ERM: Enterprise risk management. McGraw-Hill Companies, Inc.

EVE: Economic value of equity. SCAP: Supervisory Capital Assessment Program administered

FASB: Financial Accounting Standards Board. by the Federal Reserve.

FDIA: Federal Deposit Insurance Act, as amended. SEC: U.S. Securities & Exchange Commission.

FDIC: Federal Deposit Insurance Corporation. Series A Preferred Stock: KeyCorp s 7.750% Noncumulative Perpetual

Convertible Preferred Stock, Series A.

Federal Reserve: Board of Governors of the Federal Reserve System.

SIFIs: Systemically important financial companies, including BHCs with total consolidated assets of at least \$50 billion and nonbank financial companies designated by FSOC for supervision by the

FHLMC: Federal Home Loan Mortgage Corporation. Federal Reserve.

FINRA: Financial Industry Regulatory Authority. SILO: Sale in, lease out transaction.

FNMA: Federal National Mortgage Association. SPE: Special purpose entity.

FOMC: Federal Open Market Committee of the Federal Reserve Board. TDR: Troubled debt restructuring.

FSOC: Financial Stability Oversight Council.

TE: Taxable equivalent.

FVA: Fair value of pension plan assets.

U.S. Treasury: United States Department of the Treasury.

GAAP: U.S. generally accepted accounting principles. VaR: Value at risk.

GNMA: Government National Mortgage Association. VEBA: Voluntary Employee Beneficiary Association.

HUD: U.S. Department of Housing and Urban Development.

Victory: Victory Capital Management and/or Victory Capital Advisors

IRS: Internal Revenue Service. VIE: Variable interest entity.

ISDA: International Swaps and Derivatives Association. XBRL: eXtensible Business Reporting Language.

KAHC: Key Affordable Housing Corporation.

LIBOR: London Interbank Offered Rate.

The consolidated financial statements include the accounts of KeyCorp and its subsidiaries. All significant intercompany accounts and transactions have been eliminated in consolidation. Some previously reported amounts have been reclassified to conform to current reporting practices. The noninterest income line items reported on the consolidated statements of income have been changed for the current quarter and all prior quarters to reflect our current business mix.

The consolidated financial statements include any voting rights entities in which we have a controlling financial interest. In accordance with the applicable accounting guidance for consolidations, we consolidate a VIE if we have: (i) a variable interest in the entity; (ii) the power to direct activities of the VIE that most significantly impact the entity is economic performance; and (iii) the obligation to absorb losses of the entity or the right to receive benefits from the entity that could potentially be significant to the VIE (i.e., we are considered to be the primary beneficiary). Variable interests can include equity interests, subordinated debt, derivative contracts, leases, service agreements, guarantees, standby letters of credit, loan commitments, and other contracts, agreements and financial instruments. See Note 9 (Variable Interest Entities) for information on our involvement with VIEs.

We use the equity method to account for unconsolidated investments in voting rights entities or VIEs if we have significant influence over the entity s operating and financing decisions (usually defined as a voting or economic interest of 20% to 50%, but not controlling). Unconsolidated investments in voting rights entities or VIEs in which we have a voting or economic interest of less than 20% generally are carried at cost. Investments held by our registered broker-dealer and investment company subsidiaries (primarily principal investments) are carried at fair value.

We believe that the unaudited consolidated interim financial statements reflect all adjustments of a normal recurring nature and disclosures that are necessary for a fair presentation of the results for the interim periods presented. The results of operations for the interim period are not necessarily indicative of the results of operations to be expected for the full year. The interim financial statements should be read in conjunction with the audited consolidated financial statements and related notes included in our 2012 Form 10-K.

In preparing these financial statements, subsequent events were evaluated through the time the financial statements were issued. Financial statements are considered issued when they are widely distributed to all shareholders and other financial statement users, or filed with the SEC.

Offsetting Derivative Positions

In accordance with the applicable accounting guidance, we take into account the impact of bilateral collateral and master netting agreements that allow us to settle all derivative contracts held with a single counterparty on a net basis, and to offset the net derivative position with the related collateral when recognizing derivative assets and liabilities. Additional information regarding derivative offsetting is provided in Note 7 (Derivatives and Hedging Activities).

