.. Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Item 2.02 Results of Operations and Financial Condition.

On August 8, 2007, Windstream Corporation ("Windstream" or the "Company") issued a press release announcing the Company's second quarter 2007 unaudited consolidated results of operations.

The press release presents the Company's consolidated results of operations measured under generally accepted accounting principles ("GAAP") and certain pro forma results of operations from current businesses. On July 17, 2006, Alltel Corporation ("Alltel") completed the spin-off of its wireline telecommunications business to its stockholders and the merger of that wireline business with Valor Communications Group, Inc. ("Valor"). The resulting company was renamed Windstream Corporation. The GAAP results for the Company for the three and six month periods ended June 30, 2006 reflect only the Alltel wireline business, which was considered the accounting acquirer in the merger.

The Company's press release, and other communications from time to time, include certain financial measures that are not calculated in accordance with GAAP in the United States. A non-GAAP financial measure is defined as a numerical measure of a company's financial performance, financial position or cash flows that excludes (or includes) amounts that are included in (or excluded from) the most directly comparable measure calculated and presented in accordance with GAAP in the Company's financial statements. The non-GAAP financial measures used by the Company may not be comparable to similarly titled measures used by other companies and should not be considered in isolation or as a substitute for measures of performance or liquidity prepared in accordance with GAAP.

This press release includes a presentation of certain unaudited pro forma historical results of operations that the Company refers to as pro forma results from current businesses. These results from current businesses are non-GAAP financial measures that reflect the following adjustments to measures prepared in accordance with GAAP:

- The inclusion of operating results from Valor businesses for the three and six month periods ended June 30, 2006;
- Inclusion of additional amortization for Valor customer lists for the three and six month periods ended June 30, 2006;
- Exclusion of royalty expense charged by Alltel for the use of the Alltel brand during the three and six month periods ended June 30, 2006;
- Exclusion of restructuring and other charges related to acquisitions and dispositions for each period presented;
- Exclusion of the impact of the application of Statement of Financial Accounting Standards ("SFAS") No. 71, "Accounting for the Effects of Certain Types of Regulation" for the three and six month periods ended June 30, 2006. The Company discontinued the application of SFAS No. 71 during the third quarter of 2006;
- Exclusion of results from the directory publishing business, which is held for sale pending the expected completion in the third quarter of a transaction to split off the business to Welsh, Carson, Anderson and Stowe, a private equity investment firm and current Windstream shareholder, for each period presented.

Windstream's purpose for including the results of Valor's businesses, and excluding the directory publishing business and the non-recurring items listed above, is to improve the comparability of results of operations for the three and six month periods of 2006 to the results of operations for the same periods of 2007. Windstream's purpose for these adjustments is to focus on the true earnings capacity associated with providing telecommunication services. Management believes the items either included or excluded from the pro forma results from current businesses are related to strategic activities or other events, specific to the time and opportunity available, and, accordingly, should be excluded when evaluating the Company's operations. The Company has updated its historical pro forma results by adding back severance expenses that were previously excluded in prior quarters. These types of expenses should not necessarily be viewed as non-recurring.

For these reasons, management believes that presenting current business measures assists investors by providing more meaningful comparisons of results from current and prior periods and by providing information that is a better reflection of the core earnings capacity of the businesses. The Company uses pro forma results from current businesses as a key measure of the operational performance of its business segments. Windstream management, including the chief operating decision-maker, uses these measures consistently for all purposes, including internal reporting purposes, the evaluation of business objectives, opportunities and performance, and the determination of management compensation.

The Company's press release, and other communications from time to time, include a non-GAAP measure titled operating income before depreciation and amortization, or OIBDA. OIBDA can be calculated directly from the Company's financial statements by taking operating income and adding back depreciation and amortization expense. The Company will also at times make reference to pro forma OIBDA from current businesses, which is also a non-GAAP measure. Pro forma OIBDA from current businesses adjusts OIBDA for the items that are either included or excluded from pro forma results from current businesses. Management considers OIBDA to be useful to investors because OIBDA provides information specific to the Company's operating performance.

The Company's communications from time to time include a non-GAAP measure entitled net debt. Net debt is consolidated debt, including current maturities, less cash and cash equivalents. The Company believes net debt provides useful information to investors about the capacity of the company to reduce the debt level and improve its capital structure.

The Company will also from time to time include a non-GAAP measure entitled free cash flow. Free cash flow is defined as net cash provided from operations less net cash used in investing activities. The Company believes free cash flow provides the investor useful information about cash available to pay dividends. The Company will include a non-GAAP measure entitled dividend payout ratio. Dividend payout ratio is defined as dividends paid on common shares divided by free cash flow.

On May 25, 2007, Windstream entered into a definitive agreement to acquire CT Communications, Inc. (CT Communications). The acquisition is expected to close in the third quarter of 2007, subject to certain conditions, including necessary approvals from the Federal Communications Commission and CT Communications shareholders. Pro forma results from current businesses presented herein do not include adjustments for the operating results of CT Communications.

Item 9.01 Financial Statements and Exhibits.
