DATONE, INC.
NOTES TO FINANCIAL STATEMENTS (UNAUDITED)

NOTE 1 - ORGANIZATION AND BUSINESS OPERATIONS

Datone, Inc. was originally incorporated on August 9, 2000 under the laws of the State of Delaware. The Company operated as a wholly-owned subsidiary of USIP.COM, Inc. On August 24, 2006, USIP decided to spin-off its subsidiary companies, one of which was Datone, Inc. On February 1, 2008, Datone, Inc. filed a Form 10-SB registration statement. On November 13, 2008, Datone, Inc. went effective.

On February 12, 2010, the Company completed a reverse acquisition transaction through a share exchange with Glory Reach International Limited, a Hong Kong limited company (“Glory Reach”), the shareholders of Glory Reach (the “Shareholders”), Greenwich Holdings LLC and Qingdao Shoes, whereby the Company acquired 100% of the issued and outstanding capital stock of Glory Reach in exchange for 10,000 shares of our Series A Convertible Preferred Stock which constituted 97% of our issued and outstanding capital stock on an as-converted to common stock basis as of and immediately after the consummation of the reverse acquisition. As a result of the reverse acquisition, Glory Reach became our wholly-owned subsidiary and the former shareholders of Glory Reach became our controlling stockholders. The share exchange transaction with Glory Reach was treated as a reverse acquisition, with Glory Reach as the acquirer and Datone, Inc. as the acquired party for accounting and financial reporting purposes.

Datone spun off all its assets and liabilities to its prior owners before the reverse merger. For Glory Reach, reverse merger is accounted for as a reverse merger with a shell company and as a recapitalization.

Glory Reach International Limited (the “Company”) was established in Hong Kong on November 18, 2009 to serve as an intermediate holding company. Mr. Tao Wang, the controlling interest holder of Qingdao Shoes also controls the Company. On February 8, 2010, also pursuant to the restructuring plan, the Company acquired 100% of the equity interests in Qingdao Shoes.

Qingdao Shoes was incorporated on March 11, 2003 in Jimo County, Qingdao City, Shandong Province, People’s Republic of China (the “PRC”) with registered capital of \$320,480. Prior to December 18, 2009, Mr. Tao Wang owned 80% of Qingdao Shoes and the remaining 20% was owned by Mr. Renwei Ma. Starting from December 18, 2009, Mr. Tao Wang owned 80% of Qingdao Shoes, Mr. Renwei Ma owned 15% and Mr. Wenyi Chen owned the remaining 5%. Qingdao Shoes is the owner of the brand name “Hongguan” and principally engaged in the wholesale and retail sales of fashion footwear primarily in the northeast region of China.

Since there is common control between the Glory Reach and Qingdao Shoes, for accounting purposes, the acquisitions of Qingdao Shoes has been treated as a recapitalization with no adjustment to the historical basis of their assets and liabilities. The restructuring has been accounted for using the “as if” pooling method of accounting and the operations were consolidated as if the restructuring had occurred as of the beginning of the earliest period presented in our consolidated financial statements and the current corporate structure had been in existence throughout the periods covered by our consolidated financial statements.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

These accompanying unaudited interim consolidated financial statements of the Company have been prepared in accordance with accounting principles generally accepted in the United States of America and the rules of the Securities and Exchange Commission, and should be read in conjunction with the December 31, 2009 audited financial statements of the Company and the notes thereto as included in the Company’s Form PRER14C filed on

Edgar Filing: Datone, Inc - Form 10-Q

April 19, 2010. In the opinion of management, all adjustments, consisting of normal recurring adjustments, necessary for fair presentation of financial position and results of operations for the interim periods presented have been reflected herein. The results of operations for interim periods are not necessarily indicative of the results to be expected for the full year. Notes to the consolidated financial statements, which would substantially duplicate the disclosure required in the Company's December 31, 2009 annual financial statements have been omitted.

All significant inter-company balances and transactions have been eliminated in consolidation. Certain prior period numbers are reclassified to conform to current period presentation.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (“US GAAP”) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the financial statements and the amount of revenues and expenses during the reporting periods. Management makes these estimates using the best information available at the time the estimates are made. However, actual results could differ materially from those estimates.

Concentration of Credit Risk

Financial instruments that potentially subject the Company to significant concentrations of credit risk consist principally of cash and trade receivables. As of March 31, 2010 and December 31, 2009, substantially all of the Company’s cash were held by major financial institutions located in the PRC, which management believes are of high credit quality. With respect to trade receivables, the Company rarely extends credit to its customers. The Company generally does not require collateral for trade receivables and has not experienced any credit losses in collecting the trade receivables.

The Company operates principally in the PRC and grants credit to its customers in this geographic region. Although the PRC is economically stable, it is always possible that unanticipated events in foreign countries could disrupt the Company’s operations.