Accounting Guidance Adopted in 2013

Testing indefinite-lived intangible assets for impairment. In July 2012, the FASB issued new accounting guidance that simplifies how an entity tests indefinite-lived intangible assets other than goodwill for impairment. It permits an entity to first assess qualitative factors to determine whether further testing for impairment of indefinite-lived intangible assets other than goodwill is required. This accounting guidance was effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012 (January 1, 2013, for us). The adoption of this accounting guidance did not have a material effect on our financial condition or results of operations.

Offsetting disclosures. In December 2011, the FASB issued new accounting guidance that requires an entity to disclose information about offsetting and related arrangements to enable financial statement users to understand the effect of those arrangements on the entity s financial position. In January 2013, the FASB issued new accounting guidance that clarified the scope of the guidance to include derivatives, repurchase and reverse repurchase agreements, and securities lending and borrowing transactions. This accounting guidance was effective for annual reporting periods beginning on or after January 1, 2013, and interim periods within those annual periods (effective January 1, 2013, for us). Information about our offsetting and related arrangements is provided in Note 12 (Securities Financing Activities).

Reporting of amounts reclassified out of AOCI. In February 2013, the FASB issued new accounting guidance that requires reclassifications of amounts out of AOCI to be reported in a new format. It will not require the reporting of any information that is not currently required to be disclosed under existing GAAP. This accounting guidance was effective prospectively for reporting periods beginning after December 15, 2012 (effective January 1, 2013, for us). The disclosures required by this accounting guidance are provided in Note 16 (Accumulated Other Comprehensive Income).

Accounting Guidance Pending Adoption at March 31, 2013

Reporting of cumulative translation adjustments upon the derecognition of certain investments. In March 2013, the FASB issued new accounting guidance that addresses the accounting for the cumulative translation adjustment when a parent either sells a part or all of its investment in a foreign entity or no longer holds a controlling financial interest in a subsidiary or group of assets that is a nonprofit activity or a business within a foreign entity. This accounting guidance will be effective prospectively for reporting periods beginning after December 15, 2013 (effective January 1, 2014, for us). The adoption of this accounting guidance is not expected to have a material effect on our financial condition or results of operations.

Income (loss) from discontinued operations, net of taxes (a)		0.1		20	
Net income (loss) attributable to Key common shareholders assuming dilution assuming dilution		.21		.20	

⁽a) In April 2009, we decided to wind down the operations of Austin, a subsidiary that specialized in managing hedge fund investments for institutional customers. In September 2009, we decided to discontinue the education lending business conducted through Key Education Resources, the education payment and financing unit of KeyBank National Association. In February 2013, we decided to sell Victory to a private equity fund. As a result of these decisions, we have accounted for these businesses as discontinued operations. For further discussion regarding the income (loss) from discontinued operations see Note 11 (Acquisitions and Discontinued Operations).

⁽b) EPS may not foot due to rounding.

3. Loans and Loans Held for Sale

Our loans by category are summarized as follows:

	March 31,	December 31,	March 31,
in millions	2013	2012	2012
Commercial, financial and agricultural (a)	\$ 23,412	\$ 23,242	\$ 20,217

Balance at end of period	\$ 434	\$	599	\$ 511

4. Asset Quality

We manage our exposure to credit risk by closely monitoring loan performance trends and general economic conditions. A key indicator of the potential for future credit losses is the level of nonperforming assets and past due loans.

Our nonperforming assets and past due loans were as follows:

in millions	March 31, 2013	Dec	ember 31, 2012	March 31, 2012
Total nonperforming loans (a), (b)	\$ 650	\$	674	\$ 666

Restructured loans with an allocated specific allowance (d)	52		114	47
Specifically allocated allowance for restructured loans (e)	30		33	18
Accruing loans past due 90 days or more Accruing loans past due 30 through 89 days	\$ 83 368	\$	78 424	\$ 169 420

- (a) December 31, 2012, includes \$72 million of performing secured loans that were discharged through Chapter 7 bankruptcy and not formally re-affirmed, as addressed in updated regulatory guidance issued in the third quarter of 2012. Such loans have been designated as nonperforming and TDRs.
- (b) March 31, 2013 and December 31, 2012, excludes \$22 million and \$23 million of PCI loans, respectively.
- (c) Includes approximately \$4 million and \$3 million of restructured loans at March 31, 2013 and December 31, 2012, respectively. There were no additional restructured loans at March 31, 2012. See Note 11 (Acquisitions and Discontinued Operations) for further discussion.
- (d) Included in individually impaired loans allocated a specific allowance.
- (e) Included in allowance for individually evaluated impaired loans.

