

FIRST RELIANCE BANCSHARES INC
Form 10-Q
November 12, 2009

FIRST RELIANCE BANCSHARES, INC.

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C.

(Mark One)

FORM 10-Q

QUARTERLY REPORT UNDER SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934

For the Quarterly Period Ended September 30, 2009

OR

TRANSITION REPORT UNDER SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934

For the Transition Period from _____ to _____

Commission File Number 000-49757

FIRST RELIANCE BANCSHARES, INC.
(Exact name of small business issuer as specified in its charter)

South Carolina
(State or other jurisdiction of
incorporation or organization)

80-0030931
(I.R.S. Employer
Identification No.)

2170 West Palmetto Street
Florence, South Carolina 29501
(Address of principal executive
offices, including zip code)

(843) 656-5000
(Issuer's telephone number, including area code)

State the number of shares outstanding of each of the issuer's classes of common equity as of the latest practicable date:

3,581,783 shares of common stock, par value \$0.01 per share, as of October 31, 2009

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15 (d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No.

Edgar Filing: FIRST RELIANCE BANCSHARES INC - Form 10-Q

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Notes to Condensed Consolidated Financial Statements

Note 1 - Basis of Presentation

The accompanying consolidated financial statements have been prepared in accordance with the requirements for interim financial statements and, accordingly, they are condensed and omit certain disclosures, which would appear in audited annual consolidated financial statements. The consolidated financial statements as of September 30, 2009 and for the interim periods ended September 30, 2009 and 2008 are unaudited and, in the opinion of management, include all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation. The consolidated financial information as of December 31, 2008 has been derived from the audited consolidated financial statements as of that date. For further information, refer to the consolidated financial statements and the notes included in First Reliance Bancshares, Inc.'s Annual Report on Form 10-K for the year ended December 31, 2008.

Note 2 - Recently Issued Accounting Pronouncements

The following is a summary of recent authoritative pronouncements:

In June 2009, the Financial Accounting Standards Board (the "FASB") issued Statement of Financial Accounting Standards ("SFAS") No. 168, "The FASB Accounting Standards Codification TM and the Hierarchy of Generally Accepted Accounting Principles – a replacement of FASB Statement No. 162," ("SFAS 168"). SFAS 168 establishes the FASB Accounting Standards Codification TM (the "Codification") as the source of authoritative generally accepted accounting principles ("GAAP") for nongovernmental entities. The Codification does not change GAAP. Instead, it takes the thousands of individual pronouncements that currently comprise GAAP and reorganizes them into approximately 90 accounting Topics, and displays all Topics using a consistent structure. Contents in each Topic are further organized first by Subtopic, then Section and finally Paragraph. The Paragraph level is the only level that contains substantive content. Citing particular content in the Codification involves specifying the unique numeric path to the content through the Topic, Subtopic, Section and Paragraph structure. FASB suggests that all citations begin with "FASB ASC," where ASC stands for Accounting Standards Codification. Changes to the ASC subsequent to June 30, 2009 are referred to as Accounting Standards Updates ("ASU").

In conjunction with the issuance of SFAS 168, the FASB also issued its first Accounting Standards Update No. 2009-1, "Topic 105 – Generally Accepted Accounting Principles" ("ASU 2009-1") which includes SFAS 168 in its entirety as a transition to the ASC. ASU 2009-1 is effective for interim and annual periods ending after September 15, 2009 and will not have an impact on the Company's financial position or results of operations but will change the referencing system for accounting standards. Certain of the following pronouncements were issued prior to the issuance of the ASC and adoption of the ASUs. For such pronouncements, citations to the applicable Codification by Topic, Subtopic and Section are provided where applicable in addition to the original standard type and number.

The FASB issued SFAS 166 (not yet reflected in FASB ASC), "Accounting for Transfers of Financial Assets – an amendment of FASB Statement No. 140," ("SFAS 166") in June 2009. SFAS 166 limits the circumstances in which a financial asset should be derecognized when the transferor has not transferred the entire financial asset by taking into consideration the transferor's continuing involvement. The standard requires that a transferor recognize and initially measure at fair value all assets obtained (including a transferor's beneficial interest) and liabilities incurred as a result of a transfer of financial assets accounted for as a sale. The concept of a qualifying special-purpose entity is removed from SFAS 140 along with the exception from applying FIN 46(R). The standard is effective for the first annual reporting period that begins after November 15, 2009, for interim periods within the first annual reporting period, and for interim and annual reporting periods thereafter. Earlier application is prohibited. First Reliance Bancshares, Inc.

(the “Company”) does not expect the standard to have any impact on the Company’s financial statements.

-7-

FIRST RELIANCE BANCSHARES, INC.

Notes to Condensed Consolidated Financial Statements

Note 2 - Recently Issued Accounting Pronouncements – (continued)

SFAS 167 (not yet reflected in FASB ASC), “Amendments to FASB Interpretation No. 46(R),” (“SFAS 167”) was also issued in June 2009. The standard amends FIN 46(R) to require a company to analyze whether its interest in a variable interest entity (“VIE”) gives it a controlling financial interest. A company must assess whether it has an implicit financial responsibility to ensure that the VIE operates as designed when determining whether it has the power to direct the activities of the VIE that significantly impact its economic performance. Ongoing reassessments of whether a company is the primary beneficiary is also required by the standard. SFAS 167 amends the criteria to qualify as a primary beneficiary as well as how to determine the existence of a VIE. The standard also eliminates certain exceptions that were available under FIN 46(R). SFAS 167 is effective as of the beginning of each reporting entity’s first annual reporting period that begins after November 15, 2009, for interim periods within that first annual reporting period, and for interim and annual reporting periods thereafter. Earlier application is prohibited. Comparative disclosures will be required for periods after the effective date. The Company does not expect the standard to have any impact on the Company’s financial position.

The FASB issued ASU 2009–05, “Fair Value Measurements and Disclosures (Topic 820) – Measuring Liabilities at Fair Value” in August, 2009 to provide guidance when estimating the fair value of a liability. When a quoted price in an active market for the identical liability is not available, fair value should be measured using (a) the quoted price of an identical liability when traded as an asset; (b) quoted prices for similar liabilities or similar liabilities when traded as assets; or (c) another valuation technique consistent with the principles of Topic 820 such as an income approach or a market approach. If a restriction exists that prevents the transfer of the liability, a separate adjustment related to the restriction is not required when estimating fair value. The ASU was effective October 1, 2009 for the Company and will have no impact on financial position or operations.

ASU 2009-12, “Fair Value Measurements and Disclosures (Topic 820) - Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent),” issued in September, 2009, allows a company to measure the fair value of an investment that has no readily determinable fair market value on the basis of the investee’s net asset value per share as provided by the investee. This allowance assumes that the investee has calculated net asset value in accordance with the GAAP measurement principles of Topic 946 as of the reporting entity’s measurement date. Examples of such investments include investments in hedge funds, private equity funds, real estate funds and venture capital funds. The update also provides guidance on how the investment should be classified within the fair value hierarchy based on the value for which the investment can be redeemed. The amendment is effective for interim and annual periods ending after December 15, 2009 with early adoption permitted. The Company does not have investments in such entities and, therefore, there will be no impact to our financial statements.

Issued October, 2009, ASU 2009-15, “Accounting for Own-Share Lending Arrangements in Contemplation of Convertible Debt Issuance or Other Financing” amends ASC Topic 470 and provides guidance for accounting and reporting for own-share lending arrangements issued in contemplation of a convertible debt issuance. At the date of issuance, a share-lending arrangement entered into on an entity’s own shares should be measured at fair value in accordance with Topic 820 and recognized as an issuance cost, with an offset to additional paid-in capital. Loaned shares are excluded from basic and diluted earnings per share unless default of the share-lending arrangement occurs. The amendments also require several disclosures including a description and the terms of the arrangement and the reason for entering into the arrangement. The effective dates of the amendments are dependent upon the date the share-lending arrangement was entered into and include retrospective application for arrangements outstanding as of the beginning of fiscal years beginning on or after December 15, 2009. The Company has no plans to issue

convertible debt and, therefore, does not expect the update to have an impact on its financial statements.

Other accounting standards that have been issued or proposed by the FASB or other standards-setting bodies are not expected to have a material impact on the Company's financial position, results of operations or cash flows.

Notes to Condensed Consolidated Financial Statements

Note 3 - Reclassifications

Certain captions and amounts in the financial statements in the Company's Form 10-Q for the quarter ended September 30, 2008 were reclassified to conform to the September 30, 2009 presentation.

Note 4 - Comprehensive Income

Comprehensive Income - Accounting principles generally require that recognized income, expenses, gains, and losses be included in net income. Although certain changes in assets and liabilities, such as unrealized gains and losses on available-for-sale securities, are reported as a separate component of the equity section of the balance sheet, such items, along with net income, are components of comprehensive income.

The components of other comprehensive income and related tax effects are as follows:

	Pre-tax Amount	Tax (Expense) Benefit	Net-of-tax Amount
For the Nine Months Ended September 30, 2009:			
Net unrealized gains on securities available-for-sale arising during the period	\$ 2,648,318	\$ (900,429)	\$ 1,747,889
Less, reclassification adjustment for gains realized in net income	1,875,486	(637,666)	1,237,820
	\$ 772,832	\$ (262,763)	\$ 510,069
For the Nine Months Ended September 30, 2008			
Net unrealized losses on securities available-for-sale	\$ (1,937,592)	\$ 658,781	\$ (1,278,811)
Reclassification adjustment for gains (losses) realized in net income	-	-	-
	\$ (1,937,592)	\$ 658,781	\$ (1,278,811)
For the Three Months Ended September 30, 2009:			
Net unrealized gains on securities available-for-sale arising during the period	\$ 3,335,971	\$ (1,134,230)	\$ 2,201,741
Less, reclassification adjustment for gains realized in net income	846,027	(287,649)	558,378
	\$ 2,489,944	\$ (846,581)	\$ 1,643,363
For the Three Months Ended September 30, 2008

FIRST RELIANCE BANCSHARES, INC.

