NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Note 1. Significant Accounting Policies

Basis of Presentation.

This quarterly report presents the consolidated financial statements of Lakeland Bancorp, Inc. (the Company) and its subsidiary, Lakeland Bank (Lakeland).

The Company's financial statements reflect all adjustments and disclosures which management believes are necessary for a fair presentation of interim results. The results of operations for the quarter presented do not necessarily indicate the results that the Company will achieve for all of 2007. You should read these interim financial statements in conjunction with the consolidated financial statements and accompanying notes that are presented in the Lakeland Bancorp, Inc. Annual Report on Form 10-K for the year ended December 31, 2006 (the 10-K).

The financial information in this quarterly report has been prepared in accordance with the Company's customary accounting practices; these financial statements have not been audited. Certain information and footnote disclosures required under generally accepted accounting principles have been condensed or omitted, as permitted by rules and regulations of the Securities and Exchange Commission.

Certain reclassifications have been made to the prior period financial statements to conform to the June 30, 2007 presentation.

Note 2. Stock-Based Compensation

The Company established the 2000 Equity Compensation Program which authorizes the granting of incentive stock options and supplemental stock options to employees of the Company which includes those employees serving as officers and directors of the Company. The plan authorized options to purchase up to 2,149,875 shares of common stock of the Company. All of the Company's stock option grants expire 10 years from the date of grant, thirty days after termination of service other than for cause, or one year after death or disability of the grantee. The Company has no option awards with market or performance conditions attached to them. The Company's stock option program allows for the grant of restricted shares, as well as stock option grants. The Company generally issues shares for option exercises from its treasury stock.

On December 13, 2006, the Company granted 36,028 shares of restricted stock at a market value of \$14.65 per share. These shares vest over a four year period. The Company has assumed an estimated forfeiture rate of 6% on the restricted stock. None of the restricted shares are vested at this time. The expected compensation expense will be \$124,000 a year for the next four years. Compensation expense in the first half of 2007 for share based compensation was \$62,000 compared to no share based compensation expense for the same period in 2006. Pre-tax income for the first half of 2007 was reduced by \$62,000 and net income was reduced by \$37,000 for the compensation expense related to restricted stock.

No stock options or restricted stock were granted during the first six months of 2007 or 2006.

Table of Contents

Option activity under the Company's stock option plans as of June 30, 2007 is as follows:

	Number of shares	Weighted average exercise price	Weighted average remaining contractual term (in years)	Aggregate intrinsic value
Outstanding, January 1, 2007	1,140,600	\$ 13.07		
Granted	0	0.00		
Exercised	(27,288)	7.16		
Forfeited	(5,880)	15.17		
Outstanding, June 30, 2007	1,107,432	\$ 13.20	5.79	\$ 1,422,014
Options exercisable at June 30, 2007	1,107,432		5.79	\$ 1,422,014

The aggregate intrinsic value in the table above represents the total pre-tax intrinsic value (the difference between the Company's closing stock price on the last trading day of the second quarter of 2007 and the exercise price, multiplied by the number of in the money options).

Stock options outstanding were 1,107,432 and 1,156,329 at June 30, 2007 and 2006, respectively. The aggregate intrinsic value of options exercised during the first six months ended June 30, 2007 and 2006 was \$184,000 and \$277,000, respectively. Exercise of stock options during the first half of 2007 and 2006 resulted in cash receipts of \$195,000 and \$419,000, respectively.

Information regarding the Company's restricted stock (all unvested) and changes during the six months ended June 30, 2007 is as follows:

	Number of shares	Weighted average price
Outstanding, January 1, 2007	36,028	\$ 14.65
Forfeited	(538)	14.65
Outstanding, June 30, 2007	35,490	\$ 14.65

Table of Contents**Note 3. Comprehensive Income**

The components of other comprehensive income (loss) are as follows:

	Before tax amount	June 30, 2007 Tax Benefit (Expense) (dollars in thousands)	Net of tax amount	Before Tax amount	June 30, 2006 Benefit tax (Expense) (dollars in thousands)	Net of tax amount

Note 4. Statement of Cash Flow Information.

For the six months ended

June 30,
2007 2006
(in thousands)

Supplemental schedule of noncash investing and financing activities:

Cash paid during the period for income taxes	\$ 2,831	\$ 4,334
Cash paid during the period for interest	30,010	23,452

Note 5. Earnings Per Share.

Basic earnings per share for a particular period of time is calculated by dividing net income by the weighted average number of common shares outstanding during that period.

Edgar Filing: LAKELAND BANCORP INC - Form 10-Q

Diluted earnings per share is calculated by dividing net income by the weighted average number of outstanding common shares and common share equivalents. The Company's only outstanding common share equivalents are options to purchase its common stock.

Table of Contents

All weighted average, actual shares and per share information set forth in this quarterly report on Form 10-Q have been adjusted retroactively for the effects of stock dividends including the stock dividend declared on July 12, 2006, payable on August 16, 2006 to shareholders of record on July 31, 2006. The following schedule shows the Company's earnings per share for the periods presented:

	For the three months ended		For the six months ended	
	June 30, 2007	June 30, 2006	June 30, 2007	June 30, 2006
(In thousands except per share data)				
Income applicable to common stock	\$ 5,524	\$ 5,055	\$ 9,894	\$ 9,747
Weighted average number of common shares outstanding - basic	22,075	22,018	22,059	22,062
Share-based plans	109	137	113	150
Weighted average number of common shares and common share equivalents - diluted	22,184	22,155	22,172	22,212
Basic earnings per share	\$ 0.25	\$ 0.23	\$ 0.45	\$ 0.44
Diluted earnings per share	\$ 0.25	\$ 0.23	\$ 0.45	\$ 0.44

Options to purchase 859,243 shares of common stock at a weighted average price of \$14.82 and 33,738 shares of restricted stock at a weighted average price of \$14.65 per share were outstanding and were not included in the computation of diluted earnings per share in the second quarter of 2007 because the option price was greater than the average market price. Options to purchase 702,120 shares of common stock at a weighted average price of \$15.08 per share were outstanding and were not included in the computations of diluted earnings per share in the second quarter of 2006.

