Consolidated Financial Results

April 1, 2009 June 30, 2009

August 5, 2009

In preparing its consolidated financial information, ORIX Corporation and its subsidiaries have complied with accounting principles generally accepted in the United States of America, except as modified to account for stock splits in accordance with the usual practice in Japan.

U.S. Dollar amounts have been calculated at Yen 96.01 to \$1.00, the approximate exchange rate prevailing at June 30, 2009.

These documents may contain forward-looking statements about expected future events and financial results that involve risks and uncertainties. Such statements are based on our current expectations and are subject to uncertainties and risks that could cause actual results to differ materially from those described in the forward-looking statements. Factors that could cause such a difference include, but are not limited to, those described under Risk Factors in the Company's annual report on Form 20-F filed with the United States Securities and Exchange Commission.

The Company believes that it will be considered a passive foreign investment company for United States Federal income tax purpose in the year to which these consolidated financial results relate and for the foreseeable future by reason of the composition of its assets and the nature of its income. A U.S. holder of the shares or ADSs of the Company is therefore subject to special rules generally intended to eliminate any benefits from the deferral of U.S. Federal income tax that a holder could derive from investing in a foreign corporation that does not distribute all of its earnings on a current basis. Investors should consult their tax advisors with respect to such rules, which are summarized in the Company's annual report.

* Income before income taxes refers to income before income taxes and discontinued operations.

Note 1:

Accounting standards, net income attributable to ORIX is equivalent to net income, which had been used until the fiscal year ended March 31, 2009.

Economic Environment

As a result of the unprecedented and extensive fiscal stimulus expenditures by major economic countries in reaction to the financial crisis, the global economy has started to show signs of recovery. The International Monetary Fund (IMF) has also revised their global economic forecast upward, and has proclaimed that the worst is behind.

In the U.S., the stress tests for major financial institutions have been concluded and confidence in the financial system has been gradually recovering; however sequential bankruptcies of major automobile manufacturers make it difficult to foresee when unemployment will peak. In addition, real estate prices have continued to fall and there are concerns that the remaining risks will be exposed now that initial stimulus measures have taken effect and no new economic countermeasures have been introduced.

In Japan, domestic economic conditions have shown signs of bottoming out since April as a result of inventory adjustments, governmental economic stimulus packages and increased exports to China. The Bank of Japan's short-term economic survey of enterprises (the Tankan) has also shown slight improvement in business confidence. However, real economic recovery is projected to take some time due to declining real estate prices and a continued rise in office-building vacancy rates.

Overview of Business Performance (April 1, 2009 to June 30, 2009)

Revenues decreased 12% to ¥238,960 million compared to ¥271,961 million for the same period of the previous fiscal year. Despite the overall decrease in revenue, signs of recovery were seen in certain aspects of the domestic and international financial markets, and revenues from brokerage commissions and net gains (losses) on investment securities increased compared to the same period of the previous fiscal year. However, investment in direct financing leases and installment loans decreased due to a decline in the balance as the result of stringent selection of new transactions and a decrease in real estate-related finance. In addition, gains on sales of office buildings have declined due to fewer sales of real estate under operating leases as a result of the stagnant real estate market.

Cost reduction programs have been implemented in response to the challenging economic conditions and, as a result, selling, general and administrative expenses decreased compared to the same period of the previous fiscal year, however provisions for doubtful receivables and probable loan losses and write-downs on securities increased. In addition, equity in net income (loss) of affiliates decreased due to a decline in the number of residential condominiums sold that had been developed through certain joint ventures and losses recognized in line with an affiliate filing for protection under the Corporate Rehabilitation Law. As a result of the foregoing changes, income before income taxes and discontinued operations decreased 75% to ¥12,837 million compared to ¥50,773 million during the same period of the previous fiscal year, and

Edgar Filing: ORIX CORP - Form 6-K

net income attributable to ORIX decreased 76% to ¥7,631 million from ¥32,359 million compared to the same period of the previous fiscal year, however profits were recorded in two consecutive quarters.

-2-

Table of Contents

Segment Information

Segment profits (Note 2) for the first fiscal period increased for the Overseas Business, while Corporate Financial Services, Maintenance Leasing, Real Estate, Investment Banking and Retail profits decreased compared to the same period of the previous fiscal year.

