Filed by: KLM Royal Dutch Airlines
pursuant to Rule 425 under the Securities Act of 1933
Subject Company: KLM Royal Dutch Airlines
Exchange Act File Number: 001-04059

Legal Information

The combination of KLM and Air France will be implemented through an exchange offer made by Air France to all shareholders of KLM. This document is neither an offer to purchase nor a solicitation of an offer to sell shares of KLM. Any offer in the United States will only be made through a prospectus which is part of a registration statement on Form F-4 filed with the U.S. Securities and Exchange Commission (the "SEC"). KLM shareholders who are U.S. persons or are located in the United States are urged to carefully review the registration statement on Form F-4 and the prospectus included therein, the prospectus, the Schedule TO and other documents relating to the offer that will be filed by Air France with the SEC because these documents contain important information relating to the offer. You are also urged to read the related solicitation/recommendation statement on Schedule 14D-9 that will be filed with the SEC by KLM regarding the offer. You may obtain a free copy of these documents after they are filed with the SEC and other documents filed by Air France and KLM with the SEC at the SEC's web site at www.sec.gov. Once such documents are filed with the SEC, you will also be able to inspect and copy the registration statement on Form F-4, as well as any documents incorporated by reference therein, the Schedule TO and the Schedule 14D-9 at the public reference room maintained by the SEC at 450 Fifth Street, NW, Washington, D.C. 20549. Please call the SEC at 1-800-SEC-0330 for further information about the public reference room. These documents may also be obtained free of charge by contacting Air France, Investor Relations, 45, rue de Paris, 95747 Roissy CDG Cedex, France. (tel: +33 1 41 56 88 60), or KLM, Amsterdamsweg 55, 1182 GP Amstelveen, The Netherlands. Attention: Investor Relations (tel: +31 20 64 93099). **YOU SHOULD READ THE PROSPECTUS AND THE SCHEDULE 14D-9 CAREFULLY BEFORE MAKING A DECISION CONCERNING THE OFFER.**

Forward-Looking Statements

The information herein contains, and the Air France, KLM and their representatives may make, forward-looking statements either orally or in writing, about Air France, KLM and their businesses. These forward-looking statements, which include, but are not limited to, statements concerning the financial condition, results of operations and businesses of Air France and KLM and the benefits expected to result from the contemplated transaction, are based on management's current expectations and estimates.

These forward-looking statements involve known and unknown risks, uncertainties and other factors, many of which are outside of Air France or KLM's control and are difficult to predict, that may cause actual results to differ materially from any future results expressed or implied from the forward-looking statements. These statements are not guarantees of future performance and involve risks and uncertainties including, among others: the risk that the conditions relating to the required minimum tender of shares might not be satisfied; failure by Air France and KLM shareholders to approve the planned corporate reorganizations; inability to obtain, or meet the conditions imposed for, regulatory approvals in a timely manner or at all; the risk that the businesses of Air France and KLM will not be integrated successfully and the expected synergies and cost savings will not be achieved; unanticipated expenditures; changing relationships with customers, suppliers and strategic partners; and other economic, business, competitive and/or regulatory factors affecting the businesses of Air France and KLM generally. Air France and KLM caution that the foregoing list of important factors is not exhaustive. Additional information regarding the factors and events that could cause differences between forward-looking statements and actual results in the future is contained in KLM's Securities and Exchange Commission filings, including KLM's Annual Report on Form 20-F. Air France and KLM undertake no obligation to update or revise any forward-looking statement, whether as a result of new information, future events or otherwise.

Total turnover	6,960	6,532	6,485	100%

Passenger business

4th worldwide in terms of international passengers carried

7th worldwide in terms of international passenger kilometres flown

19.4 million passengers carried in 2002-03

68% of total turnover

More than 600 daily flights to 142 destinations in more than 70 countries

A fleet of 168 aircraft (of which 22 combi aircraft) as per 31-3-2003

Traffic & capacity (million)	2000-01	2001-02	2002-03
Traffic (RPKs)	60,047	58,447	59,417
Capacity (ASKs)	75,222	74,051	74,825
Load factor (%)	79.8%	78.9%	79.4%

With 19.4 million passengers carried to 142 destinations in more than 70 countries, KLM ranks fourth worldwide in terms of international passengers carried and seventh worldwide in terms of international passenger kilometres flown. KLM cityhopper, a member of KLM Group, is a special network partner engaged chiefly in providing capacity on KLM's European connections. KLM cityhopper uk, a KLM cityhopper subsidiary, like KLM cityhopper, supplies capacity to KLM, chiefly on connections between the United Kingdom and continental Europe.

Table of Contents

KLM Cargo is the 11th largest airfreight operator worldwide and 5th in Europe according to IATA, based on total scheduled freight tonne-kilometres flown. However, according to the first six months of 2003, KLM is the 8th largest airfreight operator worldwide and 3rd in Europe, in terms of international freight tonne-kilometres flown (excluding integrators). The Cargo business accounts for 16% over the Group's turnover. With two full freighters and the largest combi fleet in the world and additional capacity provided for in the belly of other aircraft, Cargo has 350 weekly services to some 200 destinations in more than 70 countries.

