

ROYAL BANK OF SCOTLAND GROUP PLC
Form 6-K
February 24, 2011

FORM 6-K
SECURITIES AND EXCHANGE COMMISSION
Washington D.C. 20549

Report of Foreign Private Issuer

Pursuant to Rule 13a-16 or 15d-16
of the Securities Exchange Act of 1934

For February 24, 2011

Commission File Number: 001-10306

The Royal Bank of Scotland Group plc

RBS, Gogarburn, PO Box 1000
Edinburgh EH12 1HQ

(Address of principal executive offices)

Indicate by check mark whether the registrant files or will file annual reports under cover of Form 20-F or Form 40-F.

Form 20-F X

Form 40-F ___

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(1): _____

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(7): _____

Indicate by check mark whether the registrant by furnishing the information contained in this Form is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes ___

No X

If "Yes" is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b): 82-

The following information was issued as a Company announcement in London, England and is furnished pursuant to General Instruction B to the General Instructions to Form 6-K:

- (1) Excludes items in the course of collection from other banks of £1,958 million (31 December 2009 - £2,519 million).

Appendix 3 Additional risk management disclosures (continued)

Other risk exposures

Explanatory note

These disclosures provide information on certain elements of the Group's credit market activities, the majority of which are in Non-Core and, to a lesser extent, Global Banking & Markets, US Retail & Commercial and Group Treasury. For credit valuation adjustments (CVA), leveraged finance and conduits disclosures, the information presented has been analysed between the Group's Core and Non-Core businesses.

Asset-backed securities

The Group structures, originates, distributes and trades debt in the form of loan, bond and derivative instruments, in all major currencies and debt capital markets in North America, Western Europe, Asia and major emerging markets. The carrying value of the Group's debt securities is detailed below.

	31 December 2010 £bn	30 September 2010 £bn	31 December 2009 £bn
Securities issued by central and local governments	124.0	132.5	134.1
Asset-backed securities	70.8	70.0	87.6
Securities issued by corporates and other entities	9.7	12.1	13.4
Securities issued by banks and building societies	13.0	11.8	14.0
	217.5	226.4	249.1

The Group's credit market activities gave rise to risk concentrations in asset-backed securities (ABS). The Group has exposures to ABS which are predominantly debt securities, but can also be held in derivative form. ABS have an interest in an underlying pool of referenced assets. The risks and rewards of the referenced pool are passed onto investors by the issue of securities with varying seniority, by a special purpose entity.

Debt securities include residential mortgage-backed securities (RMBS), commercial mortgage-backed securities (CMBS), ABS, collateralised debt obligations (CDOs), collateralised loan obligations (CLOs) and other ABS. In many cases the risk associated with these assets is hedged by way of credit derivative protection, purchased over the specific asset or relevant ABS indices. The counterparty to some of these hedge transactions are monoline insurers.

The following tables summarise, gross and net exposures and carrying values of these securities by geography of the underlying assets at 31 December 2010. Gross exposures represent the principal amounts relating to ABS. G10 government RMBS comprises securities that are: (a) guaranteed or effectively guaranteed by the US government, by way of its support for US federal agencies and government sponsored enterprises or (b) guaranteed by the Dutch government. Net exposures represent the carrying value after taking account of the hedge protection purchased from monoline insurers and other counterparties, but exclude the effect of counterparty credit valuation adjustments. The hedge provides credit protection of both principal and interest cash flows in the event of default by the counterparty. The value of this protection is based on the underlying instrument being protected.

Appendix 3 Additional risk management disclosures (continued)

Other risk exposures: Asset-backed securities (continued)

Key points

- Carrying values of asset-backed securities decreased by £16.8 billion during 2010 with net reductions across all portfolios.
- Within G-10 government RMBS, net sell-downs by the US Mortgage Trading business in GBM in the first quarter of 2010, as part of the Group's repositioning in light of the US government's purchase of US assets, was off-set by purchases in the second half of the year, with the latter reflecting the perceived investor appetite. The decrease in the US AFS portfolio reflected balance sheet restructuring in US Retail & Commercial during the third quarter of 2010.
- A £5.8 billion reduction was seen in prime RMBS primarily GBM and Group Treasury, across European (£4.7 billion) and US (£1.1 billion) portfolios reflecting respectively balance sheet management and repositioning in light of increased liquidity in the US RMBS market.
- Both CDO and CLO portfolios declined by £3.7 billion reflecting asset reductions in Non-Core; however, some CDO exposures were downgraded during the year resulting in increased non-investment grade positions.

