Carbonite, Inc.

Notes to Condensed Consolidated Financial Statements

1. Nature of Business

Carbonite, Inc. (the Company) was incorporated in the State of Delaware on February 10, 2005, and focuses on the development and marketing of computer backup services that enable users to backup, access, and restore data files online.

The Company views its operations and manages its business in one operating segment.

2. Summary of Significant Accounting Policies

Basis of Presentation

The accompanying consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries.

In addition, through its wholly-owned subsidiary Carbonite (China) Co., Ltd. (Carbonite China), the Company effectively controls a variable interest entity (VIE), PanSheng AnXin Network Information Technology Co., Ltd., which is incorporated under the laws of the People's Republic of China. The People's Republic of China restricts foreign ownership of internet-related service companies. To comply with these foreign ownership restrictions, the Company operates its business in China through this VIE. The Company has entered into certain exclusive agreements with the VIE and its shareholders through Carbonite China, which provide the Company with the ability to direct the VIE's most significant economic activities and to receive a majority of the VIE's economic benefits.

Based on these contractual arrangements, the Company consolidates the VIE as required by Financial Accounting Standards Codification (ASC) 810-10, *Consolidation*, because the Company is the primary beneficiary of the VIE through Carbonite China. Despite the lack of majority ownership, there exists a parent-subsiary relationship between the Company and the VIE through the aforementioned agreements, whereby the equity holders of the VIE effectively assigned all of their voting rights underlying their equity interest in the VIE to Carbonite China. In addition, the Company has the ability and intention to continue to exercise its rights to obtain substantially all of the profits and to absorb all of the expected losses of the VIE.

All intercompany accounts and transactions between the Company, its subsidiaries, and the VIE have been eliminated in consolidation. These consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States (GAAP).

The accompanying unaudited interim condensed consolidated financial statements have been prepared pursuant to the rules and regulations of the United States Securities and Exchange Commission (SEC), the instructions to Form 10-Q, and the provisions of Regulation S-X pertaining to interim financial statements. Accordingly, certain information and footnote disclosures normally included in the financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to such rules and regulations. These condensed consolidated financial statements should be read in conjunction with the Company's audited consolidated financial statements and the notes thereto, included in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2011, as filed with the SEC on March 7, 2012.

In the opinion of management, the condensed consolidated financial statements reflect all adjustments, consisting of normal recurring adjustments, necessary for a fair presentation of the Company's financial position for the periods presented. The results for the periods presented are not necessarily indicative of future results.

The Company considers events or transactions that occur after the balance sheet date, but prior to the issuance of the financial statements, to provide additional evidence for certain estimates or to identify matters that require additional disclosure. Subsequent events occurring after September 30, 2012 have been evaluated as required. See Note 12 for disclosure of subsequent events.

Use of Estimates

The preparation of consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Although the Company regularly assesses these estimates, actual results could differ materially from these estimates. Changes in estimates are recorded in the period in which they become known. The Company

Edgar Filing: Carbonite Inc - Form 10-Q

bases its estimates on historical experience and various other assumptions that it believes to be reasonable under the circumstances. Actual results may differ from management's estimates if past experience or other assumptions do not turn out to be substantially accurate, even if such assumptions are reasonable when made.

Table of Contents

Translation of Foreign Currencies

The functional currency of the Company's foreign subsidiary and VIE are their local currency. The financial statements of the Company's foreign subsidiary and VIE in China are translated into U.S. dollars. The Company translates assets and liabilities at the exchange rates in effect at period-end and revenues and expenses at the average exchange rates in effect during the period. Gains and losses from foreign currency translation are recorded as a component of other comprehensive income (loss).

Concentration of Credit Risk

Financial instruments that potentially subject the Company to credit risk primarily consist of cash and cash equivalents, marketable securities, and accounts receivable. The Company maintains its cash and cash equivalents and marketable securities with high-quality financial institutions and, consequently, the Company believes that such funds are subject to minimal credit risk. Cash equivalents and marketable securities consist of investment grade debt securities or money market funds investing in such securities.

The Company sells its services primarily to consumer and small business customers. Payment for the majority of the Company's sales occurs via credit card. The Company regularly reviews its accounts receivable related to customers billed on traditional credit terms and provides an allowance for expected credit losses. Due to these factors, no additional credit risk beyond amounts provided for collection losses is believed by management to be probable in the Company's accounts receivable. At September 30, 2012, one customer represented greater than 10% of accounts receivable balance and no customer represented 10% or more of revenue for all periods presented.

Comprehensive Income (Loss)

Comprehensive income (loss) consists of net income (loss) as well as other changes in stockholders' equity that result from transactions and other economic events from non-owner sources. The Company's only elements of other comprehensive income consist of foreign currency translation adjustments and unrealized gains or losses on available-for-sale investments for all periods.

Revenue Recognition

The Company derives revenue from online backup subscription services. These services are standalone independent service solutions, which are generally contracted for a one- to three-year term. Subscription arrangements include access to use the Company's services via the internet. The Company recognizes revenue in accordance with ASC 605-10, *Overall Revenue Recognition*. Subscription revenue is recognized ratably on a daily basis upon activation over the subscription period, when persuasive evidence of an arrangement with a customer exists, the subscription period has been activated, the price is fixed or determinable, and collection is reasonably assured. Deferred revenues represent payments received from customers for subscription services prior to recognizing the revenue related to those payments.

Lease Exit Charge

In March 2012, the Company closed its Boston, Massachusetts data center and transitioned the computer equipment and operations to its other Massachusetts data centers. This facility closure was accounted for in accordance with ASC 420, *Accounting for Costs Associated with Exit or Disposal Activities*, pursuant to which the Company recorded a charge of \$1.2 million, of which \$0.2 million was paid to relocate the Company's computer equipment and \$1.0 million was accrued related to the fair value of the remaining lease payments as of the date of the closure. The fair value of the remaining lease payments was determined based upon the discounted present value of remaining data center lease payments through the August 2013 lease expiration. At September 30, 2012, \$1.0 million related to the fair value of the remaining lease payments are included within accrued expenses. See Note 8 for related disclosure.

Goodwill and Acquired Intangible Assets

The Company records goodwill when consideration paid in a business acquisition exceeds the fair value of the net tangible assets and the identified intangible assets acquired. Goodwill is not amortized, but rather is tested for impairment annually or more frequently, if facts and circumstances warrant a review. The Company performs its annual assessment for impairment of goodwill on November 30th and considers its business to be one reporting unit for the purpose of conducting this assessment. In its assessment, the Company evaluates qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform a quantitative analysis. If qualitative factors indicate that it is more likely than not that an impairment has occurred, the Company is required to conduct a quantitative assessment by estimating the fair value of the reporting unit (based on the Company's market capitalization) and comparing this amount to the carrying value of the reporting unit (as reflected by the Company's total stockholders' equity). Based on the most recent evaluation, the Company determined that its goodwill was not impaired.

Table of Contents

Intangible assets acquired in a business combination are recorded under the acquisition method of accounting at their estimated fair values at the date of acquisition. As the pattern of consumption of the economic benefits of the intangible assets cannot be reliably determined, the Company amortizes acquired intangible assets over their estimated useful lives on a straight-line basis.

Software and Website Development Costs

The Company follows the guidance of ASC 350-40, *Internal Use Software* and ASC 350-50, *Website Development Costs*, in accounting for its software and website development costs. The costs incurred in the preliminary stages of development are expensed as incurred. Once an application has reached the development stage, internal and external costs, if direct and incremental, are capitalized until the application is substantially complete and ready for its intended use. Because the Company believes the majority of its development efforts are categorized in operation stage (post-implementation), no costs have been capitalized to date. These costs are included in the accompanying statements of operations as research and development expense.

Income Taxes

The Company provides for income taxes under the liability method. Deferred tax assets and liabilities are determined based on differences between financial reporting and tax bases of assets and liabilities and are measured using the enacted tax rates in effect when the differences are expected to reverse. Deferred tax assets are reduced by a valuation allowance to reflect the uncertainty associated with their ultimate realization.

The Company accounts for uncertain tax positions recognized in the consolidated financial statements by prescribing a more-likely-than-not threshold for financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return.

Accounting for Stock-Based Compensation

Stock-based compensation is recognized as an expense in the financial statements based on the grant date fair value of the stock awards granted. For awards that vest based on service conditions, the Company uses the straight-line method to allocate compensation expense for awards expected to vest over the requisite service period of those awards. The grant date fair value of options granted is calculated using the Black-Scholes option-pricing model, which requires the use of subjective assumptions including volatility, expected term, risk-free interest rate, and expected dividend yield.

Recently Issued Accounting Standards

Effective January 1, 2012, the Company adopted ASU No. 2011-08, *Testing Goodwill for Impairment (the revised standard)*. The revised standard is intended to reduce the cost and complexity of the annual goodwill impairment test by providing entities an option to perform a qualitative assessment to determine whether further impairment testing is necessary. The adoption of this guidance did not have an effect on the Company's consolidated financial statements.

Effective January 1, 2012, the Company adopted new guidance applicable to comprehensive income. Under this guidance, the Company can present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. This guidance eliminates the option to present the components of other comprehensive income as part of the statement of changes in stockholders' equity. As the new guidance relates only to how comprehensive income is disclosed and does not change the items that must be reported as comprehensive income, adoption did not have an effect on the Company's consolidated financial statements.

3. Net Loss per Share

The Company calculates basic and diluted net loss per share of common stock by dividing the net loss adjusted for the dividend on the redeemable convertible preferred stock in 2011 by the weighted average number of shares of common stock outstanding during the period. The Company has excluded (a) all unvested restricted shares of common stock that are subject to repurchase and (b) the Company's other potentially dilutive shares, which include redeemable and convertible preferred stock in 2011, a warrant for redeemable convertible preferred stock in 2011 and common stock in 2012, and outstanding options to purchase common stock, from the weighted average number of shares of common stock outstanding as their inclusion in the computation for all periods would be anti-dilutive due to net losses. The Company's redeemable and convertible preferred stock are participating securities as defined by ASC 260-10, *Earnings Per Share*, but are excluded from the earnings per share calculation in 2011 as they did not have an obligation to share in the Company's net losses.

Table of Contents

The following table presents the number of potentially dilutive shares of common stock that, as of the end of the period, have been excluded from the computation of diluted weighted-average shares outstanding as they would be anti-dilutive (in thousands):

	Three and Nine Months Ended September 30,	
	2012	2011
Options to purchase common stock	3,190	2,055
Warrant	11	11
Restricted stock		14
Total	3,201	2,080

4. Fair Value of Financial Instruments

The Company applies the guidance in ASC 820, *Fair Value Measurements and Disclosures*, (ASC 820), which provides that fair value is based on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. In order to increase consistency and comparability in fair value measurements, ASC 820 establishes a fair value hierarchy that prioritizes observable and unobservable inputs used to measure fair value into three broad levels, which are described below:

Level 1: Quoted prices (unadjusted) in active markets that are accessible at the measurement date for assets or liabilities. The fair value hierarchy gives the highest priority to Level 1 inputs.

Level 2: Other inputs that are observable directly or indirectly, such as quoted prices for similar assets and liabilities or market corroborated inputs.

Level 3: Unobservable inputs are used when little or no market data is available, which requires the Company to develop its own assumptions about how market participants would value the assets or liabilities. The fair value hierarchy gives the lowest priority to Level 3 inputs.

In determining fair value, the Company utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs to the extent possible in its assessment of fair value.

The Company's assets and liabilities that are measured at fair value on a recurring basis, by level, within the fair value hierarchy are summarized as follows (in thousands):

	September 30, 2012				December 31, 2011			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Assets:								
Cash equivalents	\$ 38,079	\$	\$	\$ 38,079	\$ 40,943	\$	\$	\$ 40,943
Marketable securities		7,508		7,508		12,684		12,684
Total	\$ 38,079	\$ 7,508	\$	\$ 45,587	\$ 40,943	\$ 12,684	\$	\$ 53,627

In addition, the Company's \$1.0 million accrual of remaining lease payments related to its Boston data center closure is a level 3 fair value measure.

5. Accrued Expenses

Accrued expenses consist of the following (in thousands):

Edgar Filing: Carbonite Inc - Form 10-Q

	September 30, 2012	December 31, 2011
Accrued compensation	\$ 1,895	\$ 2,706
Accrued media spend	2,712	1,223
Accrued other expenses	2,163	1,070
Accrued lease exit charge	1,022	
Total accrued expenses	\$ 7,792	\$ 4,999

Table of Contents**6. Stock-based Awards**

The Company's 2005 Stock Incentive Plan (the "2005 Plan") provided for granting of incentive stock options, non-qualified options, restricted stock, or other awards to the Company's employees, officers, directors, and outside consultants up to an aggregate of 3,601,551 shares of the Company's common stock. In conjunction with the effectiveness of the 2011 Equity Award Plan (the "2011 Plan"), the Board of Directors voted that no further stock options or other equity-based awards would be granted under the 2005 Plan.

In 2011, the Company's Board of Directors and stockholders adopted the 2011 Plan, which became effective concurrently with the consummation of the Company's initial public offering on August 11, 2011. The 2011 Plan provides for the issuance of stock options, restricted stock, and other stock-based awards to the employees, officers, directors, and consultants of the Company or its subsidiaries. In connection with the approval of the plan, the Company reserved 1,662,000 shares of common stock for issuance under the 2011 Plan. On January 1st of each year, beginning on January 1, 2012, the number of shares reserved under the 2011 Plan will increase by the lesser of 1,500,000 shares, 4.0% of the outstanding shares of common stock and common stock equivalents, or another amount determined by the Company's Board of Directors.

As of September 30, 2012, 794,917 shares of common stock were available for future grant under the 2011 Plan.

Stock Options

Stock options granted to employees generally vest over a three- or four-year period, and expire ten years from the date of grant. Certain option awards provide for accelerated vesting if there is a change of control, as defined in the 2005 Plan or 2011 Plan, as applicable. The Company has generally granted stock options at exercise prices not less than the fair market value of its common stock on the date of grant.

The Company estimates the fair value of stock options on the date of grant using the Black-Scholes option-pricing model. The determination of the fair value of stock option awards on the date of grant using this option-pricing model is affected by the Company's stock price, as well as a number of complex and highly subjective variables, including expected stock price volatility, expected term of an award, risk-free interest rate, and expected dividend yield.

Incentive Unit Agreements

In 2011, the Company's Board of Directors adopted the Incentive Unit Plan, which provides up to an aggregate of 60,000 incentive units ("Units") to certain employees of its subsidiary in China to afford these employees the benefit of any appreciation in the value of the Company. The Units have a five year term and vest upon a performance condition, which has been satisfied, and a service period of up to four years. Upon vesting, the recipients of Units are entitled to a cash bonus based on the difference between the fair value of the Company's stock and the base value set forth in their respective Incentive Units Agreements. As of September 30, 2012, 17,860 Units are outstanding with a weighted average base value of \$9.31. These outstanding Units are being accounted for as liability awards, with \$22 thousand included in accrued expenses and other long-term liabilities at September 30, 2012. In January 2012, the Company's Board of Directors determined that it would not issue any further grants pursuant to the Incentive Unit Plan.

Stock-based Compensation Expense

Stock-based compensation is reflected in the consolidated statement of operations as follows (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2012	2011	2012	2011
Cost of revenues	\$ 113	\$ 55	\$ 314	\$ 142
Research and development	259	163	825	358
General and administrative	413	91	1,178	202
Sales and marketing	230	102	657	261
Total stock-based compensation expense	\$ 1,015	\$ 411	\$ 2,974	\$ 963

7. Income Taxes

Edgar Filing: Carbonite Inc - Form 10-Q

For the three and nine months ended September 30, 2012, the Company recorded a tax provision of \$10 thousand and \$30 thousand, respectively, related to tax amortization of goodwill. The Company did not provide for income taxes in 2011 due to net losses.

