**Telefónica Móviles Group**

---

**High quality of financial results, with a strong revenue growth, which is translated into the net income and led to a strong cash flow generation:**

Strong service revenue growth (+11.4% vs. 2Q05; +14.6% vs. 1H05) led to an increase in Group revenues to **8,793MM (+9.4% 2Q06/2Q05; +13.3% in 1H06)**.

Outgoing service revenue growth shows a significant growth, +15.7% vs. 2Q05 and +18.6% vs. 1H05, virtually in line with customer base growth.

9.4% consolidated revenue growth vs. 1H05 assuming constant exchange rate.

**Group OIBDA grew 13.2% vs. 2Q06 (+12.4% vs. 1H05) to 2,899MM in 1H06.**

OIBDA margin reached 32% in 2Q06, 1.1 p.p. higher than in 2Q05, despite higher commercial activity. In 1H06 OIBDA margin reached 33%.

Assuming constant exchange rates, Group OIBDA would have grown 10.1% vs. 1H05.

**2Q06 net income registered a strong growth (+20.9% vs. 2Q05) to 599MM, 1,046 in 1H06 (+12.8% y-o-y growth vs. 1H05).**

**Important growth in Operating Cash Flow<sup>1</sup> to 2,220MM in 1H06, 22.4% higher than the recorded during the same period last year.**

**Robust commercial activity across our markets led Telefónica Móviles to end June 2006 with a customer base of 101MM, an increase of 17% from June 2005:**

Further consolidation of operations enabled gross adds to rise 8.2% year-over-year in 2Q06 and total commercial action to grow 12.9% vs. 2Q05, even though commercial activity in 2Q05 was fuelled by the launch of the movistar brand in 13 countries.

**Telefónica Móviles España recorded net adds of 378 thousand in 2Q06 (+24% vs. 2Q05), ending June with close to 20.7MM customers (6.6% vs. 2Q05).**

**The managed customer base in Latin America reached 76.2MM (20% vs. 2Q05), driven by net adds<sup>2</sup> of 4MM in 2Q06.**

**Meditel ended 2Q06 with 4.2MM customers (+21% vs. 2Q05).**

**Telefónica Móviles España delivers solid commercial and financial results in a highly competitive environment:**

Commercial actions reached 5.8MM in 1H06 (+5.6% vs. 1H05), driven by the strong volume of gross adds (4.1% vs. 2Q05 and 14.6% in 1H06).

The **churn rate containment continued, at slightly below 1.6% in 2Q06**, declining vs. 2Q05 and 1Q06. Churn in the contract segment was below 1%.

The **contract segment** grew 16% vs. 2Q05 and **represented 55.2% of the total customer base** (50.8% in 2Q05).

**Customer revenue growth accelerated (+8.2% year-over-year in 2Q06 vs. +6.4% in 1Q06/1Q05)**, underpinned by the larger customer base and the higher traffic carried on TME s networks (+10.0% vs. 2Q05). **Service revenues advanced 4.8% vs. 2Q05, held back by lower interconnection and roaming revenues (-5.3% vs. 2Q05).**

Increased usage of data connectivity services, driving a higher contribution by non-traditional SMS over total data service revenues to 41% (39% in 2Q05).

**OIBDA in 2Q06 rose 6.7% year-over-year (vs. -3.5% y-o-y in 1Q06). The OIBDA margin advanced to 45.4%**, 2 p.p. more than 2Q05 despite the intense commercial activity.

Commercial launch of HSDPA in July, following the rollout of 450 nodes with HSDPA functionality in 57 municipalities, in places with high potential usage of mobile data, with transmission speed up to 3.6 Mbit/s.

---

<sup>1</sup> OIBDA Capex

Group capex in 2006 at cumulative average exchange rate. For comparative purposes, 2005 capex has been recalculated at the cumulative average exchange rate for the corresponding period.

<sup>2</sup> Excludes the adjustment of 1.8 MM inactive lines in Brazil.

