discussed more fully in Note 14 to the Company's audited consolidated financial statements for the year ended December 31, 2015, and which are subject to the accounting requirements of ASC 505-50 and ASC 718.

Stock Option Awards

Combined activity related to stock options granted under the Stock Plans during the periods presented was as follows:

	At or for the Three Months Ended June 30,		At or for the Six Months Ended June 30,	
	2016	2015	2016	2015
Options outstanding – beginning of period	465,246	905,780	465,246	979,916
Options granted	-	-	-	-
Options exercised	(193,828)	(259,579)	(193,828)	(274,355)
Options that expired prior to exercise	-	-	-	(59,360)
Options outstanding – end of period	271,418	646,201	271,418	646,201
Intrinsic value of options exercised	\$ 732	\$ 300	\$ 732	\$ 384
Compensation expense recognized	-	8	-	31
Remaining unrecognized compensation expense	-	-	-	-
Intrinsic value of outstanding options at period end	553	1,632	553	1,632
Intrinsic value of vested options at period end	553	1,632	553	1,632
Weighted average exercise price of vested options – end of period	15.32	14.57	15.32	14.57

There were no grants of stock options during the three-month and six-month periods ended June 30, 2016 and 2015.

Restricted Stock Awards

The Company, from time to time, issues restricted stock awards to outside directors and certain officers under the 2004 Stock Incentive Plan or 2013 Equity and Incentive Plan. Typically, awards to outside directors fully vest on the first anniversary of the grant date, while awards to officers vest in equal annual installments over a four-year period.

The following is a summary of activity related to the restricted stock awards granted under the 2004 Stock Incentive Plan or 2013 Equity and Incentive Plan during the periods indicated:

	At or for the Three Months Ended June 30,		At or for the Six Months Ended June 30,	
	2016	2015	2016	2015
Unvested allocated shares – beginning of period	222,142	285,610	223,894	289,660
Shares granted	60,675	68,069	60,675	68,069

Edgar Filing: DIME COMMUNITY BANCSHARES INC - Form 10-Q

Shares vested	(115,135)	(128,327)	(116,001)	(132,377)
Shares forfeited	(12,863)	(980)	(13,749)	(980)
Unvested allocated shares – end of period	154,819	224,372	154,819	224,372
Compensation recorded to expense	\$ 390	\$ 455	\$ 828	\$ 984

Performance Based Equity Awards

During the six months ended June 30, 2016, the Company established a long term incentive award program to certain officers that meets the criteria for equity-based accounting. For each award, threshold (50% of target), target (100% of target) and maximum (150% of target) payment opportunities are eligible to be earned over a three-year performance period based on the Company's relative performance on certain measurement goals that were established at the onset of the performance period and cannot be altered subsequently.

Table of Contents

The following table summarizes these awards as of the period indicated:

	At or for the Three Months Ended June 30, 2016	At or for the Six Months Ended June 30, 2016
Maximum aggregate share payout – beginning of period	28,044	28,044
Shares forfeited	(3,312) (3,312
Maximum aggregate share payout – end of period	24,732	24,732
Minimum aggregate share payout	-	-
Likely aggregate share payout	16,488	16,488
Compensation expense recognized	\$ 21	\$ 21

8. LOANS RECEIVABLE AND CREDIT QUALITY

Loans are reported at the principal amount outstanding, net of unearned fees or costs and the allowance for loan losses. Interest income on loans is recorded using the level yield method. Under this method, discount accretion and premium amortization are included in interest income. Loan origination fees and certain direct loan origination costs are deferred and amortized as yield adjustments over the contractual loan terms.

Credit Quality Indicators:

On a quarterly basis, the Company categorizes loans into risk categories based on relevant information about the ability of borrowers to service their debt, such as: current financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors. The Company analyzes loans individually by classifying them as to credit risk. This analysis includes all loans, such as multifamily residential, mixed use residential (i.e., loans in which the aggregate rental income of the underlying collateral property is generated from both residential and commercial units, but the majority of such income is generated from the residential units), mixed use commercial real estate (i.e., loans in which the aggregate rental income of the underlying collateral property is generated from both residential and commercial units, but the majority of such income is generated from the commercial units), and commercial real estate loans, as well as one-to-four family residential and cooperative and condominium apartment loans. Prior to April 1, 2016, the analysis of one-to-four family residential and cooperative and condominium apartment loans included only loans with balances in excess of the Fannie Mae (“FNMA”) conforming loan limits for high-cost areas such as the Bank’s primary lending area (“FNMA Limits”) that were deemed to meet the definition of impaired. The Company uses the following definitions for risk ratings:

Special Mention. Loans classified as special mention have a potential weakness that deserves management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or of the Bank's credit position at some future date.

Substandard. Loans classified as substandard are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected.

Doubtful. Loans classified as doubtful have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of then existing facts, conditions, and values, highly questionable and improbable.

The Bank had no loans classified as doubtful as of June 30, 2016 or December 31, 2015. All real estate loans not classified as Special Mention or Substandard were deemed pass loans at both June 30, 2016 and December 31, 2015.

Table of Contents

The following is a summary of the credit risk profile of real estate loans (including deferred costs) by internally assigned grade as of the dates indicated:

Balance at June 30, 2016

Grade	One- to Four- Family Residential, Including Condominium and Cooperative Apartment	Multifamily Residential and Mixed Use	Commercial Mixed Use Real Estate	Commercial Real Estate	Total Real Estate Loans
	Pass	\$ 72,366	\$ 4,205,375	\$ 385,432	\$ 510,971
Special Mention	935	5,068	2,146	1,230	9,379
Substandard	2,151	8,967	5,534	6,606	23,258
Doubtful	-	-	-	-	-
Total	\$ 75,452	\$ 4,219,410	\$ 393,112	\$ 518,807	\$ 5,206,781

Balance at December 31, 2015

Grade	One- to Four-Family Residential, Including Condominium and Cooperative Apartment	Multifamily Residential and Mixed Use	Commercial Mixed Use Real Estate	Commercial Real Estate	Total Real Estate Loans
	Not Graded(1)	\$ 7,698	\$ -	\$ -	\$ -
Pass	61,256	3,743,298	370,110	473,242	4,647,906
Special Mention	945	9,759	1,622	4,857	17,183
Substandard	2,196	6,850	5,543	7,810	22,399
Doubtful	-	-	-	-	-
Total	\$ 72,095	\$ 3,759,907	\$ 377,275	\$ 485,909	\$ 4,695,186

(1) Amount comprised of fully performing one- to four-family residential and condominium and cooperative unit loans with balances equal to or less than the FNMA Limits.

For consumer loans, the Company evaluates credit quality based on payment activity. Consumer loans that are 90 days or more past due are placed on non-accrual status, while all remaining consumer loans are classified and evaluated as performing.

The following is a summary of the credit risk profile of consumer loans by internally assigned grade:

Grade	Balance at June 30, 2016	Balance at December 31, 2015
Performing	\$ 2,332	\$ 1,586
Non-accrual	4	4
Total	\$ 2,336	\$ 1,590

Table of Contents

The following is a breakdown of the past due status of the Company's investment in loans (excluding accrued interest and loans held for sale) as of the dates indicated:

At June 30, 2016

	30 to 59 Days Past Due	60 to 89 Days Past Due	Loans 90 Days or More Past Due and Still Accruing Interest	Non- accrual (¹)	Total Past Due	Current	Total Loans
Real Estate:							
One- to four-family residential, including condominium and cooperative apartment	\$ -	\$ 154	\$ -	\$ 487	\$ 641	\$74,811	\$75,452
Multifamily residential and residential mixed use	85	-	4,344	3,784	8,213	4,211,197	4,219,410

Total real estate	\$ 2,562	\$ 406	\$ 4,532	\$1,607	\$ 9,107	\$4,686,079	\$4,695,186
Consumer	\$ 1	\$ 1	\$ -	\$4	\$ 6	\$1,584	\$1,590

(¹) Includes all loans on non-accrual status regardless of the number of days such loans were delinquent as of December 31, 2015.

Accruing Loans 90 Days or More Past Due

The Bank continued accruing interest on eight real estate loans with an aggregate outstanding balance of \$4,534 at June 30, 2016, and twelve real estate loans with an aggregate outstanding balance of \$4,532 at December 31, 2015, all of which were 90 days or more past due on their respective contractual maturity dates. These loans continued to make monthly payments consistent with their initial contractual amortization schedule exclusive of the balloon payments due at maturity. These loans were well secured and were expected to be refinanced, and, therefore, remained on accrual status and were deemed performing assets at the dates indicated above.

Table of ContentsTroubled Debt Restructurings ("TDRs")

The following table summarizes outstanding TDRs by underlying collateral type as of the dates indicated:

	As of June 30, 2016		As of December 31, 2015	
	No. of Loans	Balance	No. of Loans	Balance
One- to four-family residential, including condominium and cooperative apartment	1	\$ 32	2	\$ 598
Multifamily residential and residential mixed use	4	1,057	3	696
Commercial mixed use real estate	1	4,304	1	4,344
Commercial real estate	1	3,396	2	3,635
Total real estate	7	\$ 8,789	8	\$ 9,273

The following table summarizes outstanding TDRs by accrual status as of the dates indicated:

	As of June 30, 2016		As of December 31, 2015	
	No. of Loans	Balance	No. of Loans	Balance
Outstanding principal balance at period end	7	\$ 8,789	8	\$ 9,273
TDRs on accrual status at period end	7	8,789	7	9,066
TDRs on non-accrual status at period end	-	-	1	207

Accrual status for TDRs is determined separately for each TDR in accordance with the Bank's policies for determining accrual or non-accrual status. At the time an agreement is entered into between the Bank and the borrower that results in the Bank's determination that a TDR has been created, the loan can be on either accrual or non-accrual status. If a loan is on non-accrual status at the time it is restructured, it continues to be classified as non-accrual until the borrower has demonstrated compliance with the modified loan terms for a period of at least six months. Conversely, if at the time of restructuring the loan is performing (and accruing), it will remain accruing throughout its restructured period, unless the loan subsequently meets any of the criteria for non-accrual status under the Bank's policy and agency regulations.

The Company has not restructured troubled consumer loans, as its consumer loan portfolio has not experienced any problem issues warranting restructuring. Therefore, all TDRs were collateralized by real estate at both June 30, 2016 and December 31, 2015.

The Company modified one one- to four-family residential loan in a manner that met the criteria of a TDR during the three-month and six-month periods ended June 30, 2016. There were no loans modified in a manner that met the criteria of a TDR during the three-month period and six-month periods ended June 30, 2015.

The Bank's allowance for loan losses at June 30, 2016 and December 31, 2015 did not reflect any allocated reserve associated with TDRs.

As of June 30, 2016 and December 31, 2015, the Bank had no loan commitments to borrowers with outstanding TDRs.

A TDR is considered to be in payment default once it is 90 days contractually past due under the modified terms. All TDRs are considered impaired loans and are evaluated individually for measurable impairment, if any.

There were no TDRs which defaulted within twelve months following the modification during the three-month and six-month periods ended June 30, 2016 or 2015 (thus no impact to the allowance for loan losses during those periods).

Impaired Loans

A loan is considered impaired when, based on then current information and events, it is probable that all contractual amounts due will not be collected in accordance with the terms of the loan. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays or shortfalls generally are not classified as impaired. Management determines the significance of payment delays and shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed.

Table of Contents

The Bank considers TDRs and non-accrual multifamily residential and commercial real estate loans, along with non-accrual one- to four-family loans in excess of the FNMA Limits, to be impaired. Non-accrual one-to four-family loans equal to or less than the FNMA Limits, as well as all consumer loans, are considered homogeneous loan pools and are not required to be evaluated individually for impairment unless considered a TDR.

