NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Basis of Presentation

The accompanying semi-annual consolidated financial statements for the six months ended September 30, 2006 and 2005 of NTT DoCoMo, Inc. and its subsidiaries (the Company or DoCoMo) have been prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP). Since DoCoMo's American Depositary Shares was listed on the New York Stock Exchange in March 2002, DoCoMo has prepared its consolidated financial statements pursuant to the terminology, forms and preparation methods required in order to issue American Depositary Shares, which are registered with the Securities Exchange Commission of the United States of America.

2. Summary of significant accounting and reporting policies:

(1) Adoption of new accounting standards

Inventory Pricing

Effective April 1, 2006, DoCoMo adopted Statement of Financial Accounting Standards (SFAS) No. 151, Inventory Costs -an amendment of Accounting Research Bulletin (ARB) No. 43, Chapter 4 issued by the Financial Accounting Standards Board (FASB). SFAS No. 151 amends the guidance in ARB No. 43, Chapter 4, Inventory Pricing, to clarify the accounting for abnormal amounts of idle facility expense, freight, handling costs, and wasted material (spoilage). ARB No. 43, Chapter 4 previously stated that such costs might be so abnormal as to require treatment as current period charges. SFAS No. 151 requires that those items be recognized as current-period charges regardless of whether they meet the criterion of so abnormal. In addition, SFAS No. 151 requires that allocation of fixed production overheads to the costs of conversion be based on the normal capacity of the production facilities. The adoption of SFAS No. 151 did not have any impact on DoCoMo's results of operations and financial position.

Exchanges of Non-monetary Assets

Effective April 1, 2006, DoCoMo adopted SFAS No. 153, Exchanges of Non-monetary Assets -an amendment of Accounting Principles Board (APB) Opinion No. 29 issued by the FASB. The amendment eliminates the exception for non-monetary exchanges of similar productive assets and replaces it with a general exception for exchanges of non-monetary assets that do not have commercial substance. The adoption of SFAS No. 153 did not have any impact on DoCoMo's results of operations and financial position.

Accounting Changes and Error Corrections

Effective April 1, 2006, DoCoMo adopted SFAS No. 154, Accounting Changes and Error Corrections -a replacement of APB Opinion No.20 and the FASB statement No.3 issued by the FASB. SFAS No. 154 replaces APB Opinion No. 20 (APB No. 20), Accounting Changes, and SFAS No. 3, Reporting Accounting Changes in Interim Financial Statements, and changes the requirements for the accounting for and reporting of a change in accounting principle. APB No. 20 previously required that most voluntary changes in accounting principle be recognized by including in net income of the period of the change the cumulative effect of changing to the new accounting principle. SFAS No. 154 requires retrospective application to prior periods' financial statements of changes in accounting principle. The adoption of SFAS No. 154 did not have any impact on DoCoMo's results of operations and financial position. DoCoMo will continue to apply the requirements of SFAS No. 154 to any future accounting changes and error corrections.

(2) Significant accounting policies

Principles of consolidation

The consolidated financial statements include the accounts of DoCoMo and its majority-owned subsidiaries. All significant intercompany balances and transactions have been eliminated in consolidation.

DoCoMo adopts FASB revised Interpretation No. 46 (FIN 46R), Consolidation of Variable Interest Entities -an Interpretation of ARB No. 51. FIN 46R addresses how a business enterprise should evaluate whether it has a controlling financial interest in an entity through means other than voting rights and accordingly should consolidate the entity. At September 30, 2006 and 2005, and March 31, 2006, DoCoMo had no variable interest entities to be consolidated or disclosed.

Use of estimates

The preparation of DoCoMo's consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements, as well as the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. DoCoMo has identified the following areas where it believes that estimates and assumptions are particularly critical to the financial statements. These are determination of useful lives of property, plant and equipment, internal use software and other intangible assets, impairment of long-lived assets, other than temporary impairment of investments, realization of deferred tax assets, pension liabilities and revenue recognition.