The Company has evaluated the positive and negative evidence bearing upon the realizability of its deferred tax assets. As required by the provisions of ASC 740, *Accounting for Uncertainty in Income Taxes*, management has determined that it is more-likely-than-not that the Company will not utilize the benefits of federal and state deferred tax assets for financial reporting purposes. Accordingly, the deferred tax assets have been fully reserved at September 30, 2012 and December 31, 2011.

Table of Contents

The statute of limitations for assessment by the Internal Revenue Service (IRS) and state tax authorities is open for tax years ending December 31, 2008, 2009, 2010, and 2011, although carryforward attributes that were generated prior to tax year 2008 may still be adjusted upon examination by the IRS or state tax authorities if they either have been or will be used in a future period. There are currently no federal or state audits in progress.

8. Commitments and Contingencies**Operating Leases**

The Company leases various facilities under leases that expire at varying dates through 2016. Certain of these leases contain renewal options, and require the Company to pay operating costs, including property taxes, insurance, and maintenance.

The Company has lease agreements to rent office space in Boston, Massachusetts (corporate headquarters), Lewiston, Maine, Princeton, New Jersey, and Beijing, China, expiring in 2016 or earlier. The Company has lease agreements to rent data center space in Wakefield, Massachusetts and Phoenix, Arizona, expiring in 2016 or earlier. The terms of several of these leases include escalating rent and free rent periods. Accordingly, the Company recorded a deferred rent liability related to the free rent and escalating rent payments and rent is being recognized on a straight-line basis over the terms of the leases. At both September 30, 2012 and December 31, 2011, \$0.4 million is included in accrued expenses and other long-term liabilities related to the deferred rent.

Future non-cancellable minimum lease payments under all operating leases as of September 30, 2012, are as follows (in thousands):

	Office Leases	Data Center Leases	Total
Remainder of 2012	\$ 350	\$ 389	\$ 739
2013	1,688	1,588	3,276
2014	1,313	1,635	2,948
2015	1,368	1,447	2,815
2016	1,408	63	1,471
Total	\$ 6,127	\$ 5,122	\$ 11,249

Other Non-cancellable Commitments

As of September 30, 2012, the Company had non-cancellable commitments of \$2.3 million payable in the remainder of 2012, \$1.9 million payable in 2013, \$1.2 million payable in 2014, and \$0.1 million payable in 2015, primarily consisting of marketing and technology services contracts.

Litigation

In August 2010, Oasis Research, LLC (Oasis Research) filed a lawsuit against the Company and many other companies in the U.S. District Court for the Eastern District of Texas, alleging, with respect to the Company, that the Company's online backup storage services infringe upon certain patents held by Oasis Research. Oasis Research seeks an award for damages in an unspecified amount. A trial date has been set for March 4, 2013. Neither the ultimate outcome of this litigation nor an estimate of a probable loss or any reasonably possible losses can be assessed at this time. The Company intends to defend itself vigorously.

In May 2012, Markley Boston, LLC (Markley) filed a lawsuit against the Company in Massachusetts Superior Court seeking \$1.6 million in damages related to the Company's termination of a data center lease. The Company has accrued \$1.0 million, being the aggregate remaining contractual payments under the lease agreement. In addition, as a result of a court order, the Company has presented \$0.5 million as restricted cash on its balance sheet.

In the ordinary course of business the Company is involved in litigation incidental to its business; however, the Company's management is not aware of any pending legal proceeding or other loss contingency, whether asserted or unasserted, affecting the Company for which it might

become liable or the outcome of which management expects to have a material impact on the Company.

Table of Contents**9. Revolving Credit Facility**

The Company renewed its revolving line of credit with a bank that was originally scheduled to terminate August 30, 2012. Pursuant to the amended terms, the Company may borrow up to \$25 million through August 30, 2013. Advances under the line of credit bear interest on the outstanding daily balance, at an annual rate equal to the lender's prime reference rate plus 0.25%. The Company has pledged its accounts receivable, equipment, and shares of its subsidiaries to the lender to secure its obligations under the credit facility, and has also agreed not to grant a security interest in or pledge its intellectual property to any third party. The credit facility contains customary events of default, conditions to borrowings and restrictive covenants, including restrictions on the Company's ability to dispose of assets, make acquisitions, incur additional debt, incur liens, make distributions to stockholders, make investments, or enter into certain types of related party transactions. The credit facility also includes financial and other covenants including covenants to maintain a minimum current ratio, a minimum number of total subscribers, and a requirement that the majority of the Company's cash and investments be held with the bank or one of its affiliates. To date, the Company has not borrowed any amounts under this \$25 million revolving line of credit.

10. Intangible Assets and Goodwill

In June 2011, the Company acquired substantially all of the assets of Phanfare, Inc., for \$1.9 million, net of cash acquired, and the assumption of certain liabilities. Phanfare's service enables users to create, maintain, and share online photo and video albums. The Company maintains the former service, employees, and office location of Phanfare.

The results of operations for the acquisition have been included in the Company's operations since the date of acquisition and were not material for the periods presented.

The acquisition of Phanfare has been accounted for as a purchase of a business and, accordingly, the total purchase price has been allocated to the tangible and identifiable intangible assets acquired and the net liabilities assumed based on their respective fair values on the acquisition date. As a result of the acquisition of Phanfare, the Company recorded goodwill in the amount of \$1.5 million and identifiable intangible assets of \$1.2 million. These identified intangible assets will be amortized on a straight-line basis over their estimated useful lives.

Future estimated amortization expense of acquired intangibles is as follows (in thousands):

Remainder of 2012	\$ 66
2013	266
2014	231
2015	206
2016	86
Total	\$ 855

11. Related Party Transactions

One investor in certain of the Company's prior preferred stock financings is also the Company's Assistant Secretary and primary outside legal counsel. Legal fees paid to this firm totaled \$0.7 million and \$1.7 million for the three months ended September 30, 2012 and 2011, respectively. Legal fees paid to this firm totaled \$1.6 million and \$3.8 million for the nine months ended September 30, 2012 and 2011, respectively. At September 30, 2012 and December 31, 2011, the Company had outstanding payables and accruals to the legal firm of \$0.2 million and \$0.4 million, respectively.

12. Subsequent Events

On October 17, 2012, the Company entered into an agreement to acquire by merger all of the outstanding capital stock of Zmanda, Inc. for \$14.8 million in gross cash consideration. Zmanda licenses and supports commercial versions of the Amanda open source backup software. The Company has not presented the purchase price allocation as the accounting for the acquisition is not yet finalized. The Company is in the process of valuing the assets and liabilities acquired.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our condensed consolidated financial statements and related notes appearing elsewhere in this Quarterly Report on Form 10-Q and our Annual Report on Form 10-K for the fiscal year ended December 31, 2011, as filed on March 7, 2012 with the Securities and Exchange Commission.

Forward-Looking Statements

This Quarterly Report on Form 10-Q contains forward-looking statements that involve risks and uncertainties, as well as assumptions that, if they never materialize or prove incorrect, could cause our results to differ materially from those expressed or implied by such forward-looking statements. The statements contained in this Quarterly Report on Form 10-Q that are not purely historical are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, or Securities Act, and Section 21E of the Securities Exchange Act of 1934, as amended, or Exchange Act. Forward-looking statements are often identified by the use of words such as, but not limited to, anticipate, believe, can, continue, could, estimate, expect, intend, may, will, plan, project, seek, should, target, will, would, and similar expressions or variations intended to identify forward-looking statements. These statements are based on the beliefs and assumptions of our management based on information currently available to management. Such forward-looking statements are subject to risks, uncertainties and other important factors that could cause actual results and the timing of certain events to differ materially from future results expressed or implied by such forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to, those identified below, and those discussed in the section titled Risk Factors included in this Quarterly Report on Form 10-Q. Furthermore, such forward-looking statements speak only as of the date of this report. Except as required by law, we undertake no obligation to update any forward-looking statements to reflect events or circumstances after the date of such statements.

Overview

We are a leading provider of online backup solutions for consumers and small and medium sized business, or SMBs. We provide easy-to-use, affordable, unlimited, and secure online backup solutions with anytime, anywhere access to files stored on our servers, which we call the Carbonite Personal Cloud. We believe that we are the best known brand in the online backup market.

In 2005, we began development of our online backup solution and raised our first capital from investors. We sold the first Carbonite subscription in 2006. In 2010, we introduced our SMB solution, opened our office in Beijing, China, and expanded our management team to better focus on our consumer and SMB markets. We surpassed 100,000 subscribers in 2008, 500,000 subscribers in 2009, and 1,000,000 subscribers in early 2011. As of December 31, 2011, we had subscribers in more than 100 countries, with subscribers based in the U.S. representing 94% of our total revenue for 2011.

We derive our revenue from subscription fees from consumers and SMBs. We charge consumers a \$59 flat fee for one year of unlimited online backup with our Carbonite Home solution. Our Carbonite HomePlus and Carbonite HomePremier solutions provide consumers with additional features at annual prices of \$99 and \$149, respectively. The pricing of all of our consumer solutions is discounted for multi-year subscriptions. Our SMB solutions, Carbonite Business and Carbonite BusinessPremier, allow for an unlimited number of users subject to storage limits and are priced starting at \$229 and \$599 per year, respectively. We charge customers the full subscription amount at the beginning of each subscription period. We initially record a subscription fee as deferred revenue and then recognize it ratably over the subscription period. The annual or multi-year commitments of our customers enhance management's visibility of our revenue and charging customers at the beginning of the subscription period provides working capital.

We are investing aggressively in customer acquisition because we believe that the market for online backup is in the early stages of development. Our largest expense is advertising for customer acquisition, which is recorded as sales and marketing expense. This is comprised of television and radio advertising, online display advertising, print advertising, paid search, direct marketing, and other expenses. Our total advertising expense in 2011, 2010, and 2009 was \$25.1 million, \$23.6 million, and \$10.8 million, respectively, and was \$18.8 million in the nine months ended September 30, 2012. We generally spend more on advertising in the first and third quarters of each year based on the seasonality of customer purchasing patterns and fluctuations in advertising rates.

As we grow our business we continue to invest in additional storage and infrastructure. Our capital expenditures in 2011, 2010, and 2009 were \$13.5 million, \$10.7 million, and \$7.1 million, respectively, and were \$10.2 million in the nine months ended September 30, 2012.

Our revenue has grown from \$19.1 million in 2009 to \$38.6 million in 2010, \$60.5 million in 2011, and \$60.4 million in the nine months ended September 30, 2012. At the same time, our total operating costs have grown from \$29.8 million in 2009 to \$48.2 million in 2010, \$60.9 million in 2011, and \$56.1 million in the nine months ended September 30, 2012, principally as a result of our investment in customer

acquisition. We expect to continue to devote substantial resources to customer acquisition, improving our technologies, and expanding our solutions. In addition, we expect to invest heavily in our operations to support anticipated growth and public company reporting and compliance obligations. We defer revenue over our customers' subscription periods, but expense marketing costs as incurred. As a result of these factors, we expect to continue to incur GAAP operating losses on an annual basis for the foreseeable future.

Our Business Model

We evaluate the profitability of a customer relationship over its lifecycle because of the nature of our business model. As we generally incur customer acquisition costs and capital equipment costs in advance of subscriptions while recognizing revenue ratably over the terms of the subscriptions, a customer relationship may not be profitable or result in positive cash flow at the beginning of the subscription period, even though it may be profitable or result in positive cash flow over the life of the customer relationship. While we offer both annual and multi-year subscriptions to our customers, a significant majority of them are currently on one-year subscription plans. We typically generate positive cash flow during the first year of a multi-year subscription as we charge the subscription fee for the entire period at the beginning of the subscription.

Recent Developments

On October 30, 2012, we entered into a general release and separation agreement with Andrew Keenan, which sets forth the terms of Mr. Keenan's resignation as our chief financial officer. Pursuant to the agreement, Mr. Keenan will continue to serve as our chief financial officer until the earlier of January 31, 2013 or the date on which Mr. Keenan accepts subsequent employment. During this time, Mr. Keenan will be entitled to continued (i) payment of his base salary, (ii) participation in our employee benefits plans, (iii) participation in our management bonus plans, and (iv) vesting of stock options. After Mr. Keenan's resignation is effective, he will be entitled to payments in an amount of up to nine times his current monthly base salary and may be entitled to additional benefits, including accelerated vesting of his stock options. In addition, Mr. Keenan will be permitted to exercise his vested stock options through the second anniversary of the effective date of his resignation. The agreement also includes a release of claims by Mr. Keenan in our favor.

Table of Contents

Key Business Metrics

Our management regularly reviews a number of financial and operating metrics, including the following key metrics, to evaluate our business:

Total customers. We calculate total customers as the number of paid subscriptions from consumers and SMBs at the end of the relevant period. Each consumer subscription covers a single computer; therefore, a consumer with multiple computers would have multiple subscriptions. Each SMB subscription covers all computers of the SMB entity; therefore, an SMB with multiple computers would have one subscription.

Annual retention rate. We calculate annual retention rate as the percentage of customers on the last day of the prior year who remain customers on the last day of the current year, or for quarterly presentations, the percentage of customers on the last day of the comparable quarter in the prior year who remain customers on the last day of the current quarter. Our management uses these measures to determine the stability of our customer base and to evaluate the lifetime value of our customer relationships.

Renewal rate. We define renewal rate for a period as the percentage of customers who renew annual or multi-year subscriptions that expire during the period presented. Renewal rate excludes customers under our discontinued third-party distribution agreements and prior SMB offerings with subscriptions that remain active until cancelled. Our management uses this measure to monitor trends in customer renewal activity.

Bookings. We calculate bookings as revenue recognized during a particular period plus the change in total deferred revenue (excluding deferred revenue recorded in connection with acquisitions) during the same period. Our management uses this measure as a proxy for cash receipts. Bookings represent the aggregate dollar value of customer subscriptions received by us during a period. We initially record a subscription fee as deferred revenue and then recognize it ratably, on a daily basis, over the life of the subscription period.

Free cash flow. We calculate free cash flow as net cash provided by (used in) operating activities, less purchases of property and equipment, and adjusted for any extraordinary items. Our management uses this measure to evaluate our operating results.

Subscription renewals may vary during the year based on the date of our customers' original subscriptions. As we recognize subscription revenue ratably over the subscription period, this generally has not resulted in a material seasonal impact on our revenue, but may result in material monthly and quarterly variances in one or more of the key business metrics described above.

Performance Highlights

The following table presents our performance highlights for the three months ended September 30, 2012 and 2011:

	Three Months Ended September 30, 2012	2011
	(in thousands, except percentage data)	
Total customers	1,385	1,164
Annual retention rate	84%	81%
Renewal rate	81%	82%
Bookings	\$ 24,329	\$ 20,468
Free cash flow	\$ 567	\$ (489)

Our total customers and bookings increased over the periods presented and we are continuing to invest substantially in customer acquisition in an effort to drive future growth in total customers and bookings. While we expect our total customers to continue to increase on an absolute basis, we expect that our annual percentage increase in total customers will decline as our customer base grows.

Edgar Filing: Carbonite Inc - Form 10-Q

In June 2010, we decided to cease distribution of our consumer solutions through legacy third-party distribution channels, and we terminated most of our distribution agreements at that time. Historically, renewal rates for subscriptions purchased through third-party distributors were lower than for direct sales. Excluding renewal activity related to third-party distributor sales, our annual retention rates for both the three months ended September 30, 2012 and 2011 was 86%.

Free cash flow for the three months ended September 30, 2012 increased by \$1.1 million compared to the three months ended September 30, 2011. The increase in free cash flow was due to a \$0.5 million increase in cash flows from operating activity and a \$0.6 decrease in the purchase of property and equipment.

