---------------------------	-------	-----------	----------	--------	-----------

Supplemental Information

In September 2001, the Company's Board of Directors authorized a stock repurchase program. As of April 28, 2007, the Company's Board of Directors had authorized an aggregate repurchase of up to \$47 billion of common stock under this program. For additional information regarding stock repurchases, see Note 9 to the Consolidated Financial Statements. The purchase price of shares of common stock repurchased was reflected as (i) a reduction to retained earnings until retained earnings were zero and then as an increase to accumulated deficit and (ii) a reduction of common stock and additional paid-in capital. Issuance of common stock and the tax benefit related to employee stock incentive plans are recorded in shareholders' equity as an increase to common stock and additional paid-in capital. The stock repurchases since the inception of this program are summarized in the table below (in millions):

	Shares of Common Stock	Common Stock and Additional Paid-In Capital	Retained Earnings (Accumulated Deficit)	Accumulated Other Comprehensive Income	Total Shareholders Equity
Repurchases of common stock	2,174	\$ 7,332	\$ 34,397	\$	\$ 41,729

See Notes to Consolidated Financial Statements.

CISCO SYSTEMS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. Description of Business

Cisco Systems, Inc. (the Company or Cisco) designs, manufactures, and sells networking and other products related to the communications and information technology industry and provides services associated with these products and their use. The Company's products are installed at corporations, public institutions, telecommunications companies, commercial businesses and personal residences. Cisco provides a broad line of products for transporting data, voice, and video within buildings, across campuses, and around the world.

The Company conducts business globally and is primarily managed on a geographic basis in the following theaters: United States and Canada; European Markets; Emerging Markets; Asia Pacific; and Japan. The Emerging Markets theater consists of Eastern Europe, Latin America, the Middle East and Africa, and Russia and the Commonwealth of Independent States (CIS).

On February 24, 2006, the Company completed the acquisition of Scientific-Atlanta, Inc. (Scientific-Atlanta), a provider of set-top boxes, end-to-end video distribution networks, and video system integration. With this acquisition, the Company has enhanced its video capabilities to help enable the convergence of data, voice and video technologies. The Company seeks to have further strategic business relationships with key service provider customers, and to reach a broad range of consumers with its enhanced product line following the acquisition.

2. Summary of Significant Accounting Policies

Fiscal Year

The Company's fiscal year is the 52 or 53 weeks ending on the last Saturday in July. Fiscal 2007 and fiscal 2006 are 52-week fiscal years.

Basis of Presentation

The accompanying financial data as of April 28, 2007 and for the three and nine months ended April 28, 2007 and April 29, 2006 has been prepared by the Company, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted pursuant to such rules and regulations. The July 29, 2006 Consolidated Balance Sheet was derived from audited financial statements, but does not include all disclosures required by accounting principles generally accepted in the United States. However, the Company believes that the disclosures are adequate to make the information presented not misleading. These Consolidated Financial Statements should be read in conjunction with the Consolidated Financial Statements and the notes thereto, included in the Company's Annual Report on Form 10-K for the fiscal year ended July 29, 2006.

In the opinion of management, all adjustments (which include normal recurring adjustments, except as disclosed herein) necessary to present a fair statement of financial position as of April 28, 2007, results of operations for the three and nine months ended April 28, 2007 and April 29, 2006, cash flows, and shareholders' equity for the nine months ended April 28, 2007 and April 29, 2006, as applicable, have been made. The results of operations for the three and nine months ended April 28, 2007 are not necessarily indicative of the operating results for the full fiscal year or any future periods.

Computation of Net Income per Share

Basic net income per share is computed using the weighted-average number of common shares outstanding during the period. Diluted net income per share is computed using the weighted-average number of common shares and dilutive potential common shares outstanding during the period. Dilutive potential common shares primarily consist of employee stock options, restricted common stock and restricted stock units.

Statement of Financial Accounting Standards No. 128, Earnings per Share, requires that employee equity share options, nonvested shares, and similar equity instruments granted by the Company be treated as potential common shares outstanding in computing diluted earnings per share.

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

Diluted shares outstanding include the dilutive effect of in-the-money options which is calculated based on the average share price for each fiscal period using the treasury stock method. Under the treasury stock method, the amount the employee must pay for exercising stock options, the amount of compensation cost for future service that the Company has not yet recognized, and the amount of tax benefits that would be recorded in additional paid-in capital when the award becomes deductible are assumed to be used to repurchase shares.

Table of Contents**Recent Accounting Pronouncements**

In July 2006, the Financial Accounting Standards Board (FASB) issued Financial Interpretation No. 48, Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109 (FIN 48), which is a change in accounting for income taxes. FIN 48 specifies how tax benefits for uncertain tax positions are to be recognized, measured, and derecognized in financial statements; requires certain disclosures of uncertain tax matters; specifies how reserves for uncertain tax positions should be classified on the balance sheet; and provides transition and interim-period guidance, among other provisions. FIN 48 is effective for fiscal years beginning after December 15, 2006 and as a result, is effective for the Company in the first quarter of fiscal 2008. The Company is currently evaluating the impact of FIN 48 on its Consolidated Financial Statements.

In September 2006, the SEC issued Staff Accounting Bulletin No. 108, Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements (SAB 108). SAB 108 provides interpretative guidance on the process of quantifying financial statement misstatements and is effective for fiscal years ending after November 15, 2006. The Company applied the provisions of SAB 108 beginning in the first quarter of fiscal 2007 and there was no impact to the Consolidated Financial Statements.

In September 2006, the FASB issued Statement of Financial Accounting Standards (SFAS) No. 157, Fair Value Measurements (SFAS 157). SFAS 157 defines fair value, establishes a framework and gives guidance regarding the methods used for measuring fair value, and expands disclosures about fair value measurements. SFAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. The Company is currently assessing the impact that SFAS 157 will have on its results of operations and financial position.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities Including an amendment of FASB Statement No. 115 (SFAS 159). SFAS 159 expands the use of fair value accounting but does not affect existing standards which require certain assets or liabilities to be carried at fair value. The objective of SFAS 159 is to improve financial reporting by providing companies with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. Under SFAS 159, a company may choose, at specified election dates, to measure eligible items at fair value and report unrealized gains and losses on items for which the fair value option has been elected in earnings at each subsequent reporting date. SFAS 159 is effective as of the beginning of the fiscal year that begins after November 15, 2007. The Company is currently assessing the impact that SFAS 159 will have on its results of operations and financial position.

Reclassifications

Certain reclassifications have been made to prior period amounts in order to conform to the current period's presentation.

3. Business Combinations**Purchase Acquisitions**

A summary of the purchase acquisitions and asset purchases for the nine months ended April 28, 2007 is as follows (in millions):

	Purchase	Liabilities	In-Process R&D	Purchased Intangible	Goodwill
	Consideration	Assumed	Expense	Assets	
Arroyo Video Solutions, Inc.	\$ 86	\$ 1	\$ 3	\$ 25	\$ 57
Reactivity, Inc.	110	4	1	39	72
Other	211	17	3	77	135
Total	\$ 407	\$ 22	\$ 7	\$ 141	\$ 264

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

The Company acquired Arroyo Video Solutions, Inc. to enable carriers to accelerate the creation and distribution of network-delivered entertainment, interactive media, and advertising services across the growing portfolio of televisions, personal computers, and mobile handsets.

The Company acquired Reactivity, Inc. to complement and extend the Company's application networking services portfolio, within advanced technologies.

Under the terms of the definitive agreements related to the acquisitions and asset purchases, the purchase consideration consisted of cash and stock options assumed. The purchase consideration for the Company's acquisitions and asset purchases is also allocated to tangible assets acquired. The Consolidated Financial Statements include the operating results of each business from the date of acquisition. Pro forma results of operations for the acquisitions completed during the nine months ended April 28, 2007 have not been presented because the effects of the acquisitions, individually or in the aggregate, were not material to the Company's financial results.

Table of Contents***Pro Forma Financial Information Relating to the Acquisition of Scientific-Atlanta, Inc.***

The financial information in the table below summarizes the combined results of operations of Cisco and Scientific-Atlanta, on a pro forma basis, as though the companies had been combined at the beginning of each period presented. The pro forma financial information for the three months ended April 29, 2006 combines the historical results of operations of Cisco for that period, with the historical results of operations of Scientific-Atlanta for the month ended February 24, 2006. The pro forma financial information for the nine months ended April 29, 2006 combines the historical results of operations of Cisco for that period, with the historical results of operations of Scientific-Atlanta for the six months ended December 30, 2005 and the month ended February 24, 2006.

The pro forma financial information is presented for informational purposes only and is not indicative of the results of operations that would have been achieved if the acquisition of Scientific-Atlanta and issuance of \$6.5 billion of debt (see Note 7) had taken place at the beginning of each period presented. The debt was issued to finance the acquisition of Scientific-Atlanta as well as for general corporate purposes. For the purposes of this pro forma financial information, the interest expense on the entire debt, including the effects of hedging, was included in the pro forma financial adjustments. The pro forma financial information for the three and nine months ended April 29, 2006 also includes incremental stock-based compensation expense due to the acceleration of Scientific-Atlanta employee stock options prior to the acquisition date, investment banking fees, and other acquisition-related costs, recorded in Scientific-Atlanta's historical results of operations during February 2006. In addition, the pro forma financial information for the three and nine months ended April 29, 2006 includes the purchase accounting adjustments on historical Scientific-Atlanta inventory, adjustments to depreciation on acquired property and equipment, a charge for in-process research and development, amortization charges from acquired intangible assets, adjustments to interest income, and related tax effects.

The following table summarizes the pro forma financial information (in millions, except per-share amounts):

	Three Months Ended	Nine Months Ended
	April 29, 2006	April 29, 2006
Net sales	\$ 7,485	\$ 21,648
Net income	\$ 1,299	\$ 3,822
Net income per share - basic	\$ 0.21	\$ 0.62
Net income per share - diluted	\$ 0.21	\$ 0.61

Purchased Intangible Assets and In-Process Research and Development

The following table presents the amortization of purchased intangible assets and in-process research and development (in millions):

	Three Months Ended		Nine Months Ended	
	April 28, 2007	April 29, 2006	April 28, 2007	April 29, 2006
Amortization of purchased intangible assets	\$ 133	\$ 123	\$ 406	\$ 238
In-process research and development	\$ 1	\$ 88	\$ 7	\$ 90

The Company's methodology for allocating the purchase price for purchase acquisitions to in-process research and development (in-process R&D) is determined through established valuation techniques. In-process R&D is expensed upon acquisition because technological feasibility has not been established and no future alternative uses exist.

The following table presents details of the purchased intangible assets acquired during the nine months ended April 28, 2007 (in millions, except years):

Technology		Customer Relationships		Other		Total
Weighted	Amount	Weighted	Amount	Weighted	Amount	Amount

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

Table of Contents***Compensation Expense Related to Acquisitions and Investments***

The following table presents the compensation expense related to acquisitions and investments (in millions):

	Three Months Ended		Nine Months Ended	
	April 28, 2007	April 29, 2006	April 28, 2007	April 29, 2006
Share-based compensation expense	\$ 8	\$ 23	\$ 27	\$ 75
Cash compensation expense	8	9	37	27
Total	\$ 16	\$ 32	\$ 64	\$ 102

Share-Based Compensation Expense

Beginning in fiscal 2006, share-based compensation related to acquisitions and investments is measured under Statement of Financial Accounting Standards No. 123 (revised 2004), Share-Based Payment, (SFAS 123(R)) and includes deferred share-based compensation relating to acquisitions completed prior to fiscal 2006. As of April 28, 2007, the remaining balance of share-based compensation related to acquisitions and investments to be recognized over the vesting periods was approximately \$85 million.

Cash Compensation Expense

In connection with the Company's purchase acquisitions, asset purchases, and acquisitions of variable interest entities, the Company has agreed to pay certain additional amounts in cash contingent upon achieving certain agreed-upon technology, development, product, or other milestones or continued employment of certain employees with the Company. In each case, any additional amounts paid will be recorded as compensation expense. As of April 28, 2007, the Company had remaining potential payments of up to \$193 million pursuant to these agreements.

Table of Contents**4. Balance Sheet Details**

The following tables provide details of selected balance sheet items (in millions):

	April 28, 2007	July 29, 2006
Inventories:		
Raw materials	\$ 175	\$ 131
Work in process	117	377

Noncurrent	1,485	1,241
Total	\$ 6,339	\$ 5,649

Table of Contents**5. Lease Receivables, Net**

Lease receivables represent sales-type and direct-financing leases resulting from the sale of the Company's and complementary third-party products and services. These lease arrangements typically have terms from two to three years and are generally collateralized by a security interest in the underlying assets. The current portion of lease receivables, net, is recorded in prepaid expenses and other current assets, and the noncurrent portion is recorded in other assets in the Consolidated Balance Sheets. The net lease receivables are summarized as follows (in millions):

	April 28,	July 29,
	2007	2006
Gross lease receivables	\$ 1,109	\$ 960
Unearned income and other allowances	(206)	(188)
Total	\$ 903	\$ 772
Reported as:		
Current	\$ 377	\$ 308
Noncurrent	526	464
Total	\$ 903	\$ 772

Contractual maturities of the gross lease receivables at April 28, 2007 were as follows (in millions):

Fiscal Year	Amount
2007 (remaining three months)	\$ 150
2008	432
2009	275
2010	157
2011	72
Thereafter	23
Total	\$ 1,109

Actual cash collections may differ from the contractual maturities due to early customer buyouts, refinancings, or defaults.

6. Investments

The following tables summarize the Company's investments (in millions):

	Amortized	Gross Unrealized	Gross Unrealized	Fair
	Cost	Gains	Losses	Value
April 28, 2007				
Fixed income securities:				
U.S. government notes and bonds	\$ 5,947	\$ 17	\$ (12)	\$ 5,952
Corporate notes, bonds, and asset-backed securities	8,390	9	(46)	8,353

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

Municipal notes and bonds	1,467		(1)	1,466
Total fixed income securities	15,804	26	(59)	15,771
Publicly traded equity securities	713	400	(5)	1,108
Total	\$ 16,517	\$ 426	\$ (64)	\$ 16,879

Table of Contents

	Amortized	Gross Unrealized	Gross Unrealized	Fair
July 29, 2006	Cost	Gains	Losses	Value
Fixed income securities:				
U.S. government notes and bonds	\$ 5,179	\$ 3	\$ (47)	\$ 5,135
Corporate notes, bonds, and asset-backed securities	7,950	2	(88)	7,864
Municipal notes and bonds	809		(3)	806
Total fixed income securities	13,938	5	(138)	13,805
Publicly traded equity securities	467	252	(7)	712
Total	\$ 14,405	\$ 257	\$ (145)	\$ 14,517

The following table summarizes the maturities of the Company's fixed income securities at April 28, 2007 (in millions):

	Amortized	Fair
	Cost	Value
Less than 1 year	\$ 3,699	\$ 3,691
Due in 1 to 2 years	4,044	4,036
Due in 2 to 5 years	5,884	5,866
Due after 5 years	2,177	2,178
Total	\$ 15,804	\$ 15,771

Actual maturities may differ from the contractual maturities because borrowers may have the right to call or prepay certain obligations.

7. Long-Term Debt

In February 2006, the Company issued \$500 million of senior floating interest rate notes due 2009 (the 2009 Notes), \$3.0 billion of 5.25% senior notes due 2011 (the 2011 Notes), and \$3.0 billion of 5.50% senior notes due 2016 (the 2016 Notes), for an aggregate principal amount of \$6.5 billion. The following table summarizes the Company's long-term debt (in millions, except percentages):

	April 28, 2007		July 29, 2006	
	Effective		Effective	
	Amount	Rate ⁽¹⁾	Amount	Rate ⁽¹⁾
Senior notes:				
Floating-rate notes, due 2009	\$ 500	5.44%	\$ 500	5.27%
5.25% fixed-rate notes, due 2011	3,000	5.56%	3,000	5.39%
5.50% fixed-rate notes, due 2016	3,000	5.79%	3,000	5.62%
Total senior notes	6,500		6,500	
Other notes	5		5	
Unamortized discount	(17)		(18)	
Fair value adjustment	(10)		(155)	

Total	\$ 6,478	\$ 6,332
-------	----------	----------

⁽¹⁾ The effective rates for the 2011 Notes and the 2016 Notes reflect the variable rate in effect as of the period end on the interest rate swaps designated as fair value hedges of those notes, including the amortization of the discount.

The 2011 Notes and the 2016 Notes are redeemable by the Company at any time, subject to a make-whole premium. To achieve its interest rate objectives, the Company entered into \$6.0 billion notional amount of interest rate swaps. In effect, these swaps convert the fixed interest rates of the 2011 Notes and the 2016 Notes to floating interest rates based on the London Interbank Offered Rate (LIBOR). Gains and losses in the fair value of the interest rate swaps offset changes in the fair value of the underlying debt. The Company was in compliance with all debt covenants as of April 28, 2007.

Table of Contents

Interest is payable quarterly on the 2009 Notes and semi-annually on the 2011 Notes and 2016 Notes. Interest expense, net of the effect of hedging, included in interest income, net, in the Consolidated Statements of Operations and cash paid for interest are summarized as follows (in millions):

	Three Months Ended		Nine Months Ended	
	April 28, 2007	April 29, 2006	April 28, 2007	April 29, 2006
Interest expense	\$ 94	\$ 60	\$ 283	\$ 60
Cash paid for interest	\$ 181	\$	\$ 354	\$

8. Commitments and Contingencies***Operating Leases***

The Company leases office space in several U.S. locations. Outside the United States, larger sites include Australia, Belgium, Canada, China, France, Germany, India, Italy, Japan, and the United Kingdom. Future annual minimum lease payments under all noncancelable operating leases with an initial term in excess of one year as of April 28, 2007 are as follows (in millions):

Fiscal Year	Amount
2007 (remaining three months)	\$ 76
2008	239
2009	184
2010	155
2011	136
Thereafter	685
Total	\$ 1,475

Purchase Commitments with Contract Manufacturers and Suppliers

The Company purchases components from a variety of suppliers and uses several contract manufacturers to provide manufacturing services for its products. During the normal course of business, in order to manage manufacturing lead times and help ensure adequate component supply, the Company enters into agreements with contract manufacturers and suppliers that either allow them to procure inventory based upon criteria as defined by the Company or that establish the parameters defining the Company's requirements. In certain instances, these agreements allow the Company the option to cancel, reschedule, and adjust the Company's requirements based on its business needs prior to firm orders being placed. Consequently, only a portion of the Company's reported purchase commitments arising from these agreements are firm, noncancelable, and unconditional commitments. As of April 28, 2007, the Company had total purchase commitments for inventory of \$2.6 billion, compared with \$2.0 billion as of July 29, 2006.

In addition to the above, the Company records a liability for firm, noncancelable, and unconditional purchase commitments for quantities in excess of its future demand forecasts consistent with the valuation of the Company's inventory. As of April 28, 2007, the liability for these purchase commitments was \$161 million, compared with \$148 million as of July 29, 2006, and was included in other accrued liabilities.

Nuova Systems, Inc.

In the first quarter of fiscal 2007, the Company made an investment in Nuova Systems, Inc. (Nuova Systems), which conducts research and development on data center-related products. This investment includes \$50 million of funding and a license to certain of the Company's technology. As a result of this investment, the Company owns approximately 80% of Nuova Systems and has consolidated the results of Nuova Systems in the Company's Consolidated Financial Statements beginning in the first quarter of fiscal 2007. In April 2007, the agreements were amended to add additional product development activities to be undertaken by Nuova Systems. Upon the occurrence of certain events, the Company has committed up to \$62 million of additional funding, which amount was increased by the April 2007 amendment from up to \$42 million.

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

In connection with this investment, the Company and Nuova Systems have entered into a call option agreement that provides the Company with the right to purchase the remaining interests of approximately 20% in Nuova Systems. If the call option is exercised by the Company, the minority interest holders would be eligible to receive three milestone payments, revised from two milestone payments by the April 2007 amendment, based on agreed formulas. The amounts due under the milestone payments will be recognized by the Company when it is determined that the exercise of the call option is probable. These amounts will be recorded as compensation expense based on an estimate of the fair value of the amounts that could be earned by the minority interest holders pursuant to a vesting schedule. Subsequent changes to the fair value of the amounts probable of being earned and the continued

Table of Contents

vesting will result in adjustments to the recorded compensation expense. If the Company exercises the call option, the potential amount recorded as compensation expense would be up to a maximum of \$678 million, which amount was increased by the April 2007 amendment from up to a maximum of \$578 million due to additional employees required to perform the additional product development.

Other Commitments

The Company has entered into an agreement to invest approximately \$800 million in venture funds managed by SOFTBANK Corp. and its affiliates (SOFTBANK) that are required to be funded on demand. The total commitment is to be invested in venture funds and as senior debt with entities as directed by SOFTBANK. The Company's commitment to fund the senior debt is contingent upon the achievement of certain agreed-upon milestones. As of April 28, 2007, the Company had invested \$606 million in the venture funds pursuant to the commitment, compared with \$523 million as of July 29, 2006. In addition, as of April 28, 2007 and July 29, 2006, the Company had invested \$49 million in the senior debt pursuant to the commitment, all of which has been repaid.

The Company also has certain other funding commitments related to its privately held investments that are based on the achievement of certain agreed-upon milestones. The remaining funding commitments were approximately \$60 million as of April 28, 2007, compared with approximately \$34 million as of July 29, 2006.

Variable Interest Entities

In the ordinary course of business, the Company has investments in privately held companies and provides financing to certain customers through its wholly owned subsidiaries, which may be considered to be variable interest entities. The Company has evaluated its investments in privately held companies and customer financings and determined that there were no significant unconsolidated variable interest entities as of April 28, 2007.

Guarantees and Product Warranties

The following table summarizes the activity related to the product warranty liability during the nine months ended April 28, 2007 and April 29, 2006 (in millions):

	Nine Months Ended	
	April 28, 2007	April 29, 2006
Balance at beginning of period	\$ 309	\$ 259
Provision for warranties issued	370	283
Fair value of warranty liability acquired from Scientific-Atlanta		44
Payments	(341)	(287)
Balance at end of period	\$ 338	\$ 299

The Company accrues for warranty costs as part of its cost of sales based on associated material product costs, labor costs for technical support staff, and associated overhead. The products sold are generally covered by a warranty for periods ranging from 90 days to five years, and for some products the Company provides a limited lifetime warranty.

The Company's guarantees as of April 28, 2007 and July 29, 2006 that were subject to recognition and disclosure requirements were not material. In the normal course of business, the Company indemnifies other parties, including customers, lessors, and parties to other transactions with the Company, with respect to certain matters. The Company has agreed to hold the other parties harmless against losses arising from a breach of representations or covenants, or out of intellectual property infringement or other claims made against certain parties. These agreements may limit the time within which an indemnification claim can be made and the amount of the claim. In addition, the Company has entered into indemnification agreements with its officers and directors, and the Company's bylaws contain similar indemnification obligations to the Company's agents.

It is not possible to determine the maximum potential amount under these indemnification agreements due to the Company's limited history with prior indemnification claims and the unique facts and circumstances involved in each particular agreement. Historically, payments made by the Company under these agreements have not had a material effect on the Company's operating results, financial position, or cash flows.