Impairment is typically measured using the difference between the outstanding loan principal balance and either: 1) the likely realizable value of a note sale; 2) the fair value of the underlying collateral, net of likely disposal costs, if repayment is expected to come from liquidation of the collateral; or 3) the present value of estimated future cash flows (using the loan's pre-modification rate for some of the performing TDRs). If a TDR is substantially performing in accordance with its restructured terms, management will look to either the potential net liquidation proceeds of the underlying collateral or the present value of the expected cash flows from the debt service in measuring impairment (whichever is deemed most appropriate under the circumstances). If a TDR has re-defaulted, generally the likely realizable net proceeds from either a note sale or the liquidation of the collateral is considered when measuring impairment. Measured impairment is either charged off immediately or, in limited instances, recognized as an allocated reserve within the allowance for loan losses.

Please refer to Note 9 for tabular information related to impaired loans.

9. ALLOWANCE FOR LOAN LOSSES

The allowance for loan losses may consist of specific and general components. The Bank's periodic evaluation of its allowance for loan losses is comprised of four primary components: (1) impaired loans; (2) non-impaired substandard loans; (3) non-impaired special mention loans; and (4) pass graded loans. Within these components, the Company has identified the following portfolio segments for purposes of assessing its allowance for loan losses: (1) real estate loans; and (2) consumer loans. Within these segments, the Bank analyzes the allowance for loan losses based upon the underlying collateral type (classes). Due to their small homogeneous balances, consumer loans were not individually evaluated for impairment as of either June 30, 2016 or December 31, 2015.

Impaired Loan Component

All multifamily residential, mixed use, commercial real estate and construction loans that are deemed to meet the definition of impaired are individually evaluated for impairment. In addition, all condominium or cooperative apartment and one- to four-family residential real estate loans in excess of the FNMA Limits are individually evaluated for impairment. Impairment is typically measured using the difference between the outstanding loan principal balance and either: (1) the likely realizable value of a note sale; (2) the fair value of the underlying collateral, net of likely disposal costs, if repayment is expected to come from liquidation of the collateral; or (3) the present value of estimated future cash flows (using the loan's pre-modification rate in the case of some performing TDRs). For impaired loans on non-accrual status, either of the initial two measurements is utilized.

All TDRs are considered impaired loans and are evaluated individually for measurable impairment, if any. If a TDR is substantially performing in accordance with its restructured terms, management will look to either the present value of the expected cash flows from the debt service or the potential net liquidation proceeds of the underlying collateral in measuring impairment (whichever is deemed most appropriate under the circumstances). If a TDR has re-defaulted, the likely realizable net proceeds from either a note sale or the liquidation of the collateral are generally considered when measuring impairment. While measured impairment is generally charged off immediately, impairment attributed to a reduction in the present value of expected cash flows of a performing TDR is generally reflected as an allocated reserve within the allowance for loan losses. At June 30, 2016 and December 31, 2015, there were no allocated reserves related to TDRs within the allowance for loan losses.

Smaller balance homogeneous real estate loans, such as condominium or cooperative apartment and one-to four-family residential real estate loans with balances equal to or less than the FNMA Limits, are collectively evaluated for impairment, and accordingly, are not separately identified for impairment disclosures.

Non-Impaired Loan Component

As of June 30, 2016, the Bank refined the calculation of the allowance for loan losses associated with non-impaired loans using third party software purchased by the Bank. The software model is substantially similar to the previous model used by the Bank whereby the primary drivers of the calculation are historical charge-offs by loan type and certain qualitative elements. Management has evaluated the impact of the change and concluded that it is not material to the overall allowance for non-impaired loans.

Table of Contents

Substandard Non-Impaired Loan Component

At June 30, 2016, the reserve allocated within the allowance for loan losses associated with non-impaired loans internally classified as Substandard reflected expected loss percentages on the Bank's pool of such loans that were derived based upon an analysis of historical losses over the previous forty-eight months, which is the same historical loss look-back period used for all Pass-graded loans.

At December 31, 2015, the reserve allocated within the allowance for loan losses associated with non-impaired loans internally classified as Substandard reflected expected loss percentages on the Bank's pool of such loans that were derived based upon an analysis of historical losses over the previous twelve month period. The loss percentage resulting from this analysis was then applied to the aggregate pool of non-impaired Substandard loans at December 31, 2015.

Based upon the methodologies used for the non-impaired Substandard loan component at both June 30, 2016 and December 31, 2015, increases or decreases in the amount of either non-impaired Substandard loans or charge-offs associated with such loans, or a change in the measurement timeframe utilized to derive the expected loss percentage, would impact the level of reserves determined on such loans. As a result, the allowance for loan losses associated with non-impaired Substandard loans is subject to volatility.

The portion of the allowance for loan losses attributable to non-impaired Substandard loans was \$99 at June 30, 2016 and \$348 at December 31, 2015. The decline in the allowance attributable to non-impaired Substandard loans during the six month period ended June 30, 2016 was due to a decrease of \$1,943 in the balance of such loans from December 31, 2015 to June 30, 2016 combined with a lower loss expectation derived as of June 30, 2016 compared to December 31, 2015.

All non-impaired Substandard loans were deemed sufficiently well secured and performing to have remained on accrual status both prior and subsequent to their downgrade to the Substandard internal loan grade at both June 30, 2016 and December 31, 2015.

Special Mention Non-Impaired Loan Component

At June 30, 2016, the reserve allocated within the allowance for loan losses associated with non-impaired loans internally classified as Special Mention reflected expected loss percentages on the Bank's pool of such loans that were derived based upon an analysis of historical losses over the previous forty-eight months, which is the same historical loss look-back period used for Pass-graded loans.

At December 31, 2015, the reserve allocated within the allowance for loan losses associated with non-impaired loans internally classified as Special Mention reflected an expected loss percentage on the Bank's pool of such loans that was derived based upon an analysis of historical losses over the previous twelve month period. The loss percentage resulting from this analysis was then applied to the aggregate pool of non-impaired Special Mention loans at December 31, 2015.

Based upon the methodologies used for the non-impaired Special Mention loan component at both June 30, 2016 and December 31, 2015, increases or decreases in the amount of either non-impaired Special Mention loans or charge-offs associated with such loans, or a change in the measurement timeframe utilized to derive the expected loss percentage, would impact the level of reserves determined on such loans. As a result, the allowance for loan losses associated with non-impaired Special Mention loans is subject to volatility.

The portion of the allowance for loan losses attributable to non-impaired Special Mention loans was \$71 at June 30, 2016, down from \$88 at December 31, 2015, due primary to a reduction of \$7,804 in the balance of such loans.

Table of Contents

Pass Graded Loan Component

The Bank initially looks to the underlying collateral type when determining the allowance for loan losses associated with pass graded real estate loans. The following underlying collateral types are analyzed separately: 1) one- to four family residential and condominium or cooperative apartment; 2) multifamily residential and residential mixed use; 3) commercial mixed use real estate, 4) commercial real estate; and 5) construction and land acquisition. Within the analysis of each underlying collateral type, the following elements are additionally considered and provided weighting in determining the allowance for loan losses for pass graded real estate loans:

- (i) Charge-off experience (including peer charge-off experience)
- (ii) Economic conditions
- (iii) Underwriting standards or experience
- (iv) Loan concentrations
- (v) Regulatory climate
- (vi) Nature and volume of the portfolio
- (vii) Changes in the quality and scope of the loan review function

The following is a brief synopsis of the manner in which each element is considered:

- (i) Charge-off experience - Loans within the pass graded loan portfolio are segmented by significant common characteristics, against which historical loss rates are applied. The Bank also reviews and considers the charge-off experience of peer banks in its lending marketplace in order to determine whether potential losses that could take a longer period to flow through its allowance for loan losses possibly exist.
- (ii) Economic conditions - At both June 30, 2016 and December 31, 2015, the Bank assigned a loss allocation to its entire pass graded real estate loan portfolio based, in part, upon a review of economic conditions affecting the local real estate market. Specifically, the Bank considered both the level of, and recent trends in: 1) the local and national unemployment rate, 2) residential and commercial vacancy rates, 3) real estate sales and pricing, and 4) delinquencies in the Bank's loan portfolio.
- (iii) Underwriting standards or experience - Underwriting standards are reviewed to ensure that changes in the Bank's lending policies and practices are adequately evaluated for risk and reflected in its analysis of potential credit losses. Loss expectations associated with changes in the Bank's lending policies and practices, if any, are then incorporated into the methodology.
- (iv) Loan concentrations - The Bank regularly reviews its loan concentrations (borrower, collateral type and location) in order to ensure that heightened risk has not evolved that has not been captured through other factors. The risk component of loan concentrations is regularly evaluated for reserve adequacy.
- (v) Regulatory climate – Consideration is given to public statements made by the banking regulatory agencies that have a potential impact on the Bank's loan portfolio and allowance for loan losses.
- (vi) Nature and volume of the portfolio – The Bank considers any significant changes in the overall nature and volume of its loan portfolio.
- (vii) Changes in the quality and scope of the loan review function – The Bank considers the potential impact upon its allowance for loan losses of any adverse change in the quality and scope of the loan review function.

Table of ContentsConsumer Loans

Due to their small individual balances, the Bank does not evaluate individual consumer loans for impairment. Loss percentages are applied to aggregate consumer loans based upon both their delinquency status and loan type. These loss percentages are derived from a combination of the Company's historical loss experience and/or nationally published loss data on such loans. Consumer loans in excess of 120 days delinquent are typically fully charged off against the allowance for loan losses.

The following table presents data regarding the allowance for loan losses and loans evaluated for impairment by class of loan within the real estate loan segment as well as for the aggregate consumer loan segment:

At or for the Three Months Ended June 30, 2016

10. INVESTMENT AND MORTGAGE-BACKED SECURITIES

The following is a summary of major categories of securities owned by the Company (excluding trading securities) at June 30, 2016:

	Purchase Amortized/ Historical Cost	Recorded Amortized/ Historical Cost ⁽¹⁾	Unrealized Gains	Unrealized Losses	Fair Value
Investment securities held-to-maturity:					
Pooled bank trust preferred securities ("TRUPS")	\$ 15,326	\$ 5,319	\$ 1,955	\$ (469)	\$6,805
Available-for-sale securities:					
Investment securities					
Registered Mutual Funds	4,011	4,011	20	(194)	3,837
MBS					
Pass-through MBS issued by GSEs	392	392	14	-	406

(1) Amount represents the purchase amortized / historical cost less any OTTI charges (credit or non-credit related) previously recognized. For the TRUPS, amount is also net of the \$781 unamortized portion of the unrealized loss that was recognized in accumulated other comprehensive loss on September 1, 2008 (the day on which these securities were transferred from available-for-sale to held-to-maturity).

Table of Contents

The following is a summary of major categories of securities owned by the Company (excluding trading securities) at December 31, 2015:

	Purchase Amortized/ Historical Cost	Recorded Amortized/ Historical Cost ⁽¹⁾	Unrealized Gains	Unrealized Losses	Fair Value
Investment securities held-to-maturity:					
TRUPS	\$ 15,344	\$ 5,242	\$ 2,154	\$ (345)	\$7,051
Available-for-sale securities:					
Investment securities					
Registered Mutual Funds	3,990	3,990	25	(259)	3,756
MBS					
Pass-through MBS issued by GSEs	418	418	13	-	431

(1) Amount represents the purchase amortized/historical cost less any OTTI charges (credit or non-credit related) previously recognized. For the TRUPS, amount is also net of the \$807 unamortized portion of the unrealized loss that was recognized in accumulated other comprehensive loss on September 1, 2008 (the day on which these securities were transferred from available-for-sale to held-to-maturity).