Comprehensive Income

The Company has adopted the provisions of ASC 220 “Reporting Comprehensive Income” which establishes standards for the reporting and display of comprehensive income, its components and accumulated balances in a full set of general purpose financial statements.

ASC 220 defines comprehensive income is comprised of net income and all changes to the statements of stockholders’ equity, except those due to investments by stockholders, changes in paid-in capital and distributions to stockholders, including adjustments to minimum pension liabilities, accumulated foreign currency translation, and unrealized gains or losses on marketable securities. The Company’s other comprehensive income arose from the effect of foreign currency translation adjustments.

Value Added Taxes

The Company is subject to value added tax (“VAT”) for selling merchandise. The applicable VAT rate is 17% for products sold in the PRC. The amount of VAT liability is determined by applying the applicable tax rate to the invoiced amount of goods sold (output VAT) less VAT paid on purchases made with the relevant supporting invoices (input VAT). Under the commercial practice of the PRC, the Company pays VAT based on tax invoices issued. The tax invoices may be issued subsequent to the date on which revenue is recognized, and there may be a considerable delay between the date on which the revenue is recognized and the date on which the tax invoice is issued. In the event that the PRC tax authorities dispute the date on which revenue is recognized for tax purposes, the PRC tax office has the right to assess a penalty based on the amount of the taxes which are determined to be late or deficient, and will be expensed in the period if and when a determination is made by the tax authorities that a penalty is due.

Revenue Recognition

Retail sales are recognized at the point of sale to customers, are recorded net of estimated returns, and exclude value added tax (“VAT”). Whole-sales to its contracted customers are recognized as revenue at the time the product is shipped

and title passes to the customer on an FOB shipping point basis.

Earnings per Share

Basic earnings per share is computed by dividing net income by weighted average number of shares of common stock outstanding during each period. Diluted earnings per share is computed by dividing net income by the weighted average number of shares of common stock, common stock equivalents and potentially dilutive securities outstanding during each period. At March 31, 2010 and December 31, 2009, respectively, the Company had no common stock equivalents that could potentially dilute future earnings per share.

NOTE 3 – NOTES RECEIVABLE

The Company advanced \$440,100 to a third party in January 2010. The note receivable carries annual interest at 10% and matures in July 2010.

NOTE 4 - SHORT TERM LOANS

Short-term loans are due to two financial institutions which are normally due within one year. As of March 31, 2010 and December 31, 2009, the Company's short term loans consisted of the following:

	March 31, 2010	December 31, 2009
JMRB, two 12-month bank loans both due in November 2010, bears annual interest at 7.965% average, secured by third parties	293,400	293,400
BOQ, 12-month bank loan due in September 2010, bears annual interest at 6.372% average, pledged by Company's building and land use right	425,430	425,430
JMRB, 12-month bank loan due in December 2010, bears annual interest at 7.965% average, secured by third parties	440,100	-
Total short-term debt	\$ 1,158,930	\$ 718,830

The above indebtedness to JMRB at March 31, 2010 and December 31, 2009 has been guaranteed by two unrelated companies.

NOTE 5 – LONG TERM LOANS

On December 16, 2009, the Company entered into a 2-year loan agreement with JMRB. The Company borrowed \$249,390 with an annual interest rate equal to 7.02% and is due in December 2011. The loan is guaranteed by the relatives of Mr. Tao Wang, the CEO and major shareholder of the Company and is collateralized by the property of his relatives.

NOTE 6 - RELATED PARTY BALANCES AND TRANSCATIONS

Due to related party

At December 31, 2009, the amount due to Mr. Tao Wang, the CEO and major shareholder of the Company amounted to \$104,511. These borrowings bear no interest and were paid off in first quarter 2010.

At December 31, 2009, the dividend payable to Mr. Renwei Ma, the shareholder of the Company was \$117,360, which was paid off in the first quarter of 2010.

Related party transactions

The Company leases one of its stores from Mr. Tao Wang under a four-year operating lease expiring August 2011. For the three months ended March 31, 2010 and 2009, related party rent expense of \$4,400 and \$4,395, respectively, was included in total rent expense of the year.

The Company leases one of its warehouse buildings to Weidong, Liang, brother-in-law of Mr. Tao Wang, for three years starting May 2008. Per the agreement, the lessee shall pay equal amount of advertising expense on behalf of the lessor as the lease payment. For the three months ended March 31, 2010 and 2009, the Company recorded other income of \$21,998 and \$21,977 respectively, from leasing the aforementioned building and advertising expense of the same amount respectively.

NOTE 7 - INCOME TAX

The Company is governed by the Income Tax Law of the PRC concerning the private-run enterprises, which are generally subject to tax at a statutory rate of 25% on income reported in the statutory financial statements.