The business performance is on the path to recovery as seen in such factors that the number of segments securing profits increased to five compared to three in the fourth quarter of the previous fiscal year. The Corporate Financial Services and Retail segments, which had previously recorded losses, returned to profitability, and losses recorded in the Investment Banking segment significantly decreased despite losses realized due to JOINT CORPORATION's filing for protection under the Corporate Rehabilitation Law.

Note 2:

The Company evaluates performance based on quarterly income before income taxes and discontinued operations as well as results of discontinued operations and net income attributable to the noncontrolling interests before applicable tax effect. Tax expenses are not included in segment profits.

Segment information for the first three-month period of fiscal 2010 is as follows.

Corporate Financial Services Segment

Under the severe operating environment, revenues and profits were down due to a decrease in the balance of direct financing lease assets and installment loans resulting from the stringent selection of new transactions and enhanced collections. Selling, general and administrative expenses decreased 8% compared to the same period of the previous fiscal year. Despite the increase in provisions for doubtful receivables and probable loan losses compared to the same period of the previous year, they have decreased since the previous fourth quarter, as new occurrence of loans individually evaluated for impairment decreased, mainly due to restrictions placed on new installment loans to real estate-related companies, increased collateral requirements, and the effects of corporate financial assistance through government programs.

Under these circumstances, segment revenues were down 15% to ¥30,441 million compared to ¥35,799 million in the same period of the previous year, while segment profits decreased 67% to ¥1,894 million compared to ¥5,746 million in the same period of the previous year. Segment assets were down 7% to ¥1,477,187 million compared to March 31, 2009.

Maintenance Leasing Segment

The maintenance leasing market continues to face a severe operating environment as enterprises are spending less on capital expenditure. However, our maintenance leasing segment has maintained relatively stable revenues by capitalizing on ORIX's position as the industry-leader in terms of market share and providing high value-added services.

Segment revenues were down 4% to ¥56,237 million compared to ¥58,863 million in the same period of the previous fiscal year due to decreased demand in measuring and other equipment rental operations and a decrease in gains on sales of used cars resulting from the sluggish secondary market. Segment profits declined 31% to ¥5,192 million compared to ¥7,506 million in the same period of the previous fiscal year largely due to an increase in depreciation expenses as a result of increased operating lease assets, despite a decrease in selling, general and administrative expenses as a result of cost reduction programs. However, profits increased since the fourth quarter of the previous fiscal year mainly due to the decrease in provisions for doubtful receivables and probable loan losses.

Segment assets were down 4% to ¥622,059 million compared to March 31, 2009 due to a decrease in new transactions resulting from weakening demand.

Table of Contents

Real Estate Segment

Although the market for some larger properties as well as small properties has started to see an increase in sales activity, the current real estate market still remains sluggish and has not recovered. As a result of the sluggish market environment, gains on sales of real estate under operating leases have declined significantly compared to the same period of the previous fiscal year.

The condominium development business has seen a sharp fall in profits due to a decline in profitability and a decrease in the number of condominiums delivered to 375 units in the first fiscal period from 739 units in the same period of the previous fiscal year, although write-downs on projects under development, which were recognized in the same period of the previous fiscal year, were not recorded during this fiscal period. Specifically, equity in net income (loss) of affiliates declined compared to the same period of the previous fiscal year due to a decrease in the number of delivered condominiums developed through certain joint ventures. Revenues from integrated facilities management services decreased due to the sale of ORIX Facilities in March 2009.

As a result, segment revenues were down 30% to ¥42,645 million compared to the same period of the previous fiscal year, while profits declined 99% to ¥261 million compared to the same period of the previous fiscal year.

Although inventories related to the condominium development business decreased, segment assets were ¥1,162,681 million, the same level as the fiscal year ended March 31, 2009, due to an increase in real estate under operating leases, which are expected to generate stable cash flows.

Investment Banking Segment

Revenues and profits were down in line with the decreased asset balance, due to a decrease in new transactions as a result of stricter selection criteria for new transactions and a focus on collections in the real estate-related finance business. Provisions for doubtful receivables and probable loan losses were increased compared to the same period of the previous fiscal year, though it has decreased since the previous fourth quarter. Furthermore, real estate collateral has been acquired in some cases in order to maximize collections and to increase real estate value by capitalizing on ORIX's real estate value chain. Upon acquiring a property, a portion of the installment loan and investment in securities (the specified bonds issued by the SPEs) was reclassified under investment in operating leases.

