

CUI Global, Inc.
Form 10-Q
August 10, 2015

UNITED STATES SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(D)
OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2015

Commission File Number 0-29923

CUI Global, Inc.

(Exact name of registrant as specified in its charter)

Colorado	84-1463284
(State or jurisdiction of incorporation or organization)	(I.R.S. Employer Identification No.)

20050 SW 112th Avenue

Tualatin, Oregon 97062

(503) 612-2300.

(Address and Telephone Number of Principal Executive Offices)

Edgar Filing: CUI Global, Inc. - Form 10-Q

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15 (d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

YES NO

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

YES NO

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check
if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

YES NO

As of August 7th, 2015, there were 20,800,730 shares of the registrant's common stock outstanding.

Notes to the Condensed Consolidated Financial Statements

(unaudited)

1. NATURE OF OPERATIONS AND BASIS OF PRESENTATION

The accompanying interim unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America and the rules and regulations of the United States Securities and Exchange Commission for interim financial information which includes condensed consolidated financial statements. Accordingly, they do not include all the information and footnotes necessary for a comprehensive presentation of financial position and results of operations and should be read in conjunction with the Annual Report, Form 10-K for the year ended December 31, 2014.

It is management's opinion that all material adjustments (consisting of normal recurring adjustments) have been made which are necessary for a fair financial statement presentation. The results for the interim period are not necessarily indicative of the results to be expected for the year ending December 31, 2015.

CUI Global, Inc. (CUI Global) is a platform company dedicated to maximizing shareholder value through the acquisition, development and commercialization of new, innovative technologies. Through its subsidiaries (CUI, Inc., CUI-Canada, Inc., CUI Japan, Orbital Gas Systems Limited and Orbital Gas Systems, North America, Inc.), CUI Global has built a diversified portfolio of industry leading technologies that touch many markets.

Since its inception in 1989, CUI Inc. (CUI) has been delivering quality products, extensive application solutions and superior personal service. CUI's solid customer commitment and honest corporate message are a hallmark in the industry.

CUI's capabilities and extensive contacts throughout Asia, allows CUI Global to continue to identify, acquire and commercialize new proprietary technologies. CUI Global will use CUI's market partners and global distribution capabilities to bring other products to market, including the Novum and Solus power products, and other proprietary devices, described below. CUI's testing and R&D capabilities allow CUI Global to commercialize and prototype its products more efficiently and economically.

CUI, Inc. and CUI Japan offer electronic components including connectors, speakers, buzzers and control solutions including encoders and sensors; power solutions and test and measurement devices. These offerings provide a

technology architecture that addresses power and related accessories as well as test and measurement capabilities to industries ranging from consumer electronics to defense and alternative energy.

On March 5, 2015, we closed on an Asset Purchase Agreement to acquire certain assets and assumed certain liabilities of Tectrol, Inc., a Toronto, Canada corporation. As a part of this acquisition strategy, CUI Global, Inc. formed a wholly owned Canadian corporate subsidiary, CUI-Canada, Inc. (CUI Canada), to receive these acquired assets and liabilities. CUI Canada operations include the design and manufacture assembly of electronic power conversion devices such as AC/DC power supplies, DC/DC power supplies, linear power supplies and uninterruptable power supplies. Sales of products produced by CUI Canada will be marketed and sold through existing CUI, Inc. sales channels as well as to existing Tectrol customers (See Note 4).

Orbital Gas Systems Limited (Orbital), is a United Kingdom-based provider of natural gas infrastructure and advanced technology, including metering, odorization, remote telemetry units (“RTU”) and a diverse range of personalized gas engineering solutions to the gas utilities, power generation, emissions, manufacturing and automotive industries. The GasPT2 technology products are sold through Orbital. In January 2015, CUI Global formed and opened Orbital Gas Systems, North America, a wholly owned subsidiary, to represent the gas segment in the North American market.

CUI Properties, LLC owns the CUI Global headquarters facility located in Tualatin, Oregon.

For the six month period ended June 30, 2015, total revenues at CUI Global consisted of 69% from the power and electro-mechanical segment and 31% from the gas segment. During the three months ended June 30, 2015, total revenues at CUI Global consisted of 72% from the power and electro-mechanical segment and 28% from the gas segment.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Significant estimates include estimates used to review the Company’s goodwill, impairments and estimations of long-lived assets, revenue recognition on percentage of completion type contracts, allowances for uncollectible accounts, inventory valuation, warranty reserves, valuation of non-cash capital stock issuances and the valuation allowance on deferred tax assets. The Company bases its estimates on historical experience and on various other assumptions that are believed to be reasonable in the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

Principles of Consolidation

The condensed consolidated financial statements for 2015 include the accounts of CUI Global, Inc. and its wholly owned subsidiaries CUI, Inc., CUI-Canada, Inc., CUI Japan, CUI Properties, LLC, Orbital Gas Systems, Ltd. and Orbital Gas Systems, North America, hereafter referred to as the “Company”. The condensed consolidated financial statements for 2014 include the accounts of CUI Global, Inc. and its wholly owned subsidiaries CUI, Inc., CUI Japan, CUI Properties, LLC, and Orbital Gas Systems, Ltd. Significant intercompany accounts and transactions have been eliminated in consolidation.

Fair Value of Financial Instruments

Accounting Standards Codification (“ASC”) 820 “Fair Value Measurements and Disclosures” (“ASC 820”) defines fair value, establishes a framework for measuring fair value under generally accepted accounting principles in the U.S., and enhances disclosures about fair value measurements. ASC 820 describes a fair value hierarchy based on three levels of inputs, of which the first two are considered observable and the last unobservable, that may be used to measure fair value, which are the following:

Level 1 — Pricing inputs are quoted prices available in active markets for identical assets or liabilities as of the reporting date.

Pricing inputs are quoted for similar assets, or inputs that are observable, either directly or indirectly, for Level 2 substantially the full term through corroboration with observable market data. Level 2 includes assets or liabilities valued at quoted prices adjusted for legal or contractual restrictions specific to these investments.

Level 3 – Pricing inputs are unobservable for the assets or liabilities; that is, the inputs reflect the reporting entity’s own assumptions about the assumptions market participants would use in pricing the asset or liability.

Management believes the carrying amounts of the short-term financial instruments, including cash and cash equivalents, accounts receivable, costs in excess of billings, prepaid expense and other assets, accounts payable, accrued liabilities, billings in excess of costs, unearned revenue, and other liabilities reflected in the accompanying condensed consolidated balance sheets approximate fair value at June 30, 2015 and December 31, 2014 due to the relatively short-term nature of these instruments. Mortgage debt and related notes payable approximate fair value based on current market conditions. The Company measures its derivative liability on a recurring basis using significant observable inputs (Level 2). The Company’s derivative liability is valued using a LIBOR swap curve.

Cash and Cash Equivalents

Cash includes deposits at financial institutions with maturities of three months or less. The Company at times has cash in banks in excess of FDIC insurance limits and places its temporary cash investments with high credit quality financial institutions. The Company considers all highly liquid marketable securities with maturities of 90 days or less at the date of acquisition to be cash equivalents. Cash equivalents include money market funds, certificates of deposit and commercial paper. At June 30, 2015, the Company had \$5.2 million of cash and cash equivalents which includes \$819 thousand at domestic financial institutions which were covered under the FDIC insured deposits programs and \$215 thousand at foreign financial institutions covered under the United Kingdom Financial Services Compensation (FSC) and the Canada Deposit Insurance Corporation (CDIC). The money market balance of \$1.4 million is covered up to \$500 thousand under the SIPC insured program for investments. At June 30, 2015 the Company had cash and cash equivalents of \$258 thousand in Japanese bank accounts, \$656 thousand in European bank accounts and \$320 thousand in Canadian bank accounts.

Investments

The Company considers all investments with maturities over 90 days that mature in less than one year from the balance sheet date to be short-term investments. Both short- and long-term investments primarily include money market funds, certificates of deposit, corporate notes, and commercial paper. Premiums and discounts are amortized or accreted over the life of the related security as an adjustment to yield using a method that approximates the effective interest method. Under this method, dividend and interest income are recognized when earned. At June 30, 2015, CUI Global had \$4.0 million of short-term investments classified as held-to-maturity, reported at amortized cost, which approximates market. At June 30, 2015, the Company had \$4.0 million of investments in certificates of deposit which were covered under FDIC insured limits and covered under the \$500 thousand SIPC insured programs for investments.

Accounts Receivable and Allowance for Uncollectible Accounts

Accounts receivable consist of the receivables associated with revenue derived from product sales and from billings on percentage of completion contracts. An allowance for uncollectible accounts is recorded to allow for any amounts that may not be recoverable, based on an analysis of prior collection experience, customer credit worthiness and current economic trends. Based on management's review of accounts receivable, an allowance for doubtful accounts of \$241 thousand at June 30, 2015 is considered adequate. The reserve takes into account aged receivables that management believes should be specifically reserved for as well as historic experience with bad debts to determine the total reserve appropriate for each period. Receivables are determined to be past due based on the payment terms of original invoices. The Company grants credit to its customers, with standard terms of Net 30 days. The Company routinely assesses the financial strength of its customers and, therefore, believes that its accounts receivable credit risk exposure is limited. Additionally, the Company maintains a foreign credit receivables insurance policy that covers many of the CUI, Inc. foreign customer receivable balances in effort to further reduce credit risk exposure. Included in accounts receivable are \$52 thousand of amounts billed to customers under long-term contracts or programs that have been withheld because of retainage provisions in the related contract. The retainage receivables are expected to be collected within the next twelve months.

Inventory

Inventories consist of finished and un-finished products and are stated at the lower of cost or market; using the first-in, first-out (FIFO) method. At June 30, 2015, inventory is valued, net at approximately \$11.2 million. The Company provides allowances for inventories estimated to be excess, obsolete or unmarketable. The Company's estimation process for assessing the net realizable value is based upon its known backlog, projected future demand, historical usage and expected market conditions. At June 30, 2015, inventory consisted of approximately \$6.7 million of finished goods, \$3.5 million of raw materials, \$1.5 million of work in process and an allowance of \$0.4 million.

Land, Buildings, Furniture, Vehicles, and Equipment

Land is recorded at cost and includes expenditures made to ready it for use.

Buildings and improvements are recorded at cost.

Furniture, vehicles, and equipment are recorded at cost and include major expenditures, which increase productivity or substantially increase useful lives.

Leasehold improvements are recorded at cost and are depreciated over the lesser of the lease term, estimated useful life, or 10 years.

Maintenance, repairs and minor replacements are charged to expenses when incurred. When assets are sold or otherwise disposed of, the asset and related accumulated depreciation are removed from this account, and any gain or loss is included in the statement of operations.