The held-to-maturity TRUPS had a weighted average term to maturity of 18.5 years at June 30, 2016. At June 30, 2016, the pass-through MBS issued by GSEs possessed a weighted average contractual maturity of 11.5 years. All of the pass-through MBS issued by GSEs possess an annual interest rate adjustment.

There were no sales of investment securities during the three-month and six-month periods ended June 30, 2016. The entire gain/loss on securities shown in the unaudited condensed consolidated statements of income for this period resulted from market valuation changes or sales of trading securities. Proceeds from the sale of trading securities were \$3.6 million during the three and six month periods ended June 30, 2016. Gross gains of \$3 and gross losses of \$45 were recognized on these sales. Proceeds from the sales of investment securities available-for-sale totaled \$2 million during the three months ended June 30, 2015. Gross gains of \$4 and gross losses of \$8 were recognized on these sales. Proceeds from the sales of investment securities available-for-sale totaled \$2,070 during the six months ended June 30, 2015. Gross gains of \$4 and gross losses of \$8 were recognized on these sales.

Tax provisions related to the gains on sales of investment securities and MBS available-for-sale recognized during the three-month and six-month periods ended June 30, 2015 are disclosed in the condensed consolidated statements of comprehensive income.

As of each reporting period through June 30, 2016, the Company has applied the protocol established by ASC 320-10-65 in order to determine whether OTTI existed for its TRUPS and/or to measure, for TRUPS that have been determined to be other than temporarily impaired, the credit related and non-credit related components of OTTI. As of June 30, 2016, five TRUPS were determined to meet the criteria for OTTI based upon this analysis. At June 30, 2016, these five securities had credit ratings ranging from "C" to "Caa3."

Table of Contents

The following table provides a reconciliation of the pre-tax OTTI charges recognized on the Company's TRUPS:

	At or for the Three Months Ended June 30, 2016			At or for the Three Months Ended June 30, 2015

-------------------------	-----	---	-------	-----	-------	-----

TRUPS That Have Maintained an Unrealized Holding Loss for 12 or More Consecutive Months

At June 30, 2016, impairment of two TRUPS was deemed temporary, as management believed that the full recorded balance of the investments would be realized. In making this determination, management considered the following:

- Based upon an internal review of the collateral backing the TRUPS portfolio, which accounted for current and prospective deferrals, the securities could reasonably be expected to continue making all contractual payments
- The Company does not intend to sell these securities prior to full recovery of their impairment
- There were no cash or working capital requirements nor contractual or regulatory obligations that would compel the Company to sell these securities prior to their forecasted recovery or maturity
- The securities have a pool of underlying issuers comprised primarily of banks
- None of the securities have exposure to real estate investment trust issued debt (which has experienced high default rates)
- The securities feature either a mandatory auction or a de-leveraging mechanism that could result in principal repayments to the Bank prior to the stated maturity of the security
- The securities are adequately collateralized

Table of Contents

The following table summarizes the gross unrealized losses and fair value of investment securities as of December 31, 2015, aggregated by investment category and the length of time the securities were in a continuous unrealized loss position:

11. DERIVATIVES AND HEDGING ACTIVITIES

Cash Flow Hedges of Interest Rate Risk

The Company's objectives in using interest rate derivatives are to add stability to interest expense and to manage its exposure to interest rate movements. To accomplish this objective, the Company primarily uses interest rate swaps as part of its interest rate risk management strategy. Interest rate swaps designated as cash flow hedges involve the receipt of variable amounts from a counterparty in exchange for the Company making fixed-rate payments over the life of the agreements without exchange of the underlying notional amount.

The effective portion of changes in the fair value of derivatives designated and that qualify as cash flow hedges is recorded in Accumulated Other Comprehensive Loss and is subsequently reclassified into earnings in the period that the hedged forecasted transaction affects earnings. During the three and six months ended June 30, 2016, such derivatives were used to hedge the variability in cash flows associated with wholesale borrowings. The ineffective portion of the change in fair value of the derivatives is recognized directly in earnings. During the three and six months ended June 30, 2016, the Company's did not record any hedge ineffectiveness. The Company did not have any derivatives outstanding prior to the quarter ended June 30, 2016.

Amounts reported in accumulated other comprehensive loss related to derivatives will be reclassified to interest expense as interest payments are paid on the Company's liabilities.

The table below presents the fair value of the Company's derivative financial instruments as well as their classification on the Consolidated Statement of Financial Condition:

	At June 30, 2016			
	Count	Notional Amount	Fair Value Assets	Fair Value Liabilities
Derivatives designated as hedging instruments				
Interest Rate Products	4	\$ 90,000	\$ -	\$ 957
Total derivatives designated as hedging instruments	4	\$ 90,000	\$ -	\$ 957

Weighted average pay rates	1.24%
Weighted average receive rates	0.64%
Weighted average maturity	5.82 years

Table of Contents

The table below presents the effect of the Company's derivative financial instruments as the amount of gain or (loss) on the Consolidated Statements of Income as of June 30, 2016:

	At or for the Three and Six Months Ended June 30, 2016		
	Amount of Gain or (Loss) Recognized		
	in Other Comprehensive Income (Effective Portion)	Amount of Gain or (Loss) Reclassified from Other Comprehensive Income into Interest Expense (Effective Portion)	Amount of Gain or (Loss) Recognized in Other Non-Interest Expense (Ineffective Portion)
Interest Rate Products	\$ (998)	\$ (41)	\$ -

The table below presents a gross presentation, the effects of offsetting, and a net presentation of the Company's derivatives as of June 30, 2016. The net amounts of derivative assets or liabilities can be reconciled to the tabular disclosure of fair value. The tabular disclosure of fair value provides the location that derivative assets and liabilities are presented on the Consolidated Statements of Financial Condition.

Offsetting of Derivative Liabilities as of June 30, 2016:

	Gross Amounts Offset in the Statements of Financial Condition	Net Amounts of Assets presented in the Statements of Financial Condition	Gross Amounts Not Offset in the Statements of Financial Condition	Cash Collateral Received	Net Amount
Counterparty A	\$ 957	\$ 957	\$ -	\$ -	\$ 957

The Company's agreements with each of its derivative counterparties state that if the Company defaults on any of its indebtedness, it could also be declared in default on its derivative obligations and could be required to terminate its derivative positions with the counterparty.

The Company's agreements with certain of its derivative counterparties state that if the Bank fails to maintain its status as a well-capitalized institution, the Bank could be required to terminate its derivative positions with the counterparty.

As of June 30, 2016, the termination value of derivatives in a net liability position, which includes accrued interest but excludes any adjustment for nonperformance risk, related to these agreements was \$997. If the Company had breached any of the above provisions at June 30, 2016, it could have been required to settle its obligations under the agreements at the termination value and would have been required to pay any additional amounts due in excess of amounts previously posted as collateral with the respective counterparty. There were no provisions breached for the period ended June 30, 2016.

12. FAIR VALUE OF FINANCIAL INSTRUMENTS

The fair value hierarchy established under ASC 820-10 is summarized as follows:

Level 1 Inputs – Quoted prices (unadjusted) for identical assets or liabilities in active markets that the reporting entity has the ability to access at the measurement date.

Level 2 Inputs – Significant other observable inputs such as any of the following: (1) quoted prices for similar assets or liabilities in active markets, (2) quoted prices for identical or similar assets or liabilities in markets that are not active, (3) inputs other than quoted prices that are observable for the asset or liability (e.g., interest rates and yield curves observable at commonly quoted intervals, volatilities, prepayment speeds, loss severities, credit risks, and default rates), or (4) inputs that are derived principally from or corroborated by observable market data by correlation or other means (market-corroborated inputs).

Level 3 Inputs – Significant unobservable inputs for the asset or liability. Significant unobservable inputs reflect the reporting entity's own assumptions about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk). Significant unobservable inputs shall be used to measure fair value to the extent that observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date.

Table of Contents

The following tables present the assets that are reported on the consolidated statements of financial condition at fair value as of the date indicated segmented by level within the fair value hierarchy. Financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

Assets and Liabilities Measured at Fair Value on a Recurring Basis at June 30, 2016

Description	Total	Fair Value Measurements Using		
		Level 1 Inputs	Level 2 Inputs	Level 3 Inputs
Financial Assets				
Trading securities (Registered Mutual Funds):				
Domestic Equity Mutual Funds	\$ 787	\$ 787	\$ -	\$ -
International Equity Mutual Funds	207	207	-	-
Fixed Income Mutual Funds	5,820	5,820	-	-
Investment securities available-for-sale:				
Registered Mutual Funds:				
Domestic Equity Mutual Funds	1,244	1,244	-	-
International Equity Mutual Funds	374	374	-	-
Fixed Income Mutual Funds	2,219	2,219	-	-
Pass-through MBS issued by GSEs	406	-	406	-
Financial Liabilities				
Derivative – interest rate product	\$ 957	-	\$ 957	-

Assets Measured at Fair Value on a Recurring Basis at December 31, 2015

Description	Total	Fair Value Measurements Using		
		Level 1 Inputs	Level 2 Inputs	Level 3 Inputs
Trading securities (Registered Mutual Funds):				
Domestic Equity Mutual Funds	\$ 1,053	\$ 1,053	\$ -	\$ -
International Equity Mutual Funds	281	281	-	-
Fixed Income Mutual Funds	8,867	8,867	-	-
Investment securities available-for-sale:				
Registered Mutual Funds:				
Domestic Equity Mutual Funds	1,253	1,253	-	-
International Equity Mutual Funds	383	383	-	-
Fixed Income Mutual Funds	2,120	2,120	-	-
Pass-through MBS issued by GSEs	431	-	431	-

The Company's available-for-sale investment securities and MBS are reported at fair value, which were determined utilizing prices obtained from independent parties. The valuations obtained are based upon market data, and often utilize evaluated pricing models that vary by asset and incorporate available trade, bid and other market information. For securities that do not trade on a daily basis, pricing applications apply available information such as benchmarking and matrix pricing. The market inputs normally sought in the evaluation of securities include benchmark yields, reported trades, broker/dealer quotes (obtained only from market makers or broker/dealers recognized as market participants), issuer spreads, two-sided markets, benchmark securities, bids, offers and reference data. For certain securities, additional inputs may be used or some market inputs may not be applicable. Prioritization of inputs may vary on any given day based on market conditions.

The pass-through MBS issued by GSEs all possessed the highest possible credit rating published by at least one established credit rating agency as of June 30, 2016 and December 31, 2015. Obtaining market values as of June 30,

2016 and December 31, 2015 for these securities utilizing significant observable inputs was not difficult due to their considerable demand.

Derivatives represent interest rate swaps and estimated fair values are based on valuation models using observable market data as of the measurement date.

There were no assets measured at fair value on a non-recurring basis as of June 30, 2016 or December 31, 2015.

Impaired Loans - Loans with certain characteristics are evaluated individually for impairment. A loan is considered impaired under ASC 310-10-35 when, based upon existing information and events, it is probable that the Bank will be unable to collect all amounts due, including principal and interest, according to the contractual terms of the loan agreement. The Bank's impaired loans at June 30, 2016 and December 31, 2015 were collateralized by real estate and were thus carried at the lower of the outstanding principal balance or the estimated fair value of the collateral. Fair value is estimated through either a negotiated note sale price (Level 3 input), or, more commonly, a recent real estate appraisal (Level 3 input). The appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the independent appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value.

Table of Contents

An appraisal is generally ordered for all impaired multifamily residential, mixed use and commercial real estate loans for which the most recent appraisal is more than one year old. The Bank never adjusts independent appraisal data upward. Occasionally, management will adjust independent appraisal data downward based upon its own lending expertise and/or experience with the subject property, utilizing such factors as potential note sale values, or a more refined estimate of costs to repair and time to lease the property. Adjustments for potential disposal costs are also considered when determining the final appraised value.

