The percentage shown for each investment category is the total value of the category as a percentage of the net assets of the fund unless otherwise indicated.

^All par values are denominated in U.S. dollars unless otherwise indicated.

Key to Security

Abbreviations and

Legend

- American
- ADR Depository Receipts Interest Only Security (Interest Tranche of Stripped Mortgage Pool).
- IO Rate shown is the effective yield at period end.
- International Swaps and Derivatives Association
- ISDAFIX Association
- Fixed Interest Rate Swap Rate
- London
- LIBOR Interbank Offered Rate
- PIK Payment-in-kind
- Includes hybrid securities with characteristics of
 - (a) both equity and debt that trade with and pay interest income.
 - (b) Includes preferred stocks

- and hybrid securities with characteristics of both equity and debt that pay dividends on a periodic basis.
- (H) Non-income producing - Issuer is in default.
- (I) Non-income producing security. A portion of this security is on loan as of 7-31-16, and is a component of the fund's
- (L) leverage under the Liquidity Agreement. The value of securities on loan amounted to \$29,358,029. Term loans are variable rate obligations. The coupon rate
- (M) shown represents the rate at period end. Variable rate obligation. The coupon rate
- (P) shown represents the rate at period end. Perpetual bonds have no stated maturity date.
- (Q) Date shown as maturity date is next call date.
- (S) These securities are exempt from registration

under Rule 144A of the Securities Act of 1933. Such securities may be resold, normally to qualified institutional buyers, in transactions exempt from registration.

Rule 144A securities amounted to \$78,723,483 or 43.2% of the fund's net assets as of 7-31-16.

All or a portion of this security is pledged as collateral pursuant to the

(Z) Liquidity Agreement. Total collateral value at 7-31-16 was

\$113,933,222.

Yield represents either the annualized yield at the date of purchase, the

* stated coupon rate or, for floating rate securities, the rate at period end.

At 7-31-16, the aggregate cost of investment securities for federal income tax purposes was

\$263,435,350.

The fund had the following country composition as a percentage of total investments on 7-31-16:

United States	87.7%
France	2.6%
United Kingdom	2.2%
Netherlands	1.8%
Luxembourg	1.2%
Canada	1.2%
Other countries	3.3%
TOTAL	100.0%

18SEE NOTES TO FUND'S INVESTMENTS

Notes to Fund's investments (unaudited)

Security valuation. Investments are stated at value as of the scheduled close of regular trading on the New York Stock Exchange (NYSE), normally at 4:00 p.m., Eastern Time. In case of emergency or other disruption resulting in the NYSE not opening for trading or the NYSE closing at a time other than the regularly scheduled close, the net asset value may be determined as of the regularly scheduled close of the NYSE pursuant to the fund's Valuation Policies and Procedures. The time at which shares and transactions are priced and until which orders are accepted may vary to the extent permitted by the Securities and Exchange Commission and applicable regulations.

In order to value the securities, the fund uses the following valuation techniques: Debt obligations are valued based on the evaluated prices provided by an independent pricing vendor or from broker-dealers. Independent pricing vendors utilize matrix pricing which takes into account factors such as institutional-size trading in similar groups of securities, yield, quality, coupon rate, maturity, type of issue, trading characteristics and other market data, as well as broker supplied prices. Equity securities held by the fund are valued at the last sale price or official closing price on the exchange or principal market where the security was acquired or most likely will be sold. In the event there were no sales during the day or closing prices are not available, the securities are valued using the last available bid price. Swaps are valued using evaluated prices obtained from an independent pricing vendor.

In certain instances, the Pricing Committee may determine to value equity securities using prices obtained from another exchange or market if trading on the exchange or market on which prices are typically obtained did not open for trading as scheduled, or if trading closed earlier than scheduled, and trading occurred as normal on another exchange or market.

Other portfolio securities and assets, for which reliable market quotations are not readily available, are valued at fair value as determined in good faith by the fund's Pricing Committee following procedures established by the Board of Trustees. The frequency with which these fair valuation procedures are used cannot be predicted and fair value of securities may differ significantly from the value that would have been used had a ready market for such securities existed.

The fund uses a three-tier hierarchy to prioritize the pricing assumptions, referred to as inputs, used in valuation techniques to measure fair value. Level 1 includes securities valued using quoted prices in active markets for identical securities. Level 2 includes securities valued using other significant observable inputs. Observable inputs may include quoted prices for similar securities, interest rates, prepayment speeds and credit risk. Prices for securities valued using these inputs are received from independent pricing vendors and brokers and are based on an evaluation of the inputs described. Level 3 includes securities valued using significant unobservable inputs when market prices are not readily available or reliable, including the fund's own assumptions in determining the fair value of investments. Factors used in determining value may include market or issuer specific events or trends, changes in interest rates and credit quality. The inputs or methodology used for valuing securities are not necessarily an indication of the risks associated with investing in those securities. Changes in valuation techniques and related inputs may result in transfers into or out of an assigned level within the disclosure hierarchy.