The cost of buildings and improvements, furniture, vehicles, and equipment is depreciated over the estimated useful lives of the related assets.

Depreciation is computed using the straight-line method for financial reporting purposes. The estimated useful lives for buildings, furniture, vehicles, and equipment are as follows:

	Estimated Useful Life
Buildings and improvements	5 to 39 years
Furniture and equipment	3 to 10 years
Vehicles	3 to 5 years

Long-Lived Assets

Long-lived assets including finite lived identifiable assets are periodically reviewed for impairment whenever circumstances and situations change such that there is an indication that the carrying amounts may not be recoverable. In performing the review for recoverability, the future cash flows expected to result from the use of the asset and its eventual disposition are estimated. If the sum of the expected future cash flows (undiscounted and without interest charges) is less than the carrying amount of the long-lived asset, an impairment loss is recognized as the excess of the carrying amount over the fair value. Otherwise, an impairment loss is not recognized. Management estimates the fair value and the estimated future cash flows expected. Any changes in these estimates could impact whether there was impairment and the amount of the impairment.

Identifiable Intangible Assets

Intangible assets are stated at cost net of accumulated amortization and impairment. The fair value for intangible assets acquired through acquisitions is measured at the time of acquisition utilizing the following inputs, as needed:

1. Inputs used to measure fair value are unadjusted quote prices available in active markets for the identical assets or liabilities if available.
Inputs used to measure fair value, other than quoted prices included in 1, are either directly or indirectly observable as of the reporting date through correlation with market data, including quoted prices for similar assets and liabilities in active markets and quoted prices in inactive markets. This includes assets and liabilities valued using
2. models or other pricing methodologies that do not require significant judgment since the input assumptions used in the models, such as interest rates and volatility factors, are corroborated by readily observable data from actively quoted markets for substantially the full life of the asset.
Inputs used to measure fair value are unobservable inputs supported by little or no market activity and reflect the use
3. of significant management judgment. These values are generally determined using pricing models for which the assumptions utilize management's estimates of market participant assumptions.
4. Expert appraisal and fair value measurement as completed by third party experts.

The following are the estimated useful life for the intangible assets:

	Estimated Useful Life
Finite-lived Intangible Assets	
Order backlog - Orbital	2
Trade name - Orbital	10
Trade name - CUI - Canada	3
Trade name - V-Infinity	5
Customer list - Orbital	10
Customer list - CUI Canada	7
Technology rights	20*
Technology - Based Asset - Know How	12
Technology - Based Asset - Software	10
Technology - Based Asset - Power	7
Patents	**
Software	3 to 5***
Other intangible assets	****
Indefinite-lived Intangible Assets	
Trade name - CUI	*****
Customer list - CUI	*****
Patents pending technology	*****

* Technology rights are amortized over a twenty year life or the term of the rights agreement.

** Patents are amortized over the life of the patent. Any patents not approved will be expensed at that time.

*** Software assets are recorded at cost and include major expenditures, which increase productivity or substantially increase useful lives.

**** Other intangible assets are amortized over their estimated useful life.

***** Indefinite-lived intangible assets are reviewed annually for impairment and when circumstances suggest.

Goodwill Assets

The Company tests for goodwill impairment in the second quarter of each year and whenever events or circumstances indicate that the carrying amount of the asset exceeds its fair value and may not be recoverable. For the year ended December 31, 2014, the Company determined there was no impairment of goodwill. In accordance with its policies, the Company performed a qualitative assessment of goodwill at May 31, 2015, and determined there was no impairment of goodwill.

As detailed in ASC 350-20-35-3A, in performing its testing for goodwill, management completes a qualitative analysis to determine whether it was more likely than not that the fair value of a reporting unit is less than its carrying amount, including goodwill. To complete this review, management follows the steps in ASC 350-20-35-3C to evaluate the fair values of the intangibles and goodwill and considers all known events and circumstances that might trigger an impairment of goodwill. Through these reviews, management concluded that there were no events or circumstances that triggered an impairment (and there was no expectation that a reporting unit or a significant portion of a reporting unit would be sold or otherwise disposed of in the following year), therefore, no further analysis was necessary to prepare for goodwill impairment beyond the steps in ASC 350-20-35-3C in accordance with ASU 2011-08.

Investment – Equity Method

The Company owns 352,589 common shares (representing an 8.94% interest thru March 31, 2014 and 8.50% thereafter) in Test Products International, Inc., hereafter referred to as TPI. TPI is a provider of handheld test and measurement equipment. Under the equity method, investments are carried at cost, plus or minus the Company's proportionate share, based on present ownership interests, of: (a) the investee's profit or loss after the date of acquisition; (b) changes in the Company's equity that have not been recognized in the investee's profit or loss; and (c) certain other adjustments. CUI Global enjoys a close association with this affiliate through common Board of Director membership and participation that allows for a significant amount of influence over affiliate business decisions. Accordingly, for financial statement purposes, the Company accounts for its investment in this affiliated entity under the equity method.

A summary of the financial statements of the affiliate as of and for the six months ended June 30, 2015 is as follows:

Current assets	\$6,248,974
Non-current assets	556,229
Total Assets	\$6,805,203
Current liabilities	\$1,707,654
Non-current liabilities	685,588
Stockholders' equity	4,411,961
Total Liabilities and Stockholders' Equity	\$6,805,203
Revenues	\$6,734,119
Operating income	241,831
Net profit	278,995
Other comprehensive profit (loss):	
Foreign currency translation adjustment	-
Comprehensive net profit	\$278,995
Company share of Net Profit	\$23,715
Equity investment in affiliate	\$356,144

Patent Costs

The Company estimates the patents it has filed have a future beneficial value; therefore it capitalizes the costs associated with filing for its patents. At the time the patent is approved, the patent costs associated with the patent are amortized over the useful life of the patent. If the patent is not approved, at that time the costs will be expensed. During the three and six months ended June 30, 2015, the Company recorded an impairment of \$0 and \$2,500, respectively, for patent costs within the power and electro-mechanical segment as the Company will not continue pursuit of the related patent grants.

Derivative Instruments

The Company uses various derivative instruments including forward currency contracts, and interest rate swaps to manage certain exposures. These instruments are entered into under the Company's corporate risk management policy to minimize exposure and are not for speculative trading purposes. The Company recognizes all derivatives as either assets or liabilities in the condensed consolidated balance sheet and measures those instruments at fair value. Changes in the fair value of derivatives are recognized in earnings. The Company has limited involvement with derivative instruments and does not trade them. From time to time, the Company may enter into foreign currency exchange contracts to minimize the risk associated with foreign currency exchange rate exposure from expected future cash flows. The Company has entered into one interest rate swap which has a maturity date of ten years from the date of inception, and is used to minimize the interest rate risk on the variable rate mortgage. During the three and six months ended June 30, 2015, the Company had \$107 thousand and \$47 thousand, respectively, of unrealized gain related to the derivative liabilities.

Derivative Liabilities

The Company evaluates embedded conversion features pursuant to FASB Accounting Standards Codification No. 815 ("FASB ASC 815"), "Derivatives and Hedging", which requires a periodic valuation of the fair value of derivative instruments and a corresponding recognition of liabilities associated with such derivatives.

Stock-Based Compensation

The Company records its stock-based compensation expense under our stock option plans and also issues stock for services. A detailed description of the awards under these plans and the respective accounting treatment is included in the "Notes to the Consolidated Financial Statements" included in our Annual Report on Form 10-K for the year ended December 31, 2014. The Company recorded stock-based compensation expense of \$249 thousand and \$534 thousand for the three and six months ended June 30, 2015, respectively.

Revenue Recognition

Product revenue is recognized in the period when persuasive evidence of an arrangement with a customer exists, the products are shipped and title has transferred to the customer, the price is fixed or determinable, and collection is reasonably assured. The Company sells to distributors pursuant to distribution agreements that have certain terms and conditions such as the right of return and price protection which inhibit revenue recognition unless they can be reasonably estimated as we cannot assert the price is fixed and determinable and estimate returns. For one distributor that comprises 20% of revenues, we have such history and ability to estimate; therefore, recognized revenue upon sale to the distributor and record a corresponding reserve for the estimated returns. For two other distributor arrangements, we do not have sufficient history to reasonably estimate price protection reserve and the right of return and accordingly defer revenue and the related costs until such time as the distributors resell the product.

Revenues and related costs on production type contracts, are recognized using the “percentage of completion method” of accounting in accordance with ASC 605-35, *Accounting for Performance of Construction-Type and Certain Production Type Contracts* (“ASC 605-35”). Under this method, contract revenues and related expenses are recognized over the performance period of the contract in direct proportion to the costs incurred as a percentage of total estimated costs for the entirety of the contract. Costs include direct material, direct labor, subcontract labor and any allocable indirect costs. All un-allocable indirect costs and corporate general and administrative costs are charged to the periods as incurred. However, in the event a loss on a contract is foreseen, the Company will recognize the loss as it is determined. Contract costs plus recognized profits are accumulated as deferred assets, and billings and/or cash received are recorded to a deferred revenue liability account. The net of these two accounts for any individual project is presented as "Costs in excess of billings," an asset account, or "Billings in excess of costs," a liability account. At June 30, 2015, the Costs in excess of billings balance was \$2.1 million and the Billings in excess of costs balance was \$3.7 million.

Production type contracts that do not qualify for use of the percentage of completion method are accounted for using the “completed contract method” of accounting in accordance with ASC 605-35-25-57. Under this method, contract costs are accumulated as deferred assets, and billings and/or cash received is recorded to a deferred revenue liability account, during the periods of construction, but no revenues, costs, or profits are recognized in operations until the period within which completion of the contract occurs. A contract is considered complete when all costs except insignificant items have been incurred; the equipment is operating according to specifications and has been accepted by the customer.

Revenues from warranty and maintenance activities are recognized ratably over the term of the warranty and maintenance period and the unrecognized portion is recorded as deferred revenue.

Shipping and Handling Costs

Amounts billed to customers in sales transactions related to shipping and handling represent revenues earned for the goods provided and are included in sales. The Company expenses inbound shipping and handling costs as cost of revenues.

Warranty Reserves

A warranty reserve liability is recorded based on estimates of future costs on sales recognized. There was no warranty reserve recorded at June 30, 2015 or 2014.

Foreign Currency Translation

The financial statements of the Company's foreign offices have been translated into U.S. dollars in accordance with FASB ASC 830, “Foreign Currency Matters” (FASB ASC 830). All balance sheet accounts have been translated using the exchange rate in effect at the balance sheet date. Income statement amounts have been translated using an appropriately weighted average exchange rate for the year. The translation gains and losses resulting from the changes in exchange rates during 2015 and 2014 have been reported in accumulated other comprehensive income (loss), except for gains and losses resulting from the translation of intercompany receivables and payables, which are included in earnings for the period.