Cash and cash equivalents

DoCoMo considers cash in banks and short-term highly liquid investments with original maturities of three months or less at the date of purchase to be cash and cash equivalents.

Short-term investments

The highly liquid investments, which have original maturities of longer than three months at the date of purchase and remaining maturities of one year or less at the end of fiscal period, are considered to be short-term investments.

Allowance for doubtful accounts

The allowance for doubtful accounts is principally computed based on the historical bad debt experience and the estimated uncollectible amount based on the analysis of certain individual accounts, including claims in bankruptcy.

Table of Contents**NTT DoCoMo, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****Inventories**

Inventories are stated at the lower of cost or market. The cost of equipment sold is determined by the first-in, first-out method. Inventories consist primarily of handsets and accessories. DoCoMo evaluates its inventory for obsolescence on a periodic basis and records adjustments as required.

Property, plant and equipment

Property, plant and equipment is stated at cost and includes interest cost incurred during construction, as discussed below in Capitalized interest. Property, plant and equipment under capital leases are stated at the present value of minimum lease payments. Depreciation is computed by the declining-balance method at rates based on the estimated useful lives of the respective assets, with the exception of buildings, which are depreciated on a straight-line basis. Useful lives are determined at the time the asset is acquired and are based on expected use, experience with similar assets and anticipated technological or other changes. If technological or other changes occur more or less rapidly or in a different form than anticipated or the intended use changes, the useful lives assigned to these assets are adjusted, as appropriate. Property, plant and equipment held under capital lease and leasehold improvements is amortized using either the straight-line method or the declining-balance method, depending on the type of the asset, over shorter of the lease term or estimated useful life of the asset.

The estimated useful lives of major depreciable assets are as follows:

| | |
|--|----------------|
| Major wireless telecommunications equipment | 6 to 15 years |
| Steel towers and poles for antenna equipment | 30 to 40 years |
| Reinforced concrete buildings | 38 to 50 years |
| Tools, furniture and fixtures | 4 to 15 years |

Depreciation expense for the six months ended September 30, 2006 and 2005 and for the year ended March 31, 2006 was ¥253,143 million, ¥254,094 million and ¥554,129 million, respectively.

When depreciable telecommunications equipment is retired or abandoned in the normal course of business, the amount of such telecommunications equipment is deducted from the respective telecommunications equipment and accumulated depreciation accounts. Any remaining balance is charged to expense immediately. DoCoMo accounts for legal obligations associated with the retirement of tangible long-lived assets in accordance with SFAS No. 143, Accounting for Asset Retirement Obligations. DoCoMo's asset retirement obligations subject to SFAS No. 143 primarily relate to its obligations to restore certain leased land and buildings used for DoCoMo's wireless telecommunications equipment to their original states. DoCoMo estimates that the fair values of the liabilities for an asset retirement obligation and the aggregate amount of the fair values is immaterial.

Expenditures for replacements and betterments are capitalized, while expenditures for maintenance and repairs are expensed as incurred. Assets under construction are not depreciated until placed in service.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Capitalized interest

DoCoMo capitalizes interest related to the construction of property, plant and equipment over the period of construction. DoCoMo also capitalizes interest associated with the development of internal-use software. DoCoMo amortizes such capitalized interest over the estimated useful lives of the related assets. There were no interests capitalized for the six months ended September 30, 2006 and 2005 and the year ended March 31, 2006.

Investments in affiliates

The equity method of accounting is applied to investments in affiliates where DoCoMo owns an aggregate of 20% to 50% and/or is able to exercise significant influence. Under the equity method of accounting, DoCoMo records its share of earnings and losses of the affiliate and adjusts its investment amount. For investments of less than 20%, DoCoMo periodically reviews the facts and circumstances related thereto to determine whether or not it can exercise significant influence over the operating and financial policies of the affiliate and, therefore should apply the equity method of accounting to such investments. For investees accounted for under the equity method whose year ends are December 31, DoCoMo records its share of income or losses of such investees on a three month lag basis in its consolidated statements of income and comprehensive income.