Options to purchase 828,855 shares of common stock at a weighted average price of \$14.87 and 33,738 shares of restricted stock at a weighted average price of \$14.65 per share were outstanding and were not included in the computation of diluted earnings per share in the first six months of 2007 because the option price was greater than the average market price. Options to purchase 537,529 shares of common stock at a weighted average price of \$15.39 per share were outstanding and were not included in the computations of diluted earnings per share in the first six months of 2006.

Table of Contents**Note 7. Loans.**

	June 30, 2007	December 31, 2006
	(in thousands)	
Commercial	\$ 750,012	\$ 714,496
Leases	263,041	196,518
Real estate-construction	98,425	87,562
Real estate-mortgage	284,104	272,102
Installment	313,510	315,038
 Total loans	 1,709,092	 1,585,716
 Plus: deferred fees	 5,944	 5,928
 Loans net of deferred costs	 \$ 1,715,036	 \$ 1,591,644

The Company follows Statement of Financial Accounting Standards No. 114, Accounting by Creditors for Impairment of a Loan (known as SFAS No. 114), and Statement of Financial Accounting Standards No. 118, Accounting by Creditors for Impairment of a Loan, Income Recognition and Disclosures. Impairment is measured based on the present value of expected future cash flows discounted at the loan's effective interest rate, except that as a practical expedient, a creditor may measure impairment based on a loan's observable market price, or the fair value of the collateral if the loan is collateral-dependent. Regardless of the measurement method, a creditor must measure impairment based on the fair value of the collateral when the creditor determines that foreclosure is probable.

The following table shows the Company's recorded investment in impaired loans and the related valuation allowance calculated under SFAS No. 114 as of June 30, 2007 and 2006, and the average recorded investment in impaired loans during the six months preceding those dates:

Date	Investment	Valuation Allowance	Average Recorded Investment (over preceding six months)
June 30, 2007	\$ 7.4 million	\$ 2.3 million	\$ 5.0 million
June 30, 2006	\$ 4.0 million	\$ 1.0 million	\$ 3.9 million

Interest received on impaired loans may be recorded as interest income. However, if management is not reasonably certain that an impaired loan will be repaid in full, or if a specific time frame to resolve full collection cannot yet be reasonably determined, all payments received are recorded as reductions of principal. The Company recognized interest on impaired loans of \$111,000 in the first six months of 2007. Interest that would have accrued had the loans performed under original terms would have been \$307,000 for the first six months of 2007.

Note 8. Employee Benefit Plans

The components of net periodic pension cost for the Newton defined pension plan are as follows:

Amortization of unrecognized net actuarial loss	8	7	15	13

Net periodic benefit expense	\$ 11	\$ 9	\$ 22	\$ 17
------------------------------	-------	------	-------	-------

Table of Contents**Note 9. Directors Retirement Plan**

The components of net periodic plan costs for the directors retirement plan are as follows:

	For the three months ended		For the six months ended	
	June 30,		June 30,	
	2007	2006	2007	2006
	(in thousands)		(in thousands)	
Service cost	\$ 5	\$ 6	\$ 9	\$ 12
Interest cost	13	12	27	23
Amortization of prior service cost	9	11	18	23
Net periodic benefit expense	\$ 27	\$ 29	\$ 54	\$ 58

The Company made contributions of \$47,000 to the plan in the six months ended June 30, 2007 and does not expect to make any more contributions in 2007.

On December 31, 2006, the Company adopted SFAS No. 158, Employers Accounting for Defined Benefit Pension and Other Post Retirement Plans. At that time, the Company recorded an other comprehensive loss of \$194,000 for the Directors Retirement Plan and included it in the other comprehensive income for 2006 rather than as an adjustment to the ending balance of accumulated other comprehensive income as SFAS No. 158 requires. The Company believes that this adjustment is not material and intends to correct this error when filing its 2007 Form 10-K.

Note 10. Income Taxes

The Company adopted the provisions of FASB Interpretation 48, Accounting for Uncertainty in Income Taxes (FIN 48), on January 1, 2007. Previously, the Company had accounted for tax contingencies in accordance with SFAS No. 5, Accounting for Contingencies. As required by FIN 48, which clarifies SFAS No. 109, Accounting for Income Taxes, the Company recognizes the financial statement benefit of a tax position only after determining that the relevant tax authority would more likely than not sustain the position following an audit. For tax positions meeting the more-likely-than-not threshold, the amount recognized in the financial statements is the largest benefit that has a greater than 50 percent likelihood of being realized upon ultimate settlement with the relevant tax authority. At the adoption date, the Company applied FIN 48 to all tax positions for which the statute of limitations remained open. As a result of the implementation of FIN 48, the Company recognized a decrease of approximately \$509,000 in the liability for unrecognized tax benefits, which was accounted for as an increase to the January 1, 2007, balance of retained earnings.