Table of Contents

Key Components of our Consolidated Statements of Operations

Revenue

We derive our revenue from subscription fees from consumers and SMBs. We typically charge a customer's credit card the full price of the subscription at the commencement of the subscription period and at each renewal date, unless the customer decides not to renew the subscription. We initially record a customer subscription fee as deferred revenue and then recognize it ratably, on a daily basis, over the life of the subscription period.

Cost of revenue

Cost of revenue consists primarily of costs associated with our data center operations and customer support centers, including wages and benefits for personnel, depreciation of equipment, rent, utilities and broadband, equipment maintenance, software license fees, and allocated overhead. The expenses related to hosting our services and supporting our customers are related to the number of customers and the complexity of our services and hosting infrastructure. We expect these expenses to increase in absolute dollars as we continue to increase our number of customers. On a per subscriber basis, our costs have been decreasing as we achieve economies of scale and purchase equipment and services in larger quantities. There has also been a long term downward trend in the cost of storage equipment and broadband service, which we expect will continue in the future.

Gross profit and gross margin

Gross profit is our revenue less our cost of revenue. Our gross margins have historically expanded due to price increases for our consumer solutions and from economies of scale. We expect this trend to continue.

Operating expenses

Research and development. Research and development expenses consist primarily of wages and benefits for development personnel, consulting fees, rent, and depreciation. We have focused our research and development efforts on both improving ease of use and functionality of our existing services and developing new offerings. The majority of our research and development employees are located at our corporate headquarters in the U.S., with another group at our offices in China. We expect that research and development expenses will increase in absolute dollars on an annual basis as we continue to enhance and expand our services.

General and administrative. General and administrative expenses consist primarily of wages and benefits for management, finance, accounting, human resources, legal and other administrative personnel, legal and accounting fees, insurance, and other corporate expenses. We expect to continue to add personnel and enhance our internal information systems in connection with the growth of our business. We expect our general and administrative expenses to increase, given that we have become a public company. We expect our accounting, legal, and personnel-related expenses and directors and officers insurance costs to increase as we have instituted and continue to monitor a more comprehensive compliance and board governance function, maintain and review internal controls over financial reporting in accordance with Section 404 of the Sarbanes-Oxley Act, and prepare and distribute periodic reports, as required by the rules and regulations of the Securities and Exchange Commission. As a result, we expect that our general and administrative expenses will continue to increase in absolute dollars on an annual basis, but decrease as a percentage of revenue.

Sales and marketing. Sales and marketing expenses consist primarily of advertising costs, wages and benefits for sales and marketing personnel, creative expenses for advertising programs, credit card fees, commissions paid to third-party partners and affiliates, and the cost of providing free trials. The largest component of sales and marketing expense is advertising for customer acquisition, principally television, radio, online, and print advertisements. Online search costs consist primarily of pay-per-click payments to search engine operators. Advertising costs are expensed as incurred. To date, marketing and advertising costs have been incurred principally in the U.S., but we may increase our marketing and advertising expenditures in other countries. We expect that we will continue to commit significant resources to our sales and marketing efforts to grow our business and awareness of our brand and services. We expect that sales and marketing expenses will continue to increase in absolute dollars on an annual basis, but decrease as a percentage of revenue.

Lease exit charge. Lease exit charge consists of the accrual of future remaining lease payments associated with the closure of our Boston, Massachusetts data center and moving expenses to relocate equipment formerly hosted in that facility.

Critical Accounting Policies

Edgar Filing: Carbonite Inc - Form 10-Q

Our financial statements are prepared in accordance with accounting principles generally accepted in the U.S., or GAAP. The preparation of our financial statements and related disclosures requires us to make estimates, assumptions, and judgments that affect the reported amount of assets, liabilities, revenue, costs and expenses, and related disclosures. We base our estimates and assumptions on historical experience and other factors that we believe to be reasonable under the circumstances, but all such estimates and assumptions are inherently uncertain and unpredictable. We evaluate our estimates and assumptions on an ongoing basis. Actual results may differ from those estimates and assumptions, and it is possible that other professionals, applying their own judgment to the same facts and circumstances, could develop and support alternative estimates and assumptions that would result in material changes to our operating results and financial condition. Our most critical accounting policies are summarized below.

Table of Contents

We consider the assumptions and estimates associated with revenue recognition, goodwill and acquired intangible assets, income taxes and stock-based compensation to be our critical accounting policies and estimates. There have been no material changes to our critical accounting policies since December 31, 2011. For further information on our critical and other significant accounting policies, see the notes to the condensed consolidated financial statements appearing elsewhere in this Quarterly Report on Form 10-Q and our Annual Report on Form 10-K, as filed on March 7, 2012 with the Securities and Exchange Commission.

Table of Contents**Results of Operations**

The following table sets forth, for the periods presented, data from our consolidated statements of operations as well as the percentage of revenue that each line item represents. The period-to-period comparison of financial results is not necessarily indicative of future results. The information contained in the table below should be read in conjunction with financial statements and related notes included elsewhere in this Quarterly Report on Form 10-Q.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2012	2011	2012	2011
	(% of revenue)			
Consolidated statements of operations data:				
Revenue	100.0%	100.0%	100.0%	100.0%
Cost of revenue	33.4	38.4	34.8	38.0
Gross profit	66.6	61.6	65.2	62.0
Operating expenses:				
Research and development	22.7	27.2	24.4	27.9
General and administrative	12.3	11.6	12.0	10.9
Sales and marketing	47.2	69.6	54.4	63.6
Lease exit charge			1.9	
Total operating expense	82.2	108.4	92.7	102.4
Loss from operations	(15.6)	(46.8)	(27.5)	(40.4)
Interest and other income, net		0.1		0.1
Loss before income taxes	(15.6)	(46.7)	(27.5)	(40.3)
Provision for income taxes	(0.1)		(0.1)	
Net loss	(15.7)%	(46.7)%	(27.6)%	(40.3)%

Comparison of the Three and Nine Months Ended September 30, 2012 and 2011*Revenue*

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2012	2011	Change	2012	2011	Change
	(in thousands, except percentage data)					
Revenue	\$ 21,573	\$ 15,926	35.5%	\$ 60,367	\$ 43,168	39.8%

Revenue increased by \$5.6 million for the three months ended September 30, 2012 compared to the three months ended September 30, 2011, primarily due to a 19% increase in the number of average total customers over the period. Revenue increased \$17.2 million for the nine months ended September 30, 2012 compared to the nine months ended September 30, 2011, primarily due to a 22% increase in the number of average total customers over the period. These increases were driven in part by increased advertising expenditures in prior periods. In addition, the revenue per average subscriber increased 14% and 15%, respectively, for the three and nine months ended September 30, 2012 as compared to the corresponding 2011 periods due to reduced price discounting associated with a shorter average prepaid subscription term for our consumer offerings and the introduction of new premium consumer offerings and the continued growth of our business offerings, both of which are priced higher than our basic consumer offering.

Cost of revenue, gross profit, and gross margin

Edgar Filing: Carbonite Inc - Form 10-Q

	Three Months Ended			Nine Months Ended		
	September 30, 2012	2011	Change	September 30, 2012	2011	Change
	(in thousands, except percentage data)					
Cost of revenue	\$ 7,205	\$ 6,109	17.9%	\$ 20,984	\$ 16,420	27.8%
Gross profit	\$ 14,368	\$ 9,817	46.4%	\$ 39,383	\$ 26,748	47.2%
Gross margin	66.6%	61.6%		65.2%	62.0%	

Table of Contents

Cost of revenue increased by \$1.1 million for the three months ended September 30, 2012 compared to the three months ended September 30, 2011, primarily due to an increase in the total number of customers. The increase in cost of revenue reflects a \$1.0 million increase in personnel costs for our operations and customer support teams, as we added new employees to support customer growth and to replace support operations that were formerly staffed with outsourced personnel. In addition, hosting and depreciation costs increased by \$0.5 million, which was attributable to the scaling of our infrastructure to support our overall customer growth. These increases were partially offset by a \$0.5 million decrease in third-party outsourcing costs as we eliminated our use of outsourced customer support.

Cost of revenue increased by \$4.6 million for the nine months ended September 30, 2012 compared to the nine months ended September 30, 2011, primarily due to an increase in the total number of customers. The increase in cost of revenue reflects a \$4.2 million increase in personnel costs for our operations and customer support teams, as we added new employees to support customer growth and to replace support operations that were formerly staffed with outsourced personnel. In addition, hosting and depreciation costs increased by \$2.3 million, which was attributable to the scaling of our infrastructure to support our overall customer growth. These increases were partially offset by a \$2.0 million decrease in third-party outsourcing costs as we eliminated our use of outsourced customer support.

Operating expenses

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2012	2011	Change	2012	2011	Change
	(in thousands, except percentage data)					
Research and development	\$ 4,890	\$ 4,336	12.8%	\$ 14,759	\$ 12,046	22.5%
General and administrative	\$ 2,658	\$ 1,841	44.4%	\$ 7,271	\$ 4,719	54.1%
Sales and marketing	\$ 10,179	\$ 11,078	(8.1)%	\$ 32,864	\$ 27,436	19.8%
Lease exit charge	\$	\$		\$ 1,174	\$	N/A

Research and development. Research and development expenses increased by \$0.6 million for the three months ended September 30, 2012 compared to the three months ended September 30, 2011 and by \$2.7 million for the nine months ended September 30, 2012 compared to the nine months ended September 30, 2011, primarily due to \$0.3 million and \$2.3 million increases, respectively, in personnel related costs attributable to additional employees hired to enhance the functionality of our solutions and to develop new offerings.

General and administrative. General and administrative expenses increased by \$0.8 million for the three months ended September 30, 2012 compared to the three months ended September 30, 2011 and by \$2.6 million for the nine months ended September 30, 2012 compared to the nine months ended September 30, 2011, primarily due to a \$0.5 million and a \$1.7 million increase, respectively, in personnel related costs as a result of additional employees to support our overall growth and the increased administrative requirements as we operate as a public company. In addition, insurance and professional fees increased \$0.2 million and \$0.4 million, respectively, related to additional costs associated with public company requirements.

Sales and marketing. Sales and marketing expenses decreased by \$0.9 million for the three months ended September 30, 2012 compared to the three months ended September 30, 2011. The decrease was primarily due to a \$1.6 million decrease in advertising and other marketing costs as we reduced our advertising in the interest of efficient customer acquisition. This decrease was partially offset by a \$0.4 million increase in personnel related costs and a \$0.3 million increase in the costs of providing free trials to our customer prospects.

Sales and marketing expenses increased by \$5.4 million for the nine months ended September 30, 2012 compared to the nine months ended September 30, 2011. The increase in sales and marketing expense in the nine months ended September 30, 2012 was primarily due to a \$2.6 million increase in non-advertising marketing costs related to creative and brand development. In addition, personnel related costs increased \$1.6 million and the costs of providing free trials to our customer prospects increased \$1.1 million.

Lease exit charge. Lease exit charge increased by \$1.2 million for the nine months ended September 30, 2012 compared to the nine months ended September 30, 2011. These increases were attributable to the closure of our Boston, Massachusetts data center and the relocation of the equipment formerly hosted in that facility.

Table of Contents**Other Financial Data**

In addition to our results discussed above determined under GAAP, we believe that total customers, annual retention rate, renewal rate, bookings, and free cash flow are useful to investors in evaluating our operating performance. Management considers these financial and operating metrics critical to understanding our business, reviewing our historical performance, measuring and identifying current and future trends, and for planning purposes. Securities analysts also frequently use bookings and free cash flow as supplemental measures to evaluate the overall performances of companies.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2012	2011	2012	2011
	(in thousands, except percentage data)			
Key metrics:				
Total Customers (1)	1,385	1,164	1,385	1,164
Annual retention rate (2)	84%	81%	84%	81%
Renewal rate (3)	81%	82%	81%	82%
Bookings (4)	\$ 24,329	\$ 20,468	\$ 70,954	\$ 57,714
Free cash flow (5)	\$ 567	\$ (489)	\$ (6,149)	\$ (6,858)

- (1) We define total customers as the number of paid subscriptions from consumers and SMBs at the end of the relevant period.
- (2) We define annual retention rate as the percentage of customers on the last day of the prior year who remain customers on the last day of the current year, or for quarterly presentations, the percentage of customers on the last day of the comparable quarter in the prior year who remain customers on the last day of the current quarter.
- (3) We define renewal rate for a period as the percentage of customers who renew annual or multi-year subscriptions that expire during the period presented. Renewal rate excludes customers under our discontinued third-party distribution agreements and prior SMB offering with subscriptions that remain active until cancelled.
- (4) We define bookings as revenue recognized during the period plus the change in total deferred revenue (excluding deferred revenue recorded in connection with acquisitions) during the same period.
- (5) We define free cash flow as net cash provided by (used in) operating activities, less capital expenditures, and adjusted for cash paid related to our lease exit charge.

Bookings and free cash flow are financial data that are not calculated in accordance with GAAP. The tables below provide reconciliation of bookings and free cash flow to revenue and cash provided by (used in) operating activities, respectively, the most directly comparable financial measures calculated and presented in accordance with GAAP.

Our management uses annual retention rate to determine the stability of our customer base and to evaluate the lifetime value of our customer relationships. As customers' annual and multi-year subscriptions come up for renewal throughout the calendar year based on the dates of their original subscriptions, measuring retention on a trailing twelve month basis at the end of each quarter provides our management with useful and timely information about the stability of our customer base. Management uses renewal rate to monitor trends in customer renewal activity.

Our management uses bookings as a proxy for cash receipts. Bookings represents the aggregate dollar value of customer subscriptions received by us during a period. We initially record a subscription fee as deferred revenue and then recognize it ratably, on a daily basis, over the life of the subscription period. Management uses free cash flow as a measure of our operating performance; for planning purposes, including the preparation of our annual operating budget; to allocate resources to enhance the financial performance of our business; to evaluate the effectiveness of our business strategies; to provide consistency and comparability with past financial performance; to determine capital requirements; to facilitate a comparison of our results with those of other companies; and in communications with our board of directors concerning our financial performance. We also use free cash flow as a factor when determining management's incentive compensation. Management believes that the use of free cash flow provides consistency and comparability with our past financial performance, facilitates period to period comparisons of operations, and also facilitates comparisons with other peer companies, many of which use similar non-GAAP financial measures to supplement their GAAP results.

Although bookings and free cash flow are frequently used by investors and securities analysts in their evaluations of companies, bookings and free cash flow have limitations as analytical tools, and you should not consider them in isolation or as substitutes for analysis of our results of operations as reported under GAAP. Some of these limitations are:

Edgar Filing: Carbonite Inc - Form 10-Q

bookings does not reflect our receipt of payment from subscribers;

free cash flow does not reflect our future requirements for contractual commitments to vendors;

Table of Contents

free cash flow does not reflect the non-cash component of employee compensation or depreciation and amortization of property and equipment; and

other companies in our industry may calculate bookings or free cash flow or similarly titled measures differently than we do, limiting their usefulness as comparative measures.