We evaluate purchased loans for impairment in accordance with the applicable accounting guidance. Purchased loans that have evidence of deterioration in credit quality since origination and for which it is probable, at acquisition, that all contractually required payments will not be collected are deemed PCI and initially recorded at fair value without recording an allowance for loan losses. At the date of acquisition, the estimated gross contractual amount receivable of PCI loans totaled \$41 million. The estimated cash flows not expected to be collected (the nonaccretable amount) was \$11 million, and the accretable amount was approximately \$5 million. The difference between the fair value and the cash flows expected to be collected from the purchased loans is accreted to interest income over the remaining term of the loans.

At March 31, 2013, the outstanding unpaid principal balance and carrying value of all PCI loans was \$29 million and \$22 million, respectively. Changes in the accretable yield during 2013 included accretion and net reclassifications of less than \$1 million, resulting in an ending balance of \$4 million at March 31, 2013.

At March 31, 2013, the approximate carrying amount of our commercial nonperforming loans outstanding represented 63% of their original contractual amount, total nonperforming loans outstanding represented 76% of their original contractual amount owed, and nonperforming assets in total were carried at 73% of their original contractual amount.

At March 31, 2013, our twenty largest nonperforming loans totaled \$194 million, representing 30% of total loans on nonperforming status from continuing operations. At March 31, 2012, the twenty largest nonperforming loans totaled \$215 million, representing 32% of total loans on nonperforming status.

Nonperforming loans and loans held for sale reduced expected interest income by \$6 million for the three months ended March 31, 2013, and \$25 million for the year ended December 31, 2012.

15

(a) All TDRs that were restructured prior to January 1, 2012, and are fully accruing.

We classify loan modifications as TDRs when a borrower is experiencing financial difficulties and we have granted a concession to the borrower without commensurate financial, structural, or legal consideration. All commercial and consumer loan TDRs, regardless of size, are evaluated for impairment individually to determine the probable loss content and are assigned a specific loan allowance if deemed appropriate. The financial effects of TDRs are reflected in the components that make up the allowance for loan and lease losses in either the amount of a charge-off or the loan loss provision. These components affect the ultimate allowance level. Additional information regarding TDRs for discontinued operations is provided in Note 11 (Acquisitions and Discontinued Operations).

Commercial loan TDRs are considered defaulted when principal and interest payments are 90 days past due. Consumer loan TDRs are considered defaulted when principal and interest payments are more than 60 days past due. There were 240 consumer loan TDRs with a combined recorded investment of \$14 million which have experienced payment defaults during the first three months of 2013 arising from modifications resulting in TDR status during 2012. There were no significant payment defaults during the first three months of 2013 arising from commercial loans that were designated as TDRs during 2012.

21

Total loans		52,574		52.822		49.226

Our policies for determining past due loans, placing loans on nonaccrual, applying payments on nonaccrual loans and resuming accrual of interest for our commercial and consumer loan portfolios are disclosed in Note 1 (Summary of Significant Accounting Policies) under the heading Nonperforming Loans on page 120 of our 2012 Form 10-K. Pursuant to regulatory guidance issued in January 2012, the above-mentioned policy for nonperforming loans was revised effective for the second quarter of 2012. Beginning in the second quarter of 2012, any second lien home equity loan with an associated first lien that is 120 days or more past due or in foreclosure or for which the first mortgage delinquency timeframe is unknown, is reported as a nonperforming loan. This policy was implemented prospectively, and, therefore, prior periods were not restated or re-presented. Credit card loans on which payments are past due for 90 days are placed on nonaccrual status.

At March 31, 2013, approximately \$51.5 billion, or 97.9%, of our total loans are current. At March 31, 2013, total past due loans and nonperforming loans of \$1.1 billion represent approximately 2.1% of total loans.

22

⁽a) Commitments outstanding to lend additional funds to borrowers whose terms have been modified in TDRs are \$33 million, \$32 million, and \$24 million at March 31, 2013, December 31, 2012, and March 31, 2012, respectively.

⁽b) Concession types for consumer accruing and nonaccruing TDRs consisted primarily of interest rate reductions and modifications due to updated regulatory guidance in the quarters ended March 31, 2013, December 31, 2012, and March 31, 2012, respectively.