Segment Reporting

Operating segments are defined in accordance with ASC 280-10 as components of an enterprise for which separate financial information is available that is evaluated regularly by the chief operating decision maker, or decision making group, in deciding how to allocate resources and in assessing performance.

Management has identified six operating segments based on the activities of the company in accordance with the ASC 280-10. These operating segments have been aggregated into three reportable segments. The three reportable segments are Power and Electro-Mechanical, Gas and Other. The Power and Electro-Mechanical segment is focused on the operations of CUI, Inc., CUI-Canada, Inc. and CUI Japan for the sale of internal and external power supplies and related components, industrial controls and test and measurement devices. The Gas segment is focused on the operations of Orbital Gas Systems Limited and Orbital Gas Systems, North America which includes gas related test and measurement systems, including the GasPT2. The Other segment represents the remaining activities that are not included as part of the other reportable segments and represent primarily corporate activity.

Edgar Filing: CUI Global, Inc. - Form 10-Q

The following information represents segment activity for the six months ended June 30, 2015:

	Power and Electro- Mechanical	Gas	Other	Totals

Reclassification

Certain amounts from the prior periods have been reclassified to the current period presentation including, for the year ended December 31, 2014, \$1.9 million of trade accounts receivable that were reclassified to costs in excess of billings, \$88 thousand of software, net of amortization that were reclassified to Other intangible assets, net on the condensed consolidated balance sheets, and for the six months ended June 30, 2014 condensed consolidated statements of cash flows \$25 thousand was reclassified to amortization of intangibles and \$10 thousand was reclassified to investment in other intangible assets, net.

Recent Accounting Pronouncements

In May 2014, the FASB issued Accounting Standards Update No. 2014-09, “Revenue *from Contracts with Customers*” (ASU 2014-09), which supersedes nearly all existing revenue recognition guidance under U.S. GAAP. The core principle of ASU 2014-09 is to recognize revenues when promised goods or services are transferred to customers in an amount that reflects the consideration to which an entity expects to be entitled for those goods or services. ASU 2014-09 defines a five step process to achieve this core principle and, in doing so, more judgment and estimates may be required within the revenue recognition process than are required under existing U.S. GAAP. The standard was effective for annual periods beginning after December 15, 2016, and interim periods therein, using either of the following transition methods: (i) a full retrospective approach reflecting the application of the standard in each prior reporting period with the option to elect certain practical expedients, or (ii) a retrospective approach with the cumulative effect of initially adopting ASU 2014-09 recognized at the date of adoption (which includes additional footnote disclosures). On July 9, 2015, the FASB affirmed its proposal to defer the effective date of the new revenue standard for public entities by one year to annual reporting periods beginning after December 31, 2017, and interim periods beginning in the first interim period within the year of adoption. Early application would be permitted, but not before the original effective date for public entities, annual reporting periods after December 15, 2016, and interim periods beginning in the first interim period within the year of adoption. We are currently evaluating the impact of our pending adoption of ASU 2014-09 on our consolidated financial statements and have not yet determined the method by which we will adopt the standard in 2017.

In June 2014, the FASB issued Accounting Standards Update No. 2014-12, “*Compensation – Stock Compensation (Topic 718) – Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period*” (ASU 2014-12). The amendments in ASU 2014-12 require that a performance target that affects vesting and that could be achieved after the requisite service period be treated as a performance condition. A reporting entity should apply existing guidance in Topic 718, Compensation – Stock Compensation, as it relates to awards with performance conditions that affect vesting to account for such awards. The performance target should not be reflected in estimating the grant-date fair value of the award. Compensation cost should be recognized in the period in which it becomes probable that the performance target will be achieved and should represent the compensation cost attributable to the period(s) for which the requisite service has already been rendered. If the performance target becomes probable of being achieved before the end of the requisite service period, the remaining unrecognized compensation cost should be recognized prospectively over the remaining requisite service period. The total amount of compensation cost recognized during and after the requisite service period should reflect the number of awards that are expected to vest and should be adjusted to reflect those awards that ultimately vest. The requisite service period ends when the employee can cease rendering service and still be eligible to vest in the award if the performance target is achieved. The standard is effective for annual periods and interim period within those annual periods beginning after December 15, 2015, early adoption is permitted. The adoption of this provision is not expected to have an impact on the Company’s financial condition or results of operations.

In January 2015, the FASB issued Accounting Standards Update No. 2015-01, “*Income Statement – Extraordinary and Unusual Items (Subtopic 225-20) - Simplifying Income Statement Presentation by Eliminating the Concept of Extraordinary Items*” (ASU 2015-01). ASU 2015-01 eliminates from U.S. GAAP the concept of extraordinary items. The amendments in this update are effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. The adoption of this provision is not expected to have an impact on the Company’s financial condition or results of operations.

3. INVESTMENTS AND FAIR VALUE MEASUREMENTS

The Company’s fair value hierarchy for its cash equivalents, marketable securities and derivative instruments as of June 30, 2015 and December 31, 2014, respectively, was as follows:

June 30, 2015	Level 1	Level 2	Level 3	Total
Money market securities	\$1,419,626	\$-	\$ -	\$1,419,626
Certificates of Deposit	3,985,000	-	-	3,985,000
Total assets	\$5,404,626	\$-	\$ -	\$5,404,626
Derivative instrument payable	\$-	\$552,585	\$ -	\$552,585
Total liabilities	\$-	\$552,585	\$ -	\$552,585

December 31, 2014	Level 1	Level 2	Level 3	Total
Money market securities	\$1,280,505	\$-	\$ -	\$1,280,505
Certificates of Deposit	6,845,000	-	-	6,845,000
Commercial Paper	-	2,249,361	-	2,249,361
Corporate Notes	-	2,815,339	-	2,815,339
Total assets	\$8,125,505	\$5,064,700	\$ -	\$13,190,205
Derivative instrument payable	\$-	\$599,698	\$ -	\$599,698
Total liabilities	\$-	\$599,698	\$ -	\$599,698

4. ACQUISITION

CUI-Canada, Inc.

On March 5, 2015, we closed on an Asset Purchase Agreement to acquire certain assets and assumed certain liabilities of Tectrol, Inc., a Toronto, Canada corporation. The acquisition was effective March 1, 2015. As a part of this acquisition strategy, CUI Global, Inc. formed a wholly owned Canadian corporate subsidiary, CUI-Canada, Inc., to receive these acquired assets and liabilities. That entity entered into a five-year lease of the Toronto facility where Tectrol, Inc. was operating its business. CUI-Canada, Inc. operations include the design, manufacture assembly and sales of electronic power conversion devices such as AC/DC power supplies, DC/DC power supplies, linear power supplies and uninterruptable power supplies.

The purchase price for the acquisition of the assets was five million two hundred thousand dollars (\$5,200,000), subject to good faith adjustments by the Parties according to the final value of the non-obsolete inventory conveyed and other closing adjustments. In addition, the agreement calls for an earn-out/royalty payment of two percent (2%) of the gross sales (for specific, identified customers) over a period of three (3) years from the closing date, up to a maximum of \$300,000, that may or may not be paid to the Seller within 90 days of each calendar year end, depending on performance by the identified customer(s). The final adjusted purchase price for the acquisition of Tectrol was \$4,500,945, which includes the present value of \$300,000 of royalties to be paid on future sales, which has been recorded as \$215,500 of contingent consideration. The full purchase price less the royalties was paid in cash. We funded the consideration paid to the shareholder of Tectrol with existing cash and cash equivalents and funds from short term investments that had matured.

The acquisition was accounted for using the acquisition method of accounting and the purchase price was allocated to the assets acquired and liability assumed based upon their estimated fair values at the date of acquisition.

The allocation of the purchase price is as follows:

Purchase price	\$4,500,945
Inventory	\$2,301,624
Property & equipment	831,298
Software	73,484
Intangible, customer lists	270,000
Intangible, trademark and tradename	130,000
Intangible, technology-based asset	1,000,000
Goodwill	63,578
Liabilities assumed	(169,039)
	\$4,500,945

The table below summarizes the unaudited condensed pro forma information of the results of operations of CUI Global, Inc. for the six months ended June 30, 2015 and 2014 as though the acquisition had been completed as of January 1, 2014 and January 1, 2015:

For the six months ended June 30, 2015

	CUI Global, Inc.	Tectrol, Inc.	Adjustment ⁽¹⁾	Pro Forma
Gross revenue	\$ 39,825,317	\$4,837,085		\$44,662,402
Total expenses	44,405,349	5,212,203	30,987	49,648,539
Net profit (loss)	\$ (4,580,032)	\$ (375,118)		\$ (4,986,137)
Basic and diluted loss per share				\$ (0.24)

For the six months ended June 30, 2014

	CUI Global, Inc.	Tectrol, Inc.	Adjustment ⁽¹⁾	Pro Forma
Gross revenue	\$ 36,114,102	\$8,965,999		\$45,080,101
Total expenses	36,668,482	9,760,873	92,961	46,522,316
Net profit (loss)	\$ (554,380)	\$ (794,874)		\$ (1,442,215)
Basic and diluted loss per share				\$ (0.07)

(1) Adjustment to recognize the estimated depreciation and amortization expense for each of the presented periods assuming amortization of the intangible assets and depreciation of tangible assets over their estimated useful lives. Estimated depreciation and amortization for the unaudited pro forma condensed consolidated statements of operations are \$30,987 and \$92,961 for the six months ended June 30, 2015 and 2014, respectively. The pro forma condensed consolidated statements of operations reflect only pro forma adjustments expected to have a continuing effect on the consolidated results beyond 12 months from the consummation of the acquisition. Excluded from the pro forma adjustment is the effect of the write up of inventory recorded as a result of acquisition accounting of

\$143,219.

The above unaudited condensed pro forma information does not purport to represent what the Companies' combined results of operations would have been if such transactions had occurred at the beginning of the period presented, and are not indicative of future results.

CUI Global recognized revenues of \$671 thousand and net loss of \$48 thousand related to the operations of CUI Canada since acquisition on March 1, 2015.

5. INCOME (LOSS) PER COMMON SHARE

In accordance with FASB Accounting Standards Codification No. 260 (“FASB ASC 260”), “Earnings per Share”, basic net profit (loss) per share is computed by dividing the net profit (loss) available to common stockholders for the period by the weighted average number of common shares outstanding during the period. Diluted net profit (loss) per share is computed by dividing net profit (loss) available to common stockholders by the weighted average number of common and common equivalent shares outstanding during the period. Common equivalent shares outstanding as of June 30, 2015 and 2014, which consist of options, have been excluded from the diluted net loss per common share calculations because they were anti-dilutive for each period. Accordingly, diluted net loss per share is the same as basic net loss per share for the three months ended June 30, 2015 and 2014.

