The Entrusted Management Agreement will remain in effect until Nanjing KJF acquires Wuxi KJF or Wuxi KJF is dissolved.

Shareholders’ Voting Proxy Agreement

Pursuant to a shareholders’ voting proxy agreement (the “Shareholders’ Voting Proxy Agreement”) between the Wuxi KJF Shareholders and Nanjing KJF, the Wuxi KJF Shareholders irrevocably appointed the designee of Nanjing KJF as their proxy to vote on all matters with respect to the Wuxi KJF Shareholders’ shares of Nanjing KJF. The Exclusive Technology Service Agreement will remain in effect until the acquisition of all assets or equity of Wuxi KJF by Nanjing KJF is completed or Wuxi KJF is dissolved.

Share Equity Pledge Agreement

In order to guarantee the performance by Wuxi KJF and Wuxi KJF Shareholders of their respective obligations under the VIE Agreements, Wuxi KJF, the Wuxi KJF Shareholders and Nanjing KJF entered into a Share Equity Pledge Agreement, pursuant to which the Wuxi KJF Shareholders pledged to Nanjing KJF all of their rights, titles and equity interest in Wuxi KJF, including the right to all dividends, money, interest, voting and other rights and benefits arising in respect of such equity interests. The Share Equity Pledge Agreement also prohibits the Wuxi KJF Shareholders from transferring their equity interests in Wuxi KJF while the agreement remains in effect.

As a result of the transactions described above, Comjoyful International Company became the record and beneficial owner of the share capital of Wuxi KJF and its subsidiaries indirectly. The reverse recapitalization of the Company was consummated.

Wuxi KJF, formerly known as Wuxi KangJiaFu Royal Traditional Health Management Co., Ltd., was incorporated in Wuxi City, Jiangsu Province of PRC on September 17, 2010, as a limited liability company which was 60% owned by Wuxi KangJiaFu Biotech Technology Co., Ltd, (the "KJF Biotech") and 40% owned by 20 individual shareholders with 2% each (the "Other Founders"). These 190 individuals are all individual investors Wuxi KJF entered into partnership co-investment agreements with in order to establish new clubs and expand business, including Wuxi, Nanjing, Jintan, Nantong, Yixing, Changzhou, Jiangyin and Shanghai. By issuing shares of KJF Group to these investors, Wuxi KJF has entered into agreement with them that the initial co-investment agreements were forfeited and their investment in clubs would be consideration for subscribing KJF Group's shares at RMB100,000 for 99 shares (the "New Agreement"). The New Agreement is effective upon the consummation of the going public of Wuxi KJF. Equity interest of the above 190 individual investors in correspondence clubs would be returned if the going public did not consummate.

On December 18, 2012, in accordance with the New Agreement, the new partners Ms. Qiuqiu Qian, Mr. Mingjie Xu and Mr. Xinhua Gu signed All Partners Resolution together with Wuxi KJF, 10 individual limited partners and general partner Huiwen Qu. According to the All Partners Resolution, 10 individual limited partners transferred all of their shares in Wuxi Club to the new partners and Wuxi KJF. Therefore, Wuxi KJF, Ms. Qiuqiu Qian, Mr. Mingjie Xu, Mr. Xinhua Gu, and Mr. Huiwen Qu owned 96.2%, 1.2%, 1.2%, 1.2%, and 0.2% equity interest of Wuxi Club, respectively. 2. GOING CONCERN

The consolidated financial statements are prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of obligations in the normal course of business. The Company had recurring consolidated losses of \$1,597,483 for the nine months ended September 30, 2014 and \$1,548,576 for the nine months ended September 30, 2013, negative working capital of \$3,155,449 as of September 30, 2014 and \$2,786,267 as of December 31, 2013, and has a total deficit of \$4,218,981 as of September 30, 2014 and \$7,213,262 as of December 31, 2013. These conditions raise substantial doubt about the ability of the Company to continue as a going concern.