Notes to Condensed Consolidated Financial Statements

Note 5 – Investment Securities – (continued)

At September 30, 2009, securities classified as available-for-sale are recorded at fair market value. Approximately 50.68% of the unrealized losses, or 10 individual securities, consisted of securities in a continuous loss position for twelve months or more. The Company does not intend to sell these securities and it is more likely than not that the Company will not be required to sell these securities before recovery of their amortized cost. The Company believes, based on industry analyst reports and credit ratings, that the deterioration in value is attributable to changes in market interest rates and is not in the credit quality of the issuer and therefore, these losses are not considered other-than-temporary.

Note 6 – Shareholders' Equity

Common Stock – The following is a summary of the changes in common shares outstanding for the Nine Months Ended September 30, 2009 and 2008.

	Nine Months Ended September 30,	
	2009	2008
Common shares outstanding at beginning of the period	3,525,004	3,494,646
Issuance of restricted shares	62,222	22,275
Forfeitures of restricted shares	(5,643)	-
Issuance of stock to employees	200	100
Exercise of stock options	-	6,900
Common shares outstanding at end of the period	3,581,783	3,523,921

Preferred Stock - On February 24, 2009, the Company's Articles of Incorporation were amended to authorize the issuance of a class of 10,000,000 shares of preferred stock, having no par value. Subject to certain conditions, the amendment authorizes the Company's Board of Directors to issue preferred stock without shareholders' approval. Under this amendment, the Board is authorized to determine the terms of one or more series of preferred stock, including the preferences, rights, and limitations of each series.

On March 6, 2009, the Company completed a transaction with the United States Treasury ("Treasury") under the Troubled Asset Relief Program Capital Purchase Program ("TARP CPP"), which was amended by the enactment of the American Recovery and Reinvestment Act of 2009 on February 17, 2009. Under the TARP CPP, the Company sold 15,349 shares of its Series A Cumulative Perpetual Preferred Stock. In addition, the Treasury received a warrant to purchase 767 shares of the Company's Series B Cumulative Perpetual Preferred Stock, which was immediately exercised by the Treasury for a nominal exercise price. The preferred shares issued to the Treasury qualify as tier 1 capital for regulatory purposes.

The Series A Preferred Stock is a senior cumulative perpetual preferred stock that has a liquidation preference of \$1,000 per share, pays cumulative dividends at a rate of 5% per year for the first five years and thereafter at a rate of 9% per year. Dividends are payable quarterly. At any time, the Company may, at its option and with regulatory approval, redeem the Series A Preferred Stock at par value plus accrued and unpaid dividends. The Series A Preferred Stock is generally non-voting. Prior to March 6, 2012, unless the Company has redeemed the Series A Preferred Stock or the Treasury has transferred the Series A Preferred Stock to a third party, the consent of the Treasury will be

required for the Company to increase its common stock dividend or repurchase its common stock or other equity or capital securities, other than in connection with benefit plans consistent with past practices and certain other circumstances. A consequence of the Series A Preferred Stock purchase includes certain restrictions on executive compensation that could limit the tax deductibility of compensation the Company pays to executive management.

The Series B Preferred Stock is a cumulative perpetual preferred stock that has the same rights, preferences, privileges, voting rights and other terms as the Series A Preferred Stock, except that dividends will be paid at the rate of 9% per year and may not be redeemed until all the Series A Preferred Stock has been redeemed.

The proceeds from the issuance of the Series A and Series B were allocated based on the relative fair value of each series based on a discounted cash flow model. As a result of the valuations, \$14,492,526 and \$856,474 was allocated to the Series A Preferred Stock and Series B Preferred Stock, respectively. This resulted in a discount of \$973,260 for the Series A stock and a premium of \$82,572 for the Series B stock. The discount and premium are being accreted and amortized, respectively, through retained earnings over a five-year estimated life using the effective interest method. For the nine months and quarter ended September 30, 2009, accretion of the Series A Preferred Stock discount totaled \$111,399 and \$49,036 respectively, and the amortization of the Series B Preferred Stock premium totaled \$9,451 and \$4,160, respectively. The net amount of the accretion and amortization was treated as a deemed dividend to preferred shareholders in the computation of earnings per share.

FIRST RELIANCE BANCSHARES, INC.

Notes to Condensed Consolidated Financial Statements

Note 7 - Earnings Per Share

Net income available to common shareholders represents net income adjusted for preferred dividends including dividends declared, accretions of discounts and amortization of premiums on preferred stock issuances and cumulative dividends related to the current dividend period that have not been declared as of period end.

The following is a summary of the earnings (loss) per share calculations for the nine months and three months ended September 30, 2009 and 2008.

	Nine Months Ended September 30,		Three Months Ended September 30,	
	2009	2008	2009	2008
Earnings (loss) available to common shareholders				
Net income (loss)	\$ (1,471,821)	\$ 2,274,722	\$ (331,072)	\$ 765,178
Preferred stock dividends	478,971	-	210,839	-
Deemed dividends on preferred stock resulting from net accretion of discount and amortization of premium	101,948	-	44,876	-
Net income (loss) available to common shareholders	\$ (2,052,740)	\$ 2,274,722	\$ (586,787)	\$ 765,178
Basic earnings per share:				
Net income (loss) available to common shareholders	\$ (2,052,740)	\$ 2,274,722	\$ (586,787)	\$ 765,178
Average common shares outstanding - basic	3,559,592	3,509,597	3,585,572	3,520,531
Basic earnings (loss) per share	\$ (0.58)	\$ 0.65	\$ (0.16)	0.22
Diluted earnings per share:				
Net income (loss) available to common shareholders	\$ (2,052,740)	\$ 2,274,722	\$ (586,787)	\$ 765,178
Average common shares outstanding - basic	3,559,592	3,509,597	3,585,572	3,520,531
Dilutive potential common shares	-	21,601	-	880
Average common shares outstanding - diluted	3,559,592	3,531,198	3,585,572	3,521,411
Diluted earnings (loss) per share	\$ (0.58)	\$ 0.64	\$ (0.16)	.22

Note 8 - Equity Incentive Plan

On January 19, 2006, the Company adopted the 2006 Equity Incentive Plan, which provides for the granting of dividend equivalent rights options, performance unit awards, phantom shares, stock appreciation rights and stock awards, each of which shall be subject to such conditions based upon continued employment, passage of time or

satisfaction of performance criteria or other criteria as permitted by the plan. The plan allows granting up to 350,000 shares of stock, to officers, employees, and directors, consultants and service providers of the Company or its affiliates. Awards may be granted for a term of up to ten years from the effective date of grant. Under this Plan, our Board of Directors has sole discretion as to the exercise date of any awards granted. The per-share exercise price of incentive stock awards may not be less than the market value of a share of common stock on the date the award is granted. Any awards that expire unexercised or are canceled become available for re-issuance.

FIRST RELIANCE BANCSHARES, INC.

Notes to Condensed Consolidated Financial Statements

Note 8 - Equity Incentive Plan – (continued)

The Company can issue the restricted shares as of the grant date either by the issuance of share certificate(s) evidencing restricted shares or by documenting the issuance in uncertificated or book entry form on the Company's stock records. Except as provided by the Plan, the employee does not have the right to make or permit to exist any transfer or hypothecation of any restricted shares. When restricted shares vest the employee must either pay the Company within two business days the amount of all tax withholding obligations imposed on the Company or make an election pursuant to Section 83(b) of the Internal Revenue Code to pay taxes at grant date.

Restricted shares may be subject to one or more objective employment, performance or other forfeiture conditions as established by the Plan Committee at the time of grant. Any shares of restricted stock that are forfeited will again become available for issuance under the Plan. An employee or director has the right to vote the shares of restricted stock after grant until they are forfeited or vested. Compensation cost for restricted stock is equal to the market value of the shares at the date of the award and is amortized to compensation expense over the vesting period. Dividends, if any, will be paid on awarded but unvested stock.

During nine months ended September 30, 2009 the Company issued 62,222 of restricted stock pursuant to the 2006 Equity Incentive Plan. The shares cliff vest in three years and are fully vested in 2012. The weighted-average fair value of restricted stock issued during the nine months ended September 30, 2009 was \$2.25 per share. Compensation cost associated with the issuance was \$139,999. There were 5,643 shares of restricted stock forfeited during the nine months ended September 30, 2009, having an average price of \$13.07 per share. Deferred compensation expense of \$118,039, relating to restricted stock, was amortized to income during nine months ended September 30, 2009.

The 2006 Equity Incentive Plan allows for the issuance of Stock Appreciation Rights ("SARs"). The SARs entitle the participant to receive the excess of (1) the market value of a specified or determinable number of shares of the stock at the exercise date over the fair value at grant date or (2) a specified or determinable price which may not in any event be less than the fair market value of the stock at the time of the award. Upon exercise, the Company can elect to settle the awards using either Company stock or cash. The shares start vesting after five years and vest at 20% per year until fully vested. Compensation cost for SARs is amortized to compensation expense over the vesting period.