DoCoMo evaluates the recoverability of the carrying value of its investments in affiliates, which includes investor level goodwill, when there are indicators that a decline in value below its carrying amount may be other than temporary. In performing its evaluations, DoCoMo utilizes various information, as available, including cash flow projections, independent valuations and, as applicable, quoted market values to determine recoverable amounts and the length of time an investment's carrying value exceeds its estimated current recoverable amount. In the event of a determination that a decline in value is other than temporary, a charge to earnings is recorded for the loss, and a new cost basis in the investment is established.

Marketable securities and other investments

Marketable securities consist of debt and equity securities. DoCoMo accounts for such investments in debt and equity securities in accordance with SFAS No. 115, Accounting for Certain Investments in Debt and Equity Securities. Management determines the appropriate classification of its investment securities at the time of purchase. DoCoMo periodically reviews the carrying amounts of its marketable securities for impairments that are other than temporary. If this evaluation indicates that a decline in value is other than temporary, the security is written down to its estimated fair value.

Equity securities held by DoCoMo, whose fair values are readily determinable, are classified as available-for-sale. Available-for-sale equity securities are carried at fair value with unrealized holding gains or losses, net of applicable taxes, included as a component of accumulated other comprehensive income in shareholders' equity.

Debt securities held by DoCoMo, which DoCoMo has the positive intent and ability to hold to maturity, are classified as held-to-maturity, and the other debt securities that may be sold before maturity are classified as available-for-sale. Held-to-maturity debt securities are carried at amortized cost. Available-for-sale debt securities are carried at fair value with unrealized holding gains or losses, net of applicable taxes, included as a component of accumulated other comprehensive income in shareholders' equity. Realized gains and losses are determined using the first-in, first-out cost method and are reflected in earnings. Held-to-maturity and available-for-sale debt securities, whose remaining maturities at the end of fiscal periods are one year or less, are recorded as short-term investments in the consolidated balance sheets.

Table of Contents

NTT DoCoMo, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

DoCoMo did not hold any trading securities or held-to-maturity debt securities during the six months ended September 30, 2006 and 2005 and the year ended March 31, 2006.

Other investments include equity securities, whose fair values are not readily determinable, and equity securities for which sales are restricted by contractual requirements (restricted stocks). Equity securities, whose fair values are not readily determinable, and restricted stocks are carried at cost. Other than temporary declines in value are charged to earnings. Realized gains and losses are determined using the average cost method and are reflected currently in earnings.

Goodwill and other intangible assets

Goodwill is the excess of the acquisition cost of businesses over the fair value of the identifiable net assets acquired. Other intangible assets primarily consist of software for telecommunications network, internal-use software, software acquired to be used in manufacture of handsets, customer related assets and rights to use certain telecommunications assets of wireline carriers.

DoCoMo accounts for goodwill and other intangible assets in accordance with SFAS No. 142, Goodwill and Other Intangible Assets. Accordingly, DoCoMo does not amortize either goodwill, including embedded goodwill created through the acquisition of investments accounted for under the equity method, or intangible assets acquired in a purchase business combination and determined to have an indefinite useful life, but instead, (1) goodwill, excluding goodwill related to equity method investments, and (2) other intangible assets that have indefinite useful lives are tested for impairment at least annually. Intangible assets that have finite useful lives, consisting primarily of software for telecommunications network, internal-use software, software acquired to be used in manufacture of handsets, customer related assets and rights to use telecommunications facilities of wireline carriers are amortized on a straight-line basis over their useful lives.

Goodwill related to equity method investments is tested for other than temporary impairment in accordance with APB Opinion No. 18, The Equity Method of Accounting for Investments in Common Stock.