The amount of unrecognized tax benefits as of January 1, 2007, was \$367,000, all of which, if ultimately recognized, would reduce the Company's annual effective tax rate. There have been no material changes in unrecognized tax benefits since January 1, 2007.

The Company is subject to U.S. federal income tax law as well as income tax of various state jurisdictions. Tax regulations within each jurisdiction are subject to the interpretation of the related tax laws and regulations and require significant judgment to apply. With few significant exceptions, the Company is no longer subject to U.S. federal or state and local examinations by tax authorities for the years before 2002.

The Company recognizes interest accrued and penalties related to unrecognized tax benefits in income tax expense for all periods presented. The Company had accrued approximately \$138,000 for the payment of interest and penalties at January 1, 2007. Subsequent changes to accrued interest and penalties have not been significant.

Note 11. Subordinated Debentures

On May 16, 2007, the Company issued \$20.6 million of junior subordinated debentures due August 31, 2037 to Lakeland Bancorp Capital Trust IV, a Delaware business trust. The distribution rate on these securities is 6.61% for 5 years and floats at LIBOR plus 152 basis points thereafter. The debentures are the sole asset of the Trust. The Trust issued 20,000

Table of Contents

shares of trust preferred securities, \$1,000 face value, for total proceeds of \$20.0 million. The Company's obligations under the debentures and related documents, taken together, constitute a full, irrevocable and unconditional guarantee on a subordinated basis by the Company of the Trust's obligations under the preferred securities. The preferred securities are callable by the Company on or after August 1, 2012, or earlier if the deduction of related interest for federal income taxes is prohibited, treatment as Tier I capital is no longer permitted, or certain other contingencies arise. The preferred securities must be redeemed upon maturity of the debentures in 2037.

Note 12. Recent Accounting Pronouncements

In September 2006, the Financial Accounting Standards Board ratified a consensus opinion reached by the Emerging Issues Task Force on Issue 06-4, Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements, (EITF 06-4) which requires employers that enter into endorsement split-dollar life insurance arrangements that provide an employee with a postretirement benefit to recognize a liability for the future benefits promised based on the substantive agreement made with the employee. Whether the accrual is based on a death benefit or on the future cost of maintaining the insurance would depend on what the employer has effectively agreed to provide during the employee's retirement. The purchase of an endorsement-type life insurance policy does not qualify as a settlement of the liability.

The consensus in EITF 06-4 is effective for fiscal years beginning after December 15, 2007. The Company intends to adopt EITF 06-4 effective January 1, 2008. The Company is currently evaluating the impact this guidance will have on the Company's financial position and results of operations.

In September 2006, the FASB ratified the consensus reached by the Emerging Issues Task Force in Issue 06-5, Accounting for Purchases of Life Insurance Determining the Amount That Could Be Realized in Accordance with FASB Technical Bulletin No. 85-4, Accounting for Purchases of Life Insurance (EITF 06-5). EITF 06-5 is effective for the fiscal years beginning after December 15, 2006. EITF 06-5 pertains to companies with life insurance policies, including Bank-Owned Life Insurance, and further defines the amount that could be realized under an insurance contract that should be booked as an asset on a company's balance sheet. The Company adopted this EITF effective January 1, 2007 and it did not have a material impact on the Company's financial position and results of operations.

In September 2006, the FASB issued Statement of Financial Accounting Standards (SFAS) No. 157, Fair Value Measurements which is effective for fiscal years beginning after November 15, 2007 and for interim periods within those years. This statement defines fair value, establishes a framework for measuring fair value and expands the related disclosure requirements. The Company is currently evaluating the impact the adoption of SFAS No. 157 will have on its consolidated financial statements.

In February 2007, the FASB issued Statement of Financial Accounting Standards No. 159, The Fair Value Option for Financial Assets and Financial Liabilities-Including an amendment of FASB Statement No. 115. SFAS No. 159 permits entities to choose to measure many financial instruments and certain other items at fair value. SFAS No. 159 is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007 but earlier adoption is permitted provided the entity also elects to apply the provisions of SFAS No. 157 during the same time period. The Company is currently evaluating the impact the adoption of SFAS No. 159 will have on its consolidated financial statements. The Company did not elect early adoption of SFAS No. 159.

PART I ITEM 2

Management's Discussion and Analysis of

Financial Condition and Results of Operations

You should read this section in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations included in the Company's Annual Report on Form 10-K for the year ended December 31, 2006. All weighted average, actual shares and per share information set forth in this Quarterly Report on Form 10-Q has been adjusted retroactively for the effects of stock dividends.

Table of Contents

Statements Regarding Forward Looking Information

The information disclosed in this document includes various forward-looking statements that are made in reliance upon the safe harbor provisions of the Private Securities Litigation Reform Act of 1995 with respect to credit quality (including delinquency trends and the allowance for loan and lease losses), corporate objectives, and other financial and business matters. The words anticipates, projects, intends, estimates, expects, believes, plans, may, will, should, could, and other similar expressions are intended to identify such forward-looking statements. The Company cautions that these forward-looking statements are necessarily speculative and speak only as of the date made, and are subject to numerous assumptions, risks and uncertainties, all of which may change over time. Actual results could differ materially from such forward-looking statements.

In addition to the factors disclosed by the Company elsewhere in this document, the following factors, among others, could cause the Company's actual results to differ materially and adversely from such forward-looking statements: pricing pressures on loan and deposit products; competition; changes in economic conditions nationally, regionally and in the Company's markets; the extent and timing of actions of the Federal Reserve Board; changes in levels of market interest rates; clients' acceptance of the Company's products and services; credit risks of lending activities; changes in the conditions of the capital markets in general and in the capital markets for financial institutions in particular and the impact of the war in Iraq or elsewhere on such markets; and the extent and timing of legislative and regulatory actions and reforms.