There were no SARs awarded or exercised during the nine months ended September 30, 2009 and 2008; however, 4,688 and 0 SARS were forfeited during these periods, respectively. The SARs compensation expense for the nine months ended September 30, 2009 and 2008 was \$36,917 and \$37,121, respectively.

As of September 30, 2009 and 2008, there were 89,293 and 93,981 SARS outstanding, respectively. The weighted average exercise price of the SARS at the end of both periods was \$14.95.

Note 9 – Stock Based Compensation

The Company terminated its 2003 Employee Stock Option Plan and replaced it with the 2006 Equity Incentive Plan. Outstanding options issued under any former stock option plans will be honored in accordance with the terms and conditions in effect at the time they were granted, except that they are not subject to reissuance. At September 30, 2009, 206,547 options were outstanding and exercisable. No stock options have been granted since June 2005.

Edgar Filing: FIRST RELIANCE BANCSHARES INC - Form 10-Q

A summary of the status of the Company's 2003 stock option plan as of September 30, 2009 and 2008, and changes during the period is presented below:

	2009		2008	
	Shares	Weighted-Average Exercise Price	Shares	Weighted-Average Exercise Price
Outstanding at beginning of year	269,447	\$ 8.36	278,847	\$ 8.32
Exercised	-		(6,900)	5.46
Forfeited	(62,900)	5.00	(2,500)	11.00
Outstanding at end of period	206,547	\$ 9.39	269,447	\$ 8.36

FIRST RELIANCE BANCSHARES, INC.

Notes to Condensed Consolidated Financial Statements

Note 10 – Fair Value of Financial Instruments

SFAS No. 107, “Disclosures about Fair Value of Financial Instruments” (FASB ASC 825-10-50) (“SFAS 107”), requires disclosure of fair value information, whether or not recognized in the consolidated balance sheets, when it is practical to estimate the fair value. SFAS 107 defines a financial instrument as cash, evidence of an ownership interest in an entity or contractual obligations, which require the exchange of cash, or other financial instruments. Certain items are specifically excluded from the disclosure requirements, including the Company’s common stock, premises and equipment, accrued interest receivable and payable, and other assets and liabilities.

The fair value of a financial instrument is the amount at which the asset or obligation could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. Fair value estimates are made at a specific point in time based on relevant market information and information about the financial instruments. Because no market value exists for a significant portion of the financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors.

The Company has used management’s best estimate of fair value based on the above assumptions. Thus, the fair values presented may not be the amounts, which could be realized, in an immediate sale or settlement of the instrument. In addition, any income taxes or other expenses, which would be incurred in an actual sale or settlement, are not taken into consideration in the fair values presented.

The Company adopted SFAS 157 (FASB ASC 820-10-150), Fair Value Measurements, effective January 1, 2008, which did not have a material impact on the financial statements. SFAS 157 applies to all assets and liabilities that are being measured and reported on a fair value basis. SFAS 157 requires new disclosure that establishes a framework for measuring fair value in GAAP, and expands disclosure about fair value measurements. This statement enables the reader of the financial statements to assess the inputs used to develop those measurements by establishing a hierarchy for ranking the quality and reliability of the information used to determine fair values. The statement requires that assets and liabilities carried at fair value will be classified and disclosed in one of the following three categories:

Level 1: Quoted market prices in active markets for identical assets or liabilities.

Level 2: Observable market based inputs or unobservable inputs that are corroborated by market data.

Level 3: Unobservable inputs that are not corroborated by market data.

In determining the appropriate levels, the Company performs a detailed analysis of the assets and liabilities that are subject to SFAS 157. At each reporting period, all assets and liabilities for which the fair value measurement is based on significant unobservable inputs are classified as Level 3.

The following methods and assumptions were used to estimate the fair value of significant financial instruments:

Cash and Due from Banks - The carrying amount is a reasonable estimate of fair value.

Federal Funds Sold and Purchased - Federal funds sold and purchased are for a term of one day and the carrying amount approximates the fair value.

Time Deposits in other Banks - The carrying amount is a reasonable estimate of fair value.

Securities Available-for-Sale - Investment securities available-for-sale are recorded at fair value on a recurring basis. Fair value measurement is based upon quoted prices, if available. If quoted prices are not available, fair values are measured using independent pricing models or other model-based valuation techniques such as the present value of future cash flows, adjusted for the security's credit rating, prepayment assumptions and other factors such as credit loss assumptions. Level 1 securities include those traded on an active exchange, such as the New York Stock Exchange, U.S. Treasury securities that are traded by dealers or brokers in active over-the-counter markets and money market funds. Level 2 securities include mortgage-backed securities issued by government sponsored entities, municipal bonds and corporate debt securities. Securities classified as Level 3 include asset-backed securities in less liquid markets.

FIRST RELIANCE BANCSHARES, INC.

Notes to Condensed Consolidated Financial Statements

Note 10 – Fair Value of Financial Instruments – (continued)

Nonmarketable Equity Securities - The carrying amount of nonmarketable equity securities is a reasonable estimate of fair value since no ready market exists for these securities.

Loans Held-for-Sale - The carrying amount of loans held for sale is a reasonable estimate of fair value.

Loans Receivable- The Company does not record loans at fair value on a recurring basis. However, from time to time, a loan is considered impaired and an allowance for loan losses is established. Loans for which it is probable that payment of interest and principal will not be made in accordance with the contractual terms of the loan agreement are considered impaired. Once a loan is identified as individually impaired, management measures impairment in accordance with ASC 310-10-35, Accounting by Creditors for Impairment of a Loan, (ASC 310-10-35). The fair value of impaired loans is estimated using one of several methods, including collateral value, market value of similar debt, enterprise value, liquidation value and discounted cash flows. Those impaired loans not requiring an allowance represent loans for which the fair value of the expected repayments or collateral exceed the recorded investments in such loans. At September 30, 2009, substantially all of the total impaired loans were evaluated based on the fair value of the collateral. In accordance with SFAS 157, impaired loans where an allowance is established based on the fair value of collateral require classification in the fair value hierarchy. When the fair value of the collateral is based on an observable market price or a current appraised value, the Company records the impaired loan as nonrecurring Level 2. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, The Company records the impaired loan as nonrecurring Level 3.

Other Real Estate Owned - Other real estate owned (“OREO”) is adjusted to fair value upon transfer of the loans to OREO. Subsequently, OREO is carried at the lower of carrying value or fair value. Fair value is based upon independent market prices, appraised values of the collateral or management’s estimation of the value of the collateral. When the fair value of the collateral is based on an observable market price or a current appraised value, the Company records the foreclosed asset as nonrecurring Level 2. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, the Company records the OREO as nonrecurring Level 3.

Deposits - The fair value of demand deposits, savings, and money market accounts is the amount payable on demand at the reporting date. The fair values of certificates of deposit are estimated using a discounted cash flow calculation that applies current interest rates to a schedule of aggregated expected maturities.

Securities Sold Under Agreements to Repurchase - The carrying amount is a reasonable estimate of fair value because these instruments typically have terms of one day.

Advances From Federal Home Loan Bank - The fair values of fixed rate borrowings are estimated using a discounted cash flow calculation that applies the Company’s current borrowing rate from the Federal Home Loan Bank. The carrying amounts of variable rate borrowings are reasonable estimates of fair value because they can be repriced frequently.

Junior Subordinated Debentures and Note Payable - The carrying value of the junior subordinated debentures and note payable approximates their fair value since they were issued at a floating rate.

Accrued Interest Receivable and Payable - The carrying value of these instruments is a reasonable estimate of fair value.

Off-Balance-Sheet Financial Instruments - Fair values of off-balance sheet lending commitments are based on fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the counterparties' credit standing.

-15-

FIRST RELIANCE BANCSHARES, INC.

Notes to Condensed Consolidated Financial Statements

Note 10 – Fair Value of Financial Instruments – (continued)

The carrying values and estimated fair values of the Company's financial instruments were as follows:

	September 30, 2009		December 31, 2008	
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
Financial Assets:				
Cash and due from banks	\$ 115,665,115	\$ 115,665,115	\$ 5,451,607	\$ 5,451,607

Notes to Condensed Consolidated Financial Statements

Note 10 – Fair Value of Financial Instruments – (continued)

The table below presents the balances of assets measured at fair value on a recurring basis as of September 30, 2009, and December 31, 2008, aggregated by the level in the fair value hierarchy within which those measurements fall.

	Total	Level 1	Level 2	Level 3
September 30, 2009				
Available for- sale- securities	\$ 79,029,038	\$ -	\$ 79,029,038	\$ -
Mortgage loans held for sale (1)	9,817,762	-	9,817,762	-
	\$ 88,846,800	\$ -	\$ 88,846,800	\$ -
December 31, 2009				
Available for- sale- securities	\$ 76,310,816	\$ -	\$ 76,310,816	\$ -
Mortgage loans held for sale (1)	9,589,081	-	9,589,081	-
	\$ 85,899,897	\$ -	\$ 85,899,897	\$ -

(1) Carried at the lower of cost or market.

There were no liabilities carried at fair value at September 30, 2009 or December 31, 2008.

Certain assets and liabilities are measured at fair value on a nonrecurring basis; that is ,the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment). The following table presents the assets and liabilities carried on the balance sheet by caption and by level within the SFAS No. 157 valuation hierarchy (as described above) as of September 30, 2009 and December 31, 2008, for which a nonrecurring change in fair value has been recorded during the nine months and year ended September 30, 2009 and December 31, 2008, respectively.