DoCoMo capitalizes the cost of internal-use software which has a useful life in excess of one year in accordance with American Institute of Certified Public Accountants (AICPA) Statement of Position (SOP) 98-1, Accounting for the Costs of Computer Software Developed or Obtained for Internal Use. Subsequent costs for additions, modifications or upgrades to internal-use software are capitalized only to the extent that the software is able to perform a task it previously did not perform. Software acquired to be used in the manufacture of handsets is capitalized if the technological feasibility of the handset to be ultimately marketed has been established at the time of purchase in accordance with SFAS No. 86, Accounting for the Costs of Computer Software to Be Sold, Leased, or Otherwise Marketed. Software maintenance and training costs are expensed in the period in which they are incurred. Capitalized software costs are amortized over a maximum period of 5 years.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Customer related assets principally consist of contractual customer relationships in the mobile phone business that were recorded in connection with the acquisition of minority interests of the regional subsidiaries in November 2002 through the process of identifying separable intangible assets apart from goodwill. The customer related assets are amortized over the expected term of customer relationships in mobile phone business, which is 6 years.

Amounts capitalized related to rights to use certain telecommunications assets of wireline carriers, primarily Nippon Telegraph and Telephone Corporation (NTT), are amortized over 20 years.

Impairment of long-lived assets

DoCoMo's long-lived assets other than goodwill, including property, plant and equipment, software and intangibles subject to amortization, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable in accordance with SFAS No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets. Recoverability of assets to be held and used is evaluated by a comparison of the carrying amount of the asset with future undiscounted cash flows expected to be generated by the asset or asset group. If the asset (or asset group) is determined to be impaired, the loss recognized is the amount by which the carrying value of the asset (or asset group) exceeds its fair value as measured by discounted cash flows, salvage value or expected net proceeds, depending on the circumstances.

Information relating to goodwill is disclosed above in Goodwill and other intangible assets.

Hedging activities

DoCoMo uses derivative financial instruments, including interest rate swap, foreign currency swap and foreign exchange forward contracts, and non-derivative financial instruments to manage its exposure to fluctuations in interest rates and foreign exchange rates. DoCoMo does not hold or issue derivative financial instruments for trading purposes.

These financial instruments are effective in meeting the risk reduction objectives of DoCoMo by generating either transaction gains and losses which offset transaction gains and losses of the hedged items or cash flows which offset the cash flows related to the underlying position in respect of amount and timing.

DoCoMo accounts for derivative financial instruments and other hedging activities in accordance with SFAS No.133, Accounting for Derivative Instruments and Hedging Activities, as amended by SFAS No. 138 and No. 149. All derivative instruments are recorded on the balance sheet at fair value. The recorded fair values of derivative instruments represent the amounts that DoCoMo would receive or pay to terminate the contracts at the end of each fiscal period.

For derivative financial instruments that qualify as fair value hedge instruments, the changes in fair value of the derivative instruments are recognized currently in earnings, which offset the changes in fair value of the related hedged assets or liabilities.

Table of Contents

NTT DoCoMo, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For derivative financial instruments that qualify as cash flow hedge instruments, the changes in fair value of the derivative instruments are initially recorded in accumulated other comprehensive income and reclassified into earnings when the hedged transaction affects earnings.

For derivative financial instruments that do not qualify as hedging instruments, the changes in fair value of the derivative instruments are recognized currently in earnings.

DoCoMo discontinues hedge accounting when it is determined that the derivative or non-derivative instrument is no longer highly effective as a hedge or when DoCoMo decides to discontinue the hedging relationship.

Cash flows from derivative instruments are classified in the consolidated statements of cash flows under the same categories as the cash flows from the related assets, liabilities or anticipated transactions.

Employees retirement benefit plans

Pension benefits earned during the period, as well as interest on projected benefit obligations are accrued currently. Prior service costs and credits resulting from changes in benefit plans are amortized over the average remaining service period of the employees expected to receive benefits.

Revenue recognition

DoCoMo primarily generates its revenues from two sources wireless services and equipment sales. These revenue sources are separate and distinct earnings processes. Wireless service is sold to the ultimate subscriber directly or through third-party retailers who act as agents, while equipments, including handsets, are sold principally to primary distributors.