	Three Months Ended March 31, 2010	Three Months Ended March 31, 2009
Income before income taxes	\$ 1,830,123	\$ 1,710,891
Income taxes	\$ 457,531	\$ 427,723
Effective tax rate	25%	25 %

There is no significant temporary difference between book and tax income.

The Company has no United States income tax liabilities as of March 31, 2010 and December 31, 2009.

NOTE 8 – SHAREHOLDERS’ EQUITY

During January 2010, the Company distributed \$378,205 to its shareholders.

Series A Convertible Preferred Stock

The Company issued 10,000 shares of our Series A Preferred Stock in February 2010 related to the reverse merger.

Shares of Series A Preferred Stock will automatically convert into shares of common stock on the basis of one share of Series A Preferred Stock for 970 shares of common stock immediately subsequent to the effectiveness of a planned 1-for-27 reverse split of the Company’s outstanding common stock, which will become effective on the effective date of the “reverse stock split. Upon the reverse split the 10,000 outstanding shares of Series A Preferred Stock will automatically convert into 9,700,000 shares of common stock, which will constitute 97% of the outstanding common stock of the Company subsequent to the reverse stock split.

Holders of Series A Preferred Stock vote with the holders of common stock on all matters on an as-converted to common stock basis, based on an assumed post 1-for-27 reverse split (to retroactively take into account the reverse stock split).

Following the effectiveness of the Reverse Stock Split and conversion of Series A Preferred Stock into common stock, there will be approximately 10,000,000 shares of our common stock issued and outstanding and no shares of preferred stock issued and outstanding.

The 1-for-27 Reverse Stock Split

The Company’s board of directors unanimously approved, subject to stockholder approval, the 1-for-27 Reverse Split of our issued and outstanding common stock. The reverse split will reduce the number of issued and outstanding shares of the Company’s common stock outstanding prior to the split. The reverse split increases the total number of issued and outstanding shares of the Company’s common stock subsequent to the split by triggering the automatic conversion of the Company’s Series A Preferred Stock into 9,700,000 shares of common stock. The reverse split will

become effective on the effective date which occurs when the Company file with the Secretary of State of the State of Delaware following the expiration of the 20 day period mandated by Rule 14c of the Exchange Act. On the effective date, 27 shares of Common Stock will automatically be combined and changed into one share of common stock. The table below sets forth, as of the record date and as of the effective date, the following information both before and after the proposed reverse split and assumes the conversion of all shares of Series A Preferred Stock into shares of common stock at the applicable conversion ratios:

9

	Capital Structure prior to conversion of issued and outstanding Series A Preferred Stock on Pre-Reverse Split Basis (As of Record Date)	Capital Structure after the Reverse Split and automatic conversion of Series A Preferred Stock (On Effective Date)
Issued and outstanding Common Stock	8,100,000	10,000,000
Issued and outstanding Series A Preferred Stock	10,000	-0-
Common Stock reserved for issuance upon conversion of Series A Preferred Stock	9,700,000	-0-
Authorized but unissued and unreserved Common Stock	82,200,000	90,000,000

As of the filing date of the 10Q, the above reverse split is not effective yet. It is expected to be effective within the next 30 days, based on management assessment.

The following is a pro forma earning per share calculation assuming successful completion of the 1 to 27 stock reverse split and the conversion of the Series A convertible preferred stock to 9,700,000 shares of common stock on a post reverse split basis.

	Three Months Ended	
	March 31, 2010	March 31, 2009
Net income	\$ 1,372,592	\$ 1,283,168
Pro forma net income per share – basic	\$ 0.14	\$ 0.13
Pro forma weighted average shares outstanding-basic	10,000,000	9,700,000

NOTE 9 – COMMITMENTS AND CONTINGENCIES

Guarantees

At March 31, 2010 and December 31, 2009, we had two outstanding guarantees provided to two unrelated companies for their bank loan amount of \$293,400 and \$146,700, respectively. The two unrelated companies also provided guarantees to us for a bank loan amount of \$293,400 (Note 5).

Tax liabilities

The tax authority of the PRC Government conducts periodic and ad hoc tax filing reviews on business enterprises operating in the PRC after those enterprises had completed their relevant tax filings, hence the Company's tax filings may not be finalized. It is therefore uncertain as to whether the PRC tax authority may take different views about the Company's tax filings which may lead to additional tax liabilities.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This Quarterly Report on Form 10-Q for the three months ended March 31, 2010 contains “forward-looking statements” within the meaning of Section 21E of the Securities and Exchange Act of 1934, as amended, including statements that include the words “believes,” “expects,” “anticipates,” or similar expressions. These forward-looking statements include, among others, statements concerning our expectations regarding our working capital requirements, financing requirements, business, growth prospects, competition and results of operations, and other statements of expectations, beliefs, future plans and strategies, anticipated events or trends, and similar expressions concerning matters that are not historical facts. The forward-looking statements in this Quarterly Report on Form 10-Q for the three months ended March 31, 2010 involve known and unknown risks, uncertainties and other factors that could cause our actual results, performance or achievements to differ materially from those expressed in or implied by the forward-looking statements contained herein.