	Total	Level 1	Level 2	Level 3
September 30, 2009				
Impaired loans receivable	\$ 45,793,350	\$ -	\$ 45,793,350	\$ -
Other real estate owned	7,144,261	-	7,144,261	-
Total assets at fair value	\$ 52,937,611	\$ -	\$ 52,937,611	\$ -
December 31, 2008				
Impaired loans receivable	\$ 26,183,601	\$ -	\$ 26,183,601	\$ -
Other real estate owned	379,950	-	379,950	-
Total assets at fair value	\$ 26,566,551	\$ -	\$ 26,566,551	\$ -

The Company has no liabilities carried at fair value or measured at fair value on a nonrecurring basis at September 30, 2009 or December 31, 2008.

Note 11- Subsequent Events

Subsequent events are events or transactions that occur after the balance sheet date but before financial statements are issued. Recognized subsequent events are events or transactions that provide additional evidence about conditions that existed at the date of the balance sheet, including the estimates inherent in the process of preparing financial statements. Nonrecognized subsequent events are events that provide evidence about conditions that did not exist at the date of the balance sheet but arose after that date. Management has reviewed events occurring through November 13, 2009, the date the financial statements were issued and no subsequent events occurred requiring accrual or disclosure.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation

The following discussion reviews our results of operations and assesses our financial condition. You should read the following discussion and analysis in conjunction with the accompanying consolidated financial statements. The commentary should be read in conjunction with the discussion of forward-looking statements, the financial statements and the related notes and the other statistical information included in this report.

Advisory Note Regarding Forward-Looking Statements

The statements contained in this report on Form 10-Q that are not historical facts are forward-looking statements subject to the safe harbor created by the Private Securities Litigation Reform Act of 1995. We caution readers of this report that such forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of us to be materially different from those expressed or implied by such forward-looking statements. Although we believe that our expectations of future performance is based on reasonable assumptions within the bounds of our knowledge of our business and operations, there can be no assurance that actual results will not differ materially from our expectations.

Factors which could cause actual results to differ from expectations include, among other things:

- the challenges, costs and complications associated with the continued development of our branches;
- the potential that loan charge-offs may exceed the allowance for loan losses or that such allowance will be increased as a result of factors beyond the control of us;
 - our dependence on senior management;
- competition from existing financial institutions operating in our market areas as well as the entry into such areas of new competitors with greater resources, broader branch networks and more comprehensive services;
- adverse conditions in the stock market, the public debt market, and other capital markets (including changes in interest rate conditions);
 - changes in deposit rates, the net interest margin, and funding sources;
 - inflation, interest rate, market, and monetary fluctuations;
 - risks inherent in making loans including repayment risks and value of collateral;
- the strength of the United States economy in general and the strength of the local economies in which we conduct operations may be different than expected resulting in, among other things, a deterioration in credit quality or a reduced demand for credit, including the resultant effect on our loan portfolio and allowance for loan losses;
 - fluctuations in consumer spending and saving habits;
 - the demand for our products and services;
 - technological changes;
- the challenges and uncertainties in the implementation of our expansion and development strategies;
 - the ability to increase market share;
 - the adequacy of expense projections and estimates of impairment loss;
- the impact of changes in accounting policies by the Securities and Exchange Commission;
 - unanticipated regulatory or judicial proceedings;
- the potential negative effects of future legislation affecting financial institutions (including without limitation laws concerning taxes, banking, securities, and insurance);
- the effects of, and changes in, trade, monetary and fiscal policies and laws, including interest rate policies of the Board of Governors of the Federal Reserve System;
- the timely development and acceptance of products and services, including products and services offered through alternative delivery channels such as the Internet;

- the impact on our business, as well as on the risks set forth above, of various domestic or international military or terrorist activities or conflicts;
- other factors described in this report and in other reports we have filed with the Securities and Exchange Commission; and
 - our success at managing the risks involved in the foregoing.

Forward-looking statements speak only as of the date on which they are made. We undertake no obligation to update any forward-looking statement to reflect events or circumstances after the date on which the statement is made to reflect the occurrence of unanticipated events.

FIRST RELIANCE BANCSHARES, INC.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation - continued

Overview

The following discussion describes our results of operation for the nine months and quarter ended September 30, 2009 as compared to the nine months and quarter ended September 30, 2008 and also analyzes our financial condition as of September 30, 2009 as compared to December 31, 2008.

Like most community banks, we derive the majority of our income from interest received on our loans and investments. Our primary source of funds for making these loans and investments is our deposits, on which we pay interest. Consequently, one of the key measures of our success is our net interest income, or the difference between the income on our interest-earning assets, such as loans and investments, and the expense on our interest-bearing liabilities, such as deposits and borrowings. Another key measure is the spread between the yield we earn on these interest-earning assets and the rate we pay on our interest-bearing liabilities, which is called our net interest spread.

There are risks inherent in all loans, so we maintain an allowance for loan losses to absorb probable losses on existing loans that may become uncollectible. We maintain this allowance by charging a provision for loan losses against our operating earnings for each period. We have included a detailed discussion of this process, as well as several tables describing our allowance for loan losses.

In addition to earning interest on our loans and investments, we earn income through fees and other charges to our customers. We have also included a discussion of the various components of this non-interest income, as well as of our non-interest expense.

The following discussion and analysis also identifies significant factors that have affected our financial position and operating results during the periods included in the accompanying financial statements. We encourage you to read this discussion and analysis in conjunction with our financial statements and the other statistical information included in our filings with the Securities and Exchange Commission.

Critical Accounting Policies

We have adopted various accounting policies which govern the application of accounting principles generally accepted in the United States in the preparation of our financial statements. Our significant accounting policies are described in the notes to the consolidated financial statements at December 31, 2008 as filed on our annual report on Form 10-K. Certain accounting policies involve significant judgments and assumptions by us which have a material impact on the carrying value of certain assets and liabilities. We consider these accounting policies to be critical accounting policies. The judgments and assumptions we use are based on the historical experience and other factors, which we believe to be reasonable under the circumstances. Because of the nature of the judgments and assumptions we make, actual results could differ from these judgments and estimates which could have a major impact on our carrying values of assets and liabilities and our results of operations.

We believe the allowance for loan losses is a critical accounting policy that requires the most significant judgments and estimates used in preparation of our consolidated financial statements. Refer to the portion of this discussion that addresses our allowance for loan losses for description of our processes and methodology for determining our allowance for loan losses.

Regulatory Matters

We are not aware of any current recommendations by regulatory authorities which, if they were to be implemented, would have a material effect on liquidity, capital resources or operations.

Effect of Economic Trends

Economic conditions, competition and federal monetary and fiscal policies also affect financial institutions. Lending activities are also influenced by regional and local economic factors, such as housing supply and demand, competition among lenders, customer preferences and levels of personal income and savings in our primary market area.

FIRST RELIANCE BANCSHARES, INC.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation - continued

Results of Operations

For the quarter ended September 30, 2009, we incurred a net loss of \$331,072, compared to net income of \$765,178 for the quarter ended September 30, 2008. Basic and diluted earnings (loss) per share were (\$0.16), compared to \$0.22 reported in the prior year.

We realized a net loss of \$1,471,821 for the nine months ended September 30, 2009, compared to net income of \$2,274,722 for the nine months ended September 30, 2008. This resulted in basic and diluted earnings (loss) per share of (\$0.58) for the nine months ended September 30, 2009. For the nine months ended September 30, 2008, basic and diluted earnings per share was \$0.65 and \$0.64, respectively.

The decline in net income for both periods was caused by the significant increase in our provision for loan losses due to the higher level of charged off loans and to the lost income on our nonaccruing loans, which were substantially higher during the nine and three months ended September 30, 2009 compared to the same periods in 2008.

Income Statement Review

Net Interest Income

The largest component of our net income is its net interest income, which is the difference between the income earned on assets and interest paid on deposits and on the borrowings used to support such assets. Net interest income is determined by the yields earned on our interest-earning assets and the rates paid on interest-bearing liabilities, the relative amounts of interest-earning assets and interest-bearing liabilities, and the degree of mismatch and the maturity and repricing characteristics of its interest-earning assets and interest-bearing liabilities. Total interest-earning assets yield less total interest-bearing liabilities rate represents our net interest rate spread.

Net interest income increased \$151,277, or 3.08%, to \$5,055,397 for the quarter ended September 30, 2009, from \$4,904,120 for the comparable period in 2008. Our net interest income for the nine months ended September 30, 2009 and 2008 was \$13,094,199 and \$14,699,354 respectively. This represents a decline of \$1,605,155 or 10.92%. The decrease in the net interest income for the nine months ended September 30, 2009 was attributable to the prevailing market interest rates during 2009 being lower than the rates in effect during the comparable period in 2008. Since approximately 55% of the average volume of our loan portfolio included variable interest rate loans, these lower rates negatively impacted interest income. In addition, the decrease in net interest income was significantly impacted by the increase in our nonaccruing loans, which were \$20,660,823 higher at September 30, 2009 than at September 30, 2008. While the previous mentioned factors had a similar negative impact on the net interest income for the third quarter of 2009 as compared to the third quarter of 2008; they were more than offset by the increase in the percentage of the average volume of investment securities to total average earnings assets and reduction of the average volume of other interest-bearings liabilities.

For the third quarter of 2009 and 2008, total interest income was \$9,082,567 and \$9,051,507, respectively. This equated to a tax-equivalent yield of 6.47% and 6.74%, respectively, on our averaged interest-earning assets. The yield on our interest-earning assets for the quarter ended September 30, 2009 was 27 basis points lower than the yield for the comparable period of 2008. Total interest income for the nine months ended September 30, 2009 was \$24,707,442, a decline of \$3,461,641, or 12.29%, from the total interest income earned during the first nine months of 2008. The tax-equivalent yield for 2009 was 103 basis points lower than the yield for 2008. For the first nine months

of 2009 and 2008, the tax-equivalent yield realized on our earning assets was 5.92% and 6.95%, respectively.