Engineering and Maintenance

3rd worldwide largest aircraft maintenance company affiliated to an airline

5% of turnover

the 5% only relates to 3rd parties which accounts for 35% of total E&M turnover

leader in total care capabilities to Boeing 747's and 737's

leader in CF6 engines

Strategic partnerships with General Electric, Hamilton Sunstrand, Boeing, Honeywell and UTC

KLM's Engineering & Maintenance Business is one of the three largest aircraft maintenance companies affiliated to an airliner in the world. E&M accounts for 5% of the Group's external turnover. E&M derives 35% of its turnover from third parties. It offers a complete package of maintenance services, ranging from engine, component and airframe overhaul to Total Aircraft Care. It specializes in Boeing 747s and 737s and General Electric CF-6 engines. It has strategic partnerships with General Electric, Hamilton Sunstrand, Boeing, Honeywell and UTC. Since 2002, E&M has worked with General Electric on the maintenance of the latter's two most successful engine types. For this KLM-GE alliance, a new engine overhaul centre is being built at Schiphol.

Transavia

No. 1 Dutch holiday transporter to destinations in and around the Mediterranean, with a market share of over 40%

BASIQ AIR is the low cost label within Transavia with 14 destinations in Europe.

7% of turnover

Profitable for more than 25 years

Fleet of 26 aircraft

Transavia flies to over 70 varied, sunny destinations, mainly situated in the Mediterranean area. With a market share of over 40%, Transavia is the largest Dutch holiday transporter to destinations in and around the Mediterranean. Basiq Air is their low-cost label. Basiq Air flies to 14 destinations in the Netherlands, England, France, Spain, Italy and Portugal. The turnover of Transavia represents around 7% of the KLM Group's turnover. In the year that ended on 31 March 2003, Transavia airlines has for the 25th year in succession succeeded in realizing a positive result. Transavia operates a fleet of 26 aircraft with an average age of 4 years.

Table of Contents**The Network**

More than 125.000 city pair connections

More than 350 cities in 73 countries on 6 continents served by the KLM Group and its partners

More than 30 partners worldwide

On-time arrivals of the intercontinental flights at the Schiphol hub at 85% in 2002/03.

An important aspect of the network philosophy is to offer at least daily frequencies that give passengers ample choice, also with regard to connections. Frequency and choice are two of the key criteria for passengers to fly and continue flying with KLM. The KLM Group offers passengers and airfreight shippers more than 125,000 city-pair connections throughout the world via one or more hubs. KLM Group and its partners serve more than 350 cities, in 73 countries on six continents. Connections that are used by fewer passengers are performed by smaller or regionally stronger airlines from inside or outside KLM Group. With these more than 30 network partners, KLM can offer its customers flights to less popular destinations while maintaining excellent quality standards. Owing to the importance of transfer connections that KLM provides at its hub, operational integrity is very important, not only to keep its promise to customers but also to keep the cost of service recovery as low as possible. On-time arrivals of the intercontinental flights at the Schiphol hub stands at 85% in 2002/03

The Fleet

As of March 31, 2003, the KLM Group's fleet consisted of 219 aircraft, of which 175 were jet aircraft, 21 turboprop aircraft and 23 training aircraft. KLM has started a fleet replacement program. KLM ordered 10 Boeing 777-200ERs, 3 Boeing 747-400ERFs and 6 Airbus A330-200s. This represents the first step towards replacing the Boeing 747-300s, MD-11s and Boeing 767-300ERs. The first phase, to replace the entire Boeing 747-300 fleet before 2005, was recently initiated with the delivery of the two Boeing 747-400ERFs in April and May of this year. The first Boeing 777-200ER will enter the fleet as of October 2003. The last Boeing 747-300 will be phased out by the end of December 2004.

The partners

Full-fledged joint venture with Northwest Airlines on North Atlantic routes and flights between The Netherlands and India

Joint venture on Europe-Africa services with Kenya Airways*, codesharing etc.

Other codeshare partners are: Malev, Malaysia Airlines, Continental Airlines, TAM, China Southern and Air Europa.

* *KLM has a 26% share holding in Kenya Airways Ltd.*

KLM has a joint venture with Northwest Airlines relating to operations on the North Atlantic routes, the routes between The Netherlands and India and related feeder routes. The North Atlantic routes comprise all air traffic between the United States, Canada and Mexico on the one hand and Europe on the other. This joint venture relates to both passenger and cargo traffic. Each partner contributes to the joint venture the difference between its traffic revenues and operating expenses and shares on a 50/50 basis in the total contribution generated.

