UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 20-F

(Mark One)

REGISTRATION STATEMENT PURSUANT TO SECTION 12(b) OR (g) OF THE SECURITIES EXCHANGE ACT OF 1934

OR

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2006

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____.

Commission file number: 000-51053

THE9 LIMITED

(Exact name of Registrant as specified in its charter)

N/A

(Translation of Registrant's name into English)

Edgar Filing: The9 LTD - Form 20-F

Cayman Islands

(Jurisdiction of incorporation or organization)

Building No.3, 690 Bibo Road

Zhang Jiang Hi-Tech Park

Pudong New Area, Pudong

Shanghai 201203, People's Republic of China

(Address of principal executive offices)

Securities registered or to be registered pursuant to Section 12(b) of the Act.

Name of each exchange and Title of each class on which registered:

American Depositary Shares, each representing one ordinary share, par value

US\$0.01 per share, Nasdaq Global Market

Securities registered or to be registered pursuant to Section 12(g) of the Act.

[NONE]

(Title of Class)

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act.

[NONE]

(Title of Class)

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report: 24,214,130 ordinary shares, par value US\$0.01 per share.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark which financial statement item the registrant has elected to follow: Item 17 Item 18

Edgar Filing: The9 LTD - Form 20-F

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

INTRODUCTION

In this annual report, unless otherwise indicated, (1) the terms we, us, our company, our and The9 refer to The9 Limited and its subsidiaries, in the context of describing our operations and risk factors, also include 9Webzen and our other affiliated PRC entities, (2) the term 9Webzen refers to 9Webzen Limited and its subsidiary, 9Webzen (Shanghai) Co., Ltd., (3) the terms shares and ordinary shares refer to our ordinary shares, preferred shares refers to our convertible preferred shares, all of which were converted into our ordinary shares upon the completion of our initial public offering on December 20, 2004, ADSs refers to our American depositary shares, each of which represents one ordinary share, and ADRs refers to the American depositary receipts, which evidence our ADSs, (4) all share numbers reflect the 2.86-for-1 share split of our ordinary shares and preferred shares which became effective on November 25, 2004, (5) China and PRC refer to the People's Republic of China, and solely for the purpose of this annual report, excluding Taiwan, Hong Kong and Macau, (6) all references to RMB and Renminbi are to the legal currency of China and all references to U.S. dollars, dollars, US\$ and \$ are to the legal currency of the United States, (7) all discrepancies in any table between the amounts identified as total amounts and the sum of the amounts listed therein are due to rounding; and (8) all translations from RMB to U.S. dollars and from U.S. dollars to RMB in this annual report were made at a rate of RMB7.8041 to US\$1.00, the noon buying rate in effect as of December 29, 2006.

This annual report on Form 20-F includes our audited consolidated statements of operations for the years ended December 31, 2004, 2005 and 2006, and consolidated balance sheet data as of December 31, 2005 and 2006.

We and certain selling shareholders of our company completed the initial public offering of 6,075,000 ADSs, each representing one ordinary share, par value US\$0.01 per share, on December 20, 2004. On December 15, 2004, we listed our ADSs on the Nasdaq Global Market, or Nasdaq, under the symbol NCTY.

FORWARD-LOOKING INFORMATION

This annual report on Form 20-F contains statements of a forward-looking nature. These statements are made under the safe harbor provisions of the U.S. Private Securities Litigation Reform Act of 1995. You can identify these forward-looking statements by terminology such as may, will, expects, anticipates, future, intend, plan, believe, estimate, is/are likely to or other and similar expressions. The accuracy of these statements can be impacted by a number of risks and uncertainties that could cause actual results to differ materially from those projected or anticipated. Such risks and uncertainties include, but are not limited to, the following:

our ability to retain existing users and attract new users for the World of Warcraft®, or WoW, game;

our ability to successfully launch and operate additional online games licensed by us in China;

our ability to license, develop or acquire additional online games that are attractive to users;

Table of Contents

the maintenance and expansion of our relationships with online game developers, including our existing licensors;

uncertainties in and the timeliness of obtaining necessary governmental approvals and licenses for operating any new online game;

risks inherent in the online game business;

risks associated with our future acquisitions and investments;

our ability to compete successfully against our competitors;

risks associated with our corporate structure and the regulatory environment in China; and

other risks outlined in our filings with the Securities and Exchange Commission, or the SEC, including this annual report on Form 20-F. These risks are not exhaustive. We operate in an emerging and evolving environment. New risk factors emerge from time to time and it is impossible for our management to predict all risk factors, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements.

We would like to caution you not to place undue reliance on forward-looking statements and you should read these statements in conjunction with the risk factors disclosed in Item 3 of this annual report, Key Information Risk Factors. We do not undertake any obligation to update forward-looking statements except as required under applicable law.

ITEM 3. KEY INFORMATION

A. Selected Financial Data

The following table presents selected consolidated financial information for our company. You should read the following information in conjunction with Item 5, Operating and Financial Review and Prospects, below. The selected consolidated statement of operations data for the years ended December 31, 2004, 2005 and 2006 and the selected consolidated balance sheet data as of December 31, 2005 and 2006 have been derived from our audited consolidated financial statements and should be read in conjunction with those statements, which are included in this annual report beginning on page F-1. The selected consolidated statement of operations data for the years ended December 31, 2002 and 2003 and the selected consolidated balance sheet data as of December 31, 2002, 2003 and 2004 have been derived from our audited consolidated financial statements, which are not included in this annual report.

- (1) Translation from RMB amounts into U.S. dollars was made at a rate of RMB7.8041 to US\$1.00. See Exchange Rate Information.
- (2) Each ADS represents one ordinary share.
- (3) Series A convertible preferred shares were not included as part of shareholders' equity as such shares were redeemable at the option of the holders thereof.

As of December 31, 2006, we and Webzen Inc., or Webzen, owned 30% and 70%, respectively, of 9Webzen Limited, or 9Webzen. Prior to December 2005, we and Webzen owned 51% and 49%, respectively, of 9Webzen. Due to Webzen's right to participate in certain decisions to be made in the ordinary course of business of 9Webzen, we have accounted for our interest in 9Webzen using the equity method. Our equity share of 9Webzen's net income contributed significantly to our net income for our fiscal years ended December 31, 2003 and 2004. In 2005, due to the declining popularity of the MU game, which comprised substantially all of 9Webzen's revenues, and due to our substantial increase in revenues resulting from the commercial launch of WoW in China, the portion of our income attributable to our equity interest in 9Webzen and our share of the total assets of 9Webzen were less than 20% of our operating income and total assets for the year. Because 9Webzen's financial position and results of operations are no longer material to us, audited financial statements for 9Webzen have not been required since 2005. 9Webzen's audited consolidated financial statements for the year ended December 31, 2004 and unaudited consolidated financial statements for the years ended December 31, 2005 and 2006 are included in this annual report beginning on page F-44. For a more detailed discussion of 9Webzen's historical operating and financial information, see our annual report on Form 20-F for fiscal year 2004, filed with the SEC on June 30, 2005.

Exchange Rate Information

Our business is primarily conducted in China and almost all of our revenues are denominated in RMB. This annual report contains translations of RMB amounts into U.S. dollars based on the noon buying rate in the city of New York for cable transfers of RMB, as certified for customs purposes by the Federal Reserve Bank of New York. For your convenience, this annual report contains translations of some RMB or U.S. dollar amounts for 2006 at US\$1.00: RMB7.8041, which was the noon buying rate in effect as of December 29, 2006. The prevailing rate at June 25, 2007 was US\$1.00: RMB7.6187. We make no representation that any RMB or U.S. dollar amounts could have been, or could be, converted into U.S. dollars or RMB, as the case may be, at any particular rate, the rates stated below, or

Table of Contents

at all. The PRC government imposes control over its foreign currency reserves in part through direct regulation of the conversion of RMB into foreign currency and through restrictions on foreign exchange activities.

The following table sets forth information concerning exchange rates between the RMB and the U.S. dollar for the periods indicated. These rates are provided solely for your convenience and are not necessarily the exchange rates that we used in this annual report or will use in the preparation of our other periodic reports or any other information to be provided to you. The source of these rates is the Federal Reserve Bank of New York.

Period	Period End	Noon Buying Rate		
		Average ⁽¹⁾	Low	High
(RMB per US\$1.00)				
2002	8.2800	8.2770	8.2800	8.2669
2003	8.2767	8.2772	8.2800	8.2765
2004	8.2765	8.2768	8.2771	8.2765
2005	8.0702	8.1826	8.2765	8.0702
2006	7.8041	7.9723	8.0702	7.8041
December 2006	7.8041	7.8219	7.8350	7.8041
January 2007	7.7714	7.7876	7.8127	7.7705
February 2007	7.7410	7.7502	7.7632	7.7410
March 2007	7.7232	7.7369	7.7454	7.7232
April 2007	7.7090	7.7247	7.7345	7.7090
May 2007	7.6516	7.6773	7.7065	7.6463
June 2007 (through June 25)	7.6187	7.6370	7.6680	7.6175

(1) Annual averages are calculated from month-end rates. Monthly averages are calculated using the average of the daily rates during the relevant period.

B. Capitalization and Indebtedness

Not Applicable.

C. Reasons for the Offer and Use of Proceeds

Not Applicable.

D. Risk Factors

Risks Related to Our Company

Our limited relevant operating history and the unproven long-term potential of our online game business model make evaluating our business and prospects difficult.

We began to offer our self-developed online virtual community game, the9 City, in 2000 and commenced the distribution and operation of MU, our first massively multiplayer online role playing game, or MMORPG, in China in February 2003. We launched three additional MMORPGs, including Mystina Online, WoW and Joyful Journey West (JJW), in China in February 2005, June 2005 and September 2006, respectively. As a result, we have limited relevant operating history upon which to evaluate our business. It is also difficult to evaluate our prospective business, because we may not have sufficient experience

Table of Contents

to address the risks frequently encountered by early stage companies using new and unproven business models and entering new and rapidly evolving markets, including the online game market. These risks may include our potential failure to:

retain existing customers and attract new customers;

successfully launch and operate new online games licensed by us;

license, acquire or develop additional online games that are appealing to customers;

anticipate and adapt to changing consumer preferences;

adapt to competitive market conditions;

timely respond to technological changes or resolve unexpected network delays or interruptions;

adequately and efficiently operate, upgrade and develop our transaction and service platform; or

maintain adequate control of our expenses.

If we are unsuccessful in addressing any of the risks listed above, our results of operations may be materially and adversely affected.

As we expect that WoW will continue to comprise most of our revenues in the near future, any adverse developments relating to WoW may materially and adversely affect our results of operations.

In February 2004, our subsidiary, China The9 Interactive Limited, or C9I, obtained an exclusive license to operate WoW in China from Vivendi Universal Games Inc., or VUG, and we commercially launched WoW in China in June 2005. In 2006, 99% of our total revenues were attributable to the operation of WoW in China, including game play time, merchandise sales and other related revenues. We expect to continue to depend on WoW for most of our revenues in the near future.

In order to maximize the life span of a game, which we believe is typically four to five years for successful online games or two to three years for most other online games, it is necessary to continuously enhance, expand or upgrade the game with new features. We do not have any control over VUG's product development. As WoW's remaining economic life shortens, we will need to rely on other games to generate more revenues and to develop, license or acquire new games. If we are unable to do so, our future revenues will decline. In addition, any reduction in the user fees we charge to WoW game players as a result of intensifying competition or other factors, any breach of game-related software security, prolonged server delays, interruption due to network failure, illegal server activities, hacking or any other adverse developments relating to WoW, could materially and adversely affect our future results of operations.

We have invested and plan to continue to invest a significant amount of financial and personnel resources in operating WoW in China. While WoW has generated significant

Table of Contents

revenue in 2006 with 6.8 million activated user accounts as of December 31, 2006, we cannot assure you that WoW will continue to attract as many users as are required for our operation on a commercially viable basis. We have made significant financial commitments in connection with the licensing and operating of WoW in China. We are obligated to pay royalties equal to 22% of the face value of WoW prepaid cards and online points and either 37.7% or 39% of the face value of the CD-Keys sold by us by making recoupable advances against royalty payments in an aggregate amount of approximately US\$51.3 million over a four-year period commencing from the game's commercial launch in June 2005. We are also obligated to commit a portion of the revenue from WoW for the marketing and promotion of WoW in China during the four-year license period. If we lose our exclusive WoW license for failing to meet our financial obligations or for other reasons, or if we are unable to generate revenues from WoW exceeding the amount of operating costs and expenses incurred in connection with WoW, our future results of operations will be materially and adversely affected.

If we are unable to maintain a satisfactory relationship with Blizzard or any other online game developer that has licensed a game to us, our future results of operations or the growth of our business may suffer.

If we are unable to maintain a satisfactory relationship with Blizzard or any other online game developer that has licensed a game to us, or if Blizzard or any of our other online game licensors either establishes similar or more favorable relationships with our competitors in violation of its contractual arrangements with us or otherwise, our operating results and our business would be harmed, because our business depends significantly upon our exclusive licenses to operate WoW and other online games in China. While we have obtained from Blizzard a license for the Burning Crusade, an expansion pack for the WoW game, we cannot assure you that Blizzard or any of our other online game licensors will renew its license agreement with us, or grant us an exclusive license for any new online games that it may develop or make expansion packs for existing games available to us in the future. Any deterioration of our relationship with Blizzard or any of our other online game licensors could harm our future results of operations or the growth of our business.

We have incurred net losses in the past and may experience earnings declines or net losses in the future.

We incurred net losses in the first half of 2005. Although we have achieved net profit since the second half of 2005 as a result of the commercial launch of WoW in China, we cannot assure you that we can avoid net losses in the future nor that there will not be any earnings or revenue declines for any future quarterly or other period. We expect that our operating expenses will increase as we incur additional expenditures in connection with our operation of WoW and other new games in China. As a result, any decrease or delay in generating more revenues could result in material operating losses and cause the market price of our ADSs to decline.

Illegal game servers, unauthorized character enhancements and other infringements of our intellectual property rights, as well as theft of in-game goods could harm our business and reputation and materially and adversely affect our results of operation.

With the increase in the number of online game players in China, we have faced the risks of illegal game servers, unauthorized character enhancements and other infringements of our intellectual property rights as well as the risk of theft of in-game goods purchased by

Table of Contents

our customers. Our historical results of operations prior to our commercial launch of WoW in China were materially and adversely affected by illegal game servers. Although we have adopted a number of measures to address illegal server usage, misappropriation of our game server installation software and the establishment of illegal game servers could harm our business and reputation and materially and adversely affect our results of operations.

From time to time, we have detected a number of players who have gained an unfair advantage by installing cheating tools to facilitate character progression. In response to these activities, we have expanded our customer service team dedicated to detecting unauthorized character enhancements. We also require that WoW game players purchase mandatory CD-Keys in order to play the game, which we believe reduces the number of unauthorized characters by preventing players from using cheating tools. In addition, we have installed software patches designed to prevent unauthorized modifications to our execution files. However, we cannot assure you that we will be able to identify and eliminate new illegal game servers, unauthorized character enhancements or other infringements of our intellectual property rights in a timely manner, or at all. The deletion of unauthorized character enhancements requires the affected players to restart with a new character from the starting level, and may result in some of these players ceasing to play the game altogether. In addition, any of our new games may be affected by similar or other infringement of our intellectual property rights. If we are unable to eliminate illegal servers, unauthorized character enhancements or suffer other infringement of our intellectual property rights, our players' perception of the reliability of our games may be negatively impacted, which may reduce the number of players using our games, shorten the life span of our games or adversely affect our results of operations.

Undetected programming errors or flaws in our games could harm our reputation or decrease market acceptance of our games, which would materially and adversely affect our results of operations.

Our games may contain errors or flaws, which may only be discovered after their release, particularly as we launch new games or introduce new features to existing games under tight time constraints. If our games contain programming errors or other flaws, our customers may be less inclined to continue or resume playing our games or recommend our games to other potential customers, and may switch to our competitors' games. Undetected programming errors and game defects can disrupt our operations, adversely affect the game experience of our users, harm our reputation, cause our customers to stop playing our games, divert our resources and delay market acceptance of our games, any of which could materially and adversely affect our results of operations.

We may not be able to prevent others from infringing upon our intellectual property rights, which may harm our business and expose us to litigation.

We regard our proprietary software, domain names, trade names, trade marks and similar intellectual properties as critical to our success. Intellectual property rights and confidentiality protection in China may not be as effective as in the United States or other countries. Monitoring and preventing the unauthorized use of proprietary technology is difficult and expensive. The steps we have taken may be inadequate to prevent the misappropriation of our proprietary technology. Any misappropriation could have a negative effect on our business and operating results. We may need to resort to court proceedings to enforce our intellectual property rights in the future. Litigation relating to our intellectual property might result in substantial costs and diversion of resources and management

Table of Contents

attention away from our business. See Item 3, Key Information Risk Factors Risks Related to Doing Business in China Uncertainties with respect to the PRC legal system could adversely affect us.

If we are unable to license, develop or acquire additional online games, our future revenues and profitability will decline.

In order for our business strategy to succeed over time, we will need to license, acquire or develop new online games that are attractive to users. To achieve this, we will need to anticipate and effectively adapt to rapidly changing consumer tastes and preferences and technological advances. Also, in order to maintain the life span of our new online games, which we believe is typically four to five years for successful online games or two to three years for most other online games, we need to continue to develop and release upgrades to our new online games. We cannot assure you that we will be able to identify appropriate games or enter into arrangements with those game developers to offer these games in China, on terms acceptable to us or at all, or that we can maintain the expected life span of our new online games. We do not have a proven track record in developing proprietary MMORPGs, from which we derive a significant portion of our profits. If we are not able to license, develop or acquire additional attractive online games with lasting appeal to users, our future revenues and profitability will decline.

We face the risks of changing consumer preferences and uncertainty of market acceptance of our new products.

Online games are a new and evolving entertainment concept in Asia, particularly in China. The level of demand and market acceptance of our online games are subject to a high degree of uncertainty. This uncertainty is particularly relevant in our current situation because we are relying on a single MMORPG for substantially all of our revenues. Our future operating results will depend on numerous factors beyond our control. These factors include:

the popularity of WoW and other new online games operated by us;

Blizzard's timely upgrades of WoW to extend WoW's life span and to maintain WoW's competitive position in the online game market in China;

the introduction of new online games, competing with or replacing our existing online games;

general economic conditions, particularly economic conditions adversely affecting discretionary consumer spending;

changes in customer tastes and preferences;

the availability of other forms of entertainment;

critical reviews and public tastes and preferences, all of which change rapidly and cannot be predicted; and

the acceptance by customers of the purchase of in-game items.

Our ability to plan for product development and distribution and promotional

Table of Contents

activities will be significantly affected by our ability to anticipate and adapt to relatively rapid changes in consumer tastes and preferences. Currently, one of the most popular types of online games in China is the MMORPG. However, there is no assurance that MMORPGs will continue to be popular in China or that their popularity will not be replaced by new and different types of online or other games in the future. A decline in the popularity of online games in general or the MMORPGs that we operate, will likely adversely affect our business and prospects.

In addition, we expect that as we introduce new MMORPGs, a certain portion of our existing customers will switch to the new games. If this transfer of players from our existing games exceeds our expectations, we may have to adjust our marketing, pricing and other business plans and, as a result, our growth and profitability could be materially and adversely affected.

We may not be able to maintain our market share and profitability as we operate in a highly competitive industry and compete against many companies.

There are currently over 100 online game operators in China. We expect more companies to enter the online game industry in China and a wider range of online games to be introduced to the Chinese market, given the relatively low entry barriers to the online game industry. Our competitors vary in size and include large companies, many of which have significantly greater financial, marketing and game development resources and name recognition than we have, such as Shanda Interactive Entertainment Limited, Netease.com, Inc. and Sina Corporation. As a result, we may not be able to devote adequate resources to designing, developing or acquiring new games, undertaking extensive marketing campaigns, adopting aggressive pricing policies, paying high compensation to game developers or compensating independent game developers to the same degree as certain of our competitors. Our competitors may introduce new business methods, such as charging customers a flat user fee. If these new business methods are more attractive to customers than the business methods we currently use, our customers may switch to our competitors' games, and we may lose market share. We cannot assure you that we will be able to compete successfully against any new or existing competitors, or against any new business methods implemented by them. In addition, the increased competition we anticipate in the online game industry may also reduce the number of our users or growth rate of our user base, reduce the average number of hours played by our users, or cause us to reduce usage fees. All of these competitive factors could adversely affect our operational success, cash flows, operating margins and profitability.

Future acquisitions may have an adverse effect on our ability to manage our business.

Selective acquisitions form a part of our strategy to further expand our business. As we have yet to make any significant acquisitions other than our acquisition of a 31.1% interest in C9I, we do not have any prior experience integrating any new company into ours. Accordingly, we believe that integration of a new company's operations and personnel into ours will require significant attention of our management. The diversion of our management's attention away from our business and any difficulties encountered in the integration process could have an adverse effect on our ability to manage our business.

We intend to selectively acquire companies, technologies and personnel that are complementary to our existing business. Our ability to grow through future acquisitions, investments or organic means will depend on the availability of suitable acquisition and

Table of Contents

investment candidates at an acceptable cost, our ability to compete effectively to attract these candidates, and the availability of financing to complete larger acquisitions. We may face significant competition in acquiring new businesses or companies, which may hinder the execution of our growth strategy. Future acquisitions or investments could result in potential dilutive issuance of equity securities or incurrence of debt, contingent liabilities or amortization expenses related to goodwill and other intangible assets, any of which could adversely affect our financial condition and results of operations. The benefits of an acquisition or investment may also take considerable time to develop and we cannot be certain that any particular acquisition or investment will produce its intended benefits. Future acquisitions would also expose us to potential risks, including risks associated with the assimilation of new operations, technologies and personnel, unforeseen or hidden liabilities, the diversion of resources from our existing businesses, sites and technologies, the inability to generate sufficient revenue to offset the costs and expenses of acquisitions, and potential loss of, or harm to, our relationships with employees, customers, licensors and other suppliers as a result of integration of new businesses.

We may need additional financing and we may not be able to obtain it on terms acceptable to us, or at all.

We believe that our current cash and cash equivalents and cash flow from operations will be sufficient to meet our anticipated cash needs for the foreseeable future. We may, however, require additional cash resources due to changes in business conditions or other future developments, including any investments or acquisitions we may decide to pursue. We have made significant financial commitments under the license agreements with the licensors of the MMORPGs operated by us. If our resources are insufficient to satisfy our cash requirements, we may seek additional financing in the form of additional sales of our shares, issuance of debt securities or through obtaining a credit facility. These forms of financing may result in dilution to our shareholders or increased debt service obligations, and could result in operating and financing covenants that would restrict our operations. We cannot assure you that any such future financing will be available to us in amounts or on terms acceptable to us, if at all.

Any failure to maintain a stable and efficient distribution network could materially and adversely affect our business and results of operations.

Online payment systems in China are at an early stage of development and are not as widely available or acceptable to consumers in China as in the United States and other developed countries. See Item 3, Key Information Risk Factors Risk Related to Doing Business in China The law and regulations governing the online game industry in China are developing and subject to future changes. If we fail to obtain or maintain all applicable permits and approvals, our business and operations would be materially and adversely affected . As a result, we rely heavily on a distribution network composed of third party distributors for the sale of our game playing time to end users. We do not have long-term agreements with any of our distributors, and cannot assure you that we will continue to maintain favorable relationships with them. If we fail to maintain a stable and efficient distribution network, our business and results of operations could be materially and adversely affected.

Table of Contents

We rely on services from third parties to carry out our businesses and to deliver our prepaid cards to customers, and if there is any interruption or deterioration in the quality of these services, our customers may cease using our products and services.

We rely on distributors throughout China to sell prepaid online playing time for our MMORPGs. Also, we rely on third-party licenses for some of the software underlying our technology platform as well as China Telecom's Internet data centers to host our servers. See Item 4, Information on the Company Business Overview Pricing, Distribution and Marketing. Any interruption in our ability to obtain the services of these or other third parties or deterioration in their performance could impair the timeliness and quality of our services. Furthermore, if our arrangements with any of these third parties are terminated or modified against our interest, we may not be able to find alternative channels of distribution on a timely basis or on terms favorable to us. If any of these events occurs, our customers may cease using our products and services.

We obtain WoW playing time information from a third party and use that information in connection with our recognition of revenues from sale of WoW playing time in China.

We obtain WoW playing time information from a third party and use that information in connection with our recognition of revenues from sale of WoW playing time in China. Since June 2005, substantially all of our revenues have been generated from our sale of WoW playing time in China. We sell game playing time primarily through the sales of prepaid cards and prepaid online points to distributors, who in turn sell them to our customers who play our games. Prepaid fees received from distributors for sales of game cards and online points are recognized as revenue only upon the customer's actual use of game playing time or the expiration of their game cards or online points. VUG maintains the systems that record and track the time that our customers spend playing the WoW game on our behalf. We are provided with data on customers' actual usage of WoW playing time by VUG, and use that data in connection with our recognition of revenues from the sale of WoW playing time in China. We do not have direct access to the systems maintained by VUG. If VUG suffers any data loss or miscalculates the time our customers spend playing the WoW game, our results of operation may be adversely affected.

Unexpected network interruptions caused by system failures or other internal or external factors may lead to user attrition, revenue reductions and may harm our reputation.

Any failure to maintain the satisfactory performance, reliability, security and availability of our network infrastructure may cause significant harm to our reputation and our ability to attract and maintain users. The system hardware for our operations is located in several cities in China. We maintain backup system hardware in Shanghai, Shenzhen, Chengdu and Beijing. Any server interruptions, break-downs or system failures in the cities where we maintain our system hardware, including failures that may be attributable to sustained power shutdowns, or other events within or outside our control that could result in a sustained shutdown of all or a material portion of our services, could adversely impact our ability to service our users.

Our network systems are also vulnerable to damage from computer viruses, fire, flood, power loss, telecommunications failures, computer hacking and similar events. We do not maintain insurance policies covering losses relating to our systems and we do not have business interruption insurance.

Table of Contents

Our business may be harmed if our technology becomes obsolete or if our system infrastructure fails to operate effectively.

The online game industry is subject to rapid technological change. We need to anticipate the emergence of new technologies and games, assess their acceptance and make appropriate investments. If we are unable to do so, new technologies in online game programming or operations could render WoW or other games obsolete or unattractive.

We use internally developed Pass9 and other software systems that support nearly all aspects of our billing and payment transactions. Our business may be harmed if we are unable to upgrade our systems fast enough to accommodate future traffic levels, avoid obsolescence or successfully integrate any newly developed or acquired technology with our existing systems. Capacity constraints could cause unanticipated system disruptions and slower response times, affecting data transmission and game play. These factors could, among other things, cause us to lose existing or potential customers and existing or potential game developer partners.

Our results of operations may be materially and adversely affected if our licensors cannot prevail on future intellectual property rights claims brought against them by third parties.

We expect to continue to derive substantially all of our revenues and profits from WoW and other licensed online games in the near future. Any of our licensors may be subject to intellectual property rights claims with respect to the online game it licensed to us. If any of our licensors cannot prevail on the intellectual property rights claims brought against it, we would lose our license from such licensor and may not be able to obtain the license from the legitimate owner of the game, and our results of operations could be materially and adversely affected.

We may be subject to future intellectual property rights claims or other claims which could result in substantial costs and diversion of our financial and management resources away from our business.