For the third quarter of 2009 and 2008, the primary components of interest income were interest earned on loans of \$7,745,134 and \$8,234,706 and interest on investment securities of \$1,269,043 and \$675,162, respectively. For the first nine months of 2009 and 2008, interest income on loans was \$21,583,188 and \$25,895,022 and interest on investment securities was \$3,017,812 and \$2,006,618, respectively.

Average earning assets for the three and nine months ended September 30, 2009, were \$27,984,810, or 5.17%, and \$20,464,219, or 3.73%, higher than the average earnings assets for the comparable periods of 2008. The increase in both periods was primarily due to growth in the average investment portfolio, which increased \$52,725,885, or 93.48%, and \$30,722,019, or 53.66%, respectively.

FIRST RELIANCE BANCSHARES, INC.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation - continued

The average rate paid on our interest-bearing liabilities was 2.66% and 3.33% for the quarter ended September 30, 2009 and 2008, respectively, which represented a decrease of 67 basis points. The average rate paid on our interest-bearing liabilities declined 84 basis points from 3.58% for the first nine months of 2008 to 2.74% for the comparable 2009 period.

Our average interest-bearing liabilities increased \$104,257,330, or 21.02%, from the quarter ended September 30, 2008, to \$600,209,757 for the quarter ended September 30, 2009. For the nine months ended September 30, 2009 and 2008, our average interest-bearing liabilities were \$566,327,609 and \$503,081,755, respectively. This represents an increase of \$63,245,854, or 12.57%. The increases for both periods were due mainly to the increase in the average balance of interest-bearing deposits, which increased \$130,263,136, or 31.99%, and \$79,301,508, or 19.53%, for the three and nine months ended September 30, 2009, respectively.

Our net interest spread was 3.81% for the three months ended September 30, 2009, compared to 3.41% for the three months ended September 30, 2008. This represents an increase of 40 basis points. For the nine months ended September 30, 2009, our net interest spread was 3.18%, compared to 3.37% for the nine months ended September 30, 2008. This represents a decrease of 19 basis points. The net interest spread is the difference between the yield earned on our interest-earning assets and the rate paid on our interest-bearing liabilities.

Our net interest margin is calculated as tax equivalent net interest income divided by average interest-earning assets. Our net interest margin for the third quarter of 2009 was 3.66%, which is 3 basis points lower than our net interest margin of 3.69% for the third quarter of 2008. For the nine months ended September 30, 2009, our net interest margin was 3.19%, which is 47 basis points lower than our net interest margin of 3.66% for the nine months ended September 30, 2008.

Average Balances, Income and Expenses, and Rates

For the periods indicated, the following tables set forth certain information relating to our average balance sheet and its average yields on assets and average costs of liabilities. Such yields are derived by dividing income or expense by the average balance of the corresponding assets or liabilities. Average balances have been derived from the daily balances throughout the periods indicated.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation - continued

Net interest income can be analyzed in terms of the impact of changing interest rates and changing volume. The following tables set forth the effect which the varying levels of interest-earning assets and interest-bearing liabilities and the applicable rates have had on changes in net interest income for the periods presented.

	Three Months Ended September 30, 2009 compared to 2008		
	Rate	Volume	Total
Interest-earning assets			
Loans	\$ (190,118)	\$ (299,453)	\$ (489,571)

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation - continued

Provision and Allowance for Loan Losses

We have developed policies and procedures for evaluating the overall quality of our credit portfolio and the timely identification of potential problem credits. On a quarterly basis, our Board of Directors reviews and approves the appropriate level for the allowance for loan losses based upon management's recommendations, the results of the internal monitoring and reporting system, and an analysis of economic conditions in our market. The objective of management has been to fund the allowance for loan losses at a level greater or equal to our internal risk measurement system for loan risk.

Additions to the allowance for loan losses, which are expensed as the provision for loan losses on our income statement, are made periodically to maintain the allowance at an appropriate level based on management's analysis of the potential risk in the loan portfolio. Loan losses and recoveries are charged or credited directly to the allowance. The amount of the provision is a function of the level of loans outstanding, the level of nonperforming loans, historical loan loss experience, the amount of loan losses actually charged against the reserve during a given period, and current and anticipated economic conditions.

The allowance represents an amount which management believes will be adequate to absorb inherent losses on existing loans that may become uncollectible. Our judgment as to the adequacy of the allowance for loan losses is based on a number of assumptions about future events, which we believe to be reasonable, but which may or may not prove to be accurate. Our determination of the allowance for loan losses is based on evaluations of the collectability of loans, including consideration of factors such as the balance of impaired loans, the quality, mix, and size of our overall loan portfolio, economic conditions that may affect the borrower's ability to repay, the amount and quality of collateral securing the loans, our historical loan loss experience, and a review of specific problem loans. We also consider subjective issues such as changes in the lending policies and procedures, changes in the local and national economy, changes in volume or type of credits, changes in the volume or severity of problem loans, quality of loan review and board of director oversight, concentrations of credit, and peer group comparisons.

More specifically, in determining our allowance for loan loss, we review loans for specific and impaired reserves based on current appraisals less estimated closing costs. General and unallocated reserves are determined using historical loss trends applied to risk rated loans grouped by loan type. The general and unallocated reserves are calculated by applying the appropriate historical loss ratio to the loan categories. Impaired loans are excluded from this analysis. The sum of all such amounts determines our general and unallocated reserves.

We also track our portfolio and analyze loans grouped by loan type categories. The first step in this process is to risk grade each and every loan in the portfolio based on one common set of parameters. These parameters include items like debt-to-worth ratio, liquidity of the borrower, net worth, experience in a particular field and other factors such as underwriting exceptions. Weight is also given to the relative strength of any guarantors on the loan. Due to our short operating history and only recent experience with problem assets, the results of our migration analysis have yet to provide significant relevant information with respect to determining the general allowance related to nonimpaired loans. We anticipate, however, that this analysis will eventually provide us with historical behavioral indications by credit grading as we develop sufficient history to analyze the general allowance related to non-impaired loans.

After risk grading each loan, we then use 15 qualitative factors to analyze the trends in the portfolio. These 15 factors include both internal and external factors. The internal factors are the concentration of credit across the portfolio, current delinquency ratios and trends, the experience level of management and staff, our adherence to lending policies

and procedures, current loss and recovery trends, the nature and volume of the portfolio's categories, current non-accrual and problem loan trends, the quality of our loan review system, and other factors which include collateral, loan to value ratio, and policy exceptions. The external factors are the current economic and business environment, which includes indicators such as national GDP, pricing indicators, employment statistics, housing statistics, market indicators, financial regulatory economic analysis, and economic forecasts from reputable sources. A quantitative value is assigned to each of the 15 internal and external factors, which, when added together, creates a net qualitative weight. The net qualitative weight is then added to the minimum loss ratio. Negative trends in the loan portfolio increase the quantitative values assigned to each of the qualitative factors and, therefore, increase the loss ratio. As a result, an increased loss ratio will result in a higher allowance for loan loss. For example, as general economic and business conditions decline, this qualitative factor's quantitative value will increase, which will increase the net qualitative weight and the loss ratio (assuming all other qualitative factors remain constant). Similarly, positive trends in the loan portfolio, such as an improvement in general economic and business conditions, will decrease the quantitative value assigned to this qualitative factor, thereby decreasing the net qualitative weight (assuming all other qualitative factors remain constant). These factors are reviewed and updated by our risk management committee on a quarterly basis to arrive at a consensus for our qualitative adjustments.

FIRST RELIANCE BANCSHARES, INC.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation - continued

We then create a loss range by applying average historical industry loss rates for the last 10 years to determine the level of the allowance for loan and lease losses on the non-impaired loans in the portfolio. We utilize a 10 year time frame, as we believe it includes numerous complete economic cycles. As such, we consider the time frame long enough to include both favorable and problematic industry trends relevant in determining historical loss rates. The resulting unadjusted historical loss factor is used as a beginning point upon which we add our quantitative adjustments based on the qualitative factors discussed above. Once the qualitative adjustments are made, we refer to the final amount as the historical loss factor. The historical loss factor is then multiplied by the loans outstanding for the period ended, except for any loans classified as non-performing which are addressed specifically as discussed below.

Separately, we review all impaired loans individually to determine a specific allocation for each. In our assessment of impaired loans, we consider the primary source of repayment when determining whether loans are collateral dependent or not.

Periodically, we adjust the amount of the allowance based on changing circumstances. We recognize loan losses to the allowance and add subsequent recoveries back to the allowance for loan losses. In addition, on a quarterly basis we informally compare our allowance for loan losses to various peer institutions; however, we recognize that allowances will vary as financial institutions are unique in the make-up of their loan portfolios and customers, which necessarily creates different risk profiles for the institutions. We would only consider further adjustments to our allowance for loan losses based on this peer review if our allowance was significantly different from our peer group. To date, we have not made any such adjustment. There can be no assurance that charge-offs of loans in future periods will not exceed the allowance for loan losses as estimated at any point in time or that provisions for loan losses will not be significant to a particular accounting period, especially considering the overall weakness in the commercial real estate market in our market areas.

Our various regulatory agencies review our allowance for loan losses through their periodic examinations, and they may require additions to the allowance for loan losses based on their judgment about information available to them at the time of their examinations. Our losses will undoubtedly vary from our estimates, and it is possible that charge-offs in future periods will exceed the allowance for loan losses as estimated at any point in time.