The above-listed risk factors are not necessarily exhaustive, particularly as to possible future events, and new risk factors may emerge from time to time. Certain events may occur that could cause the Company's actual results to be materially different than those described in the Company's periodic filings with the Securities and Exchange Commission. Any statements made by the Company that are not historical facts should be considered to be forward-looking statements. The Company is not obligated to update and does not undertake to update any of its forward-looking statements made herein.

Significant Accounting Policies, Judgments and Estimates

The accounting and reporting policies of the Company and its subsidiaries conform with accounting principles generally accepted in the United States of America and predominant practices within the banking industry. The consolidated financial statements include the accounts of the Company, Lakeland, Lakeland Investment Corp. and Lakeland NJ Investment Corp. All intercompany balances and transactions have been eliminated.

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements. These estimates and assumptions also affect reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates. Significant estimates implicit in these financial statements are as follows:

The principal estimates that are particularly susceptible to significant change in the near term relate to the allowance for loan and lease losses, the analysis of goodwill impairment and the Company's deferred tax asset. The evaluation of the adequacy of the allowance for loan and lease losses includes, among other factors, an analysis of historical loss rates, by category, applied to current loan totals. However, actual losses may be higher or lower than historical trends, which vary. Actual losses on specified problem loans, which also are provided for in the evaluation, may vary from estimated loss percentages.

The allowance for loan and lease losses is established through a provision for loan and lease losses charged to expense. Loan principal considered to be uncollectible by management is charged against the allowance for loan and lease losses. The allowance is an amount that management believes will be adequate to absorb losses on existing loans that may become uncollectible based upon an evaluation of known and inherent risks in the loan portfolio. The evaluation takes into consideration such factors as changes in the nature and size of the loan portfolio, overall portfolio quality, specific problem loans, and current economic conditions which may affect the borrowers' ability to pay. The evaluation also details historical losses by loan category, the resulting loss rates for which are projected at current loan total amounts. Loss estimates for specified problem loans are also detailed. All of the factors considered in the analysis of the adequacy of the allowance for loan and lease losses may be subject to change. To the extent actual outcomes differ from management estimates, additional provisions for loan and lease losses may be required that would adversely impact earnings in future periods.

Table of Contents

Interest income is accrued as earned on a simple interest basis. Accrual of interest is discontinued on a loan when management believes, after considering economic and business conditions and collection efforts, that the borrower's financial condition is such that collection of interest is doubtful. When a loan is placed on such non-accrual status, all accumulated accrued interest receivable is reversed out of current period income. Commercial loans 90 days or more past due and still accruing interest must have both principal and accruing interest adequately secured and must be in the process of collection. Residential mortgage loans are placed on non-accrual status at the time when foreclosure proceedings are commenced except where there exists sufficient collateral to cover the defaulted principal and interest payments, and management's knowledge of the specific circumstances warrant continued accrual. Consumer loans are generally charged off when principal and interest payments are four months in arrears unless the obligations are well secured and in the process of collection. Interest thereafter on such charged-off consumer loans is taken into income when received only after full recovery of principal.

The Company accounts for impaired loans in accordance with SFAS No. 114, *Accounting by Creditors for Impairment of a Loan*, as amended by SFAS No. 118, *Accounting by Creditors for Impairment of a Loan - Income Recognition and Disclosures*. Impairment is measured based on the present value of expected future cash flows discounted at the loan's effective interest rate, except that as a practical expedient, a creditor may measure impairment based on a loan's observable market price, or the fair value of the collateral if the loan is collateral-dependent. Regardless of the measurement method, a creditor must measure impairment based on the fair value of the collateral when the creditor determines that foreclosure is probable.

The Company accounts for income taxes under the liability method of accounting for income taxes. Deferred tax assets and liabilities are determined based on the difference between the financial statement and tax bases of assets and liabilities as measured by the enacted tax rates that will be in effect when these differences reverse. Deferred tax expense is the result of changes in deferred tax assets and liabilities. The principal types of differences between assets and liabilities for financial statement and tax return purposes are the allowance for loan and lease losses, deferred loan fees, deferred compensation and securities available for sale.

On January 1, 2007, the Company adopted FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes (FIN 48)*, to account for any tax positions that may be uncertain. FIN 48 prescribes a recognition threshold of more-likely-than-not, and a measurement attribute for all tax positions taken or expected to be taken on a tax return, in order for those tax positions to be recognized in the financial statements. Additional information regarding the Company's uncertain tax positions is set forth in Note 10 in this Report.

The Company accounts for goodwill and other identifiable intangible assets in accordance with SFAS No. 142, *Goodwill and Intangible Assets*. SFAS No. 142 includes requirements to test goodwill and indefinite lived intangible assets for impairment rather than amortize them. The Company has tested its goodwill as of December 31, 2006 and determined that it is not impaired.

Results of Operations

(Second Quarter 2007 Compared to Second Quarter 2006)

Net Income

Net income for the second quarter of 2007 was \$5.5 million, compared to \$5.1 million for the same period in 2006, an increase of \$469,000 or 9%. Diluted earnings per share were \$0.25 for the second quarter of 2007, a \$0.02 or 9% increase over what was reported for the same period last year. Return on Average Assets was 0.97% and Return on Average Equity was 10.90% for the second quarter 2007.