There is no assurance that our online games or other content posted on our websites do not or will not infringe upon patents, valid copyrights or other intellectual property rights held by third parties. We may be subject to legal proceedings and claims from time to time relating to the intellectual property of others in the future. In addition, some of our employees were previously employed at other companies including our current and potential competitors. We also intend to hire additional personnel to expand our product development and technical support teams. To the extent these employees have been involved in research at our company similar to research in which they have been involved at their former employers, we may become subject to claims that such employees may have used or disclosed trade secrets or other proprietary information of their former employers. In addition, our competitors may file lawsuits against us in order to gain an unfair competitive advantage over us. Although we are not aware of any pending or threatened claims, if any such claim arises in the future, litigation or other dispute resolution proceedings may be necessary to retain our ability to offer our current and future games, which could result in substantial costs and diversion of our financial and management resources. Furthermore, if we are found to have violated the intellectual property rights of others, we may be enjoined from using such intellectual property rights, incur additional costs to license or develop alternative games and be forced to pay fines and damages, any of which may materially and adversely affect our business and results of operations.

Table of Contents

We experience fluctuations in quarterly operating results.

Our quarterly operating results have fluctuated in the past and will likely fluctuate in the future. These fluctuations in operating results depend on a variety of factors, including the demand for our products and the products of our competitors, the level of usage of illegal game servers, the level of usage of the Internet, the size and rate of growth of the online game market, development and promotional expenses related to the introduction of new products, network interruptions and other system problems, and the recurrence of SARS or the outbreaks of any other contagious diseases such as avian flu. In addition, because our game software is susceptible to unauthorized character enhancements, we may periodically delete characters that are enhanced with unauthorized modifications. This has caused some affected customers to stop playing the game, which, in the aggregate, may cause our operating results to fluctuate.

As an online game operator, our revenues in any quarter are substantially dependent on the amount of game playing time spent by our customers in that quarter. To a significant degree, our operating expenses are based on planned expenditures and our expectations regarding prospective customer usage. Failure to meet our expectations could disproportionately and adversely affect our operating results in any given quarter. As a result, we believe that period-to-period comparisons of operating results are not necessarily indicative of our future results.

Our business depends substantially on the continuing efforts of our senior executives, and our business may be severely disrupted if we lose their services.

Our future success heavily depends upon the continued services of our senior executives. We rely on their expertise in business operations, technology support and sales and marketing and on their relationships with our shareholders, distributors and relevant government authorities. We do not maintain key-man life insurance for any of our key executives. If one or more of our key executives are unable or unwilling to continue in their present positions, we may not be able to replace them easily or at all. As a result, our business may be severely disrupted, our financial condition and results of operations may be materially adversely affected, and we may incur additional expense to recruit and train personnel.

Each of our executive officers has entered into an employment agreement with us, which contains confidentiality and non-competition provisions. If any disputes arise between our executive officers and us, we cannot assure you the extent to which any of these agreements could be enforced in China, where these executive officers reside and hold most of their assets, in light of uncertainties with the PRC legal system. See Item 3, [Key Information](#) [Risk Factors](#) [Risks Related to Doing Business in China](#) [Uncertainties with respect to the PRC legal system](#) could adversely affect us.

If we are unable to attract, train and retain key individuals and highly skilled employees, our business may be adversely affected.

If our business continues to expand, we will need to hire and retain additional qualified employees, including skilled and experienced online game developers. Since our industry is characterized by high demand and intense competition for talent, we may need to offer higher compensation and other benefits in order to retain key personnel in the future. We cannot assure you that we will be able to attract or retain the qualified game developers or other key personnel that we will need to achieve our business objectives. In addition, as we

Table of Contents

are still a relatively young company and our business has grown rapidly since our establishment, our ability to train and integrate new employees into our operations may not meet the increasing demands of our business.

PRC laws and regulations, including the New MII Notice issued in July 2006, restrict foreign ownership of the Internet content provision, Internet culture operation and Internet publishing licenses, and substantial uncertainties exist with respect to the application and implementation of PRC laws and regulations.

We are a Cayman Islands company and, as such, we are classified as a foreign enterprise under PRC laws. Various regulations in China currently restrict foreign or foreign-owned entities from holding certain licenses required in China to provide online games over the Internet, including Internet content provision, or ICP, Internet culture operation and Internet publishing licenses. In light of such restrictions, we rely on Shanghai The9 Information Technology Co., Ltd. (formerly known as Shanghai Jiucheng Information Technology Co., Ltd.), or Shanghai IT, to hold and maintain the licenses necessary for online games in China. Shanghai IT is a PRC company controlled by Jun Zhu and Yong Wang, who are our Chief Executive Officer and Vice President, respectively.

In July 2006, the Ministry of Information Industry, or MII, issued a notice, or the New MII Notice, which prohibits ICP license holders from leasing, transferring or selling a telecommunications business operating license to any foreign investors in any form, or providing any resource, sites or facilities to any foreign investors for their illegal operation of telecommunications business in China. The notice also requires that ICP license holders and their shareholders directly own the domain names and trademarks used by such ICP license holders in their daily operations. The notice further requires each ICP license holder to have the necessary facilities for its approved business operations and to maintain such facilities in the regions covered by its license. In addition, all value-added telecommunication service providers are required to maintain network and information security in accordance with the standards set forth under relevant PRC regulations. The local authorities in charge of telecommunications services are required to ensure that existing ICP license holders will conduct a self-assessment of their compliance with the New MII Notice and to submit status reports to the MII before November 1, 2006. Since the New MII Notice was issued, we have transferred to Shanghai IT almost all of the domain names used in its daily operations and are in the process of transferring to Shanghai IT certain trademarks used in its daily operations, as required under the New MII Notice. As the transfer of registered trademarks requires the approval of the relevant PRC governmental agencies, we have not completed the transfer of relevant trademarks to Shanghai IT, nor can we assure you when we will obtain necessary approvals for such transfer. If we or Shanghai IT are found to be in violation of any existing or future PRC laws or regulations, including the New MII Notice, the relevant governmental authorities, according to the nature of the violation, would have broad discretion to adopt one or more of the following measures against us, including levying fines, confiscating our income or the income of Shanghai IT, revoking our business licenses or the business license and/or other licenses of Shanghai IT, requiring us and Shanghai IT to restructure our ownership structure or operations, and requiring us or Shanghai IT to discontinue any portion or all of our operations related to online games. Any of these actions could cause significant disruption to our business operations and may materially and adversely affect our business and financial condition and results of operations.

Table of Contents

In the opinion of our PRC counsel, Fangda Partners, the ownership structure and the business operation models of our PRC subsidiaries and consolidated affiliated entities comply with all existing PRC laws, rules and regulations, subject to the transfer of certain trademarks to Shanghai IT as required under the New MII Notice. In addition, no consent, approval or license is required under any of the existing laws and regulations of China for their ownership structure, businesses and operations except for those which we have already obtained or which would not have a material adverse effect on our business or operations as a whole. There are, however, substantial uncertainties regarding the interpretation and application of current or future PRC laws and regulations. Accordingly, we cannot assure you that PRC government authorities will ultimately take a view that is consistent with the opinion of our PRC legal counsel.

We could also face material and adverse tax consequences if the PRC tax authorities determine that our contractual arrangements with Shanghai IT were not made on reasonable commercial terms or otherwise. If that happens, they may adjust our income and expenses for PRC tax purposes in the form of a transfer pricing adjustment. A transfer pricing adjustment could result in a reduction, for PRC tax purposes, of adjustments recorded by Shanghai IT, which could adversely affect us by (i) increasing Shanghai IT's tax liability without reducing our PRC subsidiaries' tax liability, which could further result in late payment fees and other penalties to Shanghai IT for underpaid taxes; or (ii) limiting Shanghai IT's ability to maintain preferential tax treatments and other financial incentives.

We depend on Shanghai IT to hold certain operating licenses. If Shanghai IT violates our contractual arrangements with it, our business could be disrupted and our reputation may be harmed.

Because the PRC government restricts our ownership of Internet content provision, Internet culture operation and Internet publishing businesses in China, we depend on Shanghai IT, in which we have no ownership interest, to hold and maintain certain licenses necessary for our business operations. Our relationship with Shanghai IT is governed by a series of contractual arrangements that are intended to provide us with effective control over these entities, but these contractual arrangements may not be as effective in providing control as direct ownership of these businesses. For example, Shanghai IT could violate its contractual arrangements with us, go bankrupt, suffer from problems in its business or otherwise become unable to perform its contracts with us and, as a result, we may lose the licenses required for our online game operations and our reputation and business could be harmed.

The principal shareholders of Shanghai IT have potential conflicts of interest with us, which may adversely affect our business.

Our Chief Executive Officer, Jun Zhu, and our Vice President, Yong Wang, are also the principal shareholders of Shanghai IT. Thus, conflicts of interest between their duties to our company and Shanghai IT may arise. We cannot assure you that when conflicts of interest arise, these persons will act completely in our interests or that conflicts of interests will be resolved in our favor. In addition, these persons could violate their non-competition or employment agreements with us or their legal duties by diverting business opportunities from us to others. In any such event, we would have to rely on the PRC legal system to enforce these agreements. Any legal proceeding could result in the disruption of our business, diversion of our resources and the incurrence of substantial costs. See Item 3, Key Information Risk Factors Risks Related to Doing Business in China Uncertainties with respect to the PRC legal system could adversely affect us.

Table of Contents

Our subsidiaries in China are subject to restrictions on paying dividends or making other payments.

We are a holding company incorporated in Cayman Islands, and we rely primarily on dividends and other distributions from our subsidiaries in China, The9 Computer Technology Consulting (Shanghai) Co., Ltd., or The9 China, and The9 Interactive Information Technology (Shanghai) Co., Ltd., or C9I China, for our cash requirements. Current PRC regulations restrict our subsidiaries in China from paying dividends in the following two principal aspects: (i) our subsidiaries in China are only permitted to pay dividends out of their respective accumulated profits, if any, determined in accordance with PRC accounting standards and regulations and (ii) these entities are required to allocate at least 10% of their respective accumulated profits each year, if any, to fund certain capital reserves until the cumulative total of the allocated reserves reaches 50% of registered capital, and these reserves are not distributable as cash dividends. See Item 4, Information on the Company Business Overview Government regulations. Further, if these entities incur debt on their behalf in the future, the instruments governing such debt may restrict their ability to pay dividends or make other payments. Our inability to receive dividends or other payments from The9 China or C9I China may adversely affect our ability to continue to grow our business and make cash or other distributions to the holders of our ordinary shares and ADSs. In addition, failure to comply with relevant State Administration of Foreign Exchange, or SAFE, regulations may restrict the ability of our subsidiaries to make dividend payments to us. See Item 3, Key Information Risk Factors Risks Related to Doing Business in China Recent PRC regulations relating to the establishment of offshore special purpose companies by PRC residents may subject our PRC resident shareholders or us to penalties and limit our ability to inject capital into our PRC subsidiary, limit our subsidiary's ability to increase its registered capital, distribute profits to us, or otherwise adversely affect us.

The aggregate net assets of all of our PRC subsidiaries and VIE subsidiaries not distributable in the form of advances, loans or dividends to us as a result of applicable PRC regulations and due to our organizational structure were RMB78.6 million, or 8.3%, and RMB 47.1 million, or 3.5%, of our total consolidated net assets as of December 31, 2005 and 2006, respectively. Our subsidiaries in the PRC or VIE subsidiaries, however, may use such net assets to make payments to the Company or its shareholders, including payments through royalty and license fees under the trademark license agreements or certain other contractual arrangements, subject to the terms and conditions of such agreements and applicable regulations. We have not currently entered into any such arrangements with our subsidiaries in the PRC or with our VIE subsidiaries.

Our business could suffer if we do not successfully manage current growth and potential future growth.

Our current and anticipated growth has placed and will continue to place a significant strain on our management, operational, financial and other resources as we expand our operations and workforce. For example, the total number of our employees increased from 100 as of December 31, 2001 to approximately 960 as of December 31, 2006. In addition, certain of our directors, officers and employees have begun to serve our company recently. These new personnel will have to learn our business and successfully integrate themselves into our company. In addition, we will need to continue to develop and improve our financial and management controls and our reporting systems and procedures. We cannot assure you that we will be able to efficiently or effectively manage the growth of our operations, and any failure to do so may limit our future growth and hamper our business strategy.

Table of Contents

We may not be able to successfully implement our growth strategies.

Our objective is to become a leading provider and developer of multi-platform games in China. In order to achieve this objective, we are pursuing a number of growth strategies, including offering additional MMORPGs, casual games, and games that can be operated on different platforms such as PCs, consoles and hand-held devices. Some of these strategies relate to new services and products for which there are no established markets in China or in which we lack experience and expertise. As a result, we cannot assure you that we will be able to deliver new products or services on a commercially viable basis or in a timely manner, or at all, or that we will be able to successfully implement our other growth strategies. If any of these happens, our competitiveness may be harmed and our business, financial condition and results of operations may be materially and adversely affected.

The recurrence of SARS, or similar adverse public health developments in China, may materially and adversely affect our business and operating results.

In early 2003, several countries in Asia, including China, were affected by the outbreak of severe acute respiratory syndrome, or SARS. During the height of the SARS epidemic in the second quarter of 2003, we experienced a decline in the number of concurrent users of our licensed game MU in China, which we believe resulted largely from the PRC government's decision to close Internet cafés in Beijing and elsewhere to prevent the spread of SARS. Most of our online game players can only access games at Internet cafés. If there is a recurrence of an outbreak of SARS or any outbreaks of other contagious diseases such as avian flu, it may adversely affect our business and operating results. Our operations may be impacted by a number of health-related factors, including, among other things, quarantines or closures of our offices, which could severely disrupt our operations, the sickness or death of our key officers and employees, closure of Internet cafés and other public areas where people access the Internet, and a general slowdown in China's economy. Any of the foregoing events or other unforeseen consequences of public health problems could adversely affect our business and results of operations. We have not adopted any preventive measures or contingency plans to ensure the safety of employees and minimize disruptions or other adverse effects on our operations that may occur due to any outbreaks of contagious diseases such as SARS or avian flu in China.

We could be liable for breaches of security on our websites and fraudulent transactions by users of our websites.

Currently, a portion of our transactions are conducted through our websites. In such transactions, secure transmission of confidential information (such as customers' credit card numbers and expiration dates, personal information and billing addresses) over public networks is essential to maintain consumer confidence. Our current security measures may not be adequate. Security breaches could expose us to litigation and possible liability for failing to secure confidential customer information and could harm our reputation and ability to attract customers.

Table of Contents

Existing major shareholders have substantial control over us and could delay or prevent a change in corporate control.

Incsight Limited, or Incsight, a company wholly owned by Jun Zhu, our Chairman and Chief Executive Officer, and Bosma Limited, the two largest shareholders of our company, currently own, in the aggregate, a majority of our outstanding ordinary shares. Incsight and Bosma have entered into a voting agreement to vote together with respect to election of our directors. See Item 6, Directors, Senior Management and Employees Board Practices Voting Agreement. As a result, these shareholders will continue to exert significant control over all matters requiring shareholder approval, including but not limited to, the election of directors and approval of significant corporate transactions. This voting power could delay or prevent an acquisition of our company on terms that other shareholders may desire. In addition, the rights of minority shareholders and the fiduciary obligations of directors and majority shareholders in the Cayman Islands may not be as extensive as those in the United States or elsewhere, and the ability to assert shareholder rights may be comparatively limited.

If tax benefits currently available to The9 China, C9I China and Shanghai IT or to us are reduced or repealed, our business could suffer.

The National People's Congress of PRC adopted the new Enterprise Income Tax Law (New Tax Law) on March 16, 2007, which imposes a single unified EIT rate of 25% for most domestic enterprises and foreign-invested enterprises and will become effective as of January 1, 2008. The New Tax Law contemplates various transition periods and measures for existing preferential tax policies, including a grace period for as long as 5 years for foreign-invested enterprises that are currently entitled to a lower income tax rate and continued implementation of preferential tax treatment with a fixed term until the expiration of such fixed term. Moreover, unlike the tax regulations currently in effect, which specifically exempt withholding taxes on dividends payable to non-PRC investors from foreign-invested enterprises in the PRC, the New Tax Law provides that an income tax rate of 20% will normally be applicable to dividends payable by Chinese companies to non-PRC-resident enterprises. In addition, the new law deems an enterprise established offshore but having its management organ in the PRC as a resident enterprise that will be subject to PRC tax on its global income. The term management organ has not yet been defined by the PRC government. High/new-tech enterprises that are specified as strongly supported by the PRC government will be entitled to an income tax rate of 15%. Our subsidiaries that are located in the Pudong New District of Shanghai are currently entitled to a preferential tax rate of 15%. We are currently exempted from withholding taxes on dividends from our subsidiaries. The New Tax Law empowers the PRC State Council to enact appropriate implementing rules and measures and there is no guarantee that we or our subsidiaries will continue to be entitled to this preferential rate. If our subsidiaries are no longer entitled to preferential tax rates, they may be subject to the unified EIT rate of 25%. Any significant increase of EIT rate applicable to The9 China, C9I China and Shanghai IT or imposing of withholding taxes on dividends payable by our subsidiaries to us, or EIT levy on us or any of our subsidiaries or affiliate entities registered outside PRC as a resident enterprise under the New Tax Law will have a material adverse impact on our results of operations and financial conditions.

Table of Contents

We may become a passive foreign investment company, which could result in adverse United States federal income tax consequences to U.S. Holders.

Based on the price of the ADSs and our ordinary shares and the composition of our income and assets, we believe we were not a passive foreign investment company, or PFIC, for United States federal income tax purposes for our taxable year ended December 31, 2006. However, we must make a separate determination each year as to whether we are a PFIC (after the close of each taxable year) and we cannot assure you that we will not be a PFIC for our current taxable year ending December 31, 2007 or any future taxable year. A non-U.S. corporation will be considered a PFIC for any taxable year if either (1) at least 75% of its gross income is passive income or (2) at least 50% of the value of its assets (based on an average of the quarterly values of the assets during a taxable year) is attributable to assets that produce or are held for the production of passive income. The market value of our assets is generally determined largely by reference to the market price of our ADSs and ordinary shares, which may fluctuate considerably. In addition, the composition of our income and assets will be affected by how, and how quickly, we spend the cash we raise in any offering. If we were treated as a PFIC for any taxable year during which a U.S. Holder held an ADS or an ordinary share, certain adverse United States federal income tax consequences could apply to the U.S. Holder. See *Taxation United States Federal Income Taxation Passive Foreign Investment Company*.

Our articles of association contain anti-takeover provisions that could adversely affect the rights of holders of our ordinary shares and ADSs.

Our current articles of association contain provisions that could limit the ability of others to acquire control of our company or cause us to engage in change-of-control transactions. These provisions could have the effect of depriving our shareholders of an opportunity to sell their shares at a premium over prevailing market prices by discouraging third parties from seeking to obtain control of our company in a tender offer or similar transaction. For example, our board of directors is divided into three classes with different terms, each of which will expire each year. The staggered nature of our board would delay the replacement of a majority of our directors and would make changes to the board of directors more difficult than if such a feature were not in place. In addition, our board of directors has the authority, without further action by our shareholders, to issue preferred shares in one or more series and to fix their designations, powers, preferences, privileges, relative participating, optional or special rights and any qualifications, limitations or restrictions, including dividend rights, conversion rights, voting rights, terms of redemption and liquidation preferences, any or all of which may be greater than the rights associated with our ordinary shares, in the form of ADS or otherwise. Preferred shares could be issued quickly with terms calculated to delay or prevent a change in control of our company or make removal of management more difficult. If our board of directors issues preferred shares, the price of our ADSs may fall and the voting and other rights of the holders of our ordinary shares and ADSs may be adversely affected.

We have limited business insurance coverage in China.

The insurance industry in China is still at an early stage of development. Insurance companies in China offer limited business insurance products. As a result, we do not have any business liability or disruption insurance coverage for our operations in China. Any business disruption, litigation or natural disaster might result in our incurring substantial costs and the diversion of our resources.

Table of Contents

Some of our subsidiaries and affiliated entities in China engaged in certain business activities beyond the authorized scope of their respective licenses, and if they are subject to administrative penalties or fines, our operating results may be adversely affected.

Some of our subsidiaries and affiliated entities in China engaged in business activities that were not within the authorized scope of their respective licenses. For example, in 2006, The9 China was engaged in the distribution of WoW-related accessories, souvenirs and other merchandise. The total sales in 2006 related to such merchandise was approximately RMB0.2 million (US\$0.03 million). The distribution of such merchandise, however, was not within the The9 China's authorized business scope. In addition, in 2005, Shanghai IT was issued a new ICP license with national coverage issued by the Ministry of Information Industry, or the 2005 License, and returned the old ICP license issued in 2003 to the Shanghai Communication Administration. However, the 2005 License does not cover the online bulletin board service that was included in the old ICP license. Shanghai IT is in the process of applying to the Ministry of Information Industry for specific approval for the online bulletin board service. While all of these companies are in the process of obtaining relevant licenses, the relevant PRC authorities have the authority to impose administrative fines or other penalties for their violations, which may in turn adversely affect our operating results.

Failure to achieve and maintain effective internal controls could have a material adverse effect on our business, results of operations and the trading price of our ADSs.

We are subject to the reporting obligations under U.S. securities laws. The Securities and Exchange Commission, or the SEC, as required by Section 404 of the Sarbanes-Oxley Act of 2002, has adopted rules requiring public companies to include a report of management in its annual report that contains an assessment by management of the effectiveness of such company's internal control over financial reporting. In addition, beginning with the year ended December 31, 2007, an independent registered public accounting firm for a public company must attest to and report on the effectiveness of the company's internal control over financial reporting.

Our management has conducted an evaluation of the effectiveness of our internal control over financial reporting and concluded that our internal control over financial reporting was effective as of December 31, 2006. If we fail to maintain the effectiveness of our internal control over financial reporting, we may not be able to conclude on an ongoing basis that we have effective internal controls over financial reporting in accordance with the Sarbanes-Oxley Act. Effective internal controls are necessary for us to produce reliable financial reports. As a result, any failure to achieve and maintain effective internal controls over financial reporting could result in the loss of investor confidence in the reliability of our financial statements, which in turn could negatively impact the trading price of our ADSs. Furthermore, we may need to incur additional costs and use additional management and other resources in an effort to comply with Section 404 of the Sarbanes-Oxley Act and other requirements going forward.

Risks Related to Doing Business in China

Our business may be adversely affected by public opinion and government policies in China.

Currently, most of our recurring users are young males, including students. Due to the higher degree of user loyalty to MMORPGs, easy access to PCs and Internet cafés, and lack of more appealing forms of entertainment in China, many teenagers frequently play online

Table of Contents

games. This may result in these teenagers spending less time on, or refraining from, other activities, including education and sports. Internet cafés, which are currently the most important outlets for online games, have been criticized by the general public in China as exerting a negative influence on young people. Due primarily to such adverse public reaction, some local governments in China have tightened their regulation of Internet café operations through, among other things, limiting the number of the new operating licenses to be issued and further reducing the hours during which the Internet cafés are permitted to open for business. Also, local and higher-level governmental authorities may from time to time decide to more strictly enforce the customers' age limit and other requirements relating to Internet cafés as a result of the occurrence of, and the media attention on, gang fights, arson or other incidents in or related to Internet cafés. As a significant portion of our customers access our games from Internet cafés, any restrictions on Internet café operations could result in a reduction of the amount of time our customers spend on our online games or a reduction or slowdown in the growth of our customer base, thus adversely affecting our business and results of operations.

More recently, in April 2007, various governmental authorities, including GAPP, the Ministry of Information Industry, the Ministry of Education, the Ministry of Public Security, and other relevant authorities jointly issued a circular concerning the mandatory implementation of an anti-fatigue system in online games, which is aimed at protecting the physical and psychological health of minors. This circular requires that all online games incorporate an anti-fatigue system and an identity verification system, both of which may limit the amount of time that a minor or other user may continuously spend playing an online game. For online games currently in operation or in open beta testing, the development of these systems must be completed and made effective prior to July 16, 2007. We will be required to implement such anti-fatigue and identification systems on all of our online games. The implementation of these systems, or enactment by the PRC government of any additional laws to further tighten its administration over the Internet and online games or its supervision of Internet cafés may result in less time spent by customers or fewer customers playing our online games, which may materially and adversely affect our business results and prospects for future growth.

Adverse changes in political and economic policies of the PRC government could have a material adverse effect on the overall economic growth of China, which could reduce the demand for our services and adversely affect our competitive position.

Substantially all of our operations are conducted in China and substantially all of our revenues are sourced from China. Accordingly, our results of operations, financial condition and prospects are subject to a significant degree to the economic, political and legal developments of China. Since the late 1970s, the PRC government has been reforming the economic system in China. These reforms have resulted in significant economic growth. However, we cannot predict the future direction of economic reforms or the effects such measures may have on our business, financial position or results of operations. Furthermore, while the economy of China has experienced significant growth in the past twenty years, growth has been uneven, both geographically and among various sectors of the economy. Any adverse change in the economic conditions in China, in policies of the PRC government or in laws and regulations in China, could have a material adverse effect on the overall economic growth of China and investment in the online game industry. Such developments could adversely affect our businesses, lead to reduction in demand for our services and adversely affect our competitive position.

Table of Contents

The laws and regulations governing the online game industry in China are developing and subject to future changes. If we fail to obtain or maintain all applicable permits and approvals, our business and operations would be materially and adversely affected.

The online game industry in China is highly regulated by the PRC government. Various regulatory authorities of the PRC central government, such as the State Council, the Ministry of Information Industry, the GAPP, the Ministry of Culture and the Ministry of Public Security, are empowered to issue and implement regulations governing various aspects of the online games industry.

We are required to obtain applicable permits or approvals from different regulatory authorities in order to provide online games. For example, an Internet content provider, or ICP, must obtain an ICP license in order to engage in any commercial ICP operations within China. In addition, an online games operator must also obtain a license from the Ministry of Culture and a license from the GAPP in order to distribute games through the Internet. Furthermore, online games, as a form of software products, are required to be registered with the Ministry of Information Industry or its local counterparts and obtain software products registration numbers and software products registration certificates. However, as the Ministry of Information Industry has not been strictly implementing this requirement, we have not applied for registration for some of our online games, including WoW. If the Ministry of Information Industry begins to tighten its administration on online games and strictly require online games to be registered, and if we fail to make timely registration for our games as required, we may be subject to fines or penalties, including being ordered to cease operation of unregistered online games.

If we fail to maintain any of these required permits or approvals, we may be subject to various penalties, including fines and the discontinuation or restriction of our operations. Any such disruption in our business operations would materially and adversely affect our financial condition and results of operations.

As the online games industry is at an early stage of development in China, new laws and regulations may be adopted from time to time to require additional licenses and permits other than those we currently have, and address new issues that arise from time to time. As a result, substantial uncertainties exist regarding the interpretation and implementation of current and any future PRC laws and regulations applicable to the online gaming industry. However, we cannot assure you that we will be able to timely obtain this license or any other new license required in the future, or at all. While we believe that we are in compliance in all material respects with all applicable PRC laws and regulations currently in effect, we cannot assure you that we will not be found in violation of any current or future PRC laws and regulations.

Intensified government regulation of Internet cafés could limit our ability to maintain or increase our revenues and expand our customer base.

In April 2001, the PRC government began tightening its supervision of Internet cafés, closing unlicensed Internet cafés, requiring those remaining open to install software to prevent access to sites deemed subversive and requiring web portals to sign a pledge not to host subversive sites. Furthermore, the PRC government's policy, which encourages the development of a limited number of national and regional Internet café chains and discourages the establishment of independent Internet cafés, may slow down the growth of Internet cafés. Currently, the issuance of Internet café licenses is subject to the overall

Table of Contents

planning of the Ministry of Culture and the local governments in respect of total number and locations of Internet cafés. Since 2004, the grant of new Internet café licenses has been suspended from time to time, and was again suspended in 2007. As Internet cafés are the primary venue for users to play our games, any reduction in the number, or any slowdown in the growth, of Internet cafés in China will limit our ability to maintain or increase our revenues and expand our customer base, which will in turn materially and adversely affect our business and results of operations.