As of September 30, 2009 and 2008, the allowance for loan losses was \$7,835,814 and \$6,210,753, respectively, an increase of \$1,625,061, or 26.17%, over the 2008 allowance. As a percentage of total loans, the allowance for loan losses was 1.83% and 1.35% at September 30, 2009 and 2008, respectively. The increase in the allowance for loan losses was driven by the significant increase in the amount of net loans charged off during 2009. During the three months ended September 30, 2009, our net loans charged off totaled \$2,971,684 compared to \$140,074 for the three months ended September 30, 2008, an increase of \$2,831,610. For the nine months ended September 30, 2009 and 2008, our net loans charged off totaled \$8,510,356 and \$817,218, respectively, an increase of \$7,693,138.

For the third quarter of 2009 and 2008, the provision for loan losses was \$3,266,449 and \$609,967, respectively, an increase of \$2,656,482. The provision for loan losses was \$8,122,271 and \$1,757,364 for the nine months ended September 30, 2009 and 2008, respectively. This represents an increase of \$6,364,907. The increase in the provision for loan losses for both periods is primarily attributable to the higher than normal amount of our net loans charged-off.

We believe the allowance for loan losses at September 30, 2009, is adequate to meet potential loan losses inherent in the loan portfolio.

FIRST RELIANCE BANCSHARES, INC.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation - continued

Noninterest Income

The following table sets forth information related to our noninterest income.

	Three months ended September 30,		Nine months ended September 30,	
	2009	2008	2009	2008
Service fees on deposit accounts	\$ 495,390	\$ 548,098	\$ 1,430,484	\$ 1,477,950
Gain on sale of mortgage loans	803,133	319,519	2,017,670	1,445,876
Gain on sale of securities available-for-sale	846,027	-	1,875,486	-
Other income	286,292	294,541	1,114,036	969,627
Total noninterest income	\$ 2,430,842	\$ 1,162,158	\$ 6,437,676	\$ 3,893,453

Compared to 2008, noninterest income increased \$1,268,684 for the third quarter of 2009, while it increased \$2,544,223 for the nine months ended September 30, 2009. The increase in both periods is largely attributable to the gain on sale of securities available-for-sale of \$846,027 and \$1,875,486 for the three and nine months ended September 30, 2009, respectively. The underlying securities were sold in accordance with our strategy to reposition the investment portfolio in order to maximize the yield on our investment securities.

Other income consisted primarily of other service fees and commissions, income from bank owned life insurance and other miscellaneous types of income.

Noninterest Expense

Total noninterest expense for the three months ended September 30, 2009, was \$5,083,850, an increase of \$604,556, or 13.50% from the three months ended September 30, 2008. For the nine months ended September 30, 2009 and 2008, noninterest expense totaled \$14,562,652 and \$13,941,367, respectively, an increase of \$621,285, or 4.46%. Total noninterest expense for both periods was significantly impacted by the increases in FDIC insurance premiums. Before the expense of the FDIC insurance premiums our noninterest expense for the three and nine months ended September 30, 2009 was 5.85% and 0.22% higher than for the corresponding 2008 periods, respectively.

For the three months ended September 30, 2009, compared to the three months ended September 30, 2008, salaries and employee benefits increased \$116,195, or 4.49%, while all other major categories of noninterest expense increased \$488,361, or 25.85%. For the nine months ended September 30, 2009, compared to the nine months ended September 30, 2008, salaries and employee benefits decreased \$113,627, or 1.36%, while all other major categories of noninterest expense increased \$734,912, or 13.13%.

The change from the income tax expense of \$211,839 and \$619,354 for the three and nine months ended September 30, 2008, respectively, to the income tax benefit of \$532,988 and \$1,681,227 for the comparable 2009 periods, respectively, is attributable to the net operating loss incurred before our income tax provision and the increase in nontaxable investment income.

Balance Sheet Review

General

At September 30, 2009, we had total assets of \$684.0 million, consisting principally of \$427.7 million in loans, \$83.8 million in investments, and \$115.7 million in cash and due from banks. Our liabilities at September 30, 2009 totaled \$632.7 million, which consisted principally of \$570.9 million in deposits, \$48.0 million in FHLB advances, and \$11.2 million in other borrowings. Since March 6, 2009, we improved our capital position by issuing \$15.3 million of preferred stock to the United States Treasury under the Troubled Asset Relief Program Capital Purchase Program. At September 30, 2009, our shareholders' equity was \$51.4 million.

At December 31, 2008, we had total assets of \$603.4 million, consisting principally of \$469.0 million in loans, \$80.9 million in investments, and \$5.5 million in cash and due from banks. Our liabilities at December 31, 2008 totaled \$566.0 million, consisting principally of \$461.1 million in deposits, \$78.0 million in FHLB advances, and \$25.5 million in other borrowings. At December 31, 2008, our shareholders' equity was \$37.4 million.

FIRST RELIANCE BANCSHARES, INC.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation - continued

Investments Securities

The investment securities portfolio, which is also a component of our total earning assets, consists of securities available-for-sale and nonmarketable equity securities.

At September 30, 2009 and December 31, 2008, we had investment securities totaling \$83,841,138 and \$80,885,516, respectively, which represented 12.25% and 13.40% of our total assets, respectively.

Nonmarketable equity securities consist of Federal Home Loan Bank stock, which is recorded at its original cost of \$4,812,100 and \$4,574,700 at September 30, 2009 and December 31, 2008, respectively.

The amortized costs and the fair value of our securities available-for-sale at September 30, 2009 and December 31, 2008 are shown in the following table.

	September 30, 2009		December 31, 2008	
	Amortized Cost	Estimated Fair Value	Amortized Cost	Estimated Fair Value
U. S. Government agencies	\$ 7,715,527	\$ 7,728,428	\$ 88,013	\$ 87,997
Mortgage-backed securities	29,016,707	28,678,560	46,465,667	47,574,021
Municipal securities	41,610,567	42,555,400	29,843,730	28,524,498
Other	218,750	66,650	218,750	124,300
	\$ 78,561,551	\$ 79,029,038	\$ 76,616,160	\$ 76,310,816

At September 30, 2009, securities classified as available-for-sale are recorded at fair market value. Approximately 50.68% of the unrealized losses, or 10 individual securities, consisted of securities in a continuous loss position for twelve months or more. The Company does not intend to sell these securities and it is more likely than not that the Company will not be required to sell these securities before recovery of their amortized cost. The Company believes, based on industry analyst reports and credit ratings, that the deterioration in value is attributable to changes in market interest rates and is not in the credit quality of the issuer and therefore, these losses are not considered other-than-temporary.

Securities Available-for-Sale Maturity Distribution and Yields

Contractual maturities and yields on our available for sale securities at September 30, 2009 are shown in the following table. Expected maturities may differ from contractual maturities because issuers may have the right to call or prepay obligations with or without call or prepayment penalties.

September 30, 2009 (Dollars in thousands)	After One But Within Five Years		After Five But Within Ten Years		After Ten Years		Total	
	Amount	Yield	Amount	Yield	Amount	Yield	Amount	Yield

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation - continued

Loans

Since loans typically provide higher interest yields than other types of interest earning assets, a substantial percentage of our earning assets are invested in our loan portfolio. For the nine months ended September 30, 2009 and 2008, average loans, including mortgage loans held for sale, were \$473,583,342 and \$482,495,372, respectively. Before the allowance for loan losses, total loans outstanding, excluding mortgage loans held for sale, at September 30, 2009 and December 31, 2008, were \$427,672,392 and \$468,990,202, respectively.

The following table summarizes the composition of our loan portfolio at September 30, 2009 and December 31, 2008.

	September 30, 2009	% of Total	December 31, 2008	% of Total
Mortgage loans on real estate				
Residential 1-4 family	\$ 58,489,283	13.68%	\$ 72,245,289	15.40%
Multifamily	9,914,110	2.32	7,104,889	1.51
Commercial	174,061,675	40.69	201,318,345	42.94
Construction	87,174,155	20.38	60,744,432	12.95
Second mortgages	4,789,156	1.12	4,989,538	1.06
Equity lines of credit	32,742,701	7.66	37,792,852	8.06

Commercial and industrial	50,087,031	11.71	70,877,890	15.12
Consumer	8,111,861	1.90	8,974,448	1.91
Other, net	2,302,420	.54	4,942,519	1.05
Total loans	\$ 427,672,392	100.00%	\$ 468,990,202	100.00%

Maturities and Sensitivity of Loans to Changes in Interest Rates

The information in the following tables is based on the contractual maturities of individual loans, including loans which may be subject to renewal at their contractual maturity. Renewal of such loans is subject to review and credit approval, as well as modification of terms upon maturity. Actual repayments of loans may differ from the maturities reflected below because borrowers have the right to prepay obligations with or without prepayment penalties.

The following table summarizes the loan maturity distribution by type and related interest rate characteristics at September 30, 2009.

Loan Maturity Schedule and Sensitivity to Changes in Interest Rates

Activity in the Allowance for Loan Losses

The following table summarizes the activity related to our allowance for loan losses for the nine months ended September 30, 2009 and 2008.

	September 30,	
	2009	2008
Balance, January 1	\$ 8,223,899	\$ 5,270,607
Provision for loan losses for the period	8,122,271	1,757,364
Net loans (charged-off) recovered for the period	(8,510,356)	(817,218)
Balance, end of period	\$ 7,835,814	\$ 6,210,753
Total loans outstanding, end of period	\$ 427,672,392	\$ 459,686,752
Allowance for loan losses to loans outstanding	1.83%	1.35%

Risk Elements in the Loan Portfolio

The following is a summary of risk elements in the loan portfolio.