As of June 30, 2016 and December 31, 2015, there were no impaired loans measured at fair value.

The carrying amounts and estimated fair values of financial instruments other than those measured at fair value on either a recurring or non-recurring basis at June 30, 2016 and December 31, 2015 were as follows:

At June 30, 2016	Carrying Amount	Fair Value at June 30, 2016 Using			Total
		Level 1 Inputs	Level 2 Inputs	Level 3 Inputs	
Assets:					
Cash and due from banks	\$89,927	\$89,927	\$-	\$-	\$89,927
Investment securities held to maturity (TRUPS)	5,319	-	-	6,805	6,805

Accrued interest receivable	13,486	-	19	13,467	12,664
FHLBNY capital stock	58,713	N/A	N/A	N/A	N/A
Liabilities:					
Savings, money market and checking accounts	2,325,463	2,325,463	-	-	2,325,463
CDs	858,847	-	865,581	-	865,581
Escrow and other deposits	77,130	77,130	-	-	77,130
FHLBNY Advances	1,166,725	-	1,170,274	-	1,170,274
Trust Preferred securities payable	70,680	-	69,973	-	69,973
Accrued interest payable	2,259	-	2,259	-	2,259

Cash and Due From Banks – The fair value is assumed to be equal to their carrying value as these amounts are due upon demand (deemed a Level 1 valuation).

TRUPS Held to Maturity – At both June 30, 2016 and December 31, 2015 the Company owned seven TRUPS classified as held-to-maturity. As a result of improved marketplace stability and enhanced trading activity, broker quotations became the sole valuation source utilized to estimate the fair value of TRUPS as of June 30, 2016 and December 31, 2015. Despite improvement in the overall marketplace conditions, unobservable data was still deemed to have been utilized in the broker quotation pricing, warranting a determination of Level 3 valuation for these securities at June 30, 2016 and December 31, 2015.

Loans, Net (Excluding Impaired Loans Carried at Fair Value) – For adjustable rate loans repricing monthly or quarterly, and with no significant change in credit risk, fair values are based on carrying values. The fair value of all remaining loans receivable is determined by discounting anticipated future cash flows of the loans, net of anticipated prepayments, using a discount rate reflecting current market rates for loans with similar terms to borrowers of similar credit quality. The valuation method used for loans does not necessarily represent an exit price valuation methodology as defined under ASC 820. However, since the valuation methodology is deemed to be comparable to a Level 3 input, the fair value of loans receivable other than impaired loans measured at fair value, is shown under the Level 3 valuation column.

Table of Contents

Accrued Interest Receivable – The estimated fair value of accrued interest receivable approximates its carrying amount, and is deemed to be valued at an input level comparable to its underlying financial asset.

FHLB NY Capital Stock – It is not practicable to determine the fair value of FHLB NY capital stock due to restrictions placed on transferability.

Deposits – The fair value of savings, money market, and checking accounts is, by definition, equal to the amount payable on demand at the reporting date (i.e., their carrying amount), which has been deemed a Level 1 valuation. The fair value of CDs is based upon the present value of contractual cash flows using current interest rates for instruments of the same remaining maturity (deemed a Level 2 valuation).

Escrow and Other Deposits – The fair value of escrow and other deposits is, by definition, equal to the amount payable on demand at the reporting date (i.e., their carrying amount), which has been deemed a Level 1 valuation.

FHLB NY Advances – The fair value of FHLB NY advances is measured by the discounted anticipated cash flows through contractual maturity or next interest repricing date, or an earlier call date if, as of the valuation date, the borrowing is expected to be called (deemed a Level 2 valuation). The carrying amount of accrued interest payable on FHLB NY advances is its fair value and is deemed a Level 2 valuation.

Trust Preferred Securities Payable – The fair value of trust preferred securities payable is estimated using discounted cash flow analyses based on then current borrowing rates for similar types of borrowing arrangements (deemed a Level 2 valuation), and is provided to the Company quarterly independently by a market maker in the underlying security.

Accrued Interest Payable – The estimated fair value of accrued interest payable approximates its carrying amount, and is deemed to be valued at an input level comparable to its underlying financial liability.

13. RETIREMENT AND
POSTRETIREMENT PLANS

The Holding Company or the Bank maintains the Retirement Plan of The Dime Savings Bank of Williamsburgh (the "Employee Retirement Plan"), the Retirement Plan for Board Members of Dime Community Bancshares, Inc. (the "Outside Director Retirement Plan"), the BMP, and the Postretirement Welfare Plan of The Dime Savings Bank of Williamsburgh (the "Postretirement Plan"). Net expenses associated with these plans were comprised of the following components:

	Three Months Ended June 30, 2016		Three Months Ended June 30, 2015	
	BMP, Employee and Outside Director Retirement Plans	Postretirement Plan	BMP, Employee and Outside Director Retirement Plans	Postretirement Plan
Service cost	\$ -	\$ -	\$ -	\$ -
Interest cost	343	16	343	29

(1) The Postretirement Plan was amended effective March 31, 2015, whereby future retirees will not be eligible to participate in the plan. This plan amendment resulted in a curtailment gain.

The Company disclosed in its consolidated financial statements for the year ended December 31, 2015 that it expected to make contributions to, or benefit payments on behalf of, benefit plans during 2016 as follows: BMP - \$686, Outside Director Retirement Plan - \$208, and Postretirement Plan - \$116. The Company made contributions of \$7 to the Employee Retirement Plan during the three months ended June 30, 2016, and \$11 during the six months ended June 30, 2016. The Company made benefit payments of \$41 on behalf of the Outside Director Retirement Plan during the three months ended June 30, 2016, and \$82 during the six months ended June 30, 2016, and expects to make the remainder of the estimated net contributions or benefit payments during 2016. The Company made benefit payments totaling \$17 on behalf of the Postretirement Plan during the three months ended June 30, 2016, and \$50 during the six months ended June 30, 2016, and expects to make the remainder of the anticipated contributions or benefit payments during 2016. The Company did not make any defined benefit contributions to, or benefit payments on behalf of, the BMP during the three month or six month periods ended June 30, 2016, however, does expect to make benefit payments on behalf of the BMP during 2016.

14. INCOME TAXES

During the three months ended June 30, 2016 and 2015, the Company's consolidated effective tax rates were 42.2% and 40.9%, respectively. During the six months ended June 30, 2016 and 2015, the Company's consolidated effective tax rates were 42.2% and 40.6%, respectively. The increase in the consolidated tax rate from 2015 to 2016 was the result of a \$68.2 million gain on sale of real estate transaction, which will impact the consolidated tax rate in each quarterly period in 2016. There were no other significant unusual income tax items during the three-month or six-month periods ended either June 30, 2016 or 2015.

15. PREMISES HELD FOR SALE

On March 16, 2016, the Bank completed the sale of premises held for sale with an aggregate recorded balance of \$8,799 at December 31, 2015. A gain of \$68,183 was recognized on this sale.

During the six months ended June 30, 2016, the Bank re-classified certain real estate utilized as a retail branch and principal office of the Company and the Bank to premises held for sale. The aggregate recorded balance of the

premises held for sale was \$1,379 at June 30, 2016, the outstanding balance upon transfer. On April 14, 2016, a Purchase and Sale Agreement was executed for the property, for a sale price of \$12,300. The sale is expected to close in April 2017.

16. SUBSEQUENT EVENTS

Effective August 1, 2016, the Bank changed its name to Dime Community Bank. The new name more accurately reflects the Bank's evolving business model and will allow the Bank to emphasize its broader geographic and business reach while not abandoning its mission to be in the communities it serves, including the virtual community online.

29

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

General

The Holding Company is a Delaware corporation and parent company of the Bank, a New York State chartered stock savings bank. The Bank maintains its headquarters in the Williamsburg section of Brooklyn, New York and operates twenty-five full service retail banking offices located in the NYC boroughs of Brooklyn, Queens, and the Bronx, and in Nassau County, New York. The Bank's principal business is gathering deposits from customers within its market area and via the internet, and investing them primarily in multifamily residential, commercial real estate and mixed use loans, MBS, obligations of the U.S. government and GSEs, and corporate debt and equity securities. All of the Bank's lending occurs in the greater NYC metropolitan area.

Executive Summary

The Holding Company's primary business is the ownership of the Bank. The Company's consolidated results of operations are dependent primarily on net interest income, which is the difference between the interest income earned on interest-earning assets, such as loans and securities, and the interest expense paid on interest-bearing liabilities, such as deposits and borrowings. The Bank additionally generates non-interest income such as service charges and other fees, mortgage banking related income, and income associated with BOLI. Non-interest expense primarily consists of employee compensation and benefits, federal deposit insurance premiums, data processing costs, occupancy and equipment, marketing and other operating expenses. The Company's consolidated results of operations are also significantly affected by general economic and competitive conditions (particularly fluctuations in market interest rates), government policies, changes in accounting standards and actions of regulatory agencies.

The Bank's primary strategy is generally to seek to increase its product and service utilization for each individual depositor, and increase its household and deposit market shares in the communities that it serves. In recent years, particular emphasis has been placed upon growing individual and small business commercial checking account balances. The Bank also actively strives to obtain checking account balances affiliated with the operation of the collateral underlying its mortgage loans, as well as personal deposit accounts from its borrowers. Commencing in the latter half of 2015, the Bank launched an internet banking initiative "Dime Direct." To date, deposits gathered through Dime Direct have primarily been promotional money markets. Given their nature, the Dime Direct deposits are anticipated to carry lower administrative servicing costs than the Bank's traditional retail deposits. The Bank's primary strategy additionally includes the origination of, and investment in, mortgage loans, with an emphasis on NYC multifamily residential and mixed-use real estate loans. The Company believes that multifamily residential and mixed-use loans in and around NYC provide several advantages as investment assets. Initially, they offer a higher yield than investment securities of comparable maturities or terms to repricing. In addition, origination and processing costs for the Bank's multifamily residential and mixed use loans are lower per thousand dollars of originations than comparable one-to four-family loan costs. Further, the Bank's market area has generally provided a stable flow of new and refinanced multifamily residential and mixed-use loan originations. In order to address the credit risk associated with multifamily residential and mixed use lending, the Bank has developed underwriting standards that it believes are reliable in order to maintain consistent credit quality for its loans.

The Bank also strives to provide a stable source of liquidity and earnings through the occasional purchase of investment grade securities, seeks to maintain the asset quality of its loans and other investments, and uses portfolio and asset/liability management techniques in an effort to manage the effects of interest rate volatility on its profitability and capital.

Recent Regulatory Developments

Basel III Capital Rules. In July 2013, the Bank's primary federal regulator, the Federal Deposit Insurance Corporation ("FDIC"), and the Holding Company's principal regulator, the Board of Governors of the Federal Reserve System, published final rules (the "Basel III Capital Rules") that implement, in part, agreements reached by the Basel Committee on Banking Supervision ("Basel Committee") in "Basel III: A Global Regulatory Framework for More Resilient Banks and Banking Systems" ("Basel III") and imposed new capital requirements on the Bank and the Holding Company, effective January 1, 2015.

The Basel III Capital Rules provide for the following minimum capital to risk-weighted assets ratios as of January 1, 2015: a) 4.5% based upon common equity tier 1 capital ("CET1"); b) 6.0% based upon tier 1 capital; and c) 8.0% based upon total regulatory capital. A minimum leverage ratio (tier 1 capital as a percentage of total average assets) of 4.0% is also required under the Basel III Capital Rules. When fully phased in, the Basel III Capital Rules will additionally require institutions to retain a capital conservation buffer, composed of CET1, of 2.5% above these required minimum capital ratio levels. Banking organizations that fail to maintain the minimum 2.5% capital conservation buffer could face restrictions on capital distributions or discretionary bonus payments to executive officers. Restrictions would begin phasing in where the banking organization's capital conservation buffer was below 2.5% at the beginning of a quarter, and distributions and discretionary bonus payments would be completely prohibited if no capital conservation buffer exists. When the capital conservation buffer is fully phased in on January 1, 2019, the Holding Company and the Bank will effectively have the following minimum capital to risk-weighted assets ratios: a) 7.0% based upon CET1; b) 8.5% based upon tier 1 capital; and c) 10.5% based upon total regulatory capital.