Derivative Instruments

The Company primarily uses derivative instruments to manage exposures to foreign currency, interest rate, and equity security price

Table of Contents

risks. The Company's primary objective in holding derivatives is to reduce the volatility of earnings and cash flows associated with changes in foreign currency, interest rates, and equity security prices. The Company's derivatives expose it to credit risk to the extent that the counterparties may be unable to meet the terms of the agreement. The Company seeks to reduce such risks by limiting its counterparties to major financial institutions. In addition, the potential risk of loss with any one counterparty resulting from this type of credit risk is monitored. Management does not expect material losses as a result of defaults by counterparties.

Foreign Currency Derivatives

The Company's foreign exchange forward and option contracts are summarized as follows (in millions):

	April 28, 2007		July 29, 2006	
	Notional	Fair	Notional	Fair
	Amount	Value	Amount	Value
Forward contracts:				
Purchased	\$ 1,447	\$ 3	\$ 1,376	\$ (2)
Sold	\$ 535	\$ (10)	\$ 554	\$ (3)
Option contracts:				
Purchased	\$ 303	\$ 19	\$ 591	\$ 20
Sold	\$ 299	\$ (1)	\$ 573	\$ (2)

The Company conducts business globally in numerous currencies. As such, it is exposed to adverse movements in foreign currency exchange rates. To limit the exposure related to foreign currency changes, the Company enters into foreign currency contracts. The Company does not enter into foreign exchange forward or option contracts for trading purposes.

The Company enters into foreign exchange forward contracts to reduce the short-term effects of foreign currency fluctuations on foreign currency receivables, investments, and payables. The gains and losses on the foreign exchange forward contracts offset the transaction gains and losses on foreign currency receivables, investments, and payables recognized in earnings. Gains and losses on the contracts are included in other income, net, in the Consolidated Statements of Operations and offset foreign exchange gains and losses from the revaluation of intercompany balances or other current assets, investments, or liabilities denominated in currencies other than the functional currency of the reporting entity. The Company's foreign exchange forward contracts related to current assets and liabilities generally range from one to three months in original maturity. Additionally, the Company has entered into foreign exchange forward contracts with maturities of up to two years related to long-term customer financings. The foreign exchange forward contracts related to investments generally have maturities of less than one year.

The Company periodically hedges certain foreign currency forecasted transactions related to certain operating expenses with currency options and forward contracts. These transactions are designated as cash flow hedges. The effective portion of the derivative's gain or loss is initially reported as a component of accumulated other comprehensive income and subsequently reclassified into earnings when the hedged exposure affects earnings. The ineffective portion, if any, of the gain or loss is reported in earnings immediately. These currency option contracts and forward contracts generally have maturities of less than 18 months.

Interest Rate Derivatives

The Company's interest rate derivatives are summarized as follows (in millions):

	April 28, 2007		July 29, 2006	
	Notional	Fair	Notional	Fair
	Amount	Value	Amount	Value
Interest rate derivatives:				
Interest rate swaps- investments	\$ 1,000	\$ 26	\$ 1,000	\$ 45
Interest rate swaps- long-term debt	\$ 6,000	\$ (10)	\$ 6,000	\$ (155)

The Company's primary objective for holding fixed income securities is to achieve an appropriate investment return consistent with preserving principal and managing risk. To realize these objectives, the Company may utilize interest rate swaps or other derivatives designated as fair

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

value or cash flow hedges. The Company has entered into \$1.0 billion of interest rate swaps designated as fair value hedges of its investment portfolio. Under these interest rate swap contracts, the Company makes fixed-rate interest payments and receives interest payments based on LIBOR. The effect of these swaps is to convert fixed-rate returns to floating-rate returns based on LIBOR for a portion of the Company's fixed income portfolio. The gains and losses related to changes in the value of the interest rate swaps are included in other income, net, in the Consolidated Statements of Operations and offset the changes in fair value of the underlying hedged investment. The fair values of the interest rate swaps designated as hedges of the Company's investments were reflected in prepaid expenses and other current assets in the Consolidated Balance Sheets.

Table of Contents

In conjunction with its issuance of fixed-rate senior notes in February 2006, the Company entered into \$6.0 billion of interest rate swaps designated as fair value hedges of the fixed-rate debt. Under these interest rate swap contracts, the Company receives fixed-rate interest payments and makes interest payments based on LIBOR. The effect of these swaps is to convert fixed-rate interest expense to floating-rate interest expense based on LIBOR. The gains and losses related to changes in the value of the interest rate swaps are included in other income, net, in the Consolidated Statements of Operations and offset the changes in fair value of the underlying debt. The fair values of the interest rate swaps designated as hedges of the Company's debt were reflected in other long-term liabilities in the Consolidated Balance Sheets.

Equity Derivatives

The Company's equity derivatives are summarized as follows (in millions):

	April 28,		July 29,	
	2007		2006	
	Notional	Fair	Notional	Fair
	Amount	Value	Amount	Value
Equity derivatives:				
Forward sale and option agreements	\$ 198	\$ 10	\$ 164	\$ 93

The Company maintains a portfolio of publicly traded equity securities which are subject to price risk. The Company may hold equity securities for strategic purposes or to diversify the Company's overall investment portfolio. To manage its exposure to changes in the fair value of certain equity securities, the Company may, from time to time, enter into equity derivative contracts. As of April 28, 2007, the Company had entered into forward sale and option agreements on certain publicly traded equity securities designated as fair value hedges. The gains and losses due to changes in the value of the hedging instruments are included in other income, net, in the Consolidated Statements of Operations and offset the change in the fair value of the underlying hedged investment. The fair values of the equity derivatives were reflected in prepaid expenses and other current assets and other accrued liabilities in the Consolidated Balance Sheets.

Legal Proceedings

The Company and other defendants were subject to patent claims asserted by QPSX Developments 5 Pty Ltd (now known as Ipernica Ltd) against the Company and such other defendants on June 21, 2005 in the United States District Court for the Eastern District of Texas. QPSX alleged that various Cisco switches and routers infringed United States Patent No. 5,689,499 and sought damages and injunctive relief. On April 10, 2007, prior to trial, the Company and QPSX settled the dispute on terms that are not material to the Company, and the lawsuit was dismissed with prejudice on May 2, 2007.

The Company and other defendants were subject to claims asserted by Telcordia Technologies, Inc. on July 16, 2004 in the Federal District Court for the District of Delaware alleging that various Cisco routers, switches and optical products infringed United States Patent Nos. 4,893,306, 4,835,763 and Re 36,633. Telcordia sought damages and injunctive relief. The Court ruled that, as a matter of law, the Company does not infringe Patent No. 4,893,306. After conclusion of a trial, on May 10, 2007, a jury found that infringement had occurred and awarded damages in an amount that is not material to the Company. The Company intends to ask the Court to reverse the verdict as a matter of law, and if necessary, intends to appeal the decision. Telcordia also has the right to appeal the jury finding. The Company believes that the ultimate outcome of this matter and aggregate potential damages are not likely to be material.

In September 2005, Scientific-Atlanta, Inc. (which subsequently was acquired by the Company) and another plaintiff filed a declaratory judgment action against Forgent Networks in the United States District Court for the Eastern District of Texas after Forgent sued various Scientific-Atlanta customers. In the action, Scientific-Atlanta asserted that its products did not infringe Forgent's United States Patent No. 6,285,746 and that the patent was invalid. On October 20, 2005, Forgent responded to the complaint and alleged that various Scientific-Atlanta digital video recorders infringed the patent and sought damages and injunctive relief. Subsequent to that, another declaratory judgment plaintiff moved to intervene and the cases were combined. On April 25, 2007, prior to trial, Scientific-Atlanta and Forgent settled their dispute on terms that are not material to the Company and the lawsuits were dismissed with prejudice on April 30, 2007.

For information regarding legal proceedings terminated during prior quarters of fiscal 2007, see *Legal Proceedings* under Note 8 to the Consolidated Financial Statements in the Company's Quarterly Report on Form 10-Q for the quarter ended January 27, 2007.

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

In addition, the Company is subject to legal proceedings, claims, and litigation arising in the ordinary course of business, including intellectual property litigation. While the outcome of these matters is currently not determinable, the Company does not expect that the ultimate costs to resolve these matters will have a material adverse effect on its consolidated financial position, results of operations, or cash flows.

Table of Contents**9. Shareholders Equity****Stock Repurchase Program**

In September 2001, the Company's Board of Directors authorized a stock repurchase program. As of April 28, 2007, the Company's Board of Directors had authorized an aggregate repurchase of up to \$47 billion of common stock under this program and the remaining authorized repurchase amount was \$5.3 billion with no termination date. The stock repurchase activity under the stock repurchase program during the first nine months of fiscal 2007 is summarized as follows (in millions, except per-share amounts):

	Shares Repurchased	Weighted- Average Price per Share	Amount Repurchased
Nine Months Ended April 28, 2007			
Cumulative balance at July 29, 2006	1,931	\$ 18.36	\$ 35,448
Repurchase of common stock	243	25.85	6,281
Cumulative balance at April 28, 2007	2,174	\$ 19.20	\$ 41,729

The purchase price for the shares of the Company's stock repurchased was reflected as a reduction to shareholders' equity. In accordance with Accounting Principles Board Opinion No. 6, Status of Accounting Research Bulletins, the Company is required to allocate the purchase price of the repurchased shares as (i) a reduction to retained earnings until retained earnings are zero and then as an increase to accumulated deficit and (ii) a reduction of common stock and additional paid-in capital. Issuance of common stock and the tax benefit related to employee stock incentive plans are recorded as an increase to common stock and additional paid-in capital.

Comprehensive Income

The components of comprehensive income are as follows (in millions):

	Three Months Ended		Nine Months Ended	
	April 28,	April 29,	April 28,	April 29,
	2007	2006	2007	2006
Net income	\$ 1,874	\$ 1,400	\$ 5,403	\$ 4,036
Other comprehensive income:				
Change in unrealized gains and losses on investments, net of tax	49	1	158	9
Other ⁽¹⁾	96	40	137	80
Comprehensive income before minority interest	2,019	1,441	5,698	4,125
Change in minority interest ⁽²⁾	(1)	(4)	(3)	(1)
Total	\$ 2,018	\$ 1,437	\$ 5,695	\$ 4,124

⁽¹⁾ Includes changes in currency translation

⁽²⁾ The Company consolidates its investment in a venture fund managed by SOFTBANK as it is the primary beneficiary as defined under FIN 46(R). As a result, SOFTBANK's interest in the change in the unrealized gains and losses on the investments in the venture fund is recorded as a component of accumulated other comprehensive income, and is reflected as a change in minority interest.

10. Employee Benefit Plans
Employee Stock Purchase Plan

The Company has an Employee Stock Purchase Plan, which includes its sub-plan, the International Employee Stock Purchase Plan (together, the Purchase Plan), under which 321.4 million shares of the Company s stock have been reserved for issuance. Eligible employees may purchase a limited number of shares of the Company s stock at a discount of up to 15% of the lesser of the market value on the subscription date or the purchase date, which is approximately six months after the subscription date. The Purchase Plan terminates on January 3, 2010. The Company issued 10 million and 11 million shares under the Purchase Plan during the nine months ended April 28, 2007 and April 29, 2006, respectively. As of April 28, 2007, 89 million shares were available for issuance under the Purchase Plan.

Table of Contents***Employee Stock Incentive Plans******Stock Incentive Plan Program Description***

As of April 28, 2007, the Company had four stock incentive plans: the 2005 Stock Incentive Plan (the 2005 Plan), the 1996 Stock Incentive Plan (the 1996 Plan), the 1997 Supplemental Stock Incentive Plan (the Supplemental Plan), and the Cisco Systems, Inc. SA Acquisition Long-Term Incentive Plan (the Acquisition Plan). In addition, the Company has, in connection with the acquisitions of various companies, assumed the stock incentive plans of the acquired companies or issued replacement share-based awards. Share-based awards are designed to reward employees for their long-term contributions to the Company and provide incentives for them to remain with the Company. The number and frequency of share-based awards are based on competitive practices, operating results of the Company, and government regulations. Since the inception of the stock incentive plans, the Company has granted stock options to virtually all employees, and the majority has been granted to employees below the vice president level. The Company's stock incentive plans are summarized as follows:

2005 Plan

The maximum number of shares issuable over the term of the 2005 Plan is limited to 350 million shares. The 2005 Plan permits the granting of stock options, stock, stock units, and stock appreciation rights to employees (including employee directors and officers) and consultants of the Company and its subsidiaries and affiliates, and nonemployee directors of the Company. Stock options granted under the 2005 Plan have an exercise price of at least 100% of the fair market value of the underlying stock on the grant date and expire no later than nine years from the grant date. The stock options will generally become exercisable for 20% of the option shares one year from the date of grant and then ratably over the following 48 months. Stock grants and stock units will generally vest with respect to 20% of the shares covered by the grant on each of the first through fifth anniversaries of the date of the grant. The Compensation and Management Development Committee of the Board of Directors has the discretion to use a different vesting schedule. Stock appreciation rights may be awarded in combination with stock options or stock grants and such awards shall provide that the stock appreciation rights will not be exercisable unless the related stock options or stock grants are forfeited. Stock grants may be awarded in combination with nonstatutory stock options, and such awards may provide that the stock grants will be forfeited in the event that the related nonstatutory stock options are exercised. The 2005 Plan terminates at the 2007 Annual Meeting of Shareholders unless re-adopted or extended by the shareholders prior to or on such date.

1996 Plan

The 1996 Plan expired on December 31, 2006 and the Company may no longer make equity awards under the 1996 Plan. The maximum number of shares issuable over the term of the 1996 Plan was 2.5 billion shares. Stock options granted under the 1996 Plan have an exercise price of at least 100% of the fair market value of the underlying stock on the grant date and expire no later than nine years from the grant date. The stock options will generally become exercisable for 20% or 25% of the option shares one year from the date of grant and then ratably over the following 48 or 36 months, respectively. Certain other grants have utilized a 60-month ratably vesting schedule. In addition, the Board of Directors, or other committees administering the plan, have the discretion to use a different vesting schedule and have done so from time to time.

Supplemental Plan

In 1997, the Company adopted the Supplemental Plan, under which stock options can be granted or shares can be directly issued to eligible employees. Officers and members of the Company's Board of Directors are not eligible to participate in the Supplemental Plan. Nine million shares have been reserved for issuance under the Supplemental Plan. All stock option grants have an exercise price equal to the fair market value of the underlying stock on the grant date. The Company no longer makes stock option grants or direct share issuances under the Supplemental Plan.

Acquisition Plan

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

Effective upon completion of the Company's acquisition of Scientific-Atlanta, the Company adopted the Acquisition Plan. The Acquisition Plan constitutes an assumption, amendment, restatement and renaming of the 2003 Long-Term Incentive Plan of Scientific-Atlanta. The Acquisition Plan permits the grant of stock options, stock, stock units, and stock appreciation rights to certain employees of the Company and its subsidiaries and affiliates who had been employed by Scientific-Atlanta or its subsidiaries. An aggregate of 14.8 million shares of the Company's common stock has been reserved for issuance under the Acquisition Plan on a discretionary basis, subject to limitations set forth in the Acquisition Plan.

Table of Contents***Distribution and Dilutive Effect of Stock Options***

Weighted-average basic and diluted shares outstanding for the nine months ended April 28, 2007 were 6.1 billion shares and 6.3 billion shares, respectively. For the nine months ended April 28, 2007, the dilutive effect of in-the-money employee stock options was approximately 201 million shares or 3.3% of the basic shares outstanding based on the Company's average share price of \$25.00.

The following table illustrates grant dilution based on net options granted as a percentage of shares of common stock outstanding at period end (in millions, except percentages):

	Nine Months Ended	
	April 28, 2007	April 29, 2006
Shares of common stock outstanding	6,054	6,164
Granted and assumed	175	219
Canceled/forfeited/expired	(40)	(67)
Net stock options granted	135	152
Grant dilution	2.2%	2.5%

The Named Executive Officers represent the Company's Chief Executive Officer and the four other most highly paid executive officers whose salary and bonus for the years ended July 29, 2006 and July 30, 2005 were in excess of \$100,000. The following table summarizes the options granted to the Named Executive Officers during the periods indicated (in millions, except percentages):

	Nine Months Ended	
	April 28, 2007	April 29, 2006
Stock options granted to the Named Executive Officers	2.9	2.9
Stock options granted to the Named Executive Officers as a percentage of net stock options granted	2.1%	1.9%
Stock options granted to the Named Executive Officers as a percentage of outstanding shares	0.05%	0.05%
Cumulative stock options held by Named Executive Officers as a percentage of total stock options outstanding	3.2%	3.3%

General Share-Based Award Information

A summary of share-based award activity is as follows (in millions, except per-share amounts):

Share-Based	Stock Options Outstanding	Outstanding	Weighted-
Awards	Number	Average	Average

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

	Available		Exercise Price
	for Grant		per Share
Balance at July 30, 2005	223	1,436	\$ 25.02
Granted and assumed	(230)	230	18.21
Exercised		(136)	10.08
Canceled/forfeited/expired	79	(84)	29.53
Restricted stock and restricted stock units granted	(6)		
Additional shares reserved	398		
Balance at July 29, 2006	464	1,446	25.08
Granted and assumed	(175)	175	23.31
Exercised ⁽¹⁾		(229)	15.53
Canceled/forfeited/expired	15	(40)	31.45
Restricted stock and restricted stock units granted	(5)		
Additional shares reserved	3		
Balance at April 28, 2007	302	1,352	\$ 26.28

⁽¹⁾ The total pretax intrinsic value of stock options exercised during the nine months ended April 28, 2007 was \$2.2 billion.

Table of Contents

The following table summarizes significant ranges of outstanding and exercisable options as of April 28, 2007 (in millions, except years and per-share amounts):

Range of Exercise Prices	Stock Options Outstanding Weighted-				Stock Options Exercisable		
	Number	Average Remaining Contractual Life	Weighted-Average Exercise Price per Share	Aggregate Intrinsic Value	Number Exercisable	Weighted-Average Exercise Price per Share	
Aggregate Intrinsic Value						Aggregate Intrinsic Value	
\$ 0.01 - 15.00	128	4.33	\$ 11.21	\$ 2,041	101	\$ 11.21	\$ 1,591
15.01 - 18.00	253	5.88	17.18	2,494	137	16.67	1,416
18.01 - 20.00	326	5.70	19.21	2,552	187	19.17	1,465
20.01 - 22.50	86	5.05	20.84	530	62	20.73	388
22.51 - 25.00	172	7.91	23.10	675	17	23.74	55
25.01 - 35.00	113	2.47	27.30	49	94	27.35	44
35.01 - 72.56	274	2.10	53.42		273	53.34	
Total	1,352	4.85	\$ 26.28	\$ 8,341	871	\$ 29.71	\$ 4,959

The aggregate intrinsic value in the preceding table represents the total pretax intrinsic value based on the Company's closing stock price of \$27.03 as of April 27, 2007, which would have been received by the option holders had those option holders exercised their options as of that date. The total number of in-the-money stock options exercisable as of April 28, 2007 was 564 million. As of July 29, 2006, 969 million outstanding stock options were exercisable and the weighted-average exercise price was \$28.53.

The following table presents the option exercises for the nine months ended April 28, 2007, and option values as of that date for the Named Executive Officers (in millions):

Named Executive Officers	Number of Shares Acquired on Exercise	Value Realized	Number of Securities Underlying Unexercised Options at April 28, 2007		Intrinsic Value of Unexercised in-the-Money Options at April 28, 2007	
			Exercisable	Unexercisable	Exercisable	Unexercisable
	9	\$ 103	33	10	\$ 139	\$ 72

Valuation and Expense Information Under SFAS 123(R)

On July 31, 2005, the Company adopted SFAS 123(R), which requires the measurement and recognition of compensation expense for all share-based payment awards made to the Company's employees and directors including employee stock options, employee stock purchases related to the Employee Stock Purchase Plan (employee stock purchases), employee restricted stock and restricted stock units, based on

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

estimated fair values. Employee share-based compensation expense under SFAS 123(R) was as follows (in millions):

	Three Months Ended		Nine Months Ended	
	April 28,	April 29,	April 28,	April 29,
	2007	2006	2007	2006
Cost of sales product	\$ 10	\$ 11	\$ 33	\$ 41
Cost of sales service	25	28	79	90
Employee share-based compensation expense in cost of sales	35	39	112	131
Research and development	75	86	223	279
Sales and marketing	101	107	294	340
General and administrative	26	29	80	89
Employee share-based compensation expense in operating expenses	202	222	597	708
Total employee share-based compensation expense ⁽¹⁾	\$ 237	\$ 261	\$ 709	\$ 839

⁽¹⁾ Share-based compensation expense related to acquisitions and investments is disclosed in Note 3 and is not included in the table. As of April 28, 2007, total compensation cost related to nonvested share-based awards not yet recognized was \$2.7 billion, including share-based compensation relating to acquisitions and investments, which is expected to be recognized over the next 3.7 years on a weighted-average basis.

Table of Contents

The income tax benefit for employee share-based compensation expense was \$102 million and \$265 million for the three and nine months ended April 28, 2007, respectively, and \$73 million and \$235 million for the three and nine months ended April 29, 2006, respectively. The income tax benefit has been determined using the applicable tax rates in jurisdictions to which this expense relates and for fiscal 2007 includes the tax effects resulting from the reinstatement of the U.S. federal research and development (R&D) tax credit in December 2006 (see Note 11). The tax benefit for fiscal 2006 includes the effect of U.S. tax regulations that require intercompany reimbursement of certain share-based compensation expenses.

Lattice-Binomial Model

Upon adoption of SFAS 123(R), the Company began estimating the value of employee stock options and employee stock purchases on the date of grant using a lattice-binomial model. Prior to the adoption of SFAS 123(R), the value of each employee stock option and employee stock purchase was estimated on the date of grant using the Black-Scholes model.

The Company's employee stock options have various restrictions including vesting provisions and restrictions on transfer and hedging, among others, and are often exercised prior to their contractual maturity. Lattice-binomial models are more capable of incorporating the features of the Company's employee stock options than closed-form models such as the Black-Scholes model. The use of a lattice-binomial model requires extensive actual employee exercise behavior data and a number of complex assumptions including expected volatility, risk-free interest rate, expected dividends, kurtosis, and skewness. The weighted-average assumptions, using the lattice-binomial model, the weighted-average expected life and estimated value of employee stock options are summarized as follows:

	Three Months Ended		Nine Months Ended	
	April 28,	April 29,	April 28,	April 29,
	2007	2006	2007	2006
Weighted-average assumptions:				
Expected volatility	26.3%	22.4%	25.8%	23.6%
Risk-free interest rate	4.6%	4.7%	4.6%	4.2%
Expected dividend	0.0%	0.0%	0.0%	0.0%
Kurtosis	4.6	4.3	4.5	4.2
Skewness	(0.80)	(0.67)	(0.80)	(0.61)
Weighted-average expected life in years	6.7	6.7	6.7	6.6
Weighted-average estimated value	\$ 8.21	\$ 5.78	\$ 7.01	\$ 5.07

The determination of the fair value of share-based payment awards on the date of grant using an option-pricing model is affected by the Company's stock price as well as assumptions regarding a number of highly complex and subjective variables. The weighted-average assumptions were determined as follows:

The Company used the implied volatility for two-year traded options on the Company's stock as the expected volatility assumption required in the lattice-binomial model, consistent with SFAS 123(R) and Staff Accounting Bulletin No. 107 (SAB 107). The selection of the implied volatility approach was based upon the availability of actively traded options on the Company's stock and the Company's assessment that implied volatility is more representative of future stock price trends than historical volatility.