The following is a summary of the values by input classification of the fund's investments as of July 31, 2016, by major security category or type:

	Total value at 7-31-16	Level 1 quoted price	Level 2 significant observable inputs	Level 3 significant unobservable inputs
Corporate bonds	\$167,597,893		\$167,597,893	
Convertible bonds	279,850		279,850	

Term loans	726,861		726,861	
Capital preferred securities	2,272,406		2,272,406	
U.S. Government and Agency obligations	35,172,723		35,172,723	
Foreign government obligations	1,145,721		1,145,721	
Collateralized mortgage obligations	36,510,627		36,510,627	
Asset backed securities	20,361,557		20,361,557	
Common stocks	1,934,720	\$1,934,720		
Preferred securities	2,163,474	1,602,536	560,938	
Escrow certificates	153			\$153
Short-term investments	3,120,000		3,120,000	
Total investments in securities	\$271,285,985	\$3,537,256	\$267,748,576	\$153
Other financial instruments:				
Interest rate swaps	(\$191,902)		(\$191,902)	

Repurchase agreements. The fund may enter into repurchase agreements. When the fund enters into a repurchase agreement, it receives collateral that is held in a segregated account by the fund's custodian. The collateral amount is marked-to-market and monitored on a daily basis to ensure that the collateral held is in an amount not less than the principal amount of the repurchase agreement plus any accrued interest. Collateral received by the fund for repurchase agreements is disclosed in the Fund's investments as part of the caption related to the repurchase agreement.

Repurchase agreements are typically governed by the terms and conditions of the Master Repurchase Agreement and/or Global Master Repurchase Agreement (collectively, MRA). Upon an event of default, the non-defaulting party may close out all transactions traded under the MRA and net amounts owed. Absent an event of default, assets and liabilities resulting from repurchase agreements are not offset. In the event of a default by the counterparty, realization of the collateral proceeds

could be delayed, during which time the collateral value may decline or the counterparty may have insufficient assets to pay back claims resulting from close-out of the transactions.

Derivative instruments. The fund may invest in derivatives in order to meet its investment objectives. Derivatives include a variety of different instruments that may be traded in the over-the-counter (OTC) market, on a regulated exchange or through a clearing facility. The risks in using derivatives vary depending upon the structure of the instruments, including the use of leverage, optionality, the liquidity or lack of liquidity of the contract, the creditworthiness of the counterparty or clearing organization and the volatility of the position. Some derivatives involve risks that are potentially greater than the risks associated with investing directly in the referenced securities or other referenced underlying instrument. Specifically, the fund is exposed to the risk that the counterparty to an OTC derivatives contract will be unable or unwilling to make timely settlement payments or otherwise honor its obligations. OTC derivatives transactions typically can only be closed out with the other party to the transaction.

Interest rate swaps. Interest rate swaps represent an agreement between the fund and a counterparty to exchange cash flows based on the difference between two interest rates applied to a notional amount. The payment flows are usually netted against each other, with the difference being paid by one party to the other. The fund settles accrued net interest receivable or payable under the swap contracts at specified, future intervals. Swap agreements are privately negotiated in the OTC market or may be executed on a registered commodities exchange (centrally cleared swaps). Swaps are marked-to-market daily and the change in value is recorded as unrealized appreciation/depreciation of swap contracts. A termination payment by the counterparty or the fund is recorded as realized gain or loss, as well as the net periodic payments received or paid by the fund. The value of the swap will typically impose collateral posting obligations on the party that is considered out-of-the-money on the swap.

During the period ended July 31, 2016, the fund used interest rate swaps to manage against anticipated interest rate changes. The following table summarizes the interest rate swap contracts held as of July 31, 2016.

Counterparty	USD notional amount	Payments made by fund	Payments received by fund	Maturity date	Market value
Morgan Stanley Capital Services	\$22,000,000	Fixed 1.4425%	3 Month LIBOR ^(a)	Aug 2016	(\$123,744)
Morgan Stanley Capital Services	22,000,000	Fixed 1.0938%	3 Month LIBOR ^(a)	May 2017	(68,158)
Total	\$44,000,000				(\$191,902)

^(a) At 7-31-16, the 3-month LIBOR rate was 0.7591%