In view of these matters, continuation as a going concern is dependent upon continued operations of the Company, which in turn is dependent upon the Company's ability to meet its financial requirements, raise additional capital, and the success of its future operations. The financial statements do not include any adjustments to the amount and classification of assets and liabilities that may be necessary should the Company not continue as a going concern.

The management plans to raise necessary working capital by developing new products and services, and the stockholders of the Company Mr. Yazhong Liao, Ms. Zhangmei Zhang and Mr. Huiwen Qu would provide any capital shortfall. KJF Biotech has also committed to repay \$2,423,733 to Wuxi KJF during the year 2014 (Note 16). There are no assurances that the Company will be successful in achieving these goals.

Changes in facts and circumstances may result in revised estimates.

Cash and cash equivalents

Cash and cash equivalents consist of cash on hand and demand deposits or liquid investments that are placed with banks and other financial institutions and are unrestricted as to withdrawal or use, or have remaining maturities of three months or less.

Inventories

Inventories are materials used in the physiotherapy process. Such items include; Chinese traditional medicine packages, essential oil, towels and so on, are stated at the lower of cost or market value. Cost is determined using weighted average method.

Fair value of financial instruments

ASC Topic 820 "Fair Value Measurement and Disclosures," defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the

asset or liability in an orderly transaction between market participants on the measurement date. This topic also establishes a fair value hierarchy which requires classification based on observable and unobservable inputs when measuring fair value. There are three levels of inputs that may be used to measure fair value:

Level 1 - Quoted prices in active markets for identical assets or liabilities.

Level 2 - Observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 - Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Determining which category an asset or liability falls within the hierarchy requires significant judgment. The Company evaluates their hierarchy disclosures in each quarter.

Financial instruments include cash and cash equivalents, advance to suppliers, other current assets, amounts due from related parties, amounts due to related parties, and other current liabilities. The carrying amount reported in consolidated balance sheets approximated their fair values because of the short maturity of these instruments.

Property and equipment

Property and equipment are stated at cost less accumulated depreciation.

The cost of an asset comprises its purchase price and any directly attributable costs of bringing that asset to its present working condition and location for its intended use. Repairs and maintenance of fixed assets are expensed as incurred. Subsequent expenditures for major reconstruction, expansion, improvement and renovation are capitalized when it is probable that future economic benefits in excess of the original assessment of performance will flow to the Company. Capitalized expenditures arising from major reconstruction, expansion and improvement are depreciated using the straight-line method over the remaining useful lives of the fixed assets. Capitalized expenditures arising from the renovation of fixed assets are depreciated on the straight-line basis over the expected beneficial periods.

The leasehold improvements represent the actual cost for bringing the club spaces and office spaces, the Company leased to the condition necessary for their intended use (to provide service to our customers or to provide work place for administrative staff). The costs include payments to fitment construction companies, construction materials, air conditioning system, electricity system, etc. Leasehold improvements are amortized over 5-year period, which is the shorter of the lease term and estimated useful life.

Depreciation is provided to write off the cost of property and equipment over their useful lives from the date on which they become fully operational and after taking into account their estimated salvage values, using the straight-line method:

Furniture, computer and electronic equipment and leasehold improvement	5 years
Office equipment	5 years
Motor vehicle	5 years

Management estimates the salvage value of property plant and equipment to be 5% of original value excluding leasehold improvement. The salvage value of leasehold improvement estimated by the management is 0%.

Intangible assets

Intangible assets consists of software and are stated at cost less accumulated amortization.

Intangible assets are amortized using the straight-line basis over the estimated useful lives as follows:

Accounting and operational software 5 years

Impairment of Long-Lived Assets

Long-lived assets, including property and equipment and purchased intangible assets with finite useful lives, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable.