The risk-free interest rate assumption is based upon observed interest rates appropriate for the term of the Company's employee stock options.

The dividend yield assumption is based on the history and expectation of dividend payouts.

The estimated kurtosis and skewness are technical measures of the distribution of stock price returns, which affect expected employee exercise behaviors that are based on the Company's stock price return history as well as consideration of various academic

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

analyses.

The expected life of employee stock options represents the weighted-average period the stock options are expected to remain outstanding and is a derived output of the lattice-binomial model. The expected life of employee stock options is impacted by all of the underlying assumptions and calibration of the Company's model. The lattice-binomial model assumes that employees' exercise behavior is a function of the option's remaining vested life and the extent to which the option is in-the-money. The lattice-binomial model estimates the probability of exercise as a function of these two variables based on the entire history of exercises and cancellations on all past option grants made by the Company.

Table of Contents

Because share-based compensation expense recognized in the Consolidated Statements of Operations is based on awards ultimately expected to vest, it has been reduced for estimated forfeitures. SFAS 123(R) requires forfeitures to be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. Forfeitures were estimated based on historical experience and the Company estimated forfeitures to be 3% annually for the three and nine months ended April 28, 2007 and April 29, 2006.

Accuracy of Fair Value Estimates

The Company uses third-party analyses to assist in developing the assumptions used in, as well as calibrating, its lattice-binomial model. The Company is responsible for determining the assumptions used in estimating the fair value of its share-based payment awards.

The Company's determination of the fair value of share-based payment awards is affected by the assumptions regarding a number of highly complex and subjective variables. These variables include, but are not limited to, the Company's expected stock price volatility over the term of the awards, and actual and projected employee stock option exercise behaviors. Option-pricing models were developed for use in estimating the value of traded options that have no vesting or hedging restrictions and are fully transferable. Because the Company's employee stock options have certain characteristics that are significantly different from traded options, and because changes in the subjective assumptions can materially affect the estimated value, in management's opinion, the existing valuation models may not provide an accurate measure of the fair value of the Company's employee stock options. Although the fair value of employee stock options is determined in accordance with SFAS 123(R) and SAB 107 using an option-pricing model, that value may not be indicative of the fair value observed in a willing buyer/willing seller market transaction.

11. Income Taxes

The following table provides details of income taxes (in millions, except percentages):

	Three Months Ended		Nine Months Ended	
	April 28,	April 29,	April 28,	April 29,
	2007	2006	2007	2006
Effective tax rate	22.5%	22.7%	22.0%	26.4%
Cash paid for income taxes	\$ 353	\$ 287	\$ 1,312	\$ 1,261

In December 2006, the Tax Relief and Health Care Act of 2006 reinstated the U.S. federal R&D tax credit, retroactive to January 1, 2006. As a result, the tax provision rate for the nine months ended April 28, 2007 included a tax benefit relating to the reinstatement of the U.S. federal R&D tax credit, including \$60 million related to fiscal 2006 R&D expenses. The effective tax rate for the three and nine months ended April 28, 2007 also reflects a benefit from an increase in foreign income taxed at other than U.S. rates.

The tax provision rates for the three and nine months ended April 29, 2006 included a benefit of approximately \$124 million from the favorable settlement of a tax audit in a foreign jurisdiction.

The Company's income taxes currently payable have been reduced by the tax benefits from employee stock incentive plans. These benefits totaled \$733 million and \$418 million for the nine months ended April 28, 2007 and April 29, 2006, respectively, and were reflected as an increase to additional paid-in capital in the Consolidated Statements of Shareholders' Equity. The Company includes only the direct tax effects of employee stock incentive plans in calculating this increase to additional paid-in capital.

The Company's federal income tax returns for fiscal years ended July 27, 2002 through July 31, 2004 are under examination and the Internal Revenue Service has proposed certain adjustments. The Company believes that adequate amounts have been reserved for any adjustments that may ultimately result from these examinations.

On October 22, 2004, the American Jobs Creation Act of 2004 (the Jobs Creation Act) was signed into law. The Jobs Creation Act created a temporary incentive for U.S. corporations to repatriate accumulated income earned abroad by providing an 85 percent dividends received deduction for certain dividends from controlled foreign corporations. In the first quarter of fiscal 2006, the Company distributed cash from its foreign subsidiaries and reported an extraordinary dividend (as defined in the Jobs Creation Act) of \$1.2 billion and a related tax liability of approximately \$63 million in its fiscal 2006 federal income tax return. This amount was previously provided for in the provision for income taxes and is included in income taxes payable. This distribution does not change the Company's intention to indefinitely reinvest undistributed

earnings of certain of its foreign subsidiaries in operations outside the United States.

Table of Contents**12. Segment Information and Major Customers**

The Company's operations involve the design, development, manufacturing, marketing, and technical support of networking and other products and services related to the communications and information technology industry. Cisco products include routers, switches, advanced technologies, and other products. These products, primarily integrated by Cisco IOS Software, link geographically dispersed local-area networks (LANs) and wide-area networks (WANs).

The Company conducts business globally and is primarily managed on a geographic basis. The Company's management makes financial decisions and allocates resources based on the information it receives from its internal management system. Sales are attributed to a geographic theater based on the ordering location of the customer. Gross margin for each theater includes the amortization of purchased intangible assets and the employee share-based compensation expense related to that theater. The Company does not allocate research and development, sales and marketing, or general and administrative expenses to its geographic theaters in this internal management system because management does not use the information to measure the performance of the operating segments.

Summarized financial information by theater based on the Company's internal management system, is as follows (in millions):

	Three Months Ended		Nine Months Ended	
	April 28,	April 29,	April 28,	April 29,
	2007	2006	2007	2006
Net sales:

Service	1,385	1,167	3,969	3,317
Total	\$ 8,866	\$ 7,322	\$ 25,489	\$ 20,500

The Company refers to some of its products and technologies as advanced technologies. As of April 28, 2007, the Company had identified the following advanced technologies for particular focus: application networking services, home networking, hosted small-business systems, security, storage area networking, unified communications, video systems, and wireless technology. The Company continues to identify additional advanced technologies for focus and investment in the future, and the Company's investments in some previously identified advanced technologies may be curtailed or eliminated depending on market developments. Beginning in the first quarter of fiscal 2007, sales of optical networking products, which were previously included in the advanced technologies product category, are included in the other product category, and prior period amounts have been reclassified in order to conform to the current period's presentation.

The majority of the Company's assets as of April 28, 2007 and July 29, 2006 were attributable to its U.S. operations. For the three and nine months ended April 28, 2007 and April 29, 2006, no single customer accounted for 10% or more of the Company's net sales.

Property and equipment information is based on the physical location of the assets. The following table presents property and equipment information for geographic areas (in millions):

	April 28,	July 29,
	2007	2006
Property and equipment, net:

14. Pending Business Combinations

On January 4, 2007, the Company announced a definitive agreement to acquire privately held IronPort Systems, Inc. (IronPort), a provider of messaging security appliances focusing on enterprise spam and spyware protection. The announced estimated aggregate consideration for this acquisition is \$830 million in cash, stock, and stock options assumed. The acquisition is expected to close in the fourth quarter of fiscal 2007 and will be accounted for under the purchase method of accounting.

On March 15, 2007, the Company announced a definitive agreement to acquire WebEx Communications, Inc. (WebEx). WebEx is a provider of on-demand collaboration applications. WebEx's network-based solution for delivering business-to-business collaboration extends the Company's unified communications portfolio, particularly within the small to medium-sized business (SMB) market. Under the terms of the agreement, Cisco commenced a cash tender offer to purchase all of the outstanding shares of WebEx for \$57 per share and will assume outstanding share-based awards, for an aggregate purchase price of approximately \$3.2 billion. The tender offer expired on May 21, 2007, and the acquisition is expected to close in late May 2007. The acquisition will be accounted for under the purchase method of accounting.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations*****Forward-Looking Statements***

This Quarterly Report on Form 10-Q, including this Management's Discussion and Analysis of Financial Condition and Results of Operations, contains forward-looking statements regarding future events and our future results that are subject to the safe harbors created under the Securities Act of 1933 (the Securities Act) and the Securities Exchange Act of 1934 (the Exchange Act). All statements other than statements of historical facts are statements that could be deemed forward-looking statements. These statements are based on current expectations, estimates, forecasts, and projections about the industries in which we operate and the beliefs and assumptions of our management. Words such as expects, anticipates, targets, goals, projects, intends, plans, believes, seeks, estimates, continues, may, variations of such words and are intended to identify such forward-looking statements. In addition, any statements that refer to projections of our future financial performance, our anticipated growth and trends in our businesses, and other characterizations of future events or circumstances are forward-looking statements. Readers are cautioned that these forward-looking statements are only predictions and are subject to risks, uncertainties, and assumptions that are difficult to predict, including those identified below, under Part II, Item 1A. Risk Factors and elsewhere herein. Therefore, actual results may differ materially and adversely from those expressed in any forward-looking statements. We undertake no obligation to revise or update any forward-looking statements for any reason.

Overview

Our results for the third quarter and first nine months of fiscal 2007 reflected increases in net sales, net income, and net income per diluted share from the corresponding periods of fiscal 2006, as we have continued to achieve a good balance in year-over-year revenue growth from our four largest geographic theaters, our customer markets, and our product families, which we believe is attributable in part to the successful implementation of our strategy. Net income increased by 34% during the third quarter and first nine months of fiscal 2007 compared to the corresponding periods of fiscal 2006, while net income per diluted share increased by 36% and 34% during the third quarter and first nine months of fiscal 2007, respectively, compared to the corresponding periods of fiscal 2006.

In February 2006, we completed the acquisition of Scientific-Atlanta, a provider of set-top boxes, end-to-end video distribution networks, and video integration systems. With this acquisition, we have enhanced our video capabilities and this enables the convergence of data, voice and video technologies. We believe that video applications have the potential to provide accelerating momentum resulting in growth of both bandwidth and set-top boxes, and we believe Scientific-Atlanta may enable us to have further strategic business relationships with key service provider customers and to reach a broad range of consumers with our enhanced product line. The results for the third quarter and first nine months of fiscal 2007 include the results of Scientific-Atlanta, compared with the results for fiscal 2006 which reflect Scientific-Atlanta's contribution subsequent to the February 24, 2006 acquisition date.

Revenue

Net sales increased by 21% and 24% during the third quarter and first nine months of fiscal 2007, respectively, compared to the corresponding periods of fiscal 2006. Revenue increased in our four largest geographic theaters in the third quarter and first nine months of fiscal 2007 compared to the corresponding periods of fiscal 2006, primarily in the service provider, commercial, and enterprise markets.

Sales of our advanced technologies, which represented the largest portion of the increase in net product sales during the third quarter and first nine months of fiscal 2007, increased by approximately 36% and 53%, respectively, over the corresponding periods of fiscal 2006. The increase in sales of advanced technologies during the third quarter and first nine months of fiscal 2007 was due to the additional contribution of Scientific-Atlanta, and also due to strength in sales of our unified communications, security, wireless, and storage products. For the third quarter and first nine months of fiscal 2007, we experienced strength in routing, led by our high-end routers, and switching, led by our fixed-configuration and modular switches.

Operating Margin

For the third quarter and first nine months of fiscal 2007, the decrease in our gross margin percentage compared to the corresponding periods of fiscal 2006 primarily related to the net sales from Scientific-Atlanta, whose business model has a lower gross margin percentage than the Cisco model. Operating expenses increased during the third quarter and first nine months of fiscal 2007 compared to the corresponding periods of fiscal 2006 primarily due to expenses related to increased investments in headcount, but decreased as a percentage of revenue.

Table of Contents

Other Financial Highlights

During the first nine months of fiscal 2007, we generated cash flows from operations of \$7.4 billion. Our cash and cash equivalents and investments were \$22.3 billion at the end of the third quarter of fiscal 2007, compared with \$17.8 billion at the end of fiscal 2006. The increase in cash and cash equivalents and investments is in anticipation of the completion of our previously announced acquisitions of WebEx and IronPort. We used \$6.3 billion of cash to repurchase 243 million shares of our common stock during the first nine months of fiscal 2007. Days sales outstanding in accounts receivable (DSO) at the end of the third quarter of fiscal 2007 improved to 33 days, compared to 38 days at the end of fiscal 2006. Our inventory balance was \$1.3 billion at the end of the third quarter of fiscal 2007, compared to \$1.4 billion at the end of fiscal 2006. Annualized inventory turns were 8.8 in the third quarter of fiscal 2007 as compared to 8.5 in the fourth quarter of fiscal 2006. Our purchase commitments were \$2.6 billion at the end of the third quarter of fiscal 2007, compared to \$2.0 billion at the end of fiscal 2006.

Focus Areas

We have continued to focus particular attention on the commercial market; additional sales coverage; growing and expanding our advanced technologies; evolving our support model; and expanding our presence in the Emerging Markets theater. In addition to these areas, we expect to continue to focus on next-generation service provider network build-outs, strengthening our product offerings in the consumer market, and providing more comprehensive solutions to our customers as they employ Internet solutions. The investments we have made and our architectural approach are based on the belief that Web 2.0, the technologies that enable user collaboration, and the increased use of the network as the platform for all forms of communications and information technology will create new market opportunities for us. We believe the industry is evolving to enable personal and business process collaboration enabled by Web 2.0, as part of the second major phase of the Internet.

We also have been focusing on expanding our service model. Compared to the corresponding periods in fiscal 2006, our net service revenue increased by approximately 19% and 20% during the third quarter and first nine months of fiscal 2007, respectively, with service gross margins of 61.4% and 62.4% during the respective periods. Our service and support strategy seeks to capitalize on increased globalization, and we believe this, along with our architectural approach, has the potential to further differentiate us from competitors.

Critical Accounting Estimates

The preparation of financial statements and related disclosures in conformity with accounting principles generally accepted in the United States requires us to make judgments, assumptions, and estimates that affect the amounts reported in the Consolidated Financial Statements and accompanying notes. Note 2 to the Consolidated Financial Statements in our Annual Report on Form 10-K for the fiscal year ended July 29, 2006 describes the significant accounting policies and methods used in the preparation of the Consolidated Financial Statements. The accounting policies described below are significantly affected by critical accounting estimates. Such accounting policies require significant judgments, assumptions, and estimates used in the preparation of the Consolidated Financial Statements, and actual results could differ materially from the amounts reported based on these policies.

Revenue Recognition

Our products are generally integrated with software that is essential to the functionality of the equipment. Additionally, we provide unspecified software upgrades and enhancements related to the equipment through our maintenance contracts for most of our products. Accordingly, we account for revenue in accordance with Statement of Position No. 97-2, Software Revenue Recognition, and all related interpretations. For sales of products where software is incidental to the equipment, we apply the provisions of Staff Accounting Bulletin No. 101, Revenue Recognition in Financial Statements and Staff Accounting Bulletin No. 104, Revenue Recognition, and all related interpretations. Revenue is recognized when persuasive evidence of an arrangement exists, delivery has occurred, the fee is fixed or determinable, and collectibility is reasonably assured. In instances where final acceptance of the product, system, or solution is specified by the customer, revenue is deferred until all acceptance criteria have been met.

Table of Contents

Contracts, Internet commerce agreements, and customer purchase orders are generally used to determine the existence of an arrangement. Shipping documents and customer acceptance, when applicable, are used to verify delivery. We assess whether the fee is fixed or determinable based on the payment terms associated with the transaction and whether the sales price is subject to refund or adjustment. We assess collectibility based primarily on the creditworthiness of the customer as determined by credit checks and analysis, as well as the customer's payment history. When a sale involves multiple elements, such as sales of products that include services, the entire fee from the arrangement is allocated to each respective element based on its relative fair value and recognized when revenue recognition criteria for each element are met. The amount of product and service revenue recognized is impacted by our judgment as to whether an arrangement includes multiple elements and, if so, whether vendor-specific objective evidence of fair value exists. Changes to the elements in an arrangement and our ability to establish vendor-specific objective evidence for those elements could affect the timing of the revenue recognition. Our total deferred revenue for products was \$1.9 billion and \$1.6 billion as of April 28, 2007 and July 29, 2006, respectively. Technical support services revenue is deferred and recognized ratably over the period during which the services are to be performed, which is typically from one to three years. Advanced services revenue is recognized upon delivery or completion of performance. Our total deferred revenue for services was \$4.4 billion and \$4.1 billion as of April 28, 2007 and July 29, 2006, respectively.

We make sales to distributors and retail partners and recognize revenue based on a sell-through method using information provided by them. Our distributors and retail partners participate in various cooperative marketing and other programs, and we maintain estimated accruals and allowances for these programs. If actual credits received by our distributors and retail partners for these programs were to deviate significantly from our estimates, which are based on historical experience, our revenue could be adversely affected.

Allowance for Doubtful Accounts and Sales Returns

Our accounts receivable balance, net of allowance for doubtful accounts, was \$3.2 billion and \$3.3 billion as of April 28, 2007 and July 29, 2006, respectively. The allowance for doubtful accounts was \$172 million, or 5.0% of the gross accounts receivable balance, as of April 28, 2007, and \$175 million, or 5.0% of the gross accounts receivable balance, as of July 29, 2006. The allowance is based on our assessment of the collectibility of customer accounts. We regularly review the allowance by considering factors such as historical experience, credit quality, age of the accounts receivable balances, and current economic conditions that may affect a customer's ability to pay.

Our provision for doubtful accounts was \$6 million and \$22 million for the first nine months of fiscal 2007 and 2006, respectively. If a major customer's creditworthiness deteriorates, or if actual defaults are higher than our historical experience, or if other circumstances arise, our estimates of the recoverability of amounts due to us could be overstated, and additional allowances could be required, which could have an adverse impact on our revenue.

A reserve for future sales returns is established based on historical trends in product return rates. The reserve for future sales returns as of April 28, 2007 and July 29, 2006 was \$85 million and \$80 million, respectively, and was recorded as a reduction of our accounts receivable. If the actual future returns were to deviate from the historical data on which the reserve had been established, our revenue could be adversely affected.

Inventory Valuation and Liability for Purchase Commitments with Contract Manufacturers and Suppliers

Our inventory balance was \$1.3 billion and \$1.4 billion as of April 28, 2007 and July 29, 2006, respectively. The valuation of inventory requires us to write down inventory based on excess and obsolete inventories determined primarily by future demand forecasts. Inventory write-downs are measured as the difference between the cost of the inventory and market based upon assumptions about future demand and are charged to the provision for inventory, which is a component of our cost of sales. At the point of the loss recognition, a new, lower cost basis for that inventory is established, and subsequent changes in facts and circumstances do not result in the restoration or increase in that newly established cost basis.

In addition, we record a liability for firm, noncancelable, and unconditional purchase commitments with contract manufacturers and suppliers for quantities in excess of our future demand forecasts consistent with the valuation of our inventory. As of April 28, 2007, the liability for these purchase commitments was \$161 million, compared to \$148 million as of July 29, 2006, and was included in other accrued liabilities. In the third quarter of fiscal 2006, we began the initial implementation of the lean manufacturing model. Lean manufacturing is an industry-standard model that seeks to drive efficiency and flexibility in manufacturing processes and in the broader supply chain. We expect to complete our implementation of the lean manufacturing model in early fiscal 2008.

Table of Contents

Our total provision for inventory was \$173 million and \$125 million for the first nine months of fiscal 2007 and 2006, respectively. The amount recorded to cost of sales for purchase commitments was \$24 million and \$47 million for the first nine months of fiscal 2007 and 2006, respectively. If there were to be a sudden and significant decrease in demand for our products, or if there were a higher incidence of inventory obsolescence because of rapidly changing technology and customer requirements, we could be required to increase our inventory write-downs and our liability for purchase commitments, and our gross margin could be adversely affected. Inventory and supply chain management remains an area of focus as we balance the need to maintain supply chain flexibility to ensure competitive lead times with the risk of inventory obsolescence.

Warranty Costs

The liability for product warranties, included in other accrued liabilities, was \$338 million as of April 28, 2007, compared to \$309 million as of July 29, 2006. See Note 8 to the Consolidated Financial Statements. Our products are generally covered by a warranty for periods ranging from 90 days to five years, and for some products we provide a limited lifetime warranty. We accrue for warranty costs as part of our cost of sales based on associated material costs, technical support labor costs, and associated overhead. Material cost is estimated based primarily upon historical trends in the volume of product returns within the warranty period and the cost to repair or replace the equipment. Technical support labor cost is estimated based primarily upon historical trends in the rate of customer cases and the cost to support the customer cases within the warranty period. Overhead cost is applied based on estimated time to support warranty activities.

The provision for product warranties issued during the first nine months of fiscal 2007 and 2006 was \$370 million and \$283 million, respectively. The increase in the provision for product warranties was due to higher warranty claims related to higher shipment volume of our products. If we experience an increase in warranty claims compared with our historical experience, or if the cost of servicing warranty claims is greater than the expectations on which the accrual has been based, our gross margin could be adversely affected.

Share-Based Compensation Expense

On July 31, 2005, we adopted SFAS 123(R) which requires the measurement and recognition of compensation expense for all share-based payment awards made to our employees and directors including employee stock options, employee stock purchases, and employee restricted stock and restricted stock units, based on estimated fair values. Share-based compensation expense recognized under SFAS 123(R) was as follows (in millions):

	Three Months Ended		Nine Months Ended	
	April 28,	April 29,	April 28,	April 29,
	2007	2006	2007	2006
Employee share-based compensation expense	\$ 237	\$ 261	\$ 709	\$ 839
Share-based compensation expense related to acquisitions and investments	8	23	27	75
Total	\$ 245	\$ 284	\$ 736	\$ 914

See Note 10 to the Consolidated Financial Statements for additional information. Upon adoption of SFAS 123(R), we began estimating the value of employee stock options on the date of grant using a lattice-binomial model. Prior to the adoption of SFAS 123(R), the value of each employee stock option and employee stock purchase was estimated on the date of grant using the Black-Scholes model. The determination of fair value of share-based payment awards on the date of grant using an option-pricing model is affected by our stock price as well as assumptions regarding a number of highly complex and subjective variables. These variables include, but are not limited to, the expected stock price volatility over the term of the awards, and actual and projected employee stock option exercise behaviors. The use of a lattice-binomial model requires extensive actual employee exercise behavior data and a number of complex assumptions including expected volatility, risk-free interest rate, expected dividends, kurtosis, and skewness. The weighted-average assumptions, using the lattice-binomial model and the weighted-average estimated value of employee stock options are summarized as follows:

	Three Months Ended		Nine Months Ended	
	April 28,	April 29,	April 28,	April 29,

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

	2007	2006	2007	2006
Weighted-average assumptions:				
Expected volatility	26.3 %	22.4%	25.8%	23.6%
Risk-free interest rate	4.6%	4.7%	4.6%	4.2%
Expected dividend	0.0%	0.0%	0.0%	0.0%
Kurtosis	4.6	4.3	4.5	4.2
Skewness	(0.80)	(0.67)	(0.80)	(0.61)
Weighted-average estimated value	\$ 8.21	\$ 5.78	\$ 7.01	\$ 5.07

Table of Contents

We used the implied volatility for two-year traded options on our stock as the expected volatility assumption required in the lattice-binomial model consistent with SFAS 123(R) and SAB 107. The selection of the implied volatility approach was based upon the availability of actively traded options on our stock and also upon our assessment that implied volatility is more representative of future stock price trends than historical volatility. The risk-free interest rate assumption is based upon observed interest rates appropriate for the term of our employee stock options. The dividend yield assumption is based on the history and expectation of dividend payouts. The estimated kurtosis and skewness are technical measures of the distribution of stock price returns, which affect expected employee exercise behaviors that are based on our stock price return history as well as consideration of various academic analyses. Because share-based compensation expense recognized in the Consolidated Statements of Operations is based on awards ultimately expected to vest, it has been reduced for estimated forfeitures. SFAS 123(R) requires forfeitures to be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. Forfeitures were estimated based on historical experience. If factors change and we employ different assumptions in the application of SFAS 123(R) in future periods, the compensation expense that we record under SFAS 123(R) may differ significantly from what we have recorded in the current period.