For the three and six months ended June 30, 2015, 997,932 shares, respectively, related to options were excluded from the computation of diluted earnings per share as they were anti-dilutive due to the loss position. For the three and six months ended June 30, 2014, 983,932 shares, respectively, related to options were excluded from the computation of diluted earnings per share as they were anti-dilutive due to the loss position.

	For the Three Months Ended June 30,		For the Six Months Ended June 30,	
	2015	2014	2015	2014
Net (loss)	\$ (503,876)	\$ (66,462)	\$ (4,580,032)	\$ (554,380)
Weighted average number of shares outstanding	20,786,081	20,628,347	20,780,074	20,608,048
Weighted average number of common and common equivalent shares	20,786,081	20,628,347	20,780,074	20,608,048
Basic (loss) per common share	\$ (0.02)	\$ (0.00)	\$ (0.22)	\$ (0.03)
Diluted (loss) per common share	\$ (0.02)	\$ (0.00)	\$ (0.22)	\$ (0.03)

6. CAPITALIZED INTEREST

The cost of constructing facilities, equipment and project assets includes interest costs incurred during the assets’ construction period. The components of interest expense and capitalized interest are as follows during the three and six months ended June 30, 2015 and 2014:

	For the Three Months Ended June 30,		For the Six Months Ended June 30,	
	2015	2014	2015	2014
Interest cost incurred	\$ (124,644)	\$ (127,783)	\$ (249,023)	\$ (253,274)
Interest cost capitalized - property and equipment	28,278	-	39,734	-
Interest expense, net	\$ (96,366)	\$ (127,783)	\$ (209,289)	\$ (253,274)

7. INCOME TAXES

The Company is subject to taxation in the U.S., various state and foreign jurisdictions. We continue to record a full valuation allowance against our U.S. and certain foreign net deferred tax assets as it is not more likely than not that we will realize a benefit from these assets in a future period. In future periods, tax benefits and related deferred tax assets will be recognized when management concludes realization of such amounts is more likely than not.

A net benefit of \$233 thousand was recorded to the income tax provision for the six month period ended June 30, 2015 resulting in an effective tax rate of 4.84% for the period. The income tax benefit relates primarily to deferred taxes at our foreign operations where the benefit can be realized, partially offset by domestic state minimum taxes as all of our other USA and certain foreign tax benefits are reduced by a full valuation allowance. Our total income tax benefit and effective tax rate were \$360 thousand and 39.34%, respectively, for the same period in 2014.

A net benefit of \$114 thousand was recorded to the income tax provision for the three month period ended June 30, 2015 resulting in an effective tax rate of 18.47% for the period. The income tax benefit for the quarter relates primarily to deferred taxes at our foreign operations where the benefit can be realized, partially offset by domestic state minimum taxes as all of our other USA and certain foreign tax benefits are reduced by a full valuation allowance. Our total income tax benefit and effective tax rate were \$331 thousand and 83.29%, respectively, for the same period in 2014.

8. WORKING CAPITAL LINE OF CREDIT

During the period ended June 30, 2015, our wholly owned subsidiary, CUI, Inc., maintained a two year revolving Line of Credit (LOC) with Wells Fargo Bank in the principal amount of four million dollars (\$4,000,000) with an expiration of October 1, 2016. The interest rate on any outstanding balance is 1.75% above either the daily one month LIBOR or the LIBOR in effect on the first day of the applicable fixed rate term. At June 30, 2015, the LOC is secured through a security agreement on CUI, Inc. net accounts receivable of \$7.6 million, CUI, Inc. net general intangibles of \$9.4 million, net inventory of \$5.6 million and equipment of CUI, Inc. of \$1.3 million. CUI Global, Inc., the parent company is a payment guarantor of the LOC. Other terms included in this revolving line of credit for CUI Inc. limit capital expenditures by CUI Inc. to \$1.2 million in any fiscal year.

At June 30, 2015 and 2014, the balance outstanding on the line of credit was \$0. As of the date of this filing, the Company is compliant with all covenants on the line of credit with Wells Fargo Bank.

9. ACCUMULATED OTHER COMPREHENSIVE INCOME

The components of accumulated other comprehensive income are as follows:

	As of June 30, 2015	As of December 31, 2014
Foreign currency translation adjustment	\$564,526	\$268,352
Accumulated other comprehensive income	\$564,526	\$268,352

10. CAPITAL LEASES

The following is an analysis of the leased property under capital leases by major classes as of June 30, 2015:

24

Classes of Property	
Motor vehicles	\$174,679
Equipment	22,343
Less: Accumulated depreciation	(95,465)
	\$101,557

The following summarizes the current and long term portion of capital leases at June 30, 2015:

Current leases payable	\$26,643
Long term leases payable	62,191
	\$88,834

11. NOTES PAYABLE

Notes payable is summarized as follows at June 30, 2015:

(a) Promissory Note - bank	\$3,564,210
(b) Acquisition Note Payable - related party	5,303,683
	\$8,867,893

On October 1, 2013, the funding of the purchase of our Tualatin, Oregon corporate offices from Barakel, LLC was completed. The purchase price for this asset was \$5,050,000. The purchase was funded, in part, by a promissory note payable to Wells Fargo Bank in the amount of \$3,693,750 plus interest at the rate of 2% above LIBOR, payable over ten years with a balloon payment due at maturity. It was secured by a deed of trust on the purchased property which was executed by CUI Properties, LLC and guaranteed by CUI Global, Inc. During the six months ended June 30, 2015, the Company made principal payments of \$40 thousand against the mortgage promissory note payable. At June 30, 2015, the balance owed on the mortgage promissory note payable was \$3,564,210, of which \$82,792 and \$3,481,418 were in current and long term liabilities, respectively at June 30, 2015.

The note payable to International Electronic Devices, Inc. (formerly CUI, Inc.) is associated with the acquisition of CUI, Inc. The promissory note is due May 15, 2020 and includes a 5% interest rate per annum, with interest payable monthly and the principal due as a balloon payment at maturity. The note contains a contingent conversion feature, such that in the event of default on the note the holder of the note can, at the holder's option, convert the note principal into common stock at \$0.001 per share. As of June 30, 2015, the Company is in compliance with all terms of this promissory note and the conversion feature is not effective.

The following table details the maturity of the mortgage notes payable and acquisition note payable – related party for CUI Global, Inc. as of June 30, 2015:

	2015	2016	2017	2018	2019	Thereafter	Total
Note payable maturities	\$40,714	\$84,874	\$89,218	\$93,780	\$98,574	\$8,460,733	\$8,867,893

12. CONCENTRATIONS

During the second quarter of 2015, 35% of revenues were derived from three customers at 18%, 11%, and 6%. For the six months ended June 30, 2015, 44% of revenues were derived from four customers at 20%, 12%, 6% and 6%.

During the second quarter of 2014, 58% of revenues were derived from two customers at 40% and 18%. For the six months ended June 30, 2014, 54% of revenues were derived from two customers at 36% and 18%.

The Company's major product lines during the first six months of 2015 and 2014 were power and electro-mechanical products and natural gas infrastructure and high-tech solutions.

At June 30, 2015, of the gross trade accounts receivable of \$14.7 million, 23% was due from two customers at 13% and 10%. At June 30, 2014, of the gross trade accounts receivable totaling \$11.5 million, 35% was due from two customers at 24% and 11%.

During the three and six months ended June 30, 2015, CUI had one supplier concentration of 9% related to inventory product received.

The Company has revenue concentrations in the United Kingdom and China of 27% and 8%, respectively, for the six months ended June 30, 2015. The Company has revenue concentrations in the United Kingdom and China of 21% and 9%, respectively, for the three months ended June 30, 2015. For the three months ended June 30, 2014, the Company had revenue concentrations in the United Kingdom and China of 27% and 7%, respectively. For the six months ended June 30, 2014, the Company had revenue concentrations in the United Kingdom and China of 29% and 6%, respectively.

The Company has trade accounts receivable concentration in the United Kingdom and China of 37% and 8%, respectively, at June 30, 2015. The Company had trade accounts receivable concentration in the United Kingdom and China of 60% and 6%, respectively, at June 30, 2014.

13. OTHER EQUITY TRANSACTIONS

During January 2015, two board members received 2,500 shares of fully vested restricted common stock each. These 5,000 shares were expensed at their grant date fair value of \$36,300.

Also during January 2015, 17,655 shares of fully vested restricted common stock were issued as a signing bonus to the employee hired as Director of Sales and Marketing for Orbital Gas Systems, North America. These shares were expensed at their grant date fair value of \$125,000.

During March 2015, 10,000 shares of fully vested restricted common shares were issued, with a grant date fair value of \$62,599, to a consultant pursuant to an agreement for strategic investor marketing services to be rendered for the benefit of the company through July 1, 2016. The grant date fair value of \$62,599 is recorded as a prepaid expense at June 30, 2015.

During April 2015, 108 shares of common stock were issued to a former employee through a cashless option exercise. The Company received \$0 for the issuance.

During May 2015, 1,391 shares of fully vested restricted common stock were issued to an employee as an approved bonus. These shares were expensed at the grant date fair value of \$7,497.

During June 2015, 9,560 shares of fully vested restricted common stock were issued to an employee as an approved bonus. These shares were expensed at the grant date fair value of \$49,999.

During June 2015, one board member received 1,753 shares of fully vested restricted common stock. These shares were expensed at the grant date fair value of \$9,747.

14. SUBSEQUENT EVENTS

In July 2015, 3,453 shares of fully vested restricted common stock were issued to an employee as bonus compensation. These shares were expensed at a fair value of \$14,813 as of the grant date.

Also in July 2015, 3,670 shares of common stock were issued to related party, James McKenzie and 400 shares of common stock were issued to related party, IED, Inc. The shares were valued at \$22,275 based on the dates earned under the royalty agreement.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Important Note about Forward-Looking Statements

The following discussion and analysis should be read in conjunction with our un-audited condensed consolidated financial statements as of June 30, 2015 and notes thereto included in this document and our audited consolidated financial statements in our 10-K filings for the period ended December 31, 2014 and the notes thereto. In addition to historical information, the following discussion and other parts of this Form 10-Q contain forward-looking information that involves risks and uncertainties. Our actual results could differ materially from those anticipated by such forward-looking information due to factors discussed elsewhere in this Form 10-Q.