DoCoMo sets its wireless services rates in accordance with the Japanese Telecommunications Business Law and government guidelines, which currently allow wireless telecommunications operators to set their own tariffs without government approval. Wireless service revenues primarily consist of base monthly service charges, airtime charges and fees for activation.

Base monthly service charges and airtime charges are recognized as revenues as service is provided to the subscribers. DoCoMo's monthly billing plans for cellular (FOMA and mova) services generally include a certain amount of allowances (free minutes and/or packets), and the used amount of the allowances is subtracted from total usage in calculating the airtime revenue from a subscriber for the month. Prior to November 2003, the total amount of the base monthly charges was recognized as revenues in the month they were charged as the subscribers could not carry over the unused allowances to the following months. In November 2003, DoCoMo introduced a billing arrangement, called Nikagetsu Kurikoshi (two-month carry over), in which the unused allowances are automatically carried over up to the following two months. In addition, DoCoMo introduced an arrangement which enables the unused allowances offered in and after December 2004 that have been carried over for two months to be automatically used to cover the airtime and/or packet fees exceeding the allowances of the other lines in the Family Discount group, a discount billing arrangement for families with between two and ten DoCoMo subscriptions. Until the year ended March 31, 2006, DoCoMo had deferred revenues based on the portion of all unused allowances at the end of the period. The deferred revenues had been recognized as revenues as the subscribers make calls or utilize data connections, similar to the way airtime revenues are recognized, or as the allowance expires. As DoCoMo developed sufficient empirical evidence to reasonably estimate the portion of allowance that will be forfeited as unused, effective April 1, 2006, DoCoMo started to recognize the revenue attributable to such forfeited allowances ratably as the remaining allowances are utilized, in addition to the revenue recognized when the subscribers make calls or utilize data connections. The effect of this accounting change was not material for DoCoMo's results of operations and financial position.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Certain commissions paid to purchasers (primarily agent resellers) are recognized as a reduction of revenue upon delivery of the equipment to the purchasers (primarily agent resellers) in accordance with Emerging Issues Task Force Issue No. 01-09, Accounting for Consideration Given by a Vendor to a Customer (Including a Reseller of the Vendor's Products).

Non-recurring upfront fees such as activation fees are deferred and recognized as revenues over the estimated average period of the customer relationship for each service. The related direct costs are deferred only to the extent of the upfront fee amount and are amortized over the same period.

Selling, general and administrative expenses

Selling, general and administrative expenses primarily include commissions paid to agents, expenses associated with DoCoMo's customer loyalty programs, advertising costs, as well as other expenses such as payroll and related benefit costs of personnel not directly involved in the operations and maintenance process. Commissions paid to agents represent the largest portion of selling, general and administrative expenses.

Income taxes

Income taxes are accounted for in accordance with SFAS No.109 Accounting for Income Taxes. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carry forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

Earnings per share

Basic earnings per share includes no dilution and is computed by dividing income available to common shareholders by the weighted average number of shares of common stock outstanding for the period. Diluted earnings per share assumes the dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock. DoCoMo had no dilutive securities outstanding at September 30, 2006 and 2005 and March 31, 2006, and therefore there was no difference between basic and diluted earnings per share.

Foreign currency translation

All asset and liability accounts of foreign subsidiaries and affiliates are translated into Japanese yen at appropriate period-end current rates and all income and expense accounts are translated at rates that approximate those rates prevailing at the time of the transactions. The resulting translation adjustments are included as a component of accumulated other comprehensive income.

Foreign currency receivables and payables of DoCoMo are translated at appropriate period-end current rates and the resulting translation gains or losses are included in earnings currently.

DoCoMo transacts limited business in foreign currencies. The effects of exchange rate fluctuations from the initial transaction date to the settlement date are recorded as exchange gain or loss, which are included in Other, net of other income (expense) in the accompanying statements of income and comprehensive income.

