THE 58TH BUSINESS REPORT
For the Annual Period Ended March 31, 2004

This is a translation of the original Business Report written in the Japanese language, prepared primarily for the benefit and information of shareholders of the Company's common stock.

Table of Contents

TO OUR SHAREHOLDERS

During the 58th annual accounting period, ended March 31, 2004, consolidated operating revenue of Pioneer Corporation was ¥700,885 million, rising 3.5% over the previous year.

Operating income increased 42.1% from the previous year to ¥43,719 million mainly as a result of increased sales and improved gross profit margin as well as decreased selling, general and administrative expenses. Lower average value of the yen against the euro during the year compared to the previous year affected gross profit margin favorably. Net income also increased 54.5% from the previous year to ¥24,838 million, reflecting an increase in operating income and income from discontinued operations recorded in connection with the sale of subsidiaries engaged in the audio/video software business.

Year-end dividend payments were set at ¥12.5 per share of common stock, an increase of ¥2.5 over the previous accounting period. When added to the interim dividend paid last December, this brings the annual cash dividend for this accounting period to ¥25.0, a ¥7.5 increase over the previous year.

In March 2004, Pioneer Corporation issued Euro Yen Zero Coupon Convertible Bonds due 2011 in aggregate principal amount of ¥60,000 million (the Bonds). The net proceeds of the issue of the Bonds will be applied principally towards investment in plasma display business, and enhancement of distribution channels in Europe and China.

The business environment remains severe, characterized by uncertain economic conditions in our major markets, Japan, North America and Europe, intensifying price competition in our major product categories, and exchange rate fluctuations. Thus, we are concentrating management resources on strategic businesses to achieve the targets set forth in the medium-term management plan. For example, we converted production lines of optical discs to plasma displays, and we sold to a third party three of our audio/video software business subsidiaries in Japan and the United States. We will continue our efforts to increase

Table of Contents

profits and improve management efficiency through our select and focus policy.

We made a change in our internal company structure. Plasma Display Business Company, a new internal company, was created to further promote and expand our plasma display business. Also, we made a new internal company, the Home Entertainment Business Company, by combining the Components Business Company with the Home Entertainment Company, aiming to achieve more powerful synergy in the DVD business. Now, we are advancing our strategic business plans with the following four internal companies:

Home Entertainment Business Company, which is in charge of audio/video product business and business in devices such as recordable DVD drives for personal computers (PCs);

Plasma Display Business Company, which is managing the comprehensive, plasma display business;

Mobile Entertainment Company, which is responsible for the car electronics business overall; and

Industrial Solutions & Entertainment Company, which is applying business plans and system products to operate in industrial and business markets.

In our plasma display business, we are working to build a more efficient production system to meet fast-growing demand. Pioneer Display Products Corporation, our subsidiary dedicated to plasma display production, is currently expanding its capacity and strengthening its operations. In February 2004, Pioneer Corporation and NEC Corporation (NEC) reached an agreement in principle under which NEC will transfer to Pioneer all the shares NEC holds in its subsidiary, NEC Plasma Display Corporation, and all the intellectual property rights NEC holds for plasma displays. This fall, we plan to establish an overall production system that yields more than one million panels annually.

Table of Contents

In our DVD business, demand for DVD recorders for home use, especially those with hard disk drives (HDDs), has been growing, and we plan to develop products with added values and advanced features, reinforcing the line of HDD models. Also, demand for recordable DVD drives for PCs is rising sharply. To accommodate this growing demand, we are strengthening our production capacity in China.

In the car electronics business, we continue our efforts to strengthen our market leadership. In the car navigation system business, our HDD models with advanced functions, as well as affordably priced and easy-to-operate DVD models enjoy excellent reputations in Japan. We also plan to expand this business overseas, in Europe and North America in particular. In the car audio business, we plan to fortify our current strong market position with such new products and innovations as car CD players with organic light-emitting diode (OLED) displays to satisfy diversifying consumer demand.

We continue our efforts to minimize operating costs and expenses worldwide. To reduce our overall manufacturing costs, we are expanding production in China. We are also implementing an expense supervision system to lower the ratio of our selling, general and administrative expenses to consolidated operating revenue. We are applying supply chain management to optimize efficiency of inventory control worldwide. We believe that such initiatives help us improve cash flows and profitability.

We appreciate the support that shareholders have always given us, and look forward to more of it. And we will keep doing everything in our power to improve shareholder value.

CONSOLIDATED OPERATING REVENUE BY BUSINESS SEGMENT

Percent of Operating Revenue

Note: In the 58th annual accounting period, the Company changed business segment classification for certain businesses. Results related to DVD drives for PCs have been moved from Others to Home Electronics, and results related to plasma displays for business use have been moved from Home Electronics to Others. Corresponding figures for the previous accounting periods have been reclassified accordingly.

Home Electronics

This segment includes DVD players, DVD recorders, recordable DVD drives, DVD-ROM drives, home-use plasma displays, projection TVs, stereo systems, individual stereo components, equipment for cable-TV systems, digital broadcast set-top boxes and telephones.

Sales in the Home Electronics segment increased 1.3% from the previous year to ¥281,482 million.

In Japan, sales decreased by 9.2% to ¥78,798 million, due to a decline in sales of DVD players, recordable DVD drives for PCs, and plasma displays for home use, in spite of the increase in sales of DVD recorders.

Overseas sales increased 6.0% to ¥202,684 million, due to rises in sales of our home-use plasma displays and DVD recorders worldwide,

Table of Contents

and recordable DVD drives for PCs in Europe and Asia, despite lower sales of DVD players and audio products worldwide, cable TV set-top boxes in North America, and digital broadcast set-top boxes in Europe.

Car Electronics

This segment includes car stereos, car AV (audio/video) systems, car speakers and car navigation systems.

Sales in the Car Electronics segment amounted to ¥292,187 million, up 3.9% over the previous year.

In Japan, sales increased 15.1% to ¥121,708 million, reflecting growth in sales of car navigation systems to both consumers and automobile manufacturers as well as increased sales in car audio products to automobile manufacturers.

Overseas sales decreased 2.8% to ¥170,479 million, primarily due to lower sales of car audio products to both consumers and automobile manufacturers in North America, despite higher sales of car navigation systems in North America and Europe and car audio products in other regions.

Patent Licensing

This segment includes the licensing of patents related to optical disc technologies.

Royalty revenue from Patent Licensing decreased 6.1% from the previous year to ¥11,821 million. This was due to a decline in royalty revenue resulting from expiration of the Company's optical disc-related patents in certain areas.

Table of Contents

Others

This segment includes business-use plasma displays, business-use AV systems, OLED display panels, factory automation systems and electronic devices.

Sales in this segment increased 9.3% from the previous year to ¥115,395 million.

In Japan, sales were slightly higher by 1.1%, at ¥62,792 million. This is attributed primarily to increased sales of OLED display panels in cellular phones, despite the decrease in sales of commercial karaoke products resulting from the sale of the Company's karaoke business subsidiaries.

Overseas, sales were up 21.0% over the previous year to ¥52,603 million, primarily due to increased sales of optical disc manufacturing systems in Asia, semiconductors related to laser pickups in China, and business-use plasma displays worldwide.