The statements that are not historical constitute "forward-looking statements". Said forward-looking statements involve risks and uncertainties that may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements, express or implied by such forward-looking statements. These forward-looking statements are identified by their use of such terms and phrases as "expects", "intends", "goals", "estimates", "projects", "plans", "anticipates", "should", "future", "believes", and "scheduled".

The variables which may cause differences include, but are not limited to, the following: general economic and business conditions; competition; success of operating initiatives; operating costs; advertising and promotional efforts; the existence or absence of adverse publicity; changes in business strategy or development plans; the ability to retain management; availability, terms and deployment of capital; business abilities and judgment of personnel; availability of qualified personnel; labor and employment benefit costs; availability and costs of raw materials and supplies; and changes in, or failure to comply with various government regulations. Although the Company believes that the assumptions underlying the forward-looking statements contained herein are reasonable, any of the assumptions could be inaccurate; therefore, there can be no assurance that the forward-looking statements included in this Form 10-Q will prove to be accurate.

In light of the significant uncertainties inherent in the forward-looking statements included herein, the inclusion of such information should not be regarded as a representation by the Company or any person that the objectives and expectations of the Company will be achieved.

Overview

CUI Global is a platform company dedicated to maximizing shareholder value through the acquisition, development and commercialization of new, innovative technologies. Through its subsidiaries, CUI Global has built a diversified portfolio of industry leading technologies that touch many markets.

During the six months ended June 30, 2015, CUI Global had a consolidated loss from operations of \$4.8 million. During the six months ended June 30, 2015, CUI Global had a consolidated net loss of \$4.6 million. The consolidated net loss for the six months ended was primarily the result of increased selling, general and administrative expenses related to the opening of the Orbital Gas Systems, North America facility in January 2015 and the addition of CUI Canada, Inc. in March 2015 as well as the ongoing amortization of intangible assets related to the Orbital Gas Systems Limited acquisition and CUI Canada acquisition.

CUI, Inc., CUI-Canada, Inc. and CUI Japan – Subsidiaries

CUI, Inc., CUI-Canada, Inc. and CUI Japan are providers of electronic components including power supplies, transformers, converters, connectors and industrial controls for Original Equipment Manufacturers (OEMs) and make up the power and electro-mechanical segment of CUI Global. Since its inception in 1989, CUI has been delivering quality products, extensive application solutions and superior customer service. CUI's solid customer commitment and honest corporate message are a hallmark in the industry.

Through CUI's capabilities and extensive contacts throughout Asia, CUI Global is able to continue to identify, acquire and commercialize new proprietary technologies. CUI Global will use CUI's market partners and global distribution capabilities to bring other products to market, including the Novum Digital Power Modules, Solus Power Topology, and other proprietary devices, described below. CUI's testing and R&D capabilities allow CUI Global to commercialize and prototype its products more efficiently and economically.

CUI's power and electro-mechanical segment defines its product offering into two categories: **components** including connectors, speakers, buzzers, test and measurement devices, and control solutions including encoders and sensors; and **power solutions** which include Novum and Solus. These offerings provide a technology architecture that

addresses power and related accessories to industries as broadly ranging as consumer electronics, medical and defense.

Power Solutions

Our current power line consists of external and embedded ac-dc power supplies, dc-dc converters and basic digital point of load modules. This dynamic, broadly applicable product line accounts for a significant portion of our current revenue and recent revenue growth.

Digital Power Patent License Agreement with Power-One

The company entered into a non-exclusive Field of Use Agreement with Power-One (a Bel Fuse company), to license Power-One's Digital Power Technology patents. The license provides access to Power-One's portfolio of Digital Power Technology patents for incorporation into the company's new line of digital point of load power modules. The company, through its power division, also manufactures a wide range of embedded and external power electronics devices for OEM manufacturers.

Novum[®] Advanced Power

We have developed the first fully featured digital point of load dc-dc converter in the power market under our Novum Advanced Power line of products. This product is a next generation product targeted at the intermediate bus power architecture that is prolifically used in the telecom and networking communications market. In September of 2010 we released full production versions of two point of load modules. We were finalists for the prestigious Golden Mousetrap Award and EDN Innovation Award for these parts in 2010. With the shift towards smarter, smaller, and more energy efficient power requirements, our engineers are seeking innovative solutions that allow them to keep pace with lower core voltages, faster transient response needs and increasing thermal issues that they face in their designs. Our recently introduced Novum NDM2 modules, with a full suite of digital features, specifically address these growing system complexities through intelligent power management. The NDM2 series is the first to be designed by the company as part of the Ericsson cooperation announced in July 2011. The agreement formalizes a plan between the two companies to offer a multisource digital POL platform based on the Ericsson BMR46X series, with future plans to co-develop modules outside the existing range of 10~50A. We have also developed a middle ground product to ease the customer base into the benefits of digital in power. We developed a "smart module" that allows for the benefits of digital in the design cycle but when installed functions like a highly optimized analog unit.

Solus[®] Topology License with California Power Research

The company entered into an exclusive Field of Use Agreement with California Power Research to license their BPS-5 topology, now marketed as the Solus Topology. This topology provides industry leading efficiencies and densities in power design. The topology is broadly applicable to both DC-DC and AC-DC products. This will allow for the company to have a long roadmap of industry leading products to service its broad customer base. In addition, its first target is the Intermediate Bus Architecture (IBA) where the Digital POL modules are used.

Solus[®] Power Topology

Through the Solus Topology, we have a proprietary patented power topology for designing unique power circuits. This topology allows for higher efficiencies, densities, response time, and price competitiveness that is otherwise unavailable. Our initial product designed using this topology is in the quarter brick dc-dc converter market. Solus is an entirely new topology, rich in features that accelerate the performance trend trajectories for the big four power conversion needs in the telecom and server markets: greater efficiency; higher power density; reduced EMI (electro-magnetic interference); and faster transient response four times as fast. We have introduced the NQB2060 Novum[®] one quarter brick bus converter as a prime example of the benchmark 720 watts output power performance

using the Solus Topology. Since the Solus Topology maintains its effectiveness independent of the control method used, it can operate with analog voltage mode control, analog current mode control, and various digital control profiles. We believe that unique feature opens the door for the company to implement this topology in a wide variety of power supply product platforms. We also believe that this topology will allow for at least a decade of new product designs and introductions.

As the large scale networking and telecommunications companies convert to digital power, our early entry into the market, our unique Solus Topology, and our relationship with Ericsson should enhance our ability to penetrate this (according to the Darnell Group) multi-billion dollar market.

Components

AMT[®] Encoder

The company has an exclusive agreement to develop, sell and distribute the AMT encoder worldwide. The AMT series modular encoder is designed with proprietary, capacitive, code-generating technology as opposed to optical or magnetic encoding. This unique device allows breakthroughs in selectable resolution, shaft-adaptation and convenient mounting solutions to bring ease of installation, reduction in SKU's and economies of scale in purchasing.

The AMT amounts to almost 2,000 different encoders in one package. The company is selling and distributing the AMT through various customers. Moreover, the product is being marketed by multiple DC motor manufacturers. The AMT has been awarded several design wins from Motion Control OEM's producing a wide range of products from cash machines to robotics.

ISO 9001:2008 Certification

CUI, Inc. is certified to the ISO 9001:2008 Quality Management Systems standards and guidelines. CUI is registered as conforming to the requirements of standard: ISO 9001:2008, The Quality Management System is applicable to Design, Development and Distribution of electro- mechanical components for OEM manufacturing. ISO 9001 is accepted worldwide as the inclusive international standard that defines quality.

The certification of compliance with ISO 9001:2008 recognizes that our policies, practices and procedures ensure consistent quality in the design services, technology and products we provide our customers.

Orbital Gas Systems, Ltd. and Orbital Gas Systems, North America - Subsidiaries

Orbital Gas Systems Limited and Orbital Gas Systems, North America provide natural gas infrastructure and high-tech solutions to the natural gas markets. Since its inception in 1984, Orbital Gas Systems Limited has operated

successfully in the natural gas industry and is the largest natural gas systems integrator in the United Kingdom. Orbital Gas Systems, North America was opened in January 2015 to extend the reach of the CUI Global gas segment further to North America with a physical presence located in Houston, Texas. Orbital has developed its portfolio of products, services and resources to offer a diverse range of personalized gas engineering solutions to the gas utilities, power generation, emissions, manufacturing and automotive industries.

CUI Global Inc. and its wholly owned subsidiary Orbital Gas Systems Ltd. have been named as partners in the GE Intelligent Platforms natural gas/energy primary market and electro-mechanical-intelligent power applications secondary market.

GE Intelligent Platforms forms alliances with industry-leading systems integrators who have proven skill sets and complementary technology application expertise, following technical, operational and quality evaluations. The rigorous audit process includes an assessment of customer references and knowledge of automation system design and optimization as well as system configuring and commissioning capabilities. The program also examines a systems integrator's ability to maximize an installed base of automation assets by applying state-of-the-art technologies to enhance functionality for greater return.

GasPT2

Through an exclusive licensing contract with GL Industrial Services UK, Ltd. (GL), formerly British-based Advantica, Ltd., CUI Global owns exclusive rights to manufacture, sell and distribute a Gas Quality Inferential Measurement Device (GasPT2) designed by GL on a worldwide basis, now marketed as the GasPT2. The Company has minimum commitments under this licensing contract.

The natural gas inferential metering device, the GasPT2, is a low cost solution to measuring natural gas quality. It can be connected to a natural gas system to provide a fast, accurate, close to real time measurement of the physical properties, such as thermal conductivity, speed of sound and carbon dioxide content. From these measurements it infers an effective gas mixture comprising four components: methane, propane, nitrogen, and measured carbon dioxide and then uses ISO6976 to calculate the gas quality characteristics of calorific value (CV), Wobbe index (WI), relative density (RD), and compression factor (Z). An ISO, International Organization for Standardization, is a documented agreement containing technical specifications or other precise criteria to be used consistently as rules, guidelines or definitions of characteristics to ensure that materials, products, processes and services are fit for their purpose.

This new and innovative technology has been certified for use in fiscal monitoring by Ofgem in the United Kingdom, the Polish Oil & Gas Company Department of Testing and Calibration in Warsaw, NOVA Chemical/TransCanada in Canada, the Pipeline Research Counsel International (PRCI) in the US and SNAM RETE in Italy. At present, there is no equivalent product competition. There are instruments like gas chromatographs (“GC”), but they are slow, complicated to use and as much as five times the price of the GasPT2.

By way of example, in the case of SNAM RETE, the Italian gas transmission company, there are 13 natural gas injection points for the SNAM RETE system. Those injection points will continue to use GC’s for monitoring. On the other hand, there are 2,500 customer access points, servicing 7,500 customers. Those would include city gates, large industrial users, power generation plants and others. All of those customer access ports would be applicable for the GasPT2 Technology.