(3) Reclassifications

Certain reclassifications have been made to the prior periods consolidated financial statements to conform to the presentation used for the six months ended September 30, 2006.

3. Investments in affiliates:

Hutchison 3G UK Holdings Limited

On May 27, 2004, DoCoMo agreed to sell its entire shareholding in Hutchison 3G UK Holdings Limited (H3G UK) to Hutchison Whampoa Limited (HWL) for a total consideration of £120 million in a Sale and Purchase Agreement signed between DoCoMo and HWL. Under the terms of the agreement, DoCoMo was to receive payment in three installments, the final installment of which was expected to be made in December 2006, either in cash or in shares of Hutchison Telecommunications International Limited (HTIL), a subsidiary company of HWL. As a result of the agreement, DoCoMo waived certain of its minority shareholder s rights, including voting rights and supervisory board representation. As DoCoMo no longer had the ability to exercise significant influence over H3G UK, DoCoMo ceased to account for its investment in H3G UK using the equity method. As of October 15, 2004, DoCoMo received 187,966,653 shares of HTIL (equivalent to £80 million) as the first installment payment by HWL, which was reported as marketable securities and other investments, with a corresponding amount recorded as other long-term liabilities until such time that the transfer of H3G UK shares was completed.

On May 9, 2005, DoCoMo received a notice from HWL that HWL intended to exercise its right to accelerate completion of the payment on June 23, 2005. Consequently, DoCoMo received £120 million in cash, and transferred the entire shareholding in HTIL to HWL. As a result of the transaction, DoCoMo recorded Gain on sale of affiliate shares of ¥61,962 million, including reclassification of foreign currency translation of ¥38,174 million, in the consolidated statement of income and comprehensive income for the six months ended September 30, 2005 and for the year ended March 31, 2006.

Table of Contents**NTT DoCoMo, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****Sumitomo Mitsui Card Co., Ltd.**

DoCoMo entered into an agreement with Sumitomo Mitsui Card Co., Ltd. (Sumitomo Mitsui Card), Sumitomo Mitsui Financial Group, Inc. and Sumitomo Mitsui Banking Corporation that DoCoMo and these companies would jointly promote the new credit transaction services which use mobile phones compatible with Osaifu-Keitai* service and DoCoMo would form a capital alliance with Sumitomo Mitsui Card. Based on the agreement, on July 11, 2005, DoCoMo acquired 34% of Sumitomo Mitsui Card's common shares for ¥98,000 million, including new shares issued by Sumitomo Mitsui Card. DoCoMo has accounted for its investment in Sumitomo Mitsui Card by the equity method since its acquisition date.

* Osaifu-Keitai refers to mobile phones equipped with a contactless IC chip, as well as the useful function and services enabled by the IC chip. With this function, a mobile phone can be utilized as electronic wallet, a credit card, an electronic ticket, a membership card and an airline ticket, among other things.

DoCoMo believes that the estimated fair values of its investments in affiliates at September 30, 2006 equaled or exceeded the related carrying values.

On October 24, 2005, DoCoMo dissolved its capital alliance with KPN Mobile N.V. (KPN Mobile). The i-mode license agreement between DoCoMo and KPN Mobile will be maintained.

Under the agreement, DoCoMo transferred all of its 2.16% holding of KPN Mobile shares to Koninklijke KPN N.V. (KPN), the parent company of KPN Mobile. KPN agreed to cooperate with DoCoMo in the smooth operation of the global i-mode alliance, through the use of KPN's i-mode-related patents and know-how, and has paid cash of 5 million to DoCoMo.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

As a result of the agreement, DoCoMo recognized a gain on the transfer of these KPN Mobile shares of ¥40,030 million, which included the reclassification of related foreign currency translation gains of ¥25,635 million, in the consolidated statement of income and comprehensive income under the line item "Gain on sale of other investments" for the year ended March 31, 2006. DoCoMo also recognized a non-cash charge of ¥14,062 million in the consolidated statement of income under the line item "Selling, general and administrative" and in the consolidated statement of cash flows under the line item "Expense associated with sale of other investments" at that time for the excess of the then fair value of KPN Mobile shares transferred over the actual cash received, which DoCoMo regarded as the consideration for the benefits from the arrangement, for the year ended March 31, 2006.

