

NORTHRIM BANCORP INC
Form 10-K
March 13, 2018

UNITED STATES SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, DC 20549
FORM 10-K
(Mark One)

Annual report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the fiscal year ended December 31, 2017

Transition report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the transition period from _____ to _____

Commission File Number 000-33501

NORTHRIM BANCORP, INC.

(Exact name of registrant as specified in its charter)

Alaska

92-0175752

(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)

3111 C Street

Anchorage, Alaska 99503

(Address of principal executive offices) (Zip Code)

(907) 562-0062

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act: N/A

Securities registered pursuant to Section 12(g) of the Act:

Common Stock, \$1.00 par value The NASDAQ Stock Market, LLC

(Title of Class) (Name of Exchange on Which Listed)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§ 229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large Accelerated Filer Accelerated Filer Non-accelerated Filer (Do not check if a smaller reporting company)

Smaller Reporting Company Emerging Growth Company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 12(a) of the

Exchange Act. "

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). " Yes No

The aggregate market value of the voting and non-voting common equity held by non-affiliates of the registrant as of June 30, 2017 (the last business day of the registrant's most recently completed second fiscal quarter) was \$205,581,946.

Indicate the number of shares outstanding of each of the registrant's classes of common stock, as of the latest practicable date. 6,871,963 shares of Common Stock, \$1.00 par value, as of March 13, 2018.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's Proxy Statement on Schedule 14A, relating to the registrant's annual meeting of shareholders to be held on May 24, 2018, are incorporated by reference into Part III of this Form 10-K.

PART I

Cautionary Note Regarding Forward Looking Statements

This Annual Report on Form 10-K includes “forward-looking statements”, within the meaning of the Private Securities Litigation Reform Act of 1995, as amended, which are not historical facts. These forward-looking statements describe management’s expectations about future events and developments such as future operating results, growth in loans and deposits, continued success of the Northrim BanCorp Inc.’s style of banking, and the outlook of the local economy in which we operate. All statements other than statements of historical fact, including statements regarding industry prospects and future results of operations or financial position, made in this report are forward-looking. We use words such as “anticipate,” “believe,” “expect,” “intend” and similar expressions in part to help identify forward-looking statements. Forward-looking statements reflect management’s current plans and expectations and are inherently uncertain. Our actual results may differ significantly from management’s expectations, and those variations may be both material and adverse. Forward-looking statements are subject to various risks and uncertainties that may cause our actual results to differ materially and adversely from our expectations as indicated in the forward-looking statements. These risks and uncertainties include: the general condition of, and changes in, the Alaska economy; factors that impact our net interest margin; and our ability to maintain asset quality; our ability to implement our marketing and growth strategies; and our ability to execute our business plan. Further, actual results may be affected by competition on price and other factors with other financial institutions; customer acceptance of new products and services; the regulatory environment in which we operate; and general trends in the local, regional and national banking industry and economy as those factors relate to our cost of funds and return on assets. In addition, there are risks inherent in the banking industry relating to collectability of loans and changes in interest rates. Many of these risks, as well as other risks that may have a material adverse impact on our operations and business, are identified Item 1A. Risk Factors, and in our filings with the Securities and Exchange Commission. However, you should be aware that these factors are not an exhaustive list, and you should not assume these are the only factors that may cause our actual results to differ from our expectations. In addition, you should note that we do not intend to update any of the forward-looking statements or the uncertainties that may adversely impact those statements, other than as required by law.

ITEM 1. BUSINESS

In this document, please note that references to “we”, “our”, “us”, or the “Company” mean Northrim BanCorp, Inc. and its subsidiaries, unless the context suggests otherwise.

General

We are a publicly traded bank holding company headquartered in Anchorage, Alaska. The Company’s common stock trades on the Nasdaq Global Select Stock Market (“NASDAQ”) under the symbol, “NRIM.” The Company is regulated by the Board of Governors of the Federal Reserve System. We began banking operations in Anchorage in December 1990, and formed the Company as an Alaska corporation in connection with our reorganization into a holding company structure; that reorganization was completed effective December 31, 2001. The Company has grown to be the third largest commercial bank in Alaska and in Anchorage in terms of deposits, with \$1.3 billion in total deposits and \$1.5 billion in total assets at December 31, 2017. Through our fourteen banking branches and fourteen mortgage origination offices, we are accessible to approximately 90% of the Alaska population.

The Company has three direct wholly-owned subsidiaries:

Northrim Bank (the “Bank”), a state chartered, full-service commercial bank headquartered in Anchorage, Alaska. The Bank is regulated by the Federal Deposit Insurance Corporation (the “FDIC”) and the State of Alaska Department of Commerce, Community and Economic Development, Division of Banking, Securities and Corporations. The Bank has fourteen branch locations in Alaska; seven in Anchorage, one in Wasilla, two in Juneau, one in Fairbanks, one in Ketchikan, one in Sitka, and one in Eagle River. We also operate in Washington State through Northrim Funding Services (“NFS”), a factoring business that the Bank started in 2004. We offer a wide array of commercial and consumer loan and deposit products, investment products, and electronic banking services over the Internet;

Northrim Investment Services Company (“NISC”) was formed in November 2002 to hold the Company’s equity interest in Elliott Cove Capital Management, LLC (“ECCM”), an investment advisory services company. In the first quarter of 2006, through NISC, we purchased an equity interest in Pacific Wealth Advisors, LLC (“PWA”), an investment advisory, trust, and wealth management business located in Seattle, Washington, in which we hold

24% of PWA's total outstanding equity interests. Although we still sell their products, in May 2015, we sold all of our equity interest in ECCM held by NISC;

• Northrim Statutory Trust 2 (“NST2”), an entity that we formed in December of 2005 to facilitate a trust preferred securities offering by the Company; and

The Bank has three direct wholly-owned subsidiaries:

Northrim Capital Investments Co. (“NCIC”) is a wholly-owned subsidiary of the Bank, which holds a 100% interest in a residential mortgage holding company, Residential Mortgage Holding Company, LLC (“RML”). The predecessor of RML, Residential Mortgage, LLC, was formed in 1998 and has fourteen offices throughout Alaska. RML became a wholly-owned subsidiary of NCIC on December 1, 2014. Prior to that, the Company held a 23.5% interest in RML.

• RML holds a 30% investment in Homestate Mortgage, LLC. In March and December of 2005, NCIC purchased ownership interests totaling 50.1% in Northrim Benefits Group, LLC (“NBG”), an insurance brokerage company that focused on the sale and servicing of employee benefit plans. In August 2017, the Company sold all of the assets of NBG. In the fourth quarter of 2011, NCIC purchased an equity interest in Elliott Cove Insurance Agency LLC (“ECIA”); an insurance agency that offers annuity and other insurance products. Although we still sell their products, we sold all of our equity interests in ECIA held by NCIC in May 2015.

• Northrim Building, LLC (“NBL”) is a wholly-owned subsidiary of the Bank that owns and operates the

Company’s main office facility at 3111 C Street in Anchorage.

• Northrim Building LO, LLC is a wholly-owned subsidiary of the Bank that owns and operates the Company’s community branch facility at 2270 E. 37th Avenue in Anchorage.

Segments

The Company operates in two primary segments: Community Banking and Home Mortgage Lending. Measures of the revenues, profit or loss, and total assets for each of the Company's segments are included in this report, Item 8.

"Financial Statements and Supplementary Data", which is incorporated herein by reference.

Business Strategy

The Company’s primary objective is to become Alaska's most trusted financial institution by adding value for our customers, communities, and shareholders. We aspire to be Alaska's premier bank and employer of choice as a leader in financial expertise, products, and services. We value our state, and we are proud to be Alaskan. We embody Alaska's frontier spirit and values, and we support our communities. We have a sincere appreciation for our customers, and we strive to deliver superior customer first service that is reliable, ethical, and secure. We look for growth opportunities for our customers, our institution and our employees.

Our strategy is one of value-added growth. Management believes that calculated, sustainable organic and inorganic market share growth coupled with good asset quality, an appropriate core deposit and capital base, operational efficiency, diversified sources of other operating income, and improved profitability is the most appropriate means of increasing shareholder value.

Our business strategy emphasizes commercial lending products and services through relationship banking with businesses and professional individuals. Additionally, we are a significant land development and residential construction lender and an active lender in the commercial real estate market in Alaska. Because of our relatively small size, our experienced senior management team can be more involved with serving customers and making credit decisions, all of which are made in Alaska, allowing us to compete more favorably with larger competitors for business lending relationships. Our business strategy also emphasizes the origination of a variety of home mortgage loan products, which we sell to the secondary market. We retain servicing for home mortgages that we originate and sell to the Alaska Housing Finance Corporation. We believe that there is opportunity to increase the Company’s loan portfolio, particularly in the commercial portion of the portfolio, in the Company’s current market areas through existing and new customers.

Management believes that our real estate construction and term real estate loan departments have developed a strong level of expertise and will continue to compete favorably in our markets. We have also dedicated additional resources to our small business lending operations and have targeted the acquisition of new customers in professional fields including physicians, dentists, accountants, and attorneys. In addition to lending products, in many cases commercial customers also require multiple deposit and affiliate services that add franchise value to the Company. While we

expect that opportunities for growth in 2018 will to be

3

muted mainly due to the lower oil prices compared to pre-2014 levels, which has led to a slower economy in Alaska, we believe that these strategies will continue to benefit the Company and we intend to grow our balance sheet through increasing our market share. The Company benefits from solid capital and liquidity positions, and management believes that this provides a competitive advantage in the current business environment. (See “Liquidity and Capital Resources” in Item 7, “Management’s Discussion and Analysis of Financial Condition and Results of Operations”.) The Company’s business strategy also stresses the importance of customer deposit relationships to support its lending activities. Our guiding principle is to serve our market areas by operating with a “Superior Customer First Service” philosophy, affording our customers the highest priority in all aspects of our operations. We believe that our successful execution of this philosophy has created a strong core deposit franchise that provides a stable, low cost funding source for expanded growth in all of our lending areas. We have devoted significant resources to future deposit product development, expansion of electronic services for both personal and business customers, and enhancement of information security related to these services.