Overview

We are a designer and retailer of branded footwear in Northern China. We were organized to service what we believe is an unmet and increasing demand for high quality formal and casual footwear throughout the PRC. As urbanization and individual purchasing power has increased in China, the demand for leather footwear has also grown.

Our principal business includes (1) the design or selection of design for men's and women's leather shoe lines; (2) sourcing and purchase of the contract manufactured footwear; and (3) retail and sales of said footwear under our proprietary brand, “Hongguan.” We operate a number of flagship stores throughout greater Qingdao. Our products are also brought to market through our extensive distribution network of authorized independent distributors as well as through third party retailers selected to operate exclusive Hongguan brand stores on our behalf. Our company headquarters and main sales office is located in Shandong province in northern China, in the city of Jimo, less than 25 miles from the major urban center of Qingdao.

Corporate History and Background

Datone, Inc. was originally incorporated on August 9, 2000 under the laws of the State of Delaware. The Company operated as a wholly-owned subsidiary of USIP.COM, Inc. On August 24, 2006, USIP decided to spin-off its subsidiary companies, one of which was Datone, Inc. On February 1, 2008, Datone, Inc. filed a Form 10-SB registration statement. On November 13, 2008, Datone, Inc. went effective.

Datone, Inc. was a provider of both privately owned and company owned payphones (COCOT's) and stations in New York. The Company receives revenues from the collection of the payphone coinage, a portion of usage of service from each payphone and a percentage of long distance calls placed from each payphone from the telecommunications service providers. In addition, the Company also receives revenues from the service and repair of privately owned payphones and sales of payphone units.

On February 12, 2010, the Company completed a reverse acquisition transaction through a share exchange with Glory Reach International Limited, a Hong Kong limited company (“Glory Reach”), the shareholders of Glory Reach (the “Shareholders”), Greenwich Holdings LLC and Qingdao Shoes, whereby the Company acquired 100% of the issued and outstanding capital stock of Glory Reach in exchange for 10,000 shares of our Series A Convertible Preferred Stock which constituted 97% of our issued and outstanding capital stock on an as-converted to common stock basis as of and immediately after the consummation of the reverse acquisition. As a result of the reverse acquisition, Glory Reach became our wholly-owned subsidiary and the former shareholders of Glory Reach became our controlling stockholders. The share exchange transaction with Glory Reach was treated as a reverse acquisition, with Glory Reach as the acquirer and Datone, Inc. as the acquired party for accounting and financial reporting purposes.

Immediately following the closing of the reverse acquisition of Glory Reach, one of the Shareholders transferred 337 of the 874 shares of Series A Convertible Preferred Stock issued to him under the share exchange to certain persons who provided services to Glory Reach's subsidiaries, pursuant to share allocation agreements that the Shareholder entered into with such service providers.

Upon the closing of the reverse acquisition, Craig H. Burton, our president and director, Joseph J. Passalacqua, our secretary and director, and Joseph Meuse, our director, submitted a resignation letter pursuant to which they resigned from all offices that they held effective immediately and from their position as our directors that became effective on the tenth day following the mailing by us of an information statement to our stockholders that complies with the requirements of Section 14f-1 of the Exchange Act, which have been mailed out on March 8, 2010. In addition, our board of directors on February 12 appointed Tao Wang (Chairman), Renwei Ma and Lanhai Sun to fill the vacancies created by such resignations, which appointments became effective upon the effectiveness of the resignation of Craig H. Burton, Joseph J. Passalacqua and Joseph Meuse on the tenth day following the mailing by us of the information statement to our stockholders. In addition, our executive officers were replaced by the Qingdao Shoes' executive officers upon the closing of the reverse acquisition as indicated in more detail below.

As a result of our acquisition of Glory Reach, we now own all of the issued and outstanding capital stock of Glory Reach, which in turn owns all of the outstanding capital stock of Qingdao Shoes.

Glory Reach was established in Hong Kong on November 18, 2009 to serve as an intermediate holding company. Qingdao Shoes was established on May 11, 2003 for the purpose of engaging in the development and sales of shoe products. On February 8, 2010, pursuant to the restructuring plan, Glory Reach acquired 100% of the equity interests in Qingdao Shoes from Mr. Wang Tao, our Chief Executive Officer, and other minority shareholders, who are all PRC residents. On February 4, 2010, the local government of the PRC issued the certificate of approval regarding the change in shareholding of Qingdao Shoes and its transformation from a PRC domestic company to a wholly-foreign owned enterprise.