Revenues have also declined in the loan servicing (asset recovery) business due to a decrease in collections from the sales of collateral resulting from the continued decline in liquidity in real estate market.

The principal investment business recorded a loss due to JOINT CORPORATION's filing for protection under the Corporate Rehabilitation Law. In addition, equity in net income from The Fuji Fire and Marine Insurance Co., Ltd and DAIKYO INCORPORATED decreased compared to the same period of the previous fiscal year, although conditions have improved since the third quarter of the previous fiscal year when losses were originally recorded.

Under these circumstances, segment revenues declined 10% to ¥21,011 million compared to the same period of the previous fiscal year, and the segment recorded a loss of ¥10,161 million compared to a profit of ¥7,257 million in the same period of the previous fiscal year, however losses have significantly decreased compared to the third and fourth quarters of the previous fiscal year. Segment assets decreased 3% to ¥1,286,514 million compared to March 31, 2009.

Table of Contents

Retail Segment

This segment consists of the trust and banking business, the card loan business, the life insurance operations, and the securities brokerage.

Revenues rose in the trust and banking business due to an increase in installment loans, while profits remained flat compared to the same period of the previous fiscal year due to increases in selling, general and administrative expenses from expanded operations. Profits decreased in the card loan business compared to the same period of the previous fiscal year due to increased provisions for doubtful receivables and probable loan losses although selling, general and administrative expenses decreased through cost-reduction programs. Operating income from the life insurance business decreased compared to the same period of the previous fiscal year, however it increased compared to the fourth quarter of the previous fiscal year. Brokerage commissions from the securities brokerage business were flat compared to the same period of the previous fiscal year. Under these circumstances, segment revenues were down 13% to ¥43,225 million, and segment profits dropped 29% to ¥5,181 million compared to the same period of the previous fiscal year, however profits greatly recovered and the segment turned to be profitable compared to the fourth quarter of the previous fiscal year when the segment loss had been recorded.

Targeting future growth, the trust and banking business has diversified its business by expanding into corporate finance on top of mortgage loans to individuals, and has increased its deposit base. As a result, segment assets increased 3% to ¥1,596,300 million compared to March 31, 2009.

Overseas Business Segment

In Asia and Oceania, revenues from operating leases and direct financing leases dropped due to a decline in outstanding balance resulting from the cautious stance toward new transactions and the foreign exchange effects of an appreciated yen. Gains on sales of subsidiaries and affiliates increased compared to the same period of the previous fiscal year resulting from the IPO of a company which ORIX had an equity stake.

In the U.S., interest on installment loans and interest expenses decreased due to a lower market interest rate and an appreciated yen. Realized gains on trading securities were up as a result of recovery of the bond and equity markets in the U.S. during this fiscal period. Profits increased significantly compared to both the same period and the fourth quarter of the previous fiscal year, and profits have been recognized for two consecutive quarters.

As a result of these operating circumstances, segment revenues declined 9% to ¥42,273 million compared to ¥46,360 million in the same period of the previous fiscal year, while segment profits increased 96% to ¥11,257 million compared to ¥5,750 million in the same period of the previous fiscal year. Segment assets decreased 5% to ¥906,597 million compared to March 31, 2009.

Table of Contents**2. Qualitative Information Regarding Consolidated Financial Condition**
Financial Condition

		Fiscal year ended March 31, 2009	Fiscal period ended June 30, 2009	Change	Year on Year Change
Total Assets	(millions of yen)	8,369,736	8,139,440	(230,296)	(3)%
(Segment Assets)		7,232,671	7,051,338	(181,333)	(3)%
Total Liabilities	(millions of yen)	7,158,743	6,920,704	(238,039)	(3)%
(Long- and Short-term Debt)		5,252,012	5,052,458	(199,554)	(4)%
(Deposits)		667,627	708,680	41,053	6%
Shareholders' Equity	(millions of yen)	1,167,530	1,175,444	7,914	1%
Shareholders' Equity Per Share	(yen)	13,059.59	13,147.74	88.15	1%

Total Assets decreased 3% to ¥8,139,440 million from ¥8,369,736 million on March 31, 2009. Investment in operating leases increased due to the acquisition of real estate under operating leases, however investment in direct financing leases and installment loans decreased due to the stringent selection of new transactions and a focus on collections upon maturity. In addition, there were decreases in investment in securities, investment in affiliates and inventories. Segment assets were down 3% to ¥7,051,338 million compared to March 31, 2009.

