-

Item 7.01 Regulation FD Disclosure

Winn-Dixie Stores, Inc. and its subsidiaries (the Company) is required to provide monthly operating reports to the Office of the United States Trustee for the Middle District of Florida (the U.S. Trustee) pursuant to the U.S. Trustee's Operating Guidelines and Financial Reporting Requirements for Chapter 11 cases. Such reports are also filed with the bankruptcy court. On February 17, 2006 the Company filed its monthly operating report (MOR) for the four-week period ended January 11, 2006, a copy of which is furnished as Exhibit 99.1.

The Company cautions readers not to place undue reliance upon the information contained in the MOR. The MOR contains financial information that has not been audited or reviewed by independent accountants and will be subject to future reconciliation and adjustments. The MOR should not be used as a basis for making investment decisions regarding the Company's securities. The MOR contains information for periods that are shorter or otherwise different from those contained in the Company's reports pursuant to the Securities Exchange Act of 1934, as amended (the Exchange Act). The information contained in the MOR may not be indicative of the Company's financial condition as of January 11, 2006 or operating results for the periods reflected in the Company's financial statements. Readers are cautioned to refer to the Company's Exchange Act filings, including but not limited to the Annual Report on Form 10-K for the fiscal year ended June 29, 2005 and the Quarterly Reports on Form 10-Q for the fiscal quarters ended September 21, 2005 and January 11, 2006.

Certain of the information contained in the MOR may constitute forward-looking statements within the meaning of the federal securities laws. These forward-looking statements are subject to various assumptions regarding the Company's operating performance and other matters that may not be realized and are subject to certain risks and uncertainties, particularly while the Chapter 11 cases are proceeding. Actual results for the periods reflected in the Company's Exchange Act filings may differ materially from the information contained in the MOR, and the Company undertakes no obligation to publicly update or revise the MOR.

A number of factors could cause the Company's actual results to differ materially from the expected results described in the Company's forward-looking statements. There can be no assurance that the Company's Chapter 11 reorganization process will be successful. Risk factors related to its efforts include, but are not limited to, the following: the Company's ability to continue as a going concern; the Company's ability to generate positive cash flow from operations; the Company's ability to maintain sufficient liquidity and capital resources based upon a significant number of vendors participating in the resumption of vendor credit programs; the Company's ability to respond to any further unexpected developments that require the use of a substantial amount of its liquidity; the Company's ability to operate pursuant to the terms of its DIP credit facility; the Company's ability to obtain court approval with respect to various motions filed from time to time in the Chapter 11 proceedings; the Company's ability to develop, confirm and consummate a plan or plans of reorganization; risks associated with third parties seeking and obtaining court approval to terminate or shorten the period in which the Company has the exclusive right to file plans of reorganization, modify or terminate the automatic stay, appoint a Chapter 11 trustee or convert the cases to Chapter 7 cases; other potential adverse impacts of the Chapter 11 cases on the Company's liquidity and results

of operations; the Company's ability to maintain contracts that are critical to its operations; the Company's ability to attract and retain customers; the Company's ability to attract, motivate and retain key executives and associates; and potential adverse publicity.

The Company experienced a disruption to its business as a result of Hurricane Katrina, and faces a number of risks associated with recovery from the hurricane, including but not limited to: the Company's ability to collect on its insurance coverage for damage resulting from Hurricane Katrina; the Company's ability to re-open eleven stores that remain closed since Hurricane Katrina; and future sales levels in the New Orleans market.

In addition, the Company faces a number of risks with respect to its continuing business operations, including but not limited to: the Company's ability to increase sales and market share, particularly considering that, until the second quarter of fiscal 2006, it had experienced over two years of sustained sales declines; the Company's ability to increase capital expenditures in the future to invest in its store base and other capital projects; the Company's response to the entry of new competitors into its markets, including traditional grocery store openings and the entry of non-traditional grocery retailers such as mass merchandisers, super-centers, warehouse club stores, dollar-discount stores, drug stores and conventional department stores; and the Company's ability to reduce the level of operating losses experienced in recent years.

Please refer to discussions of these and other factors in the Company's Annual Report on Form 10-K for the fiscal year ended June 29, 2005, the Quarterly Reports on Form 10-Q for the fiscal quarters ended September 21, 2005 and January 11, 2006 and other Company filings with the Securities and Exchange Commission.

These and other factors, including the terms of any reorganization plan ultimately confirmed, can affect the value of the Company's various pre-petition liabilities, common stock and other debt or equity securities. No assurance can be given as to what recoveries, if any, will be assigned in the bankruptcy proceedings to each of these constituencies. While the Company believes its business plan shows that it will be able to reorganize successfully, it also believes that there is no substantial likelihood of a meaningful recovery for existing shareholders under a plan of reorganization. A plan of reorganization could also result in holders of the Company's unsecured debt receiving less, and potentially substantially less, than payment in full for their claims. Because of such possibilities, the value of the Company's common stock and unsecured debt is highly speculative.

Item 9.01 Financial Statements and Exhibits

(c) Exhibits:

99.1 Winn-Dixie Stores, Inc. Chapter 11 Monthly Operating Report to the U.S. Trustee for the period from December 15, 2005 to January 11, 2006.