---

Telefónica Móviles Group

---

**Latin American operators continued to record strong growth, while improving operating efficiency:**

**Gross adds in Latin America were 10% higher in 2Q06 than in 2Q05** and 21% higher than in 1Q06, driven by GSM-related commercial initiatives and the strong commercial efforts recorded in Venezuela.

**Revenues from the Latin America operators rose 19% vs. 2Q05, +26% in 1H06 vs. 1H05 (+18% ex-forex), accounting for 50% of Group revenues<sup>3</sup> in 1H06 (45% in 1H05).**

**Strong growth in service revenues**, driven by outgoing customer revenues, **which outpaced growth in the customer base (+29% in constant euros vs. +20% in customers).**

These subsidiaries OIBDA increased 43.6% vs. 1H05 (+34.8% ex-forex), 29% vs. 2Q05 leading to a 1.6 p.p. advance in the OIBDA margin vs. 2Q05 despite higher commercial activity (+19.2% vs. 2Q05). **OIBDA from the Latin American operators in 1H06 represents 33% of the Group OIBDA<sup>3</sup> (26% in 1H05).**

**Operating cash flow<sup>4</sup> grew to 547MM in 1H06, more than doubling the amount reached in 1H05.**

**Very positive performance of the operations in Mexico, Venezuela, Argentina and Chile.**

**Telefónica Móviles Group**

---

Highlights of comparative information and changes in the consolidated Group:

In June 2005 the merger between Comunicaciones Móviles Perú, S.A. and Telefónica Móviles Perú, S.A.C. was carried out. Telefónica Móviles stake in the resulting company, Telefónica Móviles Perú, S.A., stands at 98.40% after the acquisition of a minority stake in June 2006.

During 2005, TES Holding, S.A., fully-owned by Telefónica Móviles, S.A., acquired an additional stake in Telefónica Móviles El Salvador, S.A. Following the acquisition, TES Holding, S.A.'s stake increased to 99.06%.

Following the acquisition of an additional 0.40% in Telefónica Móviles Panamá in 2005, Telefónica Móviles stake increased to 99.99%.

In November 2005 Telefónica Móviles acquired 2.07% of Telefónica Móviles Argentina, S.A. increasing Telefónica Móviles, S.A.'s stake to 100%.

Subsequently, and within the framework of the reorganisation of Telefónica Móviles Argentine operations, the necessary measures were approved to proceed with the merger of the two Argentine operators, which is effective from 1 January, 2006.

In December 2005, Telefónica Móviles acquired 8% of Telefónica Móviles México, S.A. de C.V., thereby bringing its stake to 100%.

On 22 February 2006, approval was given at the respective Shareholders Meetings of Telesp Celular Participações S.A. ( TCP ), Tele Centro Oeste Celular Participações S.A., ( TCO ), Tele Sudeste Celular Participações S.A. ( TSD ), Tele Leste Celular Participações, S.A. ( TLE ) and Celular CRT Participações S.A. ( CRTPart ) for a corporate restructuring to allow the exchange of TCO shares for TCP shares, thereby making TCO a 100%-owned subsidiary of TCP, and the merger and takeover of TSD, TLE and CRT Part by TCP.

In June 2006 VIVO Participações made a capital increase by capitalizing goodwill for a total of R\$ 194 MM. Once the capital increase was completed, Brasilcel, N.V. stake in VIVO participações stood at 62.77%.

**The financial statements for fiscal years 2005 and 2006, and the accompanying management comments regarding operations, reflect the prevailing composition of Telefónica Móviles Group at each point in time.**

Dividend per share	0.64	0.193	231.6%	0.64	0.193	231.6%

<sup>1</sup> Operating Cash Flow = OIBDA - Capex. Group capex in 2006 at cumulative average exchange rate. For comparative purposes, 2005 Capex has been recalculated at the cumulative average exchange rate for the corresponding period.