Long- and short-term debt levels have decreased compared to fiscal year ended March 31, 2009 as a result of continued reductions in interest-bearing liabilities. However, deposits have increased compared to the fiscal year ended March 31, 2009 in line with business expansion into corporate lending in the trust and banking.

Shareholders' equity remained flat year on year compared to March 31, 2009 at ¥1,175,444 million due to an increase in accumulated other comprehensive income (loss) resulting from an increase in net unrealized gains (losses) on investment in securities in addition to an increase in net income attributable to ORIX, which offset the decrease resulting from dividend payments.

Summary of Cash Flows

Cash and cash equivalents decreased by ¥57,508 million to ¥402,461 million compared to March 31, 2009.

Cash flows from operating activities provided ¥6,450 million during the first fiscal period, having used ¥26,740 million in the same period of fiscal 2009, resulting from a decrease in volume of new investments in real estate for sale such as residential condominiums, and the adjustment of net income such as depreciation and amortization and provision for doubtful receivables and probable loan losses, despite a decrease in net income compared to the previous fiscal year.

Cash flows from investing activities provided ¥111,792 million during the first fiscal period, having used ¥85,605 million during the same period of the previous fiscal year due to decreases in purchases of lease equipment, installment loans made to customers, purchases of available-for-sale securities and purchases of other securities reflecting the policy of stringent selection of new transactions.

Cash flows from financing activities used ¥177,502 million during the first fiscal period, having provided ¥29,024 million during the same period of the previous fiscal year due to reduction of interest-bearing debt.

Table of Contents**3. Qualitative Information Regarding Forecasts for Consolidated Financial Results**

ORIX is aiming for moderate recovery and forecasts operating revenue of ¥960,000 million (down 10.7% year on year) and net income attributable to ORIX* of ¥30,000 million (up 36.8% year on year) for the consolidated fiscal year ending March 31, 2010. This forecast does not differ from the outlook and forecasts for the fiscal year ending March 31, 2010 appearing in the Consolidated Financial Results for the fiscal year ended March 31, 2009.

* Net income attributable to ORIX is equivalent to net income, which had been used until the fiscal year ended March 31, 2009.

Segment profit forecasts are as follows.

Segment	Segment Profit	Overview
Corporate Financial Services	(¥10.0 Billion)	Decrease in segment assets in line with stringent credit controls and declines in revenues even though the segment shifts toward fee-businesses. Although provisions are expected to decrease, provision levels will remain high. Segment losses will be flat year on year.
Maintenance Leasing	¥25.0 Billion	Decreased revenues due to deterioration in the economy. Segment profits will decrease through efforts to improve profitability via controlling maintenance expenses related to automobile leases and cost reduction programs.
Real Estate	¥20.0 Billion	Despite a decline in the number of condominiums delivered, profits from condominium operations will improve due to a lull in write-downs. Gains on sales of real estate under operating leases will decline due to deterioration in the sector; however, segment profits will maintain profitability.
Investment Banking	(¥15.0 Billion)	Decline in revenues resulting from decline in asset levels as a result of curbing new transactions. Sufficient provisions set aside for non-recourse loans and projecting further market valuation losses on investments in private equity funds. Reduction in losses due to an absence of impairment and losses from equity method affiliates.
Retail	¥20.0 Billion	Increased revenues and costs resulting from increased asset levels in the trust and banking business. Expected improvement in operating revenues in the life insurance business. From the second quarter, the card loan business will be recognized under equity in net income (loss) of affiliates, however impact to profit will be minimal. Segment profits are forecast to improve significantly.
Overseas Business	¥15.0 Billion	Asset levels are expected to decrease due to curbing of new transactions, and revenues are forecast to decline. Provisions are expected to increase in the U.S., however an increase in profits is forecast due to a lull in valuation losses on investment in securities and cost reduction. Despite steady performance of the leasing business in Asia, equity in net income of affiliates is forecast to decrease. Segment profits will decrease.

