Qualitative information related to the operating results:

With respect to the financial and economic environment for the first quarter ended June 30, 2004, overseas economies continued to expand, particularly in the United States and in the People's Republic of China. The Japanese economy moved toward recovery, as exports and capital expenditures continued to increase and private consumption showed signs of improvement. However, consumer prices continued to decline and deflation continued.

Regarding the financial environment, in the EU, the European Central bank's policy rate remained at the same rate. On the other hand, in the United States, federal funds rate was raised to 1.25% in June and in the United Kingdom, the Bank of England raised its policy rate from 4.0% to 4.5% during May and June. In Japan, the Bank of Japan continued its current easy monetary policy. During the three months ended June 30, while short-term interest rate remained at near zero percent, the yield on ten-year JGBs, used as a benchmark for long-term interest rates, rose from around 1.5% to over 1.9% in June. In the foreign exchange markets, the yen had depreciated from ¥105 to around ¥115 against the US dollar in May, but after that, the exchange rate generally remained around ¥109.

Amidst this environment, for the first quarter ended June 30, 2004, MTFG's ordinary profit was ¥104.2 billion and net income was ¥82.0 billion.
