Cargo Load Factor (%)	73.8	68.2	71.6	66.4		

Note:

- Based on preliminary numbers. - As of April 1, 2002 KLMuk traffic and capacity figures (excluding Buzz) are included in this publication. Prior-year figures have been restated for comparative purposes.

Overall Traffic

In September, overall traffic increased by 7 percent compared to last year, when traffic was severely disrupted following the September 11 events. As capacity was 1 percent higher than last year, overall load factor improved by 4.8 percentage points to 81.6 percent. Overall traffic and load factor in this month are almost at the level of September 2000.

Passenger Traffic

Edgar Filing: KLM ROYAL DUTCH AIRLINES - Form 6-K

September passenger traffic increased by 6 percent compared to last year. With capacity at last year's level, passenger load factor improved to 84.1 percent. Significant traffic growth in the Europe route area outpaced the 8 percent capacity increase and resulted in an unprecedented load factor of 80.6 percent for our European network in September. Except for the Mid and South Atlantic route area, where traffic remained weak, traffic in all other route areas was strong, resulting in improved load factors. On the North Atlantic, traffic was 1 percent higher than last year. As capacity was down 7 percent on last year, load factor improved by 6.7 percentage points to 86.9 percent for this route area. Business Class traffic and load factor improved substantially, compared to last year as well as compared to last month.

Cargo Traffic

In September, cargo traffic was 8 percent higher than last year. As capacity was at last year's level, cargo load factor improved by 5.6 percentage points to 73.8 percent. The positive trend of the previous months, especially on the Asia Pacific and African routes, continued.

Joint Press Release

KLM AND TAM INITIATE BUENOS AIRES CODESHARE SERVICE

AMSTELVEEN/SÃO PAULO, October 4, 2002 Subject to Government approval, KLM Royal Dutch Airlines and TAM Brazilian Airlines will begin codesharing on the route between São Paulo and Buenos Aires with the commencement of the 2002/03 winter schedule. These services will be operated by TAM Brazilian Airlines and will connect with KLM's six weekly services between Amsterdam and São Paulo. This will include Buenos Aires in KLM's route network for the first time since the direct services between Amsterdam and the Argentinean capital were stopped in summer 2001.

TAM will operate the six weekly codeshare flights between São Paulo and Buenos Aires using modern Airbus 330 aircraft.

We are very pleased that the cooperation with such a distinguished airline as TAM brings back Buenos Aires into KLM's global route network, says KLM's Chief Operating Officer Peter Hartman. We are glad that together with TAM we can offer our passengers an extended continental route network in South America through a smooth connection in São Paulo and the modern and convenient TAM service.

TAM Brazilian Airlines is the second largest airline in Brazil. It operates a fleet of 74 aircraft, using mainly Airbus (A330, A320 and A319) and Fokker 100 equipment. TAM serves more than 40 domestic destinations in Brazil. Additionally, the Brazilian airline boasts Miami and Paris as international destinations in the U.S. and Europe respectively. In 2001, the Brazilian airline carried 13 million passengers.

KLM Royal Dutch Airlines and its partners serve over 400 cities in 78 countries on six continents. KLM operates a fleet of 152 aircraft from its homebase Amsterdam Schiphol in the Netherlands, one of the world's most modern hub airports. KLM is the core airline of the KLM Group, further comprising KLM cityhopper, KLM uk and Transavia.

In 2001, KLM carried more than 15.9 million passengers.

Edgar Filing: KLM ROYAL DUTCH AIRLINES - Form 6-K

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