The above-mentioned segment profits include income before income taxes and discontinued operations as well as results of discontinued operations and net income attributable to the noncontrolling interests before applicable tax effect. Segment profits do not include income tax expenses.

Although forward-looking statements in this document such as forecasts are attributable to current information available to the Company as well as on assumptions deemed rational, actual financial results may differ materially due to various factors. Therefore, readers are urged not to place undue reliance on these figures.

The ORIX Group has been diversifying its business expansion into areas centering on its financial service operations, including real estate-related and investment-related operations. Due to the characteristics of these operations, which are affected by changes in economic conditions in Japan and overseas, our operating environment, as well as market trends, it has become difficult to estimate figures, such as earnings forecasts. For this reason, we do not give interim forecast guidance.

Various factors causing these figures to differ materially are discussed, but not limited to, those described under Risk Factors in the Form 20-F submitted to the U.S. Securities and Exchange Commission.

Table of Contents**4. Significant Accounting Policies**
Recently Adopted Accounting Standards

In fiscal year 2010, the Company and its subsidiaries adopted FASB Statement No. 141 (revised 2007) (*Business Combinations*). This Statement requires the acquiring entity in a business combination to recognize the full fair value of assets acquired, liabilities assumed and noncontrolling interest in the transaction at the acquisition date (whether a full or partial acquisition); requires expensing of acquisition-related transaction and restructuring costs; and all that.

The Company and its subsidiaries also adopted FASB Statement No. 160 (*Noncontrolling Interests in Consolidated Financial Statements* an amendment of ARB No. 51). This Statement requires noncontrolling interests in subsidiaries to be classified as a separate component of equity. Under this Statement, increases and decreases in the parent's ownership interest that leave control intact are accounted for as equity transactions. On the other hand, in a transaction that results in the loss of control, the gain or loss recognized in income includes the realized gain or loss related to the portion of ownership interest sold and the gain or loss on the remeasurement to fair value of the interest retained. Pursuant to this Statement, noncontrolling interests, which were previously classified between liabilities and equity are included in equity, except for those noncontrolling interests which are redeemable, and presentation of condensed consolidated statements of income is reclassified. In the same way, the financial statements that had been previously reported are reclassified.

5. Subsequent Event

The company has issued new shares in a primary offering that was resolved in accordance with the approval by the Board of Directors on June 23, 2009 and by the Representative Executive Officer on July 2 and 13, 2009. The details are as follows.

- | | | |
|--|---|--|
| (1) Class and Number of Shares to be Offered | 18,000,000 shares of common stock of ORIX, which is the sum of (i) and (ii) below. | |
| | (i) | Japanese Public Offering: 4,186,860 shares |
| | (ii) | International Offering: 12,102,740 shares; and a maximum of 1,710,400 shares which shall be the subject of purchase options to be granted to the International Underwriters for the purchase of additionally issued shares. |
| (2) Method of Offering | (i) | With respect to the offering in (1).(i) above, the Initial Japanese Underwriters shall underwrite and purchase all of the new shares at the amounts to be paid, and the Japanese Underwriters shall handle the public offering at the issue price. |
| | (ii) | With respect to the offering in (1).(ii) above, the International Underwriters shall underwrite and purchase all new shares at the amounts to be paid and offer the shares at the issue price. |
| (3) Issue Price | ¥4,830 per share | |
| (4) Total Amount of Issue Price | ¥86,940,000,000 | |
| (5) Amount to be Paid | ¥4,630.80 per share | |
| | The Underwriters will receive the difference between the issue price and amount to be paid. | |
| (6) Total Amount to be Paid | ¥83,354,400,000 | |
| (7) Amount of Stated Capital and Capital | Amount of Stated Capital to be Increased: | ¥41,677,200,000 |
| | Capital Reserve to be Increased: | ¥41,677,200,000 |

Edgar Filing: ORIX CORP - Form 6-K

Reserve to be

Increased

(8) Payment Date July 21, 2009

(9) Use of Proceeds ¥30,000,000,000 will be appropriated to repay interest-bearing debt, with the remainder to be appropriated for investment by the ORIX Group.