	September 30,	
	2009	2008
Nonperforming Loans		
Nonaccrual loans	\$ 25,012,396	\$ 4,351,573
Accruing loans more than 90 days past due	331,832	5,075,278
Nonperforming loans	\$ 25,344,228	\$ 9,426,851
Percentage of nonperforming loans to total loans	5.93%	2.05%
Allowance for loan losses as a percentage of nonperforming loans	30.92%	65.88%

Generally, loans are placed on nonaccrual status if principal or interest payments become 90 days past due and/or we deem the collectability of the principal and/or interest to be doubtful. Once a loan is placed in nonaccrual status, all previously accrued and uncollected interest is reversed against interest income. Interest income on nonaccrual loans is recognized on a cash basis when the ultimate collectability is no longer considered doubtful. Loans are returned to accrual status when the principal and interest amounts contractually due are brought current and future payments are reasonably assured. All nonaccruing loans at September 30, 2009 and 2008 were included in our impaired loans at those dates.

Impaired Loans

At September 30, 2009, we had impaired loans totaling \$45,793,350, as compared to \$8,391,560 at September 30, 2008. Included in the impaired loans at September 30, 2009, were 17 borrowers that accounted for approximately

60.68% of the total amount of the impaired loans at that date. These loans were primarily commercial real estate loans isolated to the coastal regions of South Carolina.

The recent downturn in the real estate market has resulted in an increase in loan delinquencies, defaults and foreclosures; however, we believe these trends are slowing. In some cases, this downturn has resulted in a significant impairment to the value of our collateral and ability to sell the collateral upon foreclosure at its appraised value. However, there is a risk that these trends could continue a higher pace. If real estate values continue to decline, it is also more likely that we would be required to increase its allowance for loan losses.

FIRST RELIANCE BANCSHARES, INC.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation - continued

During the nine months ended September 30, 2009, the average investments in impaired loans was \$42,248,286 as compared to \$4,296,110 during the nine months ended September 30, 2008. Impaired loans with a specific allocation of the allowance for loan losses totaled \$24,378,083 and \$5,739,880 at September 30, 2009 and 2008, respectively. The amount of the specific allocation at September 30, 2009 and 2008 was \$3,008,332 and \$1,774,074, respectively.

Monthly, management analyzes each loan that is classified as impaired to determine the potential for possible loan losses. This analysis is focused upon determining the then current estimated value of the collateral, local market condition and estimated costs to foreclose, repair and resell the property. The net realizable value of the property is then computed and compared to the loan balance to determine the appropriate amount of specific reserve for each loan.

Interest income recognized on impaired loans for the nine months ended September 30, 2009 and 2008 was \$1,574,723 and \$357,277, respectively.

Deposits and Other Interest-Bearing Liabilities

Average interest-bearing liabilities increased \$63,245,854, or 12.57%, to \$566,327,609 for the nine months ended September 30, 2009, from \$503,081,755 for the nine months ended September 30, 2008.

Deposits

For the nine months ended September 30, 2009 and 2008, average total deposits were \$530,759,028 and \$450,903,391, respectively, which is an increase of \$79,855,637, or 17.71%. At September 30, 2009 and December 31, 2008, total deposits were \$570,862,203 and \$461,135,384, respectively, an increase of \$109,726,819, or 23.79%.

Average interest-bearing deposits increased \$79,301,508, or 19.53%, to \$485,409,972 for the nine months ended September 30, 2009, from \$406,108,464 for the nine months ended September 30, 2008.

The average balance of non-interest bearing deposits increased \$554,129, or 1.24%, to \$45,349,056 for the nine months ended September 30, 2009, from \$44,794,927 for the nine months ended September 30, 2008.

The following table shows the average balance amounts and the average rates paid on deposits held by us for the nine months ended September 30, 2009 and 2008.

	2009		2008	
	Average Amount	Average Rate	Average Amount	Average Rate
Noninterest bearing demand deposits	\$ 45,349,056	0.00%	\$ 44,794,927	0.00%
Interest bearing demand deposits	37,051,911	0.58	28,487,055	0.64
Savings accounts	102,778,863	1.75	93,318,495	2.36
Time deposits	345,579,198	3.08	284,302,914	4.17
	\$ 530,759,028	2.38%	\$ 450,903,391	3.16%

Core deposits, which exclude time deposits of \$100,000 or more, provide a relatively stable funding source for our loan portfolio and other earning assets. Core deposits were \$377,579,150 and \$323,690,517 at September 30, 2009 and December 31, 2008, respectively. This represented an increase of \$53,888,633, or 16.65%. The increase in core deposits resulted from successful pricing and marketing promotions.

Included in time deposits \$100,000 and over, at September 30, 2009 and December 31, 2008 are brokered time deposits of \$127,629,000 and \$96,652,000, respectively. We anticipate being able to either renew or replace brokered deposits when they mature, although we may not be able to replace them with deposits with the same terms or rates.

FIRST RELIANCE BANCSHARES, INC.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation - continued

Deposits, and particularly core deposits, have been our primary source of funding and have enabled us to meet successfully both our short-term and long-term liquidity needs. We anticipate that such deposits will continue to be our primary source of funding in the future. However, advances from the Federal Home Loan Bank are being used as an alternative source of funds. Our loan-to-deposit ratio was 74.92% and 101.70% at September 30, 2009 and December 31, 2008, respectively.

All of our time deposits are certificates of deposits. The maturity distribution of our time deposits of \$100,000 or more at September 30, 2009 was as follows:

Three months or less	\$ 10,906,578
Over three through twelve months	45,913,664
Over one year through three years	69,069,979
Over three years	67,392,832
Total	\$ 193,283,053

Borrowings

The following table outlines our various sources of borrowed funds during the nine months ended September 30, 2009 and the year ended December 31, 2008, the amounts outstanding at the end of each period, at the maximum point for each component during the periods and on average for each period, and the average interest rate that we paid for each borrowing source. The maximum month-end balance represents the high indebtedness for each component of borrowed funds at any time during each of the periods shown.

(Dollars in thousands)	Maximum Outstanding at any Month End	Weighted Average Balance	Average Interest Rate	Ending Balance	Period End Rate
At or for the nine months ended September 30, 2009					
Securities sold under agreement to repurchase	\$ 7,664	\$ 2,719	0.06%	\$ 873	0.25%
Advances from Federal Home Loan Bank	93,500	65,875	3.38	48,000	3.95
Federal funds purchased	243	27	0.82	-	-
Note payable	6,950	1,986	2.35	-	-
Junior subordinated debentures	10,310	10,310	5.86	10,310	5.93
At or for the year ended December 31, 2008					
Securities sold under agreement to repurchase	\$ 9,291	\$ 7,845	1.54%	\$ 8,197	0.25%
Advances from Federal Home Loan Bank	83,500	72,617	3.77	78,000	3.43

Edgar Filing: FIRST RELIANCE BANCSHARES INC - Form 10-Q

Capital Resources

Total shareholders' equity at September 30, 2009 and December 31, 2008 was \$51,434,781 and \$37,425,758, respectively. The \$14,009,023 increase during the first nine months of 2009 resulted primarily from the issuance of \$15,349,000 of preferred stock to the United States Treasury under the Troubled Asset Relief Program Capital Purchase Program. See Note 6 of the condensed consolidated financial statements, which described the terms of the preferred stock issued to the Treasury.

The following table shows the return on average assets (net income (loss) divided by average total assets), return on average equity (net income (loss) divided by average equity), and equity to assets ratio (average equity divided by average total assets) for the nine months ended September 30, 2009 and 2008. Since our inception, we have not paid cash dividends on common stock.

	September 30, 2009	September 30, 2008
Return on average assets	(0.30)%	0.52%
Return on average equity	(4.13)%	8.01%
Average equity to average assets ratio	7.21%	6.44%

The Company and its bank subsidiary are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possible additional discretionary actions by regulators that, if undertaken, could have a material effect on the Company's consolidated financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Bank must meet specific capital guidelines that involve quantitative measures of the Company's assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. The Company's capital amounts and classifications are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Company to maintain minimum ratios of Tier 1 and total capital as a percentage of assets and off-balance-sheet exposures, adjusted for risk weights ranging from 0% to 100%. Tier 1 capital of the Company consists of common shareholders' equity, excluding the unrealized gain or loss on securities available-for-sale, minus certain intangible assets. The Company's Tier 2 capital consists of the allowance for loan losses subject to certain limitations. Total capital for purposes of computing the capital ratios consists of the sum of Tier 1 and Tier 2 capital. The regulatory minimum requirements are 4% for Tier 1 capital and 8% for total risk-based capital.

The Company and its bank subsidiary are also required to maintain capital at a minimum level based on quarterly average assets, which is known as the leverage ratio. Only the strongest banks are allowed to maintain capital at the minimum requirement of 3%. All others are subject to maintaining ratios 1% to 2% above the minimum.

The following table sets forth the Company's and its bank subsidiary various capital ratios at September 30, 2009 and at December 31, 2008. For all periods, the Company's bank subsidiary was considered "well capitalized" and the Company met or exceeded its regulatory capital requirements applicable to bank holding companies.