<sup>2</sup> Operating Cash Flow per share

For the basic Net income per share and Operating Cash Flow per share calculation purposes, the weighted average number of ordinary shares outstanding during the period have been obtained applying IAS rule 33 Earnings per share. Thereby, the treasury stock and shares assigned to the stock options plan for employees Programa MOS are not taken into account.

Commercial activity remained strong in all Telefónica Móviles main markets in 2Q06, with year-over-year growth of 8.2% in gross adds vs. 2Q05 and 14.3% vs. 1Q06. Total commercial actions also recorded a strong increase (+13% vs. 2Q05).

The increase vs. 1Q06 was mostly due to seasonal factors typical of the quarter in some markets deriving from Mothers Day and Fathers Day commercial campaigns (especially relevant in Latin America). Noteworthy was the increase in commercial activity vs. 2Q05, backed by, among other factors, the GSM deployment and the consolidation of operations, considering that commercial activity in 2005 was fuelled by the launch in early April of the movistar brand in 13 countries.

Thus, at the end of June 2006, the Group's total managed customer base stood over 101MM, representing year-over-year growth of 17%.

Total net adds in 2Q06<sup>5</sup> surpassed 4.3MM (4.1MM in 1Q06). By region, Group operators in Latin America captured close to 4.0MM new customers in 2Q06 and 7.5MM since the beginning of the year, ending June 2006 with a total customer base in the region of 76.2MM (+20% vs. 2Q05).

<sup>5</sup> Excludes the adjustment of 1.8MM inactive lines in Brazil.

---

**Telefónica Móviles Results**

---

TME recorded net adds of 378 thousand in 2Q06, virtually the same as in 1Q06 and 24% higher than in 2Q05, bringing the customer base in Spain close to 20.7MM at the end of June (+6.6% year-over-year). In Morocco, Meditel's customer base grew 21% vs. June 2005 to 4.2MM.

Key aspects of the results are as follows:

**9.4% year-over-year growth in consolidated revenues in 2Q06 and 13.3% in 1H06, to 8,793MM in 1H06.** Excluding the impact of exchange rates, consolidated revenues in 1H06 grew by 9.4%.

Underpinning this growth was the strong performance by service revenues (7,643MM in 1H06), which rose 11.4% in 2Q06 and 14.6% in 1H06 on the back of the larger customer base and traffic growth. We would highlight the growth of outgoing service revenues (+18.6% in 1H06), which grew virtually in line with the customer base.

Revenues from handset sales (1,150MM in 1H06) grew 5.3% year-over-year in 1H06 and showed a decline of 2.3% vs. 2Q05.

By region, TME's revenues were up 2.9% year-over-year in 1H06 (+1.6% in 2Q06). Solid growth in customer revenues (+7.3% vs. 1H05 and +8.2% vs. 2Q05) more than offsets lower revenues from handset sales (-9.1% vs. 1H05 and -18.9% vs. 2Q05) and from interconnection and roaming revenues (-3.4% vs. 1H05; -5.3% vs. 2Q05).

Revenues from the Group's Latin American operators rose 26.3% vs. 1H05 (17.7% ex-forex), contributing 50% of total consolidated revenues (45% in 1H05). As in Spain, service revenues performed well (+27.4% in euros; +18.5% assuming constant exchange rates), backed on the good outgoing service revenue performance (+38.1% in terms, +29.3% assuming constant exchange rates).

**Consolidated OIBDA grew 13.2% in 2Q06 and 12.4% in 1H06, to 2,899MM.** Excluding the impact of exchange rates, consolidated OIBDA would have grown 10.1% year-over-year in 1H06.

We would point out the margin improvement in 2Q06 in Spain and Latin America despite the increased commercial activity vs. 2Q05. It should be noted that in 2Q05 the Group recorded 75MM of expenses related with the rebranding. The Group's OIBDA margin stood at 32.0% in 2Q06 (+1.1 p.p. vs. 2Q05) and at 33.0% in 1H06 (-0.3 p.p. vs. 1H05).