Table of Contents

The Basel III Capital Rules provide for a number of deductions from, and adjustments to, CET1. These include, for example, the requirement that MSR, deferred tax assets arising from temporary differences that could not be realized through net operating loss carrybacks and significant investments in non-consolidated financial entities be deducted from CET1 to the extent that any one such category exceeds 10% of CET1 or all such items, in the aggregate, exceed 15% of CET1.

Implementation of the deductions from, and other adjustments to, CET1 is being phased-in over a 4-year period (beginning at 40% on January 1, 2015 and an additional 20% per year thereafter). The implementation of the capital conservation buffer commenced on January 1, 2016, with a buffer that increases by 0.625% each subsequent January 1st until it reaches 2.5% on January 1, 2019.

The Basel III Capital Rules prescribe a new standardized approach for risk weightings that expand the risk-weighting categories from the current four Basel I-derived categories (0%, 20%, 50% and 100%) to a larger and more risk-sensitive number of categories, depending on the nature of the assets, generally ranging from 0% for U.S. government and agency securities, to 600% for certain equity exposures, and resulting in higher risk weights for a variety of asset classes. In particular, the Basel III Capital Rules provide stricter rules related to the risk weighting of past due and certain commercial real estate loans, as well as on some equity investment exposures, and replace the existing credit rating approach for determining the risk weighting of securitization exposures with an alternative approach in which senior securitization tranches are assigned a risk weight associated with the underlying exposure and requiring a banking organization to hold capital for the senior tranche based on the risk weight of the underlying exposures. Under the revised approach, for subordinate securitization tranches, a banking organization must hold capital for the subordinate tranche, as well as all more senior tranches for which the subordinate tranche provides credit support.

With respect to the Bank, the Basel III Capital Rules revise the "prompt corrective action" ("PCA") regulations adopted pursuant to Section 38 of the Federal Deposit Insurance Act by: (i) introducing a CET1 ratio requirement at each PCA category (other than critically undercapitalized), with the required CET1 ratio being 6.5% for well-capitalized status; (ii) increasing the minimum Tier 1 capital ratio requirement for each category, with the minimum tier 1 capital ratio for well-capitalized status being 8.0% (as compared to the current 6.0%); and (iii) eliminating the current provision that a bank with a composite supervisory rating of 1 may have a 3.0% leverage ratio and still be adequately capitalized. The Basel III Capital Rules do not change the total risk-based capital requirement for any PCA category.

The Basel III Capital Rules will increase the required capital levels of the Bank and will subject the Holding Company to consolidated capital rules. The Bank and Company made the one-time, permanent election to continue to exclude the effects of accumulated other comprehensive income or loss items included in stockholders' equity for the purposes of determining the regulatory capital ratios. The following table summarizes the capital ratios calculated under the Basel III Capital Rules framework as of June 30, 2016.

	Bank	Consolidated Company	Basel III Minimum Requirement	Basel III Plus 0.625% Buffer(1)	Basel III Minimum Requirement Plus 2.5% Buffer(2)	Basel III Minimum Requirement Plus 2.5% Buffer(2)	Well Capitalized Requirement Under FDIC Prompt Corrective Action Framework(3)
Common equity Tier 1 capital to risk weighted assets	11.82%	11.91%	4.5%	5.125%	7.0%	6.5%	

Edgar Filing: DIME COMMUNITY BANCSHARES INC - Form 10-Q

Tier 1 Capital to risk weighted assets	11.82	13.53	6.0	6.625	8.5	8.0
Total Capital to risk weighted assets	12.27	13.98	8.0	8.625	10.5	10.0
Tier 1 Capital to average assets (Leverage ratio)	9.13	10.48	4.0	n/a	n/a	5.0

(1) The 0.625% buffer percentage represents the phased-in requirement as of June 30, 2016.

(2) The 2.5% buffer percentage represents the fully phased-in requirement as of January 1, 2019.

(3) Only the Bank is subject to these requirements.

Table of Contents

Implementation of the initial phase capital conservation buffer under the Basel III Capital Rules effective January 1, 2016 did not have a material impact upon the operations of the Bank or Holding Company. Management believes that, as of June 30, 2016, the Bank and the Holding Company would meet all capital categories requirements under the Basel III Capital Rules on a fully phased in basis as if such requirement had been in effect on that date.

Critical Accounting Policies

The Company's policies with respect to: (1) the methodologies it uses to determine the allowance for loan losses (including reserves for loan commitments), and (2) accounting for defined benefit plans, are its most critical accounting policies because they are important to the presentation of the Company's consolidated financial condition and results of operations, involve a significant degree of complexity and require management to make difficult and subjective judgments which often necessitate assumptions or estimates about highly uncertain matters. The use of different judgments, assumptions or estimates could result in material variations in the Company's consolidated results

of operations or financial condition.

Allowance for Loan Losses. The Bank's methods and assumptions utilized to periodically determine its allowance for loan losses are summarized in Note 9 to the Company's condensed consolidated financial statements.

32

Table of Contents

Accounting for Defined Benefit Plans. Defined benefit plans are accounted for in accordance with ASC 715, which requires an employer sponsoring a single employer defined benefit plan to recognize the funded status of such benefit plan in its statements of financial condition, measured as the difference between plan assets at fair value (with limited exceptions) and the benefit obligation. The Company utilizes the services of trained actuaries employed at an independent benefits plan administration entity in order to assist in measuring the funded status of its defined benefit plans.

Liquidity and Capital Resources

The Board of Directors of the Bank has approved a liquidity policy that it reviews and updates at least annually. Senior management is responsible for implementing the policy. The Bank's Asset Liability Committee ("ALCO") is responsible for general oversight and strategic implementation of the policy, and management of the appropriate departments are designated responsibility for implementing any strategies established by ALCO. On a daily basis, appropriate senior management receives a current cash position report and one-week forecast to ensure that all short-term obligations are timely satisfied and that adequate liquidity exists to fund future activities. Reports detailing the Bank's liquidity reserves and forecasted cash flows are presented to appropriate senior management on a monthly basis, and the Board of Directors at each of its meetings. In addition on a monthly basis, a twelve-month liquidity forecast is presented to ALCO in order to assess potential future liquidity concerns. A forecast of cash flow data for the upcoming 12 months is presented to the Board of Directors on an annual basis.

The Bank's primary sources of funding for its lending and investment activities include deposits, loan and MBS payments, investment security principal and interest payments and advances from the FHLBNY. The Bank may also sell selected multifamily residential or mixed use real estate loans to private sector secondary market purchasers, and has in the past sold such loans and one to four family residential loans to FNMA. The Company may additionally issue debt under appropriate circumstances. Although maturities and scheduled amortization of loans and investments are predictable sources of funds, deposit flows and prepayments on mortgage loans and MBS are influenced by interest rates, economic conditions and competition.

The Bank gathers deposits in direct competition with commercial banks, savings banks and brokerage firms, many among the largest in the nation. It must additionally compete for deposit monies against the stock and bond markets, especially during periods of strong performance in those arenas. The Bank's deposit flows are affected primarily by the pricing and marketing of its deposit products compared to its competitors, as well as the market performance of depositor investment alternatives such as the U.S. bond or equity markets. To the extent that the Bank is responsive to general market increases or declines in interest rates, its deposit flows should not be materially impacted. However, favorable performance of the equity or bond markets could adversely impact the Bank's deposit flows.

Retail branch and Internet banking deposits increased \$596.0 million during the six months ended June 30, 2016, compared to \$274.0 million during the six months ended June 30, 2015. Within deposits, core deposits (i.e., non-CDs) increased \$420.3 million during the six months ended June 30, 2016 and \$302.0 million during the six months ended June 30, 2015. These increases were due primarily to successful gathering efforts tied to promotional money market offerings. CDs increased \$175.7 million during the six months ended June 30, 2016, as a result of promotional offerings during the period. CDs declined \$28.0 million during the six months ended June 30, 2015. The reduction during the six months ended June 30, 2015 reflected attrition of promotional CDs that matured, as the bank de-emphasized gathering and retaining CDs during the period, focusing instead on gathering and retaining money market and checking deposits.

In the event that the Bank should require funds beyond its ability or desire to generate them internally, an additional source of funds is available through its borrowing line at the FHLBNY. At June 30, 2016, the Bank had an additional potential borrowing capacity of \$921.0 million through the FHLBNY, subject to customary minimum FHLBNY common stock ownership requirements (i.e., 4.5% of the Bank's outstanding FHLBNY borrowings).

The Bank decreased its outstanding FHLB NY advances by \$149.6 million during the six months ended June 30, 2016, reflecting both the utilization of deposit inflows to fund asset growth and the deployment of the cash proceeds received from the real estate sale during the quarter ended March 31, 2016. The Bank reduced its outstanding FHLB NY advances by \$140.0 million during the six months ended June 30, 2015, reflecting both the utilization of deposit inflows to fund asset growth and other operational needs, as well as the prepayment of a \$25.0 million, 4.27% fixed-rate advance due to mature in 2016. A prepayment expense of \$1.4 million was recognized on the prepayment of the \$25.0 million advance.

During the six months ended June 30, 2016, principal repayments totaled \$375.6 million on real estate loans (including refinanced loans). During the six months ended June 30, 2015, principal repayments totaled \$488.5 million on real estate loans (including refinanced loans) and \$1.6 million on MBS, and proceeds from the sale of MBS totaled \$24.3 million. The decrease in principal repayments on real estate loans during the six month period ended June 30, 2016 compared to the six month period ended June 30, 2015 resulted primarily from a decline lower prepayment volume.

Table of Contents

No sales of investment securities or MBS available for sale occurred during the six months ended June 30, 2016. Aggregate proceeds from the sales of investment securities and MBS available for sale totaled \$26.4 million during the six months ended June 30, 2015, reflecting the liquidation of virtually all outstanding investment securities and MBS available for sale in March 2015. The securities were sold in order to offset the cash disbursement and expense associated with the prepayment of the \$25.0 million FHLBNY advance noted previously in this section. A net gain of \$1.4 million was recognized on the sales.

The Bank is subject to minimum regulatory capital requirements imposed by its primary federal regulator. As a general matter, these capital requirements are based on the amount and composition of an institution's assets. At June 30, 2016, the Bank was in compliance with all applicable regulatory capital requirements and was considered "well-capitalized" for all regulatory purposes.

The Company generally utilizes its liquidity and capital resources primarily to fund the origination of real estate loans, the purchase of real estate loans, mortgage-backed and other securities, the repurchase of Holding Company common stock into treasury, the payment of quarterly cash dividends to holders of the Holding Company's common stock, and the payment of quarterly interest to holders of its outstanding trust preferred debt. During the six months ended June 30, 2016 and 2015, real estate loan originations totaled \$734.1 million and \$681.9 million, respectively. The increase reflected the Company's election to compete more aggressively for new loans during the six months ended June 30, 2016 as a result of an increased loan growth target for the year ending December 31, 2016 versus the year ended December 31, 2015. The Company additionally purchased \$152.6 million of loan participations during the six months ended June 30, 2016 in order to deploy liquidity from deposit inflows more profitably.

There were no security purchases during the three months ended June 30, 2016 or 2015, as security purchases were de-emphasized during these periods since the yield on highly graded investment securities was deemed unattractive.