In addition to market share growth, a significant aspect of the Company’s business strategy is focused on managing the credit quality of our loan portfolio. Over the last several years, the Company has allocated more resources to the credit management function of the Bank to provide enhanced financial analysis of our largest, most complex loan relationships to further develop our processes for analyzing and managing various concentrations of credit within the overall loan portfolio and to develop strategies to improve or collect our existing loans. Continued success in maintaining or further improving the credit quality of our loan portfolio and managing our level of other real estate owned is a significant aspect of the Company’s strategy for attaining sustainable, long-term market growth to affect increased shareholder value.

Employees

We believe that we provide a high level of customer service. To achieve our objective of providing “Superior Customer First Service”, management emphasizes the hiring and retention of competent and highly motivated employees at all levels of the organization. Management believes that a well-trained and highly motivated core of employees allows maximum personal contact with customers in order to understand and fulfill customer needs and preferences. This “Superior Customer First Service” philosophy is combined with our emphasis on personalized, local decision making. The Company continues to enhance our company-wide employee training program which focuses on Northrim culture, Customer First Service, general sales skills, and various technical focus areas.

We consider our relations with our employees to be satisfactory. We had 429 full-time equivalent employees at December 31, 2017. None of our employees are covered by a collective bargaining agreement. Of the 429 full-time equivalent employees, 314 were Community Banking employees and 115 were Home Mortgage Lending employees.

Products and Services

Community Banking

Lending Services: We have an emphasis on commercial and real estate lending. We also believe we have a significant niche in construction and land development lending in Anchorage, Fairbanks, the Matanuska-Susitna Valley, and Southeast Alaska. (See “Loans” in Item 7 “Management’s Discussion and Analysis of Financial Condition and Results of Operations”.)

Purchase of accounts receivable: We provide short-term working capital to customers primarily in our Alaska markets as well as Washington, Oregon and some other states by purchasing their accounts receivable through NFS. In 2018, we expect NFS to continue to penetrate these markets and to continue to contribute to the Company’s profitability.

Deposit Services: Our deposit services include noninterest-bearing checking accounts and interest-bearing time deposits, checking accounts, and savings accounts. Our interest-bearing accounts generally earn interest at rates established by management based on competitive market factors and management’s desire to increase or decrease certain types or maturities of deposits.

Several of our deposit services and products are:

• A money market deposit account;

• A “Jump-Up” certificate of deposit (“CD”) that allows additional deposits with the opportunity to increase the rate to the current market rate for a similar term CD;

- A savings account that is priced like a money market account that allows additional deposits, quarterly withdrawals without penalty, and tailored maturity dates; and

4

Arrangements to courier noncash deposits from our customers to their local Northrim Bank branch.

Other Services: In addition to our traditional deposit and lending services, we offer our customers several convenience services: Consumer Online Banking, Mobile App and Mobile Deposit, Mobile Web and Text Banking, Business Online Banking, Business Mobile App and Business Mobile Deposit, Personal Finance, Online Documents, Consumer Debit Cards, Business Debit Cards, instantly issued debit cards at account opening, telebanking, and automated teller services. Other special services include personalized checks at account opening, overdraft protection from a savings account, extended banking hours and commercial drive-up banking at many locations, automatic transfers and payments, People Pay (a peer to peer payment functionality), external transfers, Bill Pay, wire transfers, direct payroll deposit, electronic tax payments, Automated Clearing House origination and receipt, remote deposit capture, merchant services, cash management programs to meet the specialized needs of business customers, annuity products, long term investment portfolios, and in some markets, courier agents who pick up noncash deposits from business customers.

Other Services Provided Through Affiliates and Former Affiliates Whom We Continue To Work With: Prior to August of 2017, the Company sold and serviced employee benefit plans for small and medium sized businesses in Alaska through NBG, an insurance brokerage company. In August 2017, we sold the assets of NBG, but we have continued our relationship with Acrisure, LLC, who purchased the assets of NBG, through an ongoing referral agreement. Our affiliate PWA provides investment advisory, trust, and wealth management services for customers who are primarily located in the Pacific Northwest and Alaska. We plan to continue to leverage these affiliate relationships to strengthen our existing customer base and bring new customers into the Bank.

Significant Business Concentrations: No individual or single group of related accounts is considered material in relation to our total assets or total revenues, or to the total assets, deposits or revenues of the Bank, or in relation to our overall business. Based on classification by North American Industry Classification System ("NAICS"), there are no segments that exceed 10% of portfolio loans, except for real estate (see Note 5, Loans and Credit Quality, of the Notes to Consolidated Financial Statements included in Item 8 of this report for a breakout of real estate loans). In addition to its review of NAICS codes, the Company has also identified concentrations in one specialized industry. We estimate that as of December 31, 2017 approximately 7% of portfolio loans have direct exposure to the oil and gas industry in Alaska. Additionally, approximately 36% of our loan portfolio at December 31, 2017 is attributable to 26 large borrowing relationships. Moreover, our business activities are currently focused primarily in the state of Alaska. Consequently, our results of operations and financial condition are dependent upon the general trends in the Alaska economy and, in particular, the residential and commercial real estate markets in Anchorage, Juneau, Fairbanks, the Matanuska-Susitna Valley, Ketchikan, and Sitka.

Home Mortgage Lending

Lending Services: The Company originates 1-4 family residential mortgages throughout Alaska which we sell to the secondary market. Residential mortgage choices include several products from the Alaska Housing Finance Corporation including first-time homebuyer, veteran's and rural community programs; Federal Housing Authority, or "FHA" loans; Veterans Affairs, or "VA" loans; Jumbo loans; and various conventional mortgages. The Company retains servicing rights on loans sold to the Alaska Housing Finance Corporation since implementing a new loan servicing program in July 2015.

Alaska Economy

Our growth and operations depend upon the economic conditions of Alaska and the specific markets we serve. Significant changes in the Alaska economy and the markets we serve eventually could have a positive or negative impact on the Company. Alaska is strategically located on the Pacific Rim, within nine hours by air from 95% of the northern hemisphere, and Anchorage has become a worldwide cargo and transportation link between the United States and international business in Asia and Europe. The economy of Alaska is dependent upon natural resources industries. Key sectors of the Alaska economy are the oil industry, government and military spending, and the fishing, mining, tourism, air cargo, transportation, construction, and forest products industries, as well as medical services.

The oil industry plays a significant role in the economy of Alaska, and revenues for the State of Alaska are sensitive to the volatility in oil prices. According to the State of Alaska Department of Revenue, in 2017 approximately 65% of the unrestricted revenues that funded the Alaska state government in the fiscal year ending June 30, 2017 were

generated through various taxes and royalties on the oil industry. This is down from approximately 72% in 2016 and 90% in the last several years prior to 2016 due to a decrease in the price of oil, causing the state of Alaska to use savings from previous years to fund its budget deficit. As oil prices have stabilized at relatively low-levels, we believe the reduction in various taxes and royalties on the oil industry is now a serious concern for state revenues as it is projected that Alaska's savings will be depleted within two years at current prices. If oil prices remain at their current relatively low levels in the longer term, we anticipate it will be a concern for Alaska's long-term economic growth. However, we believe Alaska's economy is less sensitive to oil price volatility in the short-term than Alaska's

state government budget. While state government revenue from oil royalties is immediately and directly impacted by a drop in oil prices, we believe that the large scale and nature of oil wells in Alaska are such that project commitments that currently exist will most likely not be disrupted by short-term price volatility. While we believe that subcontractors who provide oil field services and transportation for the large, multi-national companies that produce oil in Alaska experienced a slowdown in revenues in 2017 and 2016 as a result of the decrease in prices, we are encouraged by recent announcements by several oil exploration companies announcing new oil fields on the North Slope and increased exploration activity in 2018 that could lead to future increases in oil production over time. We believe the long-term growth of the Alaska economy will most likely be determined by large scale natural resource development projects. Several multi-billion dollar projects can potentially advance in the moderate-term. Some of these projects include copper, gold and molybdenum production at the Donlin mine and continued exploration in the National Petroleum Reserve Alaska. Because of their size, we believe each of these projects faces tremendous challenges. We believe contentious political decisions need to be made by government regulators, issues need to be resolved in the court system, and multi-billion dollar financial commitments need to be made by the private sector if they are to advance. If none of these projects moves forward in the next ten years, we believe state revenues will probably continue to decline with falling oil production from older fields on the North Slope of Alaska. We anticipate the decline in state revenues will likely have a negative effect on Alaska's economy. Prior to the decline in oil prices that began in 2014, Alaska's economy had been stronger relative to many other states in the nation, due largely to a natural resources based economy which has benefited from high commodity and energy prices. According to the Treasury Division of Alaska Department of Revenue, as of October, 2015, Alaska's Statutory Budget Reserve Fund was liquidated and its assets were transferred to the General Fund. As of December 31, 2017, Alaska's Constitutional Budget Reserve was \$3.1 billion and the Alaska Permanent Fund had a balance of \$64.5 billion. The Alaska Permanent Fund pays an annual dividend to every eligible Alaskan citizen. According to a January 19, 2018 press release from the Alaska Department of Labor and Workforce Development, the seasonally adjusted unemployment rates in the United States and Alaska were 4.1% and 7.3%, respectively, in December 2017. Prior to November 2014, the unemployment rate in Alaska had been lower than that of the United States as a whole since 2009. As general economic conditions in the United States have recovered over the past several years and oil prices have significantly declined, Alaska's unemployment rate now exceeds that of the United States as a whole. The Alaska Department of Labor predicts a loss of 1,800 jobs, or an approximately 0.5% reduction in total employment in 2018, following job losses of approximately 1.1% of total employment in 2017 and 1.9% in 2016. The Company anticipates that the estimated decrease in jobs in Alaska in 2017 and 2018 will have an impact on our ability to grow organically in the next few years.