TME's OIBDA in 1H06 surpassed 1,976MM, up 1.5% vs. 1H05, reflecting the sharp growth recorded in 2Q06 (+6.7% vs. 2Q05). The OIBDA margin in 2Q06 reached 45.4% (+2.2 p.p. vs. 2Q05 and +0.4 p.p. excluding the impact of the brand relaunch in 2Q05).

In 1H06 the OIBDA margin stood at 44.7% (45.3% in 1H05), reflecting increased commercial activity and higher network and customer management expenses.

The consolidated Latin American subsidiaries contributed 427MM to Group OIBDA in 2Q06 and 981MM in 1H06 (33% of the totals, 26% in 1H05), showing a strong year-over-year rise of 43.6% in euros and 34.8% excluding the impact of exchange rates. As in 1Q06, the increasing weight of GSM commercial actions had a positive impact on operators' OIBDA by reducing unit commercial costs. This led to a 1.6 p.p. increase in the OIBDA margin vs. 2Q05.

The lower margin in 2Q06 compared to 1Q06 was due to the impact of higher provisions in Brazil and increased commercial activity (gross adds: +21% vs. 1Q06).

Regarding others main items, we would highlight:

**A year-over-year increase of 11% in depreciation and amortisation in 1H06,** affected by the appreciation of the Latin American currencies.

---

<sup>6</sup> Consolidated data before rest and intragroup eliminations

2006 April-June

6

---

**Telefónica Móviles Results**

---

**Year-over-year increase in net financial losses (+116%)**, due primarily to foreign exchange rate losses compared to gains a year earlier, the higher cost of debt as a result of interest-rate increases, the appreciation of the Latin American currencies and the greater weight of debt denominated in Latin American currencies.

Consolidated net debt at the end of 2Q06 stood at 7,622MM, down 24% from the end of June 2005 and 12% from December 2005.

**12% effective tax rate in 2Q06 and 24% in 1H06**, mostly affected by allowances for export activities.

**Strong year-on-year growth in net income (+20.9% vs. 2Q05; +12.8% vs. 1H05)**

**Consolidated capex<sup>7</sup> in 1H06, excluding licenses**, stood at 679MM.

---

<sup>7</sup> Group capex in 2006 at cumulative average exchange rate. For comparative purposes, 2005 Capex has been recalculated at the cumulative average exchange rate for the corresponding period.

**Telefónica Móviles Results**

The following significant events have taken place in the past few months:

Approval of the merger and takeover of Telefónica Móviles, S.A. by Telefónica, S.A. at the companies' respective shareholders meetings of June 20th and 21st.

The merger includes an exchange ratio of four Telefónica shares for every five Telefónica Móviles shares and the payment of two special cash dividends of 0.435 per share. These dividends, which were paid on July 21st, coupled with the approved 0.205 dividend paid out for 2005 profit amount to a total gross dividend of 0.64 per share.

The Spanish wireless market continues to be marked by a highly competitive environment and increasing commercial activity by all operators. The total market ended June with over 45MM lines. As a result, the estimated penetration rate in Spain exceeded 100% for the first time ever.

In this context, TME continues to pursue the same strategy as in previous quarters, pooling commercial efforts and carrying out practically 2.8MM commercial actions in 2Q06.

Despite stiffer competition, TME recorded net adds of 378 thousand lines in 2Q06, 24% more than in 2Q05. In June 2006 it has close to 20.7MM customers (+6.6% vs. 2Q05), reinforcing its position as the leading Spanish wireless operator. Net adds in 1H06 surpassed 765 thousand (+89% vs. 1H05).

## Edgar Filing: TELEFONICA MOBILE INC - Form 6-K

Worth highlighting are the good results achieved in number portability, with TME posting record net adds of 76,609 customers, virtually 4 times those of 2Q05. Out of which, 67,122 customers are in the contract segment.