The following tables present reconciliations of our bookings and free cash flow to revenue and cash provided by operating activities, respectively, the most directly comparable financial measures calculated and presented in accordance with GAAP.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2012	2011	2012	2011
	(in thousands)			
Revenue	\$ 21,573	\$ 15,926	\$ 60,367	\$ 43,168
Plus increase in deferred revenue	2,756	4,542	10,587	14,546

	2012	2011	2012	2011
	(in thousands)			
Cash provided by operating activities	\$ 2,388	\$ 1,889	\$ 3,932	\$ 2,710
Plus cash paid related to lease exit charge			157	
Less capital expenditures	(1,821)	(2,378)	(10,238)	(9,568)
Free cash flow	\$ 567	\$ (489)	\$ (6,149)	\$ (6,858)

Liquidity and Capital Resources

As of September 30, 2012, we had cash and cash equivalents of \$58.8 million and marketable securities of \$7.5 million. Our cash and cash equivalents primarily consisted of cash and money market funds. In connection with our initial public offering in August 2011, we received net proceeds of \$55.6 million. Prior to our initial public offering, we had funded our operations primarily through prepayment of subscriptions and the sale of \$68.8 million of preferred stock, all of which was converted into shares of our common stock in connection with our initial public offering. Our principal uses of cash are funding our operations and capital expenditures. In June 2011, we used \$1.9 million of cash to acquire substantially all of the assets of Phanfare, Inc., which operates a service that enables users to create, maintain, and share online photo and video albums. In October 2012, we agreed to acquire by merger all of the outstanding capital stock of Zmanda, Inc. for \$14.8 million in gross cash consideration. Zmanda, Inc. licenses and supports commercial versions of the Amanda open source backup software. We expect the acquisition of Zmanda, Inc. to close during the fourth quarter of 2012.

Sources of funds

We believe, based on our current operating plan, that our existing cash and cash equivalents and borrowings available under our revolving credit facility will be sufficient to meet our anticipated cash needs for at least the next 12 months.

From time to time, we may explore additional financing sources to develop or enhance our services, to fund expansion, to respond to competitive pressures, to acquire or to invest in complementary products, businesses or technologies, or to lower our cost of capital, which could include equity, equity-linked, and debt financing. There can be no assurance that any additional financing will be available to us on acceptable terms, if at all. If we raise additional funds through the issuance of equity or convertible debt or other equity-linked securities, our existing stockholders could suffer significant dilution, and any new equity securities we issue could have rights, preferences and privileges superior to those of holders of our common stock.

Edgar Filing: Carbonite Inc - Form 10-Q

In September 2012, we renewed our revolving bank credit facility in order to extend the term of the facility through August 31, 2013 and increase the maximum amount of indebtedness that we may incur to \$25 million. Advances under the credit facility bear interest on the outstanding daily balance, at an annual rate equal to the lender's prime reference rate plus 0.25%. We have pledged our accounts receivable, equipment, and shares of our subsidiaries to the lender to secure our obligations under the credit facility. We have also agreed not to grant a security interest in or pledge our intellectual property to any third party. The credit facility contains customary events of default, conditions to borrowings and restrictive covenants, including restrictions on our ability to dispose of assets, make acquisitions, incur additional debt, incur liens, make distributions to our stockholders, make investments, or enter into certain types of related party transactions. The credit facility also includes financial and other covenants including covenants to

Table of Contents

maintain a minimum current ratio, a minimum number of total subscribers, and a restriction as to where we may hold the majority of our cash and investments. To date, we have not drawn down on our revolving credit facility. Any inability to meet our debt service obligations could adversely affect our financial position and liquidity.

Uses of funds

We have increased our operating and capital expenditures in connection with the growth in our operations and the increase in our personnel, and we anticipate that we will continue to increase such expenditures in the future. Our future capital requirements may vary materially from those now planned and will depend on many factors, including:

the levels of advertising and promotion required to acquire and retain customers;

expansion of our data center infrastructure necessary to support our growth;

growth of our operations in the U.S. and worldwide;

our development and introduction of new solutions; and

the expansion of our sales, customer support, research and development, and marketing organizations.

Consistent with previous periods, future capital expenditures will focus on acquiring additional data storage and hosting capacity and general corporate infrastructure. We are not currently party to any purchase contracts related to future capital expenditures, other than short-term purchase orders.

Cash flows

The following table summarizes our cash flow data for the nine months ended September 30, 2012 and 2011.

	Nine Months Ended September 30,	
	2012	2011
	(in thousands)	
Net cash provided by operating activities	\$ 3,932	\$ 2,710
Net cash used in investing activities	(5,744)	(1,517)
Net cash provided by financing activities	761	56,612

Operating activities

Our cash flows from operating activities are significantly influenced by the amount of our net loss, growth in subscription sales and customer growth, changes in working capital accounts, the timing of prepayments and payments to vendors, add-backs of non-cash expense items such as depreciation, and the expense associated with stock-based compensation.

In the nine months ended September 30, 2012, cash provided by operating activities was \$3.9 million, which was driven by a \$10.6 million increase in deferred revenue associated with the increase in subscription sales and customer growth. In addition, net cash inflows from operating activities included non-cash charges of \$12.1 million, including \$7.9 million of depreciation and amortization, \$3.0 million of stock based compensation, and a \$1.0 million non-cash lease exit charge. These cash inflows were partially offset by our net loss of \$16.7 million and other changes in working capital that resulted in a use of cash of \$2.1 million, due primarily to the timing of payments and customer receipts.

Edgar Filing: Carbonite Inc - Form 10-Q

In the nine months ended September 30, 2011, cash provided by operating activities was \$2.7 million, which was primarily driven by a \$14.5 million increase in deferred revenue associated with the increase in subscription sales and customer growth. Net cash inflows from operating activities included non-cash charges of \$6.6 million, including \$5.7 million of depreciation and amortization and \$1.0 million of stock based compensation. These cash inflows were partially offset by a \$1.2 million increase in prepaid expenses and other current assets, a \$0.2 million increase in accounts receivable, and our net loss of \$17.4 million.

Investing activities

In the nine months ended September 30, 2012, cash used in investing activities was \$5.7 million, consisting of capital expenditures of \$10.2 million primarily for computer servers, storage, and other data center equipment and \$5.0 million in purchases of marketable securities, net of maturities. A restricted cash balance of \$0.5 million was established during the period related to litigation with a former vendor regarding our termination of a data center lease.

In the nine months ended September 30, 2011, cash used in investing activities was \$1.5 million, consisting primarily of proceeds from short-term investments of \$10.0 million, offset by capital expenditures of \$9.6 million primarily for server equipment and other data center infrastructure and the use of \$1.9 million of net cash in connection with the acquisition of substantially all of the assets of Phanfare, Inc.

Table of Contents*Financing activities*

Cash provided by financing activities in the nine months ended September 30, 2012 was \$0.8 million, consisting of net proceeds from the exercise of stock options.

Cash provided by financing activities in the nine months ended September 30, 2011 was \$56.6 million, consisting primarily of net proceeds from our initial public offering.

Off-balance sheet arrangements

As of September 30, 2012, we did not have any off-balance sheet arrangements.

Contractual obligations

The following table summarizes our contractual obligations at September 30, 2012 and the effect such obligations are expected to have on our liquidity and cash flow in future periods.

		Payment Due by Period		
		Less		
		Than 1		
	Total	Year	1-3 Years	3-5 Years
		(in thousands)		
Office lease obligations	\$ 6,127	\$ 1,632	\$ 2,678	\$ 1,817
Hosting facility lease obligations	5,122	1,576	3,293	253
Other purchase commitments	5,536	3,800	1,736	
 Total	 \$ 16,785	 \$ 7,008	 \$ 7,707	 \$ 2,070

The commitments under our office lease obligations shown above consist primarily of lease payments for our Boston, Massachusetts corporate headquarters and our Lewiston, Maine customer support facility.

We also lease small amounts of general office space in Princeton, New Jersey and Beijing, China under lease agreements that expire at various dates through March 2014.

Our Boston, Massachusetts headquarters lease expires on December 31, 2016.

Our Lewiston, Maine support facility lease expires on June 1, 2016. We may terminate this lease at any time after May 31, 2013. The lease contains a renewal option for an additional three years, and requires us to pay a proportion of increases in operating expenses and real estate taxes after January 1, 2013.

The commitment under our hosting facility obligations shown above consist of our Wakefield, Massachusetts and Phoenix, Arizona data centers.

In March 2012, we discontinued the use of our Boston, Massachusetts data center and relocated our equipment and operations from that facility to our other data centers in Massachusetts. Future payments under the lease are not reflected in the table above, but rather we have recorded the present value of such future payments as a liability at the time of the data center closure.

Other purchase commitments shown above consist of contractual commitments to various vendors primarily for advertising, marketing, and broadband services, including our hosted services agreement related to our Somerville, Massachusetts data center.

Recent Accounting Pronouncements

None.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Quantitative and Qualitative Disclosures about Market Risk

We are exposed to market risks in the ordinary course of our business. These risks include primarily interest rate fluctuation risks, foreign exchange risks and inflation.

Table of Contents

Interest Rate Fluctuation Risk

Our cash consists of interest bearing bank accounts. We did not have long-term borrowings as of September 30, 2012. Interest income is sensitive to changes in the general level of U.S. interest rates. The primary objective of our investment activities is to preserve principal while maximizing income without significantly increasing risk. Our cash and short-term investments are relatively insensitive to interest rate changes. In future periods, we will continue to evaluate our investment policy in order to ensure that we continue to meet our overall objectives. In the event that we borrow under our revolving credit facility, which bears interest at the lender's prime rate plus 0.25%, we would be exposed to interest rate fluctuations.

Foreign Currency Exchange Risk

We have foreign currency risks related to our operating expenses and potential revenue denominated in currencies other than the U.S. dollar, principally the Chinese Yuan. We do not believe movements in the foreign currencies in which we transact will significantly affect future net earnings. Foreign currency risk can be quantified by estimating the change in cash flows resulting from a hypothetical 10% adverse change in foreign exchange rates. We believe such a change would not have a material impact on our results of operations.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as of September 30, 2012. The term "disclosure controls and procedures," as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on the evaluation of our disclosure controls and procedures as of September 30, 2012, our Chief Executive Officer and Chief Financial Officer concluded that, as of such date, our disclosure controls and procedures were effective at the reasonable assurance level.

Changes in Internal Control over Financial Reporting

There was no change in our internal control over financial reporting identified in connection with the evaluation required by Rule 13a-15(d) and 15d-15(d) of the Exchange Act that occurred during the period covered by this report that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Inherent Limitations on Effectiveness of Controls

Our management, including our Chief Executive Officer and Chief Financial Officer, believes that our disclosure controls and procedures and internal control over financial reporting are designed to provide reasonable assurance of achieving their objectives and are effective at the reasonable assurance level. However, our management does not expect that our disclosure controls and procedures or our internal control over financial reporting will prevent all errors and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, have been detected. These inherent limitations include the realities that judgments in decision making can be faulty, and that breakdowns can occur because of a simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people or by management override of the controls. The design of any system of controls is also based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, controls may become inadequate because of changes in conditions, or the degree of compliance with policies or procedures may deteriorate. Because of the inherent limitations in a cost effective control system, misstatements due to error or fraud may occur and not be detected.

Table of Contents

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

In August 2010, Oasis Research, LLC, or Oasis Research, filed a lawsuit against us and several of our competitors and other online technology companies in the U.S. District Court for the Eastern District of Texas, alleging that our online backup storage services, and the other companies products or services, infringe certain of Oasis Research's patents. Oasis Research seeks an award for damages in an unspecified amount. Oasis Research does not currently seek an injunction. A trial date has been set for March 4, 2013. We are not able to assess with certainty the outcome of this lawsuit or the amount or range of potential damages or future payments associated with this lawsuit at this time.

In March 2012, Markley Boston, LLC filed a lawsuit against us in Massachusetts Superior Court seeking \$1.6 million in damages related to our termination of a data center lease.

While we are not able to assess with certainty the outcome of these lawsuits, we intend to defend ourselves and prosecute our counterclaims vigorously. However, any litigation is subject to inherent uncertainties, and there can be no assurance that the expenses associated with defending these lawsuits or their resolution will not have a material adverse impact on our business, operations, financial condition, or cash flows. In addition to these lawsuits, from time to time, we have been and may become involved in legal proceedings arising in the ordinary course of our business. Although the results of litigation and claims cannot be predicted with certainty, we are not presently involved in any other legal proceeding in which the outcome, if determined adversely to us, would be expected to have a material adverse effect on our business, operating results, or financial condition. Regardless of the outcome, litigation can have an adverse impact on us because of defense and settlement costs, diversion of management resources, and other factors.

Table of Contents**ITEM 1A. RISK FACTORS**

An investment in our common stock involves a high degree of risk. You should carefully consider the risks described below and the other information in this Quarterly Report on Form 10-Q before making an investment decision. Our business, prospects, financial condition, or operating results could be harmed by any of these risks, as well as other risks not currently known to us or that we currently consider immaterial. The trading price of our common stock could decline due to any of these risks, and, as a result, you may lose all or part of your investment.

Risks Related to Our Business

We have experienced losses and negative cash flow since our inception, and we may not be able to achieve or sustain profitability or positive cash flow in the future.

We experienced net losses of \$19.2 million for 2009, \$25.8 million for 2010, \$23.5 million for 2011, and \$16.7 million for the nine months ended September 30, 2012, respectively, and have an accumulated deficit of \$117.2 million as of September 30, 2012. We have not generally achieved positive cash flow from our operations or reported net income, and we do not expect to be profitable for the foreseeable future. We expect to continue making significant expenditures to develop and expand our business, including for advertising, customer acquisition, technology infrastructure, storage capacity, product development, and international expansion, in an effort to increase and service our customer base. In 2011, we incurred increased expenses associated with relocating our customer service operations from India to the U.S., which adversely affected our operating results for 2011. In 2012, we incurred increased expenses associated with the relocation of one of our data centers to a new facility. We also expect that our quarterly results may fluctuate due to a variety of factors described elsewhere in this Quarterly Report on Form 10-Q, including the timing and amount of our advertising expenditures, which are seasonal, as well as the timing and amount of expenditures related to the development of technologies and solutions and to defend intellectual property infringement and other claims. In addition, as a public company, we incur significant legal, accounting and other expenses, including increased costs for director and officer liability insurance that we did not incur as a private company. We may also incur increased losses and negative cash flow in the future for a number of reasons, and we may encounter unforeseen expenses, difficulties, complications, delays, and other unknown events. For these reasons, we expect to continue to record net losses for the next several years and we may not be able to achieve or maintain positive cash flow from operations or profitability.

Any significant disruption in our service or loss or misuse of our customers' data could damage our reputation and harm our business and operating results.

Our brand, reputation, and ability to attract, retain, and serve our customers are dependent upon the reliable performance of our service and our customers' ability to readily access their stored files. Our customers rely on our online backup service to store digital copies of their valuable data files, including financial records, business information, photos, and other personally meaningful content. Our data centers are vulnerable to damage or interruption from human error, intentional bad acts, computer viruses or hackers, earthquakes, hurricanes, floods, fires, war, terrorist attacks, power losses, hardware failures, systems failures, telecommunications failures, and similar events, any of which could limit our customers' ability to access their files and could prevent us from being able to continuously back up our customers' files. Prolonged delays or unforeseen difficulties in connection with adding storage capacity or upgrading our network architecture when required may cause our service quality to suffer. A breach of our network security and systems could also cause the loss or public disclosure of, or access by third parties to, our customers' stored files. Any event that significantly disrupts our service or exposes our customers' stored files to misuse could damage our reputation and harm our business and operating results, including reducing our revenue, causing us to issue credits to customers, subjecting us to potential liability, harming our renewal rates, or increasing our cost of acquiring new customers.

The market for online backup solutions is competitive, and if we do not compete effectively, our operating results could be harmed.