In addition, there are currently 50,000 gas-fired turbines in operation worldwide. Each of those turbines is subject to variances in natural gas quality. Depending on the quality of the gas, by using our GasPTi Technology, those very expensive machines can be tuned to run more efficiently and therefore longer with much cleaner emissions. Currently, because of the delay in information from the GC’s, such tuning cannot be effectively accomplished. It is this greater efficiency that has lead National Grid in the UK to change its entire turbine control strategy, recently cancelling an order for several GC’s and, in October 2013, replacing those GC’s with an order for eight (8) GasPTi devices specifically designed for natural gas-fired turbine control.

In conjunction with the 2013 Orbital acquisition, we have moved the entire GasPT2 technology portfolio, along with the VE-Probe, into Orbital's product division, Orbital Global Solutions. Orbital-GS has successfully introduced the combined GasPT2 unit and VE Probe to National Grid, the largest natural gas provider in the UK. In addition, along with passing first phase testing by GE-Energy in October/November 2012, the GasPTi device has now successfully undergone second phase testing with GE-Energy in October 2013.

In January 2012 the company entered into a five (5) year, exclusive distribution agreement for our GasPT2 technology with an Italian company, SOCRATE s.p.a. for sales, marketing, distribution and service of our GasPT2 gas metering device for Italy and North Africa, including Libya and Tunisia. SOCRATE is the “vendor-of-choice” for SNAM RETE GAS (“SRG”) and was referred to the company by SRG. SOCRATE continues to be involved in negotiations with SRG relative to both the 2010 Technical Upgrade of Metering Facilities and 2011/2012 New Capacity and Implementation Plan. In conjunction with those two initiatives, SRG transmission system has concluded 11 months of in-field testing with six (6) GasPTi units. Additionally, Orbital has received fiscal certification from the highly respected European certification company, NMI-Certin.

Following the acquisition of Orbital and the transfer of gas operations to Orbital-GS, the company has entered into a series of thirty-eight (38) Distribution Agreements with internationally recognized entities in the natural gas industry. These agreements are designed to supplement and enhance our previously announced and continuing agreements with EMC, MGlobal, BWG/Blue Flame and SOCRATE.

VE-Probe and VE-Technology

Orbital Gas Systems, Ltd. has exclusive worldwide rights to manufacture, sell, design, and otherwise market the VE-Probe and VE-Technology from its United Kingdom-based inventor, EnDet Ltd. The agreement gives Orbital exclusive and sole control of all technology related to its revolutionary GasPT2 and GasPTi natural gas metering systems. The GasPT2 technology provides fast and accurate measurement of the physical properties of the natural gas mixture. By combining the GasPT2 technology with the equally unique VE-Probe, which is able to provide a gas sample from a high pressure transmission line in less than two seconds, Orbital has created the GasPTi metering system.

The GasPTi system is able to accurately provide almost real-time data to the natural gas operator in a total cycle-time of less than five seconds. Moreover, it provides this real-time analysis at approximately one-fifth of the installation cost of current technology with none of the associated maintenance, carrier gas, calibration gas, or other ancillary costs associated with traditional technology.

This VE-Technology acquisition gives us the ability to control and produce the entire Bill of Materials for our GasPTi systems, thus allowing us to capture a far larger margin as we provide this unique metering solution to the natural gas industry. Additionally, we can now also manufacture, market and sell additional applications for the VE-Technology, including sampling systems separate from the GasPT2 and Thermowells found throughout all pipeline systems.

Intellectual Property

The Company relies on various intellectual property laws and contractual restrictions to protect its proprietary rights in products, logos and services. These include confidentiality, invention assignment and nondisclosure agreements with employees, contractors, suppliers and strategic partners. The confidentiality and nondisclosure agreements with employees, contractors and suppliers are in perpetuity or for a sufficient length of time so as to not threaten exposure of proprietary information.

CUI Global continues to file and protect its intellectual property rights, trademarks and products through filings with the US Patent and Trademark Office and, as applicable, internationally. The company also ensures, through specific provisions and agreements, that all licensed technology is fully patent-protected in the US and internationally by the Licensor, where applicable.

The Company estimates the patent applications it has filed will have a future beneficial value to the Company; thus, it capitalizes the costs associated with filing for its patents. At the time the patent is issued, the patent costs associated with the patent are amortized over the useful life of the patent. If the patent is not issued, at that time the costs will be expensed. A change in the estimate of the patent having a future beneficial value to the Company will impact the other assets and expense accounts of the Company.

Results of Operations

Revenue

During the six months ended June 30, 2015 and 2014, revenue was \$39,825,317 and \$36,114,102, respectively. The revenue for the six months ended June 30, 2015 is comprised of \$27.3 million from the power and electro-mechanical segment and \$12.5 million from the gas segment operations. The revenue for the six months ended June 30, 2014 is comprised of \$24.4 million from the power and electro-mechanical segment and \$11.7 million from the gas segment operations.

During the three months ended June 30, 2015 and 2014, revenue was \$22,972,197 and \$19,214,193, respectively. The revenue for the second quarter ended June 30, 2015 is comprised of \$16.7 million from the power and electro-mechanical segment and \$6.3 million from the gas segment operations. The revenue for the second quarter ended June 30, 2014 is comprised of \$13.6 million from the power and electromechanical segment and \$5.6 million from the gas segment operations.

The revenues for the three and six months ended June 30, 2015 are attributable to continued sales and marketing efforts, sales through the distribution channel customers, and the addition in March 2015 of CUI Canada related product line, and the revenues generated since the January 2015 opening of Orbital Gas Systems, North America.

The customer orders related to the power and electro-mechanical segment are associated with the existing product offering, continued new product introductions, continued sales and marketing programs, new customer engagements, the addition of a third distribution channel, and the addition in March 2015 of the products from CUI Canada.

The power and electro-mechanical segment held a backlog of customer orders of approximately \$23.7 million as of June 30, 2015. At June 30, 2015, the gas segment held a backlog of customer orders of approximately \$17.2 million.

Cost of revenues

For the six months ended June 30, 2015 and 2014, the cost of revenues was \$25,282,102 and \$21,412,512, respectively. For the three months ended June 30, 2015 and 2014, the cost of revenues was \$14,662,027 and \$11,506,825 respectively.

The cost of revenues as a percentage of revenue for the six months ended June 30, 2015 increased to 63% from 59% during the prior year comparative period. For the three months ended June 30, 2015, the cost of revenues as a percentage of revenue increased to 64% from 60% during the prior year comparative period. This percentage will vary based upon the product mix sold during the period, the mix of natural gas systems sold during the period, contract labor necessary to complete gas related projects, and is also dependent upon the competitive markets in which the Company competes as well as foreign exchange rates.

The cost of revenues as a percentage of revenue for the power and electro-mechanical segment for the three and six months periods ended June 30, 2015 was 63%. The cost of revenues as a percentage of revenue for the gas segment for the three and six months ended June 30, 2015 was 66% and 65%, respectively.

Selling, General and Administrative Expenses

Selling, General and Administrative (SG&A) expenses include such items as wages, commissions, consulting, general office expenses, business promotion expenses and costs of being a public company, including legal and accounting fees, insurance and investor relations.

For the six months ended June 30, 2015 compared to the same period in 2014, SG&A expenses increased \$4.0 million. The increase during the six months ended June 30, 2015 is primarily associated with the addition of the SG&A activities of Orbital Gas Systems, North America which opened in January 2015 and accounted for approximately \$2.4 million of additional SG&A. In addition, the operations related to CUI Canada, which was acquired in March 2015, accounted for approximately \$0.5 million of the increase in SG&A during the period. The remaining increases in SG&A are associated with the ongoing activities to reach new customers, promote new product lines including Novum, Solus, GasPT, IRIS and VE-Probe, and new product introductions. As a percentage of total revenue, SG&A increased during the six month period ended June 30, 2015 to 42% from 35% during the prior year comparable period.

During the three months ended June 30, 2015, SG&A increased \$1.4 million as compared to the prior year comparative period. This increase is associated with the activities of Orbital Gas Systems, North America which opened in January 2015 and accounted for approximately \$0.7 million of additional SG&A. In addition, the operations related to CUI Canada, which was acquired in March 2015, accounted for approximately \$0.4 million of the increase in SG&A during the three months ended June 30, 2015. The remaining increases in SG&A during the three months ended June 30, 2015 are associated with the ongoing activities to reach new customers, promote new product lines including Novum, Solus, GasPT, IRIS and VE-Probe, and new product introductions. As a percentage of total revenue, SG&A during the three month period ended June 30, 2015 increased to 35% from 34% during the prior year comparable period.

The Company expects the SG&A as a percentage of revenues will improve during the remainder of 2015 as Orbital Gas Systems, North America continues to contribute revenues along with the introduction of products acquired with CUI Canada into the power and electro-mechanical sales channels.

Depreciation and Amortization

The depreciation and amortization expenses are associated with the depreciated buildings, furniture, equipment, vehicles, and intangible assets over the estimated useful lives of the related assets.

During the six months ended June 30, 2015 and 2014, the total depreciation and amortization expenses were \$1.8 million and \$2.3 million, respectively. The total depreciation and amortization expenses for the six months ended June 30, 2015 and 2014 include \$110 thousand and \$127 thousand, respectively, which are included in cost of revenues.

During the three months ended June 30, 2015 and 2014, the total depreciation and amortization expenses were \$0.7 million and \$1.1 million, respectively. The total depreciation and amortization for the three months ended June 30, 2015 and 2014 include \$55 thousand and \$61 thousand, respectively, which are included in cost of revenues.

Depreciation and amortization has decreased between the three and six month comparable periods as the intangible asset associated with the order backlog acquired with Orbital Gas Systems Limited was fully amortized during the first quarter of 2015.

Research and Development

The research and development costs are related to the development of technology and products. Research and development costs were \$896 thousand and \$599 thousand for the six months ended June 30, 2015 and 2014, respectively. For the three months ended June 30, 2015 and 2014, the Company recorded research and development costs of \$486 and \$329 thousand, respectively.

Research and development costs are associated with the continued research and development of new and existing technologies including the Novum advanced power technologies, GasPT2, and other products.

Bad Debt

Bad debt expense during the six months ended June 30, 2015 were \$137 thousand as compared to a benefit during the prior year comparable period of \$78 thousand. For the three months ended June 30, 2015, bad debt expense was \$54 thousand as compared to \$30 thousand during the prior year comparable period.