September 30 , 2009

December 31, 2008

Edgar Filing: FIRST RELIANCE BANCSHARES INC - Form 10-Q

	Holding Company	Bank	Holding Company	Bank
Tier 1 capital (to risk-weighted assets)	12.71%	11.88%	10.73%	9.60%
Total capital (to risk-weighted assets)	13.96%	13.14%	11.97%	10.86%
Leverage or Tier 1 capital (to total average assets)	8.81%	8.23%	9.28%	8.18%

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation - continued

Effect of Inflation and Changing Prices

The effect of relative purchasing power over time due to inflation has not been taken into account in our consolidated financial statements. Rather, our financial statements have been prepared on an historical cost basis in accordance with generally accepted accounting principles.

Unlike most industrial companies, our assets and liabilities are primarily monetary in nature. Therefore, the effect of changes in interest rates will have a more significant impact on our performance than will the effect of changing prices and inflation in general. In addition, interest rates may generally increase as the rate of inflation increases, although not necessarily in the same magnitude. As discussed previously, we seek to manage the relationships between interest sensitive assets and liabilities in order to protect against wide rate fluctuations, including those resulting from inflation.

Off-Balance Sheet Risk

Through our operations, we have made contractual commitments to extend credit in the ordinary course of our business activities. These commitments are legally binding agreements to lend money to our customers at predetermined interest rates for a specified period of time. At September 30, 2009, we had issued commitments to extend credit of \$40.0 million and standby letters of credit of \$2.6 million through various types of commercial lending arrangements. Approximately \$32.4 million of these commitments to extend credit had variable rates.

The following table sets forth the length of time until maturity for unused commitments to extend credit and standby letters of credit at September 30, 2009.

(Dollars in thousands)	Within One Month	After One Through Three Months	After Three Through Twelve Months	Within One Year	Greater Than One Year	Total
Unused commitments to extend credit	\$ 4,865	\$ 71	\$ 10,814	\$ 15,750	\$ 24,212	\$ 39,962
Standby letters of credit	542	350	93	985	1,598	2,583
Total	\$ 5,407	\$ 421	\$ 10,907	\$ 16,735	\$ 25,810	\$ 42,545

We evaluate each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by us upon extension of credit, is based on our credit evaluation of the borrower. Collateral varies, but may include accounts receivable, inventory, property, plant and equipment, commercial and residential real estate.

FIRST RELIANCE BANCSHARES, INC.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation - continued

Market Risk

Market risk is the risk of loss from adverse changes in market prices and rates, which principally arises from interest rate risk inherent in our lending, investing, deposit gathering, and borrowing activities. Other types of market risks, such as foreign currency exchange rate risk and commodity price risk, do not generally arise in the normal course of our business. Our finance committee monitors and considers methods of managing exposure to interest rate risk. We have both an internal finance committee consisting of senior management that meets at various times during each quarter and a management finance committee that meets weekly as needed. The finance committees are responsible for maintaining the level of interest rate sensitivity of our interest sensitive assets and liabilities within board-approved limits.

We actively monitor and manage our interest rate risk exposure principally by measuring our interest sensitivity "gap," which is the positive or negative dollar difference between assets and liabilities that are subject to interest rate repricing within a given period of time. Interest rate sensitivity can be managed by repricing assets or liabilities, selling securities available for sale, replacing an asset or liability at maturity, or adjusting the interest rate during the life of an asset or liability. Managing the amount of assets and liabilities repricing in this same time interval helps to hedge the risk and minimize the impact on net interest income of rising or falling interest rates. We generally would benefit from increasing market rates of interest when we have an asset-sensitive gap position and generally would benefit from decreasing market rates of interest when we are liability-sensitive.

We were asset sensitive during most of the year ended December 31, 2008 and during the nine months ended September 30, 2009. As of September 30, 2009, we expect to be liability sensitive for the next three months because a majority of our deposits reprice over a 12-month period. Approximately 55% of our loans were variable rate loans at September 30, 2009. The ratio of cumulative gap to total earning assets after 12 months was (37.78%) because \$197.2 million more assets will reprice in a 12 month period than liabilities. However, our gap analysis is not a precise indicator of our interest sensitivity position. The analysis presents only a static view of the timing of maturities and repricing opportunities, without taking into consideration that changes in interest rates do not affect all assets and liabilities equally. For example, rates paid on a substantial portion of core deposits may change contractually within a relatively short time frame, but those rates are viewed by us as significantly less interest-sensitive than market-based rates such as those paid on noncore deposits. Net interest income may be affected by other significant factors in a given interest rate environment, including changes in the volume and mix of interest-earning assets and interest-bearing liabilities.

FIRST RELIANCE BANCSHARES, INC.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation - continued

Liquidity and Interest Rate Sensitivity

Liquidity represents the ability of a company to convert assets into cash or cash equivalents without significant loss and the ability to raise additional funds by increasing liabilities. Liquidity management involves monitoring our sources and uses of funds in order to meet our day-to-day cash flow requirements while maximizing profits. Liquidity management is made more complicated because different balance sheet components are subject to varying degrees of management control. For example, the timing of maturities of our investment portfolio is fairly predictable and subject to a high degree of control at the time investment decisions are made. However, net deposit inflows and outflows are far less predictable and are not subject to the same degree of control.

At September 30, 2009, our liquid assets, consisting of cash and due from banks, amounted to \$115.7 million, or 16.91% of total assets. Our investment securities, excluding nonmarketable securities, at September 30, 2009 amounted to \$79.0 million, or 11.55% of total assets. Investment securities traditionally provide a secondary source of liquidity since they can be converted into cash in a timely manner. However, 100% of our securities are pledged against unused FHLB borrowing lines, the Federal Reserve line of credit, and other required deposit accounts. At December 31, 2008, our liquid assets, consisting of cash and due from banks, amounted to \$5.7 million, or 0.95% of total assets. Our investment securities, excluding nonmarketable securities, at December 31, 2008 amounted to \$76.3 million, or 12.65% of total assets. However, \$73.2 million of these securities were pledged.

Our ability to maintain and expand our deposit base and borrowing capabilities serves as our primary source of liquidity. We plan to meet our future cash needs through the liquidation of temporary investments, the generation of deposits, and from additional borrowings. In addition, we will receive cash upon the maturity and sale of loans and the maturity of investment securities. During most of 2008 and the first nine months of 2009, as a result of historically low rates that were being earned on short-term liquidity investments, we maintained a lower than normal level of short-term liquidity securities. Additionally, we maintain four federal funds purchased lines of credit with correspondent banks, giving us credit availability totaling approximately \$17.0 million, for which there were no borrowings against the lines at September 30, 2009. We are also a member of the Federal Home Loan Bank of Atlanta, from which applications for borrowings can be made for leverage purposes. The FHLB requires that securities, qualifying mortgage loans, and stock of the FHLB owned by the bank be pledged to secure any advances from the FHLB. The Company has an available line to borrow funds from the Federal Home Loan Bank up to 30% of the bank's total assets which provide additional available funds of \$204.5 million at September 30, 2009. At September 30, 2009, the bank had \$48.0 million outstanding in FHLB advances. Additionally, the Company has an available line of credit at the Federal Reserve of \$28.1 million. At September 30, 2009, there were no borrowings against this line. We believe that sources described above will be sufficient to meet our future liquidity needs.

Asset/liability management is the process by which we monitor and control the mix and maturities of our assets and liabilities. The essential purposes of asset/liability management are to ensure adequate liquidity and to maintain an appropriate balance between interest sensitive assets and liabilities in order to minimize potentially adverse impacts on earnings from changes in market interest rates. We have both an internal finance committee consisting of senior management that meets at various times during each quarter and a management finance committee that meets weekly as needed. The finance committees are responsible for maintaining the level of interest rate sensitivity of our interest sensitive assets and liabilities within board-approved limits.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation - continued

Interest Sensitivity Analysis

The following table sets forth information regarding our rate sensitivity as of September 30, 2009 for each of the time intervals indicated. The information in the table may not be indicative of our rate sensitivity position at other points in time. In addition, the maturity distribution indicated in the table may differ from the contractual maturities of the earning assets and interest-bearing liabilities presented due to consideration of prepayment speeds under various interest rate change scenarios in the application of the interest rate sensitivity methods described above.

Item 3 - Quantitative and Qualitative Disclosures About Market Risk

See "Market Risk" and "Liquidity and Interest Rate Sensitivity" in Item 2, Management Discussion and Analysis of Financial Condition and Results of Operations, for quantitative and qualitative disclosures about market risk, which information is incorporated herein by reference.

Item 4. Controls and Procedures

As of the end of the period covered by this Quarterly Report on Form 10-Q, our chief executive officer and chief financial officer have evaluated the effectiveness of our disclosure controls and procedures ("Disclosure Controls"). Disclosure Controls, as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), are procedures that are designed with the objective of ensuring that information required to be disclosed in our reports filed under the Exchange Act, such as this quarterly Report on Form 10-Q, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure Controls are also designed with the objective of ensuring that such information is accumulated and communicated to our management, including the CEO and CFO, as appropriate to allow timely decisions regarding required disclosure.

Our management, including the CEO and CFO, does not expect that our Disclosure Controls will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions.

Based upon their controls evaluation, our CEO and CFO have concluded that our Disclosure Controls are effective at a reasonable assurance level.

There have been no changes in our internal controls over financial reporting during our third fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

FIRST RELIANCE BANCSHARES, INC.

Part II - Other Information

Item 1. Legal Proceedings

There are no material, pending legal proceedings to which the Company or its bank subsidiary is a party or of which any of their property is the subject.

Item 1A. Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, "Item 1. Business" under the heading "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2008, which could materially affect our business, financial condition or future results. The risks described in our Annual Report on Form 10-K are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results.