Recoverability of long-lived assets or asset groups to be held and used is measured by a comparison of the carrying amount of an asset to the estimated undiscounted future cash flows expected to be generated by the asset or asset group. If the carrying amount of an asset exceeds its estimated future undiscounted cash flows, an impairment charge is recognized for the amount by which the carrying amount of the asset exceeds the fair value of the asset. Fair value is determined through various valuation techniques including discounted cash flow models, quoted market values and third-party independent appraisals, as considered necessary. The Company recorded impairment losses for long-lived assets of nil and \$961,614 for the nine months ended September 30, 2014 and for the year ended December 31, 2013 respectively. (See Note 6)

Service Revenue

The Company generates service revenue primarily from providing physiotherapy services including pedicure, sauna and massage to its individual customers. Upon receipt of the upfront cash payments for the pre purchase of multiple massages from the individual customer, the full payment will be deferred and recognized as unearned income. The Company recognizes service revenue proportionately when services are provided to the customer, and there is no expiration date for the prepayment. Unearned income for which the deliveries of services are expected to occur after twelve months is recognized as long-term portion of unearned income liability.

Income taxes

Current income taxes are provided for in accordance with the laws of the relevant tax authorities. Deferred income taxes are recognized for temporary differences between the tax bases of assets and liabilities and their reported amounts in the financial statements. Net operating loss carry forwards and credits are applied using enacted statutory tax rates applicable to future years. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. The components of the deferred tax assets and liabilities are individually classified as current and non-current based on their characteristics.

The impact of an uncertain income tax position on the income tax return is recognized at the largest amount that is more-likely-than-not to be sustained upon audit by the relevant tax authority. An uncertain income tax position will not be recognized if it has less than a 50% likelihood of being sustained. Interest and penalties on income taxes will be classified as a component of the provision for income taxes.

Comprehensive loss

Significant risks and uncertainties

Credit risk

Assets that potentially subject the Company to significant concentration of credit risk primarily consist of cash. To limit exposure to credit risk relating to deposits, the Company primarily place cash deposits with large financial institutions in China which management believes are of high credit quality.

The Company's operations are carried out in Mainland China. Accordingly, the Company's business, financial condition and results of operations may be influenced by the political, economic and legal environments in the PRC as well as by the general state of the PRC's economy. In addition, the Company's business may be influenced by changes in governmental policies with respect to laws and regulations, anti-inflationary measures, currency conversion and remittance abroad, rates and methods of taxation, and the extraction of mining resources, among other factors.

Recently issued accounting pronouncements

In May, 2014, the FASB issued Accounting Standards Update (ASU) 2014-09. The ASU amends the guidance in the FASB Accounting Standards Codification (FASB ASC) Topic 606, entitled Revenue from Contracts with Customers.

Edgar Filing: Comjoyful International Co - Form 10-Q

The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services.

The ASU also specifies the accounting for incremental costs to obtain, or costs to fulfill, a contract with a customer. Further, the ASU states that an entity should disclose sufficient information to enable users of financial statements to understand the nature, amount, timing, and uncertainty of revenue and cash flows arising from contracts with customers.

The amendments are effective for public entities for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period. Early application is not permitted for public entities. The amendments in this ASU should be applied using one of the following two methods: (1) retrospectively to each prior reporting period presented or (2) retrospectively with the cumulative effect of initially applying the ASU recognized at the date of initial application.

Management is still evaluating the effects of adoption of this Accounting Standards Update.

Less: Accumulated depreciation and amortization	(854,762)	(547,718)
Total	\$ 1,240,458		\$ 1,523,663	

Depreciation and amortization expenses for the three months ended September 30, 2014 and 2013 were \$104,166 and \$115,626, respectively, and for the nine months ended September 30, 2014 and 2013 were \$310,742 and \$355,870, respectively.

During the year ended December 31, 2013, a construction of a shopping mall was started around the location of Nanjing Club and significantly reduced Nanjing Club's business. The construction is expected to take at least two years. In December 2013, the Company decided to take voluntary action to temporarily suspend our business in Nanjing Club and reassess operations as Nanjing Club has been incurring significant operating losses. In September 2014, the Company tried to reopen Nanjing Club for two days, but unfortunately, due to lack of customers and the high operation cost, the Company postponed the reopening again. The Company determined that the sum of undiscounted cash flows from Nanjing Club is expected to be less than the carrying value of such long-lived assets group, and accordingly evaluated the impairment loss on the long-lived assets and recorded an impairment loss in the amount of \$955,466 for the year ended December 31, 2013. The impaired assets were mainly leasehold improvements of Nanjing Club and furniture and office equipment in it. The fair value of the impaired long-lived assets was determined by the discounted cash flows from Nanjing Club future operation and determined to be \$24,913 as of December 31, 2013.