The current year expense is associated with miscellaneous customer receivables which the Company has either recorded an allowance for doubtful collections of the receivable or for which CUI Global has determined the balance to be uncollectible and increased the bad debt reserve.

Other Income and Expense

Other income and expense for the six months ended June 30, 2015 consisted primarily of \$82 thousand of foreign exchange gain, \$32 thousand of interest income, \$12 thousand of rental income and \$6 thousand recovery of bad debt. Other income for the six months ended June 30, 2014 consisted primarily of \$68 thousand of interest income, \$12 thousand of rental income, and \$5 thousand of gain on foreign exchange.

Other income for the three months ended June 30, 2015 consisted primarily of \$164 thousand of foreign exchange gain, \$7 thousand of interest income, and \$6 thousand of rental income. Other income for the three months ended June 30, 2014 consisted primarily of \$35 thousand of interest income, \$6 thousand of rental income, and \$37 thousand of loss on foreign exchange.

Investment Income

The Company recognized earnings of \$24 thousand on equity investment in affiliate for the six months ended June 30, 2015 as compared to earnings of \$42 thousand during the same period in 2014.

For the three months ended June 30, 2015 the Company recognized earnings of \$10 thousand on equity investment in affiliate as compared to earnings of \$27 thousand during the same period in 2014.

Interest Expense

The company incurred interest expense, net of amounts capitalized, of \$209 thousand and \$253 thousand for the six months ended June 30, 2015 and 2014, respectively. For the three months ended June 30, 2015 and 2014, the Company incurred interest expense, net of amounts capitalized, of \$96 thousand and \$128 thousand, respectively.

Interest expense in 2015 and 2014 is associated with interest on bank and secured promissory notes.

Provision (benefit) for taxes

The Company is subject to taxation in the U.S., various state and foreign jurisdictions. We continue to record a full valuation allowance against our U.S. and certain foreign net deferred tax assets as it is not more likely than not that we will realize a benefit from these assets in a future period. In future periods, tax benefits and related deferred tax assets will be recognized when management concludes realization of such amounts is more likely than not.

A net benefit of \$233 thousand was recorded to the income tax provision for the six month period ended June 30, 2015 resulting in an effective tax rate of 4.84% for the period. The income tax benefit relates primarily to deferred taxes at our foreign operations where the benefit can be realized, partially offset by domestic state minimum taxes as all of our other USA and certain foreign tax benefits are reduced by a full valuation allowance. Our total income tax benefit and effective tax rate were \$360 thousand and 39.34%, respectively, for the same period in 2014.

A net benefit of \$114 thousand was recorded to the income tax provision for the three month period ended June 30, 2015 resulting in an effective tax rate of 18.47% for the period. The income tax benefit for the quarter relates primarily to deferred taxes at our foreign operations where the benefit can be realized, partially offset by domestic state minimum taxes as all of our other USA and certain foreign tax benefits are reduced by a full valuation allowance. Our total income tax benefit and effective tax rate were \$331 thousand and 83.29%, respectively, for the same period in 2014.

Liquidity and Capital Resources

General

As of June 30, 2015, CUI Global held Cash and cash equivalents of \$5.2 million and investments of \$4.0 million. Operations, acquisitions, investments, patents, equipment, land and buildings have been funded through cash on hand.

Cash Used In Operations

Negative cash flow from operations of \$6.9 million was significantly effected by operating requirements from Orbital Gas Systems North America and CUI Canada during the six months ended June 30, 2015, versus positive cash flow from operations of \$49 thousand for the same period 2014. The change in cash used in operations is primarily the result of the net loss for the six months ended June 30, 2015 before non-cash expenses as well as changes in assets and liabilities.

Significant factors that impacted the cash used in operations include the increased receivables of approximately \$4.7 million associated primarily with the increased sales generated following the opening of Orbital Gas Systems North America and the acquisition of CUI Canada coupled with the timing of deliveries and related sales terms. Inventory increased approximately \$2.1 million associated with timing of customer orders and ongoing projects. Additionally, the cash flow from operations was impacted by an approximately \$1.5 million increase in prepaid expenses and other current assets associated largely with prepaid insurance premiums, product purchases, royalties and consulting services fees. Accounts payable increased approximately \$1.7 million primarily due to the timing of goods receipts and the related terms. Accrued expenses increased \$0.4 million related primarily to increased accrued compensation. Unearned revenue increased \$1.6 million primarily in relation to increases in deferred revenue from distributor activity within the power and electro-mechanical segment. Billings in excess of costs decreased \$0.1 million during the period related gas segment projects.

During the first six months of 2015 and 2014, the Company used stock and options as a form of payment to certain vendors, consultants and employees. For the six months ended June 30, 2015 and 2014, the Company recorded a total of \$0.5 million in both periods for compensation and services expense including amortization of deferred compensation related to equity given, or to be given, to employees and consultants for services provided and as payment for royalties earned.

As the Company focuses on technology development, product line additions, integrating CUI Canada operations, and developing Orbital Gas Systems, North America during 2015, it will continue to fund research and development together with related sales and marketing efforts for its various product offerings with cash on hand and cash flows from continuing operations.

Capital Expenditures and Investments

During the first six months of 2015 and 2014, CUI Global invested \$2.5 million and \$0.5 million, respectively, in fixed assets. These investments typically include additions to equipment, tooling for manufacturing, furniture, regular computer equipment, buildings and leasehold improvements and other fixed assets as needed for operations. The Company anticipates further investment in fixed assets during 2015 in support of its on-going business and continued development of product lines and technologies, including the completion of the manufacturing building at Orbital.

During the six months ended June 30, 2015, CUI Global received \$139 thousand from a government grant to be allocated toward the construction of the manufacturing building at Orbital.

During the six months ended June 30, 2015 and 2014, CUI Global invested \$79 thousand and \$10 thousand in other intangible assets. These investments typically include capitalized website development, software for engineering and research and development and software upgrades for office personnel.

During the six months ended June 30, 2015 the Company invested \$0 in short term investments classified as held to maturity and received \$7.2 million from maturities of these investments. During the six months ended June 30, 2014, the Company invested \$6.3 million in short term investments classified as held to maturity and received \$5.2 million from maturities of these investments. These investments included money market securities, certificates of deposit, commercial paper and corporate notes. Investments made by the Company are subject to an investment policy which limits our risk of loss exposure by setting appropriate credit quality requirements for investments held, limiting maturities to be 1 year or less, and also setting appropriate concentration levels to prevent concentrations. This includes a requirement that no more than 3% of the portfolio, or \$500,000, whichever is greater, may be invested in one particular issue.

Effective March 1, 2015, CUI Global closed on an Asset Purchase Agreement to acquire certain assets of Tectrol, Inc., a Toronto, Canada corporation. As a part of this acquisition strategy, CUI Global, Inc. formed a wholly owned Canadian corporate subsidiary, CUI-Canada, Inc., to receive these acquired assets. The purchase price for the acquisition of the assets was five million two hundred thousand dollars (\$5,200,000), subject to good faith adjustments by the Parties according to the final value of the non-obsolete inventory conveyed and other closing adjustments. In addition, the agreement calls for an earn-out/royalty payment of two percent (2%) of the gross sales (for specific, identified customers) over a period of three (3) years from the closing date, up to a maximum of \$300,000, that may or may not be paid to the Seller within 90 days of each calendar year end, depending on performance by the identified customer(s). The final adjusted purchase price for the acquisition of Tectrol was \$4,500,945, which includes the present value of \$300,000 of royalties to be paid on future sales, which was recorded as \$215,500 of contingent consideration. The full purchase price less the present value of royalties to be paid on future sales totaling \$4,285,445 was paid in cash. We funded the consideration paid to the shareholder of Tectrol with existing cash and cash equivalents and funds from short term investments that had matured. The acquisition was accounted for using the acquisition method of accounting and the purchase price was allocated to the assets acquired and liability assumed based upon their estimated fair values at the date of acquisition.

Financing Activities

For the six months ended June 30, 2015 and 2014, the Company made payments of \$19 thousand and \$71 thousand, respectively, toward capital lease obligations and \$40 thousand and \$38 thousand, respectively, toward the mortgage note payable.

CUI Global may raise additional capital needed to fund the further development and marketing of its products as well as payment of its debt obligations.

Financing activities – related party activity

For the six months ended June 30, 2015 and 2014, \$133 thousand of interest payments were made in relation to the promissory notes issued to related party, IED, Inc.

Recap of Liquidity and Capital Resources

The Wells Fargo mortgage promissory note has a balance at June 30, 2015 of \$3,564,210 due, of which \$82,792 is the current portion. As of the date of this filing, the Company is compliant with all covenants on the promissory note with Wells Fargo Bank. Additionally, at June 30, 2015, the Company had a zero balance on its \$4 million two year revolving Line of Credit (LOC) with Wells Fargo Bank. As of the date of this filing, the Company is compliant with all covenants on the line of credit with Wells Fargo Bank.

At June 30, 2015, the Company had cash and cash equivalents balances of \$5.2 million and short term investments held to maturity of \$4.0 million. At June 30, 2015, the Company had \$819 thousand of cash and cash equivalents balances at domestic financial institutions which were covered under the FDIC insured deposits programs and \$215 thousand at foreign financial institutions covered under the United Kingdom Financial Services Compensation (FSC) and the Canada Deposit Insurance Corporation (CDIC). The money market balance of \$1.4 million is covered up to \$500 thousand under the SIPC insured program for investments. At June 30, 2015 the Company had cash and cash equivalents of \$258 thousand in Japanese bank accounts, \$656 thousand in European bank accounts and \$320 thousand in Canadian bank accounts. At June 30, 2015, CUI Global had \$4.0 million of short-term investments classified as held-to-maturity, reported at amortized cost, which approximates market. At June 30, 2015, the \$4.0 million of short-term investments were in certificates of deposit which were covered under FDIC insured limits and covered under the \$500 thousand SIPC insured programs for investments.

At June 30, 2015, the Company has capital lease obligations of \$89 thousand, of which \$27 thousand are current obligations.

The Company believes its operations and existing financing structure, including cash and cash equivalents and short-term investments will provide sufficient cash to meet its short-term working capital requirements for the next twelve months. The Company believes the operating requirements necessary to further support Orbital Gas Systems, North America and CUI Canada will be reduced as compared with the first half of 2015.