Other investments include long-term investments in various privately held companies and restricted stocks.

For long-term investments in various privately held companies for which there are no quoted market prices, the reasonable estimate of fair value could not be made without incurring excessive costs, and DoCoMo believes that it is not practicable to estimate the reasonable fair value. Accordingly, these investments are carried at cost.

DoCoMo holds equity securities for which sales are restricted by contractual requirements with third parties. As of September 30, 2006, the restricted stocks held by DoCoMo included shares of KT Freetel Co., Ltd., a Korean wireless telecommunications service provider, and Philippine Long Distance Telephone Company, a telecommunication service provider in Philippines. The aggregate carrying amount of the equity securities for which sales are restricted for a remaining period of longer than a year, which were recorded as cost method investments, was ¥69,495 million as of September 30, 2006 and ¥136,147 as of March 31, 2006, respectively. DoCoMo believes that it was not practicable to estimate reasonable fair values for these restricted stocks, which have quoted market prices, given the restriction of sales for a period of longer than a year by contractual obligations. The aggregate market price of the equity securities for which sales are restricted for a remaining period of longer than a year was ¥85,102 million as of September 30, 2006 and ¥144,987 as of March 31, 2006, respectively. The equity securities for which sales are restricted for a remaining period of a year or less were recorded as available-for-sale securities.

The aggregate carrying amount of DoCoMo's cost method investments included in other investments totaled ¥92,516 million, ¥16,512 million and ¥157,843 million as of September 30, 2006 and 2005, and March 31, 2006, respectively.

In May and June 2006, DoCoMo repurchased 283,312 shares of its common stock for ¥49,998 million in the stock market. This repurchase was based on a stock repurchase plan, which was approved in the shareholders' meeting held on June 21, 2005, under which DoCoMo could repurchase up to 2,200,000 shares at an aggregate amount not to exceed ¥400,000 million in order to improve capital efficiency and to implement flexible capital policies in accordance with the business environment.

On June 20, 2006, the shareholders' meeting approved a stock repurchase plan under which DoCoMo may repurchase up to 1,400,000 shares at an aggregate amount not to exceed ¥250,000 million in order to improve capital efficiency and to implement flexible capital policies in accordance with the business environment. Based on this approval, DoCoMo repurchased 234,171 shares of its common stock for ¥39,999 million in the stock market in August 2006.

Also, DoCoMo regularly repurchases its fractional shares.

In November 2006, DoCoMo repurchased total 193,851 shares of its common stock for ¥35,026 million in the stock market.

Table of Contents**NTT DoCoMo, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****8. Segment reporting:**

From a resource allocation perspective, DoCoMo views itself as having three primary business segments. The mobile phone business segment includes cellular (FOMA) services, cellular (mova) services, packet communications services, satellite mobile communications services, international services and the equipment sales related to these services. The PHS business segment includes PHS services and the related equipment sales for such service. As of April 30, 2005, DoCoMo ceased accepting new subscriptions for PHS services. DoCoMo intends to terminate PHS services during the three months ending December 31, 2007. The miscellaneous business segment includes Credit business, wireless LAN services, Quickcast (paging) services and other miscellaneous services, which in the aggregate are not significant in amount.

DoCoMo identified its reportable segments based on the nature of services included, as well as the characteristics of the telecommunications networks used to provide those services. DoCoMo's chief operating decision maker monitors and evaluates the performance of its segments based on the information that follows as derived from DoCoMo's management reports.

Segment information is prepared in accordance with U.S. GAAP.

Litigation

As of September 30, 2006, DoCoMo had no litigation or claims outstanding, pending or threatened against, which in the opinion of management would have a material adverse effect on the results of operations or the financial position.