Investment Impairments

Our publicly traded equity securities are reflected in the Consolidated Balance Sheets at a fair value of \$1.1 billion as of April 28, 2007, compared to \$712 million as of July 29, 2006. See Note 6 to the Consolidated Financial Statements. We recognize an impairment charge when the declines in the fair values of our publicly traded equity securities below their cost basis are judged to be other-than-temporary. The ultimate value realized on these equity securities, to the extent unhedged, is subject to market price volatility until they are sold. We consider various factors in determining whether we should recognize an impairment charge, including the length of time and extent to which the fair value has been less than our cost basis, the financial condition and near-term prospects of the investee, and our intent and ability to hold the investment for a period of time sufficient to allow for any anticipated recovery in market value. Our ongoing consideration of these factors could result in additional impairment charges in the future, which could adversely affect our net income. There were no impairment charges on investments in publicly held companies during the first nine months of fiscal 2007 or fiscal 2006.

We also have investments in privately held companies, some of which are in the startup or development stages. As of April 28, 2007, our investments in privately held companies were \$641 million, compared to \$574 million as of July 29, 2006, and were included in other assets. See Note 4 to the Consolidated Financial Statements. We monitor these investments for impairment and make appropriate reductions in carrying values if we determine an impairment charge is required, based primarily on the financial condition and near-term prospects of these companies. These investments are inherently risky because the markets for the technologies or products these companies are developing are typically in the early stages and may never materialize. There were no impairment charges on investments in privately held companies during the third quarter of fiscal 2007. Our impairment charges on investments in privately held companies were \$2 million during the third quarter of fiscal 2006, and were \$14 million and \$13 million during the first nine months of fiscal 2007 and fiscal 2006, respectively.

Goodwill Impairments

Our methodology for allocating the purchase price relating to purchase acquisitions is determined through established valuation techniques. Goodwill is measured as the excess of the cost of acquisition over the sum of the amounts assigned to tangible and identifiable intangible assets acquired less liabilities assumed. We perform goodwill impairment tests on an annual basis and between annual tests in certain circumstances for each reporting unit. The goodwill recorded in the Consolidated Balance Sheets as of April 28, 2007 and July 29, 2006 was \$9.5 billion and \$9.2 billion, respectively. In response to changes in industry and market conditions, we could be required to strategically realign our resources and consider restructuring, disposing of, or otherwise exiting businesses, which could result in an impairment of goodwill. There was no impairment of goodwill in the first nine months of fiscal 2007 or fiscal 2006.

Income Taxes

We are subject to income taxes in both the United States and numerous foreign jurisdictions. Significant judgment is required in evaluating our tax positions and determining our provision for income taxes.

Table of Contents

During the ordinary course of business, there are many transactions and calculations for which the ultimate tax determination is uncertain. We establish reserves for tax-related uncertainties based on estimates of whether, and the extent to which, additional taxes and interest will be due. These reserves are established when, despite our belief that our tax return positions are fully supportable, we believe that certain positions are likely to be challenged and may not be fully sustained on review by tax authorities. We adjust these reserves in light of changing facts and circumstances, such as the closing of a tax audit or the refinement of an estimate. Although we believe our reserves are reasonable, no assurance can be given that the final tax outcome of these matters will not be different from that which is reflected in our historical income tax provisions and accruals. To the extent that the final tax outcome of these matters is different than the amounts recorded, such differences will impact the provision for income taxes in the period in which such determination is made. The provision for income taxes includes the impact of reserve provisions and changes to reserves that are considered appropriate, as well as the related net interest.

Significant judgment is also required in determining any valuation allowance recorded against deferred tax assets. In assessing the need for a valuation allowance, we consider all available evidence including past operating results, estimates of future taxable income, and the feasibility of tax planning strategies. In the event that we change our determination as to the amount of deferred tax assets that can be realized, we will adjust our valuation allowance with a corresponding impact to the provision for income taxes in the period in which such determination is made.

Our effective tax rates differ from the statutory rate primarily due to acquisition-related costs, share-based compensation, R&D tax credits, state taxes, and the tax impact of foreign operations. The effective tax rate was 22.5% in the third quarter of fiscal 2007 and 22.0% for the first nine months of fiscal 2007. The effective tax rate was 22.7% in the third quarter of fiscal 2006 and 26.4% for the first nine months of fiscal 2006.

Our future effective tax rates could be subject to volatility or adversely affected by earnings being lower than anticipated in countries which have lower statutory rates and higher than anticipated in countries which have higher statutory rates; by changes in the valuation of our deferred tax assets and liabilities; by expiration of or lapses in the R&D tax credit laws; by transfer pricing adjustments related to certain acquisitions including the license of acquired intangibles under our intercompany R&D cost sharing arrangement; by tax effects of stock-based compensation; by costs related to intercompany restructurings; or by changes in tax laws, regulations, accounting principles, or interpretations thereof. In addition, we are subject to the continuous examination of our income tax returns by the Internal Revenue Service and other tax authorities. We regularly assess the likelihood of adverse outcomes resulting from these examinations to determine the adequacy of our provision for income taxes.

Loss Contingencies

We are subject to the possibility of various losses arising in the ordinary course of business. We consider the likelihood of loss or impairment of an asset or the incurrence of a liability, as well as our ability to reasonably estimate the amount of loss, in determining loss contingencies. An estimated loss contingency is accrued when it is probable that an asset has been impaired or a liability has been incurred and the amount of loss can be reasonably estimated. We regularly evaluate current information available to us to determine whether such accruals should be adjusted and whether new accruals are required.

Third parties, including customers, have in the past and may in the future assert claims or initiate litigation related to exclusive patent, copyright, trademark, and other intellectual property rights to technologies and related standards that are relevant to us. These assertions have increased over time as a result of our growth and the general increase in the pace of patent claims assertions, particularly in the United States. If any infringement or other intellectual property claim made against us by any third party is successful, or if we fail to develop non-infringing technology or license the proprietary rights on commercially reasonable terms and conditions, our business, operating results, and financial condition could be materially and adversely affected.

Table of Contents**Net Sales**

The following table presents the breakdown of net sales between product and service revenue (in millions, except percentages):

	Three Months Ended				Nine Months Ended			
			Variance	Variance			Variance	Variance
	April 28,	April 29,	in	in	April 28,	April 29,	in	in
	2007	2006	Dollars	Percent	2007	2006	Dollars	Percent
Net sales:								
Product	\$ 7,481	\$ 6,155	\$ 1,326	21.5%	\$ 21,520	\$ 17,183	\$ 4,337	25.2%
Service	1,385	1,167	218	18.7%	3,969	3,317	652	19.7%
Total	\$ 8,866	\$ 7,322	\$ 1,544	21.1%	\$ 25,489	\$ 20,500	\$ 4,989	24.3%

Net sales, which include product and service revenue, for each theater are summarized in the following table (in millions, except percentages):

	Three Months Ended				Nine Months Ended			
			Variance	Variance			Variance	Variance
	April 28,	April 29,	in	in	April 28,	April 29,	in	in
	2007	2006	Dollars	Percent	2007	2006	Dollars	Percent
Net sales:								
United States and Canada	\$ 4,843	\$ 4,138	\$ 705	17.0%	\$ 14,126	\$ 11,258	\$ 2,868	25.5%
<i>Percentage of net sales</i>	<i>54.5%</i>	<i>56.5%</i>			<i>55.5%</i>	<i>54.9%</i>		
European Markets	1,966	1,595	371	23.3%	5,410	4,496	914	20.3%
<i>Percentage of net sales</i>	<i>22.2%</i>	<i>21.8%</i>			<i>21.2%</i>	<i>21.9%</i>		
Emerging Markets	839	604	235	38.9%	2,481	1,760	721	41.0%
<i>Percentage of net sales</i>	<i>9.5%</i>	<i>8.2%</i>			<i>9.7%</i>	<i>8.6%</i>		
Asia Pacific	900	648	252	38.9%	2,502	2,003	499	24.9%

Japan	318	337	(19)	(5.6)%	970	983	(13)	(1.3)%
<i>Percentage of net sales</i>	<i>3.6%</i>	<i>4.6%</i>			<i>3.8%</i>	<i>4.8%</i>		
Total	\$ 8,866	\$ 7,322	\$ 1,544	21.1%	\$ 25,489	\$ 20,500	\$ 4,989	24.3%

The increase in net product sales occurred across our four largest geographic theaters, as we experienced increased information technology-related capital spending in our service provider, enterprise, and commercial markets. Our net product sales also benefited from our entry into new markets and development of adjacent product offerings, and the additional contribution of Scientific-Atlanta during the third quarter and first nine months of fiscal 2007. Scientific-Atlanta's net product sales for each theater and service revenue are summarized in the following table (in millions):

	Three Months Ended		Nine Months Ended	
	April 28,	April 29,	April 28,	April 29,
	2007	2006	2007	2006
Scientific-Atlanta:				
United States and Canada	\$ 548	\$ 309	\$ 1,458	\$ 309
European Markets	104	31	250	31
Emerging Markets	45	36	111	36

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

Asia Pacific	19	9	53	9
Japan	2	1	7	1
Total product sales	718	386	1,879	386
Service	34	21	96	21
Total	\$ 752	\$ 407	\$ 1,975	\$ 407

Scientific-Atlanta's net product sales and service revenue in the above table reflect the contribution of Scientific-Atlanta subsequent to the February 24, 2006 acquisition date.

Table of Contents**Net Product Sales by Theater**

The following table presents the breakdown of net product sales by theater (in millions, except percentages):

	Three Months Ended				Nine Months Ended			
			Variance				Variance	
	April 28,	April 29,	in	in	April 28,	April 29,	in	in
	2007	2006	Dollars	Percent	2007	2006	Dollars	Percent

<i>Percentage of net product sales</i>	<i>3.7%</i>	<i>4.8%</i>			<i>4.0%</i>	<i>5.0%</i>		
Total	\$ 7,481	\$ 6,155	\$ 1,326	21.5%	\$ 21,520	\$ 17,183	\$ 4,337	25.2%

United States and Canada

The increase in net product sales in the United States and Canada theater during the third quarter and first nine months of fiscal 2007 compared to the corresponding periods of fiscal 2006 was due to an increase in net product sales in the service provider market, growth in the commercial market, and the additional contribution of Scientific-Atlanta. During the third quarter and first nine months of fiscal 2007, the enterprise market grew at a slower rate than the service provider and commercial markets.

European Markets

The increase in net product sales in the European Markets theater during the third quarter and first nine months of fiscal 2007 compared to the corresponding periods of fiscal 2006 was due to balanced improvement in net product sales across most of our customer markets and geographic areas, led by the enterprise market throughout the European Markets theater. During the third quarter and the first nine months of fiscal 2007, net product sales in the United Kingdom, France and Germany increased from the corresponding periods in fiscal 2006.

Emerging Markets

Net product sales in the Emerging Markets theater increased during the third quarter and first nine months of fiscal 2007 compared to the corresponding periods of fiscal 2006 primarily as a result of continued product deployment by service providers and growth in the enterprise and commercial markets as customers continue to adopt our architectural platform, led by strength in Eastern Europe, the Middle East and Africa, and Russia and the Commonwealth of Independent States (CIS).

Asia Pacific

The increase in net product sales in the Asia Pacific theater during the third quarter and first nine months of fiscal 2007 was attributable to growth in the commercial, enterprise, and service provider markets. Within the Asia Pacific theater, Australia, China, and India had strong growth during the third quarter and the first nine months of fiscal 2007. South Korea experienced strong growth during the third quarter of fiscal 2007 compared to the third quarter of fiscal 2006.

Japan

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

Net product sales in the Japan theater declined slightly in the third quarter and first nine months of fiscal 2007 compared to the corresponding periods in fiscal 2006.

Table of Contents**Net Product Sales by Groups of Similar Products**

The following table presents net sales for groups of similar products (in millions, except percentages):

	Three Months Ended				Nine Months Ended			
	April 28,	April 29,	Variance	Variance	April 28,	April 29,	Variance	Variance
			in	in			in	in
	2007	2006	Dollars	Percent	2007	2006	Dollars	Percent
Net product sales:								
Routers	\$ 1,766	\$ 1,519	\$ 247	16.3%	\$ 5,035	\$ 4,356	\$ 679	15.6%
<i>Percentage of net product sales</i>	<i>23.6%</i>	<i>24.7%</i>			<i>23.5%</i>	<i>25.4%</i>		
Switches	3,089	2,691	398	14.8%	9,132	7,999	1,133	14.2%
<i>Percentage of net product sales</i>	<i>41.3%</i>	<i>43.7%</i>			<i>42.4%</i>	<i>46.5%</i>		
Advanced technologies	2,072	1,529	543	35.5%	5,862	3,825	2,037	53.3%
<i>Percentage of net product sales</i>	<i>27.7%</i>	<i>24.8%</i>			<i>27.2%</i>	<i>22.3%</i>		
Other	554	416	138	33.2%	1,491	1,003	488	48.7%
<i>Percentage of net product sales</i>	<i>7.4%</i>	<i>6.8%</i>			<i>6.9%</i>	<i>5.8%</i>		
Total	\$ 7,481	\$ 6,155	\$ 1,326	21.5%	\$ 21,520	\$ 17,183	\$ 4,337	25.2%

Routers

The increase in net product sales related to routers in the third quarter and first nine months of fiscal 2007 compared to the corresponding periods of fiscal 2006 was primarily due to higher sales of our high-end routers, with strength in our Cisco CRS-1 Carrier Routing System, Cisco 7600 Series, and Cisco XR 12000 and 12000 Series products. Sales of our high-end routers, which represent a larger proportion of our total router sales compared to midrange and low-end routers, increased by approximately \$235 million and \$645 million in the third quarter and first nine months of fiscal 2007, respectively, compared to the corresponding periods of fiscal 2006. Our high-end router sales are primarily to service providers, which tend to make large and sporadic purchases. We believe that the increase in high-end router sales is attributable to service providers continuing to scale network capacity to accommodate actual and projected increases in video, voice, and data traffic.

Switches

The increase in net product sales related to switches in the third quarter and first nine months of fiscal 2007 was due primarily to higher sales of local-area network (LAN) fixed-configuration switches, which increased during the third quarter and first nine months of fiscal 2007 by approximately \$250 million and \$740 million, respectively, compared to the corresponding periods in fiscal 2006. Sales of LAN modular switches also increased during both periods compared to the corresponding periods in fiscal 2006. The increase in sales of LAN switches was a result of the continued adoption by our customers of new technologies, including Gigabit Ethernet, 10 Gigabit Ethernet and Power over Ethernet. This has resulted in higher sales of fixed-configuration switches, including the Cisco Catalyst 3750 Series, the Cisco Catalyst 2960 Series, the Cisco Catalyst 3560 Series, and our high-end modular switches, the Cisco Catalyst 6500 Series, as new technologies are deployed throughout our customers' networks from the core to the wiring closet. Additionally, growth in advanced technologies such as unified communications and wireless LAN creates demand for LAN fixed-configuration and modular switching infrastructure as additional endpoints are added to the network.

Advanced Technologies

The increase in net product sales related to advanced technologies in the third quarter and first nine months of fiscal 2007 compared to the corresponding periods in fiscal 2006 was due primarily to:

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

Video systems, which include solutions and systems designed to enable video-specific delivery systems for service providers, increased by approximately \$230 million and \$1.1 billion during the third quarter and first nine months of fiscal 2007, respectively. The increases were attributable to several factors including Scientific-Atlanta product sales only being included subsequent to the February 24, 2006 acquisition date, an increase in the demand for high-definition (HD) set-tops, network upgrades, international expansion, and the new Federal Communications Commission (FCC) requirements effective July 1, 2007, which will require separable security for set-top boxes sold in the United States. We believe that the new FCC requirements had a positive impact on our sales of video systems in the third quarter and the first nine months of fiscal 2007; however, at this time we are not able to quantify the effect of the new requirements on the increase in sales compared to the prior periods.

Unified communications sales increased by approximately \$115 million and \$290 million during the third quarter and first nine months of fiscal 2007, respectively, primarily due to sales of IP phones and associated software as our customers continued to transition from an analog-based to an IP-based infrastructure.

Table of Contents

Home networking product sales increased by approximately \$25 million and \$245 million during the third quarter and first nine months of fiscal 2007, respectively. Scientific-Atlanta contributed approximately \$20 million and \$170 million of the increase in home networking product sales during the third quarter and first nine months of fiscal 2007, respectively.

Sales of security products increased by approximately \$75 million and \$155 million during the third quarter and first nine months of fiscal 2007, respectively, primarily due to module and line card sales related to our routers and LAN modular switches as customers continued to emphasize network security and our next-generation adaptive security appliance product, which integrates multiple technologies including virtual private network (VPN), firewall, and intrusion prevention services on one platform.

Sales of wireless LAN products increased by approximately \$30 million and \$150 million during the third quarter and first nine months of fiscal 2007, respectively, primarily due to new customers, continued deployments with existing customers, and the adoption of our unified architecture platform.

Sales of storage area networking products increased by approximately \$40 million and \$90 million during the third quarter and first nine months of fiscal 2007, respectively.

Application networking services, which was identified as an advanced technology in the second quarter of fiscal 2006, increased by \$30 million and \$60 million during the third quarter and first nine months of fiscal 2007, respectively.

Other Product Revenue

The increase in other product revenue during the third quarter and first nine months of fiscal 2007 compared to the corresponding periods in fiscal 2006 was due primarily to:

Sales of optical networking products, which increased by approximately \$55 million and \$245 million during the third quarter and first nine months of fiscal 2007, respectively, with approximately \$30 million and \$135 million of the increase in sales during the third quarter and first nine months of fiscal 2007, respectively, being related to Scientific-Atlanta. Our sales of optical networking products were previously included in our advanced technologies product category and prior period amounts have been reclassified to conform to the current period's presentation.

The Scientific-Atlanta contribution to other product revenue, excluding optical networking products, increased by approximately \$50 million and \$135 million during the third quarter and first nine months of fiscal 2007, respectively.

Increased sales of IP-based communications solutions to service providers.

Factors That May Impact Net Product Sales

Net product sales may continue to be affected by changes in the geopolitical environment and global economic conditions; competition, including price-focused competitors from Asia, especially China; new product introductions; sales cycles and product implementation cycles; changes in the mix of our customers between service provider and enterprise markets; changes in the mix of direct sales and indirect sales; variations in sales channels; and final acceptance criteria of the product, system, or solution as specified by the customer. In addition, sales to the service provider market have been characterized by large and often sporadic purchases, especially relating to our router sales and sales of certain advanced technologies. In addition, service provider customers typically have longer implementation cycles, require a broader range of services, including network design services, and often have acceptance provisions that can lead to a delay in revenue recognition. To improve customer satisfaction, we continue to focus on managing our manufacturing lead-time performance, which may result in corresponding reductions in order backlog. A decline in backlog levels could result in more variability and less predictability in our quarter-to-quarter net sales and operating results.

Net product sales may also be adversely affected by fluctuations in demand for our products, especially with respect to Internet businesses and telecommunications service providers, price and product competition in the communications and information technology industry, introduction and market acceptance of new technologies and products, adoption of new networking standards, and financial difficulties experienced by our customers. We may, from time to time, experience manufacturing issues that create a delay in our suppliers' ability to provide specific components, resulting in delayed shipments. To the extent that manufacturing issues and any related component shortages, including those caused by any possible disruption related to our implementation of the lean manufacturing model, result in delayed shipments in the future, and particularly in periods when we and our suppliers are operating at higher levels of capacity, it is possible that revenue for a quarter could be adversely affected if such matters are not remediated within the same quarter. For additional factors that may impact net product sales, see Part II, Item 1A. Risk Factors.

Our distributors and retail partners participate in various cooperative marketing and other programs. In addition, increasing sales to our distributors and retail partners generally results in greater difficulty in forecasting the mix of our products and, to a certain degree, the timing of orders from our customers. We recognize revenue for sales to our distributors and retail partners based on a sell-through method using information provided by them, and we maintain estimated accruals and allowances for all cooperative marketing and other programs.

Table of Contents**Net Service Revenue**

The increase in net service revenue during the third quarter and first nine months of fiscal 2007 compared to the corresponding periods of fiscal 2006 was primarily due to increased technical support service contract initiations and renewals associated with higher product sales, which have resulted in a larger installed base of equipment being serviced, and increased revenue from advanced services, which relates to consulting support services for our technologies for specific networking needs. The increase in advanced services revenue during the third quarter and first nine months of fiscal 2007 compared to the corresponding periods of fiscal 2006 was attributable to our revenue growth in the service provider market, the Emerging Markets theater, and advanced technologies.

Gross Margin

The following table presents the gross margin for products and services (in millions, except percentages):

	Three Months Ended				Nine Months Ended			
	Amount		Percentage		Amount		Percentage	
	April 28, 2007	April 29, 2006	April 28, 2007	April 29, 2006	April 28, 2007	April 29, 2006	April 28, 2007	April 29, 2006
Gross margin:								
Product	\$ 4,796	\$ 3,962	64.1%	64.4%	\$ 13,792	\$ 11,465	64.1%	66.7%
Service	851	764	61.4%	65.5%	2,476	2,137	62.4%	64.4%
Total	\$ 5,647	\$ 4,726	63.7%	64.5%	\$ 16,268	\$ 13,602	63.8%	66.4%

The following table presents the gross margin for each theater (in millions, except percentages):

	Three Months Ended				Nine Months Ended			
	Amount		Percentage		Amount		Percentage	
	April 28, 2007	April 29, 2006	April 28, 2007	April 29, 2006	April 28, 2007	April 29, 2006	April 28, 2007	April 29, 2006
Gross margin:								
United States and Canada	\$ 3,047	\$ 2,642	62.9%	63.8%	\$ 8,870	\$ 7,361	62.8%	65.4%
European Markets	1,269	1,037	64.5%	65.0%	3,530	3,028	65.2%	67.3%
Emerging Markets	530	395	63.2%	65.4%	1,610	1,209	64.9%	68.7%
Asia Pacific	578	413	64.2%	63.7%	1,585	1,308	63.3%	65.3%
Japan	223	239	70.1%	70.9%	673	696	69.4%	70.8%
Total	\$ 5,647	\$ 4,726	63.7%	64.5%	\$ 16,268	\$ 13,602	63.8%	66.4%

The decrease in gross margin percentage during the third quarter and first nine months of fiscal 2007 compared to the corresponding periods of fiscal 2006 was due to the change in mix of products sold and higher sales discounts and rebates partially offset by lower manufacturing costs and higher shipment volume. The decrease in service gross margin also contributed to the lower gross margin percentage. The gross margin for the third quarter and first nine months of fiscal 2007 and 2006 reflect the impact of Scientific-Atlanta since the February 24, 2006 acquisition date. The gross margin for each theater is derived from information from our internal management system. The gross margin percentage for a particular theater may fluctuate and period-to-period changes in such margin percentages may not be indicative of a trend for that theater.