We compete with both online backup providers and providers of traditional hardware-based backup systems. The market for online backup solutions is competitive and rapidly changing. We directly compete with Prosoftnet, CrashPlan, Mozy (a division of VMWare), Norton Online Backup (provided by Symantec), McAfee Online Backup, SOS Online Backup, and others. Certain of our features, including our remote access service, also compete with current or potential services offered by Apple, Google, Microsoft, Amazon, and others. Certain of our planned features, including the ability to share data with third parties, compete with current or potential services offered by DropBox, Mozy, SugarSync, and others. With the introduction of new technologies and market entrants, we expect competition to intensify in the future. Many of our actual and potential competitors benefit from competitive advantages over us, such as greater name recognition, longer operating histories, more varied services, larger marketing budgets, established marketing relationships, access to larger customer bases, major distribution agreements with computer manufacturers, internet service providers and resellers, and greater financial, technical, and other resources. Some of our competitors may make acquisitions or enter into strategic relationships to offer a more comprehensive service than we do. These combinations may make it more difficult for us to compete effectively. We expect these trends to continue as competitors attempt to strengthen or maintain their market

positions.

Table of Contents

Demand for our online backup solutions is sensitive to price. Many factors, including our advertising, customer acquisition and technology costs, and our current and future competitors' pricing and marketing strategies, can significantly affect our pricing strategies. Certain of our competitors offer, or may in the future offer, lower-priced or free products or services that compete with our solutions. Similarly, certain competitors may use internet-based marketing strategies that enable them to acquire customers at a lower cost than us. There can be no assurance that we will not be forced to engage in price-cutting initiatives, or to increase our advertising and other expenses to attract and retain customers in response to competitive pressures, either of which could have a material adverse effect on our revenue and operating results.

Our limited operating history makes it difficult to evaluate our current business and future prospects.

We have been in existence since 2005, and our revenue has grown rapidly from \$8.2 million in 2008 to \$60.5 million in 2011, representing a compound annual growth rate of 95% over that period. We do not expect that this growth rate will continue in future periods and you should not rely on the revenue growth of any prior quarterly or annual periods as an indication of our future performance. In addition, because we recognize revenue from customers over the terms of their subscriptions, a large portion of our revenue for each quarter reflects deferred revenue from subscriptions entered into during previous quarters, and downturns or upturns in subscription sales or renewals may not be reflected in our operating results until later periods. We may not achieve sufficient revenue to achieve or maintain positive cash flow from operations or profitability, and our limited operating history may make it difficult for you to evaluate our current business and our future prospects. We have encountered and will continue to encounter risks and difficulties frequently experienced by growing companies in rapidly changing industries, including increasing expenses as we continue to grow our business. If we do not manage these risks successfully, our business will be harmed. If our future growth fails to meet investor or analyst expectations, it could have a negative effect on our stock price. If our growth rate were to decline significantly or become negative, it could adversely affect our financial condition and operating results.

A decline in demand for our solutions or for online backup solutions in general could cause our revenue to decline.

We derive, and expect to continue to derive, substantially all of our revenue from the sale of our online backup solutions, a relatively new and rapidly changing market. As a result, widespread acceptance and use of online backup solutions is critical to our future growth and success. If the market for online backup solutions fails to grow or grows more slowly than we currently anticipate, demand for our solutions could be negatively affected. Changes in customer preferences for online backup solutions may have a disproportionately greater impact on us than if we offered multiple products and services. The market for online backup solutions is subject to rapidly changing customer demand and trends in preferences. Some of the potential factors that could affect interest in and demand for online backup solutions include:

awareness of our brand and the online backup solutions category generally;

the appeal and reliability of our solutions;

the price, performance, features, and availability of products and services that compete with ours;

public concern regarding privacy and data security;

our ability to maintain high levels of customer satisfaction; and

the rate of growth in online solutions generally.

In addition, substantially all of our revenue is currently derived from customers in the U.S. Consequently, a decrease of interest in and demand for online backup solutions in the U.S. could have a disproportionately greater impact on us than if our geographic mix of revenue was less concentrated.

If we are unable to attract new customers to our solutions on a cost-effective basis, our revenue and operating results would be adversely affected.

Edgar Filing: Carbonite Inc - Form 10-Q

We generate substantially all of our revenue from the sale of subscriptions to our solutions. In order to grow, we must continue to attract a large number of customers on a cost-effective basis, many of whom have not previously used online backup solutions. We use and periodically adjust a diverse mix of advertising and marketing programs to promote our solutions. Significant increases in the pricing of one or more of our advertising channels would increase our advertising costs or cause us to choose less expensive and perhaps less effective channels. As we add to or change the mix of our advertising and marketing strategies, we may need to expand into channels with significantly higher costs than our current programs, which could adversely affect our operating results. We may incur advertising and marketing expenses significantly in advance of the time we anticipate recognizing any revenue generated by such expenses, and we may only at a later date, or never, experience an increase in revenue or brand awareness as a result of such expenditures. We have made in the past, and may make in the future, significant investments to test new advertising, and there can be no assurance that any such investments will lead to the cost-effective acquisition of additional customers. If we are unable to maintain effective advertising programs, our ability to attract new customers could be adversely affected, our advertising and marketing expenses could increase substantially, and our operating results may suffer.

Table of Contents

A portion of our potential customers locate our website through search engines, such as Google, Bing, and Yahoo!. Our ability to maintain the number of visitors directed to our website is not entirely within our control. If search engine companies modify their search algorithms in a manner that reduces the prominence of our listing, or if our competitors' search engine optimization efforts are more successful than ours, fewer potential customers may click through to our website. In addition, the cost of purchased listings has increased in the past and may increase in the future. A decrease in website traffic or an increase in search costs could adversely affect our customer acquisition efforts and our operating results.

A significant portion of our customers first try our online backup solutions through free trials. We seek to convert these free trial users to paying customers of our solutions. If our rate of conversion suffers for any reason, our revenue may decline and our business may suffer.

If we are unable to retain our existing customers, our revenue and operating results would be adversely affected.

If our efforts to satisfy our existing customers are not successful, we may not be able to retain them, and as a result, our revenue and ability to grow would be adversely affected. We may not be able to accurately predict future trends in customer renewals. Customers choose not to renew their subscriptions for many reasons, including if customer service issues are not satisfactorily resolved, a desire to reduce discretionary spending, or a perception that they do not use the service sufficiently, the service is a poor value, or that competitive services provide a better value or experience. If our customer retention rate decreases, we may need to increase the rate at which we add new customers in order to maintain and grow our revenue, which may require us to incur significantly higher advertising and marketing expenses than we currently anticipate, or our revenue may decline. A significant decrease in our customer retention rate would therefore have an adverse effect on our business, financial condition, and operating results.

Our relationships with our partners may be terminated or may not continue to be beneficial in generating new customers, which could adversely affect our ability to increase our customer base.

We maintain a network of active partners, which refer customers to us through links on their websites and outbound promotion to their customers. If we are unable to maintain our contractual relationships with existing partners or establish new contractual relationships with potential partners, we may experience delays and increased costs in adding customers, which could have a material adverse effect on us. The number of customers that we are able to add through these relationships is dependent on the marketing efforts of our partners, over which we have very little control.

We have recently introduced additional solutions for mobile devices. If users of these devices do not widely adopt our solutions, our business could be adversely affected.

The number of people who access the internet through devices other than personal computers, including mobile telephones, personal digital assistants, smartphones, and handheld tablets or computers, has increased dramatically in the past few years and is projected to continue to increase. In addition, people are increasingly using their mobile devices to create and store data and other content that is important to them. We recently introduced our initial mobile backup solutions for the iPhone and Android smartphones, however these solutions have not yet achieved widespread adoption. If one or more of our competitors were to launch a similar service, or if we are unsuccessful in achieving widespread adoption of our mobile solutions, our competitive position could be materially harmed. As new devices and new platforms are continually being released, it is difficult to predict the problems we may encounter in developing versions of our solutions for use on these mobile devices, and we may need to devote significant resources to the creation, support, and maintenance of such services, which could adversely affect our operating results.

If we are unable to expand our base of SMB customers, our business could be adversely affected.

In 2010, we introduced the first version of our backup solution targeted toward SMBs, which are generally companies that are too small to have a dedicated in-house IT staff. We are committing substantial resources to the expansion and increased marketing of our SMB offerings. If we are unable to market and sell our solutions to SMBs with competitive pricing and in a cost-effective manner, our ability to grow our revenue and achieve profitability will be harmed. We expect it will be more difficult and expensive to attract and retain SMB customers than consumers, because SMBs:

are difficult to reach without using more expensive, targeted sales campaigns;

Edgar Filing: Carbonite Inc - Form 10-Q

may have different or much more complex needs than those of individual consumers, such as archiving, version control, enhanced security requirements and other forms of encryption and authentication, which our solutions may not adequately address; and

frequently cease operations due to the sale or failure of their business.

In addition, SMBs frequently have limited budgets and are more likely to be significantly affected by economic downturns than larger, more established companies. As a result, they may choose to spend funds on items other than our solutions, particularly during difficult economic times. If we are unsuccessful in meeting the needs of potential SMB customers, it could adversely affect our future growth and operating results.

Table of Contents

If we are unable to improve market recognition of and loyalty to our brand, or if our reputation were to be harmed, we could lose customers or fail to increase the number of our customers, which could harm our revenue, operating results, and financial condition.

Given our consumer and SMB market focus, maintaining and enhancing the Carbonite brand is critical to our success. We believe that the importance of brand recognition and loyalty will increase in light of increasing competition in our markets. We plan to continue investing substantial resources to promote our brand, both domestically and internationally, but there is no guarantee that our brand development strategies will enhance the recognition of our brand. Some of our existing and potential competitors have well-established brands with greater recognition than we have. If our efforts to promote and maintain our brand are not successful, our operating results and our ability to attract and retain customers may be adversely affected. In addition, even if our brand recognition and loyalty increases, this may not result in increased use of our solutions or higher revenue.

Our offerings, as well as those of our competitors, are regularly reviewed in computer and business publications. Negative reviews, or reviews in which our competitors' products and services are rated more highly than our solutions, could negatively affect our brand and reputation. From time-to-time, our customers express dissatisfaction with our solutions, including, among other things, dissatisfaction with our customer support, our billing policies, and the way our solutions operate. If we do not handle customer complaints effectively, our brand and reputation may suffer, we may lose our customers' confidence, and they may choose not to renew their subscriptions. In addition, many of our customers participate in online blogs about computers and internet services, including our solutions, and our success depends in part on our ability to generate positive customer feedback through such online channels where consumers seek and share information. If actions we take or changes we make to our solutions upset these customers, their blogging could negatively affect our brand and reputation. Complaints or negative publicity about our solutions or billing practices could adversely impact our ability to attract and retain customers and our business, financial condition, and operating results.

The termination of our relationship with any major credit card company would have a severe, negative impact on our ability to collect revenue from customers. Increases in credit card processing fees would increase our operating expenses and adversely affect our operating results.

Substantially all of our customers purchase our solutions online with credit cards, and our business depends upon our ability to offer credit card payment options. The termination of our ability to process payments on any major credit card would significantly impair our ability to operate our business and significantly increase our administrative costs related to customer payment processing. If we fail to maintain our compliance with the data protection and documentation standards adopted by the major credit card issuers and applicable to us, these issuers could terminate their agreements with us, and we could lose our ability to offer our customers a credit card payment option. If these issuers increase their credit card processing fees because we experience excessive chargebacks or refunds or for other reasons, it could adversely affect our business and operating results.

Any significant disruption in service on our websites or in our computer systems could damage our reputation and result in a loss of customers, which would harm our business, financial condition and operating results.

Our brand, reputation, and ability to attract, retain and serve our customers are dependent upon the reliable performance of our websites, network infrastructure and payment systems, and our customers' ability to readily access their stored files. We have experienced interruptions in these systems in the past, including server failures that temporarily slowed down our websites' performance and our customers' ability to access their stored files, or made our websites and infrastructure inaccessible, and we may experience interruptions in the future. In addition, while we operate and maintain the primary elements of our websites and network infrastructure, some elements of this complex system are operated by third parties that we do not control and that would require significant time to replace. We expect this dependence on third parties to continue. In particular, a portion of our solution is hosted by Amazon Web Services, which provides us with computing and storage capacity pursuant to an agreement that continues until terminated by either party. Interruptions in our systems or the third-party systems on which we rely, whether due to system failures, computer viruses, physical or electronic break-ins, or other factors, could affect the security or availability of our websites and infrastructure and prevent us from being able to continuously back up our customers' data or our customers from accessing their stored data.

In addition, prolonged delays or unforeseen difficulties in connection with adding storage capacity or upgrading our network architecture when required may cause our service quality to suffer. Problems with the reliability or security of our systems could harm our reputation. Damage to our reputation and the cost of remedying these problems could negatively affect our business, financial condition, and operating results.

Our systems provide redundancy at the disk level, but do not keep separate, redundant copies of stored customer files. Instead, we rely on the fact that our customers, in effect, back up our system by maintaining the primary instance of their files. We do not intend to create redundant backup sites for our solutions. As such, a total failure of our systems, or the failure of any of our systems, could result in the loss of or a temporary inability to back up our customers' data and result in our customers being unable to access their stored files. If one of our data centers fails at the same time that our customers' computers fail, we would be unable to provide stored copies of their data. If this were to occur, our

reputation could be compromised and we could be subject to liability to the customers that were affected.

Table of Contents

Our data centers are vulnerable to damage or interruption from human error, intentional bad acts, pandemics, earthquakes, hurricanes, floods, fires, war, terrorist attacks, power losses, hardware failures, systems failures, telecommunications failures, and similar events. As the majority of our data facilities are located in a single metropolitan area, we may be more susceptible to the risk that a single event could significantly harm the operations of these facilities. The occurrence of a natural disaster, power failure or an act of terrorism, vandalism or other misconduct, a decision to close the facilities without adequate notice, or other unanticipated problems could result in lengthy interruptions in our services. The occurrence of any of the foregoing events could damage our systems and hardware or could cause them to fail completely, and our insurance may not cover such events or may be insufficient to compensate us for the potentially significant losses, including the potential harm to the future growth of our business, that may result from interruptions in our service as a result of system failures.

We depend on data centers operated by third parties and any disruption in the operation of these facilities could adversely affect our business.

We host our services and serve all of our customers from our network servers, which are located in data center facilities operated by third parties. While we control and have access to our servers and all of the components of our network that are located in our external data centers, we do not control the operation of these facilities. Our data center leases expire at various times in 2015 and 2016 with rights of extension, and a separate data center hosting arrangement is cancellable by us upon 120 days notice. If we are unable to renew these agreements on commercially reasonable terms, we may be required to transfer our servers to new data center facilities, and we may incur significant costs and possible service interruption in connection with doing so. During the first half of 2012, we relocated our equipment and operations from our Boston, Massachusetts data center to our other data centers and discontinued the use of our Boston, Massachusetts data center. We incurred moving and other costs in connection with this transition.

Problems faced by our third-party data center locations, with the telecommunications network providers with whom we or they contract, or with the systems by which our telecommunications providers allocate capacity among their customers, including us, could adversely affect the experience of our customers. Our third-party data center operators could decide to close their facilities without adequate notice. In addition, any financial difficulties, such as bankruptcy, faced by our third-party data center operators or any of the service providers with whom we or they contract may have negative effects on our business, the nature and extent of which are difficult to predict. Additionally, if our data centers are unable to keep up with our growing needs for capacity, this could have an adverse effect on our business. Any changes in third-party service levels at our data centers or any errors, defects, disruptions, or other performance problems with our services could harm our reputation and may damage our customers' stored files. Interruptions in our services might reduce our revenue, cause us to issue credits or refunds to customers, subject us to potential liability, or harm our renewal rates.

If the security of our customers' confidential information stored in our systems is breached or their stored files are otherwise subjected to unauthorized access, our reputation and business may be harmed, and we may be exposed to liability.