The Company applies ASC topic 820, "Fair Value Measurements and Disclosures". ASC 820 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. ASC 820 requires disclosures to be provided on fair value measurement.

ASC 820 establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value as follows:

Level 1 – Observable inputs that reflect quoted prices (unadjusted) for identical assets or liabilities in active markets.

Level 2 – Include other inputs that are directly or indirectly observable in the marketplace.

Level 3 – Unobservable inputs which are supported by little or no market activity.

ASC 820 describes three main approaches to measuring the fair value of assets and liabilities: (1) market approach; (2) income approach and (3) cost approach. The market approach uses prices and other relevant information generated from market transactions involving identical or comparable assets or liabilities. The income approach uses valuation techniques to convert future amounts to a single present value amount. The measurement is based on the value indicated by current market expectations about those future amounts. The cost approach is based on the amount that would currently be required to replace an asset.

In accordance with ASC 820, the impaired long-lived assets of Nanjing Club is classified within Level 3 as the Company measures the fair value with the discounted cash flows from Nanjing Club future operation. This estimated assets was derived through application of the income approach which included the estimation of Nanjing Club's following five years of pre-tax income, based on actual historical operating results coupled with management's best estimate of future performance and certain market assumptions, and the estimation of the disposal value at the end of the five years. The Company applied a discount rate of approximately 16% as at December 31, 2013 which was determined through the assessment of the Company-specific and industry-specific risks.

The Company's VIE files separate tax returns to PRC taxation authorities.

Wuxi KJF, Nanjing KJF and Jintan Club

Nanjing KJF, Wuxi KJF and Jintan Club are subject to PRC Enterprise Income Tax ("EIT") on the taxable income in accordance with the relevant PRC income tax laws. The EIT rate for companies operating in the PRC is 25%.

Reconciliation between the statutory PRC EIT rate of 25% and the effective tax rate is as follows:

	Nine months ended September 30,	
	2014	2013
	%	%
Reconciling items:		
PRC statutory tax rate	(25)	(25)
Non- deductible expenses	16	9
Change in valuation allowance	9	16
Effective tax rate	0	0

Wuxi KJF and Jintan Club had deferred tax assets of approximately \$1,003,478 and \$696,098 as of September 30, 2014 and December 31, 2013, respectively that consist of tax loss carry forwards. The ultimate realization of deferred tax assets depends on the generation of future taxable income during the periods in which those net operating losses are available. The Company considers projected future taxable income and tax planning strategies in making its assessment. At present, Wuxi KJF and Jintan Club do not have a sufficient operation profit to conclude that it is more-likely-than-not that Wuxi KJF and Jintan Club will be able to realize all of its tax benefits in the near future and therefore a valuation allowance was established for the full value of the deferred tax asset.

Wuxi Club and Nanjing Club

Wuxi Club and Nanjing Club are not subject to EIT as they are limited liability partnerships, however each individual partner is subject to the individual income tax ("IIT") on his/her distributive share of taxable income in accordance with the relevant PRC income tax laws. The IIT is calculated by taxable income multiplying with applicable tax rate, and then minus deducting amount. Each enterprise partner is subject to EIT at its applicable EIT rate on its distributive share of taxable income from the partnership. Wuxi KJF, as Wuxi Club and Nanjing Club's enterprise partner, is subject its distributive share in Wuxi Club and Nanjing Club's taxable income to EIT at 25% tax rate. Wuxi KJF could also carry forward its distributive share in Wuxi Club and Nanjing Club's deductible loss for 5 years to offset any future distributive taxable income from the respective club. But the distributive deductible loss from the 2 partnerships

(Wuxi Club and Nanjing Club) could not be used to offset Wuxi KJF's other operating income. Wuxi Club and Nanjing Club both incurred net loss for the nine months ended September 30, 2014 and 2013, and the amount was included in Wuxi KJF's reconciliation and deferred tax assets determination.