Net Interest Income

Net interest income on a tax equivalent basis for the second quarter of 2007 was \$18.0 million, representing a \$695,000 or 4% increase from the \$17.3 million earned in the second quarter of 2006. The increase in net interest income primarily resulted from an increase in interest earned on free funds (interest-bearing assets funded by noninterest-bearing liabilities) resulting from an increase in the yield on earning assets. The components of net interest income will be discussed in greater detail below.

The following table reflects the components of the Company's net interest income, setting forth for the periods

Table of Contents

presented, (1) average assets, liabilities and stockholders' equity, (2) interest income earned on interest-earning assets and interest expense paid on interest-bearing liabilities, (3) average yields earned on interest-earning assets and average rates paid on interest-bearing liabilities, (4) the Company's net interest spread (i.e., the average yield on interest-earning assets less the average cost of interest-bearing liabilities) and (5) the Company's net interest margin. Rates are computed on a tax equivalent basis using a tax rate of 35%.

(A) Includes non-accrual loans, the effect of which is to reduce the yield earned on loans, and deferred loan fees.

Edgar Filing: LAKELAND BANCORP INC - Form 10-Q

(B) Includes interest-bearing cash accounts.

(C) Net interest income divided by interest-earning assets.

Interest income on a tax equivalent basis increased from \$29.5 million in the second quarter of 2006 to \$33.4 million in 2007, an increase of \$3.9 million or 13%. The increase in interest income was due to an increase in average interest-earning assets of \$99.3 million or 5% and to a 46 basis point increase in the yield on interest-earning assets. The yield on interest-earning assets increased from 5.94% in the second quarter of 2006 to 6.40% in the second quarter of 2007 as a result of the increasing rate environment and because of a change in mix in interest-earning assets.

Loans as a percent of interest-earning assets increased from 69% in the second quarter of 2006 to 80% in 2007 while investment securities as a percent of interest-earning assets decreased from 30% in the second quarter of 2006 to 19% in the second quarter of 2007.

Total interest expense increased from \$12.2 million in the second quarter of 2006 to \$15.4 million in the second quarter of 2007, an increase of \$3.2 million, or 26%. Average interest-bearing liabilities increased \$84.1 million, and the cost of funds increased 58 basis points to 3.47% due to the increasing rate environment and a change in the mix of interest-bearing liabilities. Liabilities shifted from lower cost core deposits to higher cost time deposits. Average savings accounts as a percent of interest-bearing liabilities decreased from 20% in the second quarter of 2006 to 19% in the second quarter of 2007.

Table of Contents

Time deposits as a percent of total interest-bearing liabilities increased from 25% to 27% during the same time period. Time deposits generally pay a higher rate than core deposits. Also impacting the cost of funds was the issuance of \$20.6 million in trust preferred subordinated debentures at a rate of 6.61% completed in May 2007.

Provision for Loan and Lease Losses

In determining the provision for loan and lease losses, management considers historical loan loss experience, changes in composition and volume of the portfolio, the level and composition of non-performing loans, the adequacy of the allowance for loan and lease losses, and prevailing economic conditions.

The provision for loan losses increased to \$671,000 for the second quarter of 2007 from \$319,000 for the same period last year as a result of management's evaluation of the adequacy of the allowance for loan and lease losses. During the second quarter of 2007, the Company charged off loans of \$764,000 and recovered \$134,000 in previously charged off loans compared to \$1.2 million and \$758,000, respectively, during the same period in 2006. The higher provision reflects a higher level of non-performing loans and net charge-offs in the second quarter of 2007 compared to second quarter 2006. For more information regarding the determination of the provision, see Risk Elements under Financial Condition.

Noninterest Income

Noninterest income increased \$1.5 million from second quarter 2006 to second quarter 2007. In the second quarter of 2007, the Company recognized a gain on equity securities in its investment portfolio resulting from an acquisition of a financial institution in which the Company owned stock. Commissions and fees decreased from \$920,000 in the second quarter of 2006 to \$785,000 in the second quarter of 2007 due to a decrease in fees received on loans and a decrease in investment services brokerage income. Noninterest leasing income decreased from \$282,000 in the second quarter of 2006 to \$157,000 in 2007 primarily as a result of a decline in fees from brokered transactions from second quarter 2006 to second quarter 2007. Other income was \$192,000 in the second quarter of 2006 compared to \$93,000 in the second quarter of 2007 primarily as a result of gains on sales of furniture and equipment.

Noninterest Expense

Noninterest expense increased from \$13.4 million in the second quarter of 2006 to \$14.4 million in the second quarter of 2007, an increase of \$1.0 million or 8%. Salaries and employee benefits increased \$426,000 from \$7.7 million in the second quarter 2006 to \$8.1 million in 2007 as a result of expense related to new branches (two in the second quarter of 2007 and two in the fourth quarter of 2006) and normal salary and benefit increases. Net occupancy expense and equipment expense increased from second quarter 2006 to second quarter 2007 by \$65,000 and \$60,000, respectively, primarily as a result of expenses related to new branches opened. Marketing expense increased from \$423,000 in the second quarter of 2006 to \$564,000 in the second quarter of 2007 as a result of the branch openings. Stationery supplies and postage increased from \$403,000 in the second quarter of 2006 to \$449,000 in the second quarter of 2007 as a result of the increase in postal rates and the branch openings. Other expenses increased from \$2.2 million in the second quarter of 2006 to \$2.5 million in the second quarter of 2007 resulting from increased legal expenses and increased expenses related to our ATM network.