We believe our exposure to the tourism industry, which increased following our acquisition of Alaska Pacific Bancshares, Inc in Southeast Alaska in 2014, diversifies the Company's customer base. We believe this helps mitigate the effect that the decline in natural resource industries, specifically the oil industry, in Alaska has had on the Company's operations. Southeast Alaska is the primary destination for cruise ships that visit Alaska. Based on the latest information from Rain Coast Data, approximately one million cruise ship tourists visited Southeast Alaska in recent years.

A material portion of our loans at December 31, 2017, were secured by real estate located in greater Anchorage, Matanuska-Susitna Valley, Fairbanks, and Southeast Alaska. Thirty percent of our revenue in 2017 was derived from the residential housing market in the form of loan fees and interest on residential construction and land development loans and income from RML as compared to 36% and 38% in 2016 and 2015, respectively. Real estate values generally are affected by economic and other conditions in the area where the real estate is located, fluctuations in interest rates, changes in tax and other laws, and other matters outside of our control. A decline in real estate values in the greater Anchorage, Matanuska-Susitna Valley, Fairbanks, and Southeast Alaska areas could significantly reduce the value of the real estate collateral securing our real estate loans and could increase the likelihood of defaults under these loans. At December 31, 2017, \$313.8 million, or 33%, of our loan portfolio was represented by commercial loans in Alaska.

Alaska's residents are not subject to any state income or state sales taxes. For over 30 years, Alaska residents have received annual distributions payable in October of each year from the Alaska Permanent Fund Corporation, which is

supported by royalties from oil production. The distribution was \$1,100 per eligible resident in 2017 for an aggregate distribution of approximately \$674 million. The Anchorage Economic Development Corporation estimates that, for most Anchorage households, distributions from the Alaska Permanent Fund Corporation exceed other Alaska taxes to which those households are subject (primarily real estate taxes).

Competition

We operate in a highly competitive and concentrated banking environment. We compete not only with other commercial banks, but also with many other financial competitors, including credit unions (including Alaska USA Federal Credit Union, one of the nation's largest credit unions), finance companies, mortgage banks and brokers, securities firms, insurance companies, private lenders, and other financial intermediaries, many of which have a state-wide or regional presence, and in some cases, a national presence. Many of our competitors have substantially greater resources and capital than we do and offer products and services that are not offered by us. Our non-bank competitors also generally operate under fewer regulatory constraints, and in the case of credit unions, are not subject to income taxes. We estimate that credit unions in Alaska have a 41% share of total deposits held in banks and credit unions in the state as of June 30, 2017. Changes in credit union regulations have eliminated the "common bond" of membership requirement and liberalized their lending authority to include business and real estate loans on par with commercial banks. The differences in resources and regulation may make it harder for us to compete profitably, to reduce the rates that we can earn on loans and investments, to increase the rates we must offer on deposits and other funds, and adversely affect our financial condition and earnings.

As our industry becomes increasingly dependent on and oriented toward technology-driven delivery systems, permitting transactions to be conducted via a computer or wireless device, non-bank institutions are able to attract funds and provide lending and other financial services even without offices located in our primary service area. Some insurance companies and brokerage firms compete for deposits by offering rates that are higher than may be appropriate for the Company in relation to its asset and liability management objectives. However, we offer a wide array of deposit products and services and believe we can compete effectively through relationship based pricing and effective delivery of "Superior Customer First Service". We also compete with full service investment firms for non-bank financial products and services offered by ECCM, ECIA and PWA.

Currently, there are seven commercial banks operating in Alaska. At June 30, 2017, the date of the most recently available information, Northrim Bank had approximately a 10% share of the Alaska commercial bank deposits, 15% in the Anchorage area, 14% in Juneau, 13% in Sitka, 11% in Matanuska-Susitna, 6% in Fairbanks, and 5% in Ketchikan.

The following table sets forth market share data for the commercial banks and credit unions having a presence in Alaska as of June 30, 2017, the most recent date for which comparative deposit information is available.

Financial institution	Number of branches	Total deposits (in thousands)	Market share of total financial institution deposits		Market share of total bank deposits	
Northrim Bank	14	\$1,252,795	7	%	10	%
Wells Fargo Bank Alaska	49	6,146,255	30	%	51	%
First National Bank Alaska	30	2,471,896	12	%	20	%
Key Bank	15	1,259,141	6	%	10	%
First Bank	9	481,114	2	%	4	%
Mt. McKinley Bank	5	307,284	1	%	3	%
Denali State Bank	5	250,469	1	%	2	%
Total bank branches	127	\$12,168,954	59	%	100	%
Credit unions ⁽¹⁾	98	\$8,610,059	41	%	NA	
Total financial institution branches	225	\$20,779,013	100	%	100	%

⁽¹⁾ SNL Financial Deposit Market Share Summary as of June 30, 2017.

Supervision and Regulation

The Company is a bank holding company within the meaning of the Bank Holding Company Act of 1956 (the "BHC Act") registered with and subject to examination by the Board of Governors of the Federal Reserve System (the

“FRB”). The Company’s bank subsidiary is an Alaska-state chartered commercial bank and is subject to examination, supervision, and regulation by the Alaska Department of Commerce, Community and Economic Development, Division of Banking, Securities and Corporations (the “Division”). The FDIC insures Northrim Bank’s deposits and also examines, supervises, and regulates Northrim Bank. The Company’s affiliated investment advisory and wealth management company, Pacific Portfolio Consulting, LLC, is subject to and regulated under the Investment Advisors Act of 1940 and applicable state investment advisor rules and regulations. The Company’s affiliated trust company, Pacific Portfolio Trust Company, is regulated as a non-depository trust company under the trust company laws of the State of Washington and is subject to supervision and examination by the Department of Financial Institutions of Washington State.

7

The Company's earnings and activities are affected, among other things, by legislation, by actions of the FRB, the Division, the FDIC and other regulators, by local legislative and administrative bodies, and decisions of courts. These include limitations on the ability of Northrim Bank to pay dividends to the Company, numerous federal and state consumer protection laws imposing requirements on the making, enforcement, and collection of consumer loans, and restrictions on and regulation of the sale of mutual funds and other uninsured investment products to customers. Regulation of banks and the financial services industry has been undergoing major changes in recent years, including the enactment in 2010 of the Dodd-Frank Wall Street Reform and Consumer Protection Act ("Dodd-Frank Act"). The Dodd-Frank Act significantly modifies and expands legal and regulatory requirements imposed on banks and other financial institutions.

The Dodd-Frank Act has significantly affected Northrim Bank and its business and operations. The Dodd-Frank Act permanently increased the maximum amount of deposit insurance coverage to \$250,000 per depositor and deposit insurance assessments paid by Northrim Bank are now based on Northrim Bank's total assets. Other Dodd-Frank Act changes include: (i) tightened capital requirements for Northrim Bank and the Company; (ii) new requirements on parties engaged in residential mortgage origination, brokerage, lending and securitization; (iii) expanded restrictions on affiliate and insider transactions; (iv) enhanced restrictions on management compensation and related governance procedures; (v) creation of a federal Consumer Financial Protection Bureau with broad authority to regulate consumer financial products and services; and (vi) restrictions and prohibitions on the ability of banking entities to engage in proprietary trading and to invest in or have certain relationships with hedge funds and private equity funds.

The Trump administration and various members of Congress have expressed a desire to modify or repeal parts of the Dodd-Frank Act. We cannot predict whether any modification or repeal will be enacted or, if so, any effect they would have on our business, operation or financial condition or on the financial services industry in general.

The Gramm-Leach-Bliley Act (the "GLB Act"), which was enacted in 1999, allows bank holding companies to elect to become financial holding companies, subject to certain regulatory requirements. In addition to the activities previously permitted bank holding companies, financial holding companies may engage in non-banking activities that are financial in nature, such as securities, insurance, and merchant banking activities, subject to certain limitations. The Company could utilize this structure to accommodate an expansion of its products and services in the future.

Bank holding companies, such as the Company, are subject to a variety of restrictions on the activities in which they can engage and the acquisitions they can make. The activities or acquisitions of bank holding companies, such as the Company, that are not financial holding companies, are limited to those which constitute banking, managing or controlling banks or which are closely related activities. A bank holding company is required to obtain the prior approval of the FRB for the acquisition of more than 5% of the outstanding shares of any class of voting securities or substantially all of the assets of any bank or bank holding company. Nonbank acquisitions and activities of a bank holding company are also generally limited to the acquisition of up to 5% of the outstanding shares of any class of voting securities of a company unless the FRB has previously determined that the nonbank activities are closely related to banking, or prior approval is obtained from the FRB.

The GLB Act also included extensive consumer privacy provisions. These provisions, among other things, require full disclosure of the Company's privacy policy to consumers and mandate offering the consumer the ability to "opt out" of having non-public personal information disclosed to third parties. Pursuant to these provisions, the federal banking regulators adopted privacy regulations. As a result of the Dodd-Frank Act, the rule-making authority for the privacy provisions of the GLB Act has been transferred to the CFPB. In addition, the states are permitted to adopt more extensive privacy protections through legislation or regulation.