Our customers rely on our online system to store digital copies of their files, including financial records, business information, photos, and other personally meaningful content. We also store credit card information and other personal information about our customers. A breach of our network security and systems or other events that cause the loss or public disclosure of, or access by third parties to, our customers' stored files could have serious negative consequences for our business, including possible fines, penalties and damages, reduced demand for our solutions, an unwillingness of customers to provide us with their credit card or payment information, an unwillingness of our customers to use our solutions, harm to our reputation and brand, loss of our ability to accept and process customer credit card orders, and time-consuming and expensive litigation. Third parties may be able to circumvent our security by deploying viruses, worms, and other malicious software programs that are designed to attack or attempt to infiltrate our systems and networks and we may not immediately discover these attacks or attempted infiltrations. Further, outside parties may attempt to fraudulently induce our employees, consultants, or affiliates to disclose sensitive information in order to gain access to our information or our customers' information. The techniques used to obtain unauthorized access, disable or degrade service, or sabotage systems change frequently, often are not recognized until launched against a target, and may originate from less regulated or remote areas around the world. As a result, we may be unable to proactively address these techniques or to implement adequate preventative or reactionary measures. In addition, employee or consultant error, malfeasance, or other errors in the storage, use, or transmission of personal information could result in a breach of customer or employee privacy. We maintain insurance coverage to mitigate the potential financial impact of these risks; however, our insurance may not cover all such events or may be insufficient to compensate us for the potentially significant losses, including the potential damage to the future growth of our business, that may result from the breach of customer or employee privacy.

Many states have enacted laws requiring companies to notify individuals of data security breaches involving their personal data. These mandatory disclosures regarding a security breach often lead to widespread negative publicity, which may cause our customers to lose confidence in the effectiveness of our data security measures. Any security breach, whether successful or not, would harm our reputation and could cause the loss of customers. Similarly, if a well-publicized breach of data security at any other online backup

Table of Contents

service provider or other major consumer website were to occur, there could be a general public loss of confidence in the use of the internet for online backup services or commercial transactions generally. Any of these events could have material adverse effects on our business, financial condition, and operating results.

We process, store and use personal information and other data, which subjects us to governmental regulation and other legal obligations related to privacy, and our actual or perceived failure to comply with such obligations could harm our business.

We receive, store, and process personal information and other customer data. There are numerous federal, state, local, and foreign laws regarding privacy and the storing, sharing, use, processing, disclosure and protection of personal information and other customer data, the scope of which are changing, subject to differing interpretations, and may be inconsistent among countries or conflict with other rules. We generally seek to comply with industry standards and are subject to the terms of our privacy policies and privacy-related obligations to third parties. We strive to comply with all applicable laws, policies, legal obligations and industry codes of conduct relating to privacy and data protection to the extent possible. However, it is possible that these obligations may be interpreted and applied in a manner that is inconsistent from one jurisdiction to another and may conflict with other rules or our practices. Any failure or perceived failure by us to comply with our privacy policies, our privacy-related obligations to customers or other third parties, or our privacy-related legal obligations, or any compromise of security that results in the unauthorized release or transfer of personally identifiable information or other customer data, may result in governmental enforcement actions, litigation, or public statements against us by consumer advocacy groups or others and could cause our customers to lose trust in us, which could have an adverse effect on our reputation and business. Our customers may also accidentally disclose their passwords or store them on a mobile device which is lost or stolen, creating the perception that our systems are not secure against third party access. Additionally, if third parties we work with, such as vendors or developers, violate applicable laws or our policies, such violations may also put our customers' information at risk and could in turn have an adverse effect on our business. Any significant change to applicable laws, regulations or industry practices regarding the use or disclosure of our customers' data, or regarding the manner in which the express or implied consent of customers for the use and disclosure of such data is obtained, could require us to modify our services and features, possibly in a material manner, and may limit our ability to develop new services and features that make use of the data that our customers voluntarily share with us.

We may not be able to respond to rapid technological changes with new solutions, which could have a material adverse effect on our operating results.

The online backup market is characterized by rapid technological change and frequent new product and service introductions. Our ability to attract new customers and increase revenue from existing customers will depend in large part on our ability to enhance and improve our existing solutions, introduce new features and products and sell into new markets. Customers may require features and capabilities that our current solutions do not have. Our failure to develop solutions that satisfy customer preferences in a timely and cost-effective manner may harm our ability to renew our subscriptions with existing customers and create or increase demand for our solutions, and may adversely impact our operating results.

The introduction of new services by competitors or the development of entirely new technologies to replace existing offerings could make our solutions obsolete or adversely affect our business and operating results. In addition, any new markets or countries into which we attempt to sell our solutions may not be receptive. We may experience difficulties with software development, design, or marketing that could delay or prevent our development, introduction, or implementation of new solutions and enhancements. We have in the past experienced delays in the planned release dates of new features and upgrades, and have discovered defects in new solutions after their introduction. There can be no assurance that new solutions or upgrades will be released according to schedule, or that when released they will not contain defects. Either of these situations could result in adverse publicity, loss of revenue, delay in market acceptance, or claims by customers brought against us, all of which could have a material adverse effect on our reputation, business, operating results, and financial condition. Moreover, upgrades and enhancements to our solutions may require substantial investment and we have no assurance that such investments will be successful. If customers do not widely adopt enhancements to our solutions, we may not be able to realize a return on our investment. If we are unable to develop, license, or acquire enhancements to our existing solutions on a timely and cost-effective basis, or if such enhancements do not achieve market acceptance, our business, operating results, and financial condition may be adversely affected.

Table of Contents

Our quarterly operating results have fluctuated in the past and may continue to do so in the future. As a result, we may fail to meet or exceed the expectations of securities analysts or investors, which could cause our stock price to decline.

Our quarterly operating results may fluctuate as a result of a variety of factors, many of which are outside of our control. If our quarterly operating results or guidance fall below the expectations of securities analysts or investors, the price of our common stock could decline substantially. The following factors, among others, could cause fluctuations in our quarterly operating results or guidance:

our ability to attract new customers and retain existing customers;

our ability to accurately forecast revenue and appropriately plan our expenses;

our ability to introduce new solutions;

the actions of our competitors, including pricing changes or the introduction of new products;

our ability to effectively manage our growth;

the mix of annual and multi-year subscriptions at any given time;

seasonal variations or other cyclicalities in the demand for our solutions, including the purchasing and budgeting cycles of our SMB customers;

the timing and cost of advertising and marketing efforts;

the timing and cost of developing or acquiring technologies, services, or businesses;

the timing, operating cost, and capital expenditures related to the operation, maintenance, and expansion of our business;

service outages or security breaches and any related impact on our reputation;

our ability to successfully manage any future acquisitions of businesses, solutions, or technologies;

the impact of worldwide economic, industry, and market conditions and those conditions specific to internet usage and online businesses;

costs associated with defending intellectual property infringement and other claims; and

Edgar Filing: Carbonite Inc - Form 10-Q

changes in government regulation affecting our business.

We believe that our quarterly revenue and operating results may vary significantly in the future and that period-to-period comparisons of our operating results may not be meaningful. You should not rely on the results of one quarter as an indication of future performance.

Seasonal variations in our business may also cause fluctuations in our financial results. For example, we generally spend more on advertising during the first and third quarters of each year to capitalize on lower advertising rates in these periods and increased sales of devices that create or store data during post-holiday and back to school periods and our bookings tend to be higher in these periods. While we believe that these seasonal trends have affected and will continue to affect our quarterly results, our trajectory of rapid growth may have overshadowed these effects to date. We believe that our business may become more seasonal in the future as our growth rate slows, and that such seasonal variations in advertising expenditures and customer purchasing patterns may result in fluctuations in our financial results.

Growth may place significant demands on our management and our infrastructure.

We have experienced substantial growth in our business. This growth has placed and may continue to place significant demands on our management and our operational and financial infrastructure. As our operations grow in size, scope, and complexity, we will need to improve and upgrade our systems and infrastructure to attract, service, and retain an increasing number of customers. The expansion of our systems and infrastructure will require us to commit substantial financial, operational, and technical resources in advance of an increase in the volume of business, with no assurance that the volume of business will increase. Any such additional capital investments will increase our cost base. Continued growth could also strain our ability to maintain reliable service levels for our customers, develop and improve our operational, financial and management controls, enhance our reporting systems and procedures, and recruit, train, and retain highly skilled personnel. If we fail to achieve the necessary level of efficiency in our organization as we grow, our business, financial condition, and operating results could be harmed.

We may expand by acquiring or investing in other companies, which may divert our management's attention, result in additional dilution to our stockholders, and consume resources that are necessary to sustain our business.

We may in the future acquire complementary products, services, technologies, or businesses. We may also enter into relationships with businesses to expand our portfolio of solutions or our ability to provide our solutions in foreign jurisdictions, which could involve preferred or exclusive licenses, additional channels of distribution, discount pricing, or investments in other companies.

Table of Contents

We do not have substantial experience with integrating and managing acquired businesses or assets. Negotiating these transactions can be time-consuming, difficult and expensive, and our ability to complete these transactions may often be subject to conditions or approvals that are beyond our control. Consequently, these transactions, even if undertaken and announced, may not close.

Acquisitions may also disrupt our business, divert our resources, and require significant management attention that would otherwise be available for the development of our business. Moreover, the anticipated benefits of any acquisition, investment, or business relationship may not be realized or we may be exposed to unknown liabilities, including litigation against the companies we may acquire. For one or more of those transactions, we may:

issue additional equity securities that would dilute our stockholders;

use cash that we may need in the future to operate our business;

incur debt on terms unfavorable to us or that we are unable to repay or that may place burdensome restrictions on our operations;

incur large charges or substantial liabilities; or

become subject to adverse tax consequences, or substantial depreciation, deferred compensation or other acquisition-related accounting charges.

Any of these risks could harm our business and operating results.

We expect that integrating an acquired company's operations may present challenges.

The integration of an acquired company such as our planned acquisition of Zmanda, Inc. requires, among other things, coordination of administrative, sales and marketing, accounting and finance functions and expansion of information and management systems. Integration may prove to be difficult initially due to the necessity of coordinating geographically separate organizations and integrating personnel with disparate business backgrounds and corporate cultures. We may not be able to retain key employees of an acquired company. Additionally, the process of integrating a new product or service may require a disproportionate amount of time and attention of our management and financial and other resources. Any difficulties or problems encountered in the integration of a new product or service could have a material adverse effect on our business.

The integration of an acquired company may cost more than we anticipate, and it is possible that we will incur significant additional unforeseen costs in connection with the integration that may negatively impact our earnings.

In addition, we may only be able to conduct limited due diligence on an acquired company's operations. Following an acquisition, we may be subject to unforeseen liabilities arising from an acquired company's past or present operations. These liabilities may be greater than the warranty and indemnity limitations we negotiate. Any unforeseen liability that is greater than these warranty and indemnity limitations could have a negative impact on our financial condition.

Even if successfully integrated, there can be no assurance that our operating performance after an acquisition will be successful or will fulfill management's objectives.

The loss of one or more of our key personnel, or our failure to attract, integrate, and retain other highly qualified personnel, could harm our business.

We depend on the continued service and performance of our key personnel. We do not have long-term employment agreements with any of our officers or key employees. In addition, many of our key technologies and systems are custom-made for our business by our personnel. The loss of key personnel, including key members of our management team, as well as certain of our key marketing, sales, product development, or

Edgar Filing: Carbonite Inc - Form 10-Q

technology personnel, could disrupt our operations and have an adverse effect on our ability to grow our business. In addition, several of our key personnel have only recently been employed by us, and we are still in the process of integrating these personnel into our operations. Our failure to successfully integrate these key employees into our business could adversely affect our business.

To execute our growth plan, we must attract and retain highly qualified personnel. Competition for these employees is intense, and we may not be successful in attracting and retaining qualified personnel. We have from time to time in the past experienced, and we expect to continue to experience, difficulty in hiring and retaining highly skilled employees with appropriate qualifications. New hires require significant training and, in most cases, take significant time before they achieve full productivity. Our recent hires and planned hires may not become as productive as we expect, and we may be unable to hire or retain sufficient numbers of qualified individuals. Many of the companies with which we compete for experienced personnel have greater resources than we have. In addition, in making employment decisions, particularly in the internet and high-technology industries, job candidates often consider the value of the stock options they are to receive in connection with their employment. In addition, employees may be more likely to leave us if the shares they own or the shares underlying their vested options have significantly appreciated in value relative to the original purchase prices of the shares or the exercise prices of the options, or if the exercise prices of the options that they hold are significantly above the market price of our common stock. If we fail to attract new personnel, or fail to retain and motivate our current personnel, our business and growth prospects could be severely harmed.

Table of Contents

Our corporate culture has contributed to our success, and if we cannot maintain this culture as we grow, we could lose the innovation, creativity, and teamwork fostered by our culture, and our business may be harmed.

We believe that our corporate culture has been a key contributor to our success. If we do not continue to develop our corporate culture as we grow and evolve, including maintaining our culture of transparency with our employees, it could harm our ability to foster the innovation, creativity, and teamwork we believe that we need to support our growth. As our organization grows and we are required to implement more complex organizational structures, we may find it increasingly difficult to maintain the beneficial aspects of our corporate culture, which could negatively impact our future success. In addition, our recently completed initial public offering could create disparities of wealth among our employees, which could adversely impact relations among employees and our corporate culture in general.

Our operating results may be harmed if we are required to collect sales or other related taxes for our subscription services in jurisdictions where we have not historically done so.

We do not believe that we are required to collect sales, use, or other similar taxes from our customers. However, one or more states or countries may seek to impose sales, use, or other tax collection obligations on us, including for past sales by us or our resellers and other partners. A successful assertion by a state, country, or other jurisdiction that we should have or should be collecting sales, use, or other taxes on our services could, among other things, result in substantial tax liabilities for past sales, create significant administrative burdens for us, discourage customers from purchasing our services, or otherwise harm our business and operating results.

Our ability to use net operating losses to offset future taxable income may be subject to certain limitations.

As of December 31, 2011, we had federal, state, and foreign net operating loss carryforwards, or NOLs, of \$89.0 million, \$83.9 million and \$1.0 million, respectively, available to offset future taxable income, which expire in various years through 2032 if not utilized. A lack of future taxable income would adversely affect our ability to utilize these NOLs before they expire. Under the provisions of the Internal Revenue Code of 1986, as amended, or the Internal Revenue Code, substantial changes in our ownership may limit the amount of pre-change NOLs that can be utilized annually in the future to offset taxable income. Section 382 of the Internal Revenue Code, or Section 382, imposes limitations on a company's ability to use NOLs if a company experiences a more-than-50-percent ownership change over a three-year testing period. We performed an analysis of our changes in ownership through December 31, 2011 and have adjusted our NOLs as of that date to reflect the usage limitations, calculated in accordance with Section 382, resulting from such changes in ownership. If additional changes in our ownership occur in the future, our ability to use NOLs may be further limited. For these reasons, we may not be able to utilize a material portion of the NOLs, even if we achieve profitability. If we are limited in our ability to use our NOLs in future years in which we have taxable income, we will pay more taxes than if we were able to fully utilize our NOLs. This could adversely affect our operating results and the market price of our common stock.

Any expenses or liability resulting from litigation could adversely affect our operating results and financial condition.

From time to time, we may be subject to claims or litigation, including intellectual property litigation as described elsewhere in this Quarterly Report on Form 10-Q. Any such claims or litigation may be time-consuming and costly, divert management resources, require us to change our services, require us to credit or refund subscription fees, or have other adverse effects on our business. Any of the foregoing could have a material adverse effect on our operating results and could require us to pay significant monetary damages. In addition, we receive and must respond on a periodic basis to subpoenas from law enforcement agencies seeking information in connection with criminal investigations. While we have in place a procedure to respond to such subpoenas, any failure on our part to properly respond to such subpoena requests could expose us to litigation or other proceedings and adversely affect our business, financial condition, and operating results.

Our success depends on our customers' continued high-speed access to the internet and the continued reliability of the internet infrastructure.