Regulation and censorship of information disseminated over the Internet in China may adversely affect our business, and we may be liable for information displayed on, retrieved from, or linked to our Internet websites.

The PRC government has adopted certain regulations governing Internet access and the distribution of news and other information over the Internet. Under these regulations, Internet content providers and Internet publishers are prohibited from posting or displaying over the Internet content that, among other things, violates PRC laws and regulations, impairs the national dignity of China, or is obscene, superstitious, fraudulent or defamatory. Failure to comply with these requirements could result in the revocation of ICP and other required licenses and the closure of the concerned websites. The website operator may also be held liable for such prohibited information displayed on, retrieved from or linked to such website.

The Ministry of Culture has issued a notice reiterating the government's policies to prohibit the distribution of games with violence, terror, cruelty or other elements that are believed to have the potential effect of instigating crimes, and to prevent the influx of harmful cultural products from overseas. The notice requires, among other things, the review and prior approval of all the new online games licensed from foreign game developers and related license agreements and the filing of domestically developed online games. We have obtained the necessary approvals from the Ministry of Culture for operating WoW and MU in China, and completed the relevant filing requirement with respect to Joyful Journey West, or JJW. We will submit new games for the required review or filing in due course. The Ministry of Culture may find the content of our new licensed games objectionable, and we may otherwise be unable to obtain the approvals for these games in a timely manner, or at all. If this happens, we will not be able to launch our new licensed games within the expected timeframe or at all, and our business and results of operations could be materially adversely affected.

In addition, the Ministry of Information Industry has published regulations that subject website operators to potential liability for content included on their websites and the actions of users and others using their websites, including liability for violations of PRC laws prohibiting the dissemination of content deemed to be socially destabilizing. The Ministry of Public Security has the authority to order any local Internet service provider, or ISP, to block any Internet website maintained outside China at its sole discretion. Periodically, the Ministry of Public Security has stopped the dissemination over the Internet of information which it believes to be socially destabilizing. The State Secrecy Bureau, which is directly responsible for the protection of State secrets of the PRC government, is authorized to block any website it deems to be leaking State secrets or failing to meet the relevant regulations relating to the protection of State secrets in the dissemination of online information.

As these regulations are relatively new and subject to interpretation by the relevant authorities, it may not be possible for us to determine in all cases the type of content that could result in liability for us as a website operator. In addition, we may not be able to control or restrict the content of other Internet content providers linked to or accessible through our

Table of Contents

websites, or content generated or placed on our websites by our users, despite our attempt to monitor such content. To the extent that regulatory authorities find any portion of our content objectionable, they may require us to limit or eliminate the dissemination of such information or otherwise curtail the nature of such content on our websites, which may reduce our user traffic and have a material adverse effect on our financial condition and results of operations. In addition, we may be subject to significant penalties for violations of those regulations arising from information displayed on, retrieved from or linked to our websites, including a suspension or shutdown of our operations.

Future movements in exchange rates between the U.S. dollar and RMB may adversely affect the value of our ADSs.

We are exposed to foreign exchange risk arising from various currency exposures. Our payments to Webzen and VUG and a significant portion of our financial assets are denominated in U.S. dollars while almost all of our revenues are denominated in RMB, the legal currency in China. We have not used any forward contracts or currency borrowings to hedge our exposure to foreign currency risk. The value of RMB against the U.S. dollar and other currencies may fluctuate and is affected by, among other things, changes in political and economic conditions. The conversion of RMB into foreign currencies, including U.S. dollars, has been based on rates set by the People's Bank of China. On July 21, 2005, the PRC government changed its decade-old policy of pegging the value of the Renminbi to the U.S. dollar. Under the new policy, RMB is permitted to fluctuate within a narrow and managed band against a basket of certain foreign currencies. This change in policy has resulted in an approximately 5.7% appreciation of RMB against the U.S. dollar by the end of 2006. Additionally, in May 2007, the PRC government increased the daily trading band of RMB against a basket of certain foreign currencies from 0.3% to 0.5%. While the international reaction to these RMB revaluations have generally been positive, there remains significant international pressure on the PRC government to adopt an even more flexible currency policy, which could result in a further and more significant appreciation of the RMB against the U.S. dollar.

Any significant revaluation of RMB may adversely affect our cash flows and financial position, and the value of, and any dividends payable on, our ADSs in U.S. dollars. For example, an appreciation of RMB against the U.S. dollar would make any new RMB denominated investments or expenditures more costly to us, to the extent that we need to convert U.S. dollars into RMB for such purposes. An appreciation of RMB against the U.S. dollar would also result in foreign currency translation losses for financial reporting purposes when we translate our U.S. dollar denominated financial assets into RMB, as RMB is our reporting currency.

Restrictions on currency exchange in China limit our ability to utilize our revenues effectively, make dividend payments and meet our foreign currency denominated obligations.

Because substantially all of our revenues are in RMB, restrictions on currency exchange in China limit our ability to utilize revenue generated in RMB to fund our business activities outside China, make dividend payments in U.S. dollars, or obtain and remit sufficient foreign currency to satisfy our foreign currency-denominated obligations, such as license fees and royalty payments. The principal regulation governing foreign currency exchange in China is the Foreign Currency Administration Rules (1996), as amended. Under such rules, RMB is freely convertible for trade and service-related foreign exchange transactions, but not for direct investment, loan or investment in securities outside China

Table of Contents

unless the prior approval of SAFE is obtained. Although the PRC government regulations now allow greater convertibility of RMB for current account transactions, significant restrictions still remain. For example, foreign exchange transactions under our PRC subsidiaries' capital account, including principal payments in respect of foreign currency-denominated obligations, remain subject to significant foreign exchange controls and the approval of SAFE. These limitations could affect our ability to obtain foreign exchange for capital expenditures. We cannot be certain that the PRC regulatory authorities will not impose more stringent restrictions on the convertibility of RMB, especially with respect to foreign exchange transactions.

Recent PRC regulations relating to the establishment of offshore special purpose companies by PRC residents may subject our PRC resident shareholders or us to penalties and fines, and limit our ability to inject capital into our PRC subsidiary, limit our subsidiary's ability to increase its registered capital, distribute profits to us, or otherwise adversely affect us.

On October 21, 2005, SAFE issued the Notice on Issues Relating to the Administration of Foreign Exchange in Fund-raising and Reverse Investment Activities of Domestic Residents Conducted via Offshore Special Purpose Companies, or SAFE Circular Notice 75, which became effective as of November 1, 2005. According to Notice 75, prior registration with the local SAFE branch is required for PRC residents to establish or to control an offshore company for the purposes of financing that offshore company with assets or equity interests in an onshore enterprise located in the PRC. An amendment to registration or filing with the local SAFE branch by such PRC resident is also required for the injection of equity interests or assets of an onshore enterprise in the offshore company or overseas fund raised by such offshore company, or any other material change involving a change in the capital of the offshore company.

Moreover, Notice 75 applies retroactively. As a result, PRC residents who have established or acquired control of offshore companies that have made onshore investments in the PRC in the past are required to complete the relevant registration procedures with the local SAFE branch by March 31, 2006. Under the relevant rules, failure to comply with the registration requirements set forth in Notice 75 or the rules implementing Notice 75 may result in restrictions being imposed on the foreign exchange activities of the relevant onshore company, including the increase of its registered capital, the payment of dividends and other distributions to its offshore parent or affiliate and the capital inflow from the offshore entity, and may also subject the relevant onshore companies and PRC residents to penalties under PRC foreign exchange administration regulations.

We have requested all of our shareholders who, based on our knowledge, are PRC residents or whose ultimate beneficial owners are PRC residents to comply with any applicable SAFE registration requirements; however we have no control over our shareholders. We have been informed that our major shareholders, who are PRC residents and subject to the above registration requirements, have made the required SAFE registrations in respect of their investments in us. The failure or inability of such relevant PRC residents to comply with such SAFE registration requirements may subject us or such PRC residents to fines and legal sanctions and may also limit our ability to contribute additional capital into our PRC subsidiary, limit our subsidiary's ability to distribute profits or other distributions to us, or otherwise adversely affect us.

Table of Contents

Uncertainties with respect to the PRC legal system could adversely affect us.

We conduct our business primarily through our subsidiaries and affiliated entities incorporated in China. These entities are generally subject to laws and regulations applicable to foreign investment in China and, in particular, laws applicable to wholly-foreign owned enterprises. In addition, we depend on Shanghai IT to honor its service agreement with us. Almost all of these agreements are governed by PRC law and disputes arising out of these agreements are expected to be decided by arbitration in China. The PRC legal system is based on written statutes. Prior court decisions may be cited for reference but have limited precedential value. Since 1979, PRC legislation and regulations have significantly enhanced the protections afforded to various forms of foreign investments in China. However, since the PRC legal system continues to rapidly evolve, the interpretations of many laws, regulations and rules are not always uniform and enforcement of these laws, regulations and rules involve uncertainties, which may limit legal protections available to us. In addition, any litigation in China may be protracted and result in substantial costs and diversion of resources and management attention.

The limited use of personal computers in China and the relatively high cost of Internet access with respect to per capita gross domestic product may limit the development of the Internet in China and impede our growth.

Although the use of personal computers in China has increased in recent years, the penetration rate for personal computers in China is significantly lower than in the United States and other developed countries. Furthermore, despite a decrease in the cost of Internet access in China due to a decrease in the cost of personal computers and the introduction and expansion of broadband access, the cost of Internet access still remains relatively high compared to the average per capita income in China. The limited use of personal computers in China and the relatively high cost of Internet access may limit the growth of our business. In addition, there is no assurance that there will not be any increase in Internet access or telecommunication fees in China. If that happens, the number of our users may decrease and the growth of our user base may be materially impeded.

The continued growth of China's Internet market depends on the establishment of an adequate telecommunications infrastructure.

Although private sector Internet service providers currently exist in China, almost all access to the Internet is maintained through state-owned telecommunication operators under the administrative control and regulatory supervision of China's Ministry of Information Industry. In addition, the national networks in China connect to the Internet through government-controlled international gateways. These government-controlled international gateways are the only channel through which a domestic PRC user can connect to the international Internet network. We rely on this infrastructure to provide data communications capacity primarily through local telecommunications lines. Although the government has announced plans to develop aggressively the national information infrastructure, we cannot assure you that this infrastructure will be developed as planned or at all. In addition, we will have no access to alternative networks and services, on a timely basis if at all, in the event of any infrastructure disruption or failure. The Internet infrastructure in China may not support the demands necessary for the continued growth in Internet usage.

Table of Contents

Risks Related to Our Shares and ADSs

The future sales or issuance of a substantial number of our ADSs or ordinary shares could adversely affect the price of our ADSs.

If our shareholders sell substantial amounts of our ADSs, including those issued upon the exercise of outstanding options, in the public market, the market price of our ADSs could fall. Such sales also might make it more difficult for us to sell equity or equity-related securities in the future at a time and price that we deem appropriate. If any existing shareholder or shareholders sell a substantial amount of ordinary shares, the prevailing market price for our ADSs could be adversely affected.

In addition, we may issue additional ordinary shares or ADSs for future acquisitions. If we pay for our future acquisitions in whole or in part with additionally issued ordinary shares or ADSs, your ownership interests in our company would be diluted and this, in turn, could have a material adverse effect on the price of our ADSs.

The market price for our ADSs may be volatile.

The market price for our ADSs is likely to be highly volatile and subject to wide fluctuations in response to factors including the following:

actual or anticipated fluctuations in our quarterly operating results;

announcements of new games by us or our competitors;

changes in financial estimates by securities analysts;

price fluctuations of publicly traded securities of other China-based companies engaging in Internet-related services or other similar businesses;

conditions in the Internet or online game industries;

changes in the economic performance or market valuations of other Internet or online game companies;

announcements by us or our competitors of significant acquisitions, strategic partnerships, joint ventures or capital commitments;

addition or departure of key personnel; and

pending and potential litigation.

In addition, the securities market has from time to time experienced significant price and volume fluctuations that are not related to the operating performance of particular companies. These market fluctuations may also materially and adversely affect the market price of our ADSs.

Table of Contents

You may face difficulties in protecting your interests, and our ability to protect our rights through the U.S. federal courts may be limited, because we are incorporated under Cayman Islands law.

Our corporate affairs are governed by our memorandum and articles of association and by the Companies Law (2004 Revision) and common law of the Cayman Islands. The rights of our shareholders and the fiduciary responsibilities of our directors under Cayman Islands law are not as clearly established as they would be under statutes or judicial precedents in the United States. In particular, the Cayman Islands has a less developed body of securities laws as compared to the United States, and provides significantly less protection to investors. Therefore, our public shareholders may have more difficulties in protecting their interests in the face of actions by our management, directors or controlling shareholders than would shareholders of a corporation incorporated in a jurisdiction in the United States. In addition, Cayman Islands companies may not have standing to initiate a shareholder derivative action before the federal courts of the United States. As a result, we may not be able to protect our interests if we are harmed in a manner that would otherwise enable us to sue in a United States federal court.

Your ability to bring an action against us or against our directors and officers, or to enforce a judgment against us or them, will be limited because we are incorporated in the Cayman Islands, because we conduct a substantial portion of our operations in China and because the majority of our directors and officers reside outside of the United States.

We are incorporated in the Cayman Islands, and we conduct a substantial portion of our operations in China through our wholly-owned subsidiaries and several affiliated entities in China. Most of our directors and officers reside outside of the United States and most of the assets of those persons are located outside of the United States. As a result, it may be difficult or impossible for you to bring an action against us or against these individuals in the Cayman Islands or in China in the event that you believe that your rights have been infringed under the securities laws or otherwise. Even if you are successful in bringing an action of this kind, the laws of the Cayman Islands and of China may render you unable to enforce a judgment against our assets or the assets of our directors and officers.

You may not be able to exercise your right to vote.

As a holder of ADSs, you may instruct the depository of our ADSs to vote the shares underlying your ADSs but only if we ask the depository to ask for your instructions. Otherwise, you will not be able to exercise your right to vote unless you withdraw the shares. However, you may not know about the meeting enough in advance to withdraw the shares and, in this regard, pursuant to our articles of association, a shareholders meeting may be convened by us on seven business days' notice. If we ask for your instructions, the depository will notify you of the upcoming vote and arrange to deliver our voting materials to you. We cannot assure you that you will receive the voting materials in time to ensure that you can instruct the depository to vote your shares. In addition, the depository and its agents are not responsible for failing to carry out voting instructions or for the manner of carrying out voting instructions, if any such action or nonaction is in good faith. This means that you may not be able to exercise your right to vote and there may be nothing you can do if the shares underlying your ADSs are not voted as you requested.

Table of Contents

Your right to participate in any future rights offerings may be limited, which may cause dilution to your holdings.

We may from time to time distribute rights to our shareholders, including rights to acquire our securities. However, we cannot make rights available to you in the United States unless we register the rights and the securities to which the rights relate under the Securities Act of 1933, as amended, or the Securities Act, or an exemption from the registration requirements is available. Also, under the deposit agreement, the depositary bank will not make rights available to you unless the distribution to ADS holders of both the rights and any related securities are either registered under the Securities Act, or exempt from registration under the Securities Act. We are under no obligation to file a registration statement with respect to any such rights or securities or to endeavor to cause such a registration statement to be declared effective. Moreover, we may not be able to establish an exemption from registration under the Securities Act. The depositary may, but is not required to, sell such undistributed rights to third parties in this situation. Accordingly, you may be unable to participate in our rights offerings and may experience dilution in your holdings.

You may not receive distributions on ordinary shares or any value for them if it is illegal or impractical to make them available to you.

The depositary of our ADSs has agreed to pay to you the cash dividends or other distributions it or the custodian receives on ordinary shares or other deposited securities after deducting its fees and expenses. You will receive these distributions in proportion to the number of ordinary shares your ADSs represent. However, the depositary is not responsible if it decides that it is unlawful or impractical to make a distribution available to any holders of ADSs. We have no obligation to register ADSs, ordinary shares, rights or other securities under U.S. securities laws. We also have no obligation to take any other action to permit the distribution of ADSs, ordinary shares, rights or anything else to holders of ADSs. This means that you may not receive the distribution we make on our ordinary shares or any value for them if it is illegal or impractical for us to make them available to you. These restrictions may have a material adverse effect on the value of your ADSs.

You may be subject to limitations on transfer of your ADSs.

Your ADSs represented by the ADRs are transferable on the books of the depositary. However, the depositary may close its transfer books at any time or from time to time when it deems expedient in connection with the performance of its duties. In addition, the depositary may refuse to deliver, transfer or register transfers of ADSs generally when our books or the books of the depositary are closed, or at any time if we or the depositary deem it advisable to do so because of any requirement of law or of any government or governmental body, or under any provision of the deposit agreement, or for any other reason.

ITEM 4. INFORMATION ON THE COMPANY

A. History and Development of the Company

We were incorporated in the Cayman Islands in December 1999 under the name GameNow.net Limited and were renamed to The9 Limited in February 2004. We formed GameNow.net (Hong Kong) Limited, or GameNow, on January 17, 2000, as a wholly-owned subsidiary. We have historically conducted our operations in large part through The9 China, a direct wholly-owned subsidiary of GameNow in China.

Table of Contents

In October 2002, we and Webzen formed 9Webzen to launch and operate the MU game in China. 9Webzen established 9Webzen Shanghai as its wholly-owned subsidiary in China on January 29, 2003 to operate MU in China. Prior to December 2005, we held a 51% ownership interest in 9Webzen. In December 2005, we sold and transferred 21% of 9Webzen's issued share capital to Webzen, thus reducing our ownership interest in 9Webzen from 51% to 30%.

In July 2003, we and China Interactive (Singapore) Pte. Ltd., or China Interactive, a privately-held Singaporean company, formed a joint venture, C9I, to acquire an exclusive license from VUG to localize and operate the WoW game in China. We have had effective control over C9I's management and operations since its inception. In February 2005, C9I established a wholly-owned subsidiary, C9I China, to operate WoW in China. We initially owned 54% of C9I and through a series of transactions with China Interactive, C9I became our wholly-owned subsidiary in August 2005.

Due to the current restrictions on foreign ownership of the Internet content provision, Internet culture operation and advertising businesses in China, we rely on the following two affiliated PRC entities in holding certain licenses and approvals necessary for our business operations through a series of contractual arrangements with them and their shareholders:

Shanghai IT, which holds Internet content provision, Internet culture operation and Internet publishing licenses, and

Shanghai Jiucheng Advertisement Co., Ltd., or Shanghai Advertisement, whose business license permits it to conduct advertisement operations.

Shanghai IT is owned by Jun Zhu, our Chairman and Chief Executive Officer and shareholder, and Yong Wang, our Vice President. Shanghai Advertisement is owned by Shanghai IT and Xudong He, our Vice President. We do not have any ownership interest in Shanghai IT and Shanghai Advertisement. However, each of the individual shareholders of Shanghai IT and Shanghai Advertisement has entered into a shareholder voting proxy agreement with us, under which each such shareholder has irrevocably granted us the power to exercise voting rights on all matters to which he is entitled to vote. Each such shareholder has also entered into a call option agreement with us, pursuant to which we and/or any other parties designated by us would be entitled to acquire all or part of the equity interests in Shanghai IT or Shanghai Advertisement, as the case may be, to the extent permitted by the then-effective PRC laws and regulations, for the minimum amount of consideration permissible under applicable PRC laws and regulations. From 2001 to May 2005, we extended interest-free loans in an aggregate amount of RMB23.0 million to the shareholders of Shanghai IT, solely in connection with capitalizing and increasing the registered capital of Shanghai IT. These loans are repayable upon demand. The existing shareholders of Shanghai IT, Jun Zhu and Yong Wang, have pledged all of their equity interests in Shanghai IT in favor of us under an equity pledge agreement. In the event of a breach of any term in the loan agreement or any other agreement by either Shanghai IT or its shareholders, we will be entitled to enforce our rights as a pledgee under the agreement.

Our principal executive office is located at Building No. 3, 690 Bibo Road, Zhangjiang Hi-tech Park, Pudong New Area, Shanghai 201203, People's Republic of China, and our telephone number is (8621) 5172-9999. In addition to our operational headquarters in Shanghai, we currently have small branch offices in Beijing, Chengdu, Nanjing, Shenyang, Wuhan and Xi'an, China.

Table of Contents**Recent Developments****Developments Relating to Our Business***License of New Games*

During the first five months of 2007, we obtained licenses to operate the following games in mainland China:

Game	Developer	Description	Status
Emil Chronicle Online	Gravity Co., Ltd.	2.5D MMORPG	Commercial launch in Japan and preparing for beta testing in China
Ragnarok Online 2	Gravity Co., Ltd.	3D MMORPG	In open beta testing in Korea and preparing for beta testing in China
Huxley	Webzen	3D first-person shooting MMORPG	Preparing for beta testing
EA Sports FIFA Online	Electronic Arts Inc.	Casual soccer game	Commercial launch in Korea and preparing for beta testing in China
Audition 2	G10 Entertainment Korea Corp	Casual dancing game	Preparing for beta testing

In addition, in January 2007, we obtained from Blizzard a license to operate the Burning Crusade expansion pack for the WoW game.

License and Investment by Electronic Arts, Inc.

In May 2007, we obtained from Electronic Arts Inc. (EA) an exclusive license to operate the EA Sports FIFA Online game in mainland China. Concurrently with our license, EA made an equity investment in us consisting of approximately 15 percent of the shares then outstanding for approximately \$167 million.

B. Business Overview

We are a leading online game operator in China. We were ranked as one of the top three online game operators in China in 2006 in terms of market share, according to a survey conducted by a market analyst in December 2006. We began to offer our self-developed online virtual community game the9 City in 2000 and commercialized the9 City in December 2000. Currently, our business is primarily focused on operating MMORPGs, including WoW and other games in China. Because MMORPGs require a significant amount of time to master, they tend to have a high degree of user attraction, which means that users tend to spend greater amounts of time playing these games than using other Internet applications.

Table of Contents

We commercially launched WoW in China in June 2005 through C9I China. WoW is a full-view 3D MMORPG developed by Blizzard Entertainment, the game development studio of VUG, which has developed award-winning PC games including the Warcraft, Diablo and StarCraft series. In 2006, WoW was recognized as the most popular online game in China by the Ministry of Culture. In the years ended December 31, 2005 and 2006, the total revenue attributable to the operations of the WOW game and WOW related product sales were RMB478,748,763, or approximately 98% of total revenue, and RMB1,028,989,688, which represented approximately 99% total revenue, respectively.

We also operate MU through 9Webzen in which we own 30%. 9Webzen has obtained an exclusive license from Webzen to operate MU in China. MU is a 2.5D quarter-view MMORPG developed by Webzen, a leading online game developer and operator in Korea. In addition, we operate Mystina Online, an MMORPG developed by an online game developer in China.

As of December 31, 2006, we had obtained exclusive licenses to operate additional MMORPGs in China, including the following:

An exclusive license obtained from Hanbitsoft, Inc., a Korean game developer, in 2004, to operate Granado Espada, an MMORPG developed by Korean game developer IMC Games, Co., Ltd., which is partly owned by Hanbitsoft, Inc.;

an exclusive license obtained from Webzen in 2005 to operate Soul of the Ultimate Nation[®], or SUN, a 3D MMORPG;

an exclusive license obtained from NCsoft Corporation in 2006 to operate Guild Wars, a competitive online role-playing game; and

an exclusive license obtained from Hanbitsoft, Inc. in 2006 to operate Hellgate: London, an action role-playing game.

We are expanding our own product development capabilities to develop a suite of proprietary online games, including MMORPGs. In September 2006, we commercially launched our first proprietary MMORPG, JJW, which is a side-scrolling MMORPG based on cartoon characters.

We charge customers for the time they spend playing our online games. Our customers typically access our online games through PCs at home or in Internet cafés. They obtain our game playing time primarily through purchasing our prepaid cards at various retail outlets or purchasing online points at one of the more than 210,000 Internet cafés throughout China which have subscribed to our Pass9 system. Pass9 is our proprietary, fully integrated online membership management and payment system, which offers one-stop account management and payment services to our customers and facilitates our payment arrangements with distributors and Internet cafés.

To ensure quality customer service and seamless operations, we maintain a powerful technology platform consisting of numerous servers and network devices located in eight internet data centers throughout China.

Table of Contents

Products and Services

We offer engaging online games including MMORPGs and our self-developed online community game the9 City. Our other products and services include game operating support, website solutions and advertisement services, SMS and sales of our Pass9 system.

MMORPGs. In a typical MMORPG, thousands of players play in the same game world at the same time. MMORPG players can select a specific character to compete within the game with whom they develop experience and enhance game attributes, which can be carried over into next higher game levels. MMORPGs incorporate many cutting-edge technology features, including:

sophisticated 2.5D or 3D graphics which expose players to captivating screen scenes;

player upgrading system which allows players to attain higher game attributes with their characters as they develop experience and enhanced game capabilities over time; and

instant messaging system which allows players to communicate with each other during the game and form groups with other players, thereby coordinating their game skills to achieve collective objectives.

As of December 31, 2006, we had exclusive licenses to operate or own the following MMORPGs in China:

Game	Developer	Description	Status
WoW	Blizzard Entertainment	3D MMORPG	Commercially launched in China in June 2005
MU	Webzen	2.5D quarter-view MMORPG	Commercially launched in China in February 2003
Granado Espada	Hanbitsoft	3D MMORPG	Commercially launched in Korea and Japan and preparing for beta testing in China
SUN	Webzen	3D MMORPG	Commercially launched in China in 2007
Guild Wars	NCsoft Corporation	3D MMORPG	In open beta testing
Joyful Journey West	The9	2D MMORPG	Commercially launched in China in September 2006
Hellgate: London	Flagship Studios, Inc.	3D MMORPG	Ready for initial customer testing

In preparation for commercial launch of a new game, we conduct closed beta testing of the game to resolve operational matters, which is followed by open beta testing in which we allow our registered users to play without charge in open market conditions to ensure performance consistency and stability of operation systems.

Our MMORPGs offer ongoing play experience which allows our users to play the game online 24 hours a day, seven days a week. Our users can access our MMORPGs from

Table of Contents

any location with an Internet connection. Substantially all of our users in China access the game servers either from PCs at home or Internet café outlets equipped with multiple personal computers that have Internet access. Currently, a significant portion of our users access the game through Internet cafés throughout China which sell game playing time to their customers. To offset the impact of the limited use of online and credit card payment systems in China, we have introduced a prepaid game playing time purchase and management system, Pass9. See Item 4, Information on the Company Business Overview Membership Management and Payment System.

Other Products and Services. Our other products and services mainly consist of our online virtual community named the9 City, our game operating support, website solutions and advertisement services, SMS service and sales of our Pass9 system.

The9 City. We launched our online virtual community game the9 City at www.the9.com in 2000 and commercialized it in December 2000. We believe that the9 City is the first commercialized virtual community in China. Our game the9 City was designed based on the idea of a virtual society consisting of mini games. Most of the content offered in the9 City are free of charge. As of December 31, 2006, the9 City had close to 65 million registered users, which we believe have formed a loyal and strong customer base for online games and other products we offer from time to time.

Game Operating Support, Website Solutions and Advertisement Services. Our game operating support, website solutions and advertisement services primarily relate to providing game operating support to 9Webzen in connection with operating MU in China. Our game operating support services to 9Webzen include payment collection and processing, user membership management, production of prepaid cards and other online game related technical support in connection with the operation of MU in China. Prior to the commercial launch of MU in February 2003, we generated a significant portion of our revenue from a variety of different website solutions and advertisement services to third parties, including website development and construction, hardware and software support, training, website maintenance and website advertisements. Since February 2003, we have not pursued any new business opportunities for our website solution and advertisement services.