The Company did not identify significant unrecognized tax benefits for the nine months ended September 30, 2014 and 2013. They did not incur any interest and penalties related to potential underpaid income tax expenses and also believed that the adoption of pronouncement issued by FASB regarding accounting for uncertainty in income taxes did not have a significant impact on the unrecognized tax benefits within 12 months from September 30, 2014.

19.SUBSEQUENT EVENTS

Management has considered all events occurring through the date the financial statements have been issued, and has determined that there are no such events that are material to the financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

We own and operate three health care clubs featuring traditional Chinese-style foot massage and other traditional relaxing treatments in Jiangsu province, China. Currently we have three clubs located in Wuxi and Nanjing and Jintan. The operation of Nanjing club was temporarily suspended due to a construction of a shopping mall was started around the Nanjing Club and significantly reduced Nanjing Club's business. In September 2014, we tried to reopened Nanjing Club for two days, but unfortunately, due to lack of customers and the high operation cost, we postponed the reopening again. The new club in Nantong was in start-up and promotion stage. We differentiate ourselves from other Chinese foot massage clubs based on our decorative style, club size, cultural background, and services.

Our main service is foot massage, body massage, spa, moxibustion, referred to as reflexology. In China, reflexology is widely believed to offer health and therapeutic benefits, based on ancient Chinese medical theories involving body energy system pathways and blockages that can develop, which can be reflected in other parts of the body as malady or discomfort. Western views on foot massage and massage in general are varied, with skeptics and several studies claiming little or no real therapeutic benefit. There is, however, near universal agreement that foot massage and massage are relaxing and rejuvenating.

Critical Accounting Policies, Estimates and Assumptions

Use of estimates

The preparation of the consolidated financial statements in accordance with US GAAP requires management of the Company to make a number of estimates and assumptions relating to the reported amount of assets, liabilities and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates. On an ongoing basis, management reviews its estimates and assumptions including those related to the useful lives and recoverability of the carrying amount of property, plant and equipment, impairment of long-lived assets, and deferred tax based on historical experience and various other factors believed to be reasonable under the circumstances, and accruals for income tax uncertainties and other contingencies. Changes in facts and circumstances may result in revised estimates.

Cash and cash equivalents

Cash and cash equivalents consist of cash on hand and demand deposits or liquid investments that are placed with banks and other financial institutions and are unrestricted as to withdrawal or use, or have remaining maturities of three months or less.

Property and equipment

Property and equipment are stated at cost less accumulated depreciation.

The cost of an asset comprises its purchase price and any directly attributable costs of bringing that asset to its present working condition and location for its intended use. Repairs and maintenance of fixed assets are expensed as incurred. Subsequent expenditures for major reconstruction, expansion, improvement and renovation are capitalized when it is probable that future economic benefits in excess of the original assessment of performance will flow to the Company. Capitalized expenditures arising from major reconstruction, expansion and improvement are depreciated using the straight-line method over the remaining useful lives of the fixed assets. Capitalized expenditures arising from the renovation of fixed assets are depreciated on the straight-line basis over the expected beneficial periods.

The leasehold improvement represents the actual historical cost for bringing the club spaces and office space we leased to the condition and location necessary for their intended use (to provide service to our customers or to provide work place for administrative staff). The costs included payments to fitment construction companies, construction materials, air conditioning system, electricity system, etc. Leasehold improvement is amortized over 5-year period, which is the shorter of the lease term and estimated useful life.

Depreciation is provided to write off the cost of property and equipment over their useful lives from the date on which they become fully operational and after taking into account their estimated salvage values, using the straight-line method:

Furniture, computer and electronic equipment and leasehold improvement	5 years
Office equipment	5 years
Motor vehicle	5 years

Management estimates the salvage value of property plant and equipment to be 5% of original value excluding leasehold improvement. The salvage value of leasehold improvement estimated by the management is 0%.