Since there is common control between the Glory Reach and Qingdao Shoes, for accounting purposes, the acquisitions of Qingdao Shoes has been treated as a recapitalization with no adjustment to the historical basis of their assets and liabilities. The restructuring has been accounted for using the “as if” pooling method of accounting and the operations were consolidated as if the restructuring had occurred as of the beginning of the earliest period presented in our consolidated financial statements and the current corporate structure had been in existence throughout the periods covered by our consolidated financial statements.

Immediately following the acquisition of Glory Reach, under an Agreement of Conveyance, Transfer and Assignment of Assets and Assumption of Obligations (the “Conveyance Agreement”), we transferred all of our pre-acquisition assets and liabilities to our wholly-owned subsidiary, DT Communications, Inc. The Conveyance Agreement is attached as Exhibit 10.5 to this Current Report on Form 8-K as filed with the Securities and Exchange Commission on February 12, 2010 and is incorporated herein by reference.

Our Current Organizational Structure

All of our business operations are conducted through our Hong Kong and Chinese subsidiaries. The chart below presents our current organizational structure.

Our Growth Strategy

We believe that the market for affordable, high quality footwear in China provides us with attractive and sustainable growth opportunities.

We intend to pursue the following strategies to achieve our goal:

- 1) Continue our aggressive marketing and advertising campaigns in order to gain brand awareness.
- 2) Expand distributor and third party operator stores in prime locations to maximize profits.
- 3) Bring more self owned stores online to increase higher margin sales.
- 4) Continue to strive for excellence in quality, customer service and design in order to attract new and retain repeat customers.
- 5) Leverage our growing purchasing power with manufacturers to lower costs.

Our Products

Our products consist of men and women's footwear. Our designs are on the whole targeted at consumers seeking business casual and formal leather shoes appropriate for an office setting. Each year we design or commission designs for more than 300 unique styles. We do not manufacture our products, but instead outsource manufacturing to third parties. Our designs are split roughly evenly between men's and women's products. Designs are made based on collaboration between our sales department and design department regarding market demand and assessment of what will designs be fashionable in the upcoming season. As of March 31, 2010, Men's footwear constituted 60% of revenue and women's footwear the remainder. 40% of sales were formal shoes, and the remaining 60% are attributed to casual footwear.

Sales Channels

The following diagram details our current distribution channels:

As of March 31, 2010, we had 12 flagship stores, 11 exclusive third party managed retail outlets, and 192 outlets managed by distributors.

Distributors

We identify suitable distributors and enter into distributorship agreements, usually for a term of two years. Distributors purchase wholesale priced shoes and vend them at sales points throughout China. We require our distributors to implement, monitor compliance with and enforce our retail store guidelines. Our distributors are independent third parties that do not pay us any fee other than the purchase price for the purchase of our products, nor do we pay them any incentives or fees.

Our distribution contracts usually contain the following terms:

Geographic limitation — distributors must sell our Hongguan branded footwear within a specific authorized location(s).

Wholesale price — distributors pay a discounted wholesale price for our products.

Payment and credit terms — payment and credit terms are on a case by case basis. The credit period is usually one month, and 25% percent of our distributors prepay for their stock.

Performance — Qingdao Shoes typically retains the right to end the agreement if a distributor does to meet sales targets.

Exclusivity — the distributorship agreements allow our distributors to sell our products under the Hongguan brand on an exclusive basis. If there are other brands featured at the distributor's outlet, Hongguan brand shoes must constitute a certain percentage, generally a majority, of product on display. Furthermore, the products must be displayed according to our standards.

Training — training and instructional materials are provided to all of our distributors regarding product display, decoration, and sales techniques.

Renewal and termination — we can renew contracts at our discretion and can terminate contracts if contractual conditions including sales targets are not met.

We do not have a return policy with our distributors. In the event a distributor is unable to sell their stock, we will attempt to help them relocate it to a nearby Qingdao Shoes outlet.

Regulation and Government Policy in China

Because our principal operating subsidiary, Qingdao Shoes, is located in the PRC, our business is regulated by the national and local laws of the PRC. We believe our conduct of business complies with existing PRC laws, rules and regulations.

General Regulation of Businesses

We believe we are in material compliance with all applicable labor and safety laws and regulations in the PRC, including the PRC Labor Contract Law, the PRC Production Safety Law, the PRC Regulation for Insurance for Labor Injury, the PRC Unemployment Insurance Law, the PRC Provisional Insurance Measures for Maternity of Employees, PRC Interim Provisions on Registration of Social Insurance, PRC Interim Regulation on the Collection and Payment of Social Insurance Premiums and other related regulations, rules and provisions issued by the relevant governmental

authorities from time to time, for our operations in the PRC.