The following aging analysis as of March 31, 2013, December 31, 2012, and March 31, 2012, of past due and current loans provides further information regarding Key s credit exposure.

The prevalent risk characteristic for both commercial and consumer loans is the risk of loss arising from an obligor s inability or failure to meet contractual payment or performance terms. Evaluation of this risk is stratified and monitored by the assigned loan risk rating grades for the commercial loan portfolios and the regulatory risk ratings assigned for the consumer loan portfolios. This risk rating stratification assists in the determination of the ALLL. Loan grades are assigned at the time of origination, verified by credit risk management, and periodically reevaluated thereafter.

Most extensions of credit are subject to loan grading or scoring. This risk rating methodology blends our judgment with quantitative modeling. Commercial loans generally are assigned two internal risk ratings. The first rating reflects the probability that the borrower will default on an obligation; the second rating reflects expected recovery rates on the credit facility. Default probability is determined based on, among other factors, the financial strength of the borrower, an assessment of the borrower s management, the borrower s competitive position within its industry sector, and our view of industry risk within the context of the general economic outlook. Types of exposure, transaction structure, and collateral, including credit risk mitigants, affect the expected recovery assessment.

Credit quality indicators for loans are updated on an ongoing basis. Bond rating classifications are indicative of the credit quality of our commercial loan portfolios and are determined by converting our internally assigned risk rating grades to bond rating categories. Payment activity and the regulatory classifications of pass and substandard are indicators of the credit quality of our consumer loan portfolios.

Credit quality indicators for our commercial and consumer loan portfolios, excluding \$22 million of PCI loans at March 31, 2013, based on bond rating, regulatory classification and payment activity as of March 31, 2013, and 2012 are as follows:

Commercial Credit Exposure

- (a) Credit quality indicators are updated on an ongoing basis and reflect credit quality information as of the dates indicated.
- (b) Our past due payment activity to regulatory classification conversion is as follows: pass = less than 90 days; and substandard = 90 days and greater plus nonperforming loans. Beginning in the second quarter of 2012, any second lien home equity loan with an associated first lien that is 120 days or more past due or in foreclosure or for which the first mortgage delinquency timeframe is unknown, is reported as a nonperforming loan in accordance with regulatory guidance issued in January 2012.

We determine the appropriate level of the ALLL on at least a quarterly basis. The methodology is described in Note 1 (Summary of Significant Accounting Policies) under the heading Allowance for Loan and Lease Losses on page 120 of our 2012 Form 10-K. We apply expected loss rates to existing loans with similar risk characteristics as noted in the credit quality indicator table above and exercise judgment to assess the impact of factors such as changes in economic conditions, changes in credit policies or underwriting standards, and changes in the level of credit risk associated with specific industries and markets.

For all commercial and consumer loan TDRs, regardless of size, as well as impaired commercial loans with an outstanding balance greater than \$2.5 million, we conduct further analysis to determine the probable loss content and assign a specific allowance to the loan if deemed appropriate. We estimate the extent of impairment by comparing the recorded investment of the loan with the estimated present value of its future cash flows, the fair value of its underlying collateral, or the loan s observable market price. A specific allowance also may be assigned even when sources of repayment appear sufficient—if we remain uncertain about whether the loan will be repaid in full. On at least a quarterly basis, we evaluate the appropriateness of our loss estimation methods to reduce differences between estimated incurred losses and actual losses. The ALLL at March 31, 2013, represents our best estimate of the probable credit losses inherent in the loan portfolio at that date.

Although quantitative modeling factors such as default probability and expected recovery rates are constantly changing as the financial strength of the borrower and overall economic conditions change, there have been no changes to the accounting policies or methodology we used to estimate the ALLL.

Commercial loans generally are charged off in full or charged down to the fair value of the underlying collateral when the borrower s payment is 180 days past due. Home equity and residential mortgage loans generally are charged down to the fair value of the underlying collateral when payment is 180 days past due. Credit card loans are charged off when payments are 180 days past due. All other consumer loans are charged off when payments are 120 days past due.

At March 31, 2013, the ALLL was \$893 million, or 1.70% of loans, compared to \$944 million, or 1.92% of loans, at March 31, 2012. At March 31, 2013, the ALLL was 137.38% of nonperforming loans, compared to 141.74% at March 31, 2012.

A summary of the allowance for loan and lease losses for the periods indicated is presented in the table below:

	Three months ended March 31,