Appendix 3 Additional risk management disclosures (continued)

Other risk exposures: Credit valuation adjustments

CVA represents an estimate of the adjustment to arrive at fair value that a market participant would make to incorporate the credit risk inherent in counterparty derivative exposures. The table below details the Group's CVA by type of counterparty.

	31 December 2010 £m	30 September 2010 £m	30 June 2010 £m	31 March 2010 £m	31 December 2009 £m
Monoline insurers	2,443	2,678	3,599	3,870	3,796
CDPCs	490	622	791	465	499
Other counterparties	1,714	1,937	1,916	1,737	1,588
	4,647	5,237	6,306	6,072	5,883

Monoline insurers

The table below summarises the Group's exposure to monolines, all of which are in Non-Core.

	31 December 2010 £m	30 September 2010 £m	30 June 2010 £m	31 March 2010 £m	31 December 2009 £m

Appendix 3 Additional risk management disclosures (continued)

Other risk exposures: Credit valuation adjustments (continued)

Monoline insurers (continued)

Key points

- Exposure to monolines decreased in the fourth quarter of 2010 and year ended 31 December 2010 due to a combination of restructuring certain exposures and higher prices of underlying reference instruments, partially offset by US dollar strengthening against sterling.
- The CVA decreased on a total basis, reflecting the reduction in exposures, but was stable on a relative basis with the impact of tighter credit spreads offset by an increase in the expected lives of certain trades.
- The reduction in the Group's RWA requirements over the quarter was driven by the reduction in exposure to monolines and the impact of restructuring certain risk structures.
- During the year there was a significant increase in the RWA requirements of RBS N.V. following its migration to the Basel II regime. Regulatory intervention at certain monoline counterparties triggered International Swaps and Derivative Association (ISDA) credit events in the period. At the point of trigger the exposure to these counterparties was excluded from the RWA calculations and capital deductions of £171 million were taken instead. The impact of this together with restructuring certain exposures and an improvement in the rating of underlying reference bonds held by the Group to investment grade status were the main drivers of the reduction in RWA requirements during the second half of the year.

The Group also has indirect exposures to monoline insurers through wrapped securities and other assets with credit enhancement from monoline insurers. These securities are traded with the benefit of this credit enhancement. Any deterioration in the credit rating of the monoline is reflected in the fair value of these assets.

Appendix 3 Additional risk management disclosures (continued)

Other risk exposures: Credit valuation adjustments (continued)

Credit derivative product companies

A summary of the Group's exposure to credit derivative product companies (CDPCs), all of which is in Non-Core, is detailed below.

Edgar Filing: ROYAL BANK OF SCOTLAND GROUP PLC - Form 6-K

The table below details the net income statement effect arising from CDPC exposures.

	Quarter ended			Year ended	
	31 December 2010 £m	30 September 2010 £m	31 December 2009 £m	31 December 2010 £m	31 December 2009 £m
CVA at beginning of period	(622)	(791)	(592)	(499)	(1,311)
CVA at end of period	(490)	(622)	(499)	(490)	(499)
Decrease in CVA	132	169	93	9	812
Hedges, foreign exchange and other movements	(170)	(184)	(205)	(150)	(1,769)
Income from trading activities – net losses	(38)	(15)	(112)	(141)	(957)

Key points

- Losses reduced significantly in 2010 due to smaller exposures and reduced losses on hedges that were introduced to cap the exposures.
- The CVA decrease for the year reflected exposure reduction, due to trade commutations, tighter credit spreads of the underlying reference portfolios, partially offset by an increase in the relative value of senior tranches compared with the underlying reference portfolios and foreign currency movements.
- Counterparty and credit RWAs and capital deductions decreased in line with exposure reduction.
- Certain CDPCs, where the Group has hedges in place to cap the exposure, are excluded from the RWA calculations with capital deduction taken instead.