TME recorded year-over-year growth in gross adds of 4.1% in 2Q06 and 14.6% in 1H06, driven primarily by the positive performance of the contract segment (+5.3% vs. 2Q05; +17.4% vs. 1H05). Thanks to the higher volume of gross contract adds and prepaid to contract migrations (over 200,000 migrations in 2Q06), the contract segment represented 55.2% of TME's total customer base in 2Q06 (50.8% in 2Q05).

A key factor behind the positive commercial performance has been the reduction in the churn rate, which ended 2Q06 slightly below 1.6% (1.0% in the contract segment), more than 0.1 p.p. lower than in 2Q05.

The churn containment in a very competitive environment is the result of the good results achieved in customer retention -TME continues to reward customer loyalty by offering very

2006 April-June

9

favourable conditions for handset upgrades in exchange for signing long-term commitment contracts- and underscores the high quality of the services offered by the company.

In 2Q06 TME carried out 1.2MM handset upgrades, 10.8% more than in 1Q06. In 2Q06, approximately 70% of the commercial actions in the contract segment involving handsets were linked to long-term commitments (34% in 2Q05), which is also helping to reduce churn rate and reflects the high degree of loyalty among our customers.

Also helping to contain churn rate are pricing plans launched to increase usage, leveraging the community effect. These promotions include, among others, Mi Favorito (My Favourite) and Mis cinco (My Five), and since June the new Verano Azul (Blue Summer) promotion, whereby for a monthly charge of €3, customers can make telephone and video calls to any Movistar customer at a rate of €0.03/minute.

These products have also considerably increased on-net traffic, which grew 7.8% y-o-y in 2Q06, and represented 43% of billable traffic. TME's networks carried a total of 14.4MM minutes in 2Q06 (10.0% more than in 2Q05) and 28MM in 1H06 (+16.6% vs. 1H05).

This increase in traffic, coupled with the greater weight of the contract segment, boosted voice ARPU in 2Q06 despite the change in prices from 1Q06. Voice ARPU in 2Q06 stood at €28.7, 4.7% higher than in 1Q06, but still slightly below 2Q05 (-1.7%) due to the cut in interconnection rates made in 4Q05. In 1H06 voice ARPU reached €28.1 (-0.7% vs. 1H05)

Data ARPU totalled €4.2 in 2Q06 (a year-over-year increase of +2.9%) and €4.3 in 1H06 (+2.1% vs. 1H05), fuelled by an increase in data connectivity traffic on the back of the uptake in the 5Gb, 1Gb and 30 Mb discount packages. It's worth highlighting that around 70 thousand customers have signed up for one of these products, more than double the total accumulated in 1Q06.

Total ARPU stood at €33.0 in 2Q06, slightly lower than in 2Q05, but 3.5% higher than in 1Q06. Total ARPU in 1H06 was €32.4, virtually unchanged from the year before (-0.3%).

Regarding the rollout of the UMTS network, TME now has roughly 450 nodes with HSDPA functionality in 57 municipalities, all of Spain's main provinces and cities with more than 250,000 inhabitants. The commercial launch was carried out in mid July. During this service phase, and depending on the handset used, the HSDPA technology rolled out reached transmission speeds of up to 3.6Mbit/s, 10 times as fast as previous Third Generation (3G) services using UMTS technology.

Highlights of TME's financial results include:

Revenues totalled €2,255MM in 2Q06, representing year-over-year growth of 1.6% and 4.1% higher than in 1Q06. Driving this increase was the good performance by customer revenues, which were up 8.2% vs. 2Q05 and more than offset the declines in roaming-in revenues (-10.4% vs. 2Q05), interconnection revenues (-4.3% vs. 2Q05) and revenues from handset sales (-18.9% vs. 2Q05). Revenues in 1H06 reached €4,420MM (+2.9% vs. 1H05).

The sharp decrease in revenues from handset sales was due to lower commercial activity vs. 2Q05 and lower handset prices.

Service revenues rose 4.8% year-over-year in 2Q06 and 4.7% in 1H06, reflecting the solid performance of TME customer's traffic.