Table of Contents

Product Gross Margin

The decrease in product gross margin percentage during the third quarter of fiscal 2007 compared to the third quarter of fiscal 2006 was due to the following factors:

Changes in the mix of products sold decreased product gross margin percentage by 1.3%, with 1.2% of this decrease related to the mix impact of higher net product sales from Scientific-Atlanta.

Sales discounts, rebates, and product pricing decreased product gross margin percentage by 2.2%.

Lower overall manufacturing costs related to lower component costs, value engineering and other manufacturing-related costs increased product gross margin percentage by 1.9%. Value engineering is the process by which production costs are reduced through component redesign, board configuration, test processes, and transformation processes.

Higher shipment volume, net of certain variable costs, also increased product gross margin percentage by 1.0%. The effects of lower amortization of purchased intangible assets, share-based compensation expense, and purchase accounting adjustments to inventory increased gross margin by 0.3%.

The decrease in product gross margin percentage during the first nine months of fiscal 2007 compared to the first nine months of fiscal 2006 was due to the following factors:

Changes in the mix of products sold decreased product gross margin percentage by 2.7%, with 2.1% of this decrease related to higher net product sales from Scientific-Atlanta due primarily to the inclusion of a full nine months of Scientific-Atlanta sales in fiscal 2007, and the remainder being due to sales of certain switching and routing products.

Sales discounts, rebates, and product pricing decreased product gross margin percentage by 2.1%.

Lower overall manufacturing costs related to lower component costs, value engineering and other manufacturing-related costs increased product gross margin percentage by 1.4%.

Higher shipment volume, net of certain variable costs, increased product gross margin percentage by 0.9%. The effects of higher amortization of purchased intangible assets, share-based compensation expense, and purchase accounting adjustments to inventory decreased gross margin by 0.1%.

Product gross margin may continue to be adversely affected in the future by: changes in the mix of products sold, including further periods of increased growth of some of our lower-margin products; introduction of new products, including products with price-performance advantages; our ability to reduce production costs; entry into new markets, including markets with different pricing structures and cost structures, by way of internal development or through acquisitions; changes in distribution channels; price competition, including competitors from Asia and especially China; changes in geographic mix; sales discounts; increases in material or labor costs; excess inventory and obsolescence charges, including the effect of lean manufacturing; warranty costs; changes in shipment volume; loss of cost savings due to changes in component pricing; impact of value engineering; inventory holding charges; and how well we execute on our strategy and operating plans.

Service Gross Margin

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

Our service gross margin percentage in the third quarter and first nine months of fiscal 2007 decreased from the corresponding periods of fiscal 2006, primarily due to strategic investments in headcount as well as advanced services representing a higher proportion of service revenue. Additionally, we have continued to invest in building out our technical support and advanced services capabilities in the Emerging Markets theater.

Service gross margin will typically experience some variability over time due to various factors such as the change in mix between technical support services and advanced services, as well as the timing of technical support service contract initiations and renewals and the timing of our adding personnel and resources to support this business. Our service gross margin from technical support services is higher than the service gross margin from our advanced services and our revenue from advanced services may continue to increase to a higher proportion of total service revenue due to our continued focus on providing comprehensive support to our customers networking devices, applications, and infrastructures.

Table of Contents**Research and Development, Sales and Marketing, and General and Administrative Expenses**

Research and development (R&D), sales and marketing, and general and administrative (G&A) expenses are summarized in the following table (in millions, except percentages):

	Three Months Ended				Nine Months Ended			
	April 28, 2007	April 29, 2006	Variance in Dollars	Variance in Percent	April 28, 2007	April 29, 2006	Variance in Dollars	Variance in Percent
Research and development	\$ 1,144	\$ 1,041	\$ 103	9.9%	\$ 3,321	\$ 3,003	\$ 318	10.6%
<i>Percentage of net sales</i>	<i>12.9%</i>	<i>14.2%</i>			<i>13.0%</i>	<i>14.6%</i>		
Sales and marketing	1,830	1,547	283	18.3%	5,242	4,431	811	18.3%
<i>Percentage of net sales</i>	<i>20.6%</i>	<i>21.1%</i>			<i>20.6%</i>	<i>21.6%</i>		
General and administrative	378	298	80	26.8%	1,082	858	224	26.1%
<i>Percentage of net sales</i>	<i>4.3%</i>	<i>4.1%</i>			<i>4.2%</i>	<i>4.2%</i>		
Total	\$ 3,352	\$ 2,886	\$ 466	16.1%	\$ 9,645	\$ 8,292	\$ 1,353	16.3%
<i>Percentage of net sales R&D Expenses</i>	<i>37.8%</i>	<i>39.4%</i>			<i>37.8%</i>	<i>40.4%</i>		

R&D expenses increased for the third quarter and first nine months of fiscal 2007 compared to the corresponding periods of fiscal 2006 primarily due to higher headcount-related expenses reflecting our continued investment in R&D efforts for routers, switches, advanced technologies and other product technologies. R&D expenses included the effect of employee share-based compensation expense which decreased by \$11 million and \$56 million compared to the third quarter and first nine months of fiscal 2006, respectively. Scientific-Atlanta contributed an additional \$28 million and \$141 million of R&D expenses for the three and nine months of fiscal 2007, respectively, compared to the corresponding periods of fiscal 2006. We have also continued to purchase or license technology in order to bring a broad range of products to market in a timely fashion. If we believe that we are unable to enter a particular market in a timely manner with internally developed products, we may license technology from other businesses or acquire businesses as an alternative to internal R&D. All of our R&D costs have been expensed as incurred.

Sales and Marketing Expenses

Sales and marketing expenses for the third quarter and first nine months of fiscal 2007 increased compared to the corresponding periods of fiscal 2006 primarily due to an increase in sales expenses of \$251 million and \$681 million, respectively. Sales expenses increased primarily due to an increase in headcount-related expenses. Scientific-Atlanta contributed an additional \$14 million and \$82 million of sales and marketing expenses for the three and nine months of fiscal 2007, respectively, compared to the corresponding periods of fiscal 2006. Sales and marketing expenses for the third quarter and first nine months of fiscal 2007 included the effect of employee share-based compensation expense which decreased by \$6 million and \$46 million, respectively, compared to the corresponding periods of fiscal 2006.

G&A Expenses

G&A expenses for the third quarter of fiscal 2007 increased compared to the third quarter of fiscal 2006 primarily due to increased headcount-related expenses. G&A expenses for the first nine months of fiscal 2007 increased compared to the first nine months of fiscal 2006 primarily due to increased headcount-related expenses and approximately \$65 million of real estate-related charges. Scientific-Atlanta contributed an additional \$7 million and \$55 million of G&A expenses for the three and nine months of fiscal 2007, respectively, compared to the corresponding periods of fiscal 2006.

Headcount

Our headcount increased by 6,864 employees during the first nine months of fiscal 2007, reflecting the investment in sales and R&D described above and also reflecting increases in investments in our service business and our Juarez, Mexico manufacturing facility. Our headcount is expected to increase, as we continue to focus on the commercial market; additional sales coverage; growing and expanding our advanced technologies; our evolving support model; expanding our presence in the Emerging Markets theater; next-generation service provider network

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

build-outs; strengthening our product offerings in the consumer market; and providing more comprehensive solutions to our customers as they employ Internet solutions. As a result, if we do not achieve the benefits anticipated from these investments, our operating results may be adversely affected.

Table of Contents*Employee Share-Based Compensation Expense*

Employee share-based compensation expense under SFAS 123(R) was as follows (in millions):

	Three Months Ended		Nine Months Ended	
	April 28, 2007	April 29, 2006	April 28, 2007	April 29, 2006
Cost of sales - product	\$ 10	\$ 11	\$ 33	\$ 41
Cost of sales - service	25	28	79	90
Employee share-based compensation expense in cost of sales	35	39	112	131
Research and development	75	86	223	279
Sales and marketing	101	107	294	340
General and administrative	26	29	80	89
Employee share-based compensation expense in operating expenses	202	222	597	708
Total employee share-based compensation expense	\$ 237	\$ 261	\$ 709	\$ 839

Share-based compensation expense included compensation expense for share-based payment awards granted prior to, but not yet vested, as of July 30, 2005 based on the grant date fair value using the Black-Scholes model, and compensation expense for share-based payment awards granted subsequent to July 30, 2005 based on the grant date fair value using the lattice-binomial model. In conjunction with the adoption of SFAS 123(R), we changed our method of attributing the value of share-based compensation to expense from the accelerated multiple-option approach to the straight-line single-option method. Compensation expense for all share-based payment awards granted on or prior to July 30, 2005 is recognized using the accelerated multiple-option approach while compensation expense for all share-based payment awards granted subsequent to July 30, 2005 is recognized using the straight-line single-option method. The decrease in employee share-based compensation expense during the third quarter and first nine months of fiscal 2007 compared to the corresponding periods of fiscal 2006 was consistent with the change in the attribution method upon the adoption of SFAS 123(R).

Amortization of Purchased Intangible Assets and In-Process Research and Development

The following table presents the amortization of purchased intangible assets and in-process R&D (in millions):

	Three Months Ended		Nine Months Ended	
	April 28, 2007	April 29, 2006	April 28, 2007	April 29, 2006
Amortization of purchased intangible assets included in operating expenses	\$ 97	\$ 99	\$ 298	\$ 214
In-process research and development	\$ 1	\$ 88	\$ 7	\$ 90

The increase in the amortization of purchased intangible assets included in operating expenses for the first nine months of fiscal 2007 compared to the first nine months of fiscal 2006 was primarily due to the additional amortization of purchased intangible assets related to Scientific-Atlanta. For additional information regarding purchased intangibles, see Note 3 to the Consolidated Financial Statements. Our methodology for allocating the purchase price, relating to purchase acquisitions, to in-process R&D is determined through established valuation techniques. The decrease in in-process R&D during the third quarter and first nine months of fiscal 2007 compared to the corresponding periods of fiscal 2006 was related to \$88 million of in-process R&D recorded in connection with the acquisition of Scientific-Atlanta during the third quarter of fiscal 2006. See Note 3 to the Consolidated Financial Statements for additional information regarding the acquisitions completed in the first nine months of fiscal 2007 and the in-process R&D recorded for these acquisitions. In-process R&D was expensed upon acquisition because technological feasibility had not been established and no future alternative uses existed.

The fair value of the existing purchased technology and patents, as well as the technology under development, is determined using the income approach, which discounts expected future cash flows to present value. The discount rates used in the present value calculations are typically

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

derived from a weighted-average cost of capital analysis and venture capital surveys, adjusted upward to reflect additional risks inherent in the development lifecycle. We consider the pricing model for products related to these acquisitions to be standard within the high-technology communications industry. However, we do not expect to achieve a material amount of expense reductions as a result of integrating the acquired in-process technology. Therefore, the valuation assumptions do not include significant anticipated cost savings.

Table of Contents

For purchase acquisitions completed to date, the development of these technologies remains a significant risk due to the remaining efforts to achieve technological feasibility, rapidly changing customer markets, uncertain standards for new products, and significant competitive threats. The nature of the efforts to develop these technologies into commercially viable products consists primarily of planning, designing, experimenting, and testing activities necessary to determine that the technologies can meet market expectations, including functionality and technical requirements. Failure to bring these products to market in a timely manner could result in a loss of market share or a lost opportunity to capitalize on emerging markets and could have a material adverse impact on our business and operating results.

The following table summarizes the key assumptions underlying the valuation for our purchase acquisitions completed in the first nine months of fiscal 2007 for which in-process R&D was recorded (in millions, except percentages):

	In-Process R&D Expense	Estimated Cost to Complete Technology at Time of Acquisition	Risk-Adjusted Discount Rate for In-Process R&D
Arroyo Video Solutions, Inc.	\$ 3	\$ 5	30.0%
Reactivity, Inc.	1	1	16.0%
Other	3	1	36.0%
Total	\$ 7	\$ 7	

The key assumptions primarily consist of an expected completion date for the in-process projects; estimated costs to complete the projects; revenue and expense projections, assuming the products have entered the market; and discount rates based on the risks associated with the development lifecycle of the in-process technology acquired. Failure to achieve the expected levels of revenue and net income from these products will negatively impact the return on investment expected at the time that the acquisitions were completed and may result in impairment charges. Actual results from the purchase acquisitions to date did not have a material adverse impact on our business and operating results.

Interest Income, Net

The components of interest income, net, are as follows (in millions):

	Three Months Ended		Nine months Ended	
	April 28, 2007	April 29, 2006	April 28, 2007	April 29, 2006
Interest income	\$ 283	\$ 202	\$ 801	\$ 524
Interest expense	(94)	(60)	(283)	(60)
Total	\$ 189	\$ 142	\$ 518	\$ 464

The increase in interest income during the third quarter and first nine months of fiscal 2007 compared to the corresponding periods of fiscal 2006 was primarily due to higher average interest rates on our portfolio of cash and cash equivalents and fixed income securities, and higher average balances. The increase in interest expense in the third quarter and first nine months of fiscal 2007 compared to the corresponding periods of fiscal 2006 was due to interest expense on the \$6.5 billion in senior unsecured notes subsequent to the issuance date in February 2006. All periods include the effect of \$6.0 billion of interest rate swaps. The effect of the interest rate swaps is to convert fixed-rate interest expense to floating-rate interest expense based on LIBOR.

Table of Contents**Other Income, Net**

The components of other income, net, are as follows (in millions):

	Three Months Ended		Nine months Ended	
	April 28, 2007	April 29, 2006	April 28, 2007	April 29, 2006
Net gains on investments in fixed income and publicly traded equity securities	\$ 64	\$ 34	\$ 191	\$ 20
Net (losses) gains on investments in privately held companies	(9)	21	(23)	67
Impairment charges on investments in privately held companies		(2)	(14)	(13)
Net gains and impairment charges on investments	55	53	154	74
Other	(22)	(36)	(60)	(57)
Total	\$ 33	\$ 17	\$ 94	\$ 17

Provision for Income Taxes

The effective tax rate was 22.5% for the third quarter of fiscal 2007, compared to 22.7% for the third quarter of fiscal 2006, and 22.0% for the first nine months of fiscal 2007, compared to 26.4% for the first nine months of fiscal 2006.

In December 2006, the Tax Relief and Health Care Act of 2006 reinstated the U.S. federal R&D tax credit, retroactive to January 1, 2006. The tax provision rate for the first nine months of fiscal 2007 included a tax benefit relating to the reinstatement of the U.S. federal R&D tax credit, including \$60 million related to fiscal 2006 R&D expenses. The decrease in the effective rate also reflects a benefit from an increase in foreign income taxed at other than U.S. rates. The effective tax rate differs from the statutory rate primarily due to acquisition-related costs, share-based compensation, R&D tax credits, state taxes, and the tax impact of foreign operations.

The tax provision rates for the third quarter and first nine months of fiscal 2006 included a benefit of approximately \$124 million from the favorable settlement of a tax audit in a foreign jurisdiction.

On October 22, 2004, the American Jobs Creation Act of 2004 (the Jobs Creation Act) was signed into law. The Jobs Creation Act created a temporary incentive for U.S. corporations to repatriate accumulated income earned abroad by providing an 85 percent dividends received deduction for certain dividends from controlled foreign corporations. In the first quarter of fiscal 2006, we distributed cash from our foreign subsidiaries and reported an extraordinary dividend (as defined in the Jobs Creation Act) of \$1.2 billion and a related tax liability of approximately \$63 million in our fiscal 2006 federal income tax return. This amount was previously provided for in the provision for income taxes and is included in income taxes payable.

Our future effective tax rates could be subject to volatility or adversely affected by earnings being lower than anticipated in countries which have lower statutory rates and higher than anticipated in countries which have higher statutory rates; by changes in the valuation of our deferred tax assets and liabilities; by expiration of or lapses in the R&D tax credit laws; by transfer pricing adjustments related to certain acquisitions including the license of acquired intangibles under our intercompany R&D cost sharing arrangement; by tax effects of stock-based compensation; by costs related to intercompany restructurings, or by changes in tax laws, regulations, accounting principles, or interpretations thereof. In addition, we are subject to the continuous examination of our income tax returns by the Internal Revenue Service and other tax authorities. We regularly assess the likelihood of adverse outcomes resulting from these examinations to determine the adequacy of our provision for income taxes.

Recent Accounting Pronouncements

In July 2006, the FASB issued Financial Interpretation No. 48, Accounting for Uncertainty in Income Taxes-an interpretation of FASB Statement No. 109 (FIN 48), which is a change in accounting for income taxes. FIN 48 specifies how tax benefits for uncertain tax positions are to be recognized, measured, and derecognized in financial statements; requires certain disclosures of uncertain tax matters; specifies how reserves for uncertain tax positions should be classified on the balance sheet; and provides transition and interim-period guidance, among other provisions. FIN 48 is effective for fiscal years beginning after December 15, 2006 and as a result, is effective for us in the first quarter of fiscal 2008. We are currently evaluating the impact of FIN 48 on our Consolidated Financial Statements.

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

In September 2006, the SEC issued Staff Accounting Bulletin No. 108, Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements (SAB 108). SAB 108 provides interpretative guidance on the process of quantifying financial statement misstatements and is effective for fiscal years ending after November 15, 2006. We applied the provisions of SAB 108 beginning in the first quarter of fiscal 2007 and there was no impact to the Consolidated Financial Statements.

Table of Contents

In September 2006, the FASB issued Statement of Financial Accounting Standards (SFAS) No. 157, Fair Value Measurements (SFAS 157). SFAS 157 defines fair value, establishes a framework and gives guidance regarding the methods used for measuring fair value, and expands disclosures about fair value measurements. SFAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. We are currently assessing the impact that SFAS 157 will have on our results of operations and financial position.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities Including an amendment of FASB Statement No. 115 (SFAS 159). SFAS 159 expands the use of fair value accounting but does not affect existing standards which require certain assets or liabilities to be carried at fair value. The objective of SFAS 159 is to improve financial reporting by providing companies with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. Under SFAS 159, a company may choose, at specified election dates, to measure eligible items at fair value and report unrealized gains and losses on items for which the fair value option has been elected in earnings at each subsequent reporting date. SFAS 159 is effective as of the beginning of the fiscal year that begins after November 15, 2007. We are currently assessing the impact that SFAS 159 will have on our results of operations and financial position.

Liquidity and Capital Resources

The following sections discuss the effects of changes in our balance sheet and cash flows, contractual obligations, other commitments, and the stock repurchase program on our liquidity and capital resources.

Balance Sheet and Cash Flows**Cash and Cash Equivalents and Investments**

The following table summarizes our cash and cash equivalents and investments (in millions):

	April 28, 2007	July 29, 2006	Increase (Decrease)
Cash and cash equivalents	\$ 5,457	\$ 3,297	\$ 2,160
Fixed income securities	15,771	13,805	1,966
Publicly traded equity securities	1,108	712	396
Total	\$ 22,336	\$ 17,814	\$ 4,522

The increase in cash and cash equivalents and investments was primarily a result of cash provided by operating activities of \$7.4 billion, cash provided by the issuance of common stock of \$3.7 billion related to employee stock option exercises and employee stock purchases, and excess tax benefits from share-based compensation of \$648 million, partially offset by cash used for the repurchase of common stock of \$6.3 billion and capital expenditures of \$912 million. The increase in cash and cash equivalents and investments is in anticipation of the completion of our previously announced acquisitions of WebEx and IronPort.

As of April 28, 2007, approximately \$5.6 billion of our cash and cash equivalents and investments was held in the United States. The remainder of our cash and cash equivalents and investments was held outside of the United States in various foreign subsidiaries. If these cash and cash equivalents and investments were distributed to the United States in the form of dividends or otherwise, we would be subject to additional U.S. income taxes (subject to an adjustment for foreign tax credits) and foreign withholding taxes.

We expect that cash provided by operating activities may fluctuate in future periods as a result of a number of factors, including fluctuations in our operating results, shipment linearity, accounts receivable collections, inventory and supply chain management, excess tax benefits from share-based compensation, and the timing and amount of tax and other payments. For additional discussion, see Part II, Item 1A. Risk Factors below.

Table of ContentsAccounts Receivable, Net

The following table summarizes our accounts receivable, net (in millions, except DSO):

	April 28, 2007	July 29, 2006	Increase (Decrease)
Accounts receivable, net	\$ 3,238	\$ 3,303	\$ (65)
DSO	33	38	(5)

The rate at which products are shipped during a quarter, which we refer to as shipment linearity, and the rate at which we collect payments, affect our DSO. The decrease in DSO was a result of improved shipment linearity.

Inventories and Purchase Commitments with Contract Manufacturers and Suppliers

The following table summarizes our inventories and purchase commitments with contract manufacturers and suppliers (in millions, except annualized inventory turns):

	April 28, 2007	July 29, 2006	Increase (Decrease)
Inventories			
Raw materials	\$ 175	\$ 131	\$ 44
Work in process	117	377	(260)
Finished goods:			
Distributor inventory and deferred cost of sales	474	423	51
Manufacturing finished goods	278	236	42
Total finished goods	752	659	93
Service-related spares	210	170	40
Demonstration systems	35	34	1
Total	\$ 1,289	\$ 1,371	\$ (82)
Annualized inventory turns	8.8	8.5	0.3
Purchase commitments	\$ 2,554	\$ 1,979	\$ 575

Inventories decreased as a result of increased activity in our ongoing transition to the lean manufacturing model, which primarily resulted in a decrease in work in process inventory. Our finished goods consist of distributor inventory and deferred cost of sales and manufacturing finished goods. Distributor inventory and deferred cost of sales are related to unrecognized revenue on shipments to distributors and retail partners and shipments to customers. Manufacturing finished goods consist primarily of build-to-order and build-to-stock products. Service-related spares consist of reusable equipment related to our technical support and warranty activities. All inventories are accounted for at the lower of cost or market. The valuation of inventory requires us to write down inventory based on excess and obsolete inventories determined primarily by future demand forecasts. Inventory write-downs are measured as the difference between the cost of the inventory and market based upon assumptions about future demand and are charged to the provision for inventory, which is a component of our cost of sales.

We purchase components from a variety of suppliers and use several contract manufacturers to provide manufacturing services for our products. During the normal course of business, in order to manage manufacturing lead times and help ensure adequate component supply, we enter into agreements with contract manufacturers and suppliers that either allow them to procure inventory based upon criteria as defined by us or that establish the parameters defining our requirements. In certain instances, these agreements allow us the option to cancel, reschedule, and adjust our requirements based on our business needs prior to firm orders being placed. Consequently, only a portion of our reported purchase commitments arising from these agreements are firm, noncancelable, and unconditional commitments. The purchase commitments for inventory are expected to be fulfilled within one year. We record a liability, included in other accrued liabilities in our Consolidated Balance Sheets, for firm, noncancelable, and unconditional purchase commitments for quantities in excess of our future demand forecasts consistent with the

valuation of our inventory.