Europe & Africa	air Alps, Air Europa, Aer Lingus, Comair Limited, CSA Czech Airlines, Cyprus Airways, Kenya Airways, KLM cityhopper, KLM exel, Lithuanian Airlines, Maersk Air, Malev, Martinair, Meridiana, SNCF (railway company), Thalys (railway company), Transavia Airlines and Ukraine International.
Middle East and Asia	China Southern, jet Airways and Malaysia Airlines
The Americas s Cargo partners	Alaska Airlines, Continental Airlines, Surinam Airways and TAM Brazil Northwest Airlines, Nippon Cargo Airlines, malaysia Airlines, Kenya Airways, Martinair Cargo en TNT.

The hub

Schiphol is the 4th largest airport and the 3rd largest hub in Europe. It serves over 40 million passengers per year and has more than 1,240,000 tonnes of cargo. Schiphol serves 113 European and 92 international destinations and serves per week 3,110 European and 560 international flights. 40% of its passengers are transfer passengers. In 2002 Schiphol recorded 401,000 flight movements and it expects that to grow to 416.000 in 2003. On February 20, 2003 a fifth runway, known as the Polder Runway, was taken into service at Schiphol. Initially, the new runway was used only at night, but since 11 June the runway has also been used for take-offs and landings during the day. The new runway system will become fully operational in November. The new runway is key to maintaining Amsterdam Airport Schiphol s position as a major European hub. It will enable the airport to accommodate future air traffic growth so that the airport can continue to compete with other European airports. Moreover, overall noise impact in the airport environs is anticipated to decrease. It will allow further growth in the aviation sector until 2010 as well as reduced noise impact above residential areas. The new runway will enable Amsterdam Airport Schiphol to retain its position as a European hub.

Investment proposition

KLM s strategy is consistently built on two fundamentals:

Strengthening the standalone position

Participating in global alliance

In order to structurally lower its cost base, KLM has embarked a structural cost savings program. Under the program, KLM is fully committed to improve its operating income by 650 million as of April 1, 2005. Of this 650 mln, an amount of 350 mln will come from internal cost savings, 163 mln from fleet renewal and network adjustments and 137 mln from external cost savings.

Table of Contents**Air France Fact Sheet****A European leader in the air transport industry**

The three core businesses of the Air France Group are passenger and cargo transport, and aircraft maintenance services.

A pure air transport player

Turnover per activity (in m)	2000-01	2001-02	2002-03	%

A well-balanced network

93% of non-stop long-haul flights

Minimum of 1 daily flight on 60% of long-haul destinations

Minimum of 3 daily flights on 80% of domestic and European destinations from Paris

With 198 destinations in 83 countries, the Air France Group operates an extensive route system, both domestically and internationally.

The network of Air France is structured around three principal bases:

Paris-Charles de Gaulle, Air France's hub for long and medium-haul traffic,

Paris-Orly, used for Air France's shuttle service and coverage of the domestic market

Lyon-Saint Exupéry, Air France's hub for inter-regional services between cities in France and Europe.

Edgar Filing: KLM ROYAL DUTCH AIRLINES - Form 425

Thanks to its well-balanced network, Air France is not solely dependent on any one market, and each market reacts differently to the economic or geopolitical environment.

A strong global alliance

Together with Aeromexico, Delta Air Lines and Korean Air, Air France launched the SkyTeam alliance in June 2000. The European arm of the alliance was further strengthened with the integration of Czech airline CSA and Alitalia in 2001.

The six SkyTeam members operate around 7,700 daily flights to 500 destinations in 110 countries. Through the SkyTeam alliance, Air France is able to offer a worldwide network structured around 6 hubs located in Paris, Atlanta, Cincinnati, Rome, Prague and Seoul.

In the two years since its founding, SkyTeam has become one of the industry's three major alliances with 12% market share (*source IATA 2002*).

Besides this alliance, Air France has also signed special agreements with more than 40 or so partners over the world. Code-share agreements include Adria Airways, Air Austral, Air Mauritius, China Eastern, Finnair, Japan Air Lines, Luxair, Maersk Air, Malev, Portugalia, Royal Air Maroc, South African, TAM, Tunisair...

3/4

Table of Contents**An efficient hub****An efficient hub...**

With over 16,000 weekly connections between medium and long-haul flights in under two hours, the Air France hub at Paris-CDG is the most efficient in Europe and attracts passengers from all over the world. Leveraging traffic growth in economic upturns, Air France's hub has also proved to be very effective during crisis periods.

...benefiting from expanding airport infrastructures

Whilst most major European airports face capacity constraints, Paris-Charles De Gaulle benefits from further development potential. As from 2004, the four runways are expected to become simultaneously operational, thereby increasing the number of take-offs and landings. In addition, Paris-Charles De Gaulle will benefit from further capacity expansion with the gradual opening of Terminal 2E and its satellites.

A profitable growth strategy based on strong fundamentals**Profitability safeguarded despite the 2-year crisis**