SMS. Leveraging our existing user base, we offer several different SMS products and subscription packages that enable our users to, among other things, transmit and receive SMS messages, receive password protection and other value-added services.

Pass9. We began to sell our proprietary integrated membership management and payment system, Pass9, in the fourth quarter of 2004. See Membership Management and Payment System below.

Membership Management and Payment System

We pioneered the establishment of Pass9, an integrated membership management and payment system in China in early 2001, allowing us to maintain a single customer database that contains each customer's profile and payment history. Pass9 provides one-stop service to our customers, distributors and developers. Pass9 provides our customers with an integrated platform to log in, pay and use any of the fee-based products and services we offer. It also allows our distributors to sell our online points to Internet cafés, and enables Internet cafés to check the balance of their points and pay us on their customers' behalf. In addition, Pass9 provides our game developer partners with simple interface to integrate their games to our system.

Table of Contents

Our integrated membership management and payment system also incorporates a variety of community-building features, such as chat rooms which provide registered users a platform to interact in real-time groups or one-on-one discussions, and bulletin boards which allow registered users to post notes or inquiries and respond to other users' notes or inquiries. We believe these features encourage user congregation on our site and facilitate player interaction for the games we offer.

Customer Service

Since our inception, we have focused on providing excellent customer service in order to retain our existing customers as well as attract new customers. In November 2003, we received a 9001 service quality authentication certificate from the International Organization for Standardization. We believe that we are the first online game operator in China to receive such a certificate. We were ranked among the top three online game operators in China by market share in 2006 according to a survey conducted by a market analyst in December 2006. Our MMORPG customers can access our customer service center via phone or e-mail at any time, or visit our visitor center in Shanghai during normal business hours.

We have in-game game masters dedicated to each of the MMORPGs that we operate. Game masters are responsible for organizing in-game events, troubleshooting and actively and continuously monitoring the online game environment. Game masters are available to respond to players' inquiries, initiate the bug reporting and removal process, as well as to identify, record and deal with players' inappropriate behavior such as cheating and fighting. We believe that our provision of game masters to monitor the gaming environment is an important element in maintaining our customer loyalty and efficiently addressing technical problems as they arise.

Purchase of Game Playing Time

A customer can purchase game playing time through any of the following methods:

Prepaid Cards. A customer can buy prepaid cards at retail outlets including convenience stores, supermarkets and bookstores all across China. Each prepaid card contains a pass code representing game playing time offered by the card based on its face value.

Prepaid Online Points. Over 210,000 Internet cafés across China have subscribed to our self-developed eSales System, which is part of our Pass9 system and enables an Internet café to buy prepaid online points from our distributors and sell such points to their customers.

Online Payment. A customer can buy game playing time online by charging payment directly to a credit or debit card. In addition, we offer free online game playing time to our new registered customers and users of our SMS service. We have also included free game cards in our marketing materials to attract new customers.

Customers of the WoW game are required to purchase an access code, or CD-Key, to play the game in China. We use the CD-Key as a measure to reduce the use of cheating tools by WoW players. When we discover that a WoW player is using cheating tools, we will

Table of Contents

terminate that user's account and the user will have to purchase another CD-Key to activate his account to play WoW from the beginner level. Our CD-Keys normally carry up to 20 hours of free WoW play time. Once these hours expire, customers must purchase game playing time through one of the methods provided above.

Pricing, Distribution and Marketing

Pricing. We determine the pricing of a game near the end of the free testing period based on several factors, including the prices of other comparable games, the technological and other features of the game, and the targeted marketing position of the game. Our prepaid game cards are offered in a variety of denominations to provide users with maximum flexibility. For instance, a game player may choose to purchase a prepaid game point card with any denomination for a specified number of hours that can be used at any time or a prepaid game subscription card that provides unlimited access to the game for a week or a month. Point cards expire if they are activated but are unused for a specified period of time.

Distribution. Due to the limited availability of online payment systems in China, we sold our game playing time primarily through sales of our prepaid cards and online points to distributors across the country. For WoW, we have entered into agreements with approximately 20 regional distributors for our prepaid cards and over 40 regional distributors for our online points. These regional distributors sell our prepaid game cards and online points to over 500 local distributors who in turn sell the game cards to end users and prepaid online points to Internet cafés throughout China. Our regional distributors were selected after an open and competitive bidding process and our local distributors are normally selected by our regional distributors. As of December 31, 2006, WoW has over 6.8 million activated user accounts and over 210,000 Internet cafés have subscribed to our eSales system, which enables Internet cafes to sell our prepaid online points to their customers. For MU, we have entered into a distribution agreement with Junnet Group to appoint it as the exclusive distributor of our prepaid game cards in China. We may terminate this agreement if Junnet Group fails the required payments to us for two consecutive months.

Marketing. Our overall marketing strategy is to rapidly attract new customers and increase revenues from recurring customers. The marketing programs and promotional activities that we employ to promote our games include:

Advertising and Online Promotion. We advertise in many game magazines and online game sites that are updated regularly.

Cross-Marketing. We have cross-marketing relationships with major consumer brands, technology companies and major telecom carriers. For example, we conducted cross-marketing activities with Coca-Cola in connection with the promotion of WoW in 2005, and have entered into a new agreement to continue this joint marketing campaign through the end of 2006. We believe that our cross-marketing relationships with well-known companies will increase the recognition of our online game brands.

On-Site Promotion. We distribute free game-related posters, promotional prepaid cards for beginners, game-related souvenirs such as watches, pens, mouse pads, calendars and paper bags at trade shows, selected Internet cafés and computer stores.

In-Game Marketing. We conduct in-game marketing programs from time to time, including online adventures for grand prizes. We also regularly hold WoW game tournaments for our customers.

Table of Contents

Game Development and Licensing

We believe that the online game industry in China will continue its recent pattern of developing increasingly sophisticated MMORPGs tailored to the China market. In order to remain competitive, we are focusing our product development efforts on enhancing the Chinese version of the licensed MMORPGs and developing new proprietary online games. Currently, our product development team is responsible for game design, technical development and art design. In addition, we outsource part of our development work to Winking Co. Ltd., a leading online game developer in the PRC.

Our licensing process begins with a preliminary screening, review and testing of a game, followed by a cost analysis, negotiations and licensing of a game, including all regulatory and approval processes. A team is then designated to conduct closed beta testing of the game to resolve operational matters, followed by open beta testing during which our registered users may play the game without charge in open market conditions to ensure performance consistency and stability of operation systems. Testing generally takes three to six months, during which time we commence other marketing activities.

Technology

We aim to build a reliable and secure technology infrastructure to fully support our operations, and we maintain separate technology networks for each of our games. Our current technology infrastructure consists of the following:

servers and network devices located in eight internet data centers throughout China, including, for WoW, as at the end of December 2006, seven dedicated server sites with each site comprised of approximately 48 high-performance server sets, located in Shanghai, Beijing, Chengdu and Shenzhen, with uninterruptible power supply and diesel power generator backup;

proprietary software, including Pass9 and game monitor tools, that are integrated with our websites and customer service center operations; and

hardware platform primarily consisting of Lenovo, Hewlett-Packard/Compaq, Dell, IBM and Cisco servers.

We have a network operation team responsible for stability and security of our network. The team follows the workflow for problem detecting, recording, analyzing and solving. In addition, we frequently upgrade our game server software to ensure the stability of our operation and reduce hacking risks.

Competition

Our major competitors include, but are not limited to, online game operators and major Internet portal operators in China. These include Shanda Interactive Entertainment Limited (which operates Legend of Mir and Actoz Soft's Legend of Mir 2), Guangzhou Optisp's (which operates Wemade's Legend of Mir 3), 163.com affiliated with NetEase (which operates Westward Journey Online and Fantasy Westward Journey) and Sohu.com (which operates Knights Online and Blade Online).

Table of Contents

Our existing and potential competitors may compete with us in marketing activities, quality of online games and sales and distribution network. Some of our existing and potential competitors have significantly greater financial and marketing resources than we do. For a discussion of risks relating to competition, see Risk Factors Risks Related to Our Company We may not be able to maintain our profitability, financial or operational success in our market as we operate in a highly competitive industry and compete against many large companies.

Intellectual Property

Our intellectual property rights include trademarks and domain names associated with the name the9 in China and copyright and other rights associated with our websites, technology platform, self-developed software and other aspects of our business. We regard our intellectual property rights as critical to our business. We rely on trademark and copyright law, trade secret protection, non-competition and confidentiality agreements with our employees, and license agreements with our partners, to protect our intellectual property rights. We require our employees to enter into agreements requiring them to keep confidential all information relating to our customers, methods, business and trade secrets during and after their employment with us and assign their inventions developed during their employment to us. Our employees are required to acknowledge and recognize that all inventions, trade secrets, works of authorship, developments and other processes made by them during their employment are our property.

We have registered our domain names including www.the9.com, www.muchina.com and www.wowchina.com with third-party domain registration entities, and have legal rights over these domain names. We conduct our business under the brand name and the9 logo. We have registered the marks the9, and as well as our logo with the Trade Mark Office of the State Administration for Industry and Commerce in China. We have also filed trademark applications for the marks and in China.

Legal Proceedings

We are not currently a party to any material litigation or other legal proceeding and are not aware of any pending or threatened litigation or other legal proceeding that may have a material adverse impact on our business or operations.

Government Regulations

Current PRC laws and regulations impose substantial restrictions on foreign ownership of the online gaming and Internet content provision businesses in China. As a result, we conduct our online gaming and Internet content provision businesses in China through contractual arrangements with Shanghai IT, our affiliated PRC entity. Shanghai IT is ultimately owned by our shareholder Jun Zhu, and Yong Wang, both of whom are PRC citizens.

In the opinion of our PRC counsel, Fangda Partners, the ownership structure and the business operation models of our PRC subsidiaries and consolidated affiliated entities comply with all existing PRC laws, rules and regulations, subject to the transfer of certain trademarks to Shanghai IT as required under the New MII Notice. In addition, no consent, approval or license is required under any of the existing laws and regulations of China for their ownership structure, businesses and operations except for those which we have already obtained or which would not have a material adverse effect on our business or operations as a whole.

Table of Contents

As the online games industry is at an early stage of development in China, new laws and regulations may be adopted from time to time to require additional licenses and permits other than those we currently have, and address new issues that arise from time to time. As a result, substantial uncertainties exist regarding the interpretation and implementation of current and any future PRC laws and regulations applicable to the online games industry. See Item 3, Risk Factors Risks Related to Doing Business in China The laws and regulations governing the online game industry in China are developing and subject to future changes. If we fail to obtain or maintain all applicable permits and approvals, our business and operations would be materially and adversely affected.

Internet Content Provision Service, Online Gaming and Internet Publishing

Our provision of online game-related content on our websites is subject to various PRC laws and regulations relating to the telecommunications industry, Internet and online gaming, and regulated by various government authorities, including the Ministry of Information Industry, the Ministry of Culture, the GAPP and the State Administration of Industry and Commerce. The principal PRC regulations governing the Internet content provision industry as well as the online gaming services in China include:

Telecommunications Regulations (2000);

The Administrative Rules for Foreign Investments in Telecommunications Enterprises (2001);

The Administrative Measures for Telecommunications Business Operating Licenses (2001);

The Internet Information Services Administrative Measures (2000);

The Tentative Measures for Administration of Internet Culture (2003);

The Notice on Several Issues Relating to the Implementation of The Tentative Measures for Administration of Internet Culture (2003);

The Tentative Measures for Administration of Internet Publication (2002); and

The Foreign Investment Industrial Guidance Catalogue (2004).

In July 2006, the MII issued a notice entitled Notice on Strengthening Management of Foreign Investment in Operating Value-Added Telecommunication Services, or the New MII Notice. The New MII Notice prohibits ICP license holders from leasing, transferring or selling telecommunications business operating license to any foreign investors in any form, or providing any resource, sites or facilities to any foreign investors for their illegal operation of telecommunications business in China. The notice also requires that ICP license holders and their shareholders directly own the domain names and trademarks used by such ICP license holders in their daily operations. The notice further requires each ICP license holder to have the necessary facilities for its approved business operations and to maintain such facilities in the regions covered by its license. In addition, all the value-added telecommunication service providers are required to maintain network and information

Table of Contents

security in accordance with the standards set forth under relevant PRC regulations. The local authorities in charge of telecommunications services are required to ensure that existing ICP license holders will conduct a self-assessment of their compliance with the New MII Notice and to submit status reports to the MII before November 1, 2006. For those which are not in compliance with the above requirements and further fail to rectify the situation, the relevant governmental authorities would have broad discretion to adopt one or more measures against them, including but not limited to revoking their operating licenses. See Risk Factors Risks Related to Our Company PRC laws and regulations, including the New MII Notice issued in July 2006, restrict foreign ownership of the Internet content provision, Internet culture operation and Internet publishing licenses, and substantial uncertainties exist with respect to the application and implementation of PRC laws and regulations.

Under these regulations, a foreign investor is currently prohibited from owning more than 50% of the equity interest in a PRC entity that provides value-added telecommunications services. Internet content provision services are classified as value-added telecommunications businesses, and a commercial operator of such services must obtain a value-added telecommunications business operating license for Internet content provision (the ICP License) from the appropriate telecommunications authorities in order to carry on any commercial Internet content provision operations in China.

With respect to the online gaming industry in China, since online games fall into the definition of Internet culture products under The Tentative Measures for Internet Culture Administration (2003), a commercial operator of online games must, in addition to the ICP License, obtain an Internet culture operation license from the appropriate culture administrative authorities for its operation of online games. Furthermore, according to The Tentative Measures for Internet Publication Administration (2002), the provision of online games is deemed an Internet publication activity. Therefore, an online game operator must obtain the approval from the appropriate press and publication administrative authorities as an Internet publisher in order to carry on its online gaming businesses in China. Furthermore, online games, regardless of whether imported and domestic, must be registered with the Ministry of Information Industry and such online games are subject to a content review and approval by or filing with the Ministry of Culture prior to commencement of operations in China.

The GAPP and the Ministry of Information Industry jointly impose a license requirement for any company that intends to engage in Internet publishing, defined as any act by an Internet information service provider to select, edit and process content or programs and to make such content or programs publicly available on the Internet. Furthermore, the distribution of online game cards and CD-keys for online gaming program are subject to a licensing requirement. Shanghai IT holds the license necessary to distribute electronic publications, which allows it to distribute prepaid cards and CD-Keys for the games we operate. We sell our prepaid cards and CD-Keys through third-party distributors, which are responsible for maintaining requisite licenses for distributing our prepaid cards and CD Keys in China. See Item 3, Key Information Risk Factors Risks Related to Our Company We rely on services from third parties to carry out our businesses and to deliver our prepaid cards to customers, and if there is any interruption or deterioration in the quality of these services, our customers may cease using our products and services.

On February 15, 2007, fourteen governmental authorities, including the Ministry of Culture, the MII, the State Administration for Industry and Commerce, and the People's Bank

Table of Contents

of China (PBOC), jointly issued a circular entitled a *Circular for Further Strengthening the Administration of Internet Café and Online Games*. According to this circular, the PBOC will have administrative authority over virtual currencies issued by online game operators for use by players in online games to avoid the potential impact such virtual currencies may have on the real-world financial systems. According to this circular, the volume that may be issued and the purchase of such virtual currencies must be restricted, and virtual currency must not be used to purchase of any physical products, refunded with a premium or otherwise illegally traded.

The operation of SMS in China is classified as value-added telecommunication business and SMS service providers shall obtain the relevant value-added telecommunication business permits.

Furthermore, the Ministry of Information Industry has promulgated rules requiring ICP License holders that provide online bulletin board services to register with, and obtain approval from, the relevant telecommunication authorities.

Regulation of Internet Content

The PRC government has promulgated measures relating to Internet content through a number of ministries and agencies, including the Ministry of Information Industry, the Ministry of Culture and the GAPP. These measures specifically prohibit Internet activities, which includes the operation of online games, that result in the publication of any content which is found to, among other things, propagate obscenity, gambling or violence, instigate crimes, undermine public morality or the cultural traditions of the PRC, or compromise State security or secrets. See Item 3, **Key Information Risks Factors Risks Related to Doing Business in China** The laws and regulations governing the online game industry in China are developing and subject to future changes. If we fail to obtain or maintain all applicable permits and approvals, our business and operations would be materially and adversely affected . If an ICP license holder violates these measures, the PRC government may revoke its ICP license and shut down its websites.

In April 2007, various governmental authorities, including GAPP, the Ministry of Information Industry, the Ministry of Education, the Ministry of Public Security, and other relevant authorities jointly issued a circular concerning the mandatory implementation of an anti-fatigue system in online games, which is aimed at protecting the physical and psychological health of minors. This circular requires that all online games incorporate an anti-fatigue system and an identity verification system, both of which may limit the amount of time that a minor or other user may continuously spend playing an online game. For online games currently in operation or in open beta testing, the development of these systems must be completed and made effective prior to July 16, 2007. We will be required to implement such anti fatigue and identification systems on all of our online games. The failure to comply with this requirement may subject game operators, including us, to penalties, including the cessation of operations and the revocation of the relevant operating licenses. The implementation of such anti-fatigue and identification systems in our games as required, as well as the implementation of any other measures required by any new regulations the PRC government may enact to further tighten its administration of the Internet and online games, and its supervision of Internet cafés, may limit or slow down our prospects for growth, or may materially and adversely affect our business results. See Item 3, **Key Information Risks Factors Risks Related to Doing Business in China** Our business may be adversely affected by public opinion and government policies in China.

Table of Contents

Regulation of Information Security

Internet content in China is also regulated and restricted from a State security standpoint. The National People's Congress, China's national legislative body, has enacted a law that may subject to criminal punishment in China any effort to: (1) gain improper entry into a computer or system of strategic importance; (2) disseminate politically disruptive information; (3) leak State secrets; (4) spread false commercial information; or (5) infringe intellectual property rights.

The Ministry of Public Security has promulgated measures that prohibit use of the Internet in ways which, among other things, result in a leakage of State secrets or a spread of socially destabilizing content. The Ministry of Public Security has supervision and inspection rights in this regard, and we may be subject to the jurisdiction of the local security bureaus. See Item 3, *Key Information Risks Factors Risks Related to Doing Business in China Regulation and censorship of information disseminated over the Internet in China may adversely affect our business, and we may be liable for information displayed on, retrieved from, or linked to our Internet websites*. If an ICP license holder violates these measures, the PRC government may revoke its ICP license and shut down its websites.

Import Regulation

Our ability to obtain licenses for online games from abroad and import them into China is regulated in several ways. We are required to register with the Ministry of Commerce any license agreement with a foreign licensor that involves an import of technologies, including online game software into China. Without that registration, we cannot remit licensing fees out of China to any foreign game licensor. In addition, the Ministry of Culture requires us to submit for its content review and approval of any online games we want to license from overseas game developers. If we license and operate games without that approval, the Ministry of Culture may impose penalties on us, including revoking the Internet culture operation license required for the operation of online games in China. Also, pursuant to a jointly issued notice in July 2004, the GAPP and the State Copyright Bureau require us to obtain their approval for imported online game publications. Furthermore, the State Copyright Bureau requires us to register copyright license agreements relating to imported software. Without the State Copyright Bureau registration, we cannot remit licensing fees out of China to any foreign game licensor and are not allowed to publish or reproduce the imported game software in China.

Intellectual Property Rights

The State Council and the State Copyright Bureau have promulgated various regulations and rules relating to protection of software in China. Under these regulations and rules, software owners, licensees and transferees may register their rights in software with the State Copyright Bureau or its local branches and obtain software copyright registration certificates. Although such registration is not mandatory under PRC law, software owners, licensees and transferees are encouraged to go through the registration process and registered software rights may receive better protections. We have registered all of our in-house developed online games with the State Copyright Bureau.

Table of Contents

Internet Café Regulation

Internet cafés are required to obtain a license from the Ministry of Culture and the State Administration of Industry and Commerce, and are subject to requirements and regulations with respect to location, size, number of computers, age limit of customers and business hours. Although we do not own or operate any Internet cafés, many Internet cafés distribute our virtual pre-paid cards. The PRC government has enacted laws to intensify its regulation and administration of Internet cafés, which are currently the primary venue for our users to play online games. Intensified government regulation of Internet cafés could restrict our ability to maintain or increase our revenues and expand our customer base. See Item 3,

Key Information Risks Factors Risks Related to Doing Business in China Intensified government regulation of Internet cafés could limit our ability to maintain or increase our revenues and expand our customer base .

Privacy Protection

PRC laws and regulations do not prohibit Internet content providers from collecting and analyzing personal information from their users. We require our users to accept a user agreement whereby they agree to provide certain personal information to us. PRC law prohibits Internet content providers from disclosing to any third parties any information transmitted by users through their networks unless otherwise permitted by law. If an Internet content provider violates these regulations, the Ministry of Information Industry or its local bureaus may impose penalties and the Internet content provider may be liable for damages caused to its users.

Regulation of Foreign Currency Exchange and Dividend Distribution

Foreign Currency Exchange. Foreign currency exchange regulation in China is primarily governed by the following rules:

Foreign Exchange Administration Rules (1996), as amended, or the Exchange Rules; and

Administration Rules of the Settlement, Sale and Payment of Foreign Exchange (1996), or the Administration Rules.

Pursuant to the Exchange Rules, RMB is freely convertible for trade and service-related foreign exchange transactions, but not for direct investment, loan, investment in securities, or other transactions through a capital account outside China unless the prior approval of the State Administration of Foreign Exchange of the People's Republic of China is obtained. Further, foreign investment enterprises in China may purchase foreign exchange without the approval of the State Administration of Foreign Exchange of the People's Republic of China for trade and service-related foreign exchange transactions by providing commercial documents evidencing these transactions. Foreign investment enterprises that need foreign exchange for the distribution of profits to their shareholders may effect payment from their foreign exchange account or purchase and pay foreign exchange at the designated foreign exchange banks to their foreign shareholders by producing board resolutions for such profit distribution. Under the Administration Rules, based on their needs, foreign investment enterprises are permitted to open foreign exchange settlement accounts for current account receipts and payments of foreign exchange along with specialized accounts for capital account receipts and payments of foreign exchange at certain designated foreign exchange banks.

Dividend Distribution. The principal regulations governing distribution of dividends of foreign holding companies include:

The Foreign Investment Enterprise Law (1986), as amended; and

Table of Contents

Administrative Rules under the Foreign Investment Enterprise Law (2001).

Under these regulations, foreign investment enterprises in China may pay dividends only out of their accumulated profits, if any, determined in accordance with PRC accounting standards and regulations. In addition, foreign investment enterprises in China are required to allocate at least 10% of their respective profits each year, if any, to fund certain reserve funds until the cumulative total of the allocated reserve funds reaches 50% of an enterprise's registered capital. These reserves are not distributable as cash dividends.

Regulation of Foreign Exchange in Certain Onshore and Offshore Transactions

On October 21, 2005, SAFE issued the Notice on Issues Relating to the Administration of Foreign Exchange in Fund-raising and Reverse Investment Activities of Domestic Residents Conducted via Offshore Special Purpose Companies, or Notice 75, which became effective as of November 1, 2005.

According to Notice 75:

prior to establishing or assuming control of an offshore company for the purposes of financing that offshore company with assets or equity interests in an onshore enterprise in the PRC, each PRC resident, whether a natural person or a legal entity, must complete the overseas investment foreign exchange registration procedures with the local SAFE branch;

an amendment to the registration with the local SAFE branch is required to be filed by any PRC resident that directly or indirectly holds interests in that offshore company upon either (1) the injection of equity interests or assets of an onshore enterprise in the offshore company, or (2) the completion of any overseas fund raising by such offshore company; and

an amendment to the registration with the local SAFE branch is also required to be filed by such PRC resident when there is any material change involving a change in the capital of the offshore company, such as (1) an increase or decrease in its capital, (2) a transfer or swap of shares, (3) a merger or division, (4) a long term equity or debt investment, or (5) the creation of any security interests over the relevant assets located in China.

Moreover, Notice 75 applies retroactively. As a result, PRC residents who have established or acquired control of offshore companies that have made onshore investments in the PRC in the past are required to complete the relevant overseas investment foreign exchange registration requirements by March 31, 2006. Under the relevant rules, failure to comply with the registration procedures set forth in Notice 75 or the rules implementing Notice 75 may result in restrictions being imposed on the foreign exchange activities of the relevant onshore company, including an increase of its registered capital, the payment of dividends and other distributions to its offshore parent or affiliate and the capital inflow from the offshore entity, and may also subject the relevant onshore company and PRC residents to penalties under PRC foreign exchange administration regulations.

Table of Contents

As a result of the uncertainties relating to the interpretation and implementation of Notice 75, we cannot predict how these regulations will affect our business operations or strategies. For example, our present or future PRC subsidiaries' ability to conduct foreign exchange activities, such as remittance of dividends and foreign-currency-denominated borrowings, may be subject to compliance with such SAFE registration requirements by relevant PRC residents, over whom we have no control. In addition, we cannot assure you that any such PRC residents will be able to complete the necessary approval and registration procedures required by the SAFE regulations. We have requested that all of our shareholders whom we know are PRC residents or have PRC residents as their ultimate beneficial owners comply with any SAFE registration requirement, but we have no control over our shareholders. We have been informed that our major shareholders, who are PRC residents and subject to the above registration requirements, had made the required SAFE registration in respect of his investment in our company. Such uncertainties may restrict our ability to implement our acquisition strategy and adversely affect our business and prospects.

C. **Organizational Structure**

The following diagram illustrates our company's organizational structure, and the place of formation, ownership interest of each of our subsidiaries and the affiliated entity that operates WoW and MU in China.

*** *Shanghai The9 Information Technology Co., Ltd. is owned by Jun Zhu, our chairman and chief executive officer, and Yong Wang, our vice president.*

D. Property, Plant and Equipment

Our headquarters are located on premises comprising approximately 14,000 square meters in an office building in Shanghai, China. We purchased the office building in which our headquarters are located, and lease all of our other premises from unrelated third parties. In addition, we have small branch offices in Beijing, Nanjing, Wuhan and Xi'an, Chengdu and Shenyang, China. Our equipment consist substantially of numerous servers and network devices located in eight internet data centers throughout China.

ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS

The following discussion of our financial condition and results of operations is based upon and should be read in conjunction with our consolidated financial statements and their related notes included in this annual report on Form 20-F. This report contains forward-looking statements. See Item 1, Introduction Forward-Looking Information. In evaluating our business, you should carefully consider the information provided under the caption Risk Factors in this annual report on Form 20-F. We caution you that our businesses and financial performance are subject to substantial risks and uncertainties.

A. Overview

We are a leading online game operator in China.

In September 2002, we and Webzen formed 9Webzen to localize and operate MU in China. Prior to December 2005, we held a 51% ownership interest in 9Webzen. We accounted for our interest in 9Webzen using the equity method because under the joint venture agreement, Webzen has the right to participate in certain decisions to be made in the ordinary course of business of 9Webzen. 9Webzen began to charge users for MU playing time in February 2003, and has derived substantially all of its revenues through sales of prepaid cards and prepaid online points for MU playing time to distributors, who in turn sell them to end customers. From February 2003 to early 2005, we had derived our revenues primarily from provision of game operating support services in connection with operating MU in China.