In the third quarter of fiscal 2006, we began the initial implementation of the lean manufacturing model. We expect to complete our

Table of Contents

implementation of the lean manufacturing model in early fiscal 2008. Over time, consistent with what we have experienced thus far, we expect this process will result in incremental increases in purchase commitments with contract manufacturers and suppliers and increases in inventory turns. Upon completion of the implementation, we expect combined levels of inventory and purchase commitments to decrease relative to revenue to the extent manufacturing efficiency improves. The increase in purchase commitments is due to increased sales volume and the impact of our transition to the lean manufacturing model.

Inventory and supply chain management remains an area of focus as we balance the need to maintain supply chain flexibility to ensure competitive lead times with the risk of inventory obsolescence because of rapidly changing technology and customer requirements. We believe the amount of our inventory and purchase commitments are appropriate for our revenue levels.

Long-Term Debt

The following table summarizes our long-term debt (in millions):

	April 28, 2007	July 29, 2006	Increase (Decrease)
Senior notes:			
Floating-rate notes, due 2009	\$ 500	\$ 500	\$
5.25% fixed-rate notes, due 2011	3,000	3,000	
5.50% fixed-rate notes, due 2016	3,000	3,000	
Total senior notes	6,500	6,500	
Other notes	5	5	
Unamortized discount	(17)	(18)	1
Fair value adjustment	(10)	(155)	145
Total	\$ 6,478	\$ 6,332	\$ 146

In February 2006, we issued \$500 million of senior floating interest rate notes due 2009 (the 2009 Notes), \$3.0 billion of 5.25% senior notes due 2011 (the 2011 Notes), and \$3.0 billion of 5.50% senior notes due 2016 (the 2016 Notes), for an aggregate principal amount of \$6.5 billion. The debt issuance was used to fund the acquisition of Scientific-Atlanta and for general corporate purposes. The 2011 Notes and the 2016 Notes are redeemable by us at any time, subject to a make-whole premium. To achieve our interest rate objectives, we entered into \$6.0 billion notional amount of interest rate swaps. In effect, these swaps convert the fixed interest rates of the 2011 Notes and the 2016 Notes to floating interest rates based on LIBOR. Gains and losses in the fair value of the interest rate swaps offset changes in the fair value of the underlying debt. See Note 8 to the Consolidated Financial Statements. We were in compliance with all debt covenants as of April 28, 2007.

Deferred Revenue

The following table presents the breakdown of deferred revenue (in millions):

	April 28, 2007	July 29, 2006	Increase (Decrease)
Service	\$ 4,392	\$ 4,088	\$ 304
Product	1,947	1,561	386
Total	\$ 6,339	\$ 5,649	\$ 690
Reported as:			
Current	\$ 4,854	\$ 4,408	\$ 446
Noncurrent	1,485	1,241	244

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

Total	\$ 6,339	\$ 5,649	\$ 690
-------	----------	----------	--------

The increase in deferred service revenue reflects an increase in the volume of technical support contract initiations and renewals partially offset by ongoing amortization of deferred service revenue. The increase in deferred product revenue was related to shipments not having met revenue recognition criteria partially offset by the timing of cash receipts related to unrecognized revenue from two-tier distributors.

Table of Contents

Contractual Obligations

Operating Leases

We lease office space in several U.S. locations. Outside the United States, larger sites include Australia, Belgium, Canada, China, France, Germany, India, Italy, Japan, and the United Kingdom. The future minimum lease payments under all our noncancelable operating leases with an initial term in excess of one year as of April 28, 2007 were \$1.5 billion. For additional information see Note 8 to the Consolidated Financial Statements.

Nuova Systems, Inc.

In the first quarter of fiscal 2007, we made an investment in Nuova Systems, Inc. (Nuova Systems), which conducts research and development on data center-related products. This investment includes \$50 million of funding and a license to certain of our technology. As a result of this investment, we own approximately 80% of Nuova Systems and have consolidated the results of Nuova Systems in our Consolidated Financial Statements beginning in the first quarter of fiscal 2007. In April 2007, the agreements were amended to add additional product development activities to be undertaken by Nuova Systems. Upon the occurrence of certain events, we have committed up to \$62 million of additional funding, which amount was increased by the April 2007 amendment from up to \$42 million.

In connection with this investment, Nuova Systems and we have entered into a call option agreement that provides us with the right to purchase the remaining interests of approximately 20% in Nuova Systems. If the call option is exercised by us, the minority interest holders would be eligible to receive three milestone payments, revised from two milestone payments by the April 2007 amendment, based on agreed formulas. The amounts due under the milestone payments will be recognized by us when it is determined that the exercise of the call option is probable. These amounts will be recorded as compensation expense based on an estimate of the fair value of the amounts that could be earned by the minority interest holders pursuant to a vesting schedule. Subsequent changes to the fair value of the amounts probable of being earned and the continued vesting will result in adjustments to the recorded compensation expense. If we exercise the call option, the potential amount recorded as compensation expense would be up to a maximum of \$678 million, which amount was increased by the April 2007 amendment from up to a maximum of \$578 million due to additional employees required to perform the additional product development.

Other Commitments

We have entered into an agreement to invest approximately \$800 million in venture funds managed by SOFTBANK that are required to be funded on demand. The total commitment is to be invested in venture funds and as senior debt with entities as directed by SOFTBANK. Our commitment to fund the senior debt is contingent upon the achievement of certain agreed-upon milestones. As of April 28, 2007, we had invested \$606 million in the venture funds pursuant to the commitment, compared to \$523 million as of July 29, 2006. In addition, as of April 28, 2007 and July 29, 2006, we had invested \$49 million in the senior debt pursuant to the commitment, all of which has been repaid.

We also have certain other funding commitments related to our privately held investments that are based on the achievement of certain agreed-upon milestones. The remaining funding commitments were approximately \$60 million as of April 28, 2007, compared to approximately \$34 million as of July 29, 2006.

Off-Balance Sheet Arrangements

We consider our investments in unconsolidated variable interest entities to be off-balance sheet arrangements. In the ordinary course of business, we have investments in privately held companies and provide financing to certain customers through our wholly owned subsidiaries, which may be considered to be variable interest entities. We have evaluated our investments in these privately held companies and customer financings and have determined that there were no significant unconsolidated variable interest entities as of April 28, 2007.

Certain events can require a reassessment of our investments in privately held companies or customer financings to determine if they are variable interest entities and if we would be regarded as the primary beneficiary. As a result of such events, we may be required to make additional disclosures or consolidate these entities. Because we may not control these entities, we may not have the ability to influence these events.

Stock Repurchase Program

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

In September 2001, our Board of Directors authorized a stock repurchase program. As of April 28, 2007, our Board of Directors had authorized an aggregate repurchase of up to \$47 billion of common stock under this program and the remaining authorized repurchase amount was \$5.3 billion with no termination date. The stock repurchase activity under the stock repurchase program during the first nine months of fiscal 2007 is summarized as follows (in millions, except per-share amounts):

Table of Contents

	Shares Repurchased	Weighted- Average Price per Share	Amount Repurchased
Nine Months Ended April 28, 2007			
Cumulative balance at July 29, 2006	1,931	\$ 18.36	\$ 35,448
Repurchase of common stock	243	25.85	6,281
Cumulative balance at April 28, 2007	2,174	\$ 19.20	\$ 41,729

The purchase price for the shares of our common stock repurchased was reflected as a reduction to shareholders' equity. In accordance with Accounting Principles Board Opinion No. 6, Status of Accounting Research Bulletins, we are required to allocate the purchase price of the repurchased shares as (i) a reduction to retained earnings until retained earnings are zero and then as an increase to accumulated deficit and (ii) a reduction of common stock and additional paid-in capital. Issuance of common stock and the tax benefit related to employee stock incentive plans are recorded as an increase to common stock and additional paid-in capital. As a result of future repurchases, we may continue to report an accumulated deficit included in shareholders' equity in our Consolidated Balance Sheets. Our accumulated deficit as of April 28, 2007 is a result of the accounting effect of stock repurchases and is not reflective of our financial performance or our liquidity.

Liquidity and Capital Resource Requirements

Based on past performance and current expectations, we believe our cash and cash equivalents, investments, and cash generated from operations and our ability to access capital markets will satisfy our working capital needs, capital expenditures, investment requirements, stock repurchases, contractual obligations, commitments (see Note 8 to the Consolidated Financial Statements), future customer financings, and other liquidity requirements associated with our operations through at least the next 12 months. We believe that the most strategic uses of our cash resources include repurchase of shares, strategic investments to gain access to new technologies, acquisitions, customer financing activities, and working capital. There are no other transactions, arrangements, or other relationships with unconsolidated entities or other persons that are reasonably likely to materially affect liquidity or the availability of our requirements for capital resources.

Table of Contents**Item 3. Quantitative and Qualitative Disclosures About Market Risk****Investments**

We maintain an investment portfolio of various holdings, types, and maturities. See Note 6 to the Consolidated Financial Statements. As of April 28, 2007, these securities are classified as available-for-sale and consequently are recorded in the Consolidated Balance Sheets at fair value with unrealized gains or losses, to the extent unhedged, reported as a separate component of accumulated other comprehensive income, net of tax.

Fixed Income Securities

At any time, a sharp rise in interest rates could have a material adverse impact on the fair value of our fixed income investment portfolio. Conversely, declines in interest rates could have a material adverse impact on interest income for our investment portfolio. Our fixed income instruments are not leveraged as of April 28, 2007, and are held for purposes other than trading.

Publicly Traded Equity Securities

The values of our equity investments in several publicly traded companies are subject to market price volatility. The following tables present the hypothetical fair values of publicly traded equity securities as a result of selected potential decreases and increases in the price of each equity security in the portfolio, excluding hedged equity securities. Potential fluctuations in the price of each equity security in the portfolio of plus or minus 10%, 20%, and 30% were selected based on potential near-term changes in those security prices. The hypothetical fair values as of April 28, 2007 are as follows (in millions):

	Valuation of Securities Given an X% Decrease in Each Stock's Price			Fair Value As of April 28, 2007	Valuation of Securities Given an X% Increase in Each Stock's Price		
	(30%)	(20%)	(10%)		10%	20%	30%
Publicly traded equity securities	\$ 645	\$ 738	\$ 830	\$ 922	\$ 1,014	\$ 1,106	\$ 1,199

Our equity portfolio consists of securities with characteristics that most closely match the Standard & Poor's 500 Index or NASDAQ Composite Index. These equity securities are held for purposes other than trading. There were no impairment charges on publicly traded equity securities during the first nine months of fiscal 2007 or fiscal 2006.

Investments in Privately Held Companies

We have invested in privately held companies, some of which are in the startup or development stages. These investments are inherently risky because the markets for the technologies or products these companies are developing are typically in the early stages and may never materialize. We could lose our entire initial investment in these companies. These investments are primarily carried at cost, which as of April 28, 2007 was \$641 million, compared with \$574 million at July 29, 2006, and are recorded in other assets in the Consolidated Balance Sheets. Our impairment charges on investments in privately held companies were not material.

Our evaluation of investments in private and public companies is based on the fundamentals of the businesses, including, among other factors, the nature of their technologies and potential for financial return.

Long-Term Debt

At any time, a sharp fall in interest rates could have a material adverse impact on the fair value of \$6.0 billion of our fixed-rate debt. Conversely, a sharp rise in interest rates could have a material favorable impact. We have entered into \$6.0 billion notional amount of interest rate swaps designated as fair value hedges, and gains and losses in the fair value of these swaps offset changes in the fair value of the fixed-rate debt. In effect, these swaps convert the fixed interest rates to floating interest rates based on LIBOR. A sharp change in rates would not have a material impact on the fair value of our \$500 million variable-rate debt.

A sharp rise in short-term interest rates could have a material adverse impact on interest expense, while a sharp fall in short-term rates could have a material favorable impact. To mitigate these impacts, we presently invest a portion of our interest-bearing assets in instruments with similar interest rate characteristics as the swapped debt.

Table of Contents**Derivative Instruments***Foreign Currency Derivatives*

Our foreign exchange forward and option contracts are summarized as follows (in millions):

	April 28, 2007		July 29, 2006	
	Notional Amount	Fair Value	Notional Amount	Fair Value
Forward contracts:				
Purchased	\$ 1,447	\$ 3	\$ 1,376	\$ (2)
Sold	\$ 535	\$ (10)	\$ 554	\$ (3)
Option contracts:				
Purchased	\$ 303	\$ 19	\$ 591	\$ 20
Sold	\$ 299	\$ (1)	\$ 573	\$ (2)

We enter into foreign exchange forward contracts to reduce the short-term effects of foreign currency fluctuations on receivables, investments, and payables, primarily denominated in Australian, Canadian, Japanese, and several European currencies, including the euro and British pound. Our market risks associated with our foreign currency receivables, investments, and payables relate primarily to variances from our forecasted foreign currency transactions and balances.

The impact of foreign currency fluctuations on sales has not been material because our sales are primarily denominated in U.S. dollars. Approximately 75% of our operating expenses are U.S.-dollar denominated. To reduce variability in operating expenses caused by the remaining non-U.S.-dollar denominated operating expenses, we periodically hedge certain foreign currency forecasted transactions with currency options and forward contracts with maturities up to 18 months. These hedging programs are not designed to provide foreign currency protection over longer time horizons. In designing a specific hedging approach, we consider several factors, including offsetting exposures, significance of exposures, costs associated with entering into a particular hedge instrument, and potential effectiveness of the hedge. The gains and losses on foreign exchange contracts mitigate the variability in operating expenses associated with currency movements. Primarily because of our limited currency exposure to date, the effect of foreign currency fluctuations has not been material to our Consolidated Financial Statements. The effect of foreign currency fluctuations, net of hedging, increased total research and development, sales and marketing, and general and administrative expenses by approximately 1.2% and 1.0% in the third quarter and first nine months of fiscal 2007, respectively, compared with the third quarter and first nine months of fiscal 2006.

Our foreign exchange forward contracts related to current assets and liabilities generally range from one to three months in original maturity. Additionally, we have entered into foreign exchange forward contracts related to long-term customer financings with maturities of up to two years. The foreign exchange forward contracts related to investments generally have maturities of less than one year. We do not enter into foreign exchange forward or option contracts for trading purposes. We do not expect gains or losses on these derivative instruments to have a material impact on our financial results. See Note 8 to the Consolidated Financial Statements.

Interest Rate Derivatives

Our interest rate derivatives are summarized as follows (in millions):

	April 28, 2007		July 29, 2006	
	Notional Amount	Fair Value	Notional Amount	Fair Value
Interest rate derivatives:				
Interest rate swaps- investments	\$ 1,000	\$ 26	\$ 1,000	\$ 45
Interest rate swap- long-term debt	\$ 6,000	\$ (10)	\$ 6,000	\$ (155)

Our primary objective for holding fixed income securities is to achieve an appropriate investment return consistent with preserving principal and managing risk. To realize these objectives, we may utilize interest rate swaps or other derivatives designated as fair value or cash flow hedges. We have entered into \$1.0 billion of interest rate swaps designated as fair value hedges of our investment portfolio. Under these interest rate swap contracts, we make fixed-rate interest payments and receive interest payments based on LIBOR. The effect of these swaps is to convert

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

fixed-rate returns to floating-rate returns based on LIBOR for a portion of our fixed income portfolio. The gains and losses related to changes in the value of the interest rate swaps are included in other income, net, in

Table of Contents

the Consolidated Statements of Operations and offset the changes in fair value of the underlying hedged investment. The fair values of the interest rate swaps designated as hedges of our investments were reflected in prepaid expenses and other current assets in the Consolidated Balance Sheets.

In conjunction with our issuance of fixed-rate senior notes in February 2006, we entered into \$6.0 billion of interest rate swaps designated as fair value hedges of our fixed-rate debt. Under these interest rate swap contracts, we receive fixed-rate interest payments and make interest payments based on LIBOR. The effect of these swaps is to convert fixed-rate interest expense to floating-rate interest expense based on LIBOR. The gains and losses related to changes in the value of the interest rate swaps are included in other income, net, in the Consolidated Statements of Operations and offset the changes in fair value of the underlying debt. The fair values of the interest rate swaps designated as hedges of our debt were reflected in other long-term liabilities in the Consolidated Balance Sheets.

Equity Derivatives

Our equity derivatives are summarized as follows (in millions):

	April 28, 2007		July 29, 2006	
	Notional Amount	Fair Value	Notional Amount	Fair Value
Equity derivatives:				
Forward sale and option agreements	\$ 198	\$ 10	\$ 164	\$ 93

We maintain a portfolio of publicly traded equity securities which are subject to price risk. We may hold equity securities for strategic purposes or to diversify our overall investment portfolio. To manage our exposure to changes in the fair value of certain equity securities, we may, from time to time, enter into equity derivative contracts. As of April 28, 2007, we have entered into forward sale and option agreements on certain publicly traded equity securities designated as fair value hedges. The gains and losses due to changes in the value of the hedging instruments are included in other income, net, in the Consolidated Statements of Operations and offset the change in the fair value of the underlying hedged investment. The fair values of the equity derivatives were reflected in prepaid expenses and other current assets and other accrued liabilities in the Consolidated Balance Sheets.

Item 4. Controls and Procedures

Evaluation of disclosure controls and procedures. Based on our management's evaluation (with the participation of our principal executive officer and principal financial officer), as of the end of the period covered by this report, our principal executive officer and principal financial officer have concluded that our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended, (the Exchange Act)) are effective to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms and is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in internal control over financial reporting. There was no change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during our third quarter of fiscal 2007 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION**Item 1. Legal Proceedings**

We and other defendants were subject to patent claims asserted by QPSX Developments 5 Pty Ltd (now known as Ipernica Ltd) against us and such other defendants on June 21, 2005 in the United States District Court for the Eastern District of Texas. QPSX alleged that various Cisco switches and routers infringed United States Patent No. 5,689,499 and sought damages and injunctive relief. On April 10, 2007, prior to trial, we and QPSX settled our dispute on terms that are not material to us, and the lawsuit was dismissed with prejudice on May 2, 2007.

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

We and other defendants were subject to claims asserted by Telcordia Technologies, Inc. on July 16, 2004 in the Federal District Court for the District of Delaware alleging that various Cisco routers, switches and optical products infringed United States Patent Nos. 4,893,306, 4,835,763 and Re 36,633. Telcordia sought damages and injunctive relief. The Court ruled that, as a matter of law, we do not infringe Patent No. 4,893,306. After conclusion of a trial, on May 10, 2007, a jury found that infringement had occurred and awarded damages in an amount that is not material to us. We intend to ask the Court to reverse the verdict as a matter of law, and if necessary, intend to appeal the decision. Telcordia also has the right to appeal the jury finding. We believe that the ultimate outcome of this matter and aggregate potential damages are not likely to be material.

Table of Contents

In September 2005, Scientific-Atlanta, Inc. (which subsequently was acquired by us) and another plaintiff filed a declaratory judgment action against Forgent Networks in the United States District Court for the Eastern District of Texas after Forgent sued various Scientific-Atlanta customers. In the action, Scientific-Atlanta asserted that its products did not infringe Forgent's United States Patent No. 6,285,746 and that the patent was invalid. On October 20, 2005, Forgent responded to the complaint and alleged that various Scientific-Atlanta digital video recorders infringed the patent and sought damages and injunctive relief. Subsequent to that, another declaratory judgment plaintiff moved to intervene and the cases were combined. On April 25, 2007, prior to trial, Scientific-Atlanta and Forgent settled their dispute on terms that are not material to us, and the lawsuits were dismissed with prejudice on April 30, 2007.

For information regarding legal proceedings terminated during prior quarters of fiscal 2007, see Part II, Item 1. (Legal Proceedings) in our Quarterly Report on Form 10-Q for the quarter ended January 27, 2007.

In addition, we are subject to legal proceedings, claims, and litigation arising in the ordinary course of business, including intellectual property litigation. While the outcome of these matters is currently not determinable, we do not expect that the ultimate costs to resolve these matters will have a material adverse effect on our consolidated financial position, results of operations, or cash flows. For additional information regarding intellectual property litigation, see Part II, Item 1A. Risk Factors We may be found to infringe on intellectual property rights of others herein.

Table of Contents

Item 1A. Risk Factors

Set forth below and elsewhere in this report and in other documents we file with the Securities and Exchange Commission (SEC) are descriptions of the risks and uncertainties that could cause our actual results to differ materially from the results contemplated by the forward-looking statements contained in this report. The description below includes any material changes to and supersedes the description of the risk factors affecting our business previously disclosed in Part I, Item 1A. Risk Factors of our Annual Report on Form 10-K for the fiscal year ended July 29, 2006.

OUR OPERATING RESULTS MAY FLUCTUATE IN FUTURE PERIODS, WHICH MAY ADVERSELY AFFECT OUR STOCK PRICE

Our operating results have been in the past, and will continue to be, subject to quarterly and annual fluctuations as a result of numerous factors. These factors include:

Fluctuations in demand for our products and services, especially with respect to Internet businesses and telecommunications service providers, in part due to changes in the global economic environment

Changes in sales and implementation cycles for our products and reduced visibility into our customers' spending plans and associated revenue

Our ability to maintain appropriate inventory levels and purchase commitments

Price and product competition in the communications and networking industries, which can change rapidly due to technological innovation and different business models from various geographic regions

The overall movement toward industry consolidation among both our competitors and our customers

The introduction and market acceptance of new technologies and products and our success in new markets, including emerging and advanced technologies, as well as the adoption of new networking standards

Variations in sales channels, product costs, or mix of products sold

The timing, size, and mix of orders from customers

Manufacturing and customer lead times

Fluctuations in our gross margins, and the factors that contribute to this as described below

Our ability to achieve targeted cost reductions

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

The ability of our customers, channel partners, and suppliers to obtain financing or to fund capital expenditures

The timing and amount of employer payroll tax to be paid on our employees' gains on stock options exercised

Actual events, circumstances, outcomes, and amounts differing from judgments, assumptions, and estimates used in determining the values of certain assets (including the amounts of related valuation allowances), liabilities, and other items reflected in our Consolidated Financial Statements

How well we execute on our strategy and operating plans

Benefits anticipated from our investments in engineering, sales and manufacturing activities

Changes in accounting rules, such as recording expenses for employee stock option grants and changes in tax accounting principles. As a consequence, operating results for a particular future period are difficult to predict, and, therefore, prior results are not necessarily indicative of results to be expected in future periods. Any of the foregoing factors, or any other factors discussed elsewhere herein, could have a material adverse effect on our business, results of operations, and financial condition that could adversely affect our stock price.

Table of Contents

OUR OPERATING RESULTS MAY BE ADVERSELY AFFECTED BY UNFAVORABLE ECONOMIC AND MARKET CONDITIONS AND THE UNCERTAIN GEOPOLITICAL ENVIRONMENT

Economic conditions worldwide have from time to time contributed to slowdowns in the communications and networking industries at large, as well as to specific segments and markets in which we operate, resulting in:

Reduced demand for our products as a result of continued constraints on information technology-related capital spending by our customers, particularly service providers, and other customer markets as well

Increased price competition for our products, not only from our competitors but also as a consequence of customers disposing of unutilized products

Risk of excess and obsolete inventories

Excess facilities and manufacturing capacity

Higher overhead costs as a percentage of revenue and higher interest expense

Recent turmoil in the geopolitical environment in many parts of the world, including terrorist activities and military actions, particularly the continuing tension in and surrounding Iraq, and changes in energy costs may continue to put pressure on global economic conditions. Our operating results in one or more segments may also be affected by changing economic conditions particularly germane to that segment or to particular customer markets within that segment. If global economic and market conditions, or economic conditions in the United States or other key markets, deteriorate, we may experience material impacts on our business, operating results, and financial condition.