Revenue recognition

Revenues are recognized when the following four criteria are met: (i) persuasive evidence of an arrangement exists, (ii) the service has been rendered, (iii) the fees are fixed or determinable, and (iv) collectability is reasonably assured.

Service Revenue

The Company generates service revenue primarily from providing physiotherapy services including pedicure, sauna and massage to its individual customers. Upon receipt of the upfront cash payments for pre purchase of multiple massages from the individual customer, the full payment will be deferred and recognized as unearned income. The Company recognizes service revenue proportionately when services are provided to customer, and there is no expiration date for the prepayment. Unearned income for which the deliveries of services are expected to occur after twelve months is recognized as long-term portion of unearned income liability.

Sundry Foods Revenue

The Company also sells sundry foods to the individual customers when provided with physiotherapy services. Sundry Food Revenue is recognized after foods are delivered, the price is fixed or determinable and collection of the receivables is reasonably assured.

Cost of Revenues

Cost of revenues primarily consists of salaries, bonuses and allowances paid to physiotherapists and other service staff, rental payments, materials consumed during the physiotherapy, the depreciation and amortization of property and equipment, and the business taxes.

Operating leases

Wuxi KJF, Wuxi Club, Nanjing Club and Jintan all lease office or operating premises under non-cancelable operating leases. Payments made under operating leases are charged to the consolidated statements of income on a straight-line basis over the lease term. Rental and property management fee expenses for the nine months ended September 30, 2014 and 2013 were \$506,611 and \$486,066, respectively.

The lease term was 9 years with no renewal period. The rental increases 16.7% at the end of the third year and 21.4% at the end of the sixth year, and the property management fee retains flat.

Wuxi Club and Nanjing Club both incurred net loss for the nine months ended September 30, 2014 and 2013, and the amount was included in Wuxi KJF's reconciliation and deferred tax assets determination.

Unearned income

Unearned income represents prepayments made by the customers for prepaying massages service and health recuperation service. Service revenue was recognized proportionally when services are provided to customers, reducing unearned income balance. There is no expiration date for the prepayment.

As of September 30, 2014, we had unearned income of \$3,331,716 compared to \$3,715,753 as of December 31, 2013, a decrease of \$384,037, or approximately 10.34%. The decrease in unearned income was the result of service revenue recognized \$889,116 but only received deposit \$520,809 during the nine months ended September 30, 2014. As of September 30, 2014, there were 19,430 individual customers represented by unearned income compared to 18,966 individual customers as of December 31, 2013, an increase of 2.45%, and average amount is \$171 as of September 30, 2014 compared to \$196 as of December 31, 2013.

In December 2013, we developed a new service product to our customers “Health Recuperation” service. This service includes arranging a health recuperation trip for the customers to Xixiakou natural parkland and providing a health recuperation package which includes healthy food, exercise and activities. We received \$117,390 advanced payment from 99 customers as of September 30, 2014 and we have provided all related services by September 30, 2014.

Among the \$3,331,716 as of September 30, 2014, we expect to realize \$748,209 income from the prepaid amount in the following 12 months. This amount is an estimate based on our judgment. \$748,209 prepayment from massage service customers is expected to be used during the period, considering the current operation of our Wuxi Club and Jintan Club, and our expectation to the operation of the new Nantong Club.

The increase in net cash used in our operating activities was primarily attributable to the following reasons: 1) net loss of \$1,597,483 for the nine months ended September 30, 2014, compared to net loss of \$1,548,576 for the nine months ended September 30, 2013, which is a difference of \$48,907. 2) a decrease in unearned income of \$358,769 for the nine months ended September 30, 2014 and a decrease in unearned income of \$229,780 for the nine months ended September 30, 2013, which is a difference of \$128,989.

The decrease in net cash used in investing activities was primarily attributable to the decrease of advance payment for leasehold improvements. During the nine months ended September 30, 2013, both Jintan Club and Nantong Club's were under construction for leasehold improvement; while during the nine months ended September 30, 2014, only Nantong Club's construction was continuing.