In December 2005, in light of the declining popularity of the MU game, which comprised substantially all of 9Webzen's revenues, and to concentrate our resources on the WoW game, we entered into an agreement with Webzen Inc. to sell a 21% interest in 9Webzen to Webzen Inc. After the consummation of the sale, our interest in 9Webzen was reduced from 51% to 30%. As a result, and due to our substantial increase in revenues resulting from the commercial launch of the WoW game in China, the portion of our income attributable to our equity interest in 9Webzen and our share of the total assets of 9Webzen were less than 20% of The9's operating income and total assets, respectively, for the year. Because 9Webzen's financial position and results of operation are no longer material to us, audited financial statements for 9Webzen have not been required since 2005. For a discussion of 9Webzen's historical operating and financial information, see our annual report on Form 20-F for the year 2004, filed with the SEC on June 30, 2005.

Table of Contents

In July 2003, we and China Interactive formed C9I to localize and operate the WoW game in China. We have had effective control over C9I's management and operations since its inception. In February 2005, C9I established a wholly-owned subsidiary, C9I China, to operate WoW in China. We initially owned 54% of C9I and through a series of transactions with China Interactive, C9I became our wholly-owned subsidiary in August 2005. WoW was commercially launched in China in June 2005. In 2006, 99% of our total revenues were attributable to the operation of WoW in China, including game play time, merchandise sales and other related revenues. We expect to continue to depend on WoW for most of our revenues in the near future.

To broaden our product offerings and enhance our leadership position in the online game market in China, we have obtained exclusive licenses to operate additional MMORPGs in China, including Granado Espada, Soul of the Ultimate Nation, Mystina Online, Guild Wars, Hellgate: London, Ragnarok Online 2, Emil Chronicle Online, Huxley, Audition 2 and EA Sports FIFA Online. In addition, in September 2006, we commercially launched JJW, our first proprietary MMORPG.

The major factors affecting our results of operations and financial condition are:

our revenue composition and sources of revenue growth;

our cost of services;

our operating expenses; and

arrangements with online game developers.

Each of these factors is discussed below.

Revenue Composition and Sources of Revenue Growth.

In 2006, we generated substantially all of our revenues from online game services, and a minor portion of our revenues from other services.

Online Game Services. Our online game service revenues for the years before 2005 were primarily derived from sales of prepaid playing time for the9 City. Since we commercially launched WoW in China in June 2005, we have derived substantially all of our online game service revenues from sales of WoW playing time. In 2004, 2005 and 2006, revenues from our online game services amounted to RMB0.4 million, RMB466.6 million and RMB1,028.0 million (US\$131.7 million), respectively. We plan to add additional games to our product offerings to attract more users and increase our online game service revenues.

We sell game playing time mostly through sales of prepaid cards and prepaid online points to distributors who in turn sell them to end users. Both prepaid cards and prepaid online points provide customers with a pre-specified length of game playing time valid for a specified period of time. Prepaid fees received from distributors are recognized as revenues upon end users' actual usage of game playing time or expiration of their game cards or online points. We are provided with data on end users' actual usage of WoW playing time by the licensor of WoW and do not otherwise have direct access to such information pursuant to the license agreement with the licensor.

Table of Contents

Game Operating Support, Website Solutions and Advertisement. Prior to the commercial launch of WoW in China in June 2005, we derived a significant portion of our revenues from providing game operating support and website solutions and advertisement services, including website development and construction, hardware and software support, staff training, maintenance and advertisement. In 2004, 2005 and 2006, revenues from our game operating support, website solutions and advertisement services were RMB24.7 million, RMB6.1 million and RMB4.8 million (US\$0.6 million), respectively. The substantial decrease in revenues from our game operating support, website solutions and advertisement services in 2005 and 2006 was primarily due to the substantial decrease in revenues from sales of MU playing time in China, of which we were entitled to 10.5% from January 2004 to September 2006 and 5.5% from October 2006, pursuant to the revenue-sharing arrangement with 9Webzen.

Short Messaging Services. We began offering SMS services near the end of 2003. In 2004, 2005 and 2006, revenues from our SMS services amounted to RMB11.1 million, RMB3.4 million and RMB0.4 million (US\$0.06 million) respectively.

Other Products and Services. Our other sources of revenues primarily consist of revenues recognized from sales of game-related accessories and merchandises. In 2004, 2005 and 2006, revenues from our other products and services amounted to RMB 0.5 million, RMB13.2 million and RMB5.1 million (US\$0.7 million), respectively.

Cost of Services. Our cost of services consists of costs directly attributable to rendering our products and services, including WoW royalties which are equal to 22% of the face value of our prepaid cards and online points and either 37.7% or 39% of the face value of the CD-Keys sold, amortization of the initial WoW license fee, amortization of intangible assets from the acquisition of C9I and other upfront license fees and other WoW-related costs, depreciation of property and equipment, consisting primarily of server depreciation charges, Internet data center and broadband bandwidth rental fees, production costs for prepaid cards and compensation to our customer service representatives and game-related technical IT personnel. We expect that our cost of services will increase primarily because we plan to establish new centralized servers in connection with the launch and operation of the new games.

Operating Expenses. Our operating expenses consist primarily of product development expenses, sales and marketing expenses, and general and administrative expenses.

Product Development. Our product development expenses consist primarily of outsource research and development expenses, compensation to our product development personnel, equipment and software depreciation charges and other expenses for the development of online games. Our other product development costs include costs that we have incurred to develop and maintain our websites. We expect that our product development expenses will increase in the near future as we expand our internal game development capabilities.

Sales and Marketing. Our sales and marketing expenses primarily consist of advertising and marketing expenses to promote WoW and other games and compensation to our sales and marketing personnel. As we intend to continue aggressively marketing and promoting the WoW game and other MMORPGs, we expect that our sales and marketing expenses will increase in 2007.

Table of Contents

General and Administrative. Our general and administrative expenses consist primarily of compensation and travel expenses for our administrative staff, depreciation of property and equipment, entertainment expenses, administrative office expenses, as well as fees paid to professional service providers for auditing and legal services.

Arrangements with Online Game Developers. Because our business prospects depend significantly on C9I's exclusive right to operate WoW in China, we must maintain a satisfactory relationship with VUG, the licensor of WoW. In connection with our licensing and operation of WoW in China, we are obligated to pay royalties equal to 22% of the face value of WoW prepaid cards and online points and either 37.7% or 39% of the face value of the CD-Keys sold by us by making recoupable advances against royalty payments in an aggregate amount of approximately US\$51.3 million over a four-year period commencing from the commercial launch. We are also obligated to incur a certain percentage of WoW gross sales in the marketing and promotion of WoW in China during the four-year term of the license. As security for each advance payment, C9I is obligated to procure a standby letter of credit prior to each relevant period.

The license agreement with VUG also provides the license to the WoW game is non-assignable, non-sublicensable and non-transferable. VUG has the right to, among others, (i) modify WoW in any manner and at any time without liability to C9I; and (ii) except for those rights expressly granted to C9I, exploit its intellectual property in any manner, including the right to grant licenses to third parties for further exploitation of WoW in such form as movie, television exploitation and merchandising, and the exploitation of other versions of WoW in China. In addition, VUG retains ownership of all its intellectual property rights, including those relating to the localized WoW.

VUG has the right to terminate this agreement: (i) upon C9I's failure to cure a material breach of the agreement within 30 days; (ii) in the event C9I attempts any unauthorized assignment for the benefit of creditors, files any petition for reorganization, rearrangement of its business, enters bankruptcy, insolvency or receivership; or (iii) if C9I merges, consolidates or otherwise experiences any substantial change in management or control of more than 20% of its common stock or the equivalent, without obtaining Vivendi Universal Games' prior written consent.

Upon expiration or termination of the license agreement for any reason, we are obligated to, among other things, immediately cease using any VUG trademarks, logos or trade names, as well as to cease the manufacture, distribution and sale of WoW game cards and online game points. We shall also immediately cease operations pertaining to the localized WoW. If the license agreement is terminated for cause for any reason other than our failure to obtain the requisite approvals and permits from the governmental authorities in China, then the recoupable advances due for the quarterly period in which the termination is effected, as well as the recoupable advances for the immediately following quarterly period, and all other payments due and owing will be immediately due and payable to Vivendi Universal Games within ten days of the effective date of termination, and we will not be entitled to any refund of any licensee fee or other payments we made pursuant to the license agreement.

Our business prospects also depend in part on our exclusive rights to operate other licensed games, including MU, Granado Espada, Soul of the Ultimate Nation, Guild Wars, Hellgate: London in China, Ragnarok Online 2, Huxley, Emil Chronicles Online, EA Sports FIFA Online and Audition 2. If we are unable to maintain a satisfactory relationship with any of our online game developers, or if any of our online game developers either establishes

Table of Contents

similar or more favorable relationships with our competitors in violation of its contractual arrangements with us, our operating results and our business would be harmed and, the price of our ADSs and ordinary shares could decline.

Holding Company Structure

We are a holding company incorporated in the Cayman Islands, and rely primarily on dividends and other distributions from our subsidiaries and affiliates in China for our cash requirements. Current PRC regulations restrict our affiliated entities and subsidiaries from paying dividends in the following two principal aspects: (i) our affiliated entities and subsidiaries in China are only permitted to pay dividends out of their respective accumulated profits, if any, determined in accordance with PRC accounting standards and regulations; and (ii) these entities are required to allocate at least 10% of their respective accumulated profits each year, if any, to fund certain capital reserves until the cumulative total of the allocated reserves reach 50% of registered capital, and these reserves are not distributable as cash dividends. See Item 4, Information on the Company Business Overview Government Regulations. As of December 31, 2006, approximately RMB47.1 million (US\$6.0 million) of our portion of the net assets of our affiliated entities and subsidiaries in China were subject to the regulatory restrictions on transfer to their shareholders in the form of cash dividends.

Regulation of Internet Business in China

The PRC government heavily regulates the Internet sector in China, including the legality of foreign investments in the PRC Internet sector, the permit requirements for companies in the Internet industry and the existence and enforcement of restrictions on Internet content and the licensing. See Item 4, Information on the Company Business Overview Government Regulations.

In order to comply with restrictions imposed by current PRC laws and regulations on foreign ownership of the Internet content provision, Internet culture operation and advertising businesses in China, we operate our PRC online gaming and Internet content provision businesses through contractual arrangements with Shanghai IT. Shanghai IT is ultimately owned by our shareholder Jun Zhu, and Yong Wang, both of whom are PRC citizens.

In April 2001, the PRC government began tightening its supervision of Internet cafés, closing unlicensed Internet cafés, requiring those remaining open to install software to prevent access to sites deemed subversive and requiring web portals to sign a pledge not to host subversive sites. Furthermore, the PRC government's policy, which encourages the development of a limited number of national and regional Internet café chains and discourages the establishment of independent Internet cafés, may slow down the growth of Internet cafés. The issuance of Internet café licenses had been suspended from time to time and has been suspended again in 2007. As Internet cafés are the primary venue for users to play our games, any reduction in the number, or any slowdown in the growth, of Internet cafés in China, or any tightening of the governmental requirements relating to the customers' age, business hours and other operational aspects of Internet cafés, could limit our ability to maintain or increase our revenues and expand our customer base, which will materially and adversely affect our business and results of operations. Furthermore, the Ministry of Culture has issued a notice to require, among other things, the review and prior approval of all the new online games licensed from foreign game developers and related license agreements. The pre-approval will not be granted if the Ministry of Culture finds the content of the game

Table of Contents

objectionable or the terms of the related license agreement grossly unfairly to the Chinese licensee. There is no assurance that we will be able to obtain the pre-approvals for our new licensed foreign games in a timely manner.

In 2007, various governmental authorities, including GAPP, the Ministry of Information Industry, the Ministry of Education, the Ministry of Public Security, and other relevant authorities jointly issued a circular concerning the mandatory implementation of an anti-fatigue system in online games, which is aimed at protecting the physical and psychological health of minors. This law requires that all online games incorporate an anti-fatigue system and an identity verification system, both of which may limit the amount of time that a minor or other user may continuously spend playing an online game. For online games currently in operation or in open beta testing, the development of these systems must be completed and made effective prior to July 16, 2007. We will be required to implement such anti fatigue and identification systems on all of our online games. The failure to comply with this requirement may subject game operators, including us, to penalties, including the cessation of operations and the revocation of the relevant operating licenses. The implementation of such anti-fatigue and identification systems in our games as required, as well as the implementation of any other measures required by any new regulations the PRC government may enact to further tighten its administration of the Internet and online games, and its supervision of Internet cafés, may limit or slow down our prospects for growth, or may materially and adversely affect our business results. See Item 3, Key Information Risks Factors Risks Related to Doing Business in China Our business may be adversely affected by public opinion and government policies in China.

Certain PRC regulatory authorities have published regulations that subject website operators to potential liability for content included on their websites and the actions of users and others using their systems. As these regulations are relatively new and subject to interpretation by the relevant authorities, it may not be possible for us to determine in all cases the type of content that could result in liability for us as a website operator. To the extent that PRC regulatory authorities find any portion of our content objectionable, they may require us to limit or eliminate the dissemination of such information or otherwise curtail the nature of such content on our websites, which may reduce our user traffic. In addition, we may be subject to significant penalties for violations of those regulations arising from information displayed on, retrieved from or linked to our websites, including a suspension or shutdown of our operations.

Income and Business Taxes

Currently, companies established in China are generally subject to the EIT, at a statutory rate of 33%. Currently, The9 China, C9I China, Shanghai IT and 9Webzen Shanghai are subject to a 15% EIT rate due to their place of incorporation in the Zhang Jiang Hi-tech Park of Pudong New District of Shanghai. In addition, C9I China is currently exempt from EIT as the applicable government authorities in Shanghai granted it the high-technology enterprise status. This tax status entitled C9I China to enjoy EIT exemption for 2005 and 2006.

The National People's Congress of PRC has adopted and promulgated the New Tax Law on March 16, 2007, which imposes a single unified EIT rate of 25% for most domestic enterprises and foreign invested enterprises and will become effective as of January 1, 2008. The New Tax Law contemplates various transition periods and measures for existing

Table of Contents

preferential tax policies, including a grace period for as long as 5 years for foreign-invested enterprises which are currently entitled to a lower income tax rate and continued implementation of preferential tax treatment with a fixed term until the expiration of such fixed term. In addition, the new law deems an enterprise established offshore but having its management organ in the PRC as a resident enterprise which will be subject to PRC tax on its global income. The term management organ has not yet been defined by the PRC government. High/new-tech enterprises that are specified as strongly supported by the State will be entitled to an income tax rate of 15%. The New Tax Law empowers the PRC State Council to enact appropriate implementing rules and measures. The continued eligibility of such preferential tax treatments The9 China, C9I China and Shanghai IT are currently enjoying are subject to the implementation of the New Tax Law. See Item 3, Key Information Risk Factors Risks Related to Our Company If tax benefits currently available to The9 China and C9I China or to us are reduced or repealed, our business could suffer.

The subsidiaries and affiliates of The9 and 9Webzen in China are subject to the business tax at a statutory rate of 5% of the gross revenues generated by each of them. This business tax is deducted from the total revenues of The9 and 9Webzen, as applicable.

Internal Control Over Financial Reporting

We are aware of the importance of maintaining controls and procedures and are working towards improving our controls and procedures. Section 404 of the Sarbanes-Oxley Act of 2002 requires us to, beginning with the fiscal year ended December 31, 2006, to include an internal control report of management with our annual report on Form 20-F. In addition, beginning with the annual report for the fiscal year ended December 31, 2007, our independent registered public accounting firm will be required to issue a written attestation as to the effectiveness of our internal controls over financial reporting. Based upon our evaluation conducted as of December 31, 2006, our management has not identified any material weakness in internal controls over financial reporting, and concluded that, as of the end of the period covered by this annual report, our internal controls over financial reporting were effective.

Critical Accounting Policies

We prepare financial statements in conformity with U.S. GAAP, which requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities on the date of the financial statements, and the reported amounts of revenue and expenses during the financial reporting period. We continually evaluate these estimates and assumptions based on the most recently available information, our own historical experience and various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Since the use of estimates is an integral component of the financial reporting process, actual results could differ from those estimates. Some of our accounting policies require higher degrees of judgment than others in their application. We consider the policies discussed below to be critical to an understanding of our financial statements as their application assists management in making their business decisions.

Table of Contents

Revenue Recognition. We generate revenue from the sale of our prepaid game cards and prepaid online points for our online game products to distributors who in turn ultimately sell them to customers. We recognize revenue in two ways.

We recognize revenue based on the amount of time our customers spend playing our games. Both prepaid cards and prepaid online points provide customers with a certain amount of game playing time that may be used for a pre-specified period of time. All prepaid fees received from distributors are initially recognized as advances from customers. Prepaid fees are recognized as deferred revenue upon the customers' online registration and activation of their cards or online points, and recognized as revenue upon the actual usage of the game playing time by customers, when customers are no longer entitled to access our online games, or when the likelihood that we would provide further online game service to those customers becomes remote.

We also charge our customers for purchases of services and virtual items. In some of our games, players can access the games free of charge but are charged certain game points for in-game premium features. Prepaid fees are deferred when received and revenue is recognized over the life of the premium features or as the premium features is used. We started charging our customers for purchases of services and virtual items in 2006, and did not recognize significant revenue from such sales in the year ended December 31, 2006.

In past years we sold our proprietary integrated membership management and payment system, Pass9, to third-party companies, for RMB11.7 million in 2005 and RMB14.9 million in 2004, respectively. We recognized other income from our sale of Pass9 upon delivery of Pass9 to the purchaser. We do not believe that we have any future obligations associated with the sale and believe that the collectibility of the associated amount was reasonably assured as of December 31, 2004 and 2005.

We account for our sales of CD-keys in which we perform multiple revenue-generating activities in accordance with EITF 00-21, *Revenue Arrangements with Multiple Deliverables*. In accordance with EITF 00-21, we determine whether an arrangement with multiple deliverables consists of more than one unit of accounting and whether such arrangement should be allocated among the separate units of accounting. Determining whether an arrangement consists of more than one unit of accounting and how considerations should be allocated among the separate units of accounting require significant judgment, including judgment with regards to whether the delivered item(s) has value to the customer on a stand-alone basis and the fair value of the undelivered item. Different judgments may result in different amount and timing of revenue recognized.

Product Development. We recognize software development costs for development of software, including online games, to be sold or marketed to customers in accordance with SFAS No. 86, *Accounting for Costs of Computer Software to be Sold, Leased, or Otherwise Marketed* (SFAS No. 86). As such, we expense software development costs incurred prior to technological feasibility. Once a software product has reached technological feasibility, all subsequent software costs for that product are capitalized until that product is released for sale. After an online game is released, the capitalized product development costs are amortized over the estimated product life. The determination of whether an online game has reached technical feasibility requires significant judgement by us.

We recognize website and internally used software development costs in accordance with Statement of Position (SOP) No.98-1. *Accounting for the Costs of Computer*

Table of Contents

Software Developed or Obtained for Internal Use and EIFT No. 00-02, Accounting for Website Development Costs, where applicable. As such, we expense all costs that are incurred in connection with the planning and implementation phases of development and costs that are associated with repair or maintenance of the existing websites and software. Costs incurred in the development phase are capitalized and amortized over the estimated product life. Since our inception, the amount of costs qualifying as capitalization has been immaterial, and as a result, all website and internally used software development costs have been expensed as incurred.

Product development costs consist primarily of outsourced research and development expenses, payroll, depreciation charge and other overhead expenses for the development of online games. Other overhead product development costs include costs incurred by us to develop, maintain, monitor, and manage our websites. No Product development costs were capitalized in 2004, 2005 and 2006 because the amounts were insignificant.

Income Taxes. We account for income taxes under the provisions of SFAS No. 109, Accounting for Income Taxes. Under SFAS No. 109, income taxes are accounted for under the asset and liability method. Deferred taxes are determined based upon the differences between the carrying value of assets and liabilities for financial reporting and tax purposes at currently enacted statutory tax rates for the years in which the differences are expected to reverse. The effect on deferred taxes of a change in tax rates is recognized in income in the period of change.

A valuation allowance is provided on deferred tax assets to the extent that it is more likely than not that such deferred tax assets will not be realized. Realization of the future tax benefits related to the deferred tax assets is dependent on many factors, including our ability to generate taxable income within the period during which the temporary differences reverse or our tax loss carry forwards expire, the outlook for the PRC economic environment, and the overall future industry outlook. We consider these factors in reaching our conclusion on the recoverability of the deferred tax assets and determine the valuation allowances necessary at each balance sheet date.

The9 China and C9I China are currently subject to EIT on the taxable income reported in their statutory financial statements adjusted in accordance with the Income Tax Law of the People's Republic of China concerning Foreign Investment Enterprise and Foreign Enterprises (the PRC Income Tax Law). Pursuant to the PRC Income Tax Law, The9 China and C9I are generally subject to EIT at a statutory rate of 33%. However, The9 China, C9I China and Shanghai IT are incorporated in the Zhang Jiang Hi-tech Park of Pudong New District of Shanghai and is therefore subject to a preferential 15% EIT rate. The National People's Congress of PRC has adopted the new Enterprise Income Tax Law (New Tax Law) on March 16, 2007, which imposes a single unified EIT rate of 25% for most domestic enterprises and foreign invested enterprises and will become effective as of January 1, 2008. The New Tax Law contemplates various transition periods and measures for existing preferential tax policies, including a grace period for as long as 5 years for foreign-invested enterprises which are currently entitled to a lower income tax rate and continued implementation of preferential tax treatment with a fixed term until the expiration of such fixed term. Moreover, unlike the tax regulations currently in effect, which specifically exempt withholding taxes on dividends payable to non-PRC investors from foreign-invested enterprises in the PRC, the New Tax Law provides that an income tax rate of 20% be normally applicable to dividends payable by Chinese companies to non-PRC resident enterprises. In addition, the new law deems an enterprise established offshore but having its

Table of Contents

management organ in the PRC as a resident enterprise which will be subject to PRC tax on its global income. The term management organ has not yet been defined by the PRC government. High/new-tech enterprises that are specified as strongly supported by the State will be entitled to an income tax rate of 15%. The New Tax Law empowers the PRC State Council to enact appropriate implementing rules and measures. Any significant increase of EIT rate applicable to The9 China, C9I China and Shanghai IT, the imposing of withholding taxes on dividends payable by our subsidiaries to us, or EIT levy on us or any of our subsidiaries or affiliate entities registered outside PRC as a resident enterprise under the New Tax Law will have a material adverse impact on our results of operations and financial conditions. In September 2005, C9I China received approval from certain government authorities to be classified as a High Technology Enterprise. This classification, subject to annual review, entitles C9I China to enjoy an Enterprises Income Tax (EIT) exemption for 2005 and 2006, for which the relevant tax authorities have granted approval. C9I China did not provide for EIT for the year ended December 31, 2005 and 2006 as C9I China has passed the required annual inspection for the year ended December 31, 2005 and the company's directors believe that C9I China will continue to meet these requirements for the year ended December 31, 2006. However, there is no guarantee that The9 China, C9I China and Shanghai IT will continue to be entitled to the reduced EIT rate of 15% in the future. If they are not entitled to the reduced EIT rate, they will be subject to the unified EIT rate of 25%.

Property, Equipment and Software. In addition to the original cost of property, equipment and software, the carrying value of these assets is impacted by a number of estimates and assumptions, including estimated useful lives, residual values and impairment charges. SFAS No. 144, Accounting for the Impairment or Disposal of Long-lived Assets, requires that long-lived assets be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable from its undiscounted future cash flows. For each of 2004, 2005 and 2006, we did not recognize any impairment charges for property, equipment and software. Recognition of impairment charges require significant judgment. Any material differences to the estimated that had been used could result in differences in the amount and timing of the impairment charges.

Our computers and equipment for our online game operation are amortized over an estimated useful life of approximately three to five years. The servers used for WoW are amortized over WoW's remaining license period, which has a license period of four years commencing from June 2005. We use estimates and judgment in determining the useful life of our computers and equipment, and if different estimates of judgments had been utilized, the timing or the amount of depreciation recorded could be different. For example, if a useful life of 3 years were used, the amortization charges would have been decreased by approximately RMB 2.3 million in 2004, as a significant portion of the computer and equipment would have been fully depreciated by the end of 2003, and would have resulted in an increase in depreciation recorded for the year 2005 and 2006 by approximately RMB8.5 million and RMB16.5 million (US\$2.1 million), respectively, as there were additional servers acquired for use for the WoW game in 2005 and 2006.

Intangible assets. Our intangible assets consist primarily of intangible assets from business combination and upfront licensing fees. We apply criteria specified in SFAS No. 141 Business Combinations (SFAS 141) to determine whether an intangible asset should be recognized separately from goodwill. Intangible assets acquired through business acquisitions are recognized as assets separate from goodwill if they satisfy either the contractual-legal or separability criterion. We make estimates and judgments in determining the fair value of the acquired assets and liabilities based on independent

Table of Contents

appraisal reports as well as our experience with similar assets and liabilities in similar industries. If different judgment assumptions were used, the amounts assigned to the individual acquired assets or liabilities could be materially affected. Intangible assets with definite lives are amortized over their estimated useful life and reviewed for impairment in accordance with SFAS 144. Intangible assets, such as purchased technology, licenses, domain names, partnership, and non-compete agreements, arising from the acquisitions of subsidiaries and variable interest entities are recognized and measured at fair value upon acquisition. Intangible assets from such business combination transaction are amortized over the remaining licensing term of the WoW game of approximately four years.

Upfront licensing fees paid to licensors are recognized as intangible assets if a game has reached technological feasibility when such payments are made. Technological feasibility is met upon completion of a working model. Upfront licensing fees are amortized on a straight-line basis over the shorter of the useful economic life of the relevant online game or license period, which range from 2 to 4 years. We commence amortization of the upfront licensing fees upon the launch of the applicable online game.

Goodwill. We recognize goodwill as the excess of the purchase price over the fair value of the identifiable assets and liabilities acquired as a result of an acquisition we make. We adopted SFAS No. 142 Goodwill and Intangible Assets (SFAS 142). In August 2005, we acquired the remaining 31.1% of the shares of C9I, the company that operates WoW in mainland China, for US\$ 40 million. In connection with this acquisition, we recorded approximately RMB30.2 million as goodwill. Under SFAS 142, goodwill is no longer amortized, but tested for impairment upon first adoption and annually thereafter, or more frequently if events or changes in circumstances indicate that it might be impaired. We assess goodwill for impairment in accordance with SFAS142. In December of each year, we test impairment of goodwill at the reporting unit level and recognize impairment in the event that the carrying value exceeds the fair value of each reporting unit. Impairment assessment of goodwill requires significant judgment, including assumptions used to determine the fair value of the reporting units. No goodwill impairment was recognized in 2006.

Share-Based Compensation. We granted a total of 1,114,739 options in 2004, 92,600 options in 2005 and 212,352 options in 2006 under our Amended 2004 Stock Option Plan to some of our employees, directors and consultants.

Effective January 1, 2006, we adopted FASB Statement No.123 (revised 2004), Share-Based Payment (SFAS 123R), which supercedes FASB Statement No.123, Accounting-Based Compensation (SFAS 123) and Accounting Principles Board (APB) Opinion No.25, Accounting for Stock Issued to Employees (APB 25). Under the fair value recognition provisions of SFAS 123R, we are required to measure the cost of employee services received in exchange for stock-based compensation measured at the grant date fair value of the award. We recognize the compensation costs, net of the estimated forfeiture, on a straight-line basis over the vesting period of the award, which is generally ranging from 2 to 4 years. In March 2005, the Securities & Exchange Commission issued Staff Accounting Bulletin No.107 (SAB 107) relating to SFAS 123R. We has applied the provisions of SAB 107 in its adoption of SFAS 123R.