OUR REVENUE FOR A PARTICULAR PERIOD IS DIFFICULT TO PREDICT, AND A SHORTFALL IN REVENUE MAY HARM OUR OPERATING RESULTS

As a result of a variety of factors discussed in this report, our revenue for a particular quarter is difficult to predict. Our net sales may grow at a slower rate than in past periods, or may decline. Our ability to meet financial expectations could also be adversely affected if the nonlinear sales pattern seen in some of our past quarters recurs in future periods. We have experienced periods of time during which shipments have exceeded net bookings, or manufacturing issues have delayed shipments, leading to nonlinearity in shipping patterns. In addition to making it difficult to predict revenue for a particular period, nonlinearity in shipping can increase costs, because irregular shipment patterns result in periods of underutilized capacity and periods in which overtime expenses may be incurred, as well as leading to additional costs arising out of inventory management. In addition, to the extent that manufacturing issues and any related component shortages result in delayed shipments in the future, and particularly in periods in which we and our contract manufacturers are operating at higher levels of capacity, it is possible that revenue for a quarter could be adversely affected if such matters occur and are not remediated within the same quarter.

In addition, to improve customer satisfaction, we continue to attempt to improve our manufacturing lead-time performance, which may result in corresponding reductions in order backlog. A decline in backlog levels could result in more variability and less predictability in our quarter-to-quarter net sales and operating results. Long manufacturing lead times have caused our customers in the past to place the same order multiple times within our various sales channels and to cancel the duplicative orders upon receipt of the product, or to place orders with other vendors with shorter manufacturing lead times. Such multiple ordering (along with other factors) may cause difficulty in predicting our sales and, as a result, could impair our ability to manage parts inventory effectively.

We plan our operating expense levels based primarily on forecasted revenue levels. These expenses and the impact of long-term commitments are relatively fixed in the short term. A shortfall in revenue could lead to operating results being below expectations because we may not be able to quickly reduce these fixed expenses in response to short-term business changes.

Any of the above factors could have a material adverse impact on our operations and financial results.

WE EXPECT GROSS MARGIN TO VARY OVER TIME, AND OUR LEVEL OF PRODUCT GROSS MARGIN MAY NOT BE SUSTAINABLE

Our level of product gross margins may not be sustainable and may continue to be adversely affected by numerous factors, including:

Changes in customer, geographic, or product mix, including mix of configurations within each product group

Table of Contents

Introduction of new products, including products with price-performance advantages

Our ability to reduce production costs

Entry into new markets, including markets with different pricing and cost structures, through acquisitions, such as our acquisition of Scientific-Atlanta or internal development

Sales discounts

Increases in material or labor costs

Excess inventory and inventory holding charges

Obsolescence charges

Changes in shipment volume

Loss of cost savings due to changes in component pricing or charges incurred due to inventory holding periods if parts ordering does not correctly anticipate product demand

Lower than expected benefits from value engineering

Increased price competition, including competitors from Asia, especially China

Changes in distribution channels

Increased warranty costs

How well we execute on our strategy and operating plans

Changes in service gross margin may result from various factors such as changes in the mix between technical support services and advanced services, as well as the timing of technical support service contract initiations and renewals and the addition of personnel and other resources to support higher levels of service business in future periods.

DISRUPTION OF OR CHANGES IN OUR DISTRIBUTION MODEL COULD HARM OUR SALES AND MARGINS

If we fail to manage distribution of our products and services properly, or if our distributors' financial condition or operations weaken, our revenue and gross margins could be adversely affected.

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

A substantial portion of our products and services is sold through our channel partners and the remainder is sold through direct sales. Our channel partners include systems integrators, service providers, other resellers, distributors, and retail partners. Systems integrators and service providers typically sell directly to end users and often provide system installation, technical support, professional services, and other support services in addition to network equipment sales. Systems integrators also typically integrate our products into an overall solution, and a number of service providers are also systems integrators. Distributors stock inventory and typically sell to systems integrators, service providers, and other resellers. In addition, home networking products are generally sold through distributors and retail partners. We refer to sales through distributors and retail partners as our two-tier system of sales to the end customer. Revenue from distributors and retail partners is recognized based on a sell-through method using information provided by them. These distributors and retail partners are generally given business terms that allow them to return a portion of inventory, receive credits for changes in selling prices, and participate in various cooperative marketing programs. If sales through indirect channels increase, this may lead to greater difficulty in forecasting the mix of our products and, to a degree, the timing of orders from our customers.

Historically, we have seen fluctuations in our gross margins based on changes in the balance of our distribution channels. Although variability to date has not been significant, there can be no assurance that changes in the balance of our distribution model in future periods would not have an adverse effect on our gross margins and profitability.

Some factors could result in disruption of or changes in our distribution model, which could harm our sales and margins, including the following:

We compete with some of our channel partners through our direct sales, which may lead these channel partners to use other suppliers that do not directly sell their own products

Table of Contents

Some of our channel partners may demand that we absorb a greater share of the risks that their customers may ask them to bear

Some of our channel partners may have insufficient financial resources and may not be able to withstand changes in business conditions

OUR INVENTORY MANAGEMENT RELATING TO OUR SALES TO OUR TWO-TIER DISTRIBUTION CHANNEL IS COMPLEX, AND EXCESS INVENTORY MAY HARM OUR GROSS MARGINS

We must manage our inventory relating to sales to our distributors and retail partners effectively, because inventory held by them could affect our results of operations. Our distributors and retail partners may increase orders during periods of product shortages, cancel orders if their inventory is too high, or delay orders in anticipation of new products. They also may adjust their orders in response to the supply of our products and the products of our competitors that are available to them and in response to seasonal fluctuations in end-user demand. Revenue to our distributors and retail partners is recognized based on a sell-through method using information provided by them, and they are generally given business terms that allow them to return a portion of inventory, receive credits for changes in selling price, and participate in various cooperative marketing programs. Inventory management remains an area of focus as we balance the need to maintain strategic inventory levels to ensure competitive lead times against the risk of inventory obsolescence because of rapidly changing technology and customer requirements. If we ultimately determine that we have excess inventory, we may have to reduce our prices and write-down inventory, which in turn could result in lower gross margins.

SALES TO THE SERVICE PROVIDER MARKET ARE ESPECIALLY VOLATILE, AND WEAKNESS IN SALES ORDERS FROM THIS INDUSTRY MAY HARM OUR OPERATING RESULTS AND FINANCIAL CONDITION

Sales to the service provider market have been characterized by large and often sporadic purchases, especially relating to our router sales and sales of certain of our advanced technologies, in addition to longer sales cycles. We have experienced significant weakness in sales to service providers over certain extended periods of time as market conditions have fluctuated. Sales activity in this industry depends upon the stage of completion of expanding network infrastructures; the availability of funding; and the extent to which service providers are affected by regulatory, economic, and business conditions in the country of operations. Although some service providers may have increased capital expenditures over the depressed levels that have prevailed over the last few years, weakness in orders from this industry could have a material adverse effect on our business, operating results, and financial condition. Slowdowns in the general economy, overcapacity, changes in the service provider market, regulatory developments, and constraints on capital availability have had a material adverse effect on many of our service provider customers, with many of these customers going out of business or substantially reducing their expansion plans. These conditions have materially harmed our business and operating results, and we expect that some or all of these conditions may continue for the foreseeable future. Finally, service provider customers typically have longer implementation cycles; require a broader range of services including design services; demand that vendors take on a larger share of risks; often require acceptance provisions, which can lead to a delay in revenue recognition; and expect financing from vendors. All these factors can add further risk to business conducted with service providers.

A SHORTAGE OF ADEQUATE COMPONENT SUPPLY OR MANUFACTURING CAPACITY COULD INCREASE OUR COSTS OR CAUSE A DELAY IN OUR ABILITY TO FULFILL ORDERS, AND OUR FAILURE TO ESTIMATE CUSTOMER DEMAND PROPERLY MAY RESULT IN EXCESS OR OBSOLETE COMPONENT SUPPLY, WHICH COULD ADVERSELY AFFECT OUR GROSS MARGINS

Our growth and ability to meet customer demands depend in part on our ability to obtain timely deliveries of parts from our suppliers and contract manufacturers. We have experienced component shortages in the past, including shortages caused by manufacturing process issues, that have affected our operations. We may in the future experience a shortage of certain component parts as a result of our own manufacturing issues, manufacturing issues at our suppliers or contract manufacturers, capacity problems experienced by our suppliers or contract manufacturers, or strong demand in the industry for those parts, especially if the economy grows. Growth in the economy is likely to create greater pressures on us and our suppliers to accurately project overall component demand and component demands within specific product categories and to establish optimal component levels. If shortages or delays persist, the price of these components may increase, or the components may not be available at all, and we may also encounter shortages if we do not accurately anticipate our needs. We may not be able to secure enough components at reasonable prices or of acceptable quality to build new products in a timely manner in the quantities or configurations needed. Accordingly, our revenue and gross margins could suffer until other sources can be developed. Our operating results would also be adversely affected if, anticipating greater demand than actually develops, we commit to the purchase of more components than we need. There can be no assurance that we will not encounter these problems in the future. Although in many cases we use standard parts and components for our products, certain components are presently available only from a single source or limited sources. We may not be able to diversify sources in a timely manner, which could harm our ability to deliver products to customers and seriously impact present and future sales.

Table of Contents

We believe that we may be faced with the following challenges in the future:

New markets in which we participate may grow quickly, which may make it difficult to quickly obtain significant component capacity

As we acquire companies and new technologies, we may be dependent, at least initially, on unfamiliar supply chains or relatively small supply partners

We face competition for certain components, which are supply-constrained, from existing competitors and companies in other markets

Manufacturing capacity and component supply constraints, including those caused by any possible disruption related to our implementation of the lean manufacturing model, could be significant issues for us. We purchase components from a variety of suppliers and use several contract manufacturers to provide manufacturing services for our products. During the normal course of business, in order to improve manufacturing lead-time performance and to help ensure adequate component supply, we enter into agreements with contract manufacturers and suppliers that either allow them to procure inventory based upon criteria as defined by us or that establish the parameters defining our requirements. In certain instances, these agreements allow us the option to cancel, reschedule, and adjust our requirements based on our business needs prior to firm orders being placed. If we fail to anticipate customer demand properly, an oversupply of parts could result in excess or obsolete components that could adversely affect our gross margins. For additional information regarding our purchase commitments, see Note 8 to the Consolidated Financial Statements.

A reduction or interruption in supply; a significant increase in the price of one or more components; a failure to adequately authorize procurement of inventory by our contract manufacturers; a failure to appropriately cancel, reschedule, or adjust our requirements based on our business needs; or a decrease in demand for our products could materially adversely affect our business, operating results, and financial condition and could materially damage customer relationships. Furthermore, as a result of binding price or purchase commitments with suppliers, we may be obligated to purchase components at prices that are higher than those available in the current market. In the event that we become committed to purchase components at prices in excess of the current market price when the components are actually used, our gross margins could decrease.

The fact that we do not own the bulk of our manufacturing facilities could have an adverse impact on the supply of our products and on our operating results. Financial problems of contract manufacturers on whom we rely, or reservation of manufacturing capacity by other companies, inside or outside of our industry, could either limit supply or increase costs.

Our key manufacturing facilities for Scientific-Atlanta's products are located in Juarez, Mexico, and we may be materially and adversely affected by any prolonged disruption in the operation of this facility.

THE MARKETS IN WHICH WE COMPETE ARE INTENSELY COMPETITIVE, WHICH COULD ADVERSELY AFFECT OUR REVENUE GROWTH

We compete in the networking and communications equipment markets, providing products and services for transporting data, voice, and video traffic across intranets, extranets, and the Internet. These markets are characterized by rapid change, converging technologies, and a migration to networking solutions that offer relative advantages. These market factors represent both an opportunity and a competitive threat to us. We compete with numerous vendors in each product category. The overall number of our competitors providing niche product solutions may increase. Also, the identity and composition of competitors may change as we increase our activity in our advanced technology markets. As we continue to expand our sales globally, we may see new competition in different geographic regions. In particular, we have experienced price-focused competition from competitors in Asia, especially China, and we anticipate this will continue.

Our competitors include 3Com; Alcatel-Lucent; Avaya; Avici Systems; Brocade Communications Systems, Inc.; Check Point Software Technologies; Ciena; D-Link Corporation; Dell; Enterasys Networks; Extreme Networks; F5 Networks, Inc.; Force10 Networks, Inc.; Foundry Networks; Fujitsu; Hewlett-Packard Company; Huawei Technologies; Juniper Networks; Motorola, Inc.; NETGEAR, Inc.; Nokia; Nortel Networks; Siemens AG; and Sycamore Networks; among others.

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

Some of these companies compete across many of our product lines, while others are primarily focused in a specific product area. Barriers to entry are relatively low, and new ventures to create products that do or could compete with our products are regularly formed. In addition, some of our competitors may have greater resources, including technical and engineering resources, than we do. As we expand into new markets, we will face competition not only from our existing competitors but also from other competitors, including existing companies with strong technological, marketing, and sales positions in those markets. We also sometimes face competition from resellers and distributors of our products. Companies with whom we have strategic alliances in some areas may be competitors in other areas.

Table of Contents

The principal competitive factors in the markets in which we presently compete and may compete in the future include:

The ability to provide a broad range of networking products and services

Product performance

Price

The ability to introduce new products, including products with price-performance advantages

The ability to reduce production costs

The ability to provide value-added features such as security, reliability, and investment protection

Conformance to standards

Market presence

The ability to provide financing

We also face competition from customers to whom we license or supply technology and suppliers from whom we transfer technology. The inherent nature of networking requires interoperability. As such, we must cooperate and at the same time compete with many companies. Any inability to effectively manage these complicated relationships with customers, suppliers, and strategic alliance partners could have a material adverse effect on our business, operating results, and financial condition and accordingly affect our chances of success.

WE DEPEND UPON THE DEVELOPMENT OF NEW PRODUCTS AND ENHANCEMENTS TO EXISTING PRODUCTS, AND IF WE FAIL TO PREDICT AND RESPOND TO EMERGING TECHNOLOGICAL TRENDS AND CUSTOMERS' CHANGING NEEDS, OUR OPERATING RESULTS AND MARKET SHARE MAY SUFFER

The markets for our products are characterized by rapidly changing technology, evolving industry standards, new product introductions, and evolving methods of building and operating networks. Our operating results depend on our ability to develop and introduce new products into existing and emerging markets and to reduce the production costs of existing products. We believe that the Internet and the various networks associated with it, including corporate intranets, cable, broadband and dialup networks, and voice and video networks will evolve to include embedded resources and the virtualization of applications and services to produce an integrated, intelligent system, or as we refer to it, an Intelligent Information Network. This is our vision for the evolution of networking from connectivity products to intelligent systems. Further, we believe the industry is evolving to enable personal and business process collaboration enabled by Web 2.0, the technologies that enable user collaboration, as part of the second major phase of the Internet. As such, many of our strategic initiatives and investments are aimed at meeting the requirements that a network capable of multiple party, collaborative interaction would demand, and the investments we have made and our architectural approach are designed to enable Web 2.0 and the increased use of the network as the platform for all forms of communications and information technology. The process of developing new technology is complex and uncertain, and if we fail to accurately predict customers' changing needs and emerging technological trends our business could be harmed. We must commit significant resources to developing new products before knowing whether our investments will result in products the market will accept. In particular, if our model of the evolution of networking from connectivity products to intelligent, collaborative systems does not emerge as we believe it will, or if the industry does not evolve as we believe it will, many of our strategic initiatives and investments may be of no or limited value. Furthermore, we may not execute successfully on that vision because of errors in product planning or timing, technical hurdles that we fail to overcome in a timely fashion, or a

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

lack of appropriate resources. This could result in competitors providing those solutions before we do and loss of market share, net sales, and earnings. The success of new products depends on several factors, including proper new product definition, component costs, timely completion and introduction of these products, differentiation of new products from those of our competitors, and market acceptance of these products. There can be no assurance that we will successfully identify new product opportunities, develop and bring new products to market in a timely manner, or achieve market acceptance of our products or that products and technologies developed by others will not render our products or technologies obsolete or noncompetitive. Specifically, the products and technologies that we identify as emerging technologies, such as Cisco TelePresence, or advanced technologies may not prove to have the market success we anticipate, and we may not successfully identify and invest in other emerging or advanced technologies.

WE ARE INCREASING OUR INVESTMENT IN ENGINEERING, SALES, AND MANUFACTURING ACTIVITIES AND THESE INVESTMENTS MAY ACHIEVE DELAYED, OR LOWER THAN EXPECTED, BENEFITS WHICH COULD HARM OUR OPERATING RESULTS

We intend to continue to add personnel and other resources to our engineering, sales and manufacturing functions as we focus on

Table of Contents

developing emerging technologies, the next wave of advanced technologies, growing the commercial market segment, capitalizing on our emerging market opportunities, enhancing our evolving support model and increasing our market share gains. We are likely to recognize the costs associated with these investments earlier than some of the anticipated benefits, and the return on these investments may be lower, or may develop more slowly, than we expect. If we do not achieve the benefits anticipated from these investments, or if the achievement of these benefits is delayed, our operating results may be adversely affected.

OUR BUSINESS SUBSTANTIALLY DEPENDS UPON THE CONTINUED GROWTH OF THE INTERNET AND INTERNET-BASED SYSTEMS

A substantial portion of our business and revenue depends on growth and evolution of the Internet and on the deployment of our products by customers who depend on the continued growth and evolution of the Internet. To the extent that an economic slowdown and reduction in capital spending adversely affect spending on Internet infrastructure, we could experience material harm to our business, operating results, and financial condition.

Because of the rapid introduction of new products and changing customer requirements related to matters such as cost-effectiveness and security, we believe that there could be certain performance problems with Internet communications in the future, which could receive a high degree of publicity and visibility. Because we are a large supplier of networking products, our business, operating results, and financial condition may be materially adversely affected, regardless of whether or not these problems are due to the performance of our own products. Such an event could also result in a material adverse effect on the market price of our common stock independent of direct effects on our business.

CHANGES IN INDUSTRY STRUCTURE AND MARKET CONDITIONS COULD LEAD TO CHARGES RELATED TO DISCONTINUANCES OF CERTAIN OF OUR PRODUCTS OR BUSINESSES AND ASSET IMPAIRMENTS

In response to changes in industry and market conditions, we may be required to strategically realign our resources and consider restructuring, disposing of, or otherwise exiting businesses. Any decision to limit investment in or dispose of or otherwise exit businesses may result in the recording of special charges, such as inventory and technology-related write-offs, workforce reduction costs, charges relating to consolidation of excess facilities, or claims from third parties who were resellers or users of discontinued products. Our estimates with respect to the useful life or ultimate recoverability of our carrying basis of assets, including purchased intangible assets, could change as a result of such assessments and decisions. Further, our estimates relating to the liabilities for excess facilities are affected by changes in real estate market conditions. Additionally, we are required to perform goodwill impairment tests on an annual basis and between annual tests in certain circumstances, and future goodwill impairment tests may result in a charge to earnings.

WE HAVE MADE AND EXPECT TO CONTINUE TO MAKE ACQUISITIONS THAT COULD DISRUPT OUR OPERATIONS AND HARM OUR OPERATING RESULTS

Our growth depends upon market growth, our ability to enhance our existing products, and our ability to introduce new products on a timely basis. We intend to continue to address the need to develop new products and enhance existing products through acquisitions of other companies, product lines, technologies, and personnel. Acquisitions involve numerous risks, including the following:

Difficulties in integrating the operations, systems, technologies, products, and personnel of the acquired companies, particularly companies with large and widespread operations and/or complex products, such as Scientific-Atlanta and WebEx

Diversion of management's attention from normal daily operations of the business and the challenges of managing larger and more widespread operations resulting from acquisitions

Potential difficulties in completing projects associated with in-process research and development

Difficulties in entering markets in which we have no or limited direct prior experience and where competitors in such markets have stronger market positions

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

Initial dependence on unfamiliar supply chains or relatively small supply partners

Insufficient revenue to offset increased expenses associated with acquisitions

The potential loss of key employees, customers, distributors, vendors and other business partners of the companies we acquire following and continuing after announcement of acquisition plans

Table of Contents

Acquisitions may also cause us to:

Issue common stock that would dilute our current shareholders' percentage ownership

Use a substantial portion of our cash resources, as we expect to do in connection with our announced acquisitions of WebEx and IronPort, or incur debt as we did in February 2006 when we issued and sold \$6.5 billion in senior unsecured notes to fund our acquisition of Scientific-Atlanta

Significantly increase our interest expense, leverage and debt service requirements if we incur additional debt to pay for an acquisition

Assume liabilities

Record goodwill and nonamortizable intangible assets that are subject to impairment testing on a regular basis and potential periodic impairment charges

Incur amortization expenses related to certain intangible assets

Incur U.S. tax expenses in connection with our intercompany R&D cost sharing arrangement

Incur large and immediate write-offs and restructuring and other related expenses

Become subject to intellectual property or other litigation

Mergers and acquisitions of high-technology companies are inherently risky and subject to many factors outside of our control, and no assurance can be given that our previous or future acquisitions will be successful and will not materially adversely affect our business, operating results, or financial condition. Failure to manage and successfully integrate acquisitions could materially harm our business and operating results. Prior acquisitions have resulted in a wide range of outcomes, from successful introduction of new products and technologies to an inability to do so. Even when an acquired company has already developed and marketed products, there can be no assurance that product enhancements will be made in a timely fashion or that preacquisition due diligence will have identified all possible issues that might arise with respect to such products.

From time to time, we have made acquisitions that resulted in in-process research and development expenses being charged in an individual quarter. These charges may occur in any particular quarter, resulting in variability in our quarterly earnings. In addition, our effective tax rate for future periods is uncertain, and could be impacted by mergers and acquisitions. Risks related to new product development also apply to acquisitions. Please see the risk factors above, including the risk factor entitled "We depend upon the development of new products and enhancements to existing products, and if we fail to predict and respond to emerging technological trends and customers' changing needs, our operating results and market share may suffer" for additional information.

ENTRANCE INTO NEW OR DEVELOPING MARKETS EXPOSES US TO ADDITIONAL COMPETITION AND WILL LIKELY INCREASE DEMANDS ON OUR SERVICE AND SUPPORT OPERATIONS

As we focus on new market opportunities for example, storage; wireless; security; and transporting data, voice, and video traffic across the same network, and other advanced technologies and emerging technologies we will increasingly compete with large telecommunications equipment suppliers as well as startup companies. Several of our competitors may have greater resources, including technical and engineering resources,

than we do. Additionally, as customers in these markets complete infrastructure deployments, they may require greater levels of service, support, and financing than we have provided in the past. Demand for these types of service or financing contracts may increase in the future. There can be no assurance that we can provide products, service, support, and financing to effectively compete for these market opportunities. Further, provision of greater levels of services by us may result in a delay in the timing of revenue recognition. In addition, entry into other markets, including our entry into the consumer market, has subjected and will subject us to additional risks, particularly to those markets, including the effects of general market conditions and reduced consumer confidence.