(First Six Months of 2007 Compared to First Six Months of 2006)

Net Income

Net income for the first half of 2007 was \$9.9 million, compared to \$9.7 million for the same period in 2006, an increase of \$147,000 or 2%. Diluted earnings per share were \$0.45 for the first half of 2007, a \$0.01 or 2% increase over what was reported for the same period last year. Return on Average Assets was 0.87% and Return on Average Equity was 9.92% for the first half of 2007.

Table of Contents**Net Interest Income**

Net interest income on a tax equivalent basis for the first six months of 2007 was \$35.5 million, representing a \$1.1 million or 3% increase from the \$34.4 million earned in the first six months of 2006. The increase in net interest income primarily resulted from an increase in interest earned on free funds (interest-bearing assets funded by noninterest-bearing liabilities) resulting from an increase in the yield on earning assets. The components of net interest income will be discussed in greater detail below.

The following table reflects the components of the Company's net interest income, setting forth for the periods presented, (1) average assets, liabilities and stockholders' equity, (2) interest income earned on interest-earning assets and interest expense paid on interest-bearing liabilities, (3) average yields earned on interest-earning assets and average rates paid on interest-bearing liabilities, (4) the Company's net interest spread (i.e., the average yield on interest-earning assets less the average cost of interest-bearing liabilities) and (5) the Company's net interest margin. Rates are computed on a tax equivalent basis using a tax rate of 35%.

Edgar Filing: LAKELAND BANCORP INC - Form 10-Q

Net interest income/spread	35,464	2.96%	34,350	3.06%
Tax equivalent basis adjustment	830		1,081	
NET INTEREST INCOME	\$ 34,634		\$ 33,269	
Net interest margin (C)		3.45%		3.47%

(A) Includes non-accrual loans, the effect of which is to reduce the yield earned on loans, and deferred loan fees.

(B) Includes interest-bearing cash accounts.

(C) Net interest income divided by interest-earning assets.

Interest income on a tax equivalent basis increased from \$58.0 million in the first half of 2006 to \$65.9 million in 2007, an increase of \$7.9 million or 14%. The increase in interest income was due to an increase in average interest-earning assets of \$75.8 million or 4% and to a 56 basis point increase in the yield on interest-earning assets. The yield on interest-earning assets increased from 5.85% in first half of 2006 to 6.41% in first half of 2007 as a result of the increasing rate environment and because of a change in mix in interest-earning assets similar to the change in mix described above in the comparison of the results of operations between second quarter 2007 and second quarter 2006.

Table of Contents

Total interest expense increased from \$23.6 million in the first half of 2006 to \$30.4 million in the first half of 2007, an increase of \$6.8 million, or 29%. Average interest-bearing liabilities increased \$66.3 million, and the cost of funds increased 67 basis points to 3.45% due to the increasing rate environment and a change in the mix of interest-bearing liabilities similar to the change in mix described above in the comparison of the results of operations between second quarter 2007 and second quarter 2006.

Provision for Loan and Lease Losses

In determining the provision for loan and lease losses, management considers historical loan loss experience, changes in composition and volume of the portfolio, the level and composition of non-performing loans, the adequacy of the allowance for loan and lease losses, and prevailing economic conditions.

The provision for loan losses increased to \$1.3 million for the first half of 2007 from \$651,000 for the same period last year as a result of management's evaluation of the adequacy of the allowance for loan and lease losses. During the first half of 2007, the Company charged off loans of \$1.2 million and recovered \$396,000 in previously charged off loans compared to \$1.6 million and \$873,000, respectively, during the same period in 2006. The higher provision reflects a higher level of non-performing loans in the first half of 2007 compared to the first half of 2006. For more information regarding the determination of the provision, see Risk Elements under Financial Condition.

Noninterest Income

Noninterest income increased \$1.3 million or 15% from the first half of 2006 to the first half of 2007. There were \$1.8 million in gains on investment securities in the first half of 2007 compared to \$78,000 of gains in the first half of 2006. Commissions and fees decreased from \$1.8 million in the first half of 2006 to \$1.6 million in the first half of 2007 due to a decrease in fees received on loans. Changes in noninterest leasing income and other income resulted from the same factors discussed in the comparison of the results of other operations between second quarter 2007 and second quarter 2006. Other income included \$315,000 in gains from a sale of a property in 2007 and \$362,000 in gains from the sale of a branch office in 2006.

Noninterest Expense

Noninterest expense increased from \$27.2 million in the first half of 2006 to \$28.8 million in the first half of 2007, an increase of \$1.6 million or 6%. Salaries and employee benefits increased \$950,000 from \$15.3 million in the first half of 2006 to \$16.3 million in 2007 as a result of branch openings, increases in commissions paid in the leasing division and normal salary and benefit increases. Net occupancy expense, equipment expense, marketing expense and other expenses increased from the first half of 2006 to the first half of 2007 as a result of the same factors discussed in the comparison of the results of operations between the second quarter of 2007 compared to the second quarter of 2006.

Financial Condition

The Company's total assets increased \$75.7 million or 3% from \$2.26 billion at December 31, 2006, to \$2.34 billion at June 30, 2007. Total deposits increased from \$1.86 billion on December 31, 2006 to \$1.88 billion on June 30, 2007, an increase of \$16.9 million or 1%. Additionally, customer repurchase agreements increased \$5.8 million or 14% from December 31, 2006 to June 30, 2007.

Loans

Gross loans increased from \$1.59 billion on December 31, 2006 to \$1.72 billion on June 30, 2007, an increase of \$123.4 million, or 8%. For more information on the loan portfolio, see Note 7 in Notes to the Consolidated Financial Statements in this Quarterly Report on Form 10-Q.