There are various legal restrictions on the extent to which a bank holding company and certain of its nonbank subsidiaries can borrow or otherwise obtain credit from their banking subsidiaries or engage in certain other transactions with or involving those banking subsidiaries. With certain exceptions, federal law imposes limitations on, and requires collateral for, extensions of credit by insured depository institutions, such as Northrim Bank, to their non-bank affiliates, such as the Company. In addition, new capital rules may affect the Company's ability to pay dividends.

Subject to certain limitations and restrictions, a bank holding company, with prior approval of the FRB, may acquire an out-of-state bank. Banks in states that do not prohibit out-of-state mergers may merge with the approval of the appropriate federal banking agency. A state bank may establish a de novo branch out of state if such branching is permitted by the other state for state banks chartered by such other state.

Among other things, applicable federal and state statutes and regulations which govern a bank's activities relate to minimum capital requirements, required reserves against deposits, investments, loans, legal lending limits, mergers and

consolidations, borrowings, issuance of securities, payment of dividends, establishment of branches and other aspects of its operations. The Division and the FDIC also have authority to prohibit banks under their supervision from engaging in what they consider to be unsafe or unsound practices.

There also are certain limitations on the ability of the Company to pay dividends to its shareholders. It is the policy of the FRB that bank holding companies should pay cash dividends on common stock only out of net income available over the past year and only if the prospective rate of earnings retention is consistent with the organization's current and expected future capital needs, asset quality and overall financial condition. The policy provides that bank holding companies should not maintain a level of cash dividends that undermines a bank holding company's ability to serve as a source of strength to its banking subsidiaries. Additionally, the Alaska Corporations Code generally prohibits the Company from making any distributions to the Company's shareholders unless the amount of the retained earnings of the Company immediately before the distribution equals or exceeds the amount of the proposed distribution. The Alaska Corporations Code also prohibits the Company from making any distribution to the Company's shareholders if the Company or a subsidiary of the Company making the distribution is, or as a result of the distribution would be, likely to be unable to meet its liabilities as they mature. Under Alaska law, the Bank is not permitted to pay or declare a dividend in an amount greater than its undivided profits.

Various federal and state statutory provisions also limit the amount of dividends that subsidiary banks can pay to their holding companies without regulatory approval. The FDIC or the Division could take the position that paying a dividend would constitute an unsafe or unsound banking practice. In addition, new capital rules may affect the Bank's ability to pay dividends.

Under longstanding FRB policy and under the Dodd-Frank Act, a bank holding company is required to act as a source of financial strength for its subsidiary banks. The Company could be required to commit resources to its subsidiary banks in circumstances where it might not do so, absent such requirement.

Both the Company and the Bank are required to maintain minimum levels of regulatory capital. In July 2013, federal banking regulators (including the FDIC and the FRB) adopted new capital requirement rules (the "Rules"). The Rules apply to both depository institutions (such as the Bank) and their holding companies (such as the Company). The Rules reflect, in part, certain standards initially adopted by the Basel Committee on Banking Supervision in December 2010 (which standards are commonly referred to as "Basel III") as well as requirements contemplated by the Dodd-Frank Act. The Rules have applied to both the Company and the Bank since the beginning of 2015.

The Rules recognize three types, or tiers, of capital: common equity Tier 1 capital, additional Tier 1 capital and Tier 2 capital. Common equity Tier 1 capital generally consists of retained earnings and common stock instruments (subject to certain adjustments), as well as accumulated other comprehensive income ("AOCI"), except to the extent that the Company and the Bank exercise a one-time irrevocable option to exclude certain components of AOCI. Additional Tier 1 capital generally includes noncumulative perpetual preferred stock and related surplus subject to certain adjustments and limitations. Tier 2 capital generally includes certain capital instruments (such as subordinated debt) and portions of the amounts of the allowance for loan and lease losses, subject to certain requirements and deductions. The term "Tier 1 capital" means common equity Tier 1 capital plus additional Tier 1 capital, and the term "total capital" means Tier 1 capital plus Tier 2 capital.

The Rules generally measure an institution's capital using four capital measures or ratios. The common equity Tier 1 capital ratio is the ratio of the institution's common equity Tier 1 capital to its total risk-weighted assets. The Tier 1 capital ratio is the ratio of the institution's total Tier 1 capital to its total risk-weighted assets. The total capital ratio is the ratio of the institution's total capital to its total risk-weighted assets. The leverage ratio is the ratio of the institution's Tier 1 capital to its average total consolidated assets. To determine risk-weighted assets, assets of an institution are generally placed into a risk category and given a percentage weight based on the relative risk of that category. The percentage weights range from 0% to 1,250%. An asset's risk-weighted value will generally be its percentage weight multiplied by the asset's value as determined under generally accepted accounting principles. In addition, certain off-balance-sheet items are converted to balance-sheet credit equivalent amounts, and each amount is then assigned to one of the risk categories. An institution's federal regulator may require the institution to hold more capital than would otherwise be required under the Rules if the regulator determines that the institution's capital requirements under the Rules are not commensurate with the institution's credit, market, operational or other risks.

Both the Company and the Bank are required to have a common equity Tier 1 capital ratio of 4.5% as well as a Tier 1 leverage ratio of 4.0%, a Tier 1 risk-based ratio of 6.0% and a total risk-based ratio of 8.0%. In addition to the preceding requirements, both the Company and the Bank are required to establish a “conservation buffer,” consisting of common equity Tier 1 capital, which is at least 2.5% above each of the preceding common equity Tier 1 capital ratio, the Tier 1 risk-based ratio and the total risk-based ratio. An institution that does not meet the conservation buffer will be subject to restrictions on certain activities including payment of dividends, stock repurchases and discretionary bonuses to executive officers.

The Rules set forth the manner in which certain capital elements are determined, including but not limited to, requiring certain deductions related to mortgage servicing rights and deferred tax assets. When the federal banking regulators initially proposed new capital rules in 2012, the rules would have phased out trust preferred securities as a component of Tier 1 capital. As finally adopted, however, the Rules permit holding companies with less than \$15 billion in total assets as of December 31, 2009 (which includes the Company) to continue to include trust preferred securities issued prior to May 19, 2010 in Tier 1 capital, generally up to 25% of other Tier 1 capital.

The Rules made changes in the methods of calculating certain risk-based assets, which in turn affects the calculation of risk-based ratios. Higher or more sensitive risk weights are assigned to various categories of assets, among which are commercial real estate, credit facilities that finance the acquisition, development or construction of real property, certain exposures or credits that are 90 days past due or are nonaccrual, foreign exposures, certain corporate exposures, securitization exposures, equity exposures and in certain cases mortgage servicing rights and deferred tax assets.

Both the Company and the Bank were required to begin compliance with the Rules on January 1, 2015. The conservation buffer started to be phased in beginning in 2016 and will take full effect on January 1, 2019. Certain calculations under the Rules will also have phase-in periods. We believe that the current capital levels of the Company and the Bank are in compliance with the standards under the Rules including the conservation buffer.

In addition to the minimum capital standards, the federal banking agencies have issued regulations to implement a system of "prompt corrective action." These regulations apply to the Bank but not the Company. The regulations establish five capital categories; under the Rules, a bank generally is:

"well capitalized" if it has a total risk-based capital ratio of 10.0% or more, a Tier 1 risk-based capital ratio of 8.0% or more, a common equity Tier 1 risk-based ratio of 6.5% or more, and a leverage capital ratio of 5.0% or more, and is not subject to any written agreement, order or capital directive to meet and maintain a specific capital level for any capital measure;

"adequately capitalized" if it has a total risk-based capital ratio of 8.0% or more, a Tier 1 risk-based capital ratio of 6.0% or more, a common equity Tier 1 risk-based ratio of 4.5% or more, and a leverage capital ratio of 4.0% or more;

"undercapitalized" if it has a total risk-based capital ratio less than 8.0%, a Tier 1 risk-based capital ratio less than 6.0%, a common equity risk-based ratio less than 4.5% or a leverage capital ratio less than 4.0%;

"significantly undercapitalized" if it has a total risk-based capital ratio less than 6.0%, a Tier 1 risk-based capital ratio less than 4.0%, a common equity risk-based ratio less than 3.0% or a leverage capital ratio less than 3.0%; and

"critically undercapitalized" if it has a ratio of tangible equity to total assets that is equal to or less than 2.0%.

A bank that, based upon its capital levels, is classified as "well capitalized," "adequately capitalized" or "undercapitalized" may be treated as though it were in the next lower capital category if the appropriate federal banking agency, after notice and opportunity for a hearing, determines that an unsafe or unsound condition, or an unsafe or unsound practice, warrants such treatment.

At each successive lower capital category, a bank is subject to increasing supervisory restrictions. For example, being "adequately capitalized" rather than "well-capitalized" affects a bank's ability to accept brokered deposits without the prior approval of the FDIC, and may cause greater difficulty obtaining retail deposits. Banks in the "adequately capitalized" classification may have to pay higher interest rates to continue to attract those deposits, and higher deposit insurance rates for those deposits. This status also affects a bank's eligibility for a streamlined review process for acquisition proposals.