The increase in revenues and decrease in operating costs led to an 6.7% year-over-year increase in OIBDA in 2Q06 to

€1,024MM. Commercial costs accounted for 16% of gross service revenues, 3 p.p. lower vs. 2Q05 and broadly stable vs. 1Q06. This led to an increase in the OIBDA margin to 45.4% in 2Q05 (+2.2 p.p. vs. 2Q05).

In 1H06, OIBDA reached €1,976MM, a 1.5% growth over 1H05. OIBDA margin in 1H06 stood at 44.7%, slightly lower than last year (45.3%).

**Morocco**

At the end of June 2006, Médi Telecom's customer base stood at 4.2MM, a 21.2% year-over-year increase.

Regarding financial results, revenues in 1H06 totalled 203MM (+8.8% vs. 1H05).

OIBDA stood at 85MM, 21% higher than in 1H05, leaving an OIBDA margin of 42% (38% in 1H05).

In July 2006, Meditel has been awarded a 3G (UMTS) license for 360 MM dirhams ( 32MM) that will be self financed by the Company.

Vivo's 2Q06 results show the impact of stiff competition in the market -where commercial efforts are focused on high value segments- and Vivo's structural disadvantages and interim problems derived from the integration process of its 14 operators.

The company's weaker competitive position in pricing and handsets compared to GSM operators, the lack of national coverage, billing problems and subscription fraud, have all led to the loss of value customers, which, in turn, has affected the company's revenues.

## Edgar Filing: TELEFONICA MOBILE INC - Form 6-K

At the same time, Vivo's results are affected by extraordinary provisions recorded in 2Q06 ( \$30MM for 50% of Vivo), due to the abovementioned problems.

However, Vivo still has its key attributes – the best network in the country, a strong brand and solid distribution – all of which have been taken into consideration when drawing up a series of initiatives to improve its performance, which are already in execution.

On the one hand, the company has defined a series of actions aimed at: i) retaining its high value prepaid and contract customers and managing those segments with lower value more efficiently; ii) Further strength in its regional focus, gearing efforts towards key markets; iii) speeding up systems integration; iv) reducing fraud; and v) improving efficiency.

On the other hand, Vivo will develop a new network offering GSM/EDGE services, which should evolve in future following the 3G W-CDMA pattern. This new network will complement those products and services currently offered by Vivo's current CDMA/EVDO network.

2006 April-June

12

---

**Business Performance by Geographic Region**

---

The rollout of this network which will have similar coverage and quality to Vivo's current CDMA network, will not affect the company's future capex forecasts and will mean significant savings in handset procurement, notably improving Vivo's competitive position.

Against this backdrop, Vivo's customer base totalled 28.5MM at the end of June, after disconnecting 1.8MM inactive lines. It should be pointed out that this decision has no impact on the Company's economic and financial performance.

MOU in 2Q06 was 66 minutes, whilst ARPU stood at 24.5 reais.

Regarding Vivo's financial results, service revenues fell 7.3% year-over-year in 2Q06 in local currency as a result of the factors mentioned above and lower interconnection revenues (-18.3%). It must be pointed out the y-o-y growth in data revenues (14.2% vs. 2Q05) while customer revenues remain stable in local currency.

In line with Vivo's focus on key regions, it's noteworthy the positive evolution of outgoing contract service revenues in Sao Paulo, with a double digit y-o-y growth rate in 1H06.

Reduced revenues coupled with higher costs, including provisions booked in the quarter, led to a year-over-year reduction in OIBDA in 2Q06 in local currency (-40%) and an OIBDA margin of 12.6% (19.1% excluding the impact of these provisions).

Telefónica Móviles México (TMM) continued to step up its commercial activity in 2Q06, relying on initiatives carried out over the last few months to enhance its competitive position (improving its distribution network, indoor coverage, network quality and customer care).