According to the PRC Labor Contract Law, we are required to enter into labor contracts with our employees. We are required to pay no less than local minimum wages to our employees. We are also required to provide employees with labor safety and sanitation conditions meeting PRC government laws and regulations and carry out regular health examinations of our employees engaged in hazardous occupations.

Foreign Currency Exchange

The principal regulation governing foreign currency exchange in China is the Foreign Currency Administration Rules (1996), as amended (2008). Under these Rules, RMB is freely convertible for current account items, such as trade and service-related foreign exchange transactions, but not for capital account items, such as direct investment, loan or investment in securities outside China unless the prior approval of, and/or registration with, the State Administration of Foreign Exchange of the People's Republic of China, or SAFE, or its local counterparts (as the case may be) is obtained.

Pursuant to the Foreign Currency Administration Rules, foreign invested enterprises, or FIEs, in China may purchase foreign currency without the approval of SAFE for trade and service-related foreign exchange transactions by providing commercial documents evidencing these transactions. They may also retain foreign exchange (subject to a cap approved by SAFE) to satisfy foreign exchange liabilities or to pay dividends. In addition, if a foreign company acquires a company in China, the acquired company will also become an FIE. However, the relevant PRC government authorities may limit or eliminate the ability of FIEs to purchase and retain foreign currencies in the future. In addition, foreign exchange transactions for direct investment, loan and investment in securities outside China are still subject to limitations and require approvals from, and/or registration with, SAFE.

Regulation of Income Taxes

On March 16, 2007, the National People's Congress of China passed a new Enterprise Income Tax Law, or the New EIT Law, and its implementing rules, both of which became effective on January 1, 2008. Before the implementation of the New EIT Law, FIEs established in the PRC, unless granted preferential tax treatments by the PRC government, were generally subject to an earned income tax, or EIT, rate of 33.0%, which included a 30.0% state income tax and a 3.0% local income tax. The New EIT Law and its implementing rules impose a unified EIT rate of 25.0% on all domestic-invested enterprises and FIEs, unless they qualify under certain limited exceptions.

In addition to the changes to the current tax structure, under the New EIT Law, an enterprise established outside of China with "de facto management bodies" within China is considered a resident enterprise and will normally be subject to an EIT of 25% on its global income. The implementing rules define the term "de facto management bodies" as "an establishment that exercises, in substance, overall management and control over the production, business, personnel, accounting, etc., of a Chinese enterprise." If the PRC tax authorities subsequently determine that we should be classified as a resident enterprise, then our organization's global income will be subject to PRC income tax of 25%.

Our future effective income tax rate depends on various factors, such as tax legislation, the geographic composition of our pre-tax income and non-tax deductible expenses incurred. Our management carefully monitors these legal developments and will timely adjust our effective income tax rate when necessary.

Dividend Distribution

Under applicable PRC regulations, FIEs in China may pay dividends only out of their accumulated profits, if any, determined in accordance with PRC accounting standards and regulations. In addition, a FIE in China is required to set aside at least 10.0% of its after-tax profit based on PRC accounting standards each year to its general reserves until the accumulative amount of such reserves reach 50.0% of its registered capital. These reserves are not distributable as cash dividends. The board of directors of a FIE has the discretion to allocate a portion of its after-tax profits to staff welfare and bonus funds, which may not be distributed to equity owners except in the event of liquidation.

The New EIT Law and its implementing rules generally provide that a 10% withholding tax applies to China-sourced income derived by non-resident enterprises for PRC enterprise income tax purposes unless the jurisdiction of incorporation of such enterprises' shareholder has a tax treaty with China that provides for a different withholding arrangement. Qingdao Shoes is considered an FIE and is directly held by our subsidiary Glory Reach in Hong Kong. According to a 2006 tax treaty between the Mainland and Hong Kong, dividends payable by an FIE in China to the company in Hong Kong who directly holds at least 25% of the equity interests in the FIE will be subject to a no more than 5% withholding tax. We expect that such 5% withholding tax will apply to dividends paid to Glory Reach by Qingdao Shoes, but this treatment will depend on our status as a non-resident enterprise.

Results of Operations

Three Months Ended March 31, 2010 Compared to Three Months Ended March 31, 2009

Edgar Filing: Datone, Inc - Form 10-Q

The following table sets forth key components of our results of operations during the three months ended March 31, 2010 and 2009, both in dollars and as a percentage of our net sales.