Management intends to maintain capital ratios for the Bank in 2018 that exceed the FDIC's new requirements for the "well-capitalized" capital requirement classification under the Basel Committee on Banking Supervision rules which took effect for the Company on January 1, 2015. The dividends that the Bank pays to the Company will be limited to

the extent necessary for the Bank to meet the regulatory requirements of a “well-capitalized” bank. The capital ratios for the Company exceed those for the Bank primarily because the trust preferred securities offerings that the Company completed in the second quarter of 2003 and in the fourth quarter of 2005 are included in the Company’s capital

for regulatory purposes, although they are accounted for as a liability in its consolidated financial statements. The trust preferred securities are not accounted for on the Bank's financial statements nor are they included in its capital (although the Company did contribute to the Bank a portion of the cash proceeds from the sale of those securities). The Company redeemed \$8 million trust preferred securities in August 2017. As a result, the Company has \$10 million and \$18 million more in regulatory capital than the Bank at December 31, 2017 and 2016, respectively, which explains most of the difference in the capital ratios for the two entities.

The Bank is required to file periodic reports with the FDIC and the Division and is subject to periodic examinations and evaluations by those regulatory authorities. These examinations must be conducted every 12 months, except that certain "well-capitalized" banks may be examined every 18 months. The FDIC and the Division may each accept the results of an examination by the other in lieu of conducting an independent examination.

In the liquidation or other resolution of a failed insured depository institution, claims for administrative expenses (including certain employee compensation claims) and deposits are afforded a priority over other general unsecured claims, including non-deposit claims, and claims of a parent company such as the Company. Such priority creditors would include the FDIC, which succeeds to the position of insured depositors to the extent it has made payments to such depositors.

The Company is also subject to the information, proxy solicitation, insider trading restrictions and other requirements of the Securities Exchange Act of 1934, as amended (the "Securities Exchange Act of 1934"), including certain requirements under the Sarbanes-Oxley Act of 2002.

Northrim Bank is subject to the Community Reinvestment Act of 1977 ("CRA"). The CRA requires that Northrim Bank help meet the credit needs of the communities it serves, including low and moderate income neighborhoods, consistent with the safe and sound operation of the institution. The FDIC assigns one of four possible ratings to Northrim Bank's CRA performance and makes the rating and the examination reports publicly available. The four possible ratings are outstanding, satisfactory, needs to improve and substantial noncompliance. A financial institution's CRA rating can affect an institution's future business. For example, a federal banking agency will take CRA performance into consideration when acting on an institution's application to establish or move a branch, to merge or to acquire assets or assume liabilities of another institution. In its most recent CRA examination, Northrim Bank received a "Satisfactory" rating from the FDIC.

The Company is also subject to the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (the "USA PATRIOT Act"). Among other things, the USA PATRIOT Act requires the Company and the Bank to adopt and implement specific policies and procedures designed to prevent and defeat money laundering. Management believes the Company is in compliance with the USA PATRIOT Act as in effect on December 31, 2017.

In addition, the Company and its affiliates are subject to a broad array of financial and state consumer protection laws and regulations. Among other things, these laws and regulations mandate certain disclosure requirements and regulate the manner in which financial institutions deal with their customers.

Available Information

The Company's annual report on Form 10-K and quarterly reports on Form 10-Q, as well as its current reports on Form 8-K and proxy statement filings (and all amendments thereto), which are filed with the Securities and Exchange Commission ("SEC"), are accessible free of charge at our website at <http://www.northrim.com> as soon as reasonably practicable after filing with the SEC. By making this reference to our website, the Company does not intend to incorporate into this report any information contained in the website. The website should not be considered part of this report.

The public may read and copy any materials we file with the SEC at the SEC's Public Reference Room at 100 F Street, NE, Washington, DC 20549. The public may also obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC maintains a website at <http://www.sec.gov> that contains reports, proxy and information statements, and other information regarding issuers, including the Company, that file electronically with the SEC.

ITEM 1A. RISK FACTORS

An investment in the Company's common stock is subject to risks inherent to the Company's business. The material risks and uncertainties that management believes affect the Company are described below. Before making an investment decision, you should carefully consider the risks and uncertainties described below together with all of the other information included or incorporated by reference in this report. The risks and uncertainties described below are not the only ones facing the Company. Additional risks and uncertainties that management is not aware of or focused on or that management currently deems immaterial may also impair the Company's business operations. This report is qualified in its entirety by these risk factors.

If any of the following risks actually occur, the Company's financial condition and results of operations could be materially and adversely affected. If this were to happen, the value of the Company's common stock could decline significantly, and you could lose all or part of your investment.

Current economic conditions in the State of Alaska pose significant challenges for us and could adversely affect our financial condition and results of operations.

We are operating in an uncertain economic environment. The decrease in the price of oil from 2014 through 2016 has led to a significant deficit in the budget for the State of Alaska, and we believe that absent action by the Alaska state legislature, these deficits are expected to exhaust cash savings of the state within approximately a year. In the longer term, relatively low oil prices are expected to negatively impact the overall economy in Alaska on a larger scale as we estimate that one third of the Alaskan economy is related to oil. Financial institutions continue to be affected by changing conditions in the real estate and financial markets, along with an arduous regulatory climate. Dramatic declines in the United States housing market from 2008 through 2012, with falling home prices and increasing foreclosures and unemployment, resulted in significant writedowns of asset values by financial institutions. While conditions have improved nationally, a return to a recessionary economy could result in financial stress on our borrowers that would adversely affect our financial condition and results of operations. Deteriorating conditions in the regional economies of Anchorage, Matanuska-Susitna Valley, Fairbanks, and the Southeast areas of Alaska served by the Company could drive losses beyond that which is provided for in our allowance for loan losses. We may also face the following risks in connection with events:

Ineffective monetary policy could cause rapid changes in interest rates and asset values that would have a materially adverse impact on our profitability and overall financial condition.

Market developments may affect consumer confidence levels and may cause adverse changes in payment patterns, resulting in increased delinquencies and default rates on loans and other credit facilities.

Regulatory scrutiny of the industry could increase, leading to harsh regulation of our industry that could lead to a higher cost of compliance, limit our ability to pursue business opportunities and increase our exposure to the judicial system and the plaintiff's bar.

Erosion in the fiscal condition of the U.S. Treasury could lead to new taxes that would limit the ability of the Company to pursue growth and return profits to shareholders.

If these conditions or similar ones develop, we could experience adverse effects on our financial condition.

Our concentration of operations in the Anchorage, Matanuska-Susitna Valley, Fairbanks and Southeast areas of Alaska makes us more sensitive to downturns in those areas.

Substantially all of our business is derived from the Anchorage, Matanuska-Susitna Valley, Fairbanks, and Southeast areas of Alaska. The majority of our lending has been with Alaska businesses and individuals. At December 31, 2017, approximately 71% of the Bank's loans are secured by real estate and 3% are unsecured. Approximately 26% are for general commercial uses, including professional, retail, and small businesses, and are secured by non-real estate assets. Repayment is expected from the borrowers' cash flow or, secondarily, the collateral. Our exposure to credit loss, if any, is the outstanding amount of the loan if the collateral is proved to be of no value. These areas rely primarily upon the natural resources industries, particularly oil production, as well as tourism and government and U.S. military spending for their economic success. In particular, the oil industry plays a significant role in the Alaskan economy. We believe that the dramatic decline in the global price of oil from 2014 through 2016 poses a significant risk for the Alaskan economy which is heavily dependent on the petroleum industry and if the global price of oil continues to remain at the current relatively low level, the Alaskan economy would likely be adversely affected. We estimate that one third of Alaska's gross state product is currently derived from the oil industry.

Our business is and will remain sensitive to economic factors that relate to these industries and local and regional business conditions. As a result, local or regional economic downturns, or downturns that disproportionately affect one or more of the key industries in regions served by the Company, may have a more pronounced effect upon our business than they might on an institution that is less geographically concentrated. The extent of the future impact of these events on economic and business conditions cannot be predicted; however, prolonged or acute fluctuations could have a material and adverse impact upon our results of operation and financial condition.

Changes in market interest rates could adversely impact the Company.

Our earnings are impacted by changing interest rates. Changes in interest rates affect the demand for new loans, the credit profile of existing loans, the rates received on loans and securities, and rates paid on deposits and borrowings. These impacts

12

may negatively impact our ability to attract deposits, make loans, and achieve satisfactory interest rate spreads, which could adversely affect our financial condition or results of operations. In particular, increases in interest rates will likely reduce RML's revenues by further reducing the market for refinancings, as well as the demand for RML's other residential loan products. Additionally, increases in interest rates may impact our borrowers' ability to make loan payments, particularly in our commercial loan portfolio.

Interest rates may be affected by many factors beyond our control, including general and economic conditions and the monetary and fiscal policies of various governmental and regulatory authorities. Market volatility in interest rates can be difficult to predict, as unexpected interest rate changes may result in a sudden impact while anticipated changes in interest rates generally impact the mortgage rate market prior to the actual rate change. Exposure to interest rate risk is managed by monitoring the repricing frequency of our rate-sensitive assets and rate-sensitive liabilities over any given period. Although we believe the current level of interest rate sensitivity is reasonable, significant fluctuations in interest rates could potentially have an adverse effect on our business, financial condition and results of operations.

We operate in a highly regulated environment and changes of or increases in banking or other laws and regulations or governmental fiscal or monetary policies could adversely affect us.

We are subject to extensive regulation, supervision and examination by federal and state banking authorities. In addition, as a publicly-traded company, we are subject to regulation by the SEC and NASDAQ. Any change in applicable regulations or federal or state legislation or in policies or interpretations or regulatory approaches to compliance and enforcement, income tax laws and accounting principles could have a substantial impact on us and our operations. Changes in laws and regulations may also increase our expenses by imposing additional fees or taxes or restrictions on our operations. Additional legislation and regulations that could significantly affect our authority and operations may be enacted or adopted in the future, which could have a material adverse effect on our financial condition and results of operations. Failure to appropriately comply with any such laws, regulations or principles could result in sanctions by regulatory agencies or damage to our reputation, all of which could adversely affect our business, financial condition or results of operations.

