Appendix 3 Additional risk management disclosures (continued)

---

Except as otherwise indicated by an asterisk (\*), the information in Appendix 3 - Additional risk management disclosures has been reviewed by the Group's external auditor.

Country risk

Background\*

In this Appendix, further details are provided of the Group's exposure to five eurozone countries, namely Greece, Ireland, Portugal, Spain and Italy, as these countries have been the focus of investor concern.

During these times of increased stress, the Group is working proactively with its clients in these five eurozone countries in order to manage both relationships and exposure. Additionally, the Group is managing its sovereign exposures closely.

As a result of the deterioration in Greece's fiscal position and the announcement of the proposals to restructure Greek sovereign debt, the Group has recognised an impairment in respect of Greek government bonds. Ireland, Italy, Portugal and Spain are facing less acute fiscal difficulties and the Group's sovereign exposures to these countries were not considered impaired at 30 June 2011.

Key points\*

Republic of Ireland: Major local operation, largely through Ulster Bank (split roughly equally between corporate and retail exposure). Some additional exposure through GBM (mostly derivatives and debt securities).

Central and local government: Modest exposure, including £93 million of AFS debt securities (AFS reserves £57 million) and HFT long and short positions of £84 million and £40 million respectively.

Other banks and financial institutions: Exposure including derivatives and reverse repos of £1.6 billion, most of which is collateralised, HFT long position of £387 million and short positions of £42 million, AFS securities of £304 million (AFS reserves £45 million), and lending of £459 million.

Corporate: Exposure largely consisting of lending which is concentrated in commercial real estate, with a majority of the exposures in Non-Core. Outside of this, corporate exposures are diversified across a range of customers, including subsidiaries of foreign-owned corporations and government-owned utilities and across a wide range of sectors, including manufacturing and services.

Personal: Lending of £20.8 billion, predominantly consisting of residential mortgages.

Contingent liabilities and commitments: Amounted to £3.7 billion, of which £2.2 billion corporate customers.

\* not reviewed

Appendix 3 Additional risk management disclosures (continued)

---

Country risk (continued)

Key points\* (continued)

Spain: Primarily lending to major investment grade corporations. AFS debt securities of covered bonds.

Central and local government: Net HFT short positions of £997 million, consisting of long positions of £1.1 billion and short positions of £2.1 billion. Modest AFS position of £91 million (AFS reserves £49 million).

Other banks and financial institutions: AFS covered bonds of £6.7 billion (AFS reserves £1,191 million), issued by Spanish banks and financial institutions. Collateralised derivatives and reverse repos of £1.6 billion. Lending exposure to banks up by £939 million in H1 2011 to £1.2 billion, reflecting seasonal increases in loans, settlement balances and money market positions to banks within existing credit lines.

Corporate: Lending essentially unchanged at £6.8 billion. Core exposure is to large international corporations and local corporations with strong business profiles, generally infrastructure, utilities and TMT companies. Diversified product mix.

Personal: Lending relatively stable at £405 million.

Contingent liabilities and commitments: Amounted to £2.6 billion, of which £2.2 billion corporate customers.

Italy: GBM hub country with relationships with large companies, banks and financial institutions and primary dealing activity.

Central and local government: HFT long position of £7.0 billion against a short position of £5.2 billion. AFS securities of £955 million (AFS reserves £90 million). Lending, derivatives and contingent exposures all minimal.

Other banks and financial institutions: Exposure comprised of derivatives and reverse repos of £1.7 billion, largely collateralised, along with lending of £1.1 billion.

Corporate: Lending largely unchanged at £2.3 billion. Portfolio currently weighted towards corporations with a large geographic footprint or substantial local operations. Diversified product mix.

Personal: Minor exposure, largely comprised of lending of £26 million.

Contingent liabilities and commitments: Amounted to £3.5 billion, of which £2.4 billion corporate customers.

Greece: Primarily legacy government bond positions.

Central and local government: AFS debt securities of £733 million after impairment of £733 million. HFT long and short positions of £276 million and £28 million respectively.

Other banks and financial institutions: Exposure to leading Greek banks, consisting of derivatives, generally cash collateralised, and reverse repos, totalling £188 million.

Corporate: Lending, including short and long-term committed facilities, amounting to £421 million. Focus on investment-grade borrowers, across a range of sectors, including industrial, energy and utilities.

Personal: Limited exposure - lending of £15 million.

Contingent liabilities and commitments: Amounted to £165 million, of which £154 million corporate customers.

\* not reviewed

### Appendix 3 Additional risk management disclosures (continued)

#### Country risk (continued)

#### Key points\* (continued)

Portugal: Modest exposure overall.

Central and local government: HFT long and short positions of £76 million and £109 million respectively. AFS bonds of £71 million (AFS reserves of £48 million).

Other banks and financial institutions: Exposure principally to the four largest local institutions, comprising sovereign CDS. Lending totalled £48 million.

Corporate: Lending of £585 million.

Personal: Negligible exposure.

Contingent liabilities and commitments: Amounted to £362 million, of which £353 million corporate customers.

#### CDS referencing sovereign exposures

CDS positions are managed by the Credit Flow desk in GBM, who acts as a market maker for CDS across a wide range of names from sovereigns to corporate, as well as indices. RBS's net mark-to-market exposure to CDSs referencing peripheral eurozone sovereigns is small. In addition trades are collateralised with appropriate levels of variation margin applied on a daily basis. It is anticipated that sovereign CDS trades will become available for clearing on the Intercontinental Exchange in coming months.