Appendix 3 Additional risk management disclosures (continued)

Other risk exposures: Credit valuation adjustments (continued)

Other counterparties

The net income statement effect arising from the change in level of CVA for all other counterparties and related trades is detailed below.

	Quarter ended			Year ended	
	31 December 2010 £m	30 September 2010 £m	31 December 2009 £m	31 December 2010 £m	31 December 2009 £m
CVA at beginning of the period	(1,937)	(1,916)	(1,856)	(1,588)	(1,738)
CVA at end of the period	(1,714)	(1,937)	(1,588)	(1,714)	(1,588)
Decrease/(increase) in CVA	223	(21)	268	(126)	150
Net (debit)/credit relating to hedges, foreign exchange and other movements	(252)	37	(204)	(19)	(841)
Net (debit)/credit to income statement (income from trading activities)	(29)	16	64	(145)	(691)

Key points

The decrease in the 31 December 2010 quarter ended CVA held against exposures to other counterparties was driven by restructuring certain exposures and credit spreads tightening.

Losses on hedges and realised defaults are the primary driver of the losses arising on foreign exchange, hedges, realisations and other movements.

Appendix 3 Additional risk management disclosures (continued)

Other risk exposures: Leveraged finance

The table below details the Group's global markets sponsor-led leveraged finance exposures, all of which are in Non-Core, by industry and geography.

Exchange and other movements	25	6	31	112	(395)	80	(845)
Balance at end of period	6,750	1,770	8,520	9,589	12,820	8,520	12,820

Key points

Reduction in exposures reflects the Non-Core strategy.

Approximately 92% of the above exposures represent senior lending at 31 December 2010.

In addition to the above, UK Corporate and Ulster Bank have leveraged finance exposures as set out below.

	31 December 2010	30 September 2010	31 December 2009
UK Corporate			
- Debt financing (1)	3,664	3,804	4,041
- Senior debt transactions (2)	2,604	2,721	3,034
Total UK Corporate	6,268	6,525	7,075
Ulster Bank	597	608	621
	6,865	7,133	7,696

Notes:

- (1) Loans for UK mid-market buyouts, supplementing equity capital provided by third party private equity investors.
- (2) Loans to UK mid-corporates supporting acquisitions, recapitalisations or general corporate purposes where higher leverage criteria were met.

Appendix 3 Additional risk management disclosures (continued)

Other risk exposures: Special purpose entities

The table below sets out the asset categories, together with the carrying value of the assets and associated liabilities for those securitisations and other asset transfers, other than conduits (discussed below), where the assets continue to be recorded on the Group's balance sheet.

	31 December 2010		30 September 2010		31 December 2009	
	Assets £m	Liabilities £m	Assets £m	Liabilities £m	Assets £m	Liabilities £m
Residential mortgages	76,212	18,215	74,351	18,164	69,927	15,937
Credit card receivables	3,993	34	4,059	1,592	2,975	1,592
Other loans	30,988	974	31,364	1,003	36,448	1,010
Finance lease receivables	510	510	582	582	597	597

Assets are significantly greater than liabilities, as all notes issued by funding related own asset securitisation SPEs are purchased by Group companies.

Conduits

Group-sponsored conduits can be divided into multi-seller conduits and own-asset conduits. The Group consolidates both types of conduits where the substance of the relationship between the Group and the conduit vehicle is such that

the vehicle is controlled by the Group. Liquidity commitments from the Group to the conduit exceed the nominal amount of assets funded by the conduit as liquidity commitments are sized to cover the funding cost of the related assets.

During the year both multi-seller and own asset conduit assets have been reduced in line with wider Group balance sheet management. The total assets held by Group-sponsored conduits were £20.0 billion at 31 December 2010 (30 September 2010 - £19.8 billion; 31 December 2009 - £27.4 billion).

The exposure to conduits which are consolidated by the Group, the assets held and commercial papers issued by these vehicles are analysed in the table below.

