**KLM INTRODUCES NEW EUROPEAN PRODUCT**

AMSTELVEEN, April 24, 2003 Effective June 1, 2003, KLM Royal Dutch Airlines will renew its ground and in-flight product on European routes, allowing customers a choice of three service concepts and associated fares: Base Fares, Economy Fares and Select Fares. Booking options vary from limited to flexible and service on board and on the ground varies from simple to full service. Furthermore, KLM's existing European Business Class will be replaced by the so-called KLM Europe Select service and the current Economy Class will be re-branded KLM Economy. By offering a transparent fare structure and a straightforward product, KLM meets changing customer requirements and demands.

With the new product KLM expects to transport 10% more passengers within Europe, strengthen its European market position, and reduce unit costs. Moreover, this product renewal fits in KLM's aim to achieve structural yield improvement. The new concept will be implemented on all European routes, except on routes operated by KLM cityhopper and KLM exel.

**Select Fares**

Passengers who choose a Select Fare, profit from flexible booking conditions and an extensive range of KLM Europe Select services on board and on the ground.

Select Fare passengers will be offered comfortable and efficient ground handling procedures. They will have access to separate check-in desks, as well as special fast-lane service during boarding. They will have free access to KLM lounges and a range of additional services, including fast-lane service at passport control and valet parking at the departure hall (at a cost, but with a 10% discount on regular fees charged at Schiphol Airport). These and other facilities will be available at KLM's home base, Amsterdam Airport Schiphol. KLM will strive to introduce a similar level of service at other European airports, wherever possible.

The in-flight service offered in KLM Europe Select will be almost identical to that currently offered in Business Class, including a wide range of beverages, meals and other facilities. The seats will, however, be slightly narrower, with rows of six abreast instead of five, but the legroom will stay the same (33 inches). As of June 1, KLM will begin introducing this new seat configuration aboard its Boeing 737-300s and 400s.

Depending on local market conditions, KLM will reduce its current Business Class fares. For the Dutch market this implies a reduction of between five and 13 percent on average. The new seat configuration, which will allow KLM to carry more passengers in KLM Europe Select, will offset the effects of lower fares.

---

**Table of Contents**

**Economy Fares and Base Fares**

Passengers who require fewer booking options and less service, can opt for an Economy Fare or Base Fare with KLM Economy service on board and on the ground. KLM will offer a limited number of seats at discount prices. Passengers must book and pay Base Fares at least 14 days in advance and will not have the option of canceling or rebooking their flight. The Economy Fares are slightly more expensive, but offer more flexible conditions. Flights may be canceled or rebooked at a cost.

KLM will serve coffee, tea or soft drinks on board, as well as a sandwich or meal box (depending on the duration of the flight). Passengers in KLM Economy will no longer be served alcoholic beverages, nor will they be offered a choice of newspapers.

Whatever the fare, passengers will continue to profit from KLM's qualities and services as a network carrier. This includes access to a global network, flights to primary airports, and service recovery in the event of unforeseen circumstances, such as flight cancellations.

**KLM ADJUSTS FLIGHT SCHEDULE**

AMSTELVEEN, April 25, 2003 KLM Royal Dutch Airlines will adjust its flight schedule to various destinations, primarily in the Far East. Capacity will be reduced on various routes, either by deployment of smaller aircraft or a reduction in frequency. KLM has decided to do so in response to declining demand, mainly as a result of SARS. The total reduction in capacity will amount to 3% in available ton-kilometers.

Far East

Flight frequency on the Amsterdam-Beijing route will be reduced from four to two weekly roundtrips.

Flight frequency on the Amsterdam-Hong Kong route will be reduced from seven to four weekly roundtrips.

Flight frequency on the Amsterdam-Shanghai route will be reduced from five to four weekly roundtrips.

Flight frequency on the Amsterdam-Singapore-Jakarta route will be reduced from seven to five weekly roundtrips.

**Table of Contents**

03/040

**TRAFFIC AND CAPACITY STATISTICS APRIL 2003**

**# Passenger load factor at 74.0 percent**

**# Passenger load factor on North Atlantic almost stable at 85.2 percent**

**# Passenger load factor on Asia/Pacific falls by 26.9 percentage points to 60.3 percent**

**# Cargo traffic increased by 2 percent year-on-year**

**Passenger Traffic**

Passenger load factor decreased by 6.8 percentage points year-on-year to 74 percent. Passenger traffic was down 7 percent, while passenger capacity increased by 1 percent year-on-year. This increase in capacity is mainly the result of cabin reconfigurations of the 747-400 fleet. The number of flights was, however, 8 percent lower than last year due to frequency reductions in Europe and cancellations in the route area Middle East /South Asia.

The impact on capacity from the reconfiguration was most pronounced on the Asia/Pacific route area. This is the main reason for the capacity increase of 10 percent in this route area. Furthermore, KLM increased frequencies to Seoul and Shanghai as part of its summer schedule. However, due to the outbreak of the SARS-virus, traffic was severely affected, down 24 percent on last year.

As of April 14, scheduled services to the Middle East were re-instated (except for Kuwait), albeit with lower frequencies than the original flight schedule. Traffic on the route area Middle East/South Asia was down 34 percent, with a capacity decrease of 34 percent. This resulted in a load factor decrease of 0.3 percentage points to 74.4 percent.

**Cargo Traffic**

Cargo load factor decreased by 1.1 percentage point to 70.9 percent. Cargo traffic was 2 percent higher than last year, on a 3 percent capacity increase.

Traffic on the Asia Pacific routes increased by 6 percent, on a 8 percent capacity increase.

On the North Atlantic routes traffic was 7 percent higher, on a 6 percent capacity increase.

Traffic inbound Europe is doing relatively well compared to last year, while European outbound traffic remains under pressure.