Guarantees

DoCoMo adopts FASB Interpretation No. 45, Guarantors Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others.

DoCoMo enters into contracts in the normal course of business that provide guarantees for transactional counterparties. These counterparties include our subscribers, related parties and other business partners. While most of the guarantees provided for our subscribers relate to the product defects of cellular phone handsets sold by DoCoMo, DoCoMo is also provided with similar guarantees by the handset vendors. Though guarantees or indemnifications provided in other transactions are unique in each contract, in almost all the contracts, the likelihood of the performance of these guarantees or indemnifications is considered remote and the amount of payments DoCoMo could be required of is not specified. Historically, DoCoMo has not been required to make significant payments under such guarantee or indemnification contracts. DoCoMo believes that the estimated fair value of the obligations related to these contracts is not significant in amount. Accordingly, no liabilities were recognized for these obligations as of September 30, 2006.

10. Financial instruments:**Risk management**

The fair values for DoCoMo's assets and liabilities and DoCoMo's cash flows may be negatively impacted by fluctuations in interest rates and foreign exchange rates. To manage these risks, DoCoMo uses derivative financial instruments such as interest rate swap, currency swap and foreign exchange forward contracts, and also uses non-derivative financial instruments. The financial instruments are executed with creditworthy financial institutions, and DoCoMo management believes that there is little risk of default by these counterparties. DoCoMo has set and complied with its internal regulations that establish conditions to enter into derivative contracts, and procedures of approving and monitoring such contracts.

DoCoMo uses interest rate swap transactions, under which DoCoMo receives fixed rate interest payments and pays floating rate interest payments, to hedge changes in fair value of certain debt as a part of its asset-liability management (ALM).

Table of Contents**NTT DoCoMo, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

In February 2005, DoCoMo entered into a currency swap contract to hedge currency exchange risk associated with the principal and interest payments of \$100 million unsecured corporate bonds. The currency swap is designated as a cash flow hedging instrument. As all the essential terms of the currency swap and the hedged item are identical, there is no ineffective portion to the hedge. The gain or loss from the fluctuation in the fair value of the swap transaction is recorded as accumulated other comprehensive income. The amount recorded as accumulated other comprehensive income will be reclassified as the gain or loss when the offsetting gain or loss derived from the hedged item is recorded in the accompanying consolidated statements of income and comprehensive income. For the six months ended September 30, 2005, ¥834 million of loss from currency translation and ¥204 million of interest expense in the consolidated statements of income and comprehensive income were reclassified, and ¥60 million of loss, net of applicable taxes, was recorded as net revaluation of financial instruments included in accumulated other comprehensive income in the consolidated balance sheet as of September 30, 2005. For the year ended March 31, 2006, ¥1,262 million of loss from currency translation and ¥28 million of interest expense in the consolidated statement of income and comprehensive income were reclassified, and ¥92 million of loss, net of applicable taxes, was recorded as net revaluation of financial instruments included in accumulated other comprehensive income in the consolidated balance sheet as of March 31, 2006. For the six months ended September 30, 2006, ¥1,305 million of loss from currency translation and ¥241 million of interest expense in the consolidated statement of income and comprehensive income were reclassified, and ¥82 million of loss, net of applicable taxes, was recorded as net revaluation of financial instruments included in accumulated other comprehensive income in the consolidated balance sheet as of September 30, 2006.

Fair value of financial instruments

All cash and temporary investments, current receivables, current payables, and certain other short-term financial instruments are short-term in nature, and therefore their carrying amount approximates its fair value. Information relating to investments in affiliates and marketable securities and other investments are disclosed in Notes 3 and 4, respectively.

Long-term debt, including current portion

The fair value of long-term debt, including current portion, is estimated based on the discounted amounts of future cash flows using DoCoMo's current incremental borrowings rates for similar liabilities.

The carrying amounts and the estimated fair values of long-term debt, including current portion as of September 30, 2006 and 2005 and March 31, 2006 were as follows:

| | Millions of yen | | | | | |