The decrease in net cash provided by financing activities was primarily attributable to the following reasons: i) collection from owner of \$1,621,979 for the nine months ended September 30, 2014, compared to \$1,468,477 for the nine months ended September 30, 2013, which is a difference of \$153,502; ii) loan to an owner of \$89,977 for the nine months ended September 30, 2014 and \$178,534 for the nine months ended September 30, 2013, which is a difference of \$88,557; iii) in order to raise necessary working capital for the new clubs' decorations, an increase in loan from third parties of \$540,428 for the nine months ended September, 2013 and repaid \$2,210 for the nine months ended September 30, 2014, which is a difference of \$542,638.

Currently the Company generates cash to meet short-term and long-term cash requirements by several means. 1) The current main source of cash is to sell "VIP cards for Kang Jia Fu Royal Traditional Health Clubhouse" to our customers coming to our clubs to take the services. 2) During the first half year of 2014, relying on the mature sales channels, the Company has started to develop new products or services to expand our revenue sources. We developed Royal Tea and Royal Condiment Products, which were sold in the second half year of 2014. The Company will also implement sales agent mechanism, and set up city-level agents. We expect to develop 15 city-level agents during the year 2014. 3) Wuxi KangJiaFu Biotech Technology Co., Ltd has also committed to repay \$2,423,615 to the Company during the years 2014. 4) The majority shareholders of the Company Mr. Yazhong Liao, Ms. Zhangmei Zhang and Mr. Huiwen Qu would provide any capital shortfall. However, there is no assurance that the Company will be successful in achieving these goals.

Contingency

Wuxi Club completed fitment work at the end of 2010. Just before the local Fire Control Bureau's issuance of the Fire Control Permit to Wuxi Club, provincial government issued a new regulation, which forbids the operation of any densely-populated business on or above 4th floors of a building. Wuxi Club is located on 29th floor of a building. The local Fire Control Bureau did not issue Fire Control Permit to Wuxi Club but verbally agreed that Wuxi Club could go on operating on the 29th floor. According to Article 58 of Fire Protection Law of the People's Republic of China, local government has the right to cease the operation of a business if the required Fire Control Permit is not obtained. The local Fire Control Bureau performed regular annual fire control inspection on Wuxi Club without any defects noted. We believe the local Fire Control Bureau has substantially approved our operations. Wuxi Club has not received any notification from the government that the operation shall be ceased. Cease of operation of Wuxi Club remains a possibility but not probable.

Liquidity and Capital Resources

The consolidated financial statements are prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of obligations in the normal course of business. The Company had recurring consolidated losses of \$1,597,483 for the nine months ended September 30, 2014 and \$1,548,576 for the nine months ended September 30, 2013, negative working capital of \$3,155,449 as of September 30, 2014 and \$2,786,267 as of December 31, 2013, and has a total deficit of \$4,218,981 as of September 30, 2014 and \$7,213,262 as of December 31, 2013. These conditions raise substantial doubt about the ability of the Company to continue as a going concern.

In view of these matters, continuation as a going concern is dependent upon continued operations of the Company, which in turn is dependent upon the Company's ability to meet its financial requirements, raise additional capital, and the success of its future operations. The financial statements do not include any adjustments to the amount and classification of assets and liabilities that may be necessary should the Company not continue as a going concern.

The management plans to raise necessary working capital by developing new products and services, and the stockholders of the Company Mr. Yazhong Liao, Ms. Zhangmei Zhang and Mr. Huiwen Qu would provide any capital shortfall. KJF Biotech has also committed to repay \$2,423,733 to Wuxi KJF during the year 2014. There are no assurances that the Company will be successful in achieving these goals.

Off-Balance Sheet Arrangements

The Company does not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on its financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to investors.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Foreign Exchange Risk

Our reporting currency is the U.S. dollar. Transactions in other currencies are recorded in Renminbi at the rates of exchange prevailing when the transactions occur. Monetary assets and liabilities denominated in other currencies are remeasured into Renminbi at rates of exchange in effect at the balance sheet dates. Exchange gains and losses are recorded in our statements of operations as a component of current period earnings.