	Three Months Ended March 31, 2010		Three Months Ended March 31, 2009	
	Amount	% of Net Sales	Amount	% of Net Sales
Net Sales	\$ 4,765,812	100%	\$ 4,455,898	100%
Cost of sales	2,656,755	56%	2,522,338	57%
Gross profit	2,109,057	44%	1,933,560	43%
Operating Expenses	278,115	6%	231,680	5%
Operating Income	1,830,942	38%	1,701,880	38%
Other income & interest expense	(819)	0%	9,011	0%
Income Before Income Taxes	1,830,123	38%	1,710,891	38%
Income taxes	457,531	10%	427,723	10%
Net income	\$ 1,372,592	29%	\$ 1,283,168	29%

Net Sales. Our net sales increased to \$4,765,812 in the three months ended March 31, 2010 from \$4,455,898 in the same period in 2009, representing 7% revenue growth. This increase was mainly due to an increase in the sales volume at existing stores.

Cost of Sales. Our cost of sales increased to \$2,656,755 in the three months ended March 31, 2010 from \$2,522,338 in the same period in 2009, on account increased sales volume. The cost of goods sold per sales ratio decreased to 56% from 57%, mainly due to efficiencies in our cost control.

Gross Profit and Gross Margin. Our gross profit increased to \$2,109,057 in the three months ended March 31, 2010 from \$1,933,560 in the same period in 2009. Gross profit as a percentage of net revenue was 44% for the three months ended March 31, 2010 and 43% in 2009. The slight increase in the gross profit and margin is due to the factors discussed above.

Operating Expenses. Our selling, general and administration grew slightly to \$260,110 in the three months ended March 31, 2010 from \$218,547 in the same period in 2009. This was mainly due to increased sales volume.

Other Income & Interest Expense. Other Income & Interest Expense decreased to (\$819) in the three months ended March 31, 2010 from \$9011 in the same period in 2009. Other Income and Interest Expense is a negligible percentage of our revenue.

Income Before Income Taxes. Our income before income taxes increased to \$1,830,123 in the three months ended March 31, 2010 from \$1,710,891 in the same period in 2009. This increase was due to expansion in our operational scope.

Income Taxes. Income tax increased to \$457,531 in the three months ended March 31, 2010 from \$427,723 in the same period in 2009. The increase was due to an increase in income, as our tax rate remained constant.

Net Income. In the three months ended March 31, 2010, we generated a net income of \$1,372,592, an increase from \$1,283,168 in the same period in 2009. This increase was primarily due to the factors discussed above.

Liquidity and Capital Resources

As of March 31, 2010, we had cash and cash equivalents of \$378,219, primarily consisting of cash on hand and demand deposits. The following table provides detailed information about our net cash flow for all financial statement periods presented in this report. To date, we have financed our operations primarily through cash flows from operations and equity contributions by our shareholders.

The following table sets forth a summary of our cash flows for the periods indicated:

Cash Flow
(all amounts in U.S. dollars)

	Three Months Ended	
	March 31,	
	2010	2009
Net cash provided by operating activities	\$ 916,821	\$ 2,076,807
Net cash provided by (used in) investing activities	(661,971)	(1,954,613)
Net cash provided by (used in) financing activities	61,895	0
Effects of Exchange Rate Change in Cash	343	(294)
Net (Decrease) Increase in Cash and Cash Equivalents	317,088	121,945
Cash and Cash Equivalent at Beginning of the Year	61,131	118,534
Cash and Cash Equivalent at End of the Year	378,219	240,479

Operating activities

Net cash provided by operating activities was \$916,821 for the three months ended March 31, 2010, as compared to \$2,076,807 for the same period in 2009. The decrease in net cash provided by operating activities was due to an increase in accounts receivable. We recently introduced more flexible payment schedules to some of our distributors as a sales incentive.

Investing activities

Net cash used by investing activities for the three months ended March 31, 2010 was \$(661,971) as compared to \$(1,954,613) net cash used in investing activities during the same period of 2009. The decrease in net cash used by investing activities was mainly due to decrease in advances to related parties.

Financing activities

Net cash used in financing activities for the three months ended March 31, 2010 was \$61,895, as compared to \$0 in the same period of 2009. The increase in net cash provided by financing activities was due to proceeds from a bank loan.

We believe that our cash on hand and cash flow from operations will meet part of our present cash needs and we will require additional cash resources, to meet our expected capital expenditure and working capital for the next 12 months. We may, however, in the future, require additional cash resources due to changed business conditions, implementation of our strategy to ramp up our marketing efforts and increase brand awareness, or acquisitions we may decide to pursue. If our own financial resources are insufficient to satisfy our capital requirements, we may seek to sell additional equity or debt securities or obtain additional credit facilities. The sale of additional equity securities could result in dilution to our stockholders. The incurrence of indebtedness would result in increased debt service obligations and could require us to agree to operating and financial covenants that would restrict our operations. Financing may not be available in amounts or on terms acceptable to us, if at all. Any failure by us to raise additional funds on terms favorable to us, or at all, could limit our ability to expand our business operations and could harm our overall business prospects.