The Holding Company did not repurchase any shares of its common stock during the six months ended June 30, 2016. The Holding Company repurchased 20,000 shares of its common stock during the six months ended June 30, 2015 at an aggregate cost of \$300,000. As of June 30, 2016, up to 1,104,549 shares remained available for purchase under authorized share purchase programs. Based upon the \$17.01 per share closing price of its common stock as of June 30, 2016, the Holding Company would utilize \$18.8 million in order to purchase all of the remaining authorized shares.

The Holding Company paid \$10.3 million in cash dividends on its common stock during the six months ended June 30, 2016, up from \$10.1 million during the six months ended June 30, 2015, reflecting an increase of 465,419 in outstanding shares from July 1, 2015 to June 30, 2016.

Contractual Obligations

The Bank is obligated for rental payments under leases on certain of its branches and equipment. In addition, the Bank generally has outstanding at any time significant borrowings in the form of FHLBNY advances, as well as customer CDs with fixed contractual interest rates. The Holding Company also has \$70.7 million of callable trust preferred borrowings from third parties due to mature in April 2034, which became callable at any time commencing in April 2009. The Holding Company does not currently intend to call this debt. The facts and circumstances surrounding these obligations have not changed materially since December 31, 2015.

Off-Balance Sheet Arrangements

As part of its loan origination business, the Bank generally has outstanding commitments to extend credit to third parties, which are granted pursuant to its regular underwriting standards. Since these loan commitments may expire prior to funding, in whole or in part, the contract amounts are not estimates of future cash flows.

Table of Contents

The following table presents off-balance sheet arrangements as of June 30, 2016:

	Less than One Year	One Year to Three Years	Over Three Years to Five Years	Over Five Years	Total
(Dollars in thousands)					
Credit Commitments:					
Available lines of credit	\$35,336	\$ -	\$ -	\$ -	\$35,336
Other loan commitments	191,245	-	-	-	191,245
Total Off-Balance Sheet Arrangements	\$226,581	\$ -	\$ -	\$ -	\$226,581

Asset Quality

General

At both June 30, 2016 and December 31, 2015, the Company had neither whole loans nor loans underlying MBS that would have been considered subprime loans at origination, i.e., mortgage loans advanced to borrowers who did not qualify for market interest rates because of problems with their income or credit history. See Note 10 to the condensed consolidated financial statements for a discussion of impaired investment securities and MBS.

Monitoring and Collection of Delinquent Loans

Management of the Bank reviews delinquent loans on a monthly basis and reports to its Board of Directors at each regularly scheduled Board meeting regarding the status of all non-performing and otherwise delinquent loans in the Bank's portfolio.

The Bank's loan servicing policies and procedures require that an automated late notice be sent to a delinquent borrower as soon as possible after a payment is ten days late in the case of multifamily residential or commercial real estate loans, or fifteen days late in connection with one- to four-family or consumer loans. A second letter is sent to the borrower if payment has not been received within 30 days of the due date. Thereafter, periodic letters are mailed and phone calls placed to the borrower until payment is received. When contact is made with the borrower at any time prior to foreclosure, the Bank will attempt to obtain the full payment due or negotiate a repayment schedule with the borrower to avoid foreclosure.

Accrual of interest is generally discontinued on a loan that meets any of the following three criteria: (i) full payment of principal or interest is not expected; (ii) principal or interest has been in default for a period of 90 days or more (unless the loan is both deemed to be well secured and in the process of collection); or (iii) an election has otherwise been made to maintain the loan on a cash basis due to deterioration in the financial condition of the borrower. Such non-accrual determination practices are applied consistently to all loans regardless of their internal classification or designation. Upon entering non-accrual status, the Bank reverses all outstanding accrued interest receivable.

The Bank generally initiates foreclosure proceedings when a loan enters non-accrual status based upon non-payment, and typically does not accept partial payments once foreclosure proceedings have commenced. At some point during foreclosure proceedings, the Bank procures current appraisal information in order to prepare an estimate of the fair value of the underlying collateral. If a foreclosure action is instituted and the loan is not brought current, paid in full, or refinanced before the foreclosure action is completed, the property securing the loan is transferred to OREO status. The Bank generally attempts to utilize all available remedies, such as note sales in lieu of foreclosure, in an effort to resolve non-accrual loans and OREO properties as quickly and prudently as possible in consideration of market conditions, the physical condition of the property and any other mitigating circumstances. In the event that a non-accrual loan is subsequently brought current, it is returned to accrual status once the doubt concerning

collectability has been removed and the borrower has demonstrated performance in accordance with the loan terms and conditions for a period of at least six months.

Non-accrual Loans

Within the Bank's permanent portfolio, fifteen non-accrual loans (excluding deposit overdraft loans) totaled \$4.3 million at June 30, 2016, and sixteen non-accrual loans (excluding deposit overdraft loans) totaled \$1.6 million at December 31, 2015. During the six months ended June 30, 2016, five loans totaling \$3 million were added to non-accrual status, two non-accrual loans totaling \$77,000 were returned to accrual status based upon favorable payment performance, two non-accrual loans totaling \$208,000 were fully satisfied according to their contractual terms, two loans totaling \$23,000 were charged down to zero as they were deemed uncollectible, and principal amortization of \$14,000 was recognized on six non-accrual loans.

Table of Contents

Impaired Loans

The recorded investment in loans deemed impaired (as defined in Note 8 to the condensed consolidated financial statements) was approximately \$12.1 million, consisting of twelve loans, at June 30, 2016, compared to \$9.6 million, consisting of nine loans, at December 31, 2015. During the six months ended June 30, 2016, five new loans totaling \$3 million were deemed impaired, two impaired loans totaling \$419,000 were fully satisfied according to their contractual terms, and principal amortization totaling \$98,000, was recognized on six impaired loans.

The following is a reconciliation of non-accrual and impaired loans as of the dates indicated:

	At June 30, 2016	At December 31, 2015
	(Dollars in Thousands)	
Non-accrual loans (excluding non-accrual loans held for sale)	\$ 4,325	\$ 1,611
Non-accrual one- to four-family and consumer loans deemed homogeneous loans	(1,017)	(1,116)
TDRs retained on accrual status	8,789	9,066
Impaired loans	\$ 12,097	\$ 9,561

TDRs

Under ASC 310-40-15, the Bank is required to recognize loans for which certain modifications or concessions have been made as TDRs. A TDR has been created in the event that any of the following criteria is met:

- For economic or legal reasons related to the debtor's financial difficulties, a concession has been granted that would not have otherwise been considered
- A reduction of interest rate has been made for the remaining term of the loan
- The maturity date of the loan has been extended with a stated interest rate lower than the current market rate for new debt with similar risk
- The outstanding principal amount and/or accrued interest have been reduced

In instances in which the interest rate has been reduced, management would not deem the modification a TDR in the event that the reduction in interest rate reflected either a general decline in market interest rates or an effort to maintain a relationship with a borrower who could readily obtain funds from other sources at the current market interest rate, and the terms of the restructured loan are comparable to the terms offered by the Bank to non-troubled debtors. One loan for \$32,000 was modified during the six month period ending June 30, 2016 in a manner that met the criteria for a TDR. The Bank did not modify any loans in a manner that met the criteria for a TDR during the six months ended June 30, 2015.

Accrual status for TDRs is determined separately for each TDR in accordance with the policies for determining accrual or non-accrual status that are outlined on page 35. At the time an agreement is entered into between the Bank and the borrower that results in the Bank's determination that a TDR has been created, the loan can be on either accrual or non-accrual status. If a loan is on non-accrual status at the time it is restructured, it continues to be classified as non-accrual until the borrower has demonstrated compliance with the modified loan terms for a period of at least six months. Conversely, if at the time of restructuring the loan is performing (and accruing) it will remain accruing throughout its restructured period, unless the loan subsequently meets any of the criteria for non-accrual status under the Bank's policy, as disclosed on page 35 and agency regulations.

The Bank never accepts receivables or equity interests in satisfaction of TDRs.

At June 30, 2016, all but one TDR were collateralized by real estate that generated rental income. At December 31, 2015, all TDRs were collateralized by real estate that generated rental income. For TDRs that demonstrated conditions sufficient to warrant accrual status, the present value of the expected net cash flows of the underlying property was utilized as the primary means of determining impairment. Any shortfall in the present value of the expected cash flows calculated at each measurement period (typically quarter-end) compared to the present value of the expected cash flows at the time of the original loan agreement was recognized as either an allocated reserve (in the event that it related to lower expected interest payments) or a charge-off (if related to lower expected principal payments). For TDRs on non-accrual status, an appraisal of the underlying real estate collateral is deemed the most appropriate measure to utilize when evaluating impairment, and any shortfall in valuation from the recorded balance is accounted for through a charge-off. In the event that either an allocated reserve or a charge-off is recognized on TDRs, the periodic loan loss provision is impacted.

Please refer to Note 8 to the condensed consolidated financial statements for a further discussion of TDRs.

Table of Contents

OREO

Property acquired by the Bank, or a subsidiary, as a result of foreclosure on a mortgage loan or a deed in lieu of foreclosure is classified as OREO. Upon entering OREO status, the Bank obtains a current appraisal on the property and reassesses the likely realizable value (a/k/a fair value) of the property quarterly thereafter. OREO is carried at the lower of the fair value or book balance, with any write downs recognized through a provision recorded in non-interest expense. Only the appraised value, or either a contractual or formal marketed value that falls below the appraised value, is used when determining the likely realizable value of OREO at each reporting period. The Bank typically seeks to dispose of OREO properties in a timely manner. As a result, OREO properties have generally not warranted subsequent independent appraisals.

OREO properties totaled \$18,000 at June 30, 2016 and \$148,000 at December 31, 2015. The Bank did not recognize any provisions for losses on OREO properties during the three or six months ended June 30, 2016 or 2015.

The following table sets forth information regarding non-accrual loans and certain other non-performing assets (including OREO) at the dates indicated:

	At June 30, 2016	At December 31, 2015		
	(Dollars in Thousands)			
One- to four-family residential including condominium and cooperative apartment	\$ 487	\$ 1,113		
Multifamily residential and residential mixed use real estate	3,784	287		
Commercial real estate and commercial mixed use real estate	54	207		
Consumer	4	4		
Total non-accrual loans	4,329	1,611		
Non-performing TRUPS	1,253	1,236		
OREO	18	148		
Total non-performing assets	5,600	2,995		
Ratios:				
Total non-accrual loans to total loans	0.08	%	0.03	%
Total non-performing assets to total assets	0.10		0.06	

TDRs and Impaired Loans

TDRs	\$ 8,789	\$ 9,273
Impaired loans (1)	12,097	9,561

(1) Amount includes all TDRs at both June 30, 2016 and December 31, 2015. See the discussion entitled "Impaired Loans" commencing on page 36 for a reconciliation of non-accrual and impaired loans.

Other Potential Problem Loans

· Loans Delinquent 30 to 89 Days

The Bank had four real estate loans, totaling \$535,000, that were delinquent between 30 and 89 days at June 30, 2016, a net reduction of \$2.4 million compared to six such loans totaling \$3.0 million at December 31, 2015. The 30 to 89 day delinquency levels fluctuate monthly, and are generally considered a less accurate indicator of near-term credit quality trends than non-accrual loans.

Reserve for Loan Commitments

At June 30, 2016 and December 31, 2015, the Bank maintained a reserve of \$50,000 associated with unfunded loan commitments accepted by the borrower. This reserve is determined based upon the outstanding volume of loan commitments at each period end. Any increases or reductions in this reserve are recognized in periodic non-interest expense.