Our business depends on our customers' high-speed access to the internet, as well as the continued maintenance and development of the internet infrastructure. The future delivery of our solutions will depend on third party internet service providers to expand high-speed internet access, to maintain a reliable network with the necessary speed, data capacity and security, and to develop complementary products and services, including high-speed modems, for providing reliable and timely internet access and services. All of these factors are out of our control. To the extent that the internet continues to experience an increased number of users, frequency of use, or bandwidth requirements, the internet may become congested and be unable to support the demands placed on it, and its performance or reliability may decline. Any internet outages or delays could adversely affect our ability to provide services to our customers.

Table of Contents

Our business may be significantly impacted by a change in the economy, including any resulting effect on consumer spending.

Our business may be affected by changes in the economy generally, including any resulting effect on consumer spending. Our services are discretionary purchases, and our customers may reduce their discretionary spending on our services during an economic downturn. Although we have not yet experienced a material reduction in subscription renewals, we may experience such a reduction in the future, especially in the event of a prolonged recessionary period. Conversely, media prices may increase in a period of economic growth, which could significantly increase our marketing and advertising expenses. As a result, our business, financial condition, and operating results may be significantly affected by changes in the economy generally.

Table of Contents

We face many risks associated with our plans to expand internationally, which could harm our business, financial condition, and operating results.

We anticipate that our efforts to expand internationally will entail the marketing and advertising of our services and brand and the development of localized websites. We do not have substantial experience in selling our solutions in international markets or in conforming to the local cultures, standards, or policies necessary to successfully compete in those markets, and we must invest significant resources in order to do so. We may not succeed in these efforts or achieve our customer acquisition or other goals. For some international markets, customer preferences and buying behaviors may be different, and we may use business or pricing models that are different from our traditional subscription model to provide online backup and related services to customers. Our revenue from new foreign markets may not exceed the costs of establishing, marketing, and maintaining our international offerings, and therefore may not be profitable on a sustained basis, if at all.

In addition, conducting international operations subjects us to new risks that we have not generally faced in the U.S. These risks include:

localization of our solutions, including translation into foreign languages and adaptation for local practices and regulatory requirements;

lack of experience in other geographic markets;

strong local competitors;

cost and burden of complying with, lack of familiarity with, and unexpected changes in foreign legal and regulatory requirements, including consumer and data privacy laws;

difficulties in managing and staffing international operations;

fluctuations in currency exchange rates or restrictions on foreign currency;

potentially adverse tax consequences, including the complexities of transfer pricing, foreign value added or other tax systems, double taxation and restrictions and/or taxes on the repatriation of earnings;

dependence on third parties, including channel partners with whom we do not have extensive experience;

compliance with the Foreign Corrupt Practices Act, economic sanction laws and regulations, export controls, and other U.S. laws and regulations regarding international business operations;

increased financial accounting and reporting burdens and complexities;

political, social, and economic instability abroad, terrorist attacks, and security concerns in general; and

Edgar Filing: Carbonite Inc - Form 10-Q

reduced or varied protection for intellectual property rights in some countries.

Operating in international markets also requires significant management attention and financial resources. The investment and additional resources required to establish operations and manage growth in other countries may not produce desired levels of revenue or profitability.

Our software contains encryption technologies, certain types of which are subject to U.S. and foreign export control regulations and, in some foreign countries, restrictions on importation and/or use. Any failure on our part to comply with encryption or other applicable export control requirements could result in financial penalties or other sanctions under the U.S. export regulations, including restrictions on future export activities, which could harm our business and operating results. Regulatory restrictions could impair our access to technologies that we seek for improving our solutions and may also limit or reduce the demand for our solutions outside of the U.S.

We may not be able to maintain control of our business in China.

The government of the People's Republic of China, or PRC, restricts foreign investment in internet and online advertising businesses. Accordingly, we operate our online backup business in China through an affiliated entity in China owned by an individual designated by us who is a PRC citizen. We have entered into contractual arrangements with our affiliated entity and its individual stockholder that are intended to protect our technologies and business. We have loaned funds to the designated individual in order to enable the individual to form the affiliated entity and obtain any necessary licenses, including an Internet Content Provider (ICP) license, which was granted by the PRC government, and we expect to continue to loan funds to the designated individual in the future. All loans are, and will continue to be, secured by the capital stock of the affiliated entity and the designated individual stockholder has granted us the contractual right to exercise his rights as the sole stockholder of the affiliated entity.

Table of Contents

We cannot assure you, however, that we will be able to enforce these contracts. We have no equity ownership interest in the affiliated entity and we rely on contractual arrangements with the entity and the designated individual stockholder to control and operate the entity. These contractual arrangements may not be as effective in providing control over the affiliated entity as direct ownership. For example, the entity could fail to take actions required for, or beneficial to, our business or fail to maintain our websites despite its contractual obligations to do so. In addition, we cannot assure you that the individual shareholder of the affiliated entity will always act in our best interests. If the individual stockholder of our affiliated entity fails to perform his obligations under the respective agreements with us, we may need to engage in litigation in China to enforce our rights, which may be time-consuming and costly, divert management resources, or have other adverse effects on our business, and we may not be successful in enforcing our rights.

Enforcing agreements and laws in China is difficult and may be impossible because China does not have a comprehensive system of laws.

In China, enforcement of contractual agreements may be sporadic, and implementation and interpretation of laws may be inconsistent. The PRC judiciary is relatively inexperienced in interpreting agreements and enforcing China's laws, leading to a higher than usual degree of uncertainty as to the outcome of any litigation. Even where adequate law exists in China, it may not be possible to obtain swift and equitable enforcement of such law, or to obtain enforcement of a judgment or an arbitration award by a court of another jurisdiction. The PRC government has exercised and continues to exercise substantial control over virtually every aspect of the Chinese economy through regulation and state ownership. Many of the current reforms that support private business in China are of recent origin or are provisional in nature. Other political, economic and social factors, such as political changes, changes in the rates of economic growth, unemployment, or inflation, or in the disparities of per capita wealth among citizens of China and between regions within China, could also lead to further readjustment of the PRC government's reform measures. It is not possible to predict whether the PRC government will continue to be as supportive of private business in China, nor is it possible to predict how any future reforms will affect our business.

Specifically, the laws and regulations governing our business or the enforcement and performance of our proposed contractual arrangements with our affiliated Chinese entity and the designated individual stockholder are relatively new and may be subject to change, and their official interpretation and enforcement may involve substantial uncertainty. New laws and regulations that affect our business may also be applied retroactively. We cannot assure you that the PRC government would agree that the operating arrangements of our affiliated Chinese entity comply with PRC licensing, registration, or other regulatory requirements, with existing policies, or with requirements or policies that may be adopted in the future. For example, in September 2011, the PRC Ministry of Commerce stated that the relevant departments of the PRC government are jointly considering additional regulation of the type of investment structure that we use, which is based on the approach used by other non-PRC companies with respect to their conduct of businesses that require an ICP license. If the PRC government determines that we do not comply with applicable law, it could revoke our business and operating licenses and those of our affiliated Chinese entity, including our affiliated entity's ICP license, require us to restructure our operations, require us to discontinue or restrict our operations, restrict our right to collect revenue, block our websites, impose additional conditions or requirements with which we may not be able to comply, impose restrictions on our business operations or on our customers, or take other regulatory or enforcement actions against us that could be harmful to our business.

In addition, because of the particular weakness of the Chinese intellectual property regime, it is often difficult to create and enforce intellectual property rights in China. Accordingly, we may not be able to effectively protect our intellectual property rights in China against infringement by other business entities, individuals, and current or former employees.

Risks Related to Intellectual Property

Assertions by a third party that our solutions infringe its intellectual property, whether or not correct, could subject us to costly and time-consuming litigation or expensive licenses. We are currently a defendant in a lawsuit alleging patent infringement.

There is frequent litigation in the software and technology industries based on allegations of infringement or other violations of intellectual property rights. Many companies are devoting significant resources to obtaining patents that could affect many aspects of our business. Third parties may claim that our technologies or solutions infringe or otherwise violate their patents or other intellectual property rights. As we face increasing competition and become increasingly visible as a publicly-traded company, or if we become more successful, the possibility of new third party claims may increase.

We have licensed proprietary technologies from third parties that we use in our technologies and business, and we cannot be certain that the owners' rights in their technologies will not be challenged, invalidated, or circumvented. If we are forced to defend ourselves against intellectual property infringement claims, whether they have merit or are determined in our favor, we may face costly litigation, diversion of technical and management personnel, limitations on our ability to use our current websites and technologies, and an inability to market or provide our solutions. As a result of any such claim, we may have to develop or acquire non-infringing technologies, pay damages, enter into royalty or licensing agreements, cease providing certain services, adjust our marketing and advertising activities, or take other actions to resolve the claims. These actions, if required, may be costly or unavailable on terms acceptable to us or at all.

Table of Contents

Furthermore, we may acquire proprietary technologies from third parties and may incorporate such technologies in our solutions. In addition to the general risks described above associated with intellectual property and other proprietary rights, we are subject to the additional risk that the seller of such technologies may not have appropriately created, maintained, or enforced such rights in such technology.

In August 2010, Oasis Research, LLC, or Oasis Research, filed a lawsuit against us and several of our competitors and other online technology companies in the U.S. District Court for the Eastern District of Texas, alleging that our online backup storage services and other companies products or services infringe certain of Oasis Research's patents. Oasis Research seeks an award for damages in an unspecified amount. Oasis Research does not currently seek an injunction. A trial date has been set for March 4, 2013. We are not able to assess with certainty the outcome of this litigation or the amount or range of potential damages or future payments associated with this litigation at this time. However, any litigation is subject to inherent uncertainties, and there can be no assurance that the expenses associated with defending this lawsuit or its resolution will not have a material adverse impact on our business, operations, financial condition, or cash flows.

Our success depends in large part on our ability to protect and enforce our intellectual property rights. If we are not able to adequately protect our intellectual property and proprietary technologies to prevent use or appropriation by our competitors, the value of our brand and other intangible assets may be diminished, and our business may be adversely affected.

Our future success and competitive position depend in large part on our ability to protect our intellectual property and proprietary technologies. We rely on a combination of trademark, patent, copyright, and trade secret laws, as well as confidentiality procedures and contractual restrictions, to establish and protect our proprietary rights, all of which provide only limited protection and may not now or in the future provide us with a competitive advantage. CARBONITE and the Carbonite logo are registered trademarks in the U.S. and in over 30 other countries, including countries in the European Union. We have also filed trademark applications for additional marks in the U.S. and other countries, including The Better Backup Plan, Back it up. Get it Back., Because Your Life is On Your Computer, the Carbonite Green Dot logo and Chinese character representations for Carbonite. We cannot assure you that any future trademark registrations will be issued for pending or future applications or that any registered trademarks will be enforceable or provide adequate protection of our proprietary rights. We currently have two issued patents, an additional approved patent pending issuance, and thirteen patents pending approval and review with the United States Patent and Trademark Office. We cannot assure you that any patents will issue from any such patent applications, that patents that issue from such applications will give us the protection that we seek, or that any such patents will not be challenged, invalidated, or circumvented. Any patents that may issue in the future from our pending or future patent applications may not provide sufficiently broad protection and may not be enforceable in actions against alleged infringers.

There can be no assurance that the steps we take will be adequate to protect our technologies and intellectual property, that our trademark and patent applications will lead to registered trademarks or issued patents, that others will not develop or patent similar or superior technologies, products, or services, or that our trademarks, patents, and other intellectual property will not be challenged, invalidated, or circumvented by others. Furthermore, effective trademark, patent, copyright, and trade secret protection may not be available in every country in which our services are available or where we have employees or independent contractors. In addition, the legal standards relating to the validity, enforceability, and scope of protection of intellectual property rights in internet-related industries are uncertain and still evolving.

We may be involved in lawsuits to protect or enforce our patents, which could be expensive and time consuming and could materially harm our business.

The steps we have taken may not adequately protect our intellectual property or prevent unauthorized use of our technologies. Others may independently develop technologies that are competitive to ours or infringe our intellectual property. To counter infringement or unauthorized use, we may be required to file patent infringement claims, which can be expensive and time-consuming to litigate. In addition, in an infringement proceeding, a court may decide that a patent of ours is not valid or is unenforceable, or may refuse to stop others from using the technology at issue on the grounds that our patent(s) do not cover such technology. An adverse determination of any litigation or defense proceedings could put one or more of our patents at risk of being invalidated or interpreted narrowly and could put our patent applications at risk of not being issued. If our efforts to protect our technologies and intellectual property are inadequate, the value of our brand and other intangible assets may be diminished and competitors may be able to mimic our solutions and methods of operations. Any of these events could have a material adverse effect on our business, financial condition, and operating results.

Furthermore, because of the substantial amount of discovery required in connection with intellectual property litigation, there is a risk that some of our confidential information could be compromised by disclosure. In addition, during the course of any such litigation, there could be public announcements of the results of hearings, motions, or other interim proceedings or developments. If securities analysts or investors perceive these results to be negative, it could have a substantial adverse effect on the price of our common stock.

Table of Contents

Confidentiality agreements with employees and others may not adequately prevent disclosure of our trade secrets and proprietary information. Failure to protect our proprietary information could make it easier for third parties to compete with our solutions and harm our business.

We have devoted substantial resources to the development of our proprietary technologies and related processes. In order to protect our proprietary technologies and processes, we rely in part on trade secret laws and confidentiality agreements with our employees, licensees, independent contractors, and other advisors. These agreements may not effectively prevent disclosure of confidential information and may not provide an adequate remedy in the event of unauthorized disclosure of confidential information. In addition, others may independently discover our trade secrets, in which case we would not be able to assert trade secret rights, or develop similar technologies and processes. Further, laws in certain jurisdictions may afford little or no trade secret protection, and any changes in, or unexpected interpretations of, the intellectual property laws in any country in which we operate may compromise our ability to enforce our intellectual property rights. Costly and time-consuming litigation could be necessary to enforce and determine the scope of our proprietary rights, and failure or inability to obtain or maintain trade secret protection or otherwise protect our proprietary rights could adversely affect our business.

Our use of open source software could negatively affect our ability to sell our solutions and subject us to possible litigation.

A portion of the technologies licensed by us to our customers incorporates so-called open source software, and we may incorporate open source software in the future. Such open source software is generally licensed by its authors or other third parties under open source licenses. These licenses may subject us to certain unfavorable conditions, including requirements that we offer our solutions that incorporate the open source software for no cost, that we make publicly available source code for modifications or derivative works we create based upon, incorporating, or using the open source software, and/or that we license such modifications or derivative works under the terms of the particular open source license. Additionally, if a third party software provider has incorporated open source software into software that we license from such provider, we could be required to disclose any of our source code that incorporates or is a modification of such licensed software. If an author or other third party that distributes open source software that we use or license were to allege that we had not complied with the conditions of the applicable license, we could be required to incur significant legal expenses defending against such allegations and could be subject to significant damages, enjoined from the sale of our solutions that contained the open source software, and required to comply with the foregoing conditions. Any of the foregoing could disrupt the distribution and sale of our solutions and harm our business.

We rely on third party software, including server software and licenses from third parties to use patented intellectual property, that is required to develop and provide our solutions.

We rely on software licensed from third parties to develop and offer our solutions, including server software from Microsoft and other patented third-party technologies. In addition, we may need to obtain future licenses from third parties to use intellectual property associated with the development of our solutions, which might not be available to us on acceptable terms, or at all. Any loss of the right to use any software required for the development and maintenance of our solutions could result in delays in the provision of our solutions until equivalent technology is either developed by us, or, if available from others, is identified, obtained, and integrated, which delay could harm our business. Any errors or defects in third party software could result in errors or a failure of our solutions, which could harm our business.