Critical Accounting Policies

Our financial statements and related public financial information are based on the application of accounting principles generally accepted in the United States (“GAAP”). GAAP requires the use of estimates; assumptions, judgments and subjective interpretations of accounting principles that have an impact on the assets, liabilities, revenue and expense amounts reported. Significant estimates include estimates used to review the Company’s goodwill, impairment and estimations of long-lived assets impairment, revenue recognition on percentage of completion type contracts, allowances for uncollectible accounts, inventory valuation, warranty reserves, valuation of non-cash capital stock issuances and the valuation allowance on deferred tax assets. These estimates can also affect supplemental information contained in our external disclosures including information regarding contingencies, risk and financial condition. We believe our use of estimates and underlying accounting assumptions adhere to GAAP and are consistently and conservatively applied. The Company bases its estimates on historical experience and on various other assumptions that are believed to be reasonable in the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ materially from these estimates under different assumptions or conditions. We continue to monitor significant estimates made during the preparation of our financial statements.

While all of our significant accounting policies impact our financial condition and results of operations, we view the following policies as critical:

- short and long term investments
- accounts receivable and cost in excess of billings
- inventory
- identifiable intangibles and goodwill
- derivative liability
- percentage of completion
- revenue recognition
- stock based compensation
- foreign currency translation

- income taxes

Policies determined to be critical are those policies that have the most significant impact on our financial statements and require management to use a greater degree of judgment and estimates. Actual results may differ from those estimates. Our management believes that given current facts and circumstances, it is unlikely that applying any other reasonable judgments or estimate methodologies would cause effect on our results of operations, financial position or liquidity for the periods presented in this report.

Recent Accounting Pronouncements

In May 2014, the FASB issued Accounting Standards Update No. 2014-09, “Revenue *from Contracts with Customers*” (ASU 2014-09), which supersedes nearly all existing revenue recognition guidance under U.S. GAAP. The core principle of ASU 2014-09 is to recognize revenues when promised goods or services are transferred to customers in an amount that reflects the consideration to which an entity expects to be entitled for those goods or services. ASU 2014-09 defines a five step process to achieve this core principle and, in doing so, more judgment and estimates may be required within the revenue recognition process than are required under existing U.S. GAAP. The standard was effective for annual periods beginning after December 15, 2016, and interim periods therein, using either of the following transition methods: (i) a full retrospective approach reflecting the application of the standard in each prior reporting period with the option to elect certain practical expedients, or (ii) a retrospective approach with the cumulative effect of initially adopting ASU 2014-09 recognized at the date of adoption (which includes additional footnote disclosures). On July 9, 2015, the FASB affirmed its proposal to defer the effective date of the new revenue standard for public entities by one year to annual reporting periods beginning after December 31, 2017, and interim periods beginning in the first interim period within the year of adoption. Early application would be permitted, but not before the original effective date for public entities, annual reporting periods after December 15, 2016, and interim periods beginning in the first interim period within the year of adoption. We are currently evaluating the impact of our pending adoption of ASU 2014-09 on our consolidated financial statements and have not yet determined the method by which we will adopt the standard in 2017.

In June 2014, the FASB issued Accounting Standards Update No. 2014-12, “*Compensation – Stock Compensation (Topic 718) – Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period*” (ASU 2014-12). The amendments in ASU 2014-12 require that a performance target that affects vesting and that could be achieved after the requisite service period be treated as a performance condition. A reporting entity should apply existing guidance in Topic 718, Compensation – Stock Compensation, as it relates to awards with performance conditions that affect vesting to account for such awards. The performance target should not be reflected in estimating the grant-date fair value of the award. Compensation cost should be recognized in the period in which it becomes probable that the performance target will be achieved and should represent the compensation cost attributable to the period(s) for which the requisite service has already been rendered. If the performance target becomes probable of being achieved before the end of the requisite service period, the remaining unrecognized compensation cost should be recognized prospectively over the remaining requisite service period. The total amount of compensation cost recognized during and after the requisite service period should reflect the number of awards that are expected to vest and should be adjusted to reflect those awards that ultimately vest. The requisite service period ends when the employee can cease rendering service and still be eligible to vest in the award if the performance target is achieved. The standard is effective for annual periods and interim period within those annual periods beginning after December 15, 2015, early adoption is permitted. The adoption of this provision is not expected to have an impact on the Company’s financial condition or results of operations.

In January 2015, the FASB issued Accounting Standards Update No. 2015-01, “*Income Statement – Extraordinary and Unusual Items (Subtopic 225-20) - Simplifying Income Statement Presentation by Eliminating the Concept of Extraordinary Items*” (ASU 2015-01). ASU 2015-01 eliminates from U.S. GAAP the concept of extraordinary items. The amendments in this update are effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. The adoption of this provision is not expected to have an impact on the Company’s financial condition or results of operations.

Off-Balance Sheet Arrangements

As of June 30, 2015, the Company had no off-balance sheet arrangements.

Item 3. Quantitative and Qualitative Disclosure about Market Risk

We are exposed to market risk in the ordinary course of our business. Market risk represents the risk of loss that may impact our financial position due to adverse changes in financial market prices and rates. This market risk exposure is primarily a result of fluctuations in foreign currency exchange rates and interest rates. The Company neither holds nor issues financial instruments for trading purposes.

The following sections provide quantitative information on the Company's exposure to foreign currency exchange rate risk and stock price risk. The Company makes use of sensitivity analyses that are inherently limited in estimating actual losses in fair value that can occur from changes in market conditions.

Foreign Currency Exchange Rates

The Company conducts operations in four principal currencies: the U.S. dollar, the British pound sterling, the Canadian dollar and the Japanese yen. These currencies operate primarily as the functional currency for the Company's U.S., U.K., Canadian and Japanese operations, respectively. Cash is managed centrally within each of the four regions.

Because of fluctuations in currency exchange rates, the Company is subject to currency translation exposure on the results of its operations. Foreign currency translation risk is the risk that exchange rate gains or losses arise from translating foreign entities' statements of earnings and balance sheets from functional currency to the Company's reporting currency, the U.S. dollar, for consolidation purposes. As currency exchange rates fluctuate, translation of our Statements of Operations into U.S. dollars affects the comparability of revenues and operating expenses between years.

Revenues and operating expenses are primarily denominated in the currencies of the countries in which our operations are located, the U.S., U.K., Canada and Japan. Our consolidated results of operations and cash flows are, therefore, subject to fluctuations due to changes in foreign currency exchange rates and may be adversely affected in the future due to changes in foreign exchange rates.

The table below details the percentage of revenues and expenses by the four principal currencies for the three and six months ended June 30, 2015 and 2014:

Edgar Filing: CUI Global, Inc. - Form 10-Q

	U.S. Dollars		British Pound Sterling		Canadian Dollar (1)		Japanese Yen	
Six months ended June 30, 2015								
Revenues	68	%	29	%	2	%	1	%
Operating expenses	61	%	28	%	10	%	1	%
Six months ended June 30, 2014								
Revenues	66	%	32	%	0	%	2	%
Operating expenses	62	%	38	%	0	%	0	%
Three months ended June 30, 2015								
Revenues	75	%	24	%	0	%	1	%
Operating expenses	59	%	25	%	15	%	1	%
Three months ended June 30, 2014								
Revenues	69	%	29	%	0	%	2	%
Operating expenses	62	%	38	%	0	%	0	%

(1) On March 5, 2015, we closed on an asset purchase agreement to acquire the assets of Tectrol, Inc. which was effective March 1, 2015.

To date, we have not entered into any hedging arrangements with respect to foreign currency risk and have limited activity with forward foreign currency contracts or other similar derivative instruments. The Company believes that during the three months ended June 30, 2015, the effect of a hypothetical 100 basis point shift in foreign currency exchange rates applicable to our business would not have had a material impact on our consolidated financial statements.

Investment Risk

The Company has an Investment Policy that, *inter alia*, provides an internal control structure that takes into consideration safety (credit risk and interest rate risk), liquidity and yield. Our Investment officers, CEO and CFO, oversee the investment portfolio and compile a quarterly analysis of the investment portfolio.

Cash and cash equivalents are diversified and maintained with several financial institutions. Deposits held with banks may exceed the amount of insurance provided on such deposits. Generally, these deposits may be redeemed upon demand and are maintained with financial institutions of reputable credit, therefore, bear minimal credit risk.

The Company has trade receivable and revenues concentrations with large customers. Additionally, the Company has a large concentration of cash, trade receivables and revenues in foreign countries including the United Kingdom, Canada and Japan.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company's management, with the participation of the Company's Chief Executive Officer and its Chief Financial Officer, evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of the end of the period covered by this quarterly report. In designing and evaluating our disclosure controls and procedures, our management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and our management is required to apply their judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based upon that evaluation, the Company's management, including the CEO and the CFO, concluded that, as of June 30, 2015, the Company's disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed in the reports that the Company files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the applicable rules and forms, and that it is accumulated and communicated to management, including the CEO and CFO, as appropriate, to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

During the quarter ended June 30, 2015, there were no changes in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II – OTHER INFORMATION

Item 1. Legal Proceedings.

No director, officer or affiliate of CUI Global, Inc., any owner of record or beneficially of more than five percent of any class of voting securities of CUI Global, Inc. or any associate of any such director, officer, affiliate of CUI Global, Inc. or security holder is a party adverse to CUI Global, Inc. or any of its subsidiaries or has a material interest adverse to CUI Global, Inc. or any of its subsidiaries.

CUI Global, Inc. is party to a legal action and claim which, in the opinion of management, is not expected to have a material adverse effect on the Company's results of operations or financial position. The Company is a defendant in a lawsuit brought in the Ontario Superior Court of Justice in June 2015 by a former employee of Tectrol, Inc., the entity from which the Company acquired the assets and its Canadian facility.

The plaintiff was never an employee of the Company nor did the Company have any privity or other contractual relationship to the plaintiff. The company has retained outside local counsel and believes that there is no liability to this plaintiff. The Company intends to aggressively defend the matter, including the pursuit of its reasonable costs and fees, if appropriate.

Item 1A: Risk Factors.

There are no material changes from Risk Factors as previously disclosed in our Form 10-K filed with the Commission on March 16, 2015.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds. Common Stock Issued

During the three months ended June 30, 2015, the Company issued the following shares of common stock which were not registered under the Securities Act. The Company relied on Section 4(2) of the Securities Act of 1933 as the basis for an exemption from registration for the following issuances.

Edgar Filing: CUI Global, Inc. - Form 10-Q

During May 2015, 1,391 shares of fully vested restricted common stock were issued to an employee as an approved bonus. These shares were expensed at the grant date fair value of \$7,497.

During June 2015, 9,560 shares of fully vested restricted common stock were issued to an employee as an approved bonus. These shares were expensed at the grant date fair value of \$49,999.

Also During June 2015, one board member received 1,753 shares of fully vested restricted common stock. These shares were expensed at the grant date fair value of \$9,747.

Item 6. Exhibits

The following exhibits are included as part of this Form 10-Q.

Exhibit No.	Description