Table of Contents

Allowance for Loan Losses

The methodology utilized to determine the Company's allowance for loan losses on real estate and consumer loans, along with periodic associated activity, remained constant during the periods ended June 30, 2016 and December 31, 2015. The following is a summary of the components of the allowance for loan losses as of the following dates:

	At June 30, 2016	At March 31, 2016	At December 31, 2015
	(Dollars in Thousands)		
Real Estate Loans:			
Impaired loans	\$-	\$ -	\$ -
Substandard loans not deemed impaired or evaluated individually for impairment	43	353	348
Special Mention loans not deemed impaired	36	77	88
Pass graded loans	18,810	18,064	18,058
Sub-total real estate loans	18,889	18,494	18,494
Consumer loans	20	19	20
TOTAL	\$18,909	\$ 18,513	\$ 18,514

Activity related to the allowance for loan losses is summarized for the periods indicated as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2016	2015	2016	2015
	(Dollars in Thousands)			
Net (Charge-offs) recoveries	\$(47)	\$1,451	\$ (26)) \$ 1,367
(Credit) Provision	442	(1,135)	421	(1,307)

The allowance for loan losses increased \$395,000 during the three months ended June 30, 2016, due primarily to a provision of \$442,000 recorded during the period, offset by net charge-offs of \$47,000. The provision resulted primarily from growth in the pass graded portion of the real estate loan portfolio.

The allowance for loan losses increased \$395,000 during the six months ended June 30, 2016, due primarily to a provision of \$421,000 recorded during the period. The provision resulted primarily from growth in the pass graded portion of the real estate loan portfolio.

For a further discussion of the allowance for loan losses and related activity during the three-month periods ended June 30, 2016 and 2015, and as of December 31, 2015, please see Note 9 to the condensed consolidated financial statements. Period-end balances of all Substandard, Special Mention and pass graded real estate loans are summarized in Note 8 to the condensed consolidated financial statements.

Comparison of Financial Condition at June 30, 2016 and December 31, 2015

Assets. Assets totaled \$5.6 billion at June 30, 2016, \$523.3 million above their level at December 31, 2015.

Real estate loans increased \$511.6 million during the six months ended June 30, 2016. During the six months ended June 30, 2016, the Bank originated \$734.1 million of real estate loans (including refinancing of existing loans), and purchased real estate loan participations totaling \$152.6 million, which exceeded the \$375.6 million of aggregate amortization on such loans (also including refinancing of existing loans) during the period.

Cash and due from banks increased \$25.8 million during the six months ended June 30, 2016, due to the net proceeds of \$75.9 million received from the sale of premises during the three months ended March 31, 2016, offset by approximately \$50 million used to reduce borrowed funds. During the six months ended June 30, 2016, the bank completed the sale of premises held for sale with a book value of \$8.8 million at December 31, 2015 and upon sale. Net proceeds of \$75.9 million were realized on the sale. On March 24, 2016, premises with an aggregate book value of \$1.4 million were transferred to held for sale. In April 2016, the Bank entered into an agreement to sell the premises for \$12.3 million. This sale is currently expected to close in April 2017.

Liabilities. Total liabilities increased \$467.7 million during the six months ended June 30, 2016. Retail deposits (due to depositors) increased \$596.0 million and FHLB NY advances declined \$149.6 million during the period. Please refer to "Part I – Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources" for a discussion of the increases in retail deposits and decline in FHLB NY advances during the six months ended June 30, 2016. Mortgagor escrow and other deposits increased by \$15.2 million as a result of growth of the real estate loan portfolio.

Table of Contents

Stockholders' Equity. Stockholders' equity increased \$55.7 million during the six months ended June 30, 2016, due primarily to net income of \$61.2 million, \$2.8 million of equity added from stock option exercises, and a \$1.9 million aggregate increase related to either expense amortization or income tax benefits associated with stock benefit plans that added to the cumulative balance of stockholders' equity. Partially offsetting these items was \$10.3 million in cash dividends paid during the period. The change in accumulated other comprehensive loss was immaterial during the six month period ended June 30, 2016.

Comparison of Operating Results for the Three Months Ended June 30, 2016 and 2015

General. Net income was \$11.2 million during the three months ended June 30, 2016, a decrease of \$321,000 from net income of \$11.5 million during the three months ended June 30, 2015. During the comparative period, net interest income increased \$2.5 million, and non-interest income increased \$628,000. Offsetting these additions to pre-tax income were increases of \$1.7 million in non-interest expense and \$1.6 million in the provision for loan losses during the period. Income tax expense increased \$186,000 during the comparative period, as a result of a slightly higher tax rate.

Net Interest Income. The discussion of net interest income for the three months ended June 30, 2016 and 2015 presented below should be read in conjunction with the following tables, which set forth certain information related to the consolidated statements of income for those periods, and which also present the average yield on assets and average cost of liabilities for the periods indicated. The average yields and costs were derived by dividing income or expense by the average balance of their related assets or liabilities during the periods represented. Average balances were derived from average daily balances. The yields include fees that are considered adjustments to yields.

Analysis of Net Interest Income

	Three Months Ended June 30,							
	2016		Average		2015		Average	
	Average	Interest	Yield/ Cost	Average	Average	Interest	Yield/ Cost

The Company's net interest income and net interest margin during the three months ended June 30, 2016 and 2015 were impacted by the following factors:

During the period January 1, 2009 through June 30, 2016, Federal Open Market Committee monetary policies resulted in the maintenance of the overnight federal funds rate in a range of 0.0% to 0.50%, helping deposit and borrowing costs remain at historically low levels.

Increased marketplace competition and refinancing activity on real estate loans, particularly during the period January 1, 2012 through June 30, 2016, has resulted in an ongoing reduction in the average yield on real estate loans.

Interest Income. Interest income was \$48.7 million during the three months ended June 30, 2016, an increase of \$4.2 million from the three months ended June 30, 2015, primarily reflecting an increase of \$3.9 million in interest income on real estate loans. The increased income on real estate loans was attributable to growth of \$923.4 million in their average balance during the comparative period, as, pursuant to the Company's growth strategy, new originations significantly exceeded amortization and satisfactions during the period July 1, 2015 through June 30, 2016. Partially offsetting the higher interest income on real estate loans from the growth in their average balance was a reduction of 44 basis points in their average yield, resulting from both continued low benchmark lending rates and heightened marketplace competition.

Interest Expense. Interest expense increased \$1.6 million, to \$12.8 million, during the three months ended June 30, 2016, from \$11.1 million during the three months ended June 30, 2015. The increased interest expense was mainly attributable to growth in money market deposits average balance of \$556.3 million, and average cost by 9 basis points. The increase in the money market average balance was due to successful promotional activities. Offsetting this increase was a \$295,000 decline in interest expense on borrowed funds, as a decline in the average rate to 1.81% from 2.17% outweighed the \$134.9 million increase in their average balance in the comparative period.

Provision for Loan Losses. The Company recognized a provision for loan losses of \$442,000 during the three months ended June 30, 2016 compared to a credit (negative provision) of \$1.1 million during the three months ended June 30, 2015. The increase in loan loss provision resulted mainly from growth in the real estate loan portfolio, offset by the continued improvement in the overall credit quality of the loan portfolio.

Non-Interest Income. Total non-interest income increased \$628,000 from the three months ended June 30, 2015 to the three months ended June 30, 2016, due to \$484,000 of additional income from BOLI related to the receipt of a mortality benefit due to the passing of an insured officer, and \$197,000 in additional mortgage and other service fees.

Table of Contents

Non-Interest Expense. Non-interest expense was \$18.1 million during the three months ended June 30, 2016, an increase of \$1.7 million from \$16.4 million during the three months ended June 30, 2015, reflecting increases of \$625,000 in occupancy and equipment expense, \$379,000 in data processing costs, and \$353,000 in marketing expense during the comparative period. The \$625,000 increase in occupancy expense was attributable to new leases related to de novo retail branches and a new corporate headquarters. The \$379,000 increase in data processing costs was the result of various technology enhancement initiatives related to customer banking services. The \$353,000 increase in marketing expense was tied mainly to deposit gathering initiatives.

Non-interest expense was 1.31% of average assets during the three months ended June 30, 2016, compared to 1.44% during the three months ended June 30, 2015. The decrease resulted from a \$954.2 million increase in average assets during the comparative period, offset by the increase of \$1.7 million in non-interest expense.

Income Tax Expense. Income tax expense approximated \$8.2 million during the three months ended June 30, 2016, up slightly from \$8.0 million during the three months ended June 30, 2015. The Company's consolidated tax rate was 42.2% during the three months ended June 30, 2016, up from 40.9% during the three months ended June 30, 2015. The increase in the consolidated tax rate was a result of the \$68.2 million gain on sale of real estate transaction, which will impact the consolidated tax rate in each quarterly period in 2016.

Comparison of Operating Results for the Six months Ended June 30, 2016 and 2015

General. Net income was \$61.2 million during the six months ended June 30, 2016, an increase of \$37.9 million from net income of \$23.3 million during the six months ended June 30, 2015. During the comparative period, net interest income increased \$7.1 million, the provision for loan losses increased by \$1.7 million, non-interest income increased \$67.1 million and non-interest expense increased \$5.7 million. Income tax expense increased \$28.7 million during the comparative period, as a result of \$66.7 million of additional pre-tax income.

Net Interest Income. The discussion of net interest income for the six months ended June 30, 2016 and 2015 presented below should be read in conjunction with the following tables, which set forth certain information related to the consolidated statements of income for those periods, and which also present the average yield on assets and average cost of liabilities for the periods indicated. The average yields and costs were derived by dividing income or expense by the average balance of their related assets or liabilities during the periods represented. Average balances were derived from average daily balances. The yields include fees that are considered adjustments to yields.

Table of Contents

The Company's net interest income and net interest margin during the six months ended June 30, 2016 and 2015 were impacted by the following factors:

During the period January 1, 2009 through June 30, 2016, Federal Open Market Committee monetary policies resulted in the maintenance of the overnight federal funds rate in a range of 0.0% to 0.50%, helping deposit and borrowing costs remain at historically low levels.

Increased marketplace competition and refinancing activity on real estate loans, particularly during the period January 1, 2012 through June 30, 2016, has resulted in an ongoing reduction in the average yield on real estate loans.

Interest Income. Interest income was \$94.9 million during the six months ended June 30, 2016, an increase of \$7.9 million from the six months ended June 30, 2015, primarily reflecting increases in interest income of \$7.7 million on real estate loans, \$148,000 on investment securities, and \$154,000 on federal funds sold and other short term investments. The increased interest income on real estate loans reflected growth of \$784.0 million in their average balance during the comparative period, as new originations significantly exceeded amortization and satisfactions during the period July 1, 2015 through June 30, 2016. Partially offsetting the higher interest income on real estate loans from the growth in their average balance was a reduction of 33 basis points in their average yield, resulting from both continued low benchmark lending rates and heightened marketplace competition. The increase in interest income on investment securities reflected growth of \$1.8 million in their average balance combined with an increase of 119 basis points in their average yield. The increase in interest income on federal funds sold and other short-term investments reflected an increase of \$39.1 million in their average balance, offset by a 54 basis point decline in their average yield during the comparable period.

Interest Expense. Interest expense approximated \$24.6 million during the six months ended June 30, 2016, an increase of \$794,000 from the six months ended June 30, 2015, primarily reflecting increases in interest expense of \$2.9 million on money market accounts and \$611,000 on CDs, offset by a reduction of \$2.7 million in interest expense on borrowed funds. The increase of \$2.9 million in interest expense on money market deposits reflected successful promotional activities that increased their average balance by \$533.2 million and their average cost by 11 basis points from the six months ended June 30, 2015 to the six months ended June 30, 2016. The \$611,000 increase in interest expense on CDs reflected an increase in their average balance by \$48.6 million and their average cost by 6 basis points, as the Bank competed more aggressively for CDs during the first six months of 2016 compared to the first six months in 2015. Interest expense on borrowings declined \$2.7 million due to a reduction of 63 basis points in their average cost, which outweighed the increase in their average balance of \$77.0 million for the six months ended June 30, 2016 as compared to the same period in 2015.