2006 April-June

13

**Business Performance by Geographic Region**

On the commercial front, the Mothers' Day and Fathers' Day campaigns led to higher gross adds in 2Q06 of 1.1MM (+9.1% vs. 1Q06 and +5.7% vs. 2Q05). Meanwhile, measures adopted to improve the quality of the gross adds led to a sharp improvement in churn rate, to 3.9% in 2Q06 (vs. 5.3% in 2Q05 and 4.2% in 1Q06). TMM recorded net adds of 306 thousand in 2Q06 (more than tripling those recorded in 2Q05, and 60% higher than 1Q06), ending June with 6.9MM customers (+17% vs. 2Q05).

The contract segment continued to perform well in 2Q06, posting net adds of 56 thousand (+13% vs. 1Q06) thanks to both higher gross adds and the reduction in the churn rate for this segment (-0.8 p.p. vs. 1Q06).

In terms of usage, traffic continued to grow and in 2Q06 it was higher than in both 1Q06 and 2Q05. MOU in 2Q06 was 66 minutes (+21.7% vs. 1Q06; +26.1% vs. 2Q05), with ARPU reaching 115.7 Mexican pesos (vs. 103.4 pesos in 2Q05 and 107.4 pesos in 1Q06). MOU in 1H06 was 61 minutes (+12.4% vs. 1H05) and ARPU was 111.6 Mexican pesos (+3.7% vs. 1H05).

The strong performance of ARPU, coupled with the growth of the customer base, led to a 19.6% year-over-year increase in service revenue in local currency in 1H06, outstripping the growth of the customer base (17.4%), thus reflecting the quality of the customers. The growth in service revenues was underpinned by higher outgoing revenues (+29.1% in local currency), which were offset by flat incoming revenues (+0.2% in local currency) as a result of the reduction in interconnection rates implemented in January 2006.

The surge in service revenues led to growth in total revenues in local currency of 16.6% in 2Q06 vs. 1Q06 and of 12.4% in 1H06 vs. 1H05.

Higher revenues and efficiency improvements allowed for a 68% reduction in operating losses before depreciation and amortisation in local currency, to 9MM in 2Q06 and 33MM in 1H06.

The improvement in OIBDA is reflected in a 64% y-o-y reduction in negative operating cash flow in 1H06 vs. 1H05.

The Venezuelan wireless market continued to grow sharply in 2Q06, reaching an estimated penetration rate of over 58% (up 19 p.p. vs. 2Q05).

The market's rapid growth in 2Q06 was underpinned by the campaigns carried out in the quarter (e.g. Mothers' Day and Fathers' Day). TM Venezuela's customer base at the end of June reached 7.8MM (+50% vs. 1H05), with net adds of over 1.1 million in 2Q06, 89% higher than in 2Q05 and more than double the figure for 1Q06.

The strong growth in the customer base, coupled with higher traffic and a steady improvement in data revenues led to a 51% year-over-year growth in service revenues in local currency and 49% in total revenues in 1H06, largely in line with the growth of the customer base.

The intense commercial activity in 2Q06 undermined the growth of OIBDA in 1H06 (33.5% vs. 1H05 in local currency, vs. +63.1% in 1Q06 vs. 1Q05), which totalled 343MM. The OIBDA margin reached 36% in 1H06 (-4.1 p.p. vs. 1H05).

Capex <sup>1</sup>	68	77	-11.5%	46	57	-20.0%
--------------------	----	----	--------	----	----	--------

<sup>1</sup> Capex in 2006 at cumulative average exchange rate. For comparative purposes, 2005 Capex has been recalculated at the cumulative average exchange rate for the corresponding period.

The Colombian cellular market was again the fastest y-o-y growing market in the region.

TM Colombia maintained the pace of commercial activity seen in previous quarters and is capturing nearly 95% of its gross adds in GSM in 2Q06. Net adds totalled 656 thousand in 2Q06 and over 1.4MM in 1H06. We would point out the good performance of the contract segment, with net contract adds accounting for a third of the total in 2Q06.

This brought the customer base at the end of June 2006 to near 7.5MM (+57% vs. 2Q05), with GSM customers accounting for 49% of the total (+10 p.p. vs. 1Q06).