PRODUCT QUALITY PROBLEMS COULD LEAD TO REDUCED REVENUE, GROSS MARGINS, AND NET INCOME

We produce highly complex products that incorporate leading-edge technology, including both hardware and software. Software typically contains bugs that can unexpectedly interfere with expected operations. There can be no assurance that our preshipment testing programs will be adequate to detect all defects, either ones in individual products or ones that could affect numerous shipments, which might interfere with customer satisfaction, reduce sales opportunities, or affect gross margins. In the past, we have had to replace certain components and provide remediation in response to the discovery of defects or bugs in products that we had

Table of Contents

shipped. Although the cost of such remediation has not been material in the past, there can be no assurance that such a remediation, depending on the product involved, would not have a material impact. An inability to cure a product defect could result in the failure of a product line, temporary or permanent withdrawal from a product or market, damage to our reputation, inventory costs, or product reengineering expenses, any of which could have a material impact on our revenue, margins, and net income.

INDUSTRY CONSOLIDATION MAY LEAD TO INCREASED COMPETITION AND MAY HARM OUR OPERATING RESULTS

There has been a trend toward industry consolidation in our markets for several years. We expect this trend to continue as companies attempt to strengthen or hold their market positions in an evolving industry and as companies are acquired or are unable to continue operations. We believe that industry consolidation may result in stronger competitors that are better able to compete as sole-source vendors for customers. This could lead to more variability in our operating results and could have a material adverse effect on our business, operating results, and financial condition. Furthermore, particularly in the service provider market, rapid consolidation will lead to fewer customers, with the effect that loss of a major customer could have a material impact on results not anticipated in a customer marketplace composed of more numerous participants.

DUE TO THE GLOBAL NATURE OF OUR OPERATIONS, POLITICAL OR ECONOMIC CHANGES OR OTHER FACTORS IN A SPECIFIC COUNTRY OR REGION COULD HARM OUR OPERATING RESULTS AND FINANCIAL CONDITION

We conduct significant sales and customer support operations in countries outside of the United States, maintain a manufacturing facility for a substantial portion of our video systems products in Juarez, Mexico, and also depend on non-U.S. operations of our contract manufacturers and our distribution partners. Accordingly, our future results could be materially adversely affected by a variety of uncontrollable and changing factors, any or all of which could have a material adverse effect on our operating results and financial condition, including, among others, foreign currency exchange rates; political or social unrest, economic instability or natural disasters in a specific country or region; environmental and trade protection measures and other regulatory requirements, which may affect our ability to import our products to, export our products from, or sell our products in various countries; political considerations that affect service provider and government spending patterns; health or similar issues, such as a pandemic or epidemic; difficulties in staffing and managing international operations; and adverse tax consequences, including imposition of withholding or other taxes on payments by subsidiaries. Recently our Emerging Markets theater has been the fastest growing of our business segments, and our growth depends in part on our continuing to increase sales into this theater. We believe that many of the factors described in this paragraph may have a greater potential to adversely affect our business with countries in our Emerging Markets theater than with many of the countries in our other theaters.

WE ARE EXPOSED TO FLUCTUATIONS IN CURRENCY EXCHANGE RATES THAT COULD NEGATIVELY IMPACT OUR FINANCIAL RESULTS AND CASH FLOWS

Because a significant portion of our business is conducted outside the United States, we face exposure to adverse movements in foreign currency exchange rates. These exposures may change over time as business practices evolve, and they could have a material adverse impact on our financial results and cash flows. Historically, our primary exposures have related to nondollar-denominated sales in Japan, Canada, and Australia and certain non-dollar-denominated operating expenses in Europe, Latin America, and Asia, where we sell primarily in U.S. dollars. Additionally, we have exposures to emerging market currencies, which can have extreme currency volatility. An increase in the value of the dollar could increase the real cost to our customers of our products in those markets outside the United States where we sell in dollars, and a weakened dollar could increase the cost of local operating expenses and procurement of raw materials to the extent that we must purchase components in foreign currencies.

Currently, we enter into foreign exchange forward contracts to reduce the short-term impact of foreign currency fluctuations on certain foreign currency receivables, investments, and payables. In addition, we periodically hedge anticipated foreign currency cash flows. Our attempts to hedge against these risks may not be successful, resulting in an adverse impact on our net income.

WE ARE EXPOSED TO THE CREDIT RISK OF SOME OF OUR CUSTOMERS AND TO CREDIT EXPOSURES IN WEAKENED MARKETS, WHICH COULD RESULT IN MATERIAL LOSSES

Most of our sales are on an open credit basis, with typical payment terms of 30 days in the United States and, because of local customs or conditions, longer in some markets outside the United States. We monitor individual customer payment capability in granting such open credit arrangements, seek to limit such open credit to amounts we believe the customers can pay, and maintain reserves we believe are adequate to cover exposure for doubtful accounts. Beyond our open credit arrangements, we have also experienced demands for customer financing and facilitation of leasing arrangements. We expect demand for customer financing to continue. We believe customer financing is a competitive factor in obtaining business, particularly in supplying customers involved in

Table of Contents

significant infrastructure projects. Our loan financing arrangements may include not only financing the acquisition of our products and services but also providing additional funds for other costs associated with network installation and integration of our products and services and for working capital purposes. We do not recognize revenue on customer loan financing arrangements until cash payments are received.

Our exposure to the credit risks relating to our financing activities described above may increase if there is an economic slowdown. Although we have programs in place that are designed to monitor and mitigate the associated risk, including monitoring of particular risks in certain geographic areas, there can be no assurance that such programs will be effective in reducing our credit risks. There have been significant bankruptcies among customers both on open credit and with loan or lease financing arrangements, particularly among Internet businesses and service providers, causing us to incur economic or financial losses. There can be no assurance that additional losses will not be incurred. Although these losses have not been material to date, future losses, if incurred, could harm our business and have a material adverse effect on our operating results and financial condition. A portion of our sales is derived through our distributors and retail partners. These distributors and retail partners are generally given business terms that allow them to return a portion of inventory, receive credits for changes in selling prices, and participate in various cooperative marketing programs. We maintain estimated accruals and allowances for such business terms. However, distributors tend to have more limited financial resources than other resellers and end-user customers and therefore represent potential sources of increased credit risk because they may be more likely to lack the reserve resources to meet payment obligations.

OUR PROPRIETARY RIGHTS MAY PROVE DIFFICULT TO ENFORCE

We generally rely on patents, copyrights, trademarks, and trade secret laws to establish and maintain proprietary rights in our technology and products. Although we have been issued numerous patents and other patent applications are currently pending, there can be no assurance that any of these patents or other proprietary rights will not be challenged, invalidated, or circumvented or that our rights will, in fact, provide competitive advantages to us. Furthermore, many key aspects of networking technology are governed by industrywide standards, which are usable by all market entrants. In addition, there can be no assurance that patents will be issued from pending applications or that claims allowed on any patents will be sufficiently broad to protect our technology. In addition, the laws of some foreign countries may not protect our proprietary rights to the same extent as do the laws of the United States. The outcome of any actions taken in these foreign countries may be different than if such actions were determined under the laws of the United States. Although we are not dependent on any individual patents or group of patents for particular segments of the business for which we compete, if we are unable to protect our proprietary rights to the totality of the features (including aspects of products protected other than by patent rights) in a market, we may find ourselves at a competitive disadvantage to others who need not incur the substantial expense, time, and effort required to create innovative products that have enabled us to be successful.

WE MAY BE FOUND TO INFRINGE ON INTELLECTUAL PROPERTY RIGHTS OF OTHERS

Third parties, including customers, have in the past and may in the future assert claims or initiate litigation related to exclusive patent, copyright, trademark, and other intellectual property rights to technologies and related standards that are relevant to us. These assertions have increased over time as a result of our growth and the general increase in the pace of patent claims assertions, particularly in the United States. Because of the existence of a large number of patents in the networking field, the secrecy of some pending patents, and the rapid rate of issuance of new patents, it is not economically practical or even possible to determine in advance whether a product or any of its components infringes or will infringe on the patent rights of others. The asserted claims and/or initiated litigation can include claims against us or our manufacturers, suppliers, or customers, alleging infringement of their proprietary rights with respect to our existing or future products or components of those products. Regardless of the merit of these claims, they can be time-consuming, result in costly litigation and diversion of technical and management personnel, or require us to develop a non-infringing technology or enter into license agreements. Where claims are made by customers, resistance even to unmeritorious claims could damage customer relationships. There can be no assurance that licenses will be available on acceptable terms and conditions, if at all, or that our indemnification by our suppliers will be adequate to cover our costs if a claim were brought directly against us or our customers. Furthermore, because of the potential for high court awards that are not necessarily predictable, it is not unusual to find even arguably unmeritorious claims settled for significant amounts. If any infringement or other intellectual property claim made against us by any third party is successful, if we are required to indemnify a customer with respect to a claim against the customer, or if we fail to develop non-infringing technology or license the proprietary rights on commercially reasonable terms and conditions, our business, operating results, and financial condition could be materially and adversely affected.

Our exposure to risks associated with the use of intellectual property may be increased as a result of acquisitions, as we have a lower level of visibility into the development process with respect to such technology or the care taken to safeguard against infringement risks. Further, in the past, third parties have made infringement and similar claims after we have acquired technology that had not been asserted prior to our acquisition.

Table of Contents

WE RELY ON THE AVAILABILITY OF THIRD-PARTY LICENSES

Many of our products are designed to include software or other intellectual property licensed from third parties. It may be necessary in the future to seek or renew licenses relating to various aspects of these products. There can be no assurance that the necessary licenses would be available on acceptable terms, if at all. The inability to obtain certain licenses or other rights or to obtain such licenses or rights on favorable terms, or the need to engage in litigation regarding these matters, could have a material adverse effect on our business, operating results, and financial condition. Moreover, the inclusion in our products of software or other intellectual property licensed from third parties on a nonexclusive basis could limit our ability to protect our proprietary rights in our products.

OUR OPERATING RESULTS AND FUTURE PROSPECTS COULD BE MATERIALLY HARMED BY UNCERTAINTIES OF REGULATION OF THE INTERNET

Currently, few laws or regulations apply directly to access or commerce on the Internet. We could be materially adversely affected by regulation of the Internet and Internet commerce in any country where we operate. Such regulations could include matters such as voice over the Internet or using IP, encryption technology, sales taxes on Internet product sales, and access charges for Internet service providers. The adoption of regulation of the Internet and Internet commerce could decrease demand for our products and, at the same time, increase the cost of selling our products, which could have a material adverse effect on our business, operating results, and financial condition.

CHANGES IN TELECOMMUNICATIONS REGULATION AND TARIFFS COULD HARM OUR PROSPECTS AND FUTURE SALES

Changes in telecommunications requirements in the United States or other countries could affect the sales of our products. In particular, we believe that there may be future changes in U.S. telecommunications regulations that could slow the expansion of the service providers' network infrastructures and materially adversely affect our business, operating results, and financial condition.

Future changes in tariffs by regulatory agencies or application of tariff requirements to currently untariffed services could affect the sales of our products for certain classes of customers. Additionally, in the United States, our products must comply with various Federal Communications Commission requirements and regulations. In countries outside of the United States, our products must meet various requirements of local telecommunications authorities. Changes in tariffs or failure by us to obtain timely approval of products could have a material adverse effect on our business, operating results, and financial condition.

FAILURE TO RETAIN AND RECRUIT KEY PERSONNEL WOULD HARM OUR ABILITY TO MEET KEY OBJECTIVES

Our success has always depended in large part on our ability to attract and retain highly skilled technical, managerial, sales, and marketing personnel. Competition for these personnel is intense, especially in the Silicon Valley area of Northern California. Stock option grants are designed to reward employees for their long-term contributions and provide incentives for them to remain with us. Volatility, lack of positive performance in our stock price, or changes to our overall compensation program, including our stock incentive program, resulting from the adoption of SFAS 123(R) or otherwise, may also adversely affect our ability to retain key employees. As a result of one or more of these factors, we may increase our hiring in geographic areas outside the United States, which could subject us to additional geopolitical and exchange rate risk. The loss of services of any of our key personnel, the inability to retain and attract qualified personnel in the future, or delays in hiring required personnel, particularly engineering and sales personnel, could make it difficult to meet key objectives, such as timely and effective product introductions. In addition, companies in the networking industry whose employees accept positions with competitors frequently claim that competitors have engaged in improper hiring practices. We have received these claims in the past and may receive additional claims to this effect in the future.

ADVERSE RESOLUTION OF LITIGATION MAY HARM OUR OPERATING RESULTS OR FINANCIAL CONDITION

We are a party to lawsuits in the normal course of our business. Litigation can be expensive, lengthy, and disruptive to normal business operations. Moreover, the results of complex legal proceedings are difficult to predict. An unfavorable resolution of a particular lawsuit could have a material adverse effect on our business, operating results, or financial condition. For additional information regarding certain of the lawsuits in which we are involved, see Item 1, Legal Proceedings, contained in Part II of this report.

CHANGES IN EFFECTIVE TAX RATES OR ADVERSE OUTCOMES RESULTING FROM EXAMINATION OF OUR INCOME TAX RETURNS COULD ADVERSELY AFFECT OUR RESULTS

Edgar Filing: CISCO SYSTEMS INC - Form 10-Q

Our future effective tax rates could be subject to volatility or adversely affected by earnings being lower than anticipated in countries which have lower statutory rates and higher than anticipated in countries which have higher statutory rates; by changes in the

Table of Contents

valuation of our deferred tax assets and liabilities; by expiration of or lapses in the R&D tax credit laws; by transfer pricing adjustments related to certain acquisitions including the license of acquired intangibles under our intercompany R&D cost sharing arrangement; by tax effects of stock-based compensation; by costs related to intercompany restructurings, or by changes in tax laws, regulations, accounting principles, or interpretations thereof. Further, as a result of certain ongoing employment and capital investment commitments made by us, our income in certain countries is subject to reduced tax rates, and in some cases is wholly exempt from tax. Our failure to meet such commitments could adversely impact our effective tax rate. In addition, we are subject to the continuous examination of our income tax returns by the Internal Revenue Service and other tax authorities. We regularly assess the likelihood of adverse outcomes resulting from these examinations to determine the adequacy of our provision for income taxes. There can be no assurance that the outcomes from these continuous examinations will not have an adverse effect on our operating results and financial condition.

OUR BUSINESS AND OPERATIONS ARE ESPECIALLY SUBJECT TO THE RISKS OF EARTHQUAKES, FLOODS, AND OTHER NATURAL CATASTROPHIC EVENTS

Our corporate headquarters, including certain of our research and development operations and our manufacturing facilities, are located in the Silicon Valley area of Northern California, a region known for seismic activity. Additionally, a certain number of our facilities, including one of our manufacturing facilities, are located near rivers that have experienced flooding in the past. A significant natural disaster, such as an earthquake, a hurricane, or a flood, could have a material adverse impact on our business, operating results, and financial condition.

MANMADE PROBLEMS SUCH AS COMPUTER VIRUSES OR TERRORISM MAY DISRUPT OUR OPERATIONS AND HARM OUR OPERATING RESULTS

Despite our implementation of network security measures, our servers are vulnerable to computer viruses, break-ins, and similar disruptions from unauthorized tampering with our computer systems. Any such event could have a material adverse effect on our business, operating results, and financial condition. Efforts to limit the ability of malicious third parties to disrupt the operations of the Internet or undermine our own security efforts may meet with resistance. In addition, the continued threat of terrorism and heightened security and military action in response to this threat, or any future acts of terrorism, may cause further disruptions to the economies of the United States and other countries and create further uncertainties or otherwise materially harm our business, operating results, and financial condition. Likewise, events such as widespread blackouts could have similar negative impacts. To the extent that such disruptions or uncertainties result in delays or cancellations of customer orders or the manufacture or shipment of our products, our business, operating results, and financial condition could be materially and adversely affected.

WE ARE EXPOSED TO FLUCTUATIONS IN THE MARKET VALUES OF OUR PORTFOLIO INVESTMENTS AND IN INTEREST RATES; IMPAIRMENT OF OUR INVESTMENTS COULD HARM OUR EARNINGS

We maintain an investment portfolio of various holdings, types, and maturities. These securities are generally classified as available-for-sale and, consequently, are recorded on our Consolidated Balance Sheets at fair value with unrealized gains or losses reported as a separate component of accumulated other comprehensive income, net of tax. Part of this portfolio includes equity investments in publicly traded companies, the values of which are subject to market price volatility to the extent unhedged. If the public equities market declines, we may recognize in earnings the decline in fair value of our publicly traded equity investments below the cost basis when the decline is judged to be other-than-temporary. For information regarding the sensitivity of and risks associated with the market value of portfolio investments and interest rates, refer to the section titled "Quantitative and Qualitative Disclosures About Market Risk" included in this report and in our Annual Report on Form 10-K for the year ended July 29, 2006. Our investments in private companies are subject to risk of loss of investment capital. These investments are inherently risky because the markets for the technologies or products they have under development are typically in the early stages and may never materialize. We could lose our entire investment in these companies.

IF WE DO NOT SUCCESSFULLY MANAGE OUR STRATEGIC ALLIANCES, WE MAY EXPERIENCE INCREASED COMPETITION OR DELAYS IN PRODUCT DEVELOPMENT

We have several strategic alliances with large and complex organizations and other companies with whom we work to offer complementary products and services. These arrangements are generally limited to specific projects, the goal of which is generally to facilitate product compatibility and adoption of industry standards. If successful, these relationships may be mutually beneficial and result in industry growth. However, these alliances carry an element of risk because, in most cases, we must compete in some business areas with a company with which we have a strategic alliance and, at the same time, cooperate with that company in other business areas. Also, if these companies fail to perform or if these relationships fail to materialize as expected, we could suffer delays in product development or other operational difficulties.

Table of Contents

WE ARE REQUIRED TO RECOGNIZE EXPENSE FOR SHARE-BASED COMPENSATION RELATED TO EMPLOYEE SHARE-BASED AWARDS, AND THERE IS NO ASSURANCE THAT THE EXPENSE THAT WE ARE REQUIRED TO RECOGNIZE MEASURES ACCURATELY THE VALUE OF OUR SHARE-BASED PAYMENT AWARDS, AND THE RECOGNITION OF THIS EXPENSE COULD CAUSE THE TRADING PRICE OF OUR COMMON STOCK TO DECLINE

On July 31, 2005, we adopted SFAS 123(R), which requires the measurement and recognition of compensation expense for all share-based compensation based on estimated fair values. As a result, starting with fiscal 2006, our operating results contain a charge for employee share-based compensation expense. This charge is in addition to share-based compensation expense we recognized prior to fiscal 2006 related to acquisitions and investments. The application of SFAS 123(R) requires the use of an option-pricing model to determine the fair value of share-based payment awards. This determination of fair value is affected by our stock price as well as assumptions regarding a number of highly complex and subjective variables. These variables include, but are not limited to, our expected stock price volatility over the term of the awards, and actual and projected employee stock option exercise behaviors. Option-pricing models were developed for use in estimating the value of traded options that have no vesting or hedging restrictions and are fully transferable. Because our employee stock options have certain characteristics that are significantly different from traded options, and because changes in the subjective assumptions can materially affect the estimated value, in management's opinion the existing valuation models may not provide an accurate measure of the fair value of our employee stock options. Although the fair value of employee stock options is determined in accordance with SFAS 123(R) and SAB 107 using an option-pricing model, that value may not be indicative of the fair value observed in a willing buyer/willing seller market transaction.

As a result of the adoption of SFAS 123(R), beginning with fiscal 2006, our earnings were lower than they would have been had we not been required to adopt SFAS 123(R). This will continue to be the case for future periods. We cannot predict the effect that this adverse impact on our reported operating results will have on the trading price of our common stock.

OUR STOCK PRICE MAY BE VOLATILE

Historically, our common stock has experienced substantial price volatility, particularly as a result of variations between our actual financial results and the published expectations of analysts and as a result of announcements by our competitors and us. Furthermore, speculation in the press or investment community about our strategic position, financial condition, results of operations, business, security of our products or significant transactions can cause changes in our stock price. In addition, the stock market has experienced extreme price and volume fluctuations that have affected the market price of many technology companies, in particular, and that have often been unrelated to the operating performance of these companies. These factors, as well as general economic and political conditions and the announcement of proposed and completed acquisitions or other significant transactions, or any difficulties associated with such transactions, by us or our current or potential competitors, may materially adversely affect the market price of our common stock in the future. Additionally, volatility, lack of positive performance in our stock price or changes to our overall compensation program including our stock incentive program may adversely affect our ability to retain key employees, virtually all of whom are compensated, in part, based on the performance of our stock price.

WE HAVE ISSUED \$6.5 BILLION OF SENIOR UNSECURED NOTES, AND THERE CAN BE NO ASSURANCE THAT OUR OPERATING RESULTS AND FINANCIAL CONDITION WILL NOT BE ADVERSELY AFFECTED

On February 22, 2006, we issued senior unsecured notes in an aggregate principal amount of \$6.5 billion that mature at specific dates in 2009, 2011 and 2016. The notes that mature in 2009 bear floating-rate interest payable quarterly while the notes that mature in 2011 and 2016 bear fixed-rate interest payable semi-annually. We have entered into certain interest rate swaps to, in effect, convert the interest rates of the fixed interest notes into floating-rates based on LIBOR. Higher short-term interest rates would accordingly result in increased interest expense. While we presently mitigate this risk by investing a portion of our interest-bearing assets in instruments with similar interest rate characteristics as the swapped debt, there can be no assurance that we will maintain a matched portfolio in the future. The instruments governing the notes contain certain covenants applicable to us and our subsidiaries that may adversely affect our ability to incur certain liens or engage in certain types of sale and leaseback transactions. We have not previously undertaken substantial amounts of debt for borrowed money. There can be no assurance that our incurrence of this debt will be a better means of providing liquidity to us than would our use of our existing cash resources, including cash currently held offshore. Further, we cannot be assured that our maintenance of this indebtedness will not adversely affect our operating results or financial condition. In addition, changes by any rating agency to our credit rating can negatively impact the value and liquidity of both our debt and equity securities.

Table of Contents**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**

(a) None.

(b) None.

(c) Issuer Purchases of Equity Securities (in millions, except per-share amounts)

Period	Total Number of Shares Purchased (1)	Average Price Paid per Share (1)	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (2)	Approximate Dollar Value of Shares That May Yet Be Purchased Under the Plans or Programs (2)
January 28, 2007 to February 24, 2007	35	\$ 27.32	35	\$ 5,811
February 25, 2007 to March 24, 2007	21	\$ 26.05	21	\$ 5,271
March 25, 2007 to April 28, 2007		\$ 25.85		\$ 5,271
Total	56	\$ 26.85	56	

(1) Includes an insignificant number of shares repurchased to satisfy tax withholding obligations that arise on the vesting of shares of restricted stock.

(2) On September 13, 2001, we announced that our Board of Directors had authorized a stock repurchase program. As of April 28, 2007, our Board of Directors had authorized the repurchase of up to \$47 billion of common stock under this program. During the third quarter of fiscal 2007, we repurchased and retired 56 million shares of our common stock at an average price of \$26.85 per share for an aggregate purchase price of \$1.5 billion. As of April 28, 2007, we had repurchased and retired 2.2 billion shares of our common stock at an average price of \$19.20 per share for an aggregate purchase price of \$41.7 billion since inception of the stock repurchase program, and the remaining authorized amount for stock repurchases under this program was \$5.3 billion with no termination date.