In that regard, the Dodd-Frank Act was enacted in July 2010. Among other provisions, the Dodd-Frank Act created a new Consumer Financial Protection Bureau with broad powers to regulate consumer financial products such as credit cards and mortgages, created a Financial Stability Oversight Council comprised of the heads of other regulatory agencies, has resulted in new capital requirements from federal banking agencies, placed new limits on electronic debt card interchange fees, and requires banking regulators, the SEC and national stock exchanges to adopt significant new corporate governance and executive compensation reforms.

Certain provisions of these new rules have phase-in periods, including a 2.5% conservation buffer, which began to be phased-in in 2016 and is scheduled to take full effect on January 1, 2019. Further, regulators have significant discretion and authority to prevent or remedy practices that they deem to be unsafe or unsound, or violations of laws or regulations by financial institutions and holding companies in the performance of their supervisory and enforcement duties. These powers have been utilized more frequently in recent years due to the serious national economic conditions that faced the financial system in late 2008 and early 2009. The exercise of regulatory authority may have a negative impact on our financial condition and results of operations. Additionally, our business is affected significantly by the fiscal and monetary policies of the U.S. federal government and its agencies, including the FRB. We cannot accurately predict the full effects of recent or future legislation or the various other governmental, regulatory, monetary and fiscal initiatives which have been and may be enacted on the financial markets and on the Company. The terms and costs of these activities could materially and adversely affect our business, financial condition, results of operations and the trading price of our common stock.

We are subject to more stringent capital and liquidity requirements which may adversely affect our net income and future growth.

In July 2013, the FRB and the FDIC announced the new capital rules, which apply to both depository institutions and (subject to certain exceptions not applicable to the Company) their holding companies. As described in further detail above in "Item 1 Business - Supervision and Regulation" these rules created increased capital requirements for United States depository institutions and their holding companies. These rules include risk-based and leverage capital ratio

requirements, which became effective on January 1, 2015. These rules also revise the prompt corrective action framework, which is designed to place restrictions on insured depository institutions, including the Bank, if their capital levels do not meet certain thresholds. These revisions also became effective January 1, 2015.

Our failure to comply with the minimum capital requirements could result in our regulators taking formal or informal actions against us which could restrict our future growth or operations.

The operations of our business, including our interaction with customers, are increasingly done via electronic means, and this has increased our risks related to cybersecurity.

The Company is exposed to cyber-attacks in the normal course of business. In general, cyber incidents can result from deliberate attacks or unintentional events. We have observed an increased level of attention focused on cyber-attacks that include, but are not limited to, gaining unauthorized access to digital systems for purposes of misappropriating assets or sensitive information, corrupting data or causing operational disruption. Cyber-attacks may also be carried out in a manner that does not require gaining unauthorized access, such as by causing denial-of-service attacks on websites. Cyber-attacks may be carried out by third parties or insiders using techniques that range from highly sophisticated efforts to electronically circumvent network security or overwhelm websites to more traditional intelligence gathering and social engineering aimed at obtaining information necessary to gain access. The objectives of cyber-attacks vary widely and may include theft of financial assets, intellectual property, or other sensitive information belonging to the Company or our customers. Cyber-attacks may also be directed at disrupting the operations of the Company's business.

While the Company has not incurred any material losses related to cyber-attacks, nor are we aware of any specific or threatened cyber-incidents as of the date of this report, we may incur substantial costs and suffer other negative consequences if we fall victim to successful cyber-attacks. Such negative consequences could include remediation costs that may include liability for stolen assets or information and repairing system damage that may have been caused; increased cybersecurity protection costs that may include organizational changes, deploying additional personnel and protection technologies, training employees and engaging third party experts and consultants; lost revenues resulting from unauthorized use of proprietary information or the failure to retain or attract customers following an attack; litigation; and reputational damage adversely affecting customer or investor confidence.

The network and computer systems on which we depend could fail.

Our computer systems could be vulnerable to unforeseen problems. Because we conduct a part of our business over the Internet and outsource several critical functions to third parties, operations will depend on our ability, as well as the ability of third party service providers, to protect computer systems and network infrastructure against damage from fire, power loss, telecommunications failure, physical break-ins or similar catastrophic events. Any damage or failure that causes interruptions in operations may compromise our ability to perform critical functions in a timely manner and could have a material adverse effect on our business, financial condition and results of operations as well as our reputation and customer or vendor relationships.

Our business is highly reliant on third party vendors and our ability to manage the operational risks associated with outsourcing those services.

We rely on third parties to provide services that are integral to our operations. These vendors provide services that support our operations, including the storage and processing of sensitive consumer and business customer data. The loss of these vendor relationships, or a failure of these vendors' systems, could disrupt the services we provide to our customers and cause us to incur significant expense in connection with replacing these services. Further, a cyber security breach of a vendor's system may result in theft of our data or disruption of business processes. A material breach of customer data security at a service provider's site may negatively impact our business reputation and cause a loss of customers; result in increased expense to contain the event and/or require that we provide credit monitoring services for affected customers, result in regulatory fines and sanctions and/or result in litigation. In most cases, we will remain primarily liable to our customers for losses arising from a breach of a vendor's data security system. We rely on our outsourced service providers to implement and maintain prudent cyber security controls. We have procedures in place to assess a vendor's cyber security controls prior to establishing a contractual relationship and to periodically review assessments of those control systems; however, these procedures are not infallible and a vendor's system can be breached despite the procedures we employ.

We continually encounter technological change, and we may have fewer resources than many of our competitors to continue to invest in technological improvements.

The financial services industry is undergoing rapid technological changes with frequent introductions of new technology-driven products and services. The effective use of technology increases efficiency and enables financial institutions to better serve customers and to reduce costs. Our future success will depend, in part, upon our ability to address the needs of our clients by using technology to provide products and services that will satisfy client demands for convenience, as well as to create additional efficiencies in our operations. Many national vendors provide turn-key services to community banks, such as Internet banking

and remote deposit capture that allow smaller banks to compete with institutions that have substantially greater resources to invest in technological improvements. We may not be able, however, to effectively implement new technology-driven products and services or be successful in marketing these products and services to our customers.

Residential mortgage lending is a market sector that experiences significant volatility and is influenced by many factors beyond our control.

The Company earns revenue from the residential mortgage lending activities primarily in the form of gains on the sale of mortgage loans that we originate and sell to the secondary market. Residential mortgage lending in general has experienced substantial volatility in recent periods primarily due to changes in interest rates and other market forces beyond our control. Interest rate changes, such as rate increases implemented by the FRB, may result in lower rate locks and closed loan volume, which may adversely impact the earnings and results of operations of RML. In addition, an increase in interest rates may materially and adversely affect our future loan origination volume and margins.

If we do not comply with the agreements governing servicing of loans or if others allege non-compliance, our business and results of operations may be harmed.

We have contractual obligations under the servicing agreements pursuant to which we service mortgage loans. Many of our servicing agreements require adherence to general servicing standards, and certain contractual provisions delegate judgment over various servicing matters to us. Our servicing practices, and the judgments that we make in our servicing of loans, could be questioned by parties to these agreements. We could also become subject to litigation claims seeking damages or other remedies arising from alleged breaches of our servicing agreements.

Additionally, under our loan servicing program we retain servicing rights on mortgage loans originated by RML and sold to the Alaska Housing Finance Corporation. If we breach any of the representations and warranties in our servicing agreements with the Alaska Housing Finance Corporation, we may be required to repurchase any loan sold under this program and record a loss upon repurchase and/or bear any subsequent loss on the loan. We may not have any remedies available to us against third parties for such losses, or the remedies might not be as broad as the remedies available to the Alaska Housing Finance Corporation against us.

Our loan loss allowance may not be adequate to cover future loan losses, which may adversely affect our earnings.

We have established a reserve for probable losses we expect to incur in connection with loans in our credit portfolio. This allowance reflects our estimate of the collectability of certain identified loans, as well as an overall risk assessment of total loans outstanding. Our determination of the amount of loan loss allowance is highly subjective; although management personnel apply criteria such as risk ratings and historical loss rates; these factors may not be adequate predictors of future loan performance. Accordingly, we cannot offer assurances that these estimates ultimately will prove correct or that the loan loss allowance will be sufficient to protect against losses that ultimately may occur. If our loan loss allowance proves to be inadequate, we may suffer unexpected charges to income, which would adversely impact our results of operations and financial condition. Moreover, bank regulators frequently monitor banks' loan loss allowances, and if regulators were to determine that the allowance is inadequate, they may require us to increase the allowance, which also would adversely impact our results of operations and financial condition.

We have a significant concentration in real estate lending. A downturn in real estate within our markets would have a negative impact on our results of operations.

Approximately 71% of the Bank's loan portfolio at December 31, 2017 consisted of loans secured by commercial and residential real estate located in Alaska. Additionally, all of the Company's loans held for sale are secured by residential real estate. A slowdown in the residential sales cycle in our major markets and a constriction in the availability of mortgage financing, such as what occurred during the financial crisis in the United States housing market from 2008 through 2012, would negatively impacted residential real estate sales, which would result in customers' inability to repay loans. This would result in an increase in our non-performing assets if more borrowers fail to perform according to loan terms and if we take possession of real estate properties. Additionally, if real estate values decline, the value of real estate collateral securing our loans could be significantly reduced. If any of these effects continue or become more pronounced, loan losses will increase more than we expect and our financial condition and results of operations would be adversely impacted.