Determining the fair value of stock options in accordance with SFAS No. 123R requires significant judgment, including, among other things, estimates of the fair value of our ordinary shares and certain assumptions, including volatility, required to determine the estimated fair value of the awards granted.

Table of Contents

SFAS 123R also requires forfeitures to be estimated at the time of grant and revised in subsequent periods if actual forfeitures differ from those estimates.

Share-based compensation expenses of RMB17,739,543 (US\$2,273,106) were recognized for the year ended December 31, 2006 for options granted to the Company's employees under SFAS 123R.

Prior to 2006, we accounted for share-based compensation arrangements with employees in accordance with APB 25, and complied with the disclosure provisions of SFAS 123. In general, compensation cost under APB 25 is recognized based on the difference, if any, between the estimated fair value of our ordinary shares and the amount an employee is required to pay to acquire the ordinary shares, as determined on the date the option was granted. Compensation cost, if any, is recorded in shareholders' equity as additional paid-in capital with an offsetting entry recorded to deferred share-based compensation. Deferred share-based compensation is amortized and charged to expense based on the vesting terms of the underlying options.

We account for share-based compensation arrangement with non-employees in accordance with EITF 96-18, Accounting for Equity Instruments That Are Issued to Other Than Employees for Acquiring or in Conjunction with Selling Goods or Services.

No share-based compensation expense or deferred compensation was recognized for options granted to our employees under APB No. 25 as the exercise price equaled the fair value of the shares on the date of grant.

Impairment of Investment in Equity investments. We assess our equity investments for non-temporary impairment by considering factors as well as all relevant and available information including, but not limited to, current economic and market conditions, the operating performance of the companies, including current earnings trends and undiscounted cash flows, and other company-specific information including recent financing rounds. Impairment provision relating to investment in an equity investee of RMB 20.4 million (US\$2.6 million) was recognized in 2006.

Impairment of Long-lived Assets and Intangible Assets. Long-lived assets and intangible assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. We assess the recoverability of long-lived assets and intangible assets (other than goodwill) by comparing the carrying amount to the estimated future undiscounted cash flow associated with the related assets. We recognize impairment of long-lived assets and intangible assets in the event that the net book value of such assets exceeds the estimated future undiscounted cash flow attributable to such assets. We use estimates and judgment in our impairment tests, and if different estimates of judgments had been utilized, the timing or the amount of the impairment charges could be different. Impairment charged relating to intangible assets amounting to RMB 5.7 million (US\$0.73 million) and RMB 0.9 million (US\$0.1 million) was recognized in 2005 and 2006, respectively.

Table of Contents**Results of Operations**

The following table sets forth a summary of our consolidated statements of operations as a percentage of net revenues for the periods indicated.

	Year Ended December 31,		
	2004	2005	2006
Revenues:			
Online game services	1.0%	100.4%	104.2%
Game operating support, website solutions and advertisement	71.1%	1.3%	0.5%
Short message services	32.0%	0.7%	0.1%
Other revenues	1.3%	2.8%	0.5%
Sales taxes	(5.4)%	(5.2)%	(5.3)%
Net revenues	100.0%	100.0%	100.0%
Cost of services	(26.3)%	(51.7)%	(53.2)%
Gross profit	73.7%	48.3%	46.8%
Operating expenses:			
Product development	(26.0)%	(8.7)%	(3.1)%
Sales and marketing	(26.6)%	(13.3)%	(6.0)%
General and administrative	(49.2)%	(13.5)%	(10.3)%
Total operating expenses	(101.8)%	(35.5)%	(19.4)%
(Loss) profit from operations	(28.1)%	12.8%	27.4%
Interest income (expenses), net	0.2%	2.2%	0.9%
Other income (expense), net	45.5%	3.2%	2.9%
Income tax benefit (expense)	(14.6)%	0.0%	0.3%
Minority interests	19.8%	(1.0)%	
Gain on investment disposal		1.4%	2.4%
Impairment loss on investment			(2.1)%
Profit (loss) on equity investments, net of taxes	47.7%	(3.0)%	(0.1)%
Net income	70.5%	15.6%	31.7%

Year 2006 Compared to Year 2005

Revenues. Our revenues in 2006 increased to RMB1,038.3 million (US\$133.0 million) from RMB489.2 million in 2005, primarily due to the increase of our revenue from online game services.

Online Game Services. In 2006, revenues from online game services substantially increased to RMB1,028.0 million (US\$ 131.7 million) from RMB466.6 million in 2005, primarily due to the increase in revenues we generated from our commercial operation of WoW in China for the full year in 2006, compared to seven months in 2005.

Game operating support, website solutions and advertisement. In 2006, revenues from game operating support, website solutions and advertisement decreased by 21% to RMB4.8 million from RMB6.1 million in 2005. The decrease was primarily due to the decline in MU revenue.

Table of Contents

Short message services. In 2006, revenues from SMS service decreased by 87% to RMB0.4 million from RMB3.4 million in 2005.

Other Revenues. In 2006, revenues generated from other products and services decreased to RMB5.1 million (US\$0.7 million) from RMB13.2 million in 2005, primarily due to the decrease of sales of WoW installation packages in 2006.

Cost of Services. Cost of services in 2006 increased to RMB524.0 million (US\$67.1 million) from RMB240.4 million in 2005, primarily due to WoW-related costs, including royalties to VUG, server-related costs and staff costs, that were incurred for the full year in 2006, while only for seven months in 2005. There was also a full year's intangible assets amortization related to The9's acquisition of the remaining 31.1% interest in the entity that operates WoW in China, while only for four months in 2005.

Operating Expenses. Operating expenses in 2006 increased by 16% to RMB191.6 million (US\$24.6 million) from RMB164.9 million in 2005, primarily due to the increase of general and administration expenses as discussed below.

Product Development. Product development expenses in 2006 decreased by 24.3% to RMB30.8 million (US\$3.9 million) from RMB40.6 million in 2005, primarily due to the completion of our first self-developed game, JJW.

Sales and Marketing. Sales and marketing expenses in 2006 decreased by 3.6% to RMB59.6 million (US\$7.6 million) from RMB61.8 million in 2005. The decrease was primarily due to the decrease of WoW-related advertising and promotion activities conducted in 2006.

General and Administrative. General and administrative expenses in 2006 increased by 62.2% to RMB101.3 million (US\$13.0 million) from RMB62.5 million in 2005, primarily due to increase of staff costs, which was in large part due to an increase of headcount, share-based compensation expenses resulting from the adoption of SFAS123(R) Share-Based Payment, effective from January 1, 2006, and higher professional fees.

Interest Income (Expenses), Net. Net interest income decreased to RMB9.1 million (US\$1.2 million) in 2006 from RMB10.0 million in 2005 primarily because we kept less cash denominated in USD in 2006 due to the depreciation of USD against RMB, which generally bears interest at a higher rate.

Income Tax Benefit (Expense). In 2005 and 2006, our effective tax rate was close to zero primarily as a result of the EIT exemption enjoyed by C9I China, which comprised substantially all of our net profit for the year. There was income tax benefit of RMB2.7 million (US\$0.3 million) in 2006, while income tax expense of RMB0.2 million in 2005.

Other Income, Net. Other income, net increased by 96.4% to RMB28.4 million (US\$3.6 million) in 2006 from RMB14.5 million in 2005, primarily due to an increase of financial subsidies from the local government received in 2006 as compared with 2005.

Profit (loss) on Equity Investments, Net of Taxes. In 2006, loss on equity investments, net of taxes, decreased to RMB0.9 million (US\$0.1 million) from RMB13.7 million in 2005. This was primarily because the joint venture that operates World of Warcraft in other greater China regions, which we disposed of in late fiscal year 2006, recorded a profit in 2006, while all invested companies were operating at a loss in 2005.

Table of Contents

Gain on Investment Disposal. In 2006, we recognized a gain of approximately RMB23.4 million (US\$3.0 million) from the sale of our equity interest in the joint venture in Taiwan that operates WoW in other greater China regions.

Impairment loss on Investment. In 2006, we recorded an impairment provision of RMB20.4 million (US\$2.6 million) in connection with an investment accounted for by us under the equity method. No such impairment was recognized in 2005.

Net income. Net income in 2006 increased by 331% to RMB312.5 million (US\$40.0 million) from RMB72.5 million in 2005, as a result of the cumulative effect of the above factors.

Year 2005 Compared to Year 2004

Revenues. Our revenues in 2005 increased substantially to RMB489.2 million from RMB36.6 million in 2004, primarily due to the substantial increase of our revenue from online game services, which was in turn due to our commercial operation of WoW in China since June 2005. As online games have a life span, which we believe is typically four to five years for successful online games, WoW's remaining useful life will gradually come to an end. Accordingly, we do not expect to achieve the same revenue growth rate in future years as what we experienced in 2005.

Online Game Services. In 2005, revenues from online game services substantially increased to RMB466.6 million from RMB0.4 million in 2004, primarily due to the increase in revenues we generated from our commercial operation of WoW in China since June 2005.

Game operating support, website solutions and advertisement. In 2005, revenues from game operating support, website solutions and advertisement decreased by 75.5% to RMB6.1 million from RMB24.7 million in 2004. The decrease was primarily due to the decline in MU revenue.

Short message services. In 2005, revenue from our SMS service decreased by 69.1% from RMB11.1 million in 2004 to RMB3.4 million in 2005, primarily because we allocated substantially all of our resources to online game operation and development.

Other Revenues. In 2005, revenues generated from other products and services increased to RMB13.2 million from RMB0.5 million in 2004, primarily due to the sales of WoW-related accessories and merchandise in 2005.

Cost of Services. Cost of services in 2005 increased substantially to RMB240.4 million from RMB9.1 million in 2004, primarily due to WoW-related costs, including the payment of royalties to VUG, that were incurred in 2005 but not in 2004.

Operating Expenses. Operating expenses in 2005 increased by 366.5% to RMB164.9 million from RMB35.3 million in 2004, primarily due to the expenses relating to the launch and operation of WoW in China in 2005.

Product Development. Product development expenses in 2005 increased by 350.2% to RMB40.6 million from RMB9.0 million in 2004, primarily due to the continued development of our first self-developed game, JJW, and a new 3D MMORPG we outsourced to a third party.

Table of Contents

Sales and Marketing. Sales and marketing expenses in 2005 increased by 569.8% to RMB61.8 million from RMB9.2 million in 2004. The increase was primarily due to WoW-related advertising and promotion activities conducted in 2005.

General and Administrative. General and administrative expenses in 2005 increased by 265.4% to RMB62.5 million from RMB17.1 million in 2004, primarily due to increase of staff costs, which was in large part due to an increase in the number of our employees, expenses related to relocation to new premises, depreciation of fixed assets of new office and public company related professional fees, impairment provision for accounts receivable in connection with our SMS services and intangible assets related to our licenses for Zhi Zun and Mystina Online games.

Interest Income (Expenses), Net. Net interest income increased to RMB10.0 million in 2005 from RMB0.08 million in 2004 due to the increase of our average cash balance, which was primarily attributable to the proceeds of our initial public offering in December 2004.

Income Tax Benefit (Expense). Income tax expenses decreased by 96.7% to RMB0.2 million in 2005 from RMB5.1 million in 2004. In 2004, our effective tax rate was 83% mainly due to a near break-even accounting profit coupled with an add-back of non-deductible expenses for tax purpose. In 2005, our effective tax rate was close to nil primarily as a result of the EIT exemption enjoyed by C9I China, which contributed to a substantial majority of our net profit for the year.

Other Income, Net. Other income, net slightly decreased by 8.4% to RMB14.5 million in 2005 from RMB15.8 million in 2004, primarily due to decreased income from sales of Pass9 of approximately RMB3.0 million, and foreign exchange loss due to the appreciation of the Chinese Renminbi in 2005 compared to 2004 of RMB9.7 million, partially offset by the financial subsidy of RMB13.4 million from the local government received in 2005.

Profit (loss) on Equity Investments, Net of Taxes. In 2005, we recorded RMB13.7 million of equity in losses from affiliated companies, net of taxes, compared to an income of RMB16.6 million in 2004. This was primarily due to the decline in revenues of MU which resulted in a loss for 9Webzen in 2005. Additionally, other companies in which we have equity interests are still in the development or early game commercialization stages and recorded operating losses.

Net income. Net income in 2005 increased by 196.1% to RMB72.5 million from RMB24.5 million in 2004, as a result of the cumulative effect of the above factors.

B. Liquidity and Capital Resources

The following table sets forth the summary of our cash flows for the periods indicated:

Table of Contents

	Year Ended December 31,			
	2004 RMB	2005 RMB	2006 RMB	US\$
	(unaudited)			
	(in thousands)			
Net cash provided by operating activities	35,076	184,541	598,910	76,743
Net cash (used in) investing activities	(126,260)	(483,651)	(204,827)	(26,246)
Net cash provided by financing activities	821,699	3,832	58,040	7,437
Effect of foreign exchange rate changes on cash	124	(9,882)	(2,522)	(323)
Net increase (decrease) in cash and cash equivalents	730,639	(305,160)	449,601	57,611
Cash and cash equivalents at beginning of period	62,766	793,405	488,245	62,562
Cash and cash equivalents at end of period	793,405	488,245	937,846	120,173

We have financed our operations primarily through the proceeds from the sale of our Series A convertible preferred shares in April 2000, the convertible loans received from our principal shareholders in October 2001 and October 2002, respectively, and the net proceeds from our initial public offering of our ADSs in December 2004. We repaid the entire outstanding principal plus interest accrued on the convertible loans in December 2004.

Lastly, we have financed our operations through our operating activities. As of December 31, 2006, we had RMB937.8 million (US\$120.2 million) in cash and cash equivalents. For the foreseeable future, our liquidity will be heavily dependent on cash flow generated by operating activities.

Net cash provided by operating activities was RMB598.9 million (US\$76.7 million) in 2006 compared to RMB184.5 million in 2005. This increase was mainly due to the combined result of increased receipts from prepared game points, and financial subsidies from the local government, offset in part by prepaid royalties to VUG, and operational expenses.

Net cash provided by operating activities was RMB184.5 million in 2005 compared to RMB35.1 million in 2004 primarily due to the significant increase of our revenue from online game services, which was largely due to our commercial launch of WoW in China in June 2005.

Net cash used in investing activities was RMB204.8 million (US\$26.2 million) in 2006, compared to RMB483.7 million in 2005 and RMB126.3 million in 2004. The decrease from 2005 to 2006 was due to fewer server purchases and investment volume in 2006 as compared to 2005. The significant increase from 2004 to 2005 was primarily due to additional investments in C9I in connection to our commercial launch of WoW in June 2005.

Capital Expenditures

Capital Expenditures. We made capital expenditures of RMB39.4 million,

Table of Contents

RMB273 million and RMB118.8 million (US\$15.2 million) in 2004, 2005 and 2006, respectively. The capital expenditures principally consisted of purchases of servers, computers and other items related to our network infrastructure and license fees. However, if we license new games or enter into strategic joint ventures or acquisitions, we may require additional funds. Our capital expenditures in 2007 are expected to amount to approximately RMB471 million.

C. Research and Development

Our research and development efforts are primarily focused on the localization of licensed games from foreign developers, the development of our proprietary online games, and the maintenance of our websites. We intend to maintain our internal game development capabilities and license more new games that are attractive to users in China.

D. Trend Information

Other than as disclosed elsewhere in this annual report, we are not aware of any trends, uncertainties, demands, commitments or events for the period from January 1, 2004 to December 31, 2006 that are reasonably likely to have a material effect on our net revenues, income, profitability, liquidity or capital resources, or that caused the disclosed financial information to be not necessarily indicative of future operating results or financial conditions.

E. Off-Balance Sheet Arrangements

Other than our operating leases, we do not have any outstanding derivative financial instruments, off-balance sheet guarantees, interest rate swap transactions or foreign currency forward contracts. We do not engage in trading activities involving non-exchange traded contracts.

F. Contractual Obligations

We have entered into leasing arrangements related to the use of certain office premises and internet data centers. The following table sets forth our commitments under operating leases as of December 31, 2006:

	Payment Due by Period				
	Total	Less than 1 year	1-3 years (in US\$)	3-5 years	More than 5 years
Long-Term Debt Obligations					
Capital (Finance) Lease Obligations					
Operating Lease Obligations	7,328,941	5,696,786	1,632,155		
Other Long-Term Liabilities Reflected on the Company's Balance Sheet					
Total	7,328,941	5,696,786	1,632,155		

In addition to the leasing obligations set forth above, we have contractual obligations under various license agreements to pay the licensors license fees and royalties based on the face value of the online game cards and online points sold by us. The following table sets forth our committed advance payments of royalties from sales of WoW playing time in China as of December 31, 2006.

Table of Contents

	Total	Payment Due by Period			
		Less than 1 year	1-3 years (in US\$)	3-5 years	More than 5 years
Advance Payment of WoW-related Royalties	23,460,878	6,574,202	16,886,676		

The following two paragraphs describe royalties and other amounts that we have agreed to pay in connection with our licensing and operation of WoW in China.

In connection with our licensing and operation of WoW in China, we are obligated to pay royalties equal to 22% of the face value of WoW prepaid cards and online points and either 37.7% or 39% of the face value of the CD-Keys sold by us by making recoupable advances against royalty payments in an aggregate amount of approximately US\$51.3 million over a four-year period commencing from the commercial launch. We paid VUG an initial non-refundable license fee of US\$3.0 million in 2004, the first year minimum royalty guarantee of US\$13.0 million in 2005 and the second year minimum royalty guarantee of US\$14.8 million in 2006. We are also obligated to commit a certain percentage of WoW gross sales in the marketing and promotion of WoW in China as required by our license agreement with VUG. As security for each advance payment, C9I China is obligated to procure a standby letter of credit prior to each relevant period.

Other than WoW-related royalty payment obligations, as of December 31, 2006, the total outstanding license fees, guaranteed minimum royalties and marketing expenses we were required to pay within the next five years under other license agreements were approximately US\$65.4 million, excluding royalties based on the actual sale of game playing time that are payable in addition to the guaranteed minimum royalties. Additionally, we have agreed with Webzen to incur marketing expenses related to the SUN game amounting to approximately US\$3 million for the first year after our execution of the license agreement with Webzen, and similar amounts to be agreed upon between Webzen and us for each of the two years thereafter.

In 2007, we entered into agreements to operate the following games:

Game	Developer	Description
Ragnarok Online 2	Gravity Co. Ltd.	MMORPG
Emil Chronicle Online	Gravity Co. Ltd.	MMORPG
Huxley	Webzen Inc.	Massively multiplayer online first-person shooting game
EA Sports FIFA Online	EA	Casual soccer game
Audition 2	G10 Entertainment Korea Corp.	Advanced casual dancing online game

The total outstanding minimum license fees, guaranteed minimum royalties and

Table of Contents

minimum marketing expenses the we are required to pay under the license agreements for the games provided above are approximately US\$62.5 million. In addition, we are also required to pay the licensors of the games royalties based on the face value of the online game cards and online points sold by us. We may also be required to pay additional license fees, minimum royalties and marketing expenses up to an aggregate maximum of approximately US\$42.5 million if certain milestones are achieved during the license periods for the games, which is typically three to four years from the date of commercial launch.

G. **Quantitative and Qualitative Disclosures about Market Risk**

Interest Rate Risk. Our exposure to interest rate risk for changes in interest rates relates primarily to the interest income generated by excess cash invested in short-term money market accounts and certificates of deposit. We have not used any derivative financial instruments in our investment portfolio or for cash management purposes. Interest-earning instruments carry a degree of interest rate risk. We have not been exposed nor do we anticipate being exposed to material risks due to changes in interest rates. However, our future interest income may fall short of expectations due to changes in interest rates.

Foreign Exchange Risk. We are exposed to foreign exchange risk arising from various currency exposures. Our payments to Webzen and VUG and a significant portion of our financial assets are denominated in U.S. dollars while almost all of our revenues are denominated in RMB, the legal currency in China. We have not used any forward contracts or currency borrowings to hedge our exposure to foreign currency risk. The value of RMB against the U.S. dollar and other currencies may fluctuate and is affected by, among other things, changes in political and economic conditions. The conversion of RMB into foreign currencies, including U.S. dollars, has been based on rates set by the People's Bank of China. On July 21, 2005, the PRC government changed its decade-old policy of pegging the value of the Renminbi to the U.S. dollar. Under the new policy, RMB is permitted to fluctuate within a narrow and managed band against a basket of certain foreign currencies. This change in policy has resulted in an approximately 5.7% appreciation of RMB against the U.S. dollar by the end of 2006. While the international reaction to the RMB revaluation has generally been positive, there remains significant international pressure on the PRC government to adopt an even more flexible currency policy, which could result in a further and more significant appreciation of the RMB against the U.S. dollar.

Any significant revaluation of RMB may adversely affect our cash flows and financial position, and the value of, and any dividends payable on, our ADSs in U.S. dollars. For example, an appreciation of RMB against the U.S. dollar would make any new RMB denominated investments or expenditures more costly to us, to the extent that we need to convert U.S. dollars into RMB for such purposes. An appreciation of RMB against the U.S. dollar would also result in foreign currency translation losses for financial reporting purposes when we translate our U.S. dollar denominated financial assets into RMB, as RMB is our reporting currency.

Foreign exchange transactions under our capital account, including principal payments with respect to foreign currency-denominated obligations, continue to be subject to significant foreign exchange controls and the approval of the SAFE. These limitations could affect our ability to obtain foreign exchange through debt or equity financing, or to obtain foreign exchange for capital expenditures. See Item 3, **Key Information Risk Factors Risks Related to Doing Business in China** Restrictions on currency exchange in China limit our ability to utilize our revenues effectively, make dividend payments and meet our foreign currency denominated obligations.

Table of Contents

H. Recent Accounting Pronouncements

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities (SFAS No. 159) which permits entities to choose to measure many financial instruments and certain other items at fair value that are not currently required to be measured at fair value. SFAS No. 159 will be effective for us on January 1, 2008. We are currently evaluating the impact of adopting SFAS No. 159 on our financial position, cash flows, and results of operations.

In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157, Fair Value Measurements (SFAS 157), which defines fair value, established guidelines for measuring fair value and expands disclosures regarding fair value measurements. SFAS 157 does not require any new fair value measurements but rather eliminates inconsistencies in guidance found in various prior accounting pronouncements. SFAS 157 will be effective for us starting January 1, 2008. Earlier adoption is permitted, provided the company has not yet issued financial statements, including for interim periods, for that fiscal year. We are still assessing the impact of the adoption of SFAS 157 on our financial statements.

In July 2006, the FASB issued FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes - an Interpretation of FASB Statement No.109 (FIN 48), which clarifies the accounting for uncertainty in tax positions. This Interpretation requires that the Company recognize and disclose in its financial statements the impact of a tax position if that position is more likely than not of being sustained on audit, based on the technical merits of the position. The provisions of FIN 48 became effective for us on January 1, 2007, with the cumulative effect of the change in accounting principle, if any, recorded as an adjustment to opening retained earnings. We adopted FIN 48 as of January 1, 2007 and based on an assessment completed by us, the adoption of FIN 48 did not result in any material items being recognized.

In June 2006, the FASB ratified the provisions of EITF No. 06 - 3 How Sales Taxes Collected from Customers and Remitted to Governmental Authorities Should Be Presented in the Income Statement (EITF 06-3), which requires us to disclose how we account for taxes imposed on and concurrent with a specific revenue-producing transaction. For the periods presented, we have recorded the tax collected from our customers and remitted to the relevant tax authorities as sales tax (which is subtracted from gross revenue to calculate net revenues) in the statement of operations and comprehensive income.

ITEM 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES

A. Directors and Senior Management

The names of our current directors and executive officers and their respective ages and positions as of the date of this report are as follows:

Table of Contents

Directors, Director Nominees and Executive Officers	Age	Position/Title
Jun Zhu	40	Chairman of the Board and Chief Executive Officer
Stephen C. K. Law	44	Director
Davin Alexander Mackenzie ⁽¹⁾⁽²⁾	46	Independent Director
Chao Y. Wang ⁽¹⁾⁽²⁾	42	Independent Director
Ka Keung Yeung ⁽¹⁾⁽²⁾	48	Independent Director
Hannah Lee	33	Vice President ⁽³⁾ and Chief Financial Officer
Alan Chen ⁽⁴⁾	46	Vice President and Chief Technology Officer
Xudong He	35	Vice President
Lingdong Huang	30	Vice President
Fumin Lin	40	Vice President
Swun Woo Park	33	Vice President
Chris Shen	38	Vice President Marketing

(1) Member of Compensation Committee.

(2) Member of Audit Committee.

(3) We have passed a board resolution appointing Hannah Lee and Jun Yao as Senior Vice Presidents, effective June 30, 2007.

(4) Alan Chen has tendered resignation effective June 30, 2007.

Each of our officers will hold office until such officer's successor is elected and duly qualified, or until such officer's earlier death, bankruptcy, insanity, resignation or removal. There are no family relationships among any of the directors or executive officers of our company. For the terms of our directors, see Board Practices Terms of Directors.

Biographical Information

Jun Zhu is one of the co-founders of our company. He has served as the Chairman of our board of directors and Chief Executive Officer since our inception. Prior to founding The9, Mr. Zhu co-founded Flagholder New Technology Co. Ltd., an information technology company based in China, in 1997 and served as its director from 1997 to 1999. From 1993 to 1997, Mr. Zhu worked at QJ (U.S.A.) Investment, Ltd., a trading company in the United States. Mr. Zhu attended an undergraduate program at Shanghai Jiao Tong University.

Stephen Cheuk Kin Law has served as a member of our board of directors since February 2004, and he has also served as a member of our audit committee from December 2004 to December 2005. Mr. Law is an executive director of TPG Growth based in Hong Kong, and is responsible for private equity investments in North Asia. Prior to joining the Texas Pacific Group in July 2006, Mr. Law was a director of Morningside Technologies Inc, where he was responsible for a portfolio of private equity investments including for us. He was also the Chief Financial Officer of Media Partners International Holdings Inc., a leading outdoor advertising operator in China and he led its sale to JC Decaux. Mr. Law holds a Bachelor of Science degree from the University of Birmingham, and an MBA degree from the University of Hull. He is a member of the Institute of Chartered Accountants in England and Wales, a member of the Hong Kong Institute of Certified Public Accountants, and a registered practicing Certified Public Accountant in Hong Kong.

Davin Alexander Mackenzie has served as our independent director since July 2005. Mr. Mackenzie is the Managing Director and Beijing Representative of Peak Capital, a private equity and advisory firm. Prior to his co-founding Peak Capital, Mr. Mackenzie served seven years with the International Finance Corporation, a private sector arm of The World Bank Group, including four years as the resident representative for China and Mongolia. Mr. Mackenzie has also worked at Mercer Management Consultants in Washington, D.C, and at First National Bank of Boston in Taiwan. Mr. Mackenzie is a graduate of Dartmouth College with a Bachelor's degree in Government. He received an M.A. degree in International Studies and an MBA degree from the Wharton School of the University of Pennsylvania. Mr. Mackenzie has also completed the World Bank Executive Development Program at Harvard Business School in Boston, Massachusetts.

Chao Y. Wang has served as our independent director since December 2004. Mr. Wang is the founding partner and Chief Executive Officer of ChinaEquity Investment Co., a China-based independent venture capital firm which focuses on the technology, media and

Table of Contents

telecommunications sectors in China. Before founding ChinaEquity in 1999, Mr. Wang had spent 12 years in the investment banking and financial services industry with Chase, Standard & Poors, Morgan Stanley and the China Development Bank. During that time, he headed Morgan Stanley's Beijing operations for three years. Mr. Wang presently serves on the board of directors of several companies including Origo Sino-India Plc, Rising Tech Co. and Infront Sport Media. Mr. Wang holds a Bachelor's degree from Huazhong University of Science and Technology and an MBA degree from Rutgers University. Mr. Wang has also attended the Senior Executive Program of Harvard University and Tsinghua University.