	31 December 2010			30 September 2010			31 December 2009		
	Core £m	Non-Core £m	Total £m	Core £m	Non-Core £m	Total £m	Core £m	Non-Core £m	Total £m
Total assets	16,390	3,624	20,014	16,183	3,642	19,825	23,409	3,957	27,366
Commercial paper issued (1)	15,522	2,540	18,062	15,430	2,563	17,993	22,644	2,939	25,583
Liquidity and credit enhancements:									
Deal specific liquidity:									
- drawn	868	1,109	1,977	733	1,104	1,837	738	1,059	1,797
- undrawn	21,935	2,980	24,915	22,472	3,277	25,749	28,628	3,852	32,480
PWCE (2)	1,025	257	1,282	918	275	1,193	1,167	341	1,508
	23,828	4,346	28,174	24,123	4,656	28,779	30,533	5,252	35,785
Maximum exposure to loss (3)	22,803	4,089	26,892	23,205	4,381	27,586	29,365	4,911	34,276

Notes:

- (1) Includes £0.7 billion of ABCP issued to RBS plc at 31 December 2010.
- (2) Programme-wide credit enhancement.
- (3) Maximum exposure to loss is determined as the Group's total liquidity commitments to the conduits and additionally programme-wide credit support which would absorb first loss on transactions where liquidity support is provided by a third party.

Appendix 3 Additional risk management disclosures (continued)

Other risk exposures: Conduits (continued)

Multi-seller conduits accounted for 44% of the total liquidity and credit enhancements committed by the Group at 31 December 2010 (30 September 2010 - 42%; 31 December 2009 - 43%). The Group's multi-seller conduits have continued to fund the vast majority of their assets solely through asset-backed commercial paper (ABCP) issuance. There have been no significant systemic failures within the financial markets similar to that experienced in the second half of 2008 following Lehman Brothers bankruptcy filing in September 2008. The improvement in market conditions has allowed these conduits to move to normal ABCP funding conditions and reduced the need for backstop funding from the Group.

Key points

- Total assets decreased during the year by £7.4 billion in line with the Group's strategy of reducing conduit exposure.
- The average maturity of ABCP issued by the Group's conduits has risen throughout 2010, at 69.4 days at 31 December 2010 compared with 68.3 days at 30 September 2010 and 58.4 days at 31 December 2009.
- The maturity of the commercial paper issued by the Group's conduits is managed to mitigate the short-term contingent liquidity risk of providing back-up facilities. The Group's limits sanctioned for such liquidity facilities at 31 December 2010 totalled approximately £22.6 billion for multi-seller conduits (30 September 2010 - £21.9 billion; 31 December 2009 - £25.0 billion). For a very small number of transactions within one multi-seller conduit the liquidity facilities have been provided by third-party banks. This typically occurs on transactions where the third-party bank does not use, or have, its own conduit vehicles.
- The Group's maximum exposure to loss on its multi-seller conduits is £22.8 billion (30 September 2010 - £22.0 billion; 31 December 2009 - £25.2 billion), being the total amount of the Group's liquidity commitments plus the extent of PWCE of conduit assets for which liquidity facilities were not provided by third parties.
- The Group holds two own-asset conduits, which have assets that were previously funded by the Group. The Group's maximum exposure to loss on these two conduits was £4.1 billion at 31 December 2010 (30 September 2010 - £5.6 billion; 31 December 2009 - £9.1 billion), with £2.2 billion of ABCP outstanding at that date (30 September 2010 - £3.2 billion; 31 December 2009 - £7.7 billion).
- Additionally the Group has established an own-asset conduit with a committed liquidity of £26.0 billion (30 September 2010 - £26.0 billion; 31 December 2009 - £25.1 billion) to access the Bank of England's open market operations for contingent funding purposes.

The Group also extends liquidity commitments to multi-seller conduits sponsored by other banks, but typically does not consolidate these entities as the Group does not retain the majority of risks and rewards. The Group's exposure from third-party conduits was £136 million (30 September 2010 - £136 million; 31 December 2009 - £587 million) representing deal specific liquidity.
