NOTES TO FINANCIAL STATEMENTS (UNAUDITED)

1. SIGNIFICANT ACCOUNTING POLICIES

Petroleum & Resources Corporation (the Corporation) is registered under the Investment Company Act of 1940 as a non-diversified investment company. The Corporation's investment objectives as well as the nature and risk of its investment transactions are set forth in the Corporation's registration statement.

Security Valuation Investments in securities traded on national security exchanges are valued at the last reported sale price on the day of valuation. Over-the-counter and listed securities for which a sale price is not available are valued at the last quoted bid price. Short-term investments (excluding purchased options) are valued at amortized cost. Purchased and written options are valued at the last quoted asked price.

Security Transactions and Investment Income Investment transactions are accounted for on the trade date. Gain or loss on sales of securities and options is determined on the basis of identified cost. Dividend income and distributions to shareholders are recognized on the ex-dividend date, and interest income is recognized on the accrual basis.

2. FEDERAL INCOME TAXES

The Corporation's policy is to distribute all of its taxable income to its shareholders in compliance with the requirements of the Internal Revenue Code applicable to regulated investment companies. Therefore, no federal income tax provision is required. For federal income tax purposes, the identified cost of securities at March 31, 2005 was \$334,765,919, and net unrealized appreciation aggregated \$340,408,039, of which the related gross unrealized appreciation and depreciation were \$344,349,451 and \$3,941,412, respectively.

Distributions are determined in accordance with income tax regulations which may differ from generally accepted accounting principles. Accordingly, annual reclassifications are made within the Corporation's capital accounts to reflect income and gains available for distribution under income tax regulations.

3. INVESTMENT TRANSACTIONS

The Corporation's investment decisions are made by a committee, and recommendations to that committee are made by the research staff.

Purchases and sales of portfolio securities, other than options and short-term investments, during the three months ended March 31, 2005 were \$15,488,911 and \$30,399,501, respectively. Options may be written (sold) or purchased by the Corporation. The Corporation, as writer of an option, bears the risk of possible illiquidity of the option markets and from movements in security values. The risk associated with purchasing an option is limited to the premium originally paid. A schedule of outstanding option contracts as of March 31, 2005 can be found on page 11.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

The Corporation has an employee stock option and stock appreciation rights plan which provides for the issuance of options and stock appreciation rights for the purchase of up to 895,522 shares of the Corporation's Common Stock at 100% of the fair market value at date of grant. The exercise price of the options and related stock appreciation rights is reduced by the per share amount of capital gains paid by the Corporation during subsequent years. Options are exercisable beginning not less than one year after the date of grant and extend and vest over ten years from the date of grant. Stock appreciation rights are exercisable beginning not less than two years after the date of grant and extend over the period during which the option is exercisable. The stock appreciation rights allow the holders to surrender their rights to exercise their options and receive cash or shares in an amount equal to the difference between the option exercise price and the fair market value of the Common Stock at the date of surrender.

At the beginning of 2005, there were 128,543 options outstanding at a weighted average exercise price of \$18.81 per share. The Corporation did not grant any options under the plan in 2005. During the three months ended March 31, 2005, stock appreciation rights relating to 10,616 stock option shares were exercised at a weighted average market price of \$28.70 per share and the stock options relating to these rights with a weighted average exercise price of \$14.92 per share were cancelled. At March 31, 2005, there were outstanding exercisable options to purchase 56,753 common shares at \$14.18-\$23.57 per share (weighted average price of \$18.85) and unexercisable options to purchase 61,174 common shares at \$14.18-\$23.57 per share (weighted average price of \$19.29). The weighted average remaining contractual life of outstanding exercisable and unexercisable options was 5.46 years and 5.95 years, respectively. At March 31, 2005, there were 260,373 shares available for future option grants.

The Corporation currently accounts for the plan under the recognition and measurement provisions of APB Opinion No. 25, *Accounting for Stock Issued to Employees*, and related Interpretations. Accordingly, compensation cost is based on the intrinsic value of the award, recognized over the award's vesting period, and remeasured at each reporting date through the date of settlement. The total compensation expense for stock options and stock appreciation rights recognized for the three months ended March 31, 2005 was \$337,278.

In 2004, the Financial Accounting Standards Board revised the Statement of Financial Accounting Standards No. 123, *Share-Based Payment*, which establishes standards for accounting for all share-based payment transactions. The revised FAS 123 is effective for the Corporation as of January 1, 2006 and applies only to awards granted, repurchased, or cancelled after the required effective date. The revised FAS also requires recognition of compensation cost based on the fair value of the award at grant date versus the intrinsic value. At this time, the Corporation does not expect the impact to be material to its operations or financial statements.

5. RETIREMENT PLANS

The Corporation's qualified defined benefit pension plan covers all full-time employees with at least one year of service. In addition, the Corporation has a nonqualified defined benefit plan which provides eligible employees with retirement benefits to supplement the qualified plan. Benefits are based on length of service and compensation during the last five years of employment. The Corporation's policy is to contribute annually to the plans those amounts that can be deducted for federal income tax purposes, plus additional amounts as the Corporation deems appropriate in order to provide assets sufficient to meet benefits to be paid to plan participants. During the three months ended March 31, 2005, the Corporation contributed \$7,802 to the plans. The Corporation anticipates contributing additional amounts to the plans approximating \$625,000 during the remainder of 2005, subject to deductibility limits.

The following table aggregates the components of the plans' net periodic pension cost for the three months ended March 31:

	March 31, 2005
Service Cost	\$ 46,292
Interest Cost	70,272
Expected return on plan assets	(69,373)
Amortization of prior service cost	13,728
Amortization of net loss	45,062
Net periodic pension cost	\$ 105,981

The Corporation also sponsors a defined contribution plan that covers substantially all employees. For the three months ended March 31, 2005, the Corporation expensed contributions of \$20,772. The Corporation does not provide postretirement medical benefits.

6. EXPENSES

The aggregate remuneration paid during the three months ended March 31, 2005 to officers and directors amounted to \$631,912, of which \$66,375 was paid as fees to directors who were not officers.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

7. PORTFOLIO SECURITIES LOANED

The Corporation makes loans of securities to brokers, secured by cash deposits, U.S. Government securities, or bank letters of credit. The Corporation accounts for securities lending transactions as secured financing and receives compensation in the form of fees or retains a portion of interest on the investment of any cash received as collateral. The Corporation also continues to receive interest or dividends on the securities loaned. The loans are secured at all times by collateral of at least 102% of the fair value of the securities loaned plus accrued interest. Gain or loss in the fair value of securities loaned that may occur during the term of the loan will be for the account of the Corporation. At March 31, 2005, the Corporation had no securities on loan.