Inflation

Inflation and changing prices have not had a material effect on our business and we do not expect that inflation or changing prices will materially affect our business in the foreseeable future. However, our management will closely monitor the price change in travel industry and continually maintain effective cost control in operations.

Off-Balance Sheet Arrangements

We do not have any off balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity or capital expenditures or capital resources that is material to an investor in our securities.

Seasonality

We may experience seasonal fluctuations in our revenue in some regions in the PRC, based on the seasonal changes in the weather and the tendency of customers to make purchases relating to their apparel suitable for the time of year. Any seasonality may cause significant pressure on us to monitor the development of materials accurately and to anticipate and satisfy these requirements. Our revenues are usually higher in the fourth and first quarters due seasonal purchases.

Critical Accounting Policies and Estimates

The preparation of financial statements and related disclosures in conformity with accounting principles generally accepted in the United States of America requires management to make judgments, assumptions and estimates that affect the amounts reported in our consolidated financial statements and accompanying notes. We base our estimates and judgments on historical experience and on various other assumptions that we believe are reasonable under the circumstances. However, future events are subject to change, and the best estimates and judgments routinely require adjustment. The amounts of assets and liabilities reported in our consolidated balance sheet, and the amounts of revenues and expenses reported for each of our fiscal periods, are affected by estimates and assumptions which are used for, but not limited to, the accounting for allowance for doubtful accounts, goodwill and intangible asset impairments, restructurings, inventory and income taxes. Actual results could differ from these estimates. The following critical accounting policies are significantly affected by judgments, assumptions and estimates used in the preparation of our consolidated financial statements.

Revenue Recognition Policies

Retail sales are recognized at the point of sale to customers, are recorded net of estimated returns, and exclude value added tax("VAT"). Whole-sales to its contracted customers are recognized as revenue at the time the product is shipped and title passes to the customer on an FOB shipping point basis.

Recent Accounting Pronouncements

Refer to the December 31, 2009 audited financial statements of the Company and the notes thereto as included in the Company's Form PRER14C filed on April 19, 2010.

ITEM 2. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Foreign Currency Exchange Rate Risk

All of our revenues and the majority of our expenses and liabilities incurred are in RMB. Thus, our revenues and operating results may be impacted by exchange rate fluctuations of RMB. Up to now, we have not reduced our exposure to exchange rate fluctuations by using hedging transactions or any other measures to avoid our exchange rate risks. Accordingly, we may experience economic losses and negative impacts on earnings and equity as a result of foreign exchange rate fluctuations.

ITEM 3. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls.

An evaluation was conducted under the supervision and with the participation of the Company's management, including the Chief Executive Officer ("CEO"), its principal executive officer, and Chief Financial Officer ("CFO"), its principal financial officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) and Rule 15d-15(e) of the Exchange Act) as of December 31, 2009. Based on that evaluation, the CEO and CFO concluded that there had been improvements of the Company's disclosure controls and procedures and the manner in which information that is required to be disclosed in Exchange Act report is reported within the time period specified in the SEC's rule and forms. CEO and CFO have concluded that our disclosure controls and procedures were not effective as of December 31, 2009.

Conclusion

The Company did not have sufficient and skilled accounting personnel with an appropriate level of technical accounting knowledge and experience in the application of generally accepted accounting principles accepted in the United States of America commensurate with the Company's disclosure controls and procedures requirements, which resulted in a number of deficiencies in disclosure controls and procedures that were identified as being significant. The Company's management believes that the number and nature of these significant deficiencies, when aggregated, was determined to be a material weakness.

Despite of the material weaknesses and deficiencies reported above, the Company's management believes that its condensed consolidated financial statements included in this report fairly present in all material respects the Company's financial condition, results of operations and cash flows for the periods presented and that this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report.

Changes in internal control over financial reporting.

There were no changes in the Company's internal control over financial reporting during the quarter ended March 31, 2010 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

From time to time, we may become involved in various lawsuits and legal proceedings which arise in the ordinary course of business. We are currently not aware of any such legal proceedings or claims that we expect will have a material adverse affect on our business, financial condition or operating results. However, litigation is subject to inherent uncertainties, and an adverse result in these or other matters may arise from time to time that may harm our business.

ITEM 1A. RISK FACTORS

During the three months ended March 31, 2010, there were no material changes to the risk factors previously disclosed in our Annual Report on Form 10-K for the year ended December 31, 2009.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

None.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. RESERVED

ITEM 5. OTHER INFORMATION

None.
