Beijing, China, November 11, 2009 – KongZhong Corporation (NASDAQ: KONG), a leading mobile Internet company in China, today announced its unaudited third quarter 2009 financial results.

Third Quarter 2009 Financial Highlights:

(Note: Unless otherwise indicated, all financial statement amounts used in this press release are based on United States Generally Accepted Accounting Principles (GAAP) and denominated in US dollars)

Revenues exceeded guidance – Total revenues for the Third Quarter of 2009 (“3Q09”) increased 40% year-over-year and increased 9% quarter-over-quarter to \$35.1 million (“mn”), exceeding the Company’s 3Q09 revenue guidance of \$34 mn to \$35 mn.

Gross margin stable – Total gross margin was 51% in the 3Q09, stable compared with 51% in 2Q09.

Net income increased – Net income in 3Q09 was \$4.50 mn, a 27% increase compared with 2Q09 net income of \$3.55 mn and a net loss in 3Q08. Basic net income per ADS was \$0.13 based on 34.08 mn ADS while diluted net income per ADS was \$0.11 based on 39.24mn ADS outstanding as of September 30, 2009.

Cash and cash equivalents – As of September 30, 2009, the Company had \$ 134 mn in cash and cash equivalents.

Commenting on the results, the Company’s Chairman and Chief Executive Officer, Leilei Wang, said, “We continued to execute upon our strategy of delivering solid financial performance while continuing to make long-term investments in KONG.net.

Overall, our mobile games business continued to lead the China market with 20% sequential growth and over 200% year-over-year growth. We believe we are still in the early development phase of the Chinese mobile game market and through our strong game development capabilities, have become a preferred partner for all the Chinese mobile operators who are seeking to grow the mobile games market in the coming 3G era.

Against the backdrop of stable 3Q financial performance at KONG.net (or WIS), the team has undertaken a number of initiatives, which position us well for strong user growth over the coming year. For example during the quarter, we announced a strategic alliance with CCTV that will leverage their audience of over 1.0 billion viewers to jointly develop mobile Internet services in China. Moreover, we also launched the new Ko.cn platform, which we plan to develop into the leading social mobile game platform in China.

Lastly, our WVAS division continued to deliver stable cashflow growth helping to improve the overall profitability of KONG and providing us additional resources as we seek to extend our leadership in mobile games and invest in KONG.net”

Subsequent Events:

- In October 2009, we acquired 100% of an online Chinese-language novel Company (“Zhulang”) and its related party (“Success Blueprint”), for an aggregate price of \$US 2.34 mn in cash and 1,000,000 ordinary shares (equivalent to 25,000 ADS). Zhulang is engaged in the management, aggregation and distribution of user-generated and professionally written Chinese novels, mainly focused on the contemporary and martial arts genres (URL: <http://www.zhulang.com>). Success Blueprint, a BVI company, is engaged in the management of overseas Chinese novel copyright. The acquisition of Zhulang will support the development of KONG.net’s mobile novel channel, already one of the leading mobile novel sites in China, to further develop its access to original content and the author community to develop new and more innovative publishing business models based on mobile platforms. Also, we expect Zhulang to support the development of our mobile games business as we leverage content and other copyrights on the Zhulang platform for future mobile game titles.

Revenues from downloadable games were \$7.09 mn or 86% of total mobile game revenues, representing a 274% increase from the same period last year and a 41% sequential increase. Revenues from downloadable games continued to perform well due to the overall growth of the mobile game market in China and closer partnership with Chinese mobile operators.

Revenues from mobile multi-player online games ("MMO") were \$ 1.12 mn, an increase of 134% from the same period last year but a decrease of 37% from 2Q09. The sequential decline was due to a number of factors, including seasonal factors and promotional activities associated with the transition from our older, more established mobile online game, "Tian Jie", to our more recently launched mobile online game, "Feng Shen". Revenues from "Tian Jie" accounted for 97% mobile online game revenues, compared to "Feng Shen" which accounted for the remaining 3%.

In 3Q09, revenues from Mobile MMO made up 14% of total mobile game revenues compared to 26% in 2Q09.

Non-GAAP Financial Measures

To supplement the unaudited condensed statements of income presented in accordance with US GAAP, the Company uses non-GAAP financial measures (Non-GAAP Financial Measures) of net income and net income per diluted ADS, which are adjusted from results based on GAAP to exclude certain infrequent or unusual or non-cash based expenses, gains and losses. The Non-GAAP Financial Measures are provided as additional information to help both management and investors compare business trends among different reporting periods on a consistent and more meaningful basis and enhance investors' overall understanding of the Company's current financial performance and prospects for the future.

The Non-GAAP Financial Measures should be considered in addition to results prepared in accordance with GAAP, but should not be considered a substitute for or superior to GAAP results. In addition, our calculation of the Non-GAAP Financial Measures may be different from the calculation used by other companies, and therefore comparability may be limited.

For the periods presented, the Company's non-GAAP net income and non-GAAP net income per diluted ADS exclude, as applicable, the amortization of intangibles, share-based compensation expense and interest expense on convertible notes.

Reconciliation of the Company's Non-GAAP financial measures to the GAAP financial measures is set forth below.