The State Administration on Foreign Exchange, or SAFE, of the PRC, under the authority of the People's Bank of China, controls the conversion of Renminbi into foreign currencies. The principal regulation governing foreign currency exchange in the PRC is the Foreign Currency Administration Rules (1996), as amended, or the "Rules." Under the Rules, once various procedural requirements are met, Renminbi is convertible for current account transactions, including trade and service-related foreign exchange transactions and dividend payments, but not for capital account transactions, including direct investment, loans or investments in securities outside the PRC, without prior approval of the SAFE of the PRC, or its local counterparts.

Since July 2005, the Renminbi is no longer pegged to the U.S. dollar. Although currently the Renminbi exchange rate versus the U.S. dollar is restricted to a rise or fall of no more than 0.3% per day and the People's Bank of the PRC regularly intervenes in the foreign exchange market to prevent significant short-term fluctuations in the exchange rate, the Renminbi may appreciate or depreciate significantly in value against the U.S. dollar in the medium to long term. Moreover, it is possible that in the future, the PRC authorities may lift restrictions on fluctuations in the Renminbi exchange rate and lessen intervention in the foreign exchange market. As of December 31, 2010, the exchange rate of RMB to USD1.0000 was RMB6.6000. On June 19, 2010, the People's Bank of China announced the removal of the de facto peg. Following this announcement, the Renminbi depreciated from 6.7968 Renminbi per U.S. dollar on June 21, 2010 to 6.138 Renminbi per U.S. dollar on September 30, 2014.

We conduct substantially all of our operations through our PRC operating companies, and their financial performance and position are measured in terms of Renminbi. Our solutions are primarily procured, sold and delivered in the PRC for Renminbi. The majority of our net revenue are denominated in Renminbi.

Item 4. Controls and Procedures

EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES

As of the end of the period covered by this Report, our Chief Executive Officer and Chief Financial Officer performed an evaluation of the effectiveness of our disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act. Based on the evaluation and the identification of the material weaknesses in internal control over financial reporting described below, our Chief Executive Officer and Chief Financial Officer concluded that, as of September 30, 2014, the Company's disclosure controls and procedures were not effective.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Management is responsible for establishing and maintaining adequate internal control over financial reporting, as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements in accordance with GAAP. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projection of any evaluation of effectiveness to future periods is subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the Company's annual or interim financial statements will not be prevented or detected on a timely basis. In connection with management's assessment of our internal control over financial reporting as required under Section 404 of the Sarbanes-Oxley Act of 2002, we identified the following material weaknesses in our internal control over financial reporting as of September 30, 2014:

1. The Company has not established adequate financial reporting monitoring procedures to mitigate the risk of management override.

2. In addition, there is insufficient oversight of accounting principles implementation and insufficient oversight of external audit functions.

3. There is a strong reliance on the external consultants and legal counsel to review and edit the annual and quarterly filings and to ensure compliance with SEC disclosure requirements.

REMEDIATION OF MATERIAL WEAKNESSES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

As a small business, the Company does not have the resources to install a dedicated staff with deep expertise in all facets of SEC disclosure and GAAP compliance. As is the case with many small businesses, the Company will continue to work with its external consultants as it relates to new accounting principles and changes to SEC disclosure requirements. The Company has found this approach worked well in the past and believes it to be the most cost effective solution available for the foreseeable future.

The Company will conduct a review of existing sign-off and review procedures as well as document control protocols for critical accounting spreadsheets. The Company will also increase management's review of key financial documents and records.

As a small business, the Company does not have the resources to fund sufficient staff to ensure a complete segregation of responsibilities within the accounting function. However, Company management does review, and will increase the review of, financial statements on a monthly basis. These actions, in addition to the improvements identified above, will minimize any risk of a potential material misstatement occurring.

CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

There were no significant changes in our internal control over financial reporting during the quarter ended September 30, 2014, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
