The following information was issued as a Company announcement in London, England and is furnished pursuant to General Instruction B to the General Instructions to Form 6-K:

Funding and liquidity risk

The objective of the Group's funding and liquidity management framework is to ensure that at all times the Group can meet its obligations as they fall due. Liquidity management within the Group specifies prudent limits and controls over risk arising from maturity mismatch across the balance sheet and exposure to undrawn commitments or contingent obligations.

The Group has a highly diversified funding structure which avoids excessive reliance on any particular source. Funding is raised through various distribution channels, from a wide range of investors and clients.

The table below shows the composition of the Group's primary funding sources, excluding repurchase agreements.

| | 30 September 2010 £m % | | 30 June £m | 30 June 2010 £m % | | per 2009 % |

| | 763,798 | 100.0 | 762,344 | 100.0 | 807,760 | 100.0 |

Key points

- The Group has continued to reduce reliance on wholesale funding and diversify funding sources. Debt securities in issue increased as issuance of long-term debt securities and securitisation of UK retail mortgages exceeded maturities in the period. Deposits by banks decreased by 17% in Q3 2010.
- The Group has increased the proportion of its funding from customer deposits during 2010, from 51% at 31 December 2009 to 55% at 30 September 2010.

The Group was able to reduce short-term unsecured wholesale borrowing by £20 billion to £178 billion (including £77 billion of deposits from banks) from £198 billion at 30 June 2010 (including £92 billion of deposits from banks). The successful medium-term notes, covered bond and RMBS issuances in the quarter contributed to this reduction. These programmes tapped markets in multiple currencies, geographies and maturities. The impact was to strengthen the overall liability structure of the Group.

Funding and liquidity risk (continued)

The table below shows the Group's debt securities and subordinated liabilities (sub-debt) by maturity.

Key points

- The Group has improved its funding and liquidity position by extending the average maturity of debt securities in issue.
- The proportion of debt instruments with a remaining maturity of greater than one year has increased in 2010 from 50% at 31 December 2009 to 57% at 30 June 2010 and 62% at 30 September 2010.

The table below shows the amount and type of debt securities issued by the Group with a maturity of one year or greater, by quarter for year-to-date 2010 and 2009.

In addition there was further term issuance in October of £3.9 billion bringing year-to-date issuance to £35.2 billion. This exceeds the original full year target of £25 billion.

The Group also executes other long-term funding arrangements (predominately term repurchase agreements) not reflected in the analysis above.

Funding and liquidity risk (continued)

The table below shows the residual maturity and currency breakdown of long-term debt securities issued in 2010.

| Residual maturity | £m | % |
|-------------------|--------|-------|
| < 1 year | 836 | 2.7 |
| 1-3 years | 8,208 | 26.3 |

| USD | 8,540 | 27.3 |
| Other | 3,154 | 10.1 |
| | | |
| | 31,255 | 100.0 |

Key points

- Term funding markets improved in Q3 2010 as European sovereign concerns subsided. The Group issued more term funding in Q3 2010 than in the first half of 2010 and accessed unsecured and secured markets in the US, Europe, Asia, Australia and the UK.
- The Group's €15 billion covered bond programme, launched in April 2010, is an important step in diversifying funding sources across product types and markets. To date, €4.75 billion of covered bonds with maturities ranging between 3 and 10 years were issued from this programme.
- During Q3 2010, the Group executed its largest ever public issuance in the Australian dollar market and its first public Singapore dollar bond issuance. The Group also executed a £4.6 billion public RMBS issuance, which is the largest public transaction in this market since 2007.

Funding and liquidity risk (continued)

The table below shows the composition of the Group's liquidity portfolio. The Group has refined the presentation of its liquidity portfolio. Treasury bills and government bonds which were previously reported under Central Group Treasury portfolio, Unencumbered collateral and Other liquid assets are now included in their respective asset classes.

| Total liquidity portfolio | 150,574 | 136,969 | 164,891 | 170,661 |

Notes:

- (1) Includes AAA rated US government guaranteed agencies.
- (2) Includes assets eligible for discounting at central banks, comprising loans and advances and debt securities.

Key points

- The Group's liquidity portfolio increased by £14 billion to £151 billion in the quarter. Within this, cash and balances at central banks increased by £27 billion to £57 billion. The Group manages the composition of its liquidity portfolio based on a number of considerations. These include market opportunities, internal and external liquidity metrics and potential near term cash requirements. Further, during Q3 2010, US Retail & Commercial and RBS N.V. reduced their G10 government securities as part of their respective balance sheet restructurings.
- The Group is targeting a total liquidity portfolio of £150 billion as part of its strategic plan. However, the final level will be influenced by balance sheet size, maturity profile and regulatory requirements.

Funding and liquidity risk (continued)

The table below shows recent trends for the Group's loan to deposit ratio and customer funding gap.

| | | | Customer | | |

| 31 March 2009 | 150 | 118 | 225 | | |
| 31 December 2008 | 151 | 118 | 233 | | |

Notes:

- (1) Excludes repurchase agreements, bancassurance deposits to 31 March 2010 and loans are net of provisions.
- (2) Adjusting for customer loans and deposits classified as held-for-trading and designated as at fair value under IFRS (see note 10 Financial instruments classification on page 73 to 75), the loan to deposit ratio and customer funding gap at 30 September 2010 were 123% and £94 billion, respectively.

Key point

• The loan to deposit ratio improved by 200 basis points in Q3 2010 to 126% and the customer funding gap narrowed by £11 billion to £107 billion at 30 September 2010, due primarily to a reduction in Non-Core customer loans.

Funding and liquidity risk (continued)

The table below shows the Group's net stable funding ratio (NSFR), the proportion of structural term assets which are funded by stable funding including customer deposits, long-term wholesale funding and equity, computed in accordance with guidance issued by the Basel Committee in July 2010.

Notes:

- (1) Available stable funding.
- (2) Deferred taxation, insurance liabilities and other liabilities.
- (3) Residential mortgages > 1 year are weighted at 65%; remainder is weighted at 100%.
- (4) Prepayments, accrued income, deferred taxation and other assets.

Key points

- The Group's NSFR increased from 98% as at 30 June 2010 to 103% as at 30 September 2010, primarily due to an increase in wholesale funding with maturity greater than one year and a reduction in customer loans.
- The NSFR will continue to be refined over time in line with regulatory developments.