Ka Keung Yeung has served as our independent director since July 2005. Mr. Yeung is the Executive Vice President and Chief Financial Officer of Phoenix Satellite Television Holdings Limited in charge of corporate finance and administration. He is also the Company Secretary and Qualified Accountant of Phoenix Satellite Television Holdings Limited. Mr. Yeung joined Phoenix in March 1996 and is in charge of all of Phoenix's internal and external financial management and arrangements as well as the supervision of administration and personnel matters. Mr. Yeung graduated from the University of Birmingham and remained in the United Kingdom until 1992 after obtaining his qualification as a chartered accountant. Upon returning to Hong Kong, he worked at Hutchison Telecommunications and STAR in the field of finance and business development.

Hannah Lee has served as our Vice President and Chief Financial Officer since January 2004. Prior to joining us, she was a manager of audit and risk advisory services in KPMG, Shanghai from January 2003 to January 2004. From 1998 to 2002, Ms. Lee worked at PricewaterhouseCoopers Canada, including as a manager of audit and business assurance services. Ms. Lee is a member of the Institute of Chartered Accountants in Canada and a CPA in Illinois, USA. Ms. Lee received her Bachelor's degree with honors from the University of British Columbia, Canada.

Alan Chen has been appointed as our Vice President and Chief Technology Officer, effective as of July 1, 2006. Prior to joining The9, Mr. Chen served as Executive Vice President at Hewlett-Packard (China) Co., Ltd. in the Technology Services Group. He also served as Vice President of Professional Services, Greater China, at Lucent Technologies (China) Limited. Mr. Chen received his Bachelor's degree in Telecommunication Engineering from Beijing University of Posts and Telecommunications, and his Masters degree in Computer and Telecommunication Engineering jointly from Beijing University of Posts and Telecommunications and Hong Kong Polytechnic University. He also holds a Ph.D. degree in Electrical Engineering from the University of Ottawa, Canada.

Xudong He has served as our Vice President since March 2004. He was our Vice President and Financial Controller from 2000 to 2001 and Vice President and acting Chief Operating Officer from January 2002 to February 2004. Prior to joining us, Mr. He held a number of positions at PricewaterhouseCoopers in China, including senior consultant and auditor from 1995 to 2000. Mr. He received his Bachelor's degree from Fudan University and MBA degree from Shanghai Jiao Tong University. Mr. He is a member of China Institute of Certified Public Accountants.

Lingdong Huang has served as our Vice President responsible for our Product Department since January 2007. Mr. Huang joined us in April 1999, and has held various roles within our different business units. Since November 2005, he served as Senior Director of our Product Department. Prior to that, Mr. Huang served as the Director of our Product Department from 2002 to 2005 and a Manager of our Editorial Planning Department from 1999 to 2002. Mr. Huang received his Bachelor's degree in Informatics from Shanghai University.

Fumin (Benjamin) Lin has served as our Vice President since February 2007. Prior to joining us, since January 2006, Mr. Lin served as the general manager of Joypark Webstar Technology Co., Ltd. in Beijing, an affiliated company of Softstar Entertainment Inc. From October 2001 to December 2005, Mr. Lin served various management functions at Square-Enix Webstar Inc., a joint venture between Softstar Entertainment Inc. in Taiwan and Square Enix Co., Ltd. in Japan, and led it to be a leading game developer and publisher in Asia. From October 2000 to September 2001, he served as Assistant Vice President of Webstar Inc. in Taipei. Prior to that, Mr. Lin had worked as a product manager at Softstar Entertainment Inc. and Dynalab Inc. Mr. Lin is experienced in leading MMORPG operations in China. Mr. Lin received his Bachelor's degree in Arts & Advertisement from the Chinese Culture University in Taipei, Taiwan.

Table of Contents

Swun Woo (Tony) Park has served as our Vice President since January 2007. Prior to joining us, Mr. Park served as the President of International Business at Hanbitsoft Inc. (Hanbitsoft), a leading game developer and publisher in Korea. Since April 2002, he has served various management functions at Hanbitsoft, including business development, strategic planning, marketing and brand management, game studio management, localization & technical operations, joint venture management, as well as investor relations. Prior to joining Hanbitsoft, Tony worked as a venture capitalist at ADL Partners from April 2000 to April 2002, and as a management consultant at Arthur D. Little from December 1998 to April 2000. Mr. Park received his Bachelor's degree in Business Administration from the Korea University.

Chris Shen has served as our Vice President Marketing since January 1, 2006. Mr. Shen joined The9 in August 2005 as our Senior Director of Marketing and is in charge of The9's marketing and public relations activities. Prior to joining The9, Mr. Shen served as Group Account Director and Account Director for several renowned advertising agencies in Shanghai and Taipei, mainly focused on servicing multinational brands of different industries, including fast-moving consumer goods, financial services and retailing. During the past 12 years, Mr. Shen helped numerous local and international brands plan and execute various marketing initiatives, resulting in these brands' excellent performance in their respective markets. Mr. Shen received his Bachelor's degree in management science from the National Chiao Tung University in Taiwan.

Yong Wang has served as our Vice President overseeing our Sales and Customer Services Departments since January 2007. Since May 2005, Mr. Wang served as the Senior Director of our Customer Service Department. From December 2001 to April 2005, he served as the Director of our Sales Department and led our sales department in strengthening the national distribution network for our pre-paid game cards. Prior to joining us, Mr. Wang worked as a business development manager at East Asia International Trader Company from 1999 to 2000, and a supervisor of general business department at East Assets Trading Co., Ltd. from 1992 to 1999. Mr. Wang graduated from the Shanghai Mechanical College.

Jun Yao has served as our Vice President in charge of business development since 2000. Prior to joining us, he was a business development manager at Eachnet.com from January 2000 to June 2000. From 1998 to 1999, Mr. Yao was a manager in the business technology and consulting department of Pudong Software Development Company. Prior to that, he had worked at the Shanghai Municipal Government and Pudong New District Government from 1992 to 1998. Mr. Yao received his Bachelor's degree from Zhejiang University.

Table of Contents**B. Compensation of Directors and Executive Officers**

In 2006, the aggregate cash compensation to our executive officers was approximately RMB9.5 million (US\$1.2 million). We paid a total of RMB0.9 million (US\$0.1 million) in cash to our non-executive directors for their services in 2006. No executive officer is entitled to any severance benefits upon termination of his or her employment with our company.

Amended 2004 Stock Option Plan

Our board of directors and our shareholders have adopted and approved an Amended 2004 Stock Option Plan in order to attract and retain the best available personnel for positions of substantial responsibility, to provide additional incentive to employees, directors and consultants and to promote the success of our business. In December 2006, we increased the ordinary shares reserved under our 2004 option plan to 2,449,614 shares. Of this amount, options to purchase 2,362,236 shares were granted as at May 31, 2007, excluding options forfeited pursuant to the terms of our Amended 2004 Stock Option Plan. The following table provides a summary of the options granted to our directors, executive officers and other individuals as a group under our Amended 2004 Stock Option Plan as of May 31, 2007.

	Total Number of Ordinary Shares Underlying Options Granted*	Exercise Price Range (in US\$)
Jun Zhu	950,000	38.54
Hannah Lee	179,543	17.00 -30.90
Jun Yao	112,272	17.00 -30.90
Yong Wang	96,102	17.00
Chris Shen	40,000	19.96 -30.90
Stephen Law	39,300	17.00 -38.54
Chao Y. Wang	39,300	17.00 -38.54
Ka Keung Yeung	39,300	17.50 -38.54
Davin Alexander Mackenzie	39,300	17.50 -38.54
Lingdong Huang	36,450	17.00 -30.90
Other individuals as a group	790,669	17.00 -30.90

* Excluding 254,955 options forfeited as at May 31, 2007 pursuant to the terms of our Amended 2004 Stock Option Plan.

Table of Contents

The following paragraphs describe the other principal terms of our Amended 2004 Stock Option Plan.

Termination of Options. Where the option agreement permits the exercise or purchase of the options granted for a certain period of time following the recipient's termination of service with us, or the recipient's disability or death, the options will terminate to the extent not exercised or purchased on the last day of the specified period or the last day of the original term of the options, whichever occurs first.

Administration. Our stock option plan is administered by our board of directors or an option administrative committee designated by our board of directors constituted to comply with applicable laws. In each case, our board of directors or the committee it designates will determine the provisions, terms and conditions of each option grant, including, but not limited to, the option vesting schedule, repurchase provisions, forfeiture provisions, form of payment upon settlement of the award, payment contingencies and satisfaction of any performance criteria.

Vesting Schedule. Options granted under our stock option plan vest over a two to four year period following a specified vesting commencement date. In general, between one half to one-fourth of the options granted vest at the end of the first anniversary of the vesting commencement date and the remainder will vest over the remaining vesting period on a monthly basis, subject to the recipient of the option continuing to be employed by us on each vesting date.

Option Agreement. Options granted under our stock option plan are evidenced by an option agreement that contains, among other things, provisions concerning exercisability and forfeiture upon termination of employment or consulting arrangement, as determined by our board. In addition, the option agreement also provides that options granted under our stock option plan are subject to a 180-day lock-up period following the effective date of a registration statement filed by us under the Securities Act, if so requested by us or any representative of the underwriters in connection with any registration of the offering of any of our securities.

Option Exercise. The term of options granted under our stock option plan may not exceed five years from the date of grant. The consideration to be paid for our shares upon exercise of an option or purchase of shares underlying the option will be determined by the plan administrator and may include cash, check, ordinary shares, a promissory note, consideration received by us under a cashless exercise program implemented by us in connection with our stock option plan, or any combination of the foregoing methods of payment.

Table of Contents

Third-Party Acquisition. If a third party acquires us through the purchase of all or substantially all of our assets, a merger or other business combination, all outstanding options or share purchase rights will be assumed or equivalent options or rights substituted by the successor corporation or parent or subsidiary of successor corporation. In the event that the successor corporation refuses to assume or substitute for the options or share purchase rights, all options or share purchase rights will become fully vested and exercisable immediately prior to such transaction and all unexercised awards will terminate unless, in either case, the awards are assumed by the successor corporation or its parent.

Termination of Plan. Unless terminated earlier, our stock option plan will expire in 2014. Our board of directors has the authority to amend, alter, suspend or terminate our stock option plan subject to shareholder approval to the extent necessary to comply with applicable law. However, no such action may (i) impair the rights of any optionee unless agreed by the optionee and the stock option plan administrator, or (ii) affect the stock option plan administrator's ability to exercise the powers granted to it under our stock option plan.

C. Board Practices

In 2006, our directors met in person or via telecommunication devices four times and passed resolutions by unanimous written consent for eight times. Most directors attended all of the meetings of our board and its committees on which he served after becoming a member of our board. No director is entitled to any severance benefits upon termination of his directorship with us.

Board of Directors

Our board of directors consists of the following five directors: Jun Zhu, Stephen Law, Chao Y. Wang, Davin Mackenzie and Ka Keung Yeung. A director is not required to hold any shares in our company by way of qualification. A director may vote with respect to any contract, proposed contract or arrangement in which he is materially interested. A director may exercise all the powers of our company to borrow money, mortgage its undertaking, property and uncalled capital, and issue debentures or other securities whenever money is borrowed or as security for any obligation of the company or of any third party.

Committees of the Board of Directors

Audit Committee. In 2006, our audit committee held six meetings. Our audit committee consists of Messrs. Chao Y. Wang, Davin Mackenzie and Ka Keung Yeung, all of whom satisfy the independence definition under Rule 4200 of the Nasdaq Stock Market, Inc. Marketplace Rules, or the Nasdaq Rules and the audit committee independence standard under Rule 10A-3 under the Securities Exchange Act of 1934, as amended. All the members of our audit committee meet the financial expert definition of the Nasdaq Rules.

The audit committee oversees our accounting and financial reporting processes and the audits of the financial statements of our company. The audit is responsible for, among other things:

selecting the independent auditors and pre-approving all auditing and non-auditing services permitted to be performed by the independent auditors;

reviewing and approving all proposed related-party transactions;

Table of Contents

discussing the annual audited financial statements with management and the independent auditors;

annually reviewing and reassessing the adequacy of our audit committee charter;

meeting separately and periodically with management and the independent auditors;

reporting regularly to the full board of directors; and

such other matters that are specifically delegated to our audit committee by our board of directors from time to time.

Compensation Committee. In 2006, our compensation committee held three meetings. Our compensation committee consists of Messrs. Chao Y. Wang, Davin Mackenzie and Ka Keung Yeung, all of whom meet the independence definition under the Nasdaq Rules. The compensation committee assists the board in reviewing and approving the compensation structure of our executive officers, including all forms of compensation to be provided to our executive officers. The compensation committee will be responsible for, among other things:

reviewing and determining the compensation for our seven most senior executives;

reviewing the compensation of our other employees and recommending any proposed changes to the management;

reviewing and approving director and officer indemnification and insurance matters;

reviewing and approving any employee loans in an amount equal to or greater than US\$60,000 (or such amount as from time to time as announced by the relevant regulatory bodies as requiring the approval of the Committee); and

reviewing periodically and approving any long-term incentive compensation or equity plans, programs or similar arrangements, annual bonuses, employee pension and welfare benefit plans.

Duties of Directors

Under Cayman Islands law, our directors have a statutory duty of loyalty to act honestly in good faith with a view to our best interests. Our directors also have a duty to exercise the skill they actually possess and such care and diligence that a reasonably prudent person would exercise in comparable circumstances. In fulfilling their duty of care to us, our directors must ensure compliance with our memorandum and articles of association. A shareholder has the right to seek damages if a duty owed by our directors is breached.

Terms of Directors

Our board of directors are currently divided into two classes with different terms, each of which expiring each year. This provision would delay the replacement of a majority of our directors and would make changes to the board of directors more difficult than if such

Table of Contents

provision were not in place. The three independent directors hold office until the date of the annual general meeting of shareholders to be held in 2009, and Jun Zhu and Stephen Law, each of whom represents a major shareholder of our company, will hold office until the date of the annual general meeting of shareholders to be held in 2007.

Upon expiration of the term of office of each class, succeeding directors in each class will be elected for a term of three years. Directors may be removed from office by ordinary resolution of shareholders at any time before the expiration of his/her term.

Pursuant to the natural expiration of the directorial terms, elections for directors would be held each year on the date of the annual general meeting of shareholders. We may remove a director from office by ordinary resolution.

Voting Agreement

On November 26, 2004, Incisight Limited and Bosma Limited, our two largest shareholders, entered into a voting agreement with respect to the election of our board of directors. Both parties have agreed to vote their respective shares to ensure that our board of directors consists of: (i) one director designated by Incisight, so long as it holds 5% or more of our total outstanding shares, which initially shall be Jun Zhu; (ii) one director designated by Bosma, so long as it holds 5% more of our total outstanding shares, which initially shall be Stephen Law; (iii) two individuals mutually acceptable to Incisight and Bosma, but who are not otherwise affiliated with either of them, our company or any of our shareholders; and (iv) an additional individual who is not affiliated with either Incisight, Bosma, our company or any of our shareholders. Both parties agreed to vote to ensure that none of the directors elected pursuant to the voting agreement shall be removed from office, except for cause or unless by the affirmative vote of both parties. In addition, each of Incisight and Bosma agrees to elect one or two individuals designated by the other party as directors so long as each of them holds not less than 20% of the total issued shares of our company. The voting agreement shall continue until both parties mutually agree in writing to terminate it.

D. Employees

As of December 31, 2006, we had 964 employees, including 80 in management and administration, 615 in our customer service centers, 137 in game operations, sales and marketing, and 132 in product development, including supplier management personnel and technical support personnel. We consider our relations with our employees to be good.

E. Share Ownership

The following table sets forth information with respect to the beneficial ownership of our ordinary shares as of May 31, 2007, by:

- (1) each of our directors and executive officers who are also our shareholders; and
- (2) each person known to us to own beneficially more than 5% of our ordinary shares.

Table of Contents

Name	Ordinary Shares Beneficially Owned Number ⁽¹⁾	% ⁽²⁾
Directors and executive officers:		
Jun Zhu ⁽³⁾	6,007,334	20.50
All Directors and Senior Executive Officers as a Group ⁽⁴⁾	6,097,334	20.81
Principal shareholders:		
Bosma Limited ⁽⁵⁾	5,145,065	17.56
EA International Studio and Publishing Ltd. ⁽⁶⁾	4,506,829	15.38

- (1) Beneficial ownership is determined in accordance with the rules of the Securities and Exchange Commission, and includes voting or investment power with respect to the securities.
- (2) Percentage of beneficial ownership is based on 29,301,027 ordinary shares outstanding as of May 31, 2007, excluding shares underlying outstanding options as of that date.
- (3) Consists of 6,000,000 ordinary shares held by IncSight Limited, a British Virgin Islands company 100% owned by Mr. Zhu and 7,334 ordinary shares beneficially owned by Mr. Zhu. The business address for Mr. Zhu is Building No. 3, 690 Bibo Road, Zhangjiang Hi-tech Park, Pudong New Area, Shanghai 201203, People's Republic of China.
- (4) Shares owned by all of our directors and executive officers as a group include shares beneficially owned by Jun Zhu and Xudong He, and exclude shares underlying options held by our directors and officers.
- (5) Consists of 5,145,065 ordinary shares held by Bosma. Bosma Limited, a British Virgin Islands corporation, is wholly-owned by Morningside VC Limited, a British Virgin Islands corporation, which is in turn wholly-owned by The HCB Trust, an Isle of Man trust, the trustee of which is Dunn Investments Limited, an Isle of Man corporation. Dunn Investments Limited controls indirectly, through The HCB Trust, a 100% interest in Bosma Limited, and as a result has the sole power to vote and dispose of the shares of The9 Limited held by Bosma Limited. Dunn Investments Limited is controlled by its board of directors, consisting of Lorna Irene Cameron and Philip Alvaro Salazar, both of whom expressly disclaim beneficial ownership of the shares held by Bosma Limited. The address for Bosma Limited is Pasea Estate, Road Town, Tortola, British Virgin Islands.
- (6) Consists of 4,506,829 shares owned by EA International Studio and Publishing Ltd., a Bermuda corporation. The address for EA International Studio and Publishing Ltd. is LOM Building, 27 Reid Street, Hamilton, HM 11, Bermuda.

ITEM 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS**A. Major Shareholders**

See Item 6, Directors, Senior Management and Employees Share Ownership.

B. Related Party Transactions**Arrangements with Affiliated PRC Entities**

Current PRC laws and regulations impose substantial restrictions on foreign ownership of entities involved in the Internet content provision, Internet culture operation and Internet publishing businesses in China, which include online game operations. Therefore, we conduct part of our activities through a series of agreements with Shanghai IT under which Shanghai IT, The9 China and 9Webzen Shanghai jointly operate the MU game in China and share the revenues from MU. C9I China has entered into similar contractual arrangements with Shanghai IT and The9 China to jointly operate WoW in mainland China and to share the revenues from operating WoW in China.

Shanghai IT holds the requisite licenses and approvals for conducting Internet content provision, Internet culture operation and Internet publishing businesses in China; Shanghai IT is owned by Jun Zhu, our Chief Executive Officer and shareholder, and Yong Wang, our

Table of Contents

Vice President. Shanghai Advertisement holds the requisite license for conducting the advertising business in China; Shanghai Advertising is owned by Shanghai IT and Xudong He, our Vice President. Shanghai Advertising is now in the process of dissolution.

We have obtained the exclusive right to benefit from Shanghai IT's licenses and approvals. In addition, through a series of contractual arrangements with Shanghai IT, Shanghai Advertisement and their respective shareholders, we are able to direct and control the operation and management of Shanghai IT and Shanghai Advertisement. We believe that the individual shareholders of Shanghai IT and Shanghai Advertisement will not receive material personal benefits from these agreements except as shareholders of The9 Limited.

We do not believe we could have obtained these agreements, taken as a whole, from unrelated third parties. Because of the uncertainty relating to the legal and regulatory environment in China, the terms of most of the agreements were not defined unless terminated by the parties thereto. According to our PRC counsel, Fangda Partners, these agreements, except for those that have already been terminated, are valid, binding and enforceable under the current laws and regulations of China. The principal provisions of these agreements are described below.

Master Agreement for MU. The9 China, 9Webzen and Shanghai IT have entered into a master agreement in connection with operating MU in China and providing services to customers jointly. Under the agreement, The9 China acts as the technical service provider of Pass9, which is the membership management and payment system used in our online game operation; 9Webzen Shanghai acts as the exclusive licensee of MU in China and the technical service provider for the operation of MU; and Shanghai IT acts as the provider of the domain name *www.muchina.com* and Internet content provider. The parties share the revenues generated by MU in China pursuant to the following revenue sharing provisions set forth in the agreement: (i) Shanghai IT is entitled to the amounts being RMB10 per average concurrent user per month, but in any case no more than 5.5% of net revenue; (ii) The9 China is entitled to 5% of net revenue prior to October 2006, and none thereafter; and (iii) 9Webzen is entitled to the rest of the revenue after deducting the portions allocated to Shanghai IT and The9 China.

Master Agreement for WoW. The9 China, C9I China and Shanghai IT have entered into a master agreement in connection with the operation WoW in China and providing services to customers jointly. Under the agreement, The9 China acts as the technical service provider of Pass9, which is the membership management and payment system used in our online game operation; C9I China acts as the exclusive licensee of WoW in China and the technical service provider for the operation of WoW. The revenues generated by WoW in China are shared by C9I China, Shanghai IT and The9 China pursuant to following revenue sharing provisions set forth in the master agreement in connection with operating WoW in China: (i) Shanghai IT is entitled to RMB10,000 per month; (ii) The9 China is entitled to 5% of net revenue, less the RMB10,000 per month paid to Shanghai IT; and (iii) C9I China is entitled to the remaining 95% of net revenue. In May 2007, The9 China, C9I China and Shanghai IT amended the Master Agreement for WoW to add China The9 Interactive (Beijing) (C9I Beijing) as a party to the Master Agreement. Pursuant to this amendment, the revenue-sharing arrangements were revised so that all revenue is recognized by Shanghai IT first, and services are provided and revenue recognized by the other parties based on fair-market value.

Domain Name License Agreement. We granted Shanghai IT the right to use the domain name *www.the9.com* for its hosting of the9 City and its provision of Internet content in China since January 2001, and the relevant license agreement was terminated when we transferred the domain name *www.the9.com* to Shanghai IT.

Exclusive Technical Service Agreement. We provide Shanghai IT with technical services for the operation of computer software and related business, including the provision of systematic solutions to the operation of Internet websites, the rental of computer and Internet facilities, daily maintenance of Internet servers and databases, the development and update of relevant computer software, and all other related technical and consulting services. Shanghai IT pays quarterly service fees to us based on their actual operating results. We are the exclusive provider of these services to Shanghai IT.

Shareholder Voting Proxy Agreements. Each of the shareholders of Shanghai IT has entered into a Shareholder Voting Rights Proxy Agreement with us, under which each shareholder of Shanghai IT irrevocably grants us the power to exercise all voting rights to which he is entitled as a shareholder of Shanghai IT. We have also entered into a similar agreement with the individual shareholder of Shanghai Advertisement.

Call Option Agreements. We entered into a call option agreement with each of the shareholders of Shanghai IT, under which the parties irrevocably agreed that, at our sole discretion, we and/or any third parties designated by us will be entitled to acquire all or part of the equity interests in Shanghai IT, to the extent permitted by the then-effective PRC laws and regulations. The consideration for such acquisition will be the minimum amount permitted by applicable PRC law. The shareholders of Shanghai IT have also agreed not to enter into any transaction, or fail to take any action, that would substantially affect the assets, liabilities, equity or operations of Shanghai IT without our prior written consent. We and the only individual shareholder of Shanghai Advertisement have entered into a similar call option agreement.

Loan Agreements. From 2002 to May 2005, we loaned a total of RMB23.0 million to the shareholders of Shanghai IT, solely for the purposes of capitalizing and increasing the registered capital of Shanghai IT. Such loan shall become immediately due and payable when we send a written notice to the borrowers requesting repayment. Jun Zhu and Yong Wang have pledged all of their equity interests in Shanghai IT in favor of us under an equity pledge agreement. In the event of a breach of any term in the loan agreement or any other agreement by either Shanghai IT or its shareholders, we will be entitled to enforce our rights as a pledgee under the agreement.

Equity Pledge Agreements. To secure the full performance by Shanghai IT or its shareholders of their respective obligations under the Exclusive Technical Service Agreement, the Shareholder Voting Rights Proxy Agreement, the Call Option Agreement and the Loan Agreement, the shareholders of Shanghai IT have pledged all of their equity interests in Shanghai IT in favor of us under an equity pledge agreement. In the event of a breach of any term in the above agreements by either Shanghai IT or its shareholders, we will be entitled to enforce our pledge rights over such pledged equity interests to compensate for any and all losses suffered from such breach. A similar equity pledge agreement was also entered into by and between us and the individual shareholder of Shanghai Advertisement.

Transactions with China Interactive

In July 2003, we and China Interactive formed C9I to acquire an exclusive license from VUG to localize and operate the WoW game in China. We have had effective control over C9I's management and operations since its inception. When C9I was established in July 2003, we and China Interactive owned 54% and 46% of C9I, respectively. Our share ownership in C9I increased to 68.9% in January 2005 when China Interactive transferred a 14.9% interest in C9I to us at the per share price equal to the aggregate invested amount per share paid by China Interactive for the transferred shares. Such transfer was made in connection with our grant of a demand loan in the aggregate principal amount of US\$4.6 million to China Interactive.

In April 2005, concurrently with our execution of a loan agreement to grant China Interactive a US\$6.0 million, interest-bearing loan, China Interactive granted an option to us purchase all C9I's shares held by China Interactive at the total purchase price equal to the principal amount of the loan plus the interest accrued thereon. We may exercise the option, in whole or in part, only if China Interactive fails to repay the loan and interest accrued thereon in full on the maturity date of the loan or otherwise breaches the loan agreement, or an event of default under the loan agreement shall have occurred. The loan matures one year from the date on which the loan was made. China Interactive has pledged all of its C9I shares to us to secure the due and timely performance of its obligations under the loan agreement. In July 2005, we signed a term sheet to purchase the remaining 31.1% interest in C9I from China Interactive for a total purchase price of US\$40 million, payable at four installments. We acquired the remaining interest and C9I became our wholly-owned subsidiary in late August 2005. As of the date of this report, the US\$40 million purchase price has been paid in full.

Investments in Affiliated Companies

In December 2005, we entered into an agreement with Webzen, Inc. to sell our 21% interest in 9Webzen to Webzen, Inc. for a total consideration of US\$2.8 million. After completion of the sale, our interest in 9Webzen was reduced from 51% to 30%.

In June 2005, we entered into a joint venture agreement through Spring Asia with Softworld, Ltd., and established GFD, Inc., or GFD. We currently own 30% of GFD, and Softworld, Ltd. owns the remaining 70%. Our total investment in this joint venture was US\$1.5 million. GFD holds an exclusive license to operate the WoW game in China outside of mainland China.

In December 2006, we entered into an agreement with China Interactive Limited to sell our 100% interest in Spring Asia Limited, which primarily owned assets consisting of a US\$1.5 million equity investment in GFD and a US\$1.5 million receivable from GFD to China Interactive Limited, for a total consideration of US\$7 million (approximately RMB 54.4 million). This payment was guaranteed by IAH, a company in which we own shares.