Provision for Loan Losses. The Company recognized a provision for loan losses of \$421,000 during the six months ended June 30, 2016, compared to a credit (negative provision) for loan losses of \$1.3 million during the six months ended June 30, 2015. The credit (negative provision) recognized during the six months ended June 30, 2015 reflected both continued improvement in the overall credit quality of the loan portfolio from July 1, 2014 through June 30, 2015, and a \$1.5 million recovery of previously charged-off amounts from the favorable resolution of the Bank's largest problem loan in this period. The \$421,000 provision for loan losses recognized during the six months ended June 30, 2016 resulted mainly from growth in the real estate loan portfolio, offset by continued improvement in the overall credit quality of the loan portfolio.

Non-Interest Income. Total non-interest income increased \$67.1 million from the six months ended June 30, 2015 to the six months ended June 30, 2016, due primarily to a gain of \$68.2 million recognized on the sale of real estate during the six months ended June 30, 2016 and \$387,000 of increased income from BOLI during the comparative period. Partially offsetting these increases were a \$1.3 million gain on the sale of MBS, and a decline in service charges and other fees during the comparative period as a result of lower transaction volume.

Non-Interest Expense. Non-interest expense was \$36.0 million during the six months ended June 30, 2016, an increase of \$5.8 million from \$30.2 million during the six months ended June 30, 2015, primarily reflecting increases of \$308,000 in occupancy and equipment expense, \$699,000 of data processing costs, \$193,000 in FDIC insurance premiums, and \$564,000 in marketing expense during the comparative period. Also contributing to the increase was a non-recurring \$3.4 million reduction recognized in salaries and employee benefits from the curtailment of certain postretirement health benefits that occurred in the six month period ended June 30, 2015. Excluding the impact of the \$3.4 million defined benefit curtailment, non-interest expense would have increased by \$2.3 million during the comparative period. The \$308,000 increase in occupancy and equipment expense was attributable to new leases related to two de novo retail branches and a new corporate headquarters, offset by the accelerated depreciation of some automated teller machine equipment that occurred in the six month period ended June 30, 2015. The \$699,000 increase in data processing costs was the result of various technology enhancement initiatives related to customer banking services. The \$193,000 increase in FDIC insurance premiums was attributable to \$802.6 million growth in average assets. The \$564,000 increase in marketing expense was attributable to deposit gathering initiatives. The remaining increase in non-interest expense was experienced in other operating expenses.

Table of Contents

Non-interest expense was 1.35% of average assets during the six months ended June 30, 2016, and, excluding the non-recurring \$3.4 million reduction, 1.48% of average assets during the six months ended June 30, 2015. The decrease was mainly due to the growth in average assets outweighing the growth in non-interest expense.

Income Tax Expense. Income tax expense approximated \$44.7 million during the six months ended June 30, 2016, up from \$15.9 million during the six months ended June 30, 2015, due to an increase of \$66.7 million in pre-tax income during the comparative period. The \$66.7 million increase in pre-tax income was primarily attributable to the \$68.2 million gain on sale of real estate that occurred during the six month period ended June 30, 2016. The Company's consolidated tax rate was 42.2% during the six months ended June 30, 2016, up from 40.6% during the six months ended June 30, 2015, primarily due to the additional tax related to the \$68.2 million gain on sale of real estate.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Quantitative and qualitative disclosures about market risk were presented at December 31, 2015 in Item 7A of the Holding Company's Annual Report on Form 10-K, filed with the SEC on March 11, 2016. The following is an update of the discussion provided therein.

General. Virtually all of the Company's market risk continues to reside at the Bank level. The Bank's largest component of market risk remains interest rate risk. The Company is not subject to foreign currency exchange or commodity price risk. At June 30, 2016, the Company owned thirteen mutual fund investments totaling \$6.8 million that were designated as trading. At June 30, 2016, the Company conducted four transactions involving derivative instruments requiring bifurcation in order to hedge interest rate or market risk.

Assets, Deposit Liabilities and Wholesale Funds. There was no material change in the composition of assets, deposit liabilities or wholesale funds from December 31, 2015 to June 30, 2016. See "Part I - Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources" for a discussion of deposit and borrowing activity during the period.

Interest Rate Risk Exposure Analysis

Economic Value of Equity ("EVE") Analysis. In accordance with agency regulatory guidelines, the Bank simulates the impact of interest rate volatility upon EVE using several interest rate scenarios. EVE is the difference between the present value of the expected future cash flows of the Bank's assets and liabilities and the value of any off-balance sheet items, such as firm commitments to originate loans, or derivatives, if applicable.

Traditionally, the fair value of fixed-rate instruments fluctuates inversely with changes in interest rates. Increases in interest rates thus result in decreases in the fair value of interest-earning assets, which could adversely affect the Company's consolidated results of operations in the event they were to be sold, or, in the case of interest-earning assets classified as available-for-sale, reduce the Company's consolidated stockholders' equity, if retained. The changes in the value of assets and liabilities due to fluctuations in interest rates measure the interest rate sensitivity of those assets and liabilities.

In order to measure the Bank's sensitivity to changes in interest rates, EVE is calculated under market interest rates prevailing at a given quarter-end ("Pre-Shock Scenario"), and under various other interest rate scenarios ("Rate Shock Scenarios") representing immediate, permanent, parallel shifts in the term structure of interest rates from the actual term structure observed in the Pre-Shock Scenario. An increase in the EVE is considered favorable, while a decline is considered unfavorable. The changes in EVE between the Pre-Shock Scenario and various Rate Shock Scenarios due to fluctuations in interest rates reflect the interest rate sensitivity of the Bank's assets, liabilities, and off-balance sheet items that are included in the EVE. Management reports the EVE results to the Bank's Board of Directors on a quarterly basis. The report compares the Bank's estimated Pre-Shock Scenario EVE to the estimated EVEs calculated

under the various Rate Shock Scenarios.

44

Table of Contents

The calculated EVEs incorporate some asset and liability values derived from the Bank's valuation model, such as those for mortgage loans and time deposits, and some asset and liability values provided by reputable independent sources, such as values for the Bank's MBS portfolio, as well as all borrowings. The Bank's valuation model makes various estimates regarding cash flows from principal repayments on loans and deposit decay rates at each level of interest rate change. The Bank's estimates for loan repayment levels are influenced by the recent history of prepayment activity in its loan portfolio, as well as the interest rate composition of the existing portfolio, especially in relation to the existing interest rate environment. In addition, the Bank considers the amount of fee protection inherent in the loan portfolio when estimating future repayment cash flows. Regarding deposit decay rates, the Bank tracks and analyzes the decay rate of its deposits over time, with the assistance of a reputable third party, and over various interest rate scenarios. Such results are utilized in determining estimates of deposit decay rates in the valuation model. The Bank also generates a series of spot discount rates that are integral to the valuation of the projected monthly cash flows of its assets and liabilities. The Bank's valuation model employs discount rates that it considers representative of prevailing market rates of interest, with appropriate adjustments it believes are suited to the heterogeneous characteristics of the Bank's various asset and liability portfolios. No matter the care and precision with which the estimates are derived, however, actual cash flows could differ significantly from the Bank's estimates, resulting in significantly different EVE calculations.

The analysis that follows presents, as of June 30, 2016 and December 31, 2015, the estimated EVE at both the Pre-Shock Scenario and the +200 Basis Point Rate Shock Scenario. The analysis additionally presents the percentage change in EVE from the Pre-Shock Scenario to the +200 Basis Point Rate Shock Scenario at both June 30, 2016 and December 31, 2015.

	At June 30, 2016			At December 31, 2015		
	EVE (Dollars in Thousands)	Dollar Change	Percentage Change	EVE	Dollar Change	Percentage Change
Rate Shock Scenario						
+ 200 Basis Points	\$480,437	\$(74,421)	-4.8 %	\$515,779	\$(63,058)	-12.2 %
Pre-Shock Scenario	504,415	-	-	578,837	-	-

The Bank's Pre-Shock Scenario EVE decreased from \$578.8 million at December 31, 2015 to \$504.4 million at June 30, 2016. The factors contributing to the less favorable valuation at June 30, 2016 included a decrease in the value of the Bank's real estate loans and an increase in the value of the core deposit liability. The less favorable valuation of real estate loans resulted primarily from a decline in portfolio rate from December 31, 2015 to June 30, 2016, due to amortization and satisfactions of loans carrying above market rates. The increase in the value of the Bank's core deposit liability reflected growth in higher rate promotional money market accounts during the six months ended June 30, 2016.

The Bank's EVE in the +200 basis point Rate Shock Scenario decreased from \$515.8 million at December 31, 2015 to \$480.4 million at June 30, 2016. The factors contributing to the less favorable valuation included the previously noted decrease in the value of the Bank's real estate loans and increase in the value of the core deposit liability from December 31, 2015 to June 30, 2016. Partially offsetting the decrease was a more favorable valuation on the Bank's wholesale borrowing portfolio, as the duration of the portfolio increased at June 30, 2016 as a result of the additional \$90 million of wholesale borrowings with a weighted average maturity of 5.82 years.

Income Simulation Analysis. As of the end of each quarterly period, the Bank also monitors the impact of interest rate changes through a net interest income simulation model. This model estimates the impact of interest rate changes on the Bank's net interest income over forward-looking periods typically not exceeding 36 months (a considerably shorter period than measured through the EVE analysis). Management reports the net interest income simulation results to the Bank's Board of Directors on a quarterly basis. The following table discloses the estimated changes to the Bank's net interest income over the 12-month period ending June 30, 2017 assuming instantaneous changes in

interest rates for the given Rate Shock Scenarios:

Instantaneous Change in Interest rate of:	Percentage Change in Net Interest Income	
+ 200 Basis Points	(9.4)%
+ 100 Basis Points	(5.1)
-100 Basis Points	10.6	

45

Table of Contents

Item 4. Controls and Procedures

Management of the Company, with the participation of its Chief Executive Officer and Principal Financial Officer, conducted an evaluation of the effectiveness as of June 30, 2016, of the Company's disclosure controls and procedures, as defined in Rules 13a-15(e) and 15(d)-15(e) under the Exchange Act. Based upon this evaluation, the Chief Executive Officer and Principal Financial Officer concluded that the Company's disclosure controls and procedures were effective as of June 30, 2016 in ensuring that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to management of the Company as appropriate to allow timely decisions regarding required disclosures.

Changes in Internal Control Over Financial Reporting

There was no change in the Company's internal control over financial reporting that occurred during the Company's last fiscal quarter that has materially affected, or is reasonably likely to materially affect, such controls.

PART II – OTHER INFORMATION

Item 1. Legal Proceedings

In the ordinary course of business, the Company is routinely named as a defendant in or party to various pending or threatened legal actions or proceedings. Certain of these matters may seek substantial monetary damages. In the opinion of management, the Company is involved in no actions or proceedings that will have a material adverse impact on its financial condition and results of operations.

Item 1A. Risk Factors

There were no material changes from the risks disclosed in the Risk Factors section of the Company's Annual Report on Form 10-K for the year ended December 31, 2015.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The Holding Company did not repurchase any shares of its common stock into treasury during the three months ended June 30, 2016. No existing repurchase programs expired during the three months ended June 30, 2016, nor (c) did the Company terminate any repurchase programs prior to expiration during the period. As of June 30, 2016, the Holding Company had an additional 1,104,549 shares remaining eligible for repurchase under its twelfth stock repurchase program, which was publicly announced in June 2007.