Regarding financial results, revenues grew by 7.9% year-over-year in 1H06 in local currency. Service revenues (+6.0% vs. 1H05) were affected by the reduction in interconnection rates and the rapid growth of the customer base.

2006 April-June

15

The Peruvian market was strongly dynamic in 2Q06, with an estimated penetration rate of over 24% (+8 p.p. vs. 2Q05).

During 2Q06, the company has continued deploying its GSM network, reaching a coverage of 61% of the population.

Due to the positive performance of GSM adds (+62% of the total in 2Q06), backed on the wider range of handsets available, value added services and the rollout of the GSM network, TM Perú recorded substantial net adds (368 thousand), more than 4 times the number of customers added in 2Q05. This brought TM Perú customer base to 4MM at the end of June 2006 (+32% vs. 2Q05), 15% in GSM, only five months after its commercial launch.

Revenues rose by 14% in local currency vs. 1H05, driven by revenues from handset sales (+49% vs. 1H05) and service revenues (+10% vs. 1H05). Outgoing service revenues rose by 34.4% year-over-year in local currency in 2Q06 and by 29.6% in 1H06.

The higher level of commercial activity, both in 2Q06 and 1H06 compared to the previous year, led to a lower OIBDA margin while OIBDA figures remained in line with those for the previous year.

The Argentine wireless market achieved an estimated penetration rate of 63% in 2Q06, up almost 20 p.p. than on 2Q05.

In this context, TM Argentina's commercial efforts were intense, registering net adds in 2Q06 of 572 thousand, practically in line with the figure for 2Q05.

We should highlight that this year's Father's Day campaign focused on capturing contract customers, driving up net adds in this segment by 81% vs. 1Q06.

The total customer base increased 41%, to 9.5MM. GSM customers now account for 64% of the total (vs. 34% in 2Q05).

Regarding financial results in local currency, we would highlight solid top line growth, driven by higher service revenues (+34% in 1H06 vs. 1H05 in local currency), reflecting the growth in the customer base. Noteworthy is the increasing contribution from data revenues, which doubled that from 1H05.

Strong revenues, together with lower SACs, and the GSM deployment in the North of the country led to a 167.5% year-over-year increase in the OIBDA in local currency (+171.0% in 2Q06 vs. 2Q05), to 132MM in 1H06 (65MM in 2Q06). The OIBDA margin improved by 11 p.p. year-over-year in both 2Q06 and 1H06, reaching 21.9% and 22.3%, respectively.

## Chile

Despite the high penetration levels reached at the end of 2005, the Chilean wireless market continued to show a sustained expansion in 1H06, with an increase of 8 p.p. for an estimated penetration rate of almost 76%.

2006 April-June

17

In this context, TM Chile's customer base surpassed 5.5MM (+4.9% vs. 2Q05), driven by GSM gross adds, with 64% of the customer base now using this technology.

Net adds in 2Q06 totalled 180 thousand, 3 times the amount in 1Q06, although lower than the figure for 2Q05 following the relaunch of the movistar brand. The focus on value growth can be seen in the positive performance of the contract segment (+19% vs. 2Q05).

Revenues in 1H06 performed well, with a 15.8% year-over-year increase in local currency, buoyed by the solid performance of service revenues (+21.1% 1H06/1H05), which far outstripped the growth of the customer base. This reflects both the larger customer base and the positive performance of ARPU (+12.2% vs. 1H05).

The strong top line performance translated to OIBDA, which outpaced revenue growth to reach 22.7% in local currency, leading to growth in the OIBDA margin (+1.7 p.p. vs. 1H05) to over 30%, despite higher commercial costs linked to technologic migration and customer plans migration activities.

The sale of 25MHz spectrum in the 800MHz band, condition established by the competition authorities to allow the merger of BellSouth Chile and Telefónica Móviles de Chile, was effective in April 2006. The company received around \$42MM, which were not recorded as higher operating revenue but as lower goodwill.