Table of Contents**Risk Elements**

The following schedule sets forth certain information regarding the Company's non-accrual, past due and renegotiated loans and other real estate owned on the dates presented:

(in thousands)	June 30, 2007	December 31, 2006	June 30, 2006
Non-performing loans:			
Non-accrual loans	\$ 8,054	\$ 4,437	\$ 4,007
Renegotiated loans			
TOTAL NON-PERFORMING LOANS	8,054	4,437	4,007
Other real estate owned			
TOTAL NON-PERFORMING ASSETS	\$ 8,054	\$ 4,437	\$ 4,007
Loans past due 90 days or more and still accruing	\$ 6	\$ 876	\$ 174

Non-accrual loans increased from \$4.4 million on December 31, 2006, or 0.20% of total assets, to \$8.1 million, or 0.34% of total assets, on June 30, 2007. The majority of the increase in non-performing loans relates to the addition of two customer relationships to non-accrual loans during that time period. Loans past due ninety days or more and still accruing at June 30, 2007 decreased \$870,000 to \$6,000 from \$876,000 on December 31, 2006. Loans past due 90 days or more and still accruing are those loans that are both well-secured and in process of collection.

On June 30, 2007, the Company had \$7.4 million in impaired loans (consisting primarily of non-accrual loans) compared to \$4.1 million at year-end 2006. For more information on these loans see Note 7 in Notes to the Consolidated Financial Statements of this Quarterly Report on Form 10-Q. The impairment of the loans is measured using the present value of future cash flows on certain impaired loans and is based on the fair value of the underlying collateral for the remaining loans. Based on such evaluation, \$2.3 million has been allocated to the allowance for loan and lease losses for impairment at June 30, 2007. At June 30, 2007, the Company also had \$7.8 million in loans that were rated substandard that were not classified as non-performing or impaired.

There were no loans at June 30, 2007, other than those designated non-performing, impaired or substandard, where the Company was aware of any credit conditions of any borrowers or obligors that would indicate a strong possibility of the borrowers not complying with present terms and conditions of repayment and which may result in such loans being included as non-accrual, past due or renegotiated at a future date.

Table of Contents

The following table sets forth for the periods presented, the historical relationships among the allowance for loan and lease losses, the provision for loan losses, the amount of loans charged-off and the amount of loan recoveries:

(dollars in thousands)	Year		
	Six months ended June 30, 2007	ended December 31, 2006	Six months ended June 30, 2006
Balance of the allowance at the beginning of the year	\$ 13,454	\$ 13,173	\$ 13,173
Loans charged off:			
Commercial	100	1,207	928
Leases	364	90	
Home Equity and consumer Real estate mortgage	690	1,493	702
Total loans charged off	1,154	2,790	1,630
Recoveries:			
Commercial	195	728	560
Leases	1	83	85
Home Equity and consumer Real estate mortgage	200	531	228
		3	
Total Recoveries	396	1,345	873
Net charge-offs:			
Provision for loan and lease losses	758	1,445	757
	1,273	1,726	651
Ending balance	\$ 13,969	\$ 13,454	\$ 13,067
Ratio of annualized net charge-offs to average loans outstanding	0.09%	0.10%	0.11%
Ratio of allowance at end of period as a percentage of period end total loans	0.82%	0.85%	0.92%

The ratio of the allowance for loan and lease losses to loans outstanding reflects management's evaluation of the underlying credit risk inherent in the loan portfolio. The determination of the adequacy of the allowance for loan and lease losses and periodic provisioning for estimated losses included in the consolidated financial statements is the responsibility of management and the Board of Directors. The evaluation process is undertaken on a quarterly basis.

Methodology employed for assessing the adequacy of the allowance for loan and lease losses consists of the following criteria:

The establishment of reserve amounts for all specifically identified classified loans that have been designated as requiring attention by the Company or its external loan review consultant.

The establishment of reserves for pools of homogeneous types of loans not subject to specific review, including 1-4 family residential mortgages and consumer loans.

Edgar Filing: LAKELAND BANCORP INC - Form 10-Q

The establishment of reserve amounts for the non-classified loans in each portfolio based upon the historical average loss experience of these portfolios and management's evaluation of key factors. Consideration is given to the results of ongoing credit quality monitoring processes, the adequacy and expertise of the Company's lending staff, underwriting policies, loss histories, delinquency trends, and the cyclical nature of economic and business conditions. Since many of the Company's loans depend on the sufficiency of collateral as a secondary means of repayment, any adverse trend in the real estate markets could affect underlying values available to protect the Company against loss.

Based upon the process employed and giving recognition to all accompanying factors related to the loan portfolio, management considers the allowance for loan and lease losses to be adequate at June 30, 2007. The preceding statement constitutes a forward-looking statement under the Private Securities Litigation Reform Act of 1995.

Table of Contents

Investment Securities

For detailed information on the composition and maturity distribution of the Company's investment security portfolio, see Note 6 in the Notes to Consolidated Financial Statements contained in this Form 10-Q. Total investment securities decreased from \$423.3 million on December 31, 2006 to \$407.6 million on June 30, 2007, a decrease of \$15.8 million, or 4% which included maturities of securities used to fund loan growth.

Deposits

Total deposits increased from \$1.86 billion on December 31, 2006 to \$1.88 billion on June 30, 2007, an increase of \$16.9 million, or 1%. The change in deposits was primarily due to an increase in time deposits under \$100,000 which increased from \$293.3 million on December 31, 2006 to \$312.1 million on June 30, 2007, an increase of \$18.8 million or 6% as a result of a deposit promotion conducted in the second quarter of 2007. The increase in time deposits under \$100,000 was partially offset by a decline in time deposits over \$100,000 due to a decline in brokered deposits.