If we are unable to protect our domain names, our reputation, brand, customer base, and revenue, as well as our business and operating results, could be adversely affected.

We have registered domain names for websites, or URLs, that we use in our business, such as www.carbonite.com. If we are unable to maintain our rights in these domain names, our competitors or other third parties could capitalize on our brand recognition by using these domain names for their own benefit. In addition, although we own the Carbonite domain name under various global top level domains such as .com and .net, as well as under various country-specific domains, we might not be able to, or may choose not to, acquire or maintain other country-specific versions of the Carbonite domain name or other potentially similar URLs. Domain names similar to ours have already been registered in the U.S. and elsewhere, and our competitors or other third parties could capitalize on our brand recognition by using domain names similar to ours. The regulation of domain names in the U.S. and elsewhere is generally conducted by internet regulatory bodies and is subject to change. If we lose the ability to use a domain name in a particular country, we may be forced to either incur significant additional expenses to market our solutions within that country, including the development of a new brand and the creation of new promotional materials, or elect not to sell our solutions in that country. Either result could substantially harm our business and operating results. Regulatory bodies could establish additional top-level domains, appoint additional domain name registrars, or modify the requirements for holding domain names. As a result, we may not be able to acquire or maintain the domain names that utilize the name Carbonite in all of the countries in which we currently conduct or intend to conduct business. Further, the relationship between regulations governing domain names and laws protecting trademarks and similar proprietary rights varies among jurisdictions and is unclear in some jurisdictions. We may be unable to prevent third parties from acquiring and using domain names that infringe, are similar to, or otherwise decrease the value of, our brand or our trademarks. Protecting and enforcing our rights in our domain names and determining the rights of others may require litigation, which could result in substantial costs, divert management attention,

and not be decided favorably to us.

Table of Contents

Material defects or errors in our software could harm our reputation, result in significant costs to us, and impair our ability to sell our solutions.

The software applications underlying our solutions are inherently complex and may contain material defects or errors, particularly when first introduced or when new versions or enhancements are released. We have from time to time found defects or errors in our solutions, and new defects or errors in our existing solutions may be detected in the future by us or our customers. The costs incurred in correcting such defects or errors may be substantial and could harm our operating results. In addition, we rely on hardware purchased or leased and software licensed from third parties to offer our solutions. Any defects in, or unavailability of, our or third party software or hardware that cause interruptions to the availability of our solutions could, among other things:

cause a reduction in revenue or delay in market acceptance of our solutions;

require us to issue credits or refunds to our customers or expose us to claims for damages;

cause us to lose existing customers and make it more difficult to attract new customers;

divert our development resources or require us to make extensive changes to our solutions or software, which would increase our expenses;

increase our technical support costs; and

harm our reputation and brand.

Risks Related to Ownership of our Common Stock

Our stock price may be volatile due to fluctuations in our operating results and other factors, each of which could cause our stock price to decline.

Shares of our common stock were sold in our initial public offering in August 2011 at a price of \$10.00 per share, and our common stock has subsequently traded as high as \$21.10 and as low as \$5.75. An active, liquid, and orderly market for our common stock may not be developed or sustained, which could depress the trading price of our common stock. The market price for shares of our common stock could be subject to significant fluctuations in response to various factors, some of which are beyond our control. Some of the factors that may cause the market price for shares of our common stock to fluctuate include:

fluctuations in our quarterly financial results or the quarterly financial results of companies perceived to be similar to us;

actual or anticipated fluctuations in our key operating metrics, financial condition, and operating results;

loss of existing customers or inability to attract new customers;

actual or anticipated changes in our growth rate;

Edgar Filing: Carbonite Inc - Form 10-Q

announcements of technological innovations or new offerings by us or our competitors;

our announcement of actual results for a fiscal period that are lower than projected or expected or our announcement of revenue or earnings guidance that is lower than expected;

changes in estimates of our financial results or recommendations by securities analysts;

failure of any of our solutions to achieve or maintain market acceptance;

changes in market valuations of similar companies;

success of competitive products or services;

changes in our capital structure, such as future issuances of securities or the incurrence of debt;

announcements by us or our competitors of significant products or services, contracts, acquisitions, or strategic alliances;

regulatory developments in the U.S. or foreign countries;

actual or threatened litigation involving us or our industry;

additions or departures of key personnel;

general perception of the future of the online backup market or our solutions;

share price and volume fluctuations attributable to inconsistent trading volume levels of our shares;

sales of our shares of common stock by us or our stockholders; and

changes in general economic, industry, and market conditions.

In addition, the stock market in general, and the market for internet-related companies in particular, has experienced extreme price and volume fluctuations that have often been unrelated or disproportionate to the operating performance of those companies. Securities class action litigation has often been instituted against companies following periods of volatility in the overall market and in

Table of Contents

the market price of a company's securities. This litigation, if instituted against us, could result in very substantial costs, divert our management's attention and resources, and harm our business, financial condition, and operating results. In addition, recent fluctuations in the financial and capital markets have resulted in volatility in securities prices.

If we fail to maintain proper and effective internal controls, our ability to produce accurate and timely financial statements could be impaired, which could harm our operating results, our ability to operate our business, and investors' views of us.

Ensuring that we have adequate internal financial and accounting controls and procedures in place so that we can produce accurate financial statements on a timely basis is a costly and time-consuming effort that needs to be evaluated frequently. As part of our process of documenting and testing our internal control over financial reporting, we may identify areas for further attention and improvement. Implementing any appropriate changes to our internal controls may distract our officers and employees, entail substantial costs to modify our existing processes, and take significant time to complete. These changes may not, however, be effective in maintaining the adequacy of our internal controls, and any failure to maintain that adequacy, or consequent inability to produce accurate financial statements on a timely basis, could increase our operating costs and harm our business. In addition, investors' perceptions that our internal controls are inadequate or that we are unable to produce accurate financial statements on a timely basis may harm our stock price and make it more difficult for us to effectively market and sell our solutions to new and existing customers.

Our failure to raise additional capital or generate the cash flows necessary to expand our operations and invest in our business could reduce our ability to compete successfully.

Although we currently anticipate that our available funds, including the net proceeds of our initial public offering and our available bank line of credit, will be sufficient to meet our cash needs for at least the next 12 months, we may require additional financing in the future. Our ability to obtain financing will depend, among other things, on our development efforts, business plans, operating performance and condition of the capital markets at the time we seek financing. If we need to raise additional funds, we may not be able to obtain additional debt or equity financing on favorable terms, if at all. If we raise additional equity financing, our stockholders may experience significant dilution of their ownership interests, and the per share value of our common stock could decline. If we engage in debt financing, we may be required to accept terms that restrict our ability to incur additional indebtedness and force us to maintain specified liquidity or other ratios. If we need additional capital and cannot raise it on acceptable terms, we may not be able to, among other things:

develop or enhance our solutions;

continue to expand our development, sales, and marketing organizations;

acquire complementary technologies, products, or businesses;

expand our operations in the U.S. or internationally;

hire, train, and retain employees;

respond to competitive pressures or unanticipated working capital requirements; or

continue our operations.

A significant portion of our total outstanding shares may be sold into the public market in the near future, which could cause the market price of our common stock to drop significantly, even if our business is doing well.

Edgar Filing: Carbonite Inc - Form 10-Q

Sales of a substantial number of shares of our common stock in the public market, or the perception that such sales could occur, could adversely affect the market price of our common stock. In connection with the expiration on February 26, 2012 of lock-up agreements entered into with the underwriters of our initial public offering, approximately 17.9 million shares of our common stock became eligible for sale by stockholders, subject to applicable volume and other limitations under federal securities laws. In August 2011, we filed a Form S-8 under the Securities Act registering 5,177,658 shares of our common stock for issuance under our equity incentive plans. These shares may be sold in the public market upon issuance, subject to the terms of contractual restrictions. If these additional shares are sold, or if it is perceived that they will be sold, in the public market, the market price of our common stock could decline.

We also may issue shares of our common stock or securities convertible into our common stock from time to time in connection with financing, acquisition, investment, or otherwise. Any such issuance could result in substantial dilution to our existing stockholders and cause the market price of our common stock to decline.

Table of Contents

Our directors, executive officers, and principal stockholders have substantial control over us and could delay or prevent a change in corporate control.

Our directors, executive officers, and holders of more than 5% of our common stock, together with their affiliates, beneficially hold a majority of our outstanding shares of common stock and have the ability to control the outcome of matters submitted to our stockholders for approval, including the election of directors and any merger, consolidation, or sale of all or substantially all of our assets. In addition, these stockholders, acting together, may have the ability to control or influence the management and affairs of our company. This concentration of ownership could limit your ability to influence corporate matters and may have the effect of delaying or preventing a change in control of our company.

If securities or industry analysts do not publish or cease publishing research or reports about us, our business, or our market, or if they change their recommendations regarding our stock adversely, our stock price and trading volume could decline.

The trading market for our common stock will be influenced by the research and reports that industry or securities analysts may publish about us, our business, our market, or our competitors. If any of the analysts who cover us change their recommendation regarding our stock adversely, or provide more favorable relative recommendations about our competitors, our stock price would likely decline. If any analyst who covers us were to cease coverage of our company or fail to regularly publish reports on us, we could lose visibility in the financial markets, which in turn could cause our stock price or trading volume to decline.

Our management will continue to have broad discretion over the use of the proceeds we received in our initial public offering and might not apply the proceeds in ways that increase the value of your investment.

Our management will continue to have broad discretion to use our net proceeds from our initial public offering, and you will be relying on the judgment of our management regarding the application of these proceeds. Our management might not apply these proceeds in ways that increase the value of your investment. We intend to use the net proceeds from the initial public offering primarily for general corporate purposes, including working capital, sales and marketing activities, general and administrative matters, and capital expenditures. We may also use a portion of the net proceeds to acquire, invest in, or obtain rights to complementary technologies, solutions, or businesses. Until we use the net proceeds from the initial public offering, we plan to invest them, and these investments may not yield a favorable rate of return. If we do not invest or apply the net proceeds from the initial public offering in ways that enhance stockholder value, we may fail to achieve expected financial results, which could cause our stock price to decline.

We do not currently intend to pay dividends on our common stock and, consequently, your ability to achieve a return on your investment will depend on appreciation in the price of our common stock.

We have never declared or paid any cash dividends on our common stock and do not intend to do so for the foreseeable future. We currently intend to invest our future earnings, if any, to fund our growth and continuing operations. In addition, the provisions of our revolving credit facility prohibit us from paying cash dividends. Therefore, you are not likely to receive any dividends on your shares of common stock for the foreseeable future and the success of an investment in shares of our common stock will depend upon any future appreciation in their value. Our common stock may not appreciate in value or even maintain the price at which our stockholders have purchased their shares.

Anti-takeover provisions contained in our certificate of incorporation and bylaws, as well as provisions of Delaware law, could impair a takeover attempt.

Our certificate of incorporation and bylaws contain provisions that could have the effect of delaying or preventing changes in control or changes in our management without the consent of our board of directors. These provisions include:

a classified board of directors with three-year staggered terms, which may delay the ability of stockholders to change the membership of a majority of our board of directors;

no cumulative voting in the election of directors, which limits the ability of minority stockholders to elect director candidates;

Edgar Filing: Carbonite Inc - Form 10-Q

the exclusive right of our board of directors to elect a director to fill a vacancy created by the expansion of the board of directors or the resignation, death, or removal of a director, which prevents stockholders from being able to fill vacancies on our board of directors;

the ability of our board of directors to determine to issue shares of preferred stock and to determine the price and other terms of those shares, including preferences and voting rights, without stockholder approval, which could be used to significantly dilute the ownership of a hostile acquirer;

a prohibition on stockholder action by written consent, which forces stockholder action to be taken at an annual or special meeting of our stockholders;

Table of Contents

the requirement that a special meeting of stockholders may be called only by the chairman of the board of directors, the chief executive officer, or the board of directors, which may delay the ability of our stockholders to force consideration of a proposal or to take action;

limiting the liability of, and providing indemnification to, our directors and officers;

controlling the procedures for the conduct and scheduling of stockholder meetings;

providing the board of directors with the express power to postpone previously scheduled annual meetings of stockholders and to cancel previously scheduled special meetings of stockholders;

providing that directors may be removed prior to the expiration of their terms by stockholders only for cause; and

advance notice procedures that stockholders must comply with in order to nominate candidates to our board of directors or to propose matters to be acted upon at a stockholders' meeting, which may discourage or deter a potential acquiror from conducting a solicitation of proxies to elect the acquiror's own slate of directors or otherwise attempting to obtain control of us.

These provisions, alone or together, could delay hostile takeovers and changes in control of our company or changes in our management.

As a Delaware corporation, we are also subject to provisions of Delaware law, including Section 203 of the Delaware General Corporation Law, which prevents some stockholders holding more than 15% of our outstanding common stock from engaging in certain business combinations without approval of the holders of substantially all of our outstanding common stock. Any provision of our amended and restated certificate of incorporation or bylaws or Delaware law that has the effect of delaying or deterring a change in control could limit the opportunity for our stockholders to receive a premium for their shares of our common stock, and could also affect the price that some investors are willing to pay for our common stock.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Unregistered Sales of Equity Securities

None.

Use of Proceeds

On August 10, 2011, our registration statement on Form S-1 (File No. 333-174139) was declared effective for our initial public offering. On August 16, 2011, we closed our initial public offering of 7,187,500 shares of common stock at an offering price of \$10.00 per share, of which 6,303,973 shares were sold by us, including 937,500 shares pursuant to the underwriters' option to purchase additional shares, and 883,527 shares were sold by selling stockholders. The underwriters of the offering were Merrill Lynch, Pierce, Fenner & Smith Incorporated, J.P. Morgan Securities LLC, William Blair & Company, L.L.C., Canaccord Genuity Inc., Oppenheimer & Co. Inc., and Pacific Crest Securities Inc. Following the sale of the shares in connection with the closing of our initial public offering, the offering terminated.

As a result of the offering, including the underwriters' option to purchase additional shares, we received net proceeds of \$55.6 million, after deducting total expenses of \$7.4 million, consisting of underwriting discounts and commissions of \$4.4 million and offering-related expenses of \$3.0 million. None of such payments were direct or indirect payments to any of the Company's directors or officers or their associates, to persons owning 10% or more of our common stock, or to any of our affiliates.

The net proceeds to us from our initial public offering have been invested in money market accounts and government and government agency securities.

Edgar Filing: Carbonite Inc - Form 10-Q

There has been no material change in the planned use of proceeds from our initial public offering as described in our prospectus filed with the Securities and Exchange Commission pursuant to Rule 424(b) under the Securities Act.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

Not Applicable.

ITEM 4. MINE SAFETY DISCLOSURES

(1) Filed as Exhibit 3.1 to Registrant Form 10-Q for the quarterly period ended September 30, 2011 filed with the Securities and Exchange Commission on November 10, 2011, and incorporated herein by reference.

(2) Filed as Exhibit 3.2 to Amendment No. 2 to Registrant's Registration Statement on Form S-1 filed with the Securities and Exchange Commission on July 13, 2011, and incorporated herein by reference.

* These certificates are not deemed filed with the Securities and Exchange Commission and are not to be incorporated by reference in any filing we make under the Securities Act of 1933, as amended, or the Securities Exchange Act of 1934, as amended, irrespective of any general incorporation language in any filings.

+ In accordance with Rule 406T of Regulation S-T, these XBRL (eXtensible Business Reporting Language) documents are furnished and not filed or a part of a registration statement or prospectus for purposes of Sections 11 or 12 of the Securities Act of 1933, as amended, or Section 18 of the Securities Exchange Act of 1934, as amended, and otherwise are not subject to liability under these sections.

Indicates a management contract or compensatory plan.