Further, approximately 51% of the Bank's loan portfolio at December 31, 2017 consisted of commercial real estate loans. While our investments in these types of loans have not been as adversely impacted as residential construction and land development loans, there can be no assurance that the credit quality in these portfolios will remain stable. Commercial construction

and commercial real estate loans typically involve larger loan balances to single borrowers or groups of related borrowers. Consequently, an adverse development with respect to one commercial loan or one credit relationship exposes us to significantly greater risk of loss compared to an adverse development with respect to a consumer loan. The credit quality of these loans may deteriorate more than expected which may result in losses that exceed the estimates that are currently included in our loan loss allowance, which could adversely affect our financial conditions and results of operations.

Real estate values may decrease leading to additional and greater than anticipated loan charge-offs and valuation writedowns on our other real estate owned (“OREO”) properties.

Real estate owned by the Bank and not used in the ordinary course of its operations is referred to as “other real estate owned” or “OREO” property. We foreclose on and take title to the real estate serving as collateral for defaulted loans as part of our business. At December 31, 2017, the Bank held \$8.7 million of OREO properties, most of which relate to a commercial real estate loan. Increased OREO balances lead to greater expenses as we incur costs to manage and dispose of the properties. Our ability to sell OREO properties is affected by public perception that banks are inclined to accept large discounts from market value in order to quickly liquidate properties. Any decrease in market prices may lead to OREO writedowns, with a corresponding expense in our income statement. We evaluate OREO property values periodically and writedown the carrying value of the properties if the results of our evaluations require it. Further writedowns on OREO or an inability to sell OREO properties could have a material adverse effect on our results of operations and financial condition.

Changes in the FRB’s monetary or fiscal policies could adversely affect our results of operations and financial condition.

Our earnings will be affected by domestic economic conditions and the monetary and fiscal policies of the United States government and its agencies. The FRB has, and is likely to continue to have, an important impact on the operating results of depository institutions through its power to implement national monetary policy, among other things, in order to curb inflation or combat a recession. The FRB affects the levels of bank loans, investments and deposits through its control over the issuance of United States government securities, its regulation of the discount rate applicable to member banks and its influence over reserve requirements to which member banks are subject. We cannot predict the nature or impact of future changes in monetary and fiscal policies.

We conduct substantially all of our operations through Northrim Bank, our banking subsidiary; our ability to pay dividends, repurchase our shares, or to repay our indebtedness depends upon liquid assets held by the holding company and the results of operations of our subsidiaries and their ability to pay dividends.

The Company is a separate legal entity from our subsidiaries. It receives substantially all of its revenue from dividends paid from the Bank. There are legal limitations on the extent to which the Bank may extend credit, pay dividends or otherwise supply funds to, or engage in transactions with us. Our inability to receive dividends from the Bank could adversely affect our business, financial condition, results of operations and prospects.

Our net income depends primarily upon the Bank’s net interest income, which is the income that remains after deducting from total income generated by earning assets the expense attributable to the acquisition of the funds required to support earning assets (primarily interest paid on deposits and borrowings). The amount of interest income is dependent on many factors including the volume of earning assets, the general level of interest rates, the dynamics of changes in interest rates and the levels of nonperforming loans. All of those factors affect the Bank’s ability to pay dividends to the Company. In 2016, a requirement to have a capital conservation buffer started to be phased in and this requirement, which is scheduled to come into full effect on January 1, 2019 could adversely affect the Bank’s ability to pay dividends.

Various statutory provisions restrict the amount of dividends the Bank can pay to us without regulatory approval. Under Alaska law, a bank may not declare or pay a dividend in an amount greater than its net undivided profits then on hand. In addition, the Bank may not pay cash dividends if that payment could reduce the amount of its capital below that necessary to meet the “adequately capitalized” level in accordance with regulatory capital requirements. It is also possible that, depending upon the financial condition of the Bank and other factors, regulatory authorities could conclude that payment of dividends or other payments, including payments to us, is an unsafe or unsound practice and impose restrictions or prohibit such payments. It is the policy of the FRB that bank holding

companies should pay cash dividends on common stock only out of net income available over the past year and only if prospective rate of earnings retention is consistent with the organization's current and expected future capital needs, asset quality and overall financial condition. The policy provides that bank holding companies should not maintain a level of cash dividends that undermines a bank holding company's ability to serve as a source of strength to its banking subsidiaries.

The soundness of other financial institutions could adversely affect us.

Our ability to engage in routine funding transactions could be adversely affected by the actions and commercial soundness of other financial institutions. Financial services institutions are interrelated as a result of trading, clearing, counterparty or other relationships. As a result, defaults by, or even rumors or questions about, one or more financial services institutions, or the financial services industry generally, have led to market-wide liquidity problems and could lead to losses or defaults by us or by other institutions. Many of these transactions expose us to credit risk in the event of default of our counterparty or client. In addition, our credit risk may be exacerbated when the collateral held by us cannot be realized upon or is liquidated at prices not sufficient to recover the full amount of the financial instrument exposure. There can be no assurance that any such losses would not materially and adversely affect our results of operations.

The financial services business is intensely competitive and our success will depend on our ability to compete effectively.

The financial services business in our market areas is highly competitive. It is becoming increasingly competitive due to changes in regulation, technological advances, and the accelerating pace of consolidation among financial services providers. We face competition both in attracting deposits and in originating loans. We compete for loans principally through the pricing of interest rates and loan fees and the efficiency and quality of services. Increasing levels of competition in the banking and financial services industries may reduce our market share or cause the prices charged for our services to fall. Improvements in technology, communications, and the internet have intensified competition. As a result, our competitive position could be weakened, which could adversely affect our financial condition and results of operations.

We are a community bank and our ability to maintain our reputation is critical to the success of our business and the failure to do so could materially adversely affect our performance.

We are a community bank, and our reputation is one of the most valuable components of our business. As such, we strive to conduct our business in a manner that enhances our reputation. This is done, in part, by recruiting, hiring and retaining employees who share our core values of being an integral part of the communities we serve, delivering superior service to our customers and caring about our customers and associates. If our reputation is negatively affected, by the actions of our employees or otherwise, our business and, therefore, our operating results could be materially adversely affected.

We may be unable to attract and retain key employees and personnel.

We will be dependent for the foreseeable future on the services of Joseph M. Schierhorn, our Chairman of the Board, President, Chief Executive Officer, and Chief Operating Officer of the Company; Michael Martin, our Executive Vice President, General Counsel and Corporate Secretary; and Jed W. Ballard, our Executive Vice President and Chief Financial Officer. While we maintain keyman life insurance on the lives of Messrs. Schierhorn and Martin in the amounts of \$2 million each, we may not be able to timely replace Mr. Schierhorn or Mr. Martin with a person of comparable ability and experience should the need to do so arise, causing losses in excess of the insurance proceeds. The unexpected loss of key employees could have a material adverse effect on our business and possibly result in reduced revenues and earnings.

Liquidity risk could impair our ability to fund operations and jeopardize our financial conditions.

Liquidity is essential to our business. An inability to raise funds through deposits, borrowings and other sources could have a substantial negative effect on our liquidity and severely constrain our financial flexibility. Our primary source of funding is deposits gathered through our network of branch offices. Our access to funding sources in amounts adequate to finance our activities on terms that are acceptable to us could be impaired by factors that affect us specifically or the financial services industry or the economy in general. Factors that could negatively impact our access to liquidity sources include:

- a decrease in the level of our business activity as a result of an economic downturn in the markets in which our loans are concentrated;
- adverse regulatory actions against us; or
- our inability to attract and retain deposits.

Our ability to borrow could be impaired by factors that are not specific to us or our region, such as a disruption in the financial markets or negative views and expectations about the prospects for the financial services industry and unstable credit markets.

17

A failure of a significant number of our borrowers, guarantors and related parties to perform in accordance with the terms of their loans would have an adverse impact on our results of operations.

A source of risk arises from the possibility that losses will be sustained if a significant number of our borrowers, guarantors and related parties fail to perform in accordance with the terms of their loans. We have adopted underwriting and credit monitoring procedures and credit policies, including the establishment and review of our allowance for loan losses, which we believe are appropriate to minimize this risk by assessing the likelihood of nonperformance, tracking loan performance, and diversifying our credit portfolio. These policies and procedures, however, may not prevent unexpected losses that could materially affect our results of operations.

Non-compliance with the USA PATRIOT Act, Bank Secrecy Act, Real Estate Settlement Procedures Act, Truth-in-Lending Act or other laws and regulations could result in fines, sanctions or other adverse consequences. Financial institutions are required under the USA PATRIOT Act and Bank Secrecy Act to develop programs to prevent financial institutions from being used for money-laundering and terrorist activities. Financial institutions are also obligated to file suspicious activity reports with the United States Treasury Department's Office of Financial Crimes Enforcement Network if such activities are detected. These rules also require financial institutions to establish procedures for identifying and verifying the identity of customers seeking to open new financial accounts. Failure or the inability to comply with these regulations could result in fines or penalties, intervention or sanctions by regulators, and costly litigation or expensive additional controls and systems. In recent years, several banking institutions have received large fines for non-compliance with these laws and regulations. In addition, the federal government has in place laws and regulations relating to residential and consumer lending, as well as other activities with customers, that create significant compliance burdens and financial risks. We have developed policies and continue to augment procedures and systems designed to assist in compliance with these laws and regulations; however, it is possible for such safeguards to fail or prove deficient during the implementation phase to avoid non-compliance with such laws.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

The following sets forth information about our Community Banking branch locations:

Locations	Type	Leased/Owned
Midtown Financial Center: Northrim Headquarters 3111 C Street, Anchorage, AK	Traditional	Land partially leased, partially owned, building owned
SouthSide Financial Center 8730 Old Seward Highway, Anchorage, AK	Traditional	Land leased, building owned
Lake Otis Community Branch 2270 East 37th Avenue, Anchorage, AK	Traditional	Land leased, building owned
Huffman Branch 1501 East Huffman Road, Anchorage, AK	Instore	Leased
Jewel Lake Branch 9170 Jewel Lake Road Suite 101, Anchorage, AK	Traditional	Leased
Seventh Avenue Branch 517 West Seventh Avenue, Suite 300, Anchorage, AK	Traditional	Leased
West Anchorage Branch 2709 Spenard Road, Anchorage, AK	Traditional	Owned
Eagle River Branch 12812 Old Glenn Highway, Suite C03, Eagle River, AK	Traditional	Leased
Fairbanks Financial Center 360 Merhar Avenue, Fairbanks, AK	Traditional	Owned
Wasilla Financial Center 850 E. USA Circle, Suite A, Wasilla, AK	Traditional	Owned
Juneau Financial Center 2094 Jordan Avenue, Juneau, AK	Traditional	Leased
Juneau Downtown Branch 301 North Franklin Street, Juneau, AK	Traditional	Leased
Sitka Financial Center 315 Lincoln Street, Suite 206, Sitka, AK	Traditional	Leased
Ketchikan Financial Center 2491 Tongass Avenue, Ketchikan, AK	Traditional	Owned

The following sets forth information about our Home Mortgage Lending branch locations, operated by RML:

Locations	Leased/Owned
Main Office at Calais	Leased
100 Calais Drive, Anchorage, AK	
ReMax/Dynamic Office	Leased
3350 Midtown Place, Suite 101, Anchorage, AK	
Midtown Office	Leased
101 W. Benson Boulevard, #201, Anchorage, AK	
Real Estate Brokers of Alaska Office	Leased
1577 C Street, Suite 101A, Anchorage, AK	
Eagle River Office	Leased
11901 Business Boulevard, #203, Eagle River, AK

Wasilla Northrim Branch	Leased
850 E USA Circle, Suite B, Wasilla, AK	

ITEM 3. LEGAL PROCEEDINGS

The Company from time to time may be involved with disputes, claims and litigation related to the conduct of its banking business. Management does not expect that the resolution of these matters will have a material effect on the Company's business, financial position, results of operations or cash flows.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS, AND ISSUER PURCHASES OF EQUITY SECURITIES

Our common stock trades on the NASDAQ Global Select Stock Market under the symbol, "NRIM." At March 13, 2018, the number of shareholders of record of our common stock was 250. As many of our shares of common stock are held of record in "street name" by brokers and other institutions on behalf of shareholders, we are unable to estimate the total number of beneficial holders of our common stock represented by these record holders.

The following are high and low closing prices as reported by NASDAQ. Prices do not include retail markups, markdowns or commissions.

	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
2017				
High	\$32.40	\$32.55	\$35.35	\$37.90
Low	\$27.50	\$29.25	\$26.45	\$32.50
2016				
High	\$26.72	\$27.52	\$28.76	\$32.55
Low	\$21.83	\$23.27	\$25.05	\$24.45

In 2017, we paid cash dividends of \$0.21 per share in the first and second quarters and \$0.22 per share in the third and fourth quarters. In 2016, we paid cash dividends of \$0.19 per share in the first and second quarters and \$0.20 per share in the third and fourth quarters. Cash dividends totaled \$6.0 million, \$5.4 million, and \$5.1 million in 2017, 2016, and 2015, respectively. On February 22, 2018, the Board of Directors approved payment of a \$0.24 per share cash dividend on March 16, 2018, to shareholders of record on March 8, 2018. The Company and the Bank are subject to restrictions on the payment of dividends pursuant to applicable federal and state banking regulations and Alaska corporate law. The dividends that the Bank pays to the Company are limited to the extent necessary for the Bank to meet the regulatory requirements of a "well-capitalized" bank. Given the fact that the Bank believes it will remain "well-capitalized"; the Company expects to receive dividends from the Bank in 2018. Beginning in 2016, a requirement to have a capital conservation buffer began to be phased in, and this requirement could adversely affect the Bank's ability to pay dividends. See "Item 1 Business - Supervision and Regulation" in this report.

Repurchase of Securities

At December, 31, 2017, there are 168,901 shares available under the stock repurchase program. The Company repurchased 58,341 shares in the first nine months of 2017, while no repurchases occurred in the fourth quarter of 2017 or during 2016. The Company intends to continue to repurchase its stock from time to time depending upon market conditions, but we can make no assurances that we will continue this program or that we will repurchase all of the authorized shares.

Equity Compensation Plan Information

The following table sets forth information regarding securities authorized for issuance under the Company's equity plans as of December 31, 2017. Additional information regarding the Company's equity plans is presented in Note 20 of the Notes to Consolidated Financial Statements included in Item 8 of this report.

Plan Category	Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants and Rights (a) ⁽²⁾	Weighted-Average Exercise Price of Outstanding Options, Warrants and Rights	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Securities Reflected in Column (a))
Equity compensation plans approved by security holders ¹	209,328	\$18.36	277,072
Total	209,328	\$18.36	277,072

¹Consists of the Company's 2017 Stock Incentive Plan, which replaced the 2014 Stock Incentive Plan (the "2014 Plan")

² Includes 165,361 options awarded under the 2014 Plan and other previous stock option plans.

We do not have any equity compensation plans that have not been approved by our shareholders.

Stock Performance Graph

The graph shown below depicts the total return to shareholders during the period beginning after December 31, 2012, and ending December 31, 2017. The definition of total return includes appreciation in market value of the stock, as well as the actual cash and stock dividends paid to shareholders. The comparable indices utilized are the Russell 3000 Index, representing approximately 98% of the U.S. equity market, and the SNL Financial Bank Stock Index, comprised of publicly traded banks with assets of \$1 billion to \$5 billion, which are located in the United States. The graph assumes that the value of the investment in the Company's common stock and each of the two indices was \$100 on December 31, 2012, and that all dividends were reinvested.

Index	Period Ending					
	12/31/12	12/31/13	12/31/14	12/31/15	12/13/16	12/31/17
Northrim BanCorp, Inc.	100.00	119.09	122.39	127.55	156.18	171.98
Russell 3000	100.00	133.55	150.32	151.04	170.28	206.26
SNL Bank \$1B-\$5B	100.00	145.41	152.04	170.20	244.85	261.04

¹ These unaudited schedules provide selected financial information concerning the Company that should be read in conjunction with Item 7 "Management's Discussion and Analysis of Financial Condition and Results of Operations" of this report.

²Tangible book value per share is a non-GAAP ratio defined as shareholders' equity, less intangible assets, divided by common shares outstanding. Management believes that tangible book value is a useful measurement of the value of the Company's equity because it excludes the effect of intangible assets on the Company's equity. See reconciliation to book value per share, the most comparable GAAP measurement below.

³Tangible common equity to tangible assets is a non-GAAP ratio that represents total equity less goodwill and intangible assets divided by total assets less goodwill and intangible assets. Management believes this ratio is important as it has received more attention over the past several years from stock analysts and regulators. The most comparable GAAP measure of shareholders' equity to total assets is calculated by dividing total shareholders' equity by total assets. See reconciliation to shareholders' equity to total assets below.

⁴Tax-equivalent net interest margin is a non-GAAP performance measurement in which interest income on non-taxable investments and loans is presented on a tax-equivalent basis using a combined federal and state statutory

rate of 41.11% in all years presented. Management believes that tax-equivalent net interest margin is a useful financial measure because it enables investors to evaluate net interest margin excluding tax expense in order to monitor our effectiveness in growing higher interest yielding assets and managing our costs of interest bearing liabilities over time on a fully tax equivalent basis. See reconciliation to net interest margin, the comparable GAAP measurement below.

25

⁵In managing our business, we review the efficiency ratio exclusive of intangible asset amortization, which is a non-GAAP performance measurement. Management believes that this is a useful financial measurement because we believe this presentation provides investors with a more accurate picture of our operating efficiency. The efficiency ratio is calculated by dividing other operating expense, exclusive of intangible asset amortization, by the sum of net interest income and other operating income. Other companies may define or calculate this data differently. For additional information see the "Other Operating Expense" section in Item 7 "Management's Discussion and Analysis of Financial Condition and Results of Operations" of this report. See reconciliation to comparable GAAP measurement below.

⁶The Company's 2017 results included the impact of the enactment of the Tax Cuts and Jobs Act, which was signed into law on December 22, 2017. The law includes significant changes to the U.S. corporate tax system, including a Federal corporate rate reduction from 35% to 21%. In 2017, the Company applied the newly enacted corporate federal income tax rate of 21%, reducing the value of the Company's net deferred tax asset, resulting in approximately a \$2.7 million increase in tax expense. The final impact of the tax rate change may differ due to changes in assumptions made by the Company or actions the Company may take as a result of tax reform.

⁷Number of banking offices does not include RML locations

⁸FTE includes 314 employees of the Bank and 115 employees of RML in 2017, 304 employees of the Bank, 130 employees of RML, and 17 employees of NBG in 2016, 303 employees of the Bank, 124 employees of RML, and 14 employees of NBG in 2015, 294 employees of the Bank, 117 employees of RML, and 15 employees of NBG in 2014, 256 employees of the Bank and 13 employees of NBG in 2013 and 245 employees of the Bank and 7 employees of NBG in 2012.

Reconciliation of Selected Financial Data to GAAP Financial Measures

These unaudited schedules provide selected financial information concerning the Company that should be read in conjunction with "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" of this report.

Reconciliation of total shareholders' equity to tangible common shareholders' equity (Non-GAAP) and total assets to tangible assets:

(In Thousands)	2017	2016	2015	2014	2013	2012