In August 2006, we invested in Sunmi Rise Limited. We currently own 30% of Sunmi Rise and our total investment in this company was US\$1.0 million. Sunmi Rise holds an exclusive license to operate Groove Party, a casual online game in mainland China.

In July 2006, we invested in IAH. As of May 31, 2007, we owned approximately 11.37% of IAH and our total investment in this company was US\$2.0 million. IAH holds exclusive licenses to operate Granado Espada and Hellgate: London in eight southeast Asia countries.

ITEM 8. FINANCIAL INFORMATION

A. Consolidated Statements and Other Financial Information

We have appended consolidated financial statements filed as part of this annual report.

Legal Proceedings

We are not currently a party to any material litigation or other legal proceeding and are not aware of any pending or threatened litigation or other legal proceeding that may have a material adverse impact on our business or operations.

Dividend Policy

Since our inception in 1999, we have not declared or paid any dividends on our ordinary shares. We do not have any present plan to pay any cash dividends on our ordinary shares in the foreseeable future. We currently intend to retain most, if not all, of our available funds and any future earnings for use in the operation and expansion of our business.

We rely on dividends and other fees paid to us by our subsidiaries and affiliated entities in China. In accordance with current PRC laws, regulations and accounting standards, our subsidiaries and affiliated entities in China are required to allocate to their general reserves at least 10% of their respective after-tax profits. Appropriations to these reserves are not required after these reserves have reached 50% of the registered capital of the respective companies. In addition, at the discretion of their respective board of directors or shareholders meeting, our subsidiaries and affiliated entities in China may allocate a portion of their respective after-tax profits to their staff welfare and bonus funds or discretionary surplus reserve. Staff welfare and bonus reserve funds may not be distributed to equity owners.

Our board of directors has complete discretion as to whether we will distribute dividends in the future, subject to the approval of our shareholders. Even if our board of directors determines to distribute dividends, the form, frequency and amount of our dividends will depend upon our future operations and earnings, capital requirements and surplus, general financial condition, contractual restrictions and other factors as the board of directors may deem relevant. Any dividend we declare will be paid to the holders of ADSs, subject to the terms of the deposit agreement, to the same extent as holders of our ordinary shares, less the fees and expenses payable under the deposit agreement. Any dividend we declare will be distributed by the depositary bank to the holders of our ADSs. Cash dividends on our ordinary shares, if any, will be paid in U.S. dollars.

Table of Contents**B. Significant Changes**

We have not experienced any significant changes since the date of our audited consolidated financial statements included in this annual report.

ITEM 9. THE OFFER AND LISTING**A. Offering and Listing Details.**

Our ADSs, each representing one ordinary share, have been listed on the Nasdaq Global Market since December 15, 2004. Our ADSs are traded under the symbol NCTY.

For the year ended December 31, 2004, the trading price ranged from US\$21.00 to US\$24.10 per ADS. For the year ended December 31, 2005, the trading price ranged from US\$13.69 to US\$28.51 per ADS. For the year ended December 31, 2006, the trading price ranged from US\$15.5 to US\$32.87 per ADS.

The following table provides the high and low trading prices for our ADSs on the Nasdaq Global Market for the periods shown.

	Sales Price	
	High	Low
Annual Highs and Lows		
2005	28.51	13.69
2006	32.87	15.50
Quarterly Highs and Lows		
Second Quarter 2005	27.5	14.55
Third Quarter 2005	28.51	17.86
Fourth Quarter 2005	19.77	13.69
First Quarter 2006	31.94	15.50
Second Quarter 2006	31.77	21.56
Third Quarter 2006	27.15	20.75
Fourth Quarter 2006	32.87	20.80
First Quarter 2007	39.73	29.80
Monthly Highs and Lows		
December 2006	32.87	26.59
January 2007	39.73	29.80
February 2007	39.18	32.54
March 2007	35.36	30.40
April 2007	43.45	33.34
May 2007	46.46	37.49
June 2007 (through June 25)	46.98	42.60

B. Memorandum and Articles of Association

We incorporate by reference into this annual report the description of our amended and restated memorandum of association contained in our F-1 registration statement (File No. 333-120810) originally filed with the SEC on November 26, 2004, as amended. Our shareholders adopted our amended and restated memorandum and articles of association by a special resolution on December 9, 2004.

C. Material Contracts

We have not entered into any material contracts other than in the ordinary course of business and other than those described in Item 4, Information on the Company or elsewhere in this annual report on Form 20-F.

D. Exchange Controls

China's government imposes control over the convertibility of RMB into foreign currencies. The conversion of RMB into foreign currencies, including U.S. dollars, has been based on rates announced by the People's Bank of China. On July 21, 2005, the PRC government changed its decade-old policy of pegging the value of the Renminbi to the U.S. dollar. Under the new policy, the Renminbi is permitted to fluctuate within a narrow and managed band against a basket of certain foreign currencies. This change in policy has resulted in an approximately 5.7% appreciation of the RMB against the U.S. dollar by the end of 2006. While the international reaction to the RMB revaluation has generally been

positive, there remains significant international pressure on the PRC government to adopt an even more flexible currency policy, which could result in a further and more significant appreciation of the RMB against the U.S. dollar.

Table of Contents

Pursuant to the Foreign Exchange Control Regulations issued by the State Council on January 29, 1996, and effective as of April 1, 1996 (and amended on January 14, 1997) and the Administration of Settlement, Sale and Payment of Foreign Exchange Regulations which came into effect on July 1, 1996 regarding foreign exchange control, or the Regulations, conversion of RMB into foreign exchange by foreign investment enterprises for current account items, including the distribution of dividends and profits to foreign investors of joint ventures, is permissible. Foreign investment enterprises are permitted to remit foreign exchange from their foreign exchange bank account in China on the basis of, inter alia, the terms of the relevant joint venture contracts and the board resolutions declaring the distribution of the dividend and payment of profits. On January 14, 1997, the State Council amended the Foreign Exchange Control Regulations and added, among other things, an important provision, as Article 5 provides that the State shall not impose restrictions on recurring international current account payments and transfers. Conversion of RMB into foreign currencies and remittance of foreign currencies for capital account items, including direct investment, loans, security investment, is still subject to the approval of SAFE, in each such transaction.

Under the Regulations, foreign investment enterprises are required to open and maintain separate foreign exchange accounts for capital account items (but not for other items). In addition, foreign investment enterprises may only buy, sell and/or remit foreign currencies at those banks authorized to conduct foreign exchange business upon the production of valid commercial documents and, in the case of capital account item transactions, document approval from SAFE.

Currently, foreign investment enterprises are required to apply to SAFE for foreign exchange registration certificates for foreign investment enterprises (which are granted to foreign investment enterprises, upon fulfilling specified conditions and which are subject to review and renewal by SAFE on an annual basis). With such foreign exchange registration certificates and required underlying transaction documents, or with approval documents from the SAFE if the transactions are under capital account (which are obtained on a transaction-by-transaction basis), foreign-invested enterprises may enter into foreign exchange transactions at banks authorized to conduct foreign exchange business to obtain foreign exchange for their needs.

E. Taxation

The following summary of the material Cayman Islands and United States federal income tax consequences of an investment in our ADSs or ordinary shares is based upon laws and relevant interpretations thereof in effect as of the date of this annual report, all of which are subject to change. This summary does not deal with all possible tax consequences relating to an investment in our ADSs or ordinary shares, such as the tax consequences under state, local and other tax laws.

Cayman Islands Taxation

In the opinion of our Cayman Islands counsel, Maples and Calder, the Cayman Islands currently levies no taxes on individuals or corporations based upon profits, income, gains or appreciation and there is no taxation in the nature of inheritance tax or estate duty.

Table of Contents

There are no other taxes likely to be material to us levied by the Government of the Cayman Islands except for stamp duties which may be applicable on instruments executed in, or brought within the jurisdiction of the Cayman Islands. The Cayman Islands is not party to any double tax treaties. There are no exchange control regulations or currency restrictions in the Cayman Islands.

United States Federal Income Taxation

The following discussion describes the material United States federal income tax consequences under present law of an investment in the ADSs or ordinary shares. This summary applies only to investors that hold the ADSs or ordinary shares as capital assets and that have the U.S. dollar as their functional currency. This discussion is based on the tax laws of the United States as in effect on the date of this report and on United States Treasury regulations in effect or, in some cases, proposed, as of the date of this report, as well as judicial and administrative interpretations thereof available on or before such date. All of the foregoing authorities are subject to change, which change could apply retroactively and could affect the tax consequences described below.

The following discussion does not deal with the tax consequences to any particular investor or to persons in special tax situations such as:

banks;

financial institutions;

insurance companies;

broker dealers;

traders that elect to mark to market;

tax-exempt entities;

persons liable for alternative minimum tax;

persons holding an ADS or ordinary share as part of a straddle, hedging, conversion or integrated transaction;

holders that actually or constructively own 10% or more of our voting stock;

persons holding ADSs or ordinary shares through partnerships or other pass-through entities; or

persons who acquired ADSs or ordinary shares pursuant to the exercise of any employee share option or otherwise as consideration. Investors are urged to consult their tax advisors about the application of the United States federal tax rules to their particular circumstances as well as the state and local and foreign tax consequences to them of the purchase, ownership and disposition of ADSs or ordinary shares.

Table of Contents

The discussion below of the United States federal income tax consequences to U.S. Holders applies to you if you are the beneficial owner of ADSs or ordinary shares and you are, for U.S. federal income tax purposes.

a citizen or individual resident of the United States;

a corporation or partnership organized under the laws of the United States, any State or the District of Columbia;

an estate whose income is subject to United States federal income taxation regardless of its source;

a trust that (1) is subject to the supervision of a court within the United States and the control of one or more United States persons or (2) has a valid election in effect under applicable U.S. Treasury regulations to be treated as a United States person.

If you are a beneficial owner of ADSs or ordinary shares and you are not described as a U.S. Holder, you will be considered a Non-U.S. Holder. Non-U.S. Holders should consult the discussion below regarding the United States federal income tax consequences applicable to Non-U.S. Holders.

The discussion below assumes that the representations contained in the deposit agreement are true and that the obligations in the deposit agreement and any related agreement have been and will be complied with in accordance with the terms. If you hold ADSs, you should be treated as the holder of the underlying ordinary shares represented by those ADSs for United States federal income tax purposes.

The U.S. Treasury has expressed concerns that parties to whom ADSs are pre-released may be taking actions that are inconsistent with the claiming, by U.S. Holders of ADSs, of foreign tax credits for United States federal income tax purposes. Such actions would also be inconsistent with the claiming of the reduced rate of tax applicable to dividends received by certain non-corporate U.S. Holders, as described below. Accordingly, the availability of the reduced tax rate for dividends received by certain non-corporate U.S. Holders could be affected by future actions that may be taken by the U.S. Treasury or parties to whom ADSs are pre-released.

U.S. Holders

Taxation of Dividends and Other Distributions on the ADSs or Ordinary Shares

Subject to the passive foreign investment company rules discussed below, the gross amount of dividends paid with respect to the ADSs or ordinary shares generally will be included in your gross income as ordinary dividend income on the date of receipt by the depository, in the case of ADSs, or by you, in the case of ordinary shares, but only to the extent that the distribution is paid out of our current or accumulated earnings and profits (as computed under United States federal income tax principles). The dividends will not be eligible for the dividends-received deduction allowed to corporations in respect of dividends received from other U.S. corporations. To the extent that the amount of the distribution exceeds our current and accumulated earnings and profits, it will be treated first as a tax-free return of your tax basis in your ADSs or ordinary shares, and to the extent the amount of the distribution exceeds your tax basis, the excess will be taxed as capital gain.

Table of Contents

Dividends paid in RMB will be included in your income as a U.S. dollar amount based on the exchange rate in effect on the date of receipt by the depository, in the case of ADSs, or by you, in the case of ordinary shares, regardless of whether the payment is in fact converted into U.S. dollars at that time. If you do not receive U.S. dollars on the date the dividend is distributed, you will be required to include either gain or loss in income when you later exchange the RMB for U.S. dollars. The gain or loss will be equal to the difference between the U.S. dollar value of the amount that you include in income upon receipt of the dividend and the amount that you receive when you actually exchange the RMB for U.S. dollars. The gain or loss generally will be ordinary income or loss from United States sources.

With respect to individual taxpayers for taxable years beginning before January 1, 2011, such dividends may be qualified dividend income which is taxed at the lower applicable capital gains rate provided that (1) the ADSs or ordinary shares, as applicable, are readily tradable on an established securities market in the United States, (2) we are not a passive foreign investment company (as discussed below) for either our taxable year in which the dividend was paid or the preceding taxable year, and (3) certain holding period requirements are met. For this purpose, ADSs listed on Nasdaq will be considered to be readily tradable on an established securities market in the United States. You should consult your tax advisors regarding the availability of the lower rate for dividends paid with respect to our ADSs or ordinary shares.

Dividends will constitute foreign source income for foreign tax credit limitation purposes. If the dividends are qualified dividend income (as discussed above), the amount of the dividend taken into account for purposes of calculating the foreign tax credit limitation will be limited to the gross amount of the dividend, multiplied by the reduced rate divided by the highest rate of tax normally applicable to dividends. The limitation on foreign taxes eligible for credit is calculated separately with respect to specific classes of income. For this purpose, dividends distributed by us with respect to the ADSs or ordinary shares will be passive income or, in the case of certain U.S. Holders, financial services income. For taxable years beginning after December 31, 2006, dividends distributed by us with respect to ADSs or ordinary shares generally will constitute passive category income but could, in the case of certain U.S. Holders, constitute general category income.

Taxation of Disposition of Shares

Subject to the passive foreign investment company rules discussed below, you will recognize taxable gain or loss on any sale, exchange or other taxable disposition of an ADS or ordinary share equal to the difference between the amount realized (in U.S. dollars) for the ADS or ordinary share and your tax basis (in U.S. dollars) in the ADS or ordinary share. If the consideration you receive for the ADS or ordinary share is not paid in U.S. dollars, the amount realized will be the U.S. dollar value of the payment received. In general, the U.S. dollar value of such a payment will be determined on the date of receipt of payment if you are a cash basis taxpayer and on the date of disposition if you are an accrual basis taxpayer. However, if the ADSs or ordinary shares, as applicable, are treated as traded on an established securities market and you are either a cash basis taxpayer or an accrual basis taxpayer who has made a special election, you will determine the U.S. dollar value of the amount realized in a foreign currency by translating the amount received at the spot rate of exchange on the settlement date of the sale. The gain or loss generally will be capital gain or

Table of Contents

loss. If you are an individual who has held the ADS or ordinary share for more than one year, you generally will be eligible for reduced tax rates. The deductibility of capital losses is subject to limitation. Any such gain or loss that you recognize generally will be treated as United States source income or loss (in the case of loss, subject to certain limitations).

Passive Foreign Investment Company

Although it is not clear how the contractual arrangements between us and our affiliated entities will be treated for purposes of the passive foreign investment company rules, based on the market value of our ADSs, the composition of our assets and income and our operations, we believe that we were not a passive foreign investment company for United States federal income tax purposes for the taxable year ended December 31, 2006. A non-U.S. corporation is considered a passive foreign investment company for any taxable year if either:

at least 75% of its gross income is passive income (the income test), or

at least 50% of the value of its assets (based on an average of the quarterly values of the assets during a taxable year) is attributable to assets that produce or are held for the production of passive income (the asset test).

We are treated as owning our proportionate share of the assets and earning our proportionate share of the income of any other corporation in which we own, directly or indirectly, more than 25% (by value) of the stock.

We must make a separate determination each year as to whether we are a passive foreign investment company. As a result, our passive foreign investment company status may change. In particular, because the total value of our assets for purposes of the asset test generally will be calculated using the market price of our ADSs and ordinary shares, our passive foreign investment company status will depend in large part on the market price of our ADSs and ordinary shares. Accordingly, fluctuation in the market price of our ADSs or ordinary shares may result in us becoming a passive foreign investment company in future taxable years. If we are a passive foreign investment company for any year during which you hold ADSs or ordinary shares, we generally will continue to be treated as a passive foreign investment company for all succeeding years during which you own ADSs or ordinary shares. However, if we cease to be a passive foreign investment company, you may avoid some of the adverse effects of the passive foreign investment company regime by making a deemed sale election with respect to the ADSs or ordinary shares, as applicable.

If we are a passive foreign investment company for any taxable year during which you hold ADSs or ordinary shares, you will be subject to special tax rules with respect to any excess distribution that you receive and any gain you realize from a sale or other disposition (including a pledge) of the ADSs or ordinary shares, unless you make a mark-to-market election as discussed below. Distributions you receive in a taxable year that are greater than 125% of the average annual distributions you received during the shorter of the three preceding taxable years or your holding period for the ADSs or ordinary shares will be treated as an excess distribution. Under these special tax rules:

the excess distribution or gain will be allocated ratably over your holding period for the ADSs or ordinary shares,

Table of Contents

the amount allocated to the current taxable year, and any taxable year prior to the first taxable year in which we were a passive foreign investment company, will be treated as ordinary income, and

the amount allocated to each other year will be subject to tax at the highest tax rate in effect for that year and the interest charge generally applicable to underpayments of tax will be imposed on the resulting tax attributable to each such year.

The tax liability for amounts allocated to years prior to the year of disposition or excess distribution cannot be offset by any net operating losses for such years, and gains (but not losses) realized on the sale of the ADSs or ordinary shares cannot be treated as capital, even if you hold the ADSs or ordinary shares as capital assets.

If we are a passive foreign investment company, you may avoid taxation under the rules described above by making a qualified electing fund election to include your share of our income on a current basis, or a deemed sale election once we no longer qualify as a passive foreign investment company. However, you may make a qualified electing fund election only if we agree to furnish you annually with certain tax information, and we do not intend to prepare or provide such information.

Alternatively, a U.S. Holder of marketable stock in a passive foreign investment company may make a mark-to-market election for such stock of a passive foreign investment company to elect out of the tax treatment discussed above. If you make a valid mark-to-market election for the ADSs or ordinary shares, you will include in income each year an amount equal to the excess, if any, of the fair market value of the ADSs or ordinary shares as of the close of your taxable year over your adjusted basis in such ADSs or ordinary shares. You are allowed a deduction for the excess, if any, of the adjusted basis of the ADSs or ordinary shares over their fair market value as of the close of the taxable year. However, deductions are allowable only to the extent of any net mark-to-market gains on the ADSs or ordinary shares included in your income for prior taxable years. Amounts included in your income under a mark-to-market election, as well as gain on the actual sale or other disposition of the ADSs or ordinary shares, are treated as ordinary income. Ordinary loss treatment also applies to the deductible portion of any mark-to-market loss on the ADSs or ordinary shares, as well as to any loss realized on the actual sale or disposition of the ADSs or ordinary shares, to the extent that the amount of such loss does not exceed the net mark-to-market gains previously included for such ADSs or ordinary shares. Your basis in the ADSs or ordinary shares will be adjusted to reflect any such income or loss amounts. If you make such a mark-to-market election, tax rules that apply to distributions by corporations which are not passive foreign investment companies would apply to distributions by us (except that the lower applicable capital gains rate would not apply).

The mark-to-market election is available only for marketable stock, which is stock that is traded in other than de minimis quantities on at least 15 days during each calendar quarter (regularly traded) on a qualified exchange or other market, as defined in applicable Treasury regulations. The ADSs are currently listed on Nasdaq, which is a qualified exchange for these purposes. Accordingly, if the ADSs remain listed on Nasdaq and are regularly traded, the mark-to-market election would be available to you if you hold ADSs, were we to become a passive foreign investment company.

If you hold ADSs or ordinary shares in any year in which we are a passive foreign

Table of Contents

investment company, you would be required to file Internal Revenue Service Form 8621 regarding distributions received on the ADSs or ordinary shares and any gain realized on the disposition of the ADSs or ordinary shares.

Non-U.S. Holders

If you are a Non-U.S. Holder, you generally will not be subject to United States federal income tax on dividends paid by us unless the income is effectively connected with your conduct of a trade or business in the United States.

You generally will not be subject to United States federal income tax on any gain attributable to a sale or other disposition of the ADSs or ordinary shares unless such gain is effectively connected with your conduct of a trade or business within the United States or you are an individual who is present in the United States for 183 days or more and certain other conditions exist.

Dividends and gains that are effectively connected with your conduct of a trade or business in the United States generally will be subject to tax in the same manner as they would be if you were a U.S. Holder. Effectively connected dividends and gains received by a corporate Non-U.S. Holder may also be subject to an additional branch profits tax at a 30% rate or a lower tax treaty rate.

Information Reporting and Backup Withholding

In general, information reporting for U.S. federal income tax purposes will apply to distributions made on the ADSs or ordinary shares paid within the United States to a non-corporate U.S. Holder and on sales of the ADSs or ordinary shares to or through a United States office of a broker by a non-corporate U.S. Holder. Payments made outside the United States will be subject to information reporting in limited circumstances.

In addition, backup withholding of U.S. federal income tax will apply to distributions made on ADSs or ordinary shares within the United States to a non-corporate U.S. Holder and on sales of ADSs or ordinary shares to or through a United States office of a broker by a non-corporate U.S. Holder who:

fails to provide an accurate taxpayer identification number,

is notified by the Internal Revenue Service that backup withholding will be required, or

fails to comply with applicable certification requirements.

A Non-U.S. Holder generally may eliminate the requirement for information reporting and backup withholding by providing certification of its foreign status to the payer, under penalties of perjury, on Internal Revenue Service Form W-8BEN.

The amount of any backup withholding collected will be allowed as a credit against United States federal income tax liability provided that appropriate returns are timely filed.

H. Documents on Display

We previously filed with the SEC our registration statement on Form F-1, as amended and prospectus under the Securities Act of 1933, with respect to our ordinary shares.

We are subject to the periodic reporting and other informational requirements of the Securities Exchange Act of 1934, as amended, or the Exchange Act. Under the Exchange Act, we are required to file reports and other information with the SEC. Specifically, we are required to file annually a Form 20-F no later than six months after the close of each fiscal year, which is December 31. Copies of reports and other information, when so filed, may be inspected without charge and may be obtained at prescribed rates at the public reference facilities maintained by the Securities and Exchange Commission at 100F Street, N.E., Washington, D.C. 20549, and at the regional office of the Securities and Exchange Commission located at Citicorp Center, 500 West Madison Street, Suite 1400, Chicago, Illinois 60661. The public may obtain information regarding the Washington, D.C. Public Reference Room by calling the Commission at 1-800-SEC-0330. The SEC also maintains a web site at www.sec.gov that contains reports, proxy and information statements, and other information regarding registrants that make electronic filings with the SEC using its EDGAR system. As a foreign private issuer, we are exempt from the rules under the Exchange Act prescribing the furnishing and content of quarterly reports and proxy statements, and officers, directors and principal shareholders are exempt from the reporting and short-swing profit recovery provisions contained in Section 16 of the Exchange Act.

Our financial statements have been prepared in accordance with U.S. GAAP.

We will furnish our shareholders with annual reports, which will include a review of operations and annual audited consolidated financial statements prepared in conformity with U.S. GAAP.

ITEM 13. DEFAULTS, DIVIDEND ARREARAGES AND DELINQUENCIES
Not Applicable.

ITEM 14. MATERIAL MODIFICATIONS TO THE RIGHTS OF SECURITY HOLDERS AND USE OF PROCEEDS
Not Applicable.

ITEM 15. CONTROLS AND PROCEDURES
Evaluation of Disclosure Controls and Procedures

Our chief executive officer and chief financial officer, after evaluating the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15a-15(e) of the Exchange Act of 1934, as amended) as of December 31, 2006, the end of the period covered by this annual report, have concluded that, as of such date, our disclosure controls and procedures were effective.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, as amended. Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of our financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Because of its inherent limitations, internal control over financial reporting may not prevent or detect all misstatements.

Our management, under the supervision and with the participation of our chief executive officer and chief financial officer, performed an evaluation of the effectiveness of our internal control over financial reporting as of December 31, 2006 based on the framework in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation, our management has concluded that our internal control over financial reporting was effective as of December 31, 2006.

This annual report does not include a report of our registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to audit by our registered public accounting firm pursuant to temporary rules of the Securities and Exchange Commission that permit us to provide only management's report in this annual report.

Changes in Internal Control

In our annual report on Form 20-F in respect of the fiscal year ended December 31, 2005, we reported a material weakness in our internal control over financial reporting due to insufficient control over the application of generally accepted accounting principles in our financial statements.

During 2006, we implemented a number of remedial measures to strengthen our controls over the preparation and review of our financial statements and related disclosures under generally accepted accounting principles. Specifically, we enhanced and increased our

Table of Contents

financial reporting resources in connection with the application of generally accepted accounting principles, implemented an enhanced financial statement close process, and made other improvements as we deemed necessary to improve our internal control over financial reporting. As a result, as of December 31, 2006, our management determined that applicable controls were effectively designed and operating so as to enable management to conclude that the above described material weakness has been remediated.

ITEM 16A. AUDIT COMMITTEE FINANCIAL EXPERT

See Item 6.C. of this annual report, Directors, Senior Management and Employees Board Practices.

ITEM 16B. CODE OF ETHICS

Our board of directors has adopted a code of ethics that applies to our directors, officers, employees and agents, including certain provisions that specifically apply to our chief executive officer, chief financial officer, senior finance officer, controller, vice presidents and any other persons who perform similar functions for us. We hereby undertake to provide to any person without charge, a copy of our code of business conduct and ethics within ten working days after we receive such person's written request.

ITEM 16C. PRINCIPAL ACCOUNTANT FEES AND SERVICES

The following table sets forth the aggregate fees by categories specified below in connection with certain professional services rendered by PricewaterhouseCoopers, our principal external auditors, for the periods indicated. We did not pay any tax related or other fees to our auditors during the periods indicated below.

	2004	2005	2006	
Audit fees ⁽¹⁾	RMB1,986,360	RMB3,066,676	RMB4,565,399	US\$ 585,000
Audit-related fees ⁽²⁾	RMB6,290,140	Nil	Nil	Nil
Tax fees	Nil	Nil	Nil	Nil
All other fees	Nil	Nil	RMB11,706	US\$ 1,500

- (1) Audit fees means the aggregate fees billed in each of the fiscal years listed for professional services rendered by our principal auditors for the audit of our annual financial statements.
- (2) Audit-related fees means the aggregate fees billed in each of the fiscal years listed for assurance and related services by our principal auditors that are reasonably related to the performance of the audit or review of our financial statements and are not reported under Audit fees. Services comprising the fees disclosed under the category of Audit-related fees involve principally the issue of comfort letter, rendering of listing advice, and other audit-related services for the years ended December 31, 2004, December 31, 2005 and December 31, 2006.

We engaged PricewaterhouseCoopers in 2004. Accordingly, there were no fees billed to us by PricewaterhouseCoopers prior to 2004. In addition to the fees as indicated in the table above, PricewaterhouseCoopers also provided audit and other professional services to 9Webzen, our affiliated entity. Total service fees billed to 9Webzen related to these professional services in 2004, 2005 and 2006 amounted to US\$80,000, US\$135,000 and US\$99,000, respectively.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

TO THE SHAREHOLDERS OF THE9 LIMITED:

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of operations and comprehensive income, changes in shareholders' equity and cash flows expressed in Renminbi present fairly, in all material respects, the financial position of The9 Limited (the Company) and its subsidiaries as of December 31, 2005 and 2006, and the results of their operations and their cash flows for the years ended December 31, 2004, 2005 and 2006, in conformity with generally accepted accounting principles in the United States of America. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit of these statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management and evaluating the overall financial statements presentation. We believe that our audit provides a reasonable basis for our opinion.

As discussed in Note 2(o) to the consolidated financial statements, the Company changed the manner in which it accounts for share-based compensation in 2006.