Liquidity

Cash and cash equivalents, totaling \$48.7 million on June 30, 2007, decreased \$31.3 million from December 31, 2006. Operating activities, principally the result of the Company's net income, provided \$13.2 million in net cash. Investing activities used \$111.0 million in net cash, primarily reflecting the use of funds for loan originations. Financing activities provided \$66.5 million in net cash, reflecting an increase in deposits of \$16.9 million and increases of federal funds purchased and long-term debt supplemented by the issuance of \$20.0 million in trust preferred securities. The Company anticipates that it will have sufficient funds available to meet its current loan commitments and deposit maturities. This constitutes a forward-looking statement under the Private Securities Litigation Reform Act of 1995. At June 30, 2007, the Company had outstanding loan origination commitments of \$390.4 million. These commitments include \$316.6 million that mature within one year; \$25.2 million that mature after one but within three years; \$864,000 that mature after three but within five years and \$47.7 million that mature after five years. The Company also had \$8.6 million in letters of credit outstanding at June 30, 2007. This included \$6.2 million that are maturing within one year and \$2.4 million that mature after one but within three years. Time deposits issued in amounts of \$100,000 or more maturing within one year total \$188.3 million.

Capital Resources

Stockholders' equity increased from \$199.5 million on December 31, 2006 to \$204.1 million on June 30, 2007. Book value per common share increased to \$9.23 on June 30, 2007 from \$9.04 on December 31, 2006. The increase in stockholders' equity from December 31, 2006 to June 30, 2007 was primarily due to net income. Also contributing to the increase in stockholders' equity was a cumulative adjustment for adoption of FIN 48, Accounting for Uncertainty in Income Taxes, of \$509,000. For more information, please see Note 10 in Notes to the Consolidated Financial Statements in this Quarterly Report on Form 10-Q. Offsetting these increases in equity was an increase in accumulated other comprehensive loss from \$(3.1) million on December 31, 2006 to \$(5.2) million on June 30, 2007 resulting from a decline in the market value of the company's available for sale investment security portfolio and from realizing gains in equity securities during second quarter 2007.

The Company and Lakeland are subject to various regulatory capital requirements that are monitored by federal banking agencies. Failure to meet minimum capital requirements can lead to certain supervisory actions by regulators; any supervisory action could have a direct material effect on the Company or Lakeland's financial statements. Management believes, as of June 30, 2007, that the Company and Lakeland meet all capital adequacy requirements to which they are subject.

Table of Contents

The capital ratios for the Company and Lakeland at June 30, 2007, and the minimum regulatory guidelines for such capital ratios for qualification as a well-capitalized institution are as follows:

	Tier 1 Capital to Total Average Assets Ratio June 30,	Tier 1 Capital to Risk-Weighted Assets Ratio June 30,	Total Capital to Risk-Weighted Assets Ratio June 30,
Capital Ratios:	2007	2007	2007
The Company	8.48%	10.69%	11.79%
Lakeland Bank	7.99%	10.08%	10.89%
Well capitalized institution under FDIC Regulations	5.00%	6.00%	10.00%

ITEM 3. Quantitative and Qualitative Disclosures about Market Risk

The Company manages interest rate risk and market risk by identifying and quantifying interest rate risk exposures using simulation analysis, economic value at risk models and gap analysis. At June 30, 2007, the cumulative one-year gap was \$(299.0) million or (12.8%) of total assets.

The Company uses net interest income simulation because the Company's Asset/Liability Management Committee believes that the interest rate sensitivity modeling more accurately reflects the effects and exposure to changes in interest rates. Net interest income simulation considers the relative sensitivities of the balance sheet including the effects of interest rate caps on adjustable rate mortgages and the relatively stable aspects of core deposits. As such, net interest simulation is designed to address the probability of interest rate changes and the behavioral response of the balance sheet to those changes. Market Value of Portfolio Equity represents the fair value of the net present value of assets, liabilities and off-balance-sheet items. The Company's Market Value of Portfolio Equity at June 30, 2007 was \$311.4 million.

Based on its simulation models, the Company estimates that for a 200 basis point rate shock increase, the Company's Market Value of Portfolio Equity would decline (12.9%) and would increase 6.3% for a 200 basis point rate shock decrease. The simulation model also shows that for a 200 basis point rate increase, the Company's projected net interest income for the next 12 months would decrease (3.8%), and would increase 3.8% for a 200 basis point rate decrease. The information provided for net interest income over the next 12 months assumes that changes in interest rates of plus 200 basis points and minus 200 basis points change gradually in equal increments over the following 12 month period. The above information is based on significant estimates and assumptions and constitutes a forward-looking statement under the Private Securities Litigation Reform Act of 1995. For more information regarding the Company's market risk and assumptions used in the Company's simulation models, please refer to the Company's Annual Report on Form 10-K for the year ended December 31, 2006.

ITEM 4. Controls and Procedures

(a) Disclosure controls and procedures. As of the end of the Company's most recently completed fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) covered by this report, the Company carried out an evaluation, with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the Company's disclosure controls and procedures pursuant to Securities Exchange Act Rule 13a-15. Based upon that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective in ensuring that information required to be disclosed by the Company in the reports that it files or submits under the Securities Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms.

Table of Contents

(b) Changes in internal controls over financial reporting. There have been no changes in the Company's internal control over financial reporting that occurred during the Company's last fiscal quarter to which this report relates that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.
