The Royal Bank of Scotland Group plc - G-SIB Indicators Disclosure

The Basel Committee on Banking Supervision ('BCBS') is conducting a data collection exercise as part of the methodology to assess the systemic importance of banks in a global context, as outlined in the July 2013 document 'Global systemically important banks: updated assessment methodology and the higher loss absorbency requirement'. The Royal Bank of Scotland Group plc ('RBS') is assessed as a global systemically important bank ('GSIB'). The indicators selected by BCBS reflect the size of banks, their interconnectedness, the lack of readily available substitutes or financial institution infrastructure for the services they provide, their global (cross-jurisdictional) activity and their complexity.

The PRA has requested us to publish the full template containing data as of and for the year ended 31 December 2013, based on the 2014 guidance and related FAQs issued by the BCBS. This data has also been submitted to BCBS and will be used to determine the relevant GSIB buffer applicable to RBS when implemented in 2016.

This information was made available on the RBS website at the close of business on 31st July 2014, via the following link:

Notes:

a Based on December 2012 version of the Basel III monitoring exercise. The exposure above differs slightly from the leverage exposure included in RBS's 2013 Annual Report and Accounts (ARA) which reflects guidance in the proposal issued by the BCBS.

- b Relates to transactions with financial institutions; the components are over-the-counter derivatives, including potential future exposures, funds deposited and undrawn committed lines.
- c Carrying value of securities issued, generally as reflected in the 2013 ARA.
- d Payments made in the year by currency; includes correspondent banking but excludes intra-group transactions. This data is not part of RBS's financial or regulatory reporting systems and processes and is therefore not possible to validate against other information. The data is primarily sourced from SWIFT.
- e Based on client money assets, as reported in CMAR returns for UK legal entities and similar information for the rest of RBS.
- f Transactions underwritten by RBS during 2013, sourced from industry standard deal platform.
- g Includes OTCs derivatives cleared through central counterparties as well as those settled bilaterally, as published in the 2013 ARA.
- h Reflects balances reported in 2013 accounts adjusted for offsetting of securities that meet the definition of Level 1 and Level 2 (after haircuts) as per BCBS definition relating to liquidity coverage ratio.
- i Based on level 3 as defined in IFRS 13 'Fair value measurements' as reflected in 2013 ARA.
- j Based on the for Bank of England country exposures statistical return.
- k Based on the for Bank of England country exposures statistical return for UK legal entities and similar information for the rest of RBS.
